TWENTY-NINTH
ANNUAL REPORT

OF THE

Mining Industry of IDAHO

FOR THE YEAR

1927

STEWART CAMPBELL
INSPECTOR OF MINES

57.96

TWENTY-NINTH
ANNUAL REPORT

OF THE

Mining Industry

of IDAHO

FOR THE YEAR

1927

STEWART CAMPBELL
INSPECTOR OF MINES

ALICE DARRAH
SECRETARY

LETTER OF TRANSMITTAL

o His Excellency,
THE HONORABLE H. C. BALDRIDGE,
Governor of Idaho.

R:

In compliance with the provisions of section 5480, Idaho ompiled Statutes, I have the honor to transmit herewith the nual report of the inspector of mines for the year ended Decem- r 31, 1927.

Respectfully submitted,

STEWART CAMPBELL,
Inspector of Mines.

FOREWORD

Mining is a highly specialized business, and should be recognized as such, particularly by the investing public. It requires more good judgment and more business and technical ability, coupled with honesty, than any other commercial undertaking. If the investing public would realize that these requirements are essential to a successful mining enterprise, the popular belief that mining is a gamble would be without foundation. When a mine is capably managed, the greatest hazard is eliminated, as such a management will not permit the expenditure of money on doubtful mines. Many mines require the expenditure of considerable money, either to prove or disprove them, and it can not be expected that every mining enterprise will result successfully. It has been observed that, where the investor has determined that the representations regarding the property are true and that the management is in capable and honest hands, if the venture should then fail he is satisfied because he feels that the money was properly spent and the mine intelligently operated. But how few investigate!

A merchant can not come into a strange community and establish a paying business merely through advertisement. He must acquire his trade by the offering of reliable merchandise and a continual demonstration of his responsibility and knowledge of his line. An attorney can not gain a clientele without a thorough knowledge of the law and an ability to win cases. A doctor or surgeon can not establish a practice merely upon his own word; he must gradually build a reputation by demonstrating his skill and success. An engineer—mechanical, civil, electrical, or trades—must prove his competency before he can procure the first pittance which leads to an eventual decent livelihood. But far otherwise with mining. To the mind of the public, it is an industry shrouded in mystery and governed by luck. Blinded by these false ideas, the public reposes confidence in those who are grossly ignorant of the fundamental principles of geology and mining. Someone talking a little of the mining language and calling himself a "mining engineer" or "geologist" goes forth into a strange community, either personally, through his agents, or through advertisements, seeking money for a mining or oil venture. And the usually sane business man, the same man who would investigate the standing of an attorney, a doctor, a stenographer, or an engineer before employing him, permits himself to be blinded by the lure of easily gained wealth; with the belief that luck instead of efficiency governs mining, he stakes his hundreds, perhaps thousands, without a sufficient inquiry as to the ability, record, or honesty of the management or of the promoters to whom he intrusts his money. Investments under such circumstances have usually resulted and will continue to result in bitter disappointment.

Idaho legislatures have expressed a knowledge of the foregoing facts by passing laws which do not hinder or obstruct the legitimate promoter or operator, yet which immediately expose the shady dealer if he complies with them. The enforcement of these laws is lodged with the inspector of mines, who has administered them with the dominating idea that it is his legal and moral duty to encourage and promote the development of Idaho's mineral resources, and that this can best be done by protecting the public against fake promotions and dishonest promoters. If the investing public can be impressed with the fact that Idaho is using every precaution and is particularly vigilant in preventing shady promotions, and that through this attitude fair treatment can be expected, then the prospector, the miner, the legitimate promoter, and the State will benefit by this faith. If, on the other hand, the public is excited and deceived into buying stock in fraudulent promotions, which almost invariably result in total loss, then the cause of honest mineral development is injured, and not only does the State suffer, but every legitimate miner and operator as well.

The renewed interest in mining in Idaho has attracted fraudulent promoters to the State, and this department has been forced to battle with some of the outstanding mining crooks and fake promoters of the United States. We have not sat calmly by and watched the crooked brokers, "dynamiters", "high-pressure fakers", and "financial sand-baggers" catch and rob the public with an Idaho mine as a bait. The power of the law and the press has been invoked repeatedly against these cheaters, and this department will continue to be used, so far as it is possible, as a means of destruction of crooks and fakers. Notice is served, again, that Idaho will not be a safe place for the shady dealer or his crooked schemes so long as the present incumbent remains in this office.

We shall continue in every legitimate manner possible to assist the honest promoter to interest the public in Idaho mines; because, with few exceptions, the large mining companies are not acquiring or developing prospects in a search for new mines, and the old-time prospector has vanished; so the small development companies have a useful and proper function to perform if the mining industry in Idaho is to survive and prosper. But these companies can not live unless the investor knows that Idaho is a safe place for mining investments.

There is no way to warn against all the schemes of the fakers. Fraud constantly uses new methods, and the styles change rapidly. Mine development means risk, of course, but the chances are that the mine will actually get the money if the men managing the company are honest and efficient. These facts can generally be ascertained without much trouble, and, as mining investments should receive the same consideration as other business ventures, it is a good rule for the investor to "investigate before investing".

ANNUAL REPORTS

The first report submitted by the present inspector, in 1921, was largely an experiment. It introduced much miscellaneous matter never previously printed in such a report and presented detailed information concerning Idaho mining companies in the form of a directory. It was, in fact, a handbook rather than a formal report. It received such favorable press comment, notably by the Engineering and Mining Journal, the foremost mining magazine of the United States, that the same plan was followed in subsequent reports. As these proved equally popular with the mining public of Idaho and other states, the 1927 report is offered in the same form.

It is a cause for great satisfaction that it has been possible to increase the size of the report each year, without adding greatly to the expense. The 1921 issue consisted of but 150 pages; that of 1922 of 200 pages, that of 1923 of 221 pages, that of 1924 of 249 pages, that of 1925 of 270 pages, with five insert diagrams of mill flow sheets, and that of 1926 of 269 pages. As the 1923, 1924, 1925, and 1926 editions were printed more compactly, they included much more additional information than their increased bulk would indicate. The increase in size has been made possible by the growing cooperation of mining companies in the matter of filing full reports concerning their organization, property, plant equipment, and development campaigns. The reports for the years 1923, 1924, 1925, 1926, and 1927 have also been rendered more interesting by the inclusion of many pictures of various Idaho mining plants.

Idaho is the only state in the Union which is presenting the data and information relative to its mineral resources in this form. The merit and popularity of the report are proved by the continually increasing demand for copies of it, as well as by the efforts those interested in mining in other states have made toward having their state governments publish a similar report. Less than 1,000 copies of the 1921 report were distributed, while more than 2,500 of the 1926 report were required to meet the demand.

The list of prospects contained in this report has been enlarged over that of the twenty-eighth report. Many of these prospects are worthy of more prominent mention, but, as the owners failed to submit any data, it is impossible to give further information than the owner's name and address, location of his mine and its name. If the small mine-owner could realize that it would be beneficial to him if he furnished detailed information to the inspector, it would greatly assist in displaying the mining possibilities of Idaho and result in his property receiving more attention. The list published in the twenty-third annual report was the first of its kind ever compiled in Idaho and proved that the practice is worthy of continuation, as it has been a guide to those looking for mines. These lists have found extensive use and in a number of cases resulted in the prospect being examined and a sale made.

Unincorporated mines have been included in the body of this report on the same basis as the reporting mining companies, whenever their owners submitted the data. This policy will be continued in the future. The necessary form on which the data can be submitted is mailed on request to all those interested in having their properties receive a more prominent mention.

NEWSPAPERS

As pointed out in previous years, the visits which the inspector makes to the numerous mining counties are necessarily so short that they are inadequate to enable him to keep directly in touch with all mining activities, so that it is always necessary that he supplement his personal information by that gleaned from the press. Most of the publishers located in mining communities have been very willing to furnish gratuitous subscriptions of their newspapers to the office of the inspector. This courtesy is greatly appreciated, and has been of much assistance in enabling the inspector to keep abreast of the mining news. Accordingly, the State of Idaho, through the mine inspector, extends its thanks to the following:

Idaho County Free Press	Grangeville
Kellogg-Wardner News	Kellogg
Lemhi County Recorder Herald	Salmon
The Mackay Miner	Mackay
Mining Truth	Spokane
Mullan News	Mullan
Pend d'Oreille Review	Sandpoint
Priest River Times	Priest River
The Salt Lake Mining Review	Salt Lake City
The Wallace Miner	Wallace
Wallace Press-Times	Wallace

MINERAL MARKET INFORMATION

As there has continued to be a demand for possible markets for uncommon minerals and metals, the lists prepared in 1921, which include the names and addresses of the purchasers or users, have been brought up to date wherever it has been possible to obtain the information. The office will be glad to furnish copies of the list for any particular mineral or metal upon request. The following are listed:

Antimony	Fullers Earth	Radium
Arsenic	Graphite	Silica Sand
Asbestos	Gypsum	Sodium
Barytes	Magnesium	Strontium
Bauxite	Magnesite	Talc
Bismuth	Manganese	Tin
Cadmium	Mica	Titanium
Chromium	Molybdenum	Tripoli
Cobalt	Monazite	Tungsten
Diatomaceous Earth	Nickel	Uranium
Feldspar	Platinum	Vanadium
Fluorspar	Pumice	

LIBRARY

The library, which was started by the present mine inspector during 1921, and which now consists of over 3,500 volumes, is believed to be the largest library of its kind in the State. It contains virtually every publication of the U. S. Geological Survey and U. S. Bureau of Mines, most of the U. S. Mint Reports, numerous volumes published by the geological surveys of other states, and many volumes of journals dealing with mining and geology.

Except a few articles published in old issues of the various journals, everything of importance dealing with the mining industry of Idaho, including geology, mineralogy and mineral resources, is contained in the library. Whenever requests are made for any of the missing articles, photographic copies are procured from the publishers or from some large research library.

The following magazines are regularly received: Engineering and Mining Journal; Mining Review; Mining Truth; The Mining Congress Journal; Mining and Metallurgy; Rock Products; Compressed Air Magazine; The Explosive Engineer; Economic Geology; and Asbestos. Complete files of these magazines are being preserved for reference use. Although most of them have been received only since 1921, the file of the Engineering and Mining Journal is virtually complete for the past 20 years, the present mine inspector having donated to the State his personal files of this journal for the years 1911 to 1920, inclusive.

The library is equipped with the U. S. Geological Survey Finding List of States, Areas and Subjects, which makes it possible to locate quickly and completely all publications of the U. S. Geological Survey concerning the geology and mineral resources of any state of the United States or concerning any particular mineral.

Visitors are always welcome to consult the books of the library or to read the magazines. The office is open from 9 a. m. to noon and from 1 p. m. to 5 p. m. In the absence of the inspector, the secretary will be glad to assist visitors in finding desired information.

In order to accommodate readers who find it inconvenient to consult books in the library at the inspector's office, the practice of lending books for a period of not over two weeks has been established, and they are mailed out to all responsible persons within the State upon request. A few rare volumes, now out of print, and of which the library contains no duplicates, and books frequently called for at the office, cannot be mailed out. Individuals not personally acquainted with the inspector, when writing in for books, should accompany their requests by letters of introduction or recommendation from some reliable person in their community personally known to the office, or by a letter from the nearest public library.

MINING LAWS

In May, 1923, the inspector caused to be published a new edition of the State mining laws; and as the 1925 Legislature passed a few amendments to them, a supplement containing these changes and a few extracts from the corporation law was published in 1925. These two pamphlets contain all of the Idaho mining laws as well as extracts from the United States mining laws, and amendments. The pamphlets are for free distribution, and will be mailed to anyone interested on request.

BIBLIOGRAPHIES

Much information concerning the geology, mineralogy and mineral resources of Idaho has been collected and published by the U. S. Geological Survey, the U. S. Bureau of Mines, and the Idaho Bureau of Mines and Geology. Much is also contained in the various reports of the inspector of mines and in journals dealing with mining and geology. In order to make this information readily available to the public, in 1921 the inspector indexed this material according to counties and subjects and published it in his report. The indexing has been kept up to date, and so far as is known, each county bibliography contains references to all material of any importance that has ever been published concerning that county. Publications relating to specific minerals found in the State are listed also under the "General Bibliography" in the back of the report. The usefulness of the bibliographies has been further increased by including publishers' addresses and information as to whether each particular reference can be procured or not. Symbols have been added as a guide to facilitate explaining this information. Practically all of the publications listed are found in the inspector's library, and arrangements have been made so that copies of those not on file can be procured when requested. However, **these publications may be consulted in all large libraries.**

GENERAL REVIEW AND 1927 ACTIVITIES

The year 1927 closed with the mining industry in Idaho witnessing a very prosperous year. Excepting the Star mine of the Sullivan Mining Co., which was idle, and one large producer which curtailed production about 25 per cent during the latter part of the year, capacity production was maintained at all the producing mines, and in a few instances output was increased over that of 1926. All the large mines conducted active development work throughout the year, which proved the extent of their ore bodies at greater depth and laterally. The increased ore reserves and the improvements added to mine and mill plants have greatly enhanced the physical condition and future life of all these mines. Many new companies were organized and much new mining work was undertaken. The majority of these enterprises were started in the southern part of the State, although the increase in the Coeur d'Alene district exceeded that of the previous year.

In addition to the new enterprises, new discoveries and improved conditions at the producing mines, there were also many inquiries and investigations by those seeking mines and mining investments. These inquiries were made by large mining companies, promoters, and individual investors. Many of the properties examined satisfied the requirements of the investigators and in a few instances mines were acquired under favorable terms. Others making examinations were well impressed and would have recommended the properties, had it been possible to procure them under satisfactory conditions. Many prospectors and small companies, who are unable to finance the development of their own mines yet refuse to option them under favorable terms to others who are able to do so, are responsible for retarding much new development work.

As Idaho offers unequalled opportunities in mining and as the diversity of its mineral wealth exceeds that of any other State of similar size in the Union, its substantial growth during 1927 should be maintained in the future. The strong, healthy condition of the mining industry at the close of the year was largely due to the numerous developments which fall into five classes:

1. Increased resources of producing mines.
2. New dividend-paying mines.
3. New ore disclosures of importance.
4. New reduction plants and dredges.
5. New enterprises, including new mine plants and principal activities.

Increased Resources of Producing Mines

The principal producing mines in which the ore reserves were increased by new development work during the year were: The Bunker Hill mine of the Bunker Hill & Sullivan M. & C. Co.; the Hecla mine of the Hecla Mining Co.; the Morning and Page mines of the Federal M. & S. Co.; the Tamarack mine of the Tamarack-Custer Consolidated Mining Co.; the Stratton and Panhandle mines of the Strattons Mines Co.; the Sidney mine of the Sidney Leasing Co.; the Sunshine mine of the Sunshine Mining Co.; the Gold Hunter mine of the Gold Hunter Mines, Inc.; the Galena mine of the Callahan Zinc-Lead Co.; the Jack Waite mine of the Jack Waite Mining Co.; the Constitution mine of the Constitution Mining & Milling Co., all of which are located in the Coeur d'Alene district in Shoshone County; the P-I mine of the United Idaho Mining Co., in Lemhi County; and the Wilbert mine of the Wilbert Mining Co., Ltd., in Butte County.

New Dividend-Paying Mines

Companies which entered the ranks of dividend payers during the year were: The Sunshine Mining Co., at its Sunshine mine; and the Sidney Leasing Co., at the Sidney mine, both in Shoshone County. Mines which were placed on a profitable operating basis during the year were: The Galena mine of the Callahan Zinc-Lead Co.; the Page mine of the Federal M. & S. Co., both in Shoshone County; the Triumph mine of the Triumph Development Co., in Blaine County; the Allie mine, at Gilmore, of the Gilmore Mercantile Co., in Lemhi County; and the Belshazzar mine of the Idawa Gold Mining Co., in Boise County.

New Ore Disclosures of Importance

The principal new ore disclosures and new discoveries of importance were those at the Tamarack mine of the Tamarack & Custer Consolidated Mining Co.; the Dickens mine of the Dickens Consolidated Mines Co.; the Sherman mine of the Sherman Lead Co.; the Douglas mine of the Douglas Mining Co.; the Alameda mine of the Alameda Mining Co.; the Golconda mine of the Golconda Lead Mines, all in Shoshone County; the Allie mine of the Gilmore Mercantile Co., and the Pope-Shenon mine of the Pope-Shenon Mining Co., in Lemhi County; the Belshazzar mine of the Idawa Gold Mining Co., in Boise County; the Wilbert mine of the Wilbert Mining Co., Ltd., in Butte County; the Triumph mine of the Triumph Development Co.; the Vienna mine under operation by A. F. Peery; and the new disclosures at the Mathews property, in Blaine County; the Whitedelf mine of the Whitedelf Mining & Development Co. in Bonner County; and the Hall-Interstate mine of the Bunker Hill & Sullivan M. & C. Co. in Valley County.

Excepting the Triumph and Mathews disclosures in Blaine County, all of these represent an increase in the resources of operating or producing mines. Results at the Triumph were a reward for having the courage to reopen a property which had been abandoned for over 30 years. The Mathews disclosure was a discovery which was made during the early spring months of the year. A large amount of surface trenching was done on the vein, opening it to a sufficient extent to permit the discovery to be classed as one of importance.

The substantial result of the development work at the Douglas mine during the year was the outcome of a new policy adopted by the Bunker Hill & Sullivan M. & C. Co. in financially assisting the development of mines in the vicinity of its smelters without obtaining control of the company or a voice in its management.

New Reduction Plants and Dredges

The most important new construction work maintained throughout the year was at the electrolytic zinc plant at Kellogg, which is being built by the Sullivan Mining Co. to treat the zinc-lead ores of the Coeur d'Alene district. (See page 33) The Sullivan Mining Co. is owned jointly by the Bunker Hill & Sullivan M. & C. Co. and the Hecla Mining Co. This plant is designed for a capacity of 150 tons of metal daily, in three units of 50 tons capacity each. It is based on the Tainton-Pring process, which is characterized by the use of strong acid in the leaching circuit and high-current density in the electrolysis.

The Hercules mill at Wallace, owned by the Hercules Mining Co., was rebuilt, a zinc flotation unit added, and converted into a custom mill which now offers milling facilities for small mines without mills in the vicinity of Wallace.

The mill on Big Creek which was formerly owned by the Big Creek Mining Co., Ltd., whose property was acquired under foreclosure proceedings by the Bunker Hill & Sullivan M. & C. Co., was entirely rebuilt to treat the ore from the Bunker Hill's Crescent mine. This mill is now known as the Crescent.

The Cedar Creek Mining & Development Co., Ltd., constructed a new mill at its property in the Summit district. The design of this mill followed that of the Galena mill of the Callahan Zinc-Lead Co. and includes fine grinding with lead and zinc units.

All of the foregoing are in Shoshone County. The principal new mill, mine plant, and dredge construction in other counties was:

The 100-ton flotation mill and 250-horsepower hydroelectric plant being constructed by the Bunker Hill & Sullivan M. & C. Co. at its Hall-Interstate mine in Deadwood Basin, Valley County.

The small mill constructed by the Owyhee Gold Mining Co. in Owyhee County, consisting of amalgamation followed by flotation.

Enlarging of the mill at the Pope-Shenon mine in Lemhi County and the addition of a flotation unit.

The Seafoam Mines Corporation, in addition to installing complete mining equipment, constructed a small mill and a hydroelectric power plant; and the Clark Mining Co., at Clayton, constructed a small concentrating mill. These are both in Custer County.

The Lincoln Mine Operating Co. in Gem County completed the construction of its mill—fine grinding, flotation, and table concentration—which was started in 1926.

The American Gold Dredging Corporation on Meadow Creek near Triangle, Owyhee County, and the Crooked River Mining Co. on Crooked River, northeast of Idaho City, Boise County, both constructed small flume-type dredges.

New Enterprises, Including New Mine Plants and Principal Activities

The outstanding new enterprises, developments, construction, mine plant installation, and principal activities can best be reviewed through an outline by counties:

Ada County

During 1927 the mines and prospects in this county witnessed a little increase in attention and development over that of the previous year, in addition to which there was a decided activity in promoting oil development enterprises and legendary "White Metal".

Adams County

During 1927 this county witnessed more mine development and more new mine plant installation than at any time since the "boom days" of the Seven Devils. At the Red Ledge mine the Idaho Copper Co. constructed a complete and modern mine camp and mine buildings; installed a 600-cubic-foot Ingersoll-Rand compressor, driven by a 120-horsepower Diesel engine, and complete mining equipment including underground mechanical loaders; and started work on their tunnel from Eagle Bar which has a projected length of approximately 6500 feet, of which about 700 feet was completed. In addition to the foregoing, the company performed about 4000 feet of diamond drilling on Deep Creek.

At the South Peacock mine, the Idaho Copper Corporation (over 98 per cent of whose stock is owned by the Idaho Copper Co.) purchased second-hand boilers, a steam-driven compressor, and hoist, and moved them to the property, where they were partly installed in a new building. A small amount of development work was performed, and a few tons of low-grade copper ore were marketed.

On November 4 all mining operations were suspended at the Red Ledge and South Peacock mines, and on November 25 the Idaho Copper Co. was placed in receivership. The complaint for receivership was filed by the Boise Association of Credit Men, and alleged disagreements between the Cooley Butler faction (originally Idaho Copper Co., Ltd.) and the George Graham Rice faction (originally Idaho Copper Corporation).

James Glass and associates, of Butte, Montana, acquired the Peacock mine under a lease and option. They reconstructed the camp buildings and commenced development work. Kleinschmidt Bros., of Helena, Montana, repaired the mine buildings and commenced work at the Blue Jacket group. The Lime Peak Copper Co., on Snake River, maintained work throughout the year. Prospectors in the Hornet Creek and Indian Creek sections were active. Also, the mica deposits in the Council Mountain district received more attention than in previous years.

Bannock County

During the year, the Idaho Manganese Mining Co. produced and marketed a large tonnage of high-grade manganese ore, in addition to performing considerable development work. A small amount of development work was performed by lessees on the property owned by the Cleveland Mining Corporation. The Lava Manganese Mining Co. and William Godfrey developed their manganese properties during the summer months.

Bear Lake County

The San Francisco Chemical Co. was the only phosphate mine in the county which was active during the year. This company operated its mine for nine months and produced a large tonnage of rock which was shipped to San Francisco, California, where it was converted into superphosphate in a plant owned by the company.

One of the most outstanding publications issued by the U. S. Geological Survey in recent years is Professional Paper 152, by G. R. Mansfield: "Geography, Geology, and Mineral Resources of Part of Southeastern Idaho". This appeared during 1927; it is profusely illustrated with pictures, maps, and diagrams, and describes in detail the subjects mentioned in its title, dealing especially with the immense areas of phosphate rock found in this county.

Blaine County

The two most noteworthy events during 1927 were the reopening by the Triumph Development Co. of the old Triumph mine, which adjoins the North Star of the Federal M. & S. Co., and the Mathews discovery on Kelly Mountain, west of Hailey. The success of the Triumph was a reward to a small organization for having the courage to reopen a mine which had lain dormant for over 30 years and had been rejected by some large mining companies. After the mine was unwatered, new buildings and head-frame were constructed; mining equipment was installed, the shaft repaired, and production started at the rate of 50 tons per day; this was later increased to 75 tons. The ore is shipped to a custom milling plant at Salt Lake City, Utah, where two concentrates are made—a lead-silver and a zinc. The reopening and subsequent profitable operation of this mine were made possible by selective flotation, whereby mixed lead-zinc ores can now be treated which could not be separated by gravity concentration methods.

The Mathews disclosure was a new discovery made during the early part of the year. The large amount of surface trenching which was done on the vein opened it to a sufficient extent to permit this discovery to be classed as one of importance. After the trenching was completed, the property was incorporated as the Liberty Gem Mines, Inc. Camp buildings were constructed; mine equipment was installed; and work was started on a 100-foot vertical shaft.

In addition to the Triumph Development Co. and the Liberty Gem Mines, Inc., new companies and enterprises which started during the year were: The Homestake Mines Corporation, at the Homestake group north of Ketchum; the Daisy Mining & Milling Co., Ltd., west of Hailey in the "gold belt" district; and the large number of new locations and subsequent prospecting in the vicinity of the Mathews discovery.

The Independence mine, owned by the Federal M. & S. Co., was operated throughout the year by lessees who marketed a large tonnage of high-grade hand-sorted ore, in addition to developing new ore in the mine. The Hailey Bonanza Mining Co. further explored its mine in search for the continuation

of the oreshoot. Others who continued to develop their mines throughout the year were: The Idaho Democrat Mine, Inc., at the old Democrat mine and at a prospect near the Mathews discovery; the Wood River Mining Co., on Trail Creek west of Ketchum; the Eureka Development Co., Ltd., at the Eureka and Idahoan groups in the Bullion district; F. B. Felt, at the Parker mine near Ketchum; Peter L. Kent, at the Lone Pine group on Deer Creek and at the Tungad group near the Liberty Gem Mines, Inc.; M. T. Rowland, on the Smuggler group in the Muldoon section; and A. F. Peery, who is operating under lease the famous old Vienna mine in the Sawtooth district and reports encountering some excellent high-grade silver ore. Harold Boericke, who was operating the Norris-O'Connor group in the Muldoon section, continued active development work for four months, after which the enterprise was abandoned and the equipment removed. The famous Minnie Moore mine, which was the scene of the most extensive prospecting campaign in the county during the years 1923 to 1927, was abandoned in 1927.

The Radiore process of electrical exploration was applied to two properties in December, after which steps were taken toward starting mine development work based on the findings of these surveys.

Boise County

During 1927 this county witnessed a large increase in new mine plant installations, new development work, and new enterprises; also many of the old companies expanded their operations over those of the previous year. Much scouting by large companies and others looking for new mines was in evidence throughout the year, and two important transactions would have taken place, had it been possible for the intending purchasers to procure the properties under favorable terms.

The largest new construction was the small dredge built by the Crooked River Mining Co. at its Kempner Ranch property on Crooked River. However, as the dredge was not properly designed or constructed, it ended in a miserable failure and an almost total loss of the money invested.

The principal new event of importance was the acquisition of the Gold Hill & Iowa mine at Quartzburg by the Talache Mines, Inc. After negotiations were completed in March, new pumps were installed and unwatering of the mine continued to completion. In addition to this, a large amount of work was performed on the 100-foot level. After unwatering to the 600-foot level was completed, new sinking equipment was installed and work started on sinking a winze to the 750-foot level. Besides proving the mine at this additional depth, the company proposes to perform a large amount of exploratory work on the upper levels.

The Idawa Gold Mining Co. maintained capacity production at its Belshazzar mine throughout the year, in addition to greatly improving its mine camp, buildings, and equipment. The amount of gold produced by this company gives it the rank of the largest gold-producing mine in the State, as well as proving that the "old" mines in this county still offer excellent opportunities.

In October the Ideal Mining Co., a new organization, acquired the old Osborne mine near Horseshoe Bend. The camp buildings were repaired, mining equipment was installed, and unwatering and rehabilitation of the shaft started.

The Gold Dredging and Power Corporation changed its dredge from steam to electrically driven, and conducted dredging operations for a period of seven months.

In addition to performing considerable underground work, the Mineral Mining Co. conducted a large amount of investigation on the flotation of its ores. Practically all the equipment from its mill, which was completed in October, 1926, was removed, preparatory to installing new milling methods after further financing.

The Boise Placer Co. conducted mining operations for 108 days during the high-water period, after which its mine plant and equipment were overhauled and repaired in preparation for the next year.

In December D. W. Southworth acquired a lease and option on the Mountain Chief mine, owned by the National Mining & Development Co., Ltd., and commenced repairing and retimbering the principal tunnels.

Bonner County

The discovery of high-grade lead-silver ore in 1906 near Clark Fork by the Whitedell Mining & Development Co. was further developed in 1917 and proved to be one of the important new discoveries to be made in the State in recent years. During the year a three-mile electric transmission line was constructed, a large electrically-driven compressor and new shaft sinking equipment were installed, and new mine buildings completed. A large amount of mine development work was done, and a substantial tonnage of ore produced and marketed, the principal part of which was taken out by lessees. The excellent manner in which this property is responding to exploration progresses has been responsible for attracting a large amount of new development work and prospecting to this section of the county.

Numerous prospectors were busy throughout the year, and a number of new companies were organized and commenced operations. The principal one of these was the Hope Mining Co. which acquired the Lucky K mine. Additional mining equipment was installed, a large amount of development work done, and a number of carloads of high-grade lead-silver ore were shipped, some of which was taken out by lessees. In addition to large new companies, the Lawrence Consolidated Mining Co. conducted operations throughout the year, so as a whole this section of Bonner County witnessed an active and prosperous year.

The International Portland Cement Co. Ltd. at its limestone quarry near Lakeview continues to be the largest mining operation in the county. During 1917 the mine plant and equipment were greatly enlarged. A large tonnage of rock was mined and shipped to Spokane, Washington, where it is used in making Portland cement. This company's mine and plant are the most important of their kind in the State.

Another important enterprise in the Lakeview district is that of the Idaho Tower Mines, Inc. Throughout the year this company maintained active development work with a large crew of men. The work consisted of sinking the shaft to the 1,150-foot level and performing other lines of development on intermediate levels. Three substantial bodies of ore were developed, and at the close of the year the mine was being put into shape for active production.

Prospectors and small development companies in the Priest Lake district were active throughout the year, the principal ones being the Kootenai Mining Co., F. F. Vandeveer and J. W. Beardmore at the Inez Grace, and Joseph Sacramanna at the Silver King. Many others increased their lead-silver work, and there continues to be an active search for new mines.

Boundary County

The year 1917 witnessed little improvement in this county. No new discoveries were made, the operating companies did not expand their work, and no new enterprises were started. The Continental mine at Porthill, owned by the Idaho Continental Mining Co., was operated throughout the year by the Idaho Continental Co. On an average about 40 men were continuously employed, and a large tonnage was produced and marketed. This mine is one of the largest lead producers in the State, and its continuous operation and output are big factors in the prosperity of the county.

The Leonia Gold Mining Co., which is a reorganization of the Idaho Gold & Ruby Mining Co., maintained a pay-roll of approximately forty men during the year and performed considerable new work, but where the money was derived from stock assessments.

The Brush Lake Mines Co., the Golden Sceptre Mining Co., Ltd., the Monte Gold-Copper M. & M. Co., Ltd., and the International Molybdenum Co. expended their development operations over those of the previous year.

Butte County

Butte is one of the principal lead-silver producing counties in southern Idaho, yet its diversified mineral resources and favorable geological conditions are such that it warrants more extensive development and exploration than it has been receiving during the past few years. However, the county witnessed a large increase in lead-silver production and a small increase in new activities during 1927, as compared with the previous year.

The Wilbert Mining Co., Ltd., which was the fourth largest lead-silver producing mine in southern Idaho during 1927, maintained production throughout the year. The largest part of its ore was derived from a depth of 1200 feet on the vein. This company also performed a large amount of new development work. Its mine is in the Dome district, 42 miles northeast of Arco. The Badger Mines Co. was active throughout the year; and Lew Johnson installed a small gas-driven compressor at his property, preparatory to driving a 900-foot tunnel. Both these properties are near the Wilbert mine.

The Horn Silver Consolidated Mines Co., controlled by the Dahle brothers, who perform all work done by this company, extended its crosscut tunnel 1200 feet during the year. These men are deserving of success for their hard work and the intelligent manner in which they are developing their mine, which is located in Lava Creek district. Others who were active in this district throughout the year were two new companies whose organization is unknown, also P. J. McGinniss at his Silver Bell group, and the Butte Antelope Mining Co. at the Foot Wall mine on Antelope Creek.

Camas County

The mines in the Carrietown section of the Little Smoky district have a good production record to their credit, and their latent possibilities still offer excellent opportunities for profitable mines, either through the apparent possibility in some mines for finding the ore beyond the faults which caused a suspension of operations in the early nineties, or, in other mines, of adapting modern flotation methods to the large bodies of proven low-grade ore.

During 1927 this county witnessed more new mine development and new enterprises than at any time in the past 10 years. Many of these are based on substantial mine foundations with excellent possibilities for profitable mines. An important factor in furthering mineral development in this county was the seven-mile extension which the Sawtooth National Forest Service made to its Fairfield-Carrietown highway, of which only five miles toward Carrietown remain to be constructed. This work was done in cooperation with the Idaho Lead Co. and the county commissioners of Camas County.

The principal new enterprises were: The Consolidated Mines Syndicate at the Princess-Blue Ribbon group; the Idaho Lead Co. at the Silver Star; the Richard Allen Mines Co. near Soldier; the development of the Stormy-Galore group by Robert Leaper and associates; and the drilling of the placer mines on the South Fork of the Boise River by a Spokane, Washington, company.

Lessees at the Carrie Leonard mine, Fletcher and Hosac at the Horn Silver mine, and the Perseverance Mines Co., Inc., at the Five Points mine were active throughout the summer months.

Caribou County

The Anaconda Copper Mining Co. maintained production throughout the year at its phosphate mine at the rate of 200 tons per day, in addition to constructing a large number of new homes for its employees. This company's mine plant is the largest in the State, and possibly in the United States, for the mining of this mineral. The rock mined is shipped to Anaconda, Montana, where it is converted into concentrated phosphatic fertilizer, the finished product being known as Anaconda treble superphosphate.

During the year, the Great Western Oil Co., whose property is located in the eastern part of the county near the Wyoming line, deepened its well a few feet under contract. At the close of the year, it had reached a total depth of about 2700 feet.

development work, which resulted in exposing considerable additional ore, and constructed a small concentrating mill; the Sulphide Mining Co., on Salmon River about two miles below Clayton, drove its projected 900-foot tunnel about 400 feet; the Mule Shoe Mining Co., on the opposite side of the Salmon River from the Sulphide Mining Co.'s property, employed three men throughout the year in driving a lower tunnel; and the Golden Center Mining Co., which acquired the Black Rock group at the head of Big Lost River near the Blaine County line, constructed about four miles of new road at a high cost and purchased two small gas-driven compressors with complete mining equipment, but were unable to complete the road and install the equipment before winter set in. Prior to commencing operations at the Black Rock, this company performed a large amount of development work on the Williams-Dryden group in the Bay Horse district near Clayton.

The Empire mine at Mackay, owned by the Idaho Metals Co., continues to hold first place as the largest copper mine in the State. Active mining and milling operations were maintained throughout the year under the leasing system. This system does not permit the further development work which is necessary and fully warranted.

The MacGinniss-Walker Metals Co. employed six men throughout the year in development work on the Phi Kappa group near the head of Big Lost River. Press reports averred that a large body of ore was disclosed by this work.

Lessees on the Blue Jay mine near Mackay, owned by the White Knob Mining Co., and on the Ramshorn, Pacific, and Beardsley-Excelsior mines near Bay Horse were active throughout the year, all of them producing and marketing a substantial tonnage of high-grade lead-silver ore.

The Kay Development Co., Ltd., which is operating the Horse Shoe mine of the Horse Shoe Copper Co., Ltd., near Mackay, conducted active operations during the early part of the year. This work disclosed a large body of complex lead-zinc ore.

Elmore County

The South Park Dredging Co. at Featherville continues to be the largest mining enterprise in the county. The dredge was operated the greater part of the year, and the tailing stacker and digging ladder were lengthened to permit digging at a greater depth. The record this enterprise is making is a big factor in the welfare of the district and is attracting attention to the mineral resources and possibilities of this part of the State.

The Rocky Bar district witnessed a little improvement over that of the previous year in the starting of new enterprises, although no work of any importance was performed.

The Atlanta district was more active, witnessing more investigations and the beginning of more new enterprises than at any time during the past 10 years. Two old deep mines resumed operations under new organizations, and plant construction on a hydraulic placer mine was maintained by the La Trinidad Mining Co. throughout the summer months.

The Franklin Consolidated Gold Mines Co. at the old Franklin mine in the Pine Grove district was idle during most of the year, on account of litigation.

The Omo Mines Corporation at the Mountain View mine and the S. E. Mining Co., both at Pine; the Apex Gold Mining Co. and the Blake's Gulch Gold Mining Co., both at Rocky Bar, actively developed their mines throughout the year.

Gem County

The Pearl district, once a famous gold-producing camp, and a few undeveloped sections where a small amount of prospecting has been done are the only mineralized areas in Gem County. The principal minerals occurring in these districts are gold, silver, lead, zinc, copper, and arsenic. Gold predominates, and occurs in a free-milling quartz and combined with the sulphides of lead, zinc, and iron. The deposits containing the complex

sulphide ore are of commercial importance but have not been mined, as transportation and the metallurgical methods in use at the time the Pearl district was active prevented profitable operations. The sulphide ores are amenable to modern flotation methods, and, as there is a large tonnage in many of the old mines that are lying dormant, they will again become profitable operations when properly equipped, financed, and managed.

During the year much publicity was given to the possibility of finding petroleum in this county. A preliminary investigation of conditions was made by geologists of the Idaho Bureau of Mines and Geology in 1926. These men collected a large amount of fossil material, which was examined by the U. S. Geological Survey. The Bureau summarized its findings with: "* * * It appears that the hoped-for evidence of marine strata, with which oil throughout the world is associated, has not yet been found."

The Lincoln Mine Operating Co., which acquired the old Lincoln mine in 1926 and commenced its rehabilitation, was active throughout the year. The reconstruction of the mill was completed and a few tons of high-grade concentrate were marketed, the ore being derived from the upper part of the vein through a small secondary shaft. After the removal of this ore, mining operations were suspended and work was started on reopening the main shaft.

Idaho County

The gradual return to a more normal condition, under which gold mining is again becoming profitable, was reflected in this county during the year by a small, though substantial, increase in mining operations, investigations, and new enterprises. The most important of these was an investigation of the so-called dikes—low-grade free-milling gold ore—in the Elk City district by two large mining organizations. These investigations extended over a period of 60 days, and it was reported that the properties examined were favorably recommended.

The Empire Metals Co., owning 27 claims, built about four miles of road, constructed new cabins, installed a laboratory, and drove about 2000 feet of open cuts and tunnels. Seven other companies that are holding large acreages on the "dike zones" performed the necessary annual labor.

Mining in the Ten Mile district witnessed a decided impetus during 1927, in anticipation of the completion of the Elk City highway to Huston's in 1928, which will give an outlet to the mines in this district. Four new companies were organized and commenced operations; a large number of new claims were located; more work was performed; and the influx of prospectors and others was sufficient to justify the re-establishment of the post office at Golden and the mail route into it. The principal new companies and operations were: The Buffalo-Idaho Mining Co. at the Mackey group, where a new gas-driven compressor was installed and active development work started; the Golden Mining & Power Co., whose property was optioned late in the year and work started; Miller & Sons, at the Yellow Pine group, who conducted work throughout the year which resulted in the development of some high-grade ore; and the optioning of the Pioneer Hill group at Newsome, owned by Timin and Braig, to Seattle, Washington, interests. A. S. Johnson at the Franklin mine; F. O. Muller of Clarkston, Washington, at the Lone Pine group; the Sphinx Gold Mining Co.; and William Huntley of Spokane, Washington, at the New York mine, were active throughout the year; Huntley's activities included milling operations.

Prospecting and development work in the Orogrande district exceeded that of 1926. Drilling operations to test the placer deposits on Crooked River were started, and one company conducted a small amount of hydraulicking. Discovery of new veins containing high gold values was reported by Frank Peck, a prospector, and by the Una Mine Co.

In the Dixie district the Mammoth Mine Corporation resumed operations with a small crew; Henry S. Hazlitt at the Pacific group operated his mill for a few weeks; and a new discovery by George L. Esh and associates caused considerable attention to be directed toward the district.

The American Eagle mine, owned by the Homestake Gold Mining Co., was operated for a few months by lessees; and the discovery of lead-silver ore in Success Gulch was reported. Some work was done also at the Black Pine group. These properties are all in the Elk City district.

The Florence district was more active than at any time in the past few years. There was an increase in company operations, as well as in prospecting, and one new discovery was reported.

The Garner Electric Range Co. was a new entry into the county. This company is interested in the development of the talc deposits on Little Salmon River near Riggins. Two grades of talc were being developed: The massive, which is carved into various shapes for use in electrical appliances; and the powdered variety.

The Warren district witnessed but little new work during the year, although it was reported that the Unity Gold Mines Co. at Warren, which was idle throughout 1926, resumed operations.

The Marshall Lake district was a little more active than in 1926. Two companies, whose organization is unknown, and the Old Kentuck Mining & Milling Co., a new company, conducted prospecting operations during the summer months. The Holte Mining Co. performed a little maintenance work in addition to the annual labor requirements.

Several placer mines in the Simpson district along the Salmon River, near Lucile and Riggins, were the scene of active operations and of small plant installations. The funds for this work were derived from active stock-selling campaigns. The Irbis Placer Co. constructed a 200-horsepower hydroelectric plant and new camp buildings, and installed power-driven pumps for hydraulicking; the Ruby-Gold Development Co. constructed a small gas-driven concentrating mill, designed to recover the "black sands" contained in its gravel deposit.

Kootenai County

During the year surveys for a logging railroad were run up the Little North Fork River. The completion of this railroad will greatly stimulate mining and encourage the resumption of activities at those mines where the ore has been proved but operation has been impossible, on account of transportation difficulties. The companies in the Little North Fork section were idle throughout the year. Those on the West Fork of Pine Creek, near the Shoshone County line, performed the necessary annual labor.

One new lead discovery was reported in the Fourth of July Canyon section of this county, and much additional interest was shown by the old companies in the properties they were operating. The greater part of the work was confined to the sections adjacent to Coeur d'Alene Lake, particularly the Wolf Lodge and Beauty Bay districts, in which the Caribou Mining Co., Ltd.; the Beauty Bay Mining Co.; the Silver Tip Mining Association; and the Blue Bird Mining Co. were the most active.

Latah County

During 1927, the Troy Mica Co., a new organization at Avon, conducted a small amount of work, and produced and marketed a few tons of mica. The Idaho Ceramic Materials Co., at Troy, was organized to exploit the feldspar deposits in that vicinity.

A small amount of work has been done on the copper deposits in the Hoodoo district, from which several carloads of copper ore have been marketed. The heavy overgrowth and deep soil have hindered prospecting and development work, but the discoveries that have been made and work done on them have proved that the deposits justify development, and that there are still possibilities for the discovery of additional veins. The Copper Mountain Mining Co. and the Gold Nugget Mining Co. performed a small amount of development work during the year.

Lemhi County

In point of production and men employed, Gilmore is the most active mining camp in Idaho, outside the Coeur d'Alene district. The Pittsburgh-Idaho mine of the United Idaho Mining Co., a subsidiary of the United States Smelting, Refining & Mining Co., is the largest lead-producing mine and maintains the second largest payroll in southern Idaho. During the year this company performed a large amount of development work and improved its mine plant, in addition to producing a large tonnage of high-grade direct-shipping ore, some of it being obtained by lessees. Part of the ore mined under company operation was derived from the 800-foot level, the greatest depth ever attained in the Gilmore district. The Allie mine, owned by the Gilmore Mercantile Co. and operated by lessees throughout the year, is developing into one of the largest lead mines in southern Idaho. A large amount of new ore was exposed and opened during the year and a substantial tonnage, derived principally from development work, was shipped. A few lessees at the Latest Out mine maintained development work throughout the year. Much of the new ore developed in this district during 1927 was a result of successfully solving a faulting problem which had previously been interpreted as a termination of the ore.

The Spring Mountain and Nicholia districts, whose supply point is Gilmore, witnessed a little increase in activity over that of the previous year. The Spring Mountain Mining Co., a new organization at the Big Windy mine, repaired the mine buildings, performed a small amount of development work, and produced and marketed a small tonnage of lead-silver ore. Lessees at the old Viola mine were active the entire year.

The Leadore district witnessed a large amount of scouting and mine examination by people seeking new lead-silver mines, but, except for their necessary annual labor, practically all of the mines were idle.

In the vicinity of Salmon there was a marked improvement in mining conditions. More new companies were organized and started operations and there were more investigations than at any time during the past few years. All of the old companies were active the greater part of the year.

In the Leesburg district the principal new activities of importance were concerned with the revival of hydraulic placer mining. Two new enterprises constructed ditches, dams, and flumes, installed mining equipment and commenced hydraulicking. These were: The Bonanza Placers, Inc., and H. F. Byram at the McNutt placers on Moose Creek. One other company purchased some hydraulic equipment which it proposes to install during 1928. The number of new locations filed on placer claims exceeded that of any other year during the past decade.

The Harmony Mines Co. was active for a period of three months in the early part of the year; during this time new ore-bins and a sorting plant were added to the mill, the construction of a new aerial tramway was completed, further underground exploration work was done, a small tonnage of ore was produced and the resultant concentrate marketed, after which operations were suspended pending further financing through the sale of bonds.

During the first part of the year the Pope-Shenon mine was developed through the lower or No. 6 tunnel, by lessees. This work was successful in opening considerable new ore, after which the lease was organized as the Winder-Stillman Copper Co. The reconstruction of the mill was financed, and at the close of the year the mine and mill were ready for continuous production.

The Uncle Sam Mining & Development Co., Ltd., near Tendoy, which is owned and financed by local people, actively prosecuted the driving of a lower tunnel throughout the year.

A new entry into the county was the Gold Ore Mines of Idaho, Inc., at the old Queen of the Hills mine eight miles northeast of Salmon. During the year the mine plant and mill, which were installed in 1909, were rehabilitated; a small amount of new equipment was added; part of the old mine workings were reopened; and a small amount of new development work was performed.

In the Shoup district, the Kentuck Mining Co. performed its necessary annual labor. Also the Western Reward Mining Co., a new organization at the old Monolith, now known as the Merry Widow, conducted a small amount of exploratory work during the early part of the year.

The Patterson Mines Corporation, which was incorporated during the year, acquired under lease and option the Ima mine on Patterson Creek, repaired the power plant and mill, and commenced development work in December.

Owyhee County

Owyhee County continues to attract prospectors and investigators seeking new enterprises. The fact that this county still offers excellent opportunities was proved during 1927 by the number of engineers who visited the county, as well as by the new construction and new enterprises which were initiated.

The largest expenditure which has been made on new construction in this county for over five years was that of the American Gold Dredging Corporation on its new flume-type dredge, new mine camp, and four miles of electric transmission line, at its property on Meadow Creek near Triangle. The dredge was designed, manufactured, and erected by the Yuba Manufacturing Co. It is equipped with 2½-cubic-foot close-connected buckets, and is electrically driven and controlled.

New mills to be constructed during the year were those of the Owyhee Gold Mining Co., on War Eagle Mountain, and the Idaho Development Co., at the Evans mine on Poison Creek. Each of these companies completed its mill buildings, purchased and partly installed the machinery, but neither was ready for operation at the close of the year. In addition to the mills, new camp buildings were erected. The Idaho Development Co. installed a gas-driven hoist and compressor, and complete mining equipment.

The Golconda group in the South Mountain district, owned by the Golconda Group Mining Co., was under option for a few months, during which time a small gas-driven compressor and complete small mining equipment were installed. The geology and mineral resources of the district in which this mine is located are fully described in a new publication issued by the Idaho Bureau of Mines and Geology: Pamphlet No. 22, "The Geology and Ore Deposits of the South Mountain Mining District, Owyhee County, Idaho," by Robert E. Sorenson.

The Great Western Mines Co., whose property is on War Eagle Mountain, maintained active development work throughout a large part of the year. This company is deserving of success for the honest and persistent effort it has been displaying in developing its mine for the past seven years.

The Never Sweat Mining Co. operated its mill for a few days on ore which was extracted under contract. The Hoosier Leasing Co., on the Alpine vein in the Trade Dollar, produced and marketed a small amount of high-grade ore. The Castle Creek Mining & Milling Co. resumed operations the latter part of the year, after perfecting a reorganization of the company.

New companies entering the county during the year were: The Afterthought Mining Co., on the Afterthought; the Big Four Development Co., on the Cumberland; and the War Eagle Mining & Milling Co., on the Red Jacket group. All these are located on War Eagle Mountain.

Drilling for "platinum" in the Bruneau section, in the artesian basin of Little Valley, was active during the early part of the year. Press reports indicated that results were discouraging, and that practically all of the enterprises were abandoned.

Payette County

The only known mineral resources of this county are diatomaceous earth; various clays of excellent quality; and gas, which has been developed at Payette.

Late in 1926 the Idaho Petroleum Co. at Payette acquired the property and equipment owned by the Idaho Oil & Gas Co., whose well was 1100 feet deep. Work was then started sinking the well to a further depth and was

carried on intermittently throughout 1927, until a total depth of 1800 feet was gained. The encountering of gas was reported at the depths of 1485 and 1550 feet.

Power County

The most active development work done in this county during the year was that of the Independent Mining Co. at its lead-silver prospect near Rockland. The mine is equipped with small machinery, and nine men were employed in sinking a shaft.

The Gem State Petroleum Co. extended its well 325 feet; and the Rockland Valley Oil Co. added 450 feet to its bore.

A few placer mines along the Snake River produced and marketed a small amount of placer gold.

Shoshone County

During 1927 this county witnessed more new development, the starting of more new enterprises, more new dividend-paying and profitably operating mines, and a larger production than at any time since the peak of wartime activities. As many of the new enterprises are based on substantial mine foundations, the possibility for adding additional new producers to the present long list of profitable operations is greatly increased. All the large mines conducted active development work throughout the year which proved the extent of their ore bodies at greater depth and laterally. The increased ore reserves and the improvements added to mine, mill, and smelting plants have enhanced the physical condition and future life of the mines, as well as insuring a long period of prosperity for the Coeur d'Alene district.

The principal producing mines in which the ore reserves were increased by new development work during the year were: The Bunker Hill mine of the Bunker Hill & Sullivan M. & C. Co.; the Hecla mine of the Hecla Mining Co.; the Morning and Page mines of the Federal M. & S. Co.; the Tamarack mine of the Tamarack & Custer Consolidated Mining Co.; the Stratton and Panhandle mines of the Strattons Mines Co.; the Sidney mine of the Sidney Leasing Co.; the Sunshine mine of the Sunshine Mining Co.; the Gold Hunter mine of the Gold Hunter Mines, Inc.; the Galena mine of the Callahan Zinc-Lead Co.; the Jack Waite mine of the Jack Waite Mining Co.; and the Constitution mine of the Constitution Mining & Milling Co.

Companies which entered the ranks of dividend payers during the year were: The Sunshine Mining Co. at its Sunshine mine; and the Sidney Leasing Co. at the Sidney mine. Mines which were placed on a profitable operating basis were: The Galena mine of the Callahan Zinc-Lead Co.; and the Page mine of the Federal M. & S. Co.

The principal new ore disclosures and discoveries of importance were those at the Tamarack mine of the Tamarack & Custer Consolidated Mining Co.; the Dickens mine of the Dickens Consolidated Mines Co.; the Sherman mine of the Sherman Lead Co.; the Douglas mine of the Douglas Mining Co.; the Alameda mine of the Alameda Mining Co.; and the Golconda mine of the Golconda Lead Mines.

The most important new construction work maintained throughout the year was at the electrolytic zinc plant at Kellogg, which is being built by the Sullivan Mining Co. to treat the zinc-lead ores of the Coeur d'Alene district. The Sullivan Mining Co. is owned jointly by the Bunker Hill & Sullivan M. & C. Co. and the Hecla Mining Co. The Hercules mill at Wallace, owned by the Hercules Mining Co., was rebuilt, a zinc flotation unit added, and it was converted into a custom mill which now offers milling facilities for small mines without mills in the vicinity of Wallace. The mill on Big Creek which was formerly owned by the Big Creek Mining Co., Ltd., whose property was acquired under foreclosure proceedings by the Bunker Hill & Sullivan M. & C. Co., was entirely rebuilt to treat the ore from the Bunker Hill's Crescent mine. This mill is now known as the Crescent. The Cedar Creek Mining & Development Co., Ltd., constructed a new mill at its property in the Summit district. The design of this mill followed that of the Galena mill of the Callahan Zinc-Lead Co. and includes fine grinding with lead and zinc units.

The largest and most important expenditures made in Shoshone County during the year in mine development and new exploration work were those of the Hercules Mining Co. and its allied companies, all of which are controlled by Jerome J. Day and Harry L. Day, at the following operating mining companies or mines: Tamarack & Custer Consolidated Mining Co.; Strattons Mines Co.; Ambergris Mines Co.; Sherman Lead Co.; the Maher-Hearn group; Honolulu Mining Co.; Humming Bird Mining Co., and Roanoke Mining Co. All of these mines are in favorable locations, and, as the work is being actively and intelligently directed, there are excellent possibilities for some of them to become important producers.

Working conditions throughout the Coeur d'Alene district are exceptionally favorable. All the mines are well ventilated, and the operators devote much time and thought to making the mines safe and keeping them in such condition that the men can do a full day's work without expending the energy that is necessary in poorly ventilated mines. Both attention and money have been devoted to this phase of the operations, and it can safely be said that these are the best ventilated mines in the country. Serious attention is given not only to ventilation, but to safety, recreation, and general welfare.. The value of the welfare work to company employees and to the communities has been demonstrated through the Morning Club, erected at Mullan by the Federal M. & S. Co.; the Y. M. C. A. Building at Kellogg, donated by the Bunker Hill & Sullivan M. & C. Co.; and the Hercules Hall at Burke, erected by the Hercules Mining Co. Another outstanding contribution to this work is the base-ball field—located a short distance above the town of Burke and named Hearn Field in honor of W. F. Hearn of that town—which the Hecla Mining Co. constructed and donated to the community during the year. The building of the field involved engineering and construction difficulties, as level land in this vicinity is unknown; it was done in the interests of intermine base-ball teams, which are sponsored by all the large mines and between which there is keen rivalry.

HEARN FIELD: HECLA MINING CO.

Favorable working conditions attract first-class workmen to the district who remain permanently, with the result that the labor turnover is always at a low point. The wage scale is the highest of any mining camp in the United States, averaging from $1.00 to $1.50 a day above any other district. The scale is based on the price of lead, so that when this metal is selling at a high price, the workmen benefit, as well as the mining companies. As all the operators have adopted the sliding scale, there is no hesitation in granting an increase in wages with the increase in the price of lead; and it follows

that there are no labor controversies or agitation. This high wage scale is also reflected in the general prosperity of the county, which during 1927 was not exceeded by any other county or district in the State.

The outstanding new developments, construction and enterprises can best be reviewed through an outline by companies.

The extensive development work which was done during 1927 in the Bunker Hill mine greatly increased its resources. The completion of the shaft to the 1900-foot level and the opening of the ore bodies at that depth, where the ore and geological conditions were found to be normal, added much to the life of the mine which is estimated in decades instead of in years. The Bunker Hill & Sullivan Mining & Concentrating Co., because of the magnitude of the Bunker Hill mine, has become more of a manufacturing than a mining operation, and with its smelter, mills, experimental plants, and organization, is one of the largest of its kind in the world. Its stock was listed on the New York Curb Exchange during the latter part of 1926; in January, 1927, this stock sold at a low of $67.50 per share and in September it had risen to a high of $156.00 per share. This company maintained its usual production record throughout the year, and the many plant betterments which were added greatly increased the efficiency of the enterprise. The principal betterments were the remodeling of the Sweeny mill, and enlargements and improvements at the smelter and the surface plant of the mine. The Tainton electro-chemical experimental lead-leaching plant was modified and improved, and many details perfected which add greatly to the importance of the process. In addition to extensive development work in the Bunker Hill mine, this company was actively engaged in prospecting and developing other properties throughout the Coeur d'Alene district, in Valley County, and in Nevada, Alaska, and Canada. At one of these, the Crescent in Shoshone County, the old mill of the Big Creek Mining Co. was acquired and rebuilt for the purpose of milling the ore from this mine.

The Hecla Mining Co., which is recognized as one of the principal lead-silver producing companies of the United States, greatly increased its ore reserves and resources in the Hecla mine. The vein was further explored on the 2800-foot level and work was started in sinking the main shaft to this level. The mine and mill plants were enlarged and improved, and the mine maintained in first-class condition. At the old Tiger-Poorman mine, which was purchased in 1920, machinery and equipment were installed and work started on unwatering it to the 600-foot level. In furtherance of a policy adopted a few years ago to expand its operations, this company developed three properties in the southern part of the State throughout a large part of the year, and an active search for others worthy of development was carried on in Idaho, Nevada, Washington, and Canada.

The Morning mine of the Federal Mining & Smelting Co., which is one of the oldest in the Coeur d'Alene district in point of continuous production, as well as one of the largest lead-silver-zinc mines in the United States, was maintained at capacity production throughout the year. The number of years that this record will continue is unknown, as development work on the 2850 and 3050-foot levels has proved the ore bodies to be larger and more extensive than on any of the upper levels. During the year the 2850-foot level was opened to the full length of the ore, a contract was let for sinking the shaft from the 3050 to the 3450-foot level, and mine and mill plants were greatly enlarged and improved. The change in the milling methods from jigs and tables to fine grinding and flotation resulted in a reduction of milling costs and an increase in recoveries. In addition to the ore mined under company operations, a large tonnage was extracted from the upper levels by a number of lessees; the most important of these is the Sheridan Lease, which employs over 100 men.

The Page mine of the Federal Mining & Smelting Co., in Government Gulch near Kellogg, was reopened in 1926, equipped with mine and milling plants and placed on a producing basis. It was operated throughout 1927 on a profitable production basis. The plants were improved, mine camp was enlarged, the shaft extended 300 feet from the 600 to the 900-foot level, and

the ore bodies were opened to a greater extent on the intermediate levels. The success of this operation can be accredited entirely to flotation, because with the old milling methods it was impossible to mine and mill such low-grade ore at a profit. The average metal content of the ore mined during the year was: Lead, 6.93 per cent; zinc, 2.78 per cent; silver, 2.17 ounces.

The Sullivan Mining Co. suspended production at its Star mine, pending completion of its new electrolytic zinc plant at Kellogg, and devoted all its energies to this construction and to underground development work. The 4000-foot level of the Star mine is connected with the 2000-foot level of the Hecla mine by the Star crosscut, which is 8900 feet long. This crosscut made a blind connection with the Star vein at a point 2800 feet below the Star tunnel, and a vertical operating raise is now being driven to connect crosscut and tunnel. During the year this raise was advanced 1500 feet and a connection made with the 800-foot or No. 6 tunnel level of the Morning mine. Also the Hecla mining plant was enlarged to accommodate Star ore. It was expected that the zinc plant would be completed and production resumed in April, 1928.

The Tamarack & Custer Consolidated Mining Co., which is recognized as one of the substantial producing mines of the Coeur d'Alene district, maintained a steady output and an extensive mine development campaign throughout the year. During the early part of the year, the development work resulted in opening up a large, previously unknown ore body on the No. 4 shaft level which was later opened on adjacent levels. The extent and grade of this new ore, as opened up at the close of the year, indicated that many years had been added to the life of the mine.

At the Galena mine of the Callahan Zinc-Lead Co., which was placed on a profitable operating basis late in 1926, capacity output, together with an extensive development campaign, was maintained throughout the year. The new work increased the ore reserves, and late in the year arrangements were completed for opening the mine to an additional depth of 800 feet, from the 1400-foot level to the 2200-foot level. New sinking equipment was installed on the 1400-foot level, and at the close of the year the shaft had been extended to the 1600-foot level. As this mine is located in the so-called "dry belt," or south side of the district, the success it is attaining has been an important factor in stimulating development throughout this area.

The addition of the Sunshine Mining Co. to the list of dividend-paying mines of Shoshone County was one of the most important events of the year, particularly because this company's mine is also situated in the south side of the district. The mine plant and mill were enlarged and improved; a 250-foot inclined winze was sunk from the 500-foot level in the mine, and new hoisting machinery installed for conducting operations through it, also a large amount of lateral development on various levels was performed, which new work greatly increased the ore reserves.

The Sidney, operated by the Sidney Leasing Co., was the second addition to the list of dividend payers during 1927. The fact that this mine, located on Pine Creek, is being operated at a substantial profit with metals at a low price is significant in proving that this section of the Coeur d'Alene district is not without merit, and opinions as to its possbilties are changing. Much credit is due the Bunker Hill & Sullivan M. & C. Co. for the success of this enterprise in having financed the construction of its aerial tramway and given assistance to its operation. In addition to maintaining a constant output throughout the year, the Sidney Leasing Co. sank a 200-foot shaft from No. 6 tunnel, installed a new hoist, performed a large amount of lateral development work, and enlarged the mine camp.

One of the large and active development campaigns conducted during the year and including mine improvements and additions to mine plants was that of the Strattons Mines Co. at the Stratton and Panhandle mines, which also produced and marketed a substantial tonnage of ore. In December this company obtained from the Option Mining Co. a lease on the Ohio claim, and arrangements were completed for developing it from the 200-foot level in the Stratton shaft.

and carried up about 40 feet, the ore being shipped to the local mills for treatment. In order to open sufficient ore to justify the erection of a mill, stoping was discontinued; a 200-foot raise and a 200-foot shaft were started. Before the beginning of this work, a 750-cubic-foot Sullivan electrically-driven compressor, a power line and transformers, electrical storage-battery haulage, two air-driven hoists, complete mining equipment, and mine buildings were installed and erected. Work on the raise and shaft was prosecuted to completion, and at the close of the year the vein was proved to a sufficient extent to warrant the construction of a mill.

One of the principal new mills constructed during the year was the 100-ton flotation concentrator of the Cedar Creek Mining & Development Co., Ltd., at its property in the north side, or Murray section. The mill building was erected and machinery and equipment were installed, but freezing weather had set in before completion, so operations were deferred until early in 1928. In addition to the mill, the company erected new boarding and bunk houses, installed additional mining machinery, and placed the mine in condition for stoping operations.

The Highland-Surprise Consolidated Mining Co. opened its mine to a greater depth, remodeled its mill, and marketed a large tonnage of concentrates during the early part of the year, after which operations were suspended pending completion of the Sullivan electrolytic zinc plant. The operations of this company added materially to the activities of the Pine Creek section.

The United Metals Co. maintained an extensive exploration campaign until October, principally on the Black Bear and Bell groups. This company is holding and developing the mines owned by the Bell Mining Co., the Black Bear Mines Co., the Goodenough Mining Co., and the Western Pacific Mining Co., all of which are located on Canyon Creek near the Frisco mine of the Federal Mining & Smelting Co.

The Lincoln Mining Co., which owns the old Silverado mine about midway between the Sunshine and Galena mines, maintained active development work for a period of six months.

The Atlas Mining Co., which is a consolidation of the Idaho-Carbonate Hill Consolidated Mining Co., the Idaho Giant Mining Co., and the Boulder Creek Mining & Milling Co., Ltd., maintained active work until April, at which time its long tunnel had been advanced to a total length of 7030 feet.

Companies which installed new equipment and conducted development work during all or part of the year were as follows: Evolution Mining Co., at the Evolution mine near Osburn, electrically-driven compressor, hoist, new buildings, and work started; Little Sunshine Mining Co., at the Palmer group on Big Creek, electrically-driven compressor and complete mining equipment installed, and contract let for driving a 2000-foot exploratory crosscut; Wolverine Mining Co., Ltd., electrically-driven compressor and air hoist installed and drifting done at bottom of 200-foot shaft; Bismarck Mining Co., small gas-driven compressor and complete mining equipment installed and work started on a 1200-foot tunnel, of which 700 feet had been driven at the close of the year; Mutual Mines Development Co., power line, transformers, electrically-driven compressor, steel sharpener, and complete equipment installed and active development work performed throughout the year.

Companies which employed more than six men and which conducted development work throughout the year were as follows: Hypotheek Mining & Milling Co., which unwatered its shaft from the 900 to the 1100-foot level, performed a large amount of drifting on the 1100-foot level, and started a raise on the vein to the 900-foot level, also producing and shipping a substantial tonnage of crude ore and concentrate; Ajax Mining Co., which sank a 200-foot shaft at the bottom of which over 1000 feet of drifts on the vein were run (press reports were to the effect that the drifts encountered some good milling ore); Delaware Mines Corporation, which conducted development work and reopened old entries, a small tonnage of ore being produced by lessees; Independence Lead Mines, Ltd., which developed its property on the lowest, or No. 4, level.

Teton County

During the year the Teton Coal Co. completed construction of its tipple; improved and enlarged its mine plant, tunnel, and camp; and produced and marketed the largest tonnage of coal which it has ever mined in any one year. The tipple consists of sizing, screening, sorting, and loading machinery, with the necessary bins; it has a capacity of 1000 tons in 24 hours. Changes in the management and the operating personnel greatly increased the efficiency of the enterprise.

The Superior Coal Mining Co., whose property is adjacent to that of the Teton Coal Co., conducted active development work throughout a large part of the year. This work consisted principally in driving a tunnel to intersect the Brown Bear and one other coal bed.

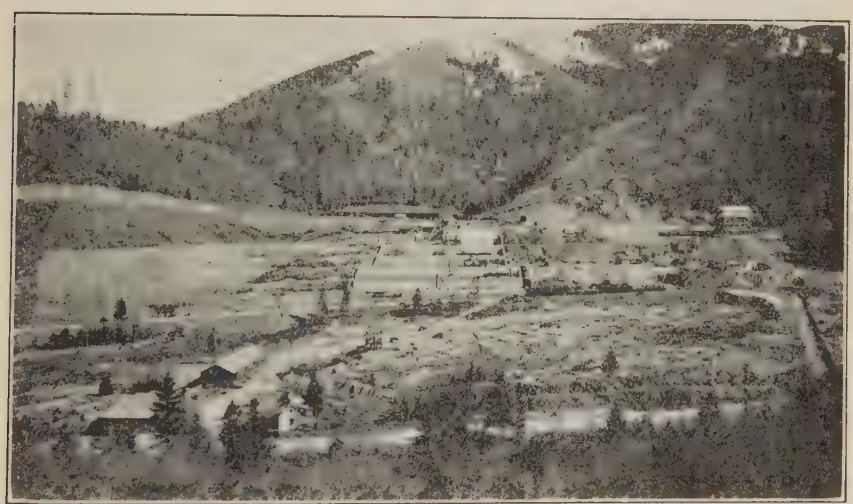
The Idaho Coal Mining Co., on Horseshoe Creek near the Teton Coal Co.'s property, conducted a small amount of development work throughout the year.

The Tieton Valley Land & Leasing Co., whose well reached a depth of 1325 feet in 1926, encountering a strong flow of gas, was idle throughout the year, on account of inability to finance the project to completion.

Valley County

One of the outstanding disclosures of new ore in 1926 was made in this county by the Bunker Hill & Sullivan Mining & Concentrating Co. at the Hall-Interstate mine in Deadwood Basin. The exposures were in a long crosscut tunnel which intersected the vein approximately 600 feet below the outcrop. At the point of intersection the vein was determined to be approximately 50 feet wide, throughout the largest part of which the ore was of commercial grade. During 1927 this ore was sufficiently explored to warrant building a mill, and construction work was started on a 100-ton flotation concentrator and a 250-horsepower hydroelectric power plant. In addition to this large construction program, new camp buildings were erected; and mine development work, consisting principally of a 700-foot raise to connect the lower and upper tunnels, was maintained. As the Hall-Interstate vein occurs in granite or allied rocks, this enterprise is of value to the State, as it is stimulating prospecting and encouraging the investment of capital for the development of the many similar occurrences which are found throughout the granite area of central Idaho. In past years, this area has been looked upon with disfavor, but this demonstration fully proves the potentialities of these veins.

One of the largest and most important new enterprises started in the State during the year was that of Fred W. Bradley, president of the Bunker Hill & Sullivan M. & C. Co., as the Yellow Pine Syndicate. This company acquired the Meadow Creek and Cinnabar groups owned by the United Mercury Mines Co. The mine camps at each group were enlarged and improved; a new camp was constructed on the Meadow Creek group; and an active development campaign was inaugurated. The new camp on the Meadow Creek was at a distance of 14,000 feet from the old camp and 500 feet lower in elevation. Throughout this distance the vein has been traced on the surface, and mining work at the new camp is designed to prove the vein at that point. The Meadow Creek vein is a large low-grade gold deposit about 40 feet in width. The Cinnabar group contains a large deposit of mercury ore.



The Profile Gap and Edwardsburg districts witnessed more development work by prospectors, small companies, and investigators than for many years. Two new discoveries of lead-silver ore were reported and three new companies started work; one hydraulic mining enterprise installed a small amount of new equipment.

In the Thunder Mountain district, McRae and Davis maintained active work at the Sunnyside mine throughout the year, and produced and milled a small tonnage of gold ore. An important publication issued in 1927 which is of much value in displaying the possibilities of this district, is Pamphlet 25 of the Idaho Bureau of Mines and Geology (Moscow, Idaho): "Ore Deposits in the Tertiary Lava in the Salmon River Mountains, Idaho," by C. P. Ross.

THE SULLIVAN ELECTROLYTIC ZINC PLANT OF SULLIVAN MINING COMPANY

By U. C. Tainton, Consulting Metallurgist.

The most outstanding new enterprise allied to and affecting the mining industry in Idaho is the Sullivan electrolytic zinc plant of the Sullivan Mining Company at Kellogg. This company is owned jointly by the Bunker Hill & Sullivan M. & C. Company and the Hecla Mining Company. For many years the Bunker Hill & Sullivan M. & C. Company has led the mining world in research on advanced metallurgical problems, and the erection of this plant is the culmination of several years' experimental work in developing a method of treatment for refractory and complex zinc ores. It is entirely a Coeur d'Alene development, not interfering with or intrenching upon other agencies of zinc production, and will stand as an interesting example of how vision,

SULLIVAN ELECTROLYTIC ZINC PLANT ON APRIL 14, 1927

enterprise, and capital can create a new industry from the materials which have long been at hand but which have been regarded as relatively unimportant.

Although the nominal capacity of the unit now under construction is 50 tons of metallic zinc per day, the ultimate capacity will be about 150 tons daily. A large part of the equipment now being installed is sufficient for the projected capacity, while all of it is in excess of the 50-ton figure. The company expects to have the first unit completed and in operation by the first of April, 1928, at which time its expenditure on the plant will have amounted to between $1,250,000 and $1,500,000. The main building has a floor area of 70,000 square feet and a height of 90 feet over the roasters. When fully completed the plant will use 40,000 horse power electrical energy and produce upwards of $7,000,000 worth of metal products in one year. It is situated about three-quarters of a mile southwest of the Bunker Hill lead smelter, on the east side of Government Gulch. This site was chosen not only because it was topographically adapted to the purpose, but also because

it was already provided with railroad tracks at three different levels—one below the plant, one directly above, and one at the base of the smokestack. Another important factor in determining this location for the plant was that the top of the stack, 250 feet high, is almost 1000 feet above the floor of the valley, thus practically eliminating the danger of smoke nuisance.

The main source of zinc ores and concentrates will be mines in the Coeur d'Alene district which have recently been developed for this purpose. The principal one of these is the Star mine, in which millions of tons of zinc-lead-silver ore have been proved. It is owned by the Sullivan Mining Company and is situated near Mullan. This mine is connected with the 2000-foot level of the Hecla Mining Company's shaft by an 8900-foot crosscut through which all mining operations will be conducted. These entries opened the Star vein to a depth of about 4000 feet in Star ground, and the same vein has been opened to an additional depth of 800 feet in the adjoining Morning mine. Zinc concentrate will be drawn also from the Sidney and Douglas mines on Pine Creek which are being actively developed under the aegis of the Bunker Hill & Sullivan M. & C. Company and in which a large tonnage of zinc-lead-silver ore has been proved. It is also anticipated that a zinc concentrate will be made in the mills of the Hecla and Bunker Hill companies, whose lead ores contain in each case a small proportion of recoverable zinc.

The electrolytic zinc process is based on the leaching (dissolving) of zinc ore with sulphuric acid and electrolysis of the resulting zinc sulphate solution. The process is cyclic, in that sulphuric acid is formed in electrolyzing the zinc sulphate. The regenerated acid in the spent electrolyte then becomes the source of the sulphuric acid used in leaching all of the ore.

The Sullivan plant is to employ the Tainton-Pring process, which is based on the use of strong acid in the leaching circuit and high-current density in the electrolysis. This process differs from those in use at Trail, British Columbia, and Great Falls, Montana. These plants use a weak acid and a low-current density, which are being modified. About three years ago the Trail plant was using a maximum acid strength of approximately 6 per cent and a current density of 25 amperes per square foot. The maximum acid strength has now been increased to about 16 per cent and the current density to 40 amperes. In the Sullivan plant the acid strength will be about 28 per cent and the current density 100 amperes per square foot.

The advantages in using as high an acid strength as possible may be summarized as follows:

1. The quantity of the circulating solution is inversely proportional to acid strength.
2. A high acid strength increases the quantity of zinc dissolved from a given ore. With a high acid strength it is practicable to treat low-grade ores from which prohibitively low extractions are obtained under weak acid conditions.
3. A high acid strength operates automatically to purify the solutions by the removal of arsenic, antimony and cobalt.
4. The presence of a large amount of soluble silica in certain ores causes considerable trouble in a low strength acid solution; with a strong acid it is practicable, as well as profitable, to treat these ores.
5. Strong acids permit high-current densities in electrolysis which in turn reduce the size of cell room and the time necessary for making a deposit of zinc.

A broad division of the processes is shown in the accompanying diagrammatic flow sheet (Fig. 1), which is roughly outlined below:

The zinc concentrate, after being roasted, is submitted to a magnetic separation which divides it into two parts. The magnetic part, about 40 per cent of the total, contains most of the iron and the zinc ferrite ($ZnOFe_2O_3$), which is formed in roasting the ore; the non-magnetic part, containing practically all of the zinc, is relatively free from iron. The former is called ferrite and the latter oxide.

Zinc ferrite, which is insoluble in warm dilute sulphuric acid, is the chief source of loss of zinc in the electrolytic process when a weak acid is used. This loss is overcome in the Tainton-Pring process by first adding the ferrite to the hot strong 28 per cent acid, which readily attacks the zinc ferrite, forming zinc and ferric sulphates; the remaining non-magnetic portion, containing the zinc oxide formed in roasting, is then added to this pulp. The oxide neutralizes the unconsumed acid and reacts with the ferric sulphate, forming zinc sulphate and precipitating hydrated ferric oxide. The ferric oxide then acts automatically to purify the solution of arsenic and antimony. As the strong acid dissolves a large amount of iron, the amount of precipitated ferric hydrate is correspondingly large, so the removal of arsenic and antimony is very thorough and complete. After sufficient oxide has been added to neutralize the pulp it is filtered; the filtrate is agitated with metallic zinc to precipitate cadmium, copper and cobalt and is then filtered again, after which the neutral solution goes to the electrolytic cells.

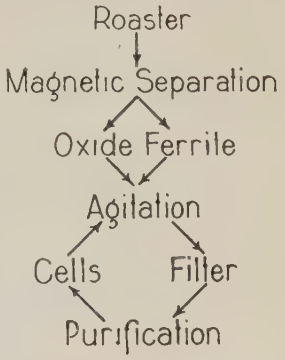


Fig. 1. Diagrammatic flow sheet of Sullivan electrolytic zinc plant

The electrolytic cells operate at an acid range of from 22 to 28 per cent free acid. When the acid reaches the upper limit, a volume of about 25 per cent of the solution is withdrawn from the cells and a corresponding amount of purified neutral solution is added. The neutral solution reduces the acid strength to the lower limit; it is then allowed to rise, by the ordinary course of electrolysis, until it reaches the upper limit of 28 per cent, after which the operation is repeated.

The process and equipment used are more fully described and shown in the accompanying text and diagram of the flow sheet. (Fig. 2.)

The concentrate arrives at the plant in the railroad cars in which it is weighed, and is then dumped into the primary bins. From these bins it passes through a set of disintegrating rolls which break up the lumps; thence it goes into the roasters, five in number, which are the standard Wedge type, 25 feet in outside diameter, each having one drying hearth and seven roasting hearths. All of the arms are air-cooled, and the arms and rabbles in the hottest hearths are made of a special heat-resisting alloy. Each furnace will roast from 35 to 50 tons of concentrate per day.

The roasted ore (calcine) is conveyed from the furnaces by a rotary Jacoby conveyor and is then elevated into the surge bins. Upon being drawn from the surge bins it is screened on 20-mesh Leahy screens. The oversize from the screens is crushed and returned to the furnaces, and the undersize passes to two magnetic separators of the Dings-Wetherill type, each capable of treating about 100 tons of calcine per day. From 35 to 45 per cent of the calcine is picked up by the magnets and dropped into the ferrite bin; the non-magnetic portion, containing the zinc oxide, falls into the oxide bins. From these bins the calcine then goes to three agitators, which are large circular tanks 20 feet in diameter by 14 feet deep, each one capable of treating 70 tons of solution at one charge; each charge, containing approximately 12.5 tons of zinc, remains in the agitator about six hours.

In starting a cycle, return electrolyte containing about 28 per cent acid is pumped into the agitator, where it is heated to approximately 70 degrees Centigrade. A weighed amount of calcine from the ferrite bin is then added and agitation maintained for approximately one hour, after which a small amount of ground manganese dioxide is added to oxidize the ferrous iron to ferric iron. The zinc oxide portion of the calcine, from the oxide bin, is then slowly added until all iron is precipitated and the acid neutralized. The heat generated in the reaction between the sulphuric acid and the oxide raises the temperature of the charge to the boiling point.

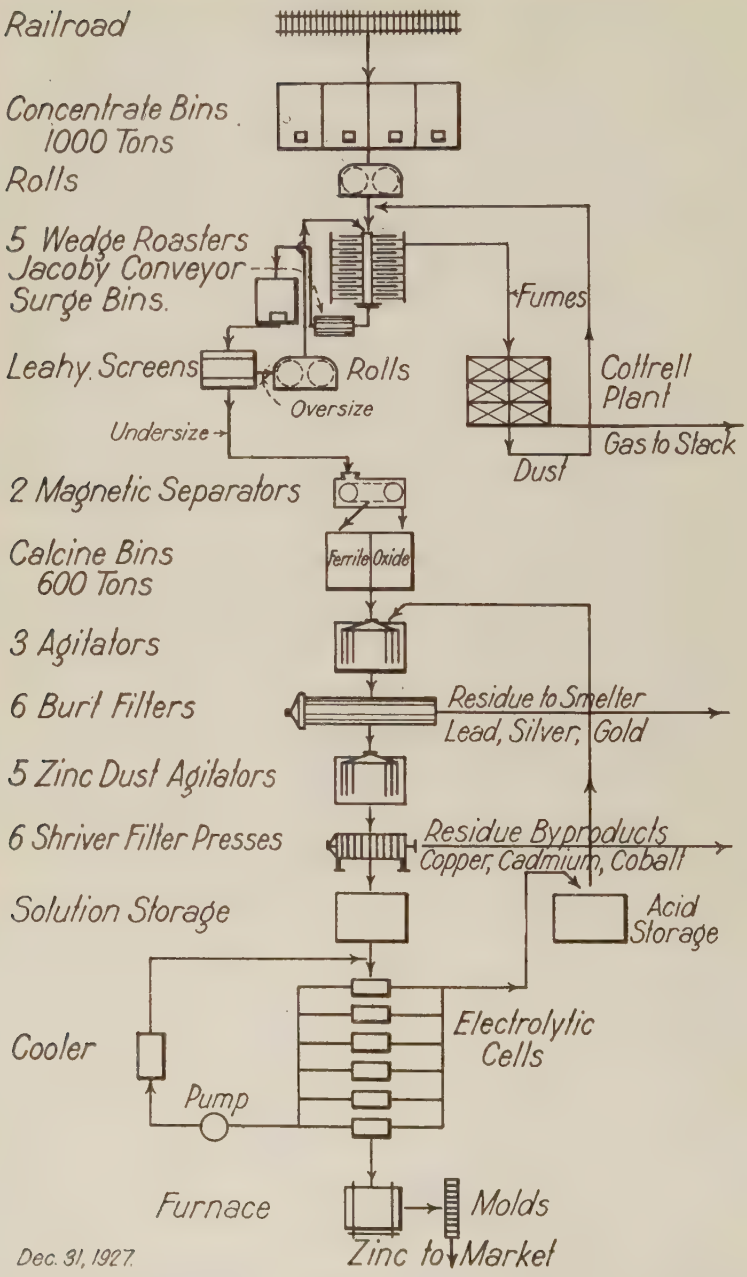

FIG. 2. FLOW SHEET OF SULLIVAN ELECTROLYTIC ZINC PLANT

After the acid is neutralized the charge is filtered to separate the solution containing the zinc, copper, cadmium, and cobalt from the residue, which carries the iron, lead, silver, and gold. The filtrate passes to the zinc-dust agitators, and the residue is sent to the Bunker Hill smelter or the experimental lead-leaching plant.

The filtration is performed in six rotating Burt filters, which are 40 feet long and 5 feet in diameter. Each filter is a cylindrical steel shell with its long axis placed horizontally, and is rotated by a mechanism similar to that employed by tube mills. The filter medium is disposed around the inner periphery, so that the rotation causes a uniform cake to form on the inside of the drum. Each filter holds a charge of about 15 tons of pulp, in which is contained approximately 2½ tons of metallic zinc. During the filtering operation the liquid is expelled by compressed air admitted through the trunnion, after which the residue is washed in the same manner. The Burt filter is especially adapted to this operation, as the soluble materials are almost entirely removed with a minimum amount of wash water; the temperature of the solution is maintained; and the design of the filter permits protection against the corrosive action of the copper sulphate which is in the solution.

SULLIVAN ELECTROLYTIC ZINC PLANT ON OCTOBER 10, 1927

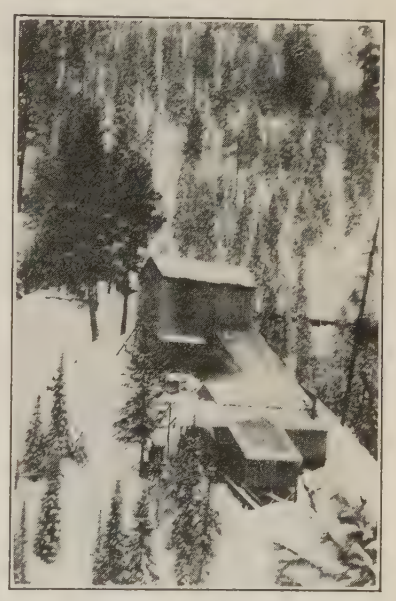
When the solution reaches the zinc-dust agitators, which are similar to the pulp agitators, zinc dust is added to precipitate copper, cadmium, and cobalt, and agitation is maintained until all of the latter metals are entirely precipitated. To assure complete precipitation of the cobalt, the temperature of the solution must be maintained at 70 degrees Centigrade or over, so the solution circuit is arranged to conserve the heat generated in the calcine agitators. After this step the purification is completed. The solution is filtered in six Shriver presses and is then ready for the electrolytic cells, so it passes into the solution storage tanks.

Electric power will be furnished by the Washington Water Power Company, whose main-line circuits carry 110,000 volts; this company's lines are connected with those of the Montana Power Company which carry the same voltage. In the event that both these lines should be placed out of commission at the same time, connections with a 60,000-volt transmission-line have been provided for emergency purposes. The power is stepped down from

110,000 volts to 2300 volts through a bank of 10,000-kilowatt transformers, and is then ready for use in the two motor generator sets which convert it into direct current for the zinc-cell circuits.

Each set consists of a synchronous motor coupled to a direct-current generator giving 500 volts and 8000 amperes. Each generator supplies a separate cell circuit of 150 cells connected in series. A single cell is 7 feet long, 3 feet wide, and 4 feet deep, and contains 10 cathodes. Each cathode has a submerged area of eight square feet and requires 800 amperes. The cells are placed in series in four rows with working aisles between the rows. The cell floor is about 15 feet above the ground, and below each row of cells a long sump is provided. In the event of a power shut-down the cells are drained into these sumps so it will not be necessary to lift the cathodes from the cells. Fans installed below the cell floor are so regulated that the air in the cell room can be displaced either upward or downward as desired.

An alloy of aluminum and silicon is used for the cathodes, the conducting header-bar and sheet being cast in one piece. The anodes are made of a lead alloy which has proved to be more resistant than chemically pure lead, although the latter has always been insisted upon by previous users of the electrolytic process. As the lead-alloy anodes are more resistant than pure lead anodes, the amount of lead deposited with the zinc is almost nil and the zinc metal obtained is of exceptional purity, usually about 99.99 per cent zinc. Another distinct advantage, never obtained at electrolytic zinc plants using the pure lead anodes, is the recovery of marketable manganese dioxide, which is precipitated in the cells during electrolysis.



At intervals varying from 16 to 24 hours the cathode plates are removed from the cells one at a time. The zinc is stripped from them, they are returned to the cells, and the operation is continued until all of the cathodes have been stripped. The zinc is melted in an ordinary reverbatory furnace and then cast into slabs weighing about 50 pounds each. An electric furnace, requiring much less labor and producing less than 1 per cent of dross as against 4 or 5 per cent produced in the reverbatory furnace, has been designed and is expected ultimately to replace the present method of melting the zinc.

The final products of the plant are: High-grade zinc metal, 99.99 per cent pure; high-grade manganese dioxide, suitable for use in the manufacture of dry batteries; a lead-silver-gold residue, from which the metals will be recovered either by the Bunker Hill smelter or lead-leaching plant; and a mixed by-product containing copper, cadmium, and cobalt. Plans have been projected for the construction of a plant to reduce this by-product to the pure metals.

IDAWA GOLD MINING COMPANY: BELSHAZZAR MILL

The principal new mill in Idaho to begin operations for the recovery of gold during 1927 was that of the Idawa Gold Mining Company at its Belshazzar mine, which ranks for the year as second largest gold producer in the State, being surpassed only by one large dredge. The Belshazzar's milling process consists of amalgamation and table concentration; the interesting feature of the enterprise is that it is based on the recovery of free gold from a sulphide ore.

The company's mine is located in the extreme western part of Boise Basin, Boise County, about 35 miles northeast of the State capital; it is four miles west of Placerville and about two miles southwest of the famous Gold Hill & Iowa mine at Quartzburg; its shipping point is New Centerville, the present terminus of the Intermountain Railroad, seven miles from the mine. Geographically, the mine is located on Fall Creek near the top of the divide between Fall and Canyon creeks, at an elevation of approximately 6500 feet. Geologically, it is located within the Gold Hill shear zone. The principal tunnel, through which all mining operations are conducted, is known as No. 400, as it is 400 feet higher than the mill, to which it is connected by a 1600-foot aerial tramway.

Belshazzar Mill

The ore consists mainly of pyrite associated with a complex lead-bismuth-silver sulphide (as yet unidentified), arsenopyrite, and occasionally sphalerite, in a quartz gangue. The gold is closely associated with the lead-bismuth sulphide and arsenopyrite; although the larger part of it is coarse, it varies in size from extremely fine particles to large nuggets; one nugget was found which yielded $244.50. The association of the gold with the lead-bismuth sulphide is so dependable that panning is more satisfactory than assaying in making a quick determination of the quality of the ore. In the mill, the width of this streak of sulphide on the tables is a very dependable gauge of the amount of gold in the mill feed.

The mill is the conventional amalgamation-concentration type, electrically driven, with a daily capacity of 25 tons. The ore is fed from the mill ore-bin to a 24x12-inch Blake type crusher which reduces it to pass a 2-inch ring. It then goes to a set of 12x20-inch rolls which crush it to ½-inch mesh; thence to a 4½x16 Hardinge ball mill, where it is ground to 4 per cent on a 20-mesh screen. The ball mill discharges through a Hardinge amalgamator; thence onto two 4½x10-foot amalgamation plates, from which the ore passes through a hydraulic classifier, and then to two concentrating tables. The concentrate from these tables is re-ground in two small cast-iron arrastres placed in series, each discharging into launders lined throughout with small amalgamation plates. Amalgam traps are placed at every convenient location from the Hardinge amalgamator to the lower end of the mill. From the arrastres the concentrate passes into a storage-bin for shipment to the smelter.

From 70 to 75 per cent of the gold in the ore is recovered by amalgamation, approximately 33 per cent of this being recovered when the concentrate is re-ground. A part of the unamalgamated gold is so intimately locked up in the sulphides that its recovery is problematical except by smelting. The principal milling loss is in fine-flaked gold having a tendency to float which makes re-grinding difficult. This gold will not amalgamate even when brought into intimate contact with a freshly dressed plate, but passes to the concentrate bins.

MINE-RESCUE WORK IN THE COEUR D'ALENE DISTRICT

By K. T. SPARKS, Director, Central Mine Rescue Station

One of the worst catastrophes that can happen in the mining industry is an underground fire, and few mines are free from such a hazard. If the fire is accompanied by any great loss of life, thereafter that mine has a "black eye" in the minds of the underground workers. In the event of a large fire, a great amount of repair work is necessary before the mine returns to a production basis, and much money is lost on account of the enforced shutdown.

Every mine which has passed the prospect stage should install and maintain a mine-rescue station suitable to its requirements, just as all villages and towns, however small, have some sort of fire department. Stringent fire-prevention measures are a necessity, and next in importance is equipment for fire fighting, including the necessary training of the personnel in the use of the equipment.

In 1923 the principal mine operators in the Coeur d'Alene district, realizing the necessity of mine-rescue equipment and training, established a central mine-rescue station. Since then it has been in operation, working smoothly and at small expense.

The central station is a mine-rescue car, which is maintained in Wallace on a spur track common to both railroads of the district, in order that it may be quickly moved to any point where needed. This car is a large railroad coach rebuilt for mine-rescue purposes. It carries 14 sets of oxygen breathing-apparatus, commonly called "helmets"; 12 large storage tanks of oxygen; 1000 regenerating cans; one power-driven and one hand-operated pump; also spare parts, necessary tools, and miscellaneous equipment, including resuscitating apparatus and various gas-testing devices, as well as a complete line of fire-hose fittings, revolving nozzles, spray nozzles, and quick connectors. The car is equipped with living quarters for a small crew and is ready to move at any time.

MINE-RESCUE CAR.

Rescue Stations Located at Mines

The Hecla Mining Co. and the Hercules Mining Co., both at Burke, the Federal Mining & Smelting Co. at Mullan, the Tamarack & Custer Consolidated Mining Co. at Gem, and the Bunker Hill and Sullivan Mining & Concentrating Co. at Kellogg all have complete rescue stations located at their mines. Each of these stations has from 8 to 15 sets of breathing-apparatus and an ample supply of spare parts, regenerating cans, and oxygen pumps. In the event of a large mine fire in the district, the equipment from all the mine stations, together with the apparatus from the mine-rescue car, can be concentrated at one place in a very short time, thus making available about 100 sets of apparatus and a large quantity of spare parts.

Type of Breathing-Apparatus

The Paul self-contained breathing-apparatus is standardized for use in the Coeur d'Alene district, and all the mine stations and the mine-rescue car are equipped with this type. Standardization is an important factor when men from different mines are called upon to help fight a fire in a strange mine, as they gain confidence upon discovering that the apparatus in use is similar to that which they have been trained to use.

The Paul breathing-apparatus weighs about 40 pounds. As the oxygen feed is controlled by automatic valves which give the wearer the amount of oxygen he requires, it is practically "fool-proof". The valves are so set that the pressure inside the machine is slightly greater than that of the surrounding atmosphere, so should a leak develop while the machine is in use there is no danger of the wearer being gassed. This apparatus supplies the wearer with ample oxygen, under average working conditions, for a period of two and one-half hours.

FIRST-AID TEAM

Dressing Illustrated Is the First-Aid Treatment of a Broken Back

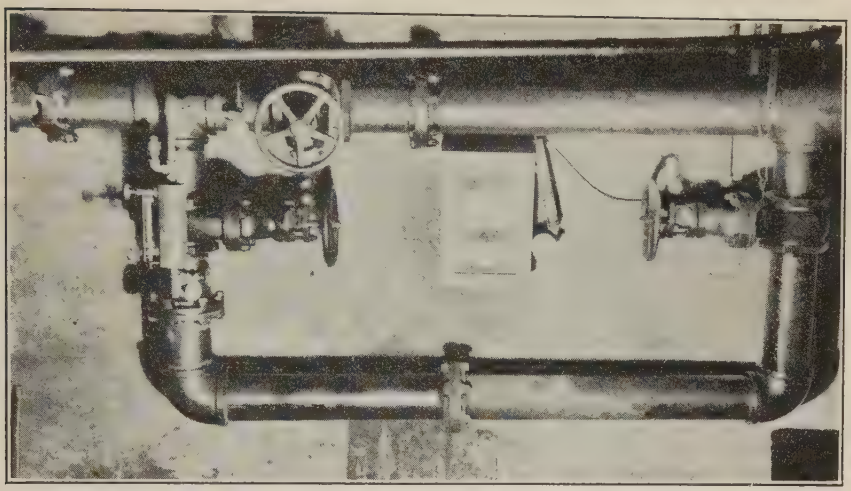
Training of "Helmetmen"

During the year 1927, continuous mine-rescue training was maintained at the large mines mentioned above, so, with men previously trained, there are at present about 225 competent "helmetmen" in the district, and they, together with the breathing-apparatus and equipment, are all available in the event of a fire at any mine.

The men are trained in groups of five, which number has been found to be the most conveniently handled unit for maximum efficiency, both in training and in actual underground fire-fighting. Their training covers a period of three months at three-week intervals for a duration of four hours each time. Preliminary training consists of acquiring the basic principles in the construction, oxygen circulation, and testing of the breathing-apparatus. The men wear the machines first in fresh air and then in an irrespirable atmosphere, which usually consists of formaldehyde fumes or wood smoke. They are required to perform physical labor, both in the fresh air and in smoke, thus learning the limitations of the machines, which establishes their confidence in the apparatus because they know how much work may safely be done while wearing it and the limit for which it can be used at one time. After completing the first course of training, they receive practice one afternoon at intervals of six weeks throughout the year.

First-Aid Work

U. S. Bureau of Mines Car No. 9 visits the Coeur d'Alene district for a period of from five weeks to two months each year. During this period classes are conducted at all the large mines in the district, not only for the miners, but for the general public as well. The course lasts two and one-half hours a night for five nights, and everyone who completes it is given a Government certificate of competency and a First-Aid Manual.



First aid is merely the treatment given a person who has suffered an accident, bridging the time before a doctor can reach the case. The Bureau of Mines course consists of teaching bandaging for wounds on all parts of the body; the application of tourniquets to check arterial bleeding; the proper methods for reducing and dressing dislocations; and the application of splints for fractured bones. Artificial respiration, burns, nervous shock, strains, and sprains are all discussed and the correct treatment demonstrated. Any one who completes the course has a good working knowledge of first aid and will be competent to handle almost any accident that may happen.

Stench Warning System Installed in Mines

Several of the mines of the district have installed a stench warning system to notify men employed underground that a fire has broken out in the mine. As the name implies, a "stench warning" is obtained by introducing an offensive-smelling substance into the compressed-air pipes and ventilating current. The odor quickly penetrates to all parts of the mine; the men, detecting it, know that a fire has occurred and that they must hasten to the nearest available exit.

The stench system consists essentially of an injector placed in the compressed-air line by means of which the stench material may be introduced into the compressed air. Usually the injector is placed in a by-pass, as it is essential that the stench material should drop on a screen which assists in disseminating it; as such a screen in the main air line is objectionable in normal mine usage, the by-pass is added to the air lines.

The stench material is a liquid with a very offensive odor, having the property of vaporizing quickly and not to be mistaken for any of the usual mine smells. In the Coeur d'Alene district the stench material used is ethyl mercaptan (CH_3CH_2SH); it has a peculiar, strong, onion-like odor, and one pint is sufficient to saturate the air in a large mine. Tests made at one of the largest mines in the district proved that this odor was plainly discernible 4000 feet from the point of injection in a little less than six minutes. The stench material is usually kept in a cabinet near the injector, and a small atomizer or sprayer is provided for introducing it into the injector and the ventilating current.

STENCH WARNING SYSTEM

Note Injector and Valve Arrangement. Cabinet in Center Contains Stench Material

Value of Oxygen Breathing-Apparatus

During the past 10 years there has been a noticeable increase in the use of breathing-apparatus through the United States. Several States now require mines of a certain size to be equipped with oxygen breathing-apparatus and to train their employees in the use of it, and some States maintain well-equipped rescue stations. Several insurance companies grant reduced rates to mining companies whose mines are provided with rescue apparatus and regularly trained men, so the mines in the Coeur d'Alene district are receiving this indirect benefit as a reward for their progressiveness.

The value of mining property saved through the use of oxygen breathing-apparatus is, of course, enormous, and properly maintained apparatus, together with a crew of trained men, is a real asset to any mining company. Apparatus crews have on numerous occasions made hazardous trips through gas-filled passages of mines to rescue the living and recover the bodies of the dead; they have, at the request of responsible authority, changed the ventilation currents, bulk-headed underground fires to localize them, and in many instances fought fires directly. The history of mining is replete with instances in which a mine that has had an underground fire has been saved for future operation solely through the accomplishment of the apparatus men.

The organization of the central mine-rescue station, installation of mine stations, selection of equipment, first-aid and mine-rescue training, fighting of underground fires and rescue work performed have been described in the 1923, 1924, 1925, and 1926 Annual Reports of the Mining Industry of Idaho. These articles are profusely illustrated with pictures of mine stations, Paul breathing-apparatus, gas masks, and mine-rescue crews from the principal mines in the district.

ACCIDENTS

The minor accidents listed in the accompanying table, pages 46 and 47, "Classification of Accidents", are taken from the records of the Industrial Accident Board and arranged to comply more nearly with the classifications made by the U. S. Bureau of Mines. The table is somewhat misleading, as a very large proportion of the accidents listed "Time Lost Over 14 Days" did not greatly exceed this number of days, and the majority of those listed "One to 14 Days" did not exceed seven days, while 291 of these involved the loss of only one day. All accidents that did not cause a loss of time of more than seven days should not have been included, as no compensation is paid. However, as the U. S. Bureau of Mines and many State officials are including these minor injuries in their reports, they are therefore included in the accompanying table as a matter of uniformity.

A comparison of the total accidents in 1927 with those in 1926 shows an increase of seven in the number of fatal accidents and practically no difference in the number of minor accidents. A comparison of the total number of men employed with the total number of accidents shows the very low accident rate of 0.55 accidents per 1000 days per man. This low rate can be attributed to a great extent to the safety organizations, to the first-aid training given the men by all the larger mining companies, and to the sustained effort and interest maintained in safety work by those in charge, further augmented by close supervision.

A comparison of the number of accidents with the number of men employed shows that the accident rate is in direct proportion to the efforts given to maintaining and enforcing safety provisions. The Bunker Hill and Sullivan Mining & Concentrating Co., which has always been very vigilant, has demonstrated that this effort is successful by establishing an accident rate that reflects greatly to the company's credit, and which shows a large decrease in the number of accidents during 1927 as compared with the number in 1926. During 1927 this company had an average payroll of 1050 men, and its accident rate was 0.32 accidents per 1000 days per man. Its nearest competitors among the large mines were the Hecla Mining Co., with an accident rate of 1.11 per 1000 days per man, and the Federal Mining & Smelting Co., with a rate of 1.16 per 1000 days per man.

Out of a total of 1313 accidents during the year, 22 were fatal. Eight of these could have been prevented, had the victims been more careful; company responsibility can be placed for four of them; and the others were unavoidable. Out of the 1291 minor accidents listed, 747 did not compel a loss of time to exceed 14 days; 502 incapacitated the injured person for more than 14 days; and 42 resulted in a permanent injury.

The loss of both legs or arms, one leg and one arm, total loss of eyesight, paralysis or other condition permanently incapacitating a workman from doing any work of a gainful occupation, is classified as "Permanent Total Disability". The loss of one foot, leg, hand, eye, one or more fingers, one or more toes, any dislocation where ligaments are severed, or other injury known in surgery to be a permanent partial disability, is classified as "Permanent Partial Disability".

Notes on Fatal Accidents

January 14, Hecla Mining Co., Shoshone County. Tony Schimmels, age 39, married, raise miner. Deceased, with two others, was working as a contract miner in a 3-compartment raise. The preceding shift had blasted a round of holes and the broken rock had been partly removed from one of the raise compartments. Against the advice of his two partners, deceased climbed over the undrawn chute to the face of the raise, directly over the chute from which the rock had been drawn. The broken rock over this chute had hung up, arch-wise, and when he stepped on it the rock dislodged under his weight, pulling him into the chute. He fell about 30 feet and was instantly killed.

February 14, Bunker Hill & Sullivan Mining & Concentrating Co., Shoshone County. Herbert S. Walker, age 25, married, shoveler. Deceased had lowered himself through a grizzly into a chute containing broken rock. While he was standing on the rock, either trainmen drew the chute or the rock which had hung up in it gave away under his weight. He was caught in the vortex, drawn into the broken rock, and smothered to death.

February 18, Wilbert Mining Co., Butte County. Grant Romney, age 24, single, miner. Deceased and Charles G. Norwood were spitting fuses for a round of 12 holes in a drift on the 1260-foot level; this level is at the bottom of a 160-foot inclined shaft from the main tunnel-level of the mine. The mine foreman and the hoistman, who were waiting at the collar of the shaft to hoist the men upon signal, heard an explosion, followed about two minutes later by four more explosions. The foreman proceeded immediately to the place where the men had been working, and found their bodies about 15 feet back from the face of the drift. Later investigation proved that a total of seven holes had exploded, and that two of these were the last holes which should have been spit in the round.

February 18, Wilbert Mining Co., Butte County. Charles G. Norwood, age 29, married, machine helper. Deceased and Grant Romney were spitting fuses for a round of 12 holes in a drift on the 1260-foot level; this level is at the bottom of a 160-foot inclined shaft from the main tunnel-level of the mine. The mine foreman and the hoistman, who were waiting at the collar of the shaft to hoist the men upon signal, heard an explosion, followed about two minutes later by four more. The foreman proceeded immediately to the place where the men had been working and found their bodies about 15 feet back from the face of the drift. Later investigation proved that a total of seven holes had exploded, and that two of these were the last holes which should have been spit in the round.

March 15, Constitution Mining & Milling Co., Shoshone County. Martin Morgans, age 50, single, miner. Deceased was being hoisted up the shaft in a bucket in which were a number of pieces of drill steel. One of the drills caught in a wall plate, tipping the bucket, and he fell to the bottom of the shaft.

March 23, Roberts Lease, Shoshone County. Anton Jurgolich, age 34, married, miner. Deceased picked into a missed hole and was instantly killed by the ensuing explosion.

March 27, Federal Mining & Smelting Co., Page mine, Shoshone County. Leon Camara, age 30, married, shoveler. Deceased was removing a bulkhead from the top set of a raise, preparatory to advancing the raise. He had removed one lagging and, as he was in the act of removing the second one, the face of the raise sloughed off. He received injuries from which he died on April 3.

April 18, Kay Development Co., Custer County. Ulysses M. Savaria, age 55, married, miner. Deceased was killed in the bunk-house when it was engulfed by a snowslide.

April 23, Hercules Mining Co., Maher-Hearn mine, Shoshone County. Mariona Garcia, age 39, married, shoveler. Deceased was shoveling in drift. As he was in the act of lifting a shovel full of rock, a slab of rock fell from the wall and struck him on the head, killing him instantly.

May 29, Hecla Mining Co., Shoshone County. Arnold J. Held, age 25, single, cager. Deceased was standing on a skip-loading platform which is located in the main shaft between the principal shaft-timbers. He had completed drawing a skip-load of rock from the skip-pocket when a fall of rock in the pocket demolished the timbers forming its front. He was caught between the pocket-timbers and the shaft-timbers, and was instantly killed.

June 19, Tamarack & Custer Consolidated Mining Co., Shoshone County. Charles E. Porter, age 66, married, shoveler. Deceased was shoveling a short distance beyond a set of timbers when a large slab of rock fell from the hanging wall and struck him, inflicting injuries from which he died on June 22.

CLASSIFICATION OF ACCIDENTS

MINE	Killed	Seriously Injured Time Lost More Than 14 Days		Slightly Injured	
		Permanent total disability	Permanent partial disability	Time lost over 14 days	Time lost 1 to 14 days
UNDERGROUND					
1. Fall of rock or ore from roof or wall	6	2	3	94	124
2. Rock or ore while loading at working face or chute	4		1	51	82
3. Timber			2	40	59
4. Explosives	6			1	
5. Haulage, Cars or Motors			3	44	39
6. Persons falling down chute, winze, raise or stope	1		2	20	28
7. Drilling (by machine or hand drills)			1	17	39
8. Hand tools			1	40	63
9. Machinery (other than motors or drills)			3	9	6
10. Flying or falling objects			3	25	80
11. Fall of persons			1	20	25
12. Lifting			1	18	17
13. Nails and splinters			1	11	59
14. Other causes			2		6
Total	17	2	22	392	627

MILL	Killed	Seriously Injured Time Lost More Than 14 Days		Slightly Injured	
		Permanent total disability	Permanent partial disability	Time lost over 14 days	Time lost 1 to 14 days
MILLING ACCIDENTS					
1. Haulage (cars and locomotives)					
2. Railway cars or motors)					
3. Crushers, rolls or stamps					2
4. Tables, jigs, etc					
5. Other machinery	1		1	2	7
6. Falls of persons				9	5
7. Suffocation in ore bins					
8. Falling objects (rocks, timbers)				6	7
9. Scalding (steam, water or acid)					
10. Lifting				1	
11. Hand tools, axes, bars, etc				4	4
12. Nails, splinters, etc				1	2
13. Electricity				1	
14. Other causes				2	3
Total	1		1	26	30

SHAFT ACCIDENTS					
15. Falling down shaft					
16. Objects falling down shaft				2	6
17. Breaking of cables					
18. Overwinding					
19. Cage, skip, or bucket	1		3	3	2
20. Other causes					
Total	1		3	5	8

SURFACE ACCIDENTS Yards, Shops, and Construction					
21. Mine cars or mine locomotives, gravity or aerial trams			1	5	3
22. Flying and falling objects	2		1	17	19
23. Lifting				7	1
24. Falls of persons			1	16	14
25. Nails and splinters					7
26. Hand tools, axes, bars, etc.			1	8	7
27. Falls or run of ore in or from bin					
28. Machinery			4	4	5
29. Other causes	1			5	4
Total	3		8	62	60

September 8, Sidney Leasing Co., Shoshone County. Wilfred Langston, age 29, single, miner. Deceased and Joseph Siedel had completed drilling and loading a round of holes in the bottom of a short shaft below No. 6 tunnel-level. Frank L. Metler, who was working in the tunnel, was instructed to assist in spitting the fuses. Metler spit five fuses, watched the other two men a minute or so, and then said: "Come on, boys, it's time to go." One of them answered: "We have plenty of time." Metler climbed about one-half the distance up the shaft, stopped, and called to them again to come on; they did not answer. He then continued climbing and, just as he reached the collar of the shaft, one shot went off, with two more following in rapid succession.

September 8, Sidney Leasing Co., Shoshone County. Joseph Siedel, age 34, single, miner. Deceased and Wilfred Langston had completed drilling and loading a round of holes in the bottom of a short shaft below No. 6 tunnel-level. Frank L. Metler, who was working in the tunnel, was instructed to assist in spitting the fuses. Metler spit five fuses, watched the other two men a minute or so, then said: "Come on, boys, it's time to go." One of them answered: "We have plenty of time." Metler climbed about one-half the distance up the shaft, stopped, and called to them again to come on; they did not answer. He then continued climbing and, just as he reached the collar of the shaft, one shot went off, with two more following in rapid succession.

September 8, Sidney Leasing Co., Shoshone County. Walker D. Johnson, age 47, married, superintendent. Johnson died on September 10 from the effects of powder gas inhaled while assisting in recovering the bodies of Langston and Siedel from the bottom of the shaft.

October 11, Bunker Hill and Sullivan Mining & Concentrating Co., Hall-Interstate mine, Valley County. Claude Cox, age 26, single, laborer. Deceased, with Charles Griffith, was removing the forms from a large concrete retaining wall which fell over without warning, crushing both of them to death.

October 11, Bunker Hill and Sullivan Mining & Concentrating Co., Hall-Interstate mine, Valley County. Charles Griffith, age 40, single, laborer. Deceased, with Claude Cox, was removing the forms from a large concrete retaining wall which fell over without warning, crushing both of them to death.

November 4, Gold Hunter Mines, Inc., Shoshone County. Andrew (Amund) Larson, age 45, single, miner. Deceased had started to drill a back hole in top of stope on 19th floor, when a large slab of rock fell from the face, striking him on the head and fracturing his skull, right leg and right ribs.

November 14, Jack Waite Mining Co., Ltd., Shoshone County. Louis Lucas, age 38, single, miner and timberman. Deceased, unassisted, was repairing the chute timbering in a raise about 65 feet above the main tunnel, and fell from there to the tunnel-level, striking on his head; when found he still retained the handsaw with which he was working. He never recovered consciousness, and died on November 16.

November 28, Sunshine Mining Co., Shoshone County. J. G. Tate, age 65, married, millman. Deceased, whose duties consisted of oiling and feeding the crusher, volunteered to assist two men who were removing an old trommel-line which had been idle for several years. Contrary to the advice of the men he was assisting, he climbed over a guard-railing and, while doing so, caught one leg of his trousers on a revolving shaft. His leg was fractured and as a result he died on December 2.

December 6, F. B. Felt, lessee of Parker mine, Blaine County. James M. Price, age 25, single. Deceased and Robert H. Haynes were engaged in reopening an old tunnel at a point where it had been filled by a cave-in, about 1000 feet in from the portal; the ground was loose and required re-timbering. They had been at the task only six days and had advanced about 20 feet when the ground overhead started to run, crushing the timbers and trapping the men beneath them, where they smothered to death.

December 6, F. B. Felt, lessee of Parker mine, Blaine County. Robert H. Haynes, age 65, single. Deceased and James M. Price were engaged in reopening an old tunnel at a point where it had been filled by a cave-in, about 1000 feet in from the portal; the ground was loose and required retimbering. They had been at the task but six days and had advanced about 20 feet. The ground overhead started to run, crushing the timbers and trapping the men beneath them, where they smothered to death.

December 10, Sullivan Mining Co., Star mine, Shoshone County. William O. Becker, age 37, married, timberman. Deceased climbed down the manway and pounded on the side of the chute to dislodge waste rock which had hung up in the main shaft raise between the 3700 and 4000-foot levels. The force of falling rock demolished the chute and filled the manway, where he was trapped and killed by the falling rock and timbers.

MEN EMPLOYED AND WAGES

The year closed with practically all the producing mines in the State in operation, and with the largest payroll that has been witnessed during the past 10 years. As a whole, 1927, from a labor standpoint, was one of the best years ever experienced. There was a surplus of labor throughout the year and the turnover was exceedingly small, thus assuring the companies a constant working force without the necessity of breaking in new men. However, competent and experienced miners and timbermen were continually in demand, and some of the large companies had a little difficulty in meeting their requirements.

It is practically impossible to obtain complete and accurate statistics of the number of men employed in the mines; a great many are employed by prospectors and small companies that do not report to the inspector of mines and that do not maintain continuous work throughout the year; and records furnished by the companies reporting vary as to the number of days. The average payroll reported was 5500, and 1000 has been added as an estimate to cover lessees, prospectors and small companies that did not report, thus giving a total of 6500 for the year, which is known to be a conservative estimate.

The table printed below gives the different wage scales that were in force in the State during 1927. Column No. 1 gives the average wage throughout the State for the year, and column No. 2 gives the wage scale in effect in the Coeur d'Alene district from March 1 to December 31.

Under an agreement adopted on November 16, 1925, the wages in the Coeur d'Alene district were to be adjusted each month in accordance with a bonus rate based on the selling price of lead in New York. This scale was based on a wage for miners of $3.75 per day when lead is selling under 5½c per pound; the bonus to be added was as follows:

When the price of lead is 5c	and under 6c	$0.25 per day
When the price of lead is 6c	and under 6½c	.50 per day
When the price of lead is 6½c	and under 7c	.75 per day
When the price of lead is 7c	and under 7½c	1.00 per day
When the price of lead is 7½c	and under 8c	1.25 per day
When the price of lead is 8c	and under 8½c	1.50 per day
When the price of lead is 8½c	and under 9c	1.75 per day
When the price of lead is 9c	and under 9½c	2.00 per day
When the price of lead is 9½c	and under 10c	2.25 per day
When the price of lead is 10c	and under 10½c	2.50 per day
When the price of lead is 10½c	and under 11c	2.75 per day

After March 1 the price of lead declined so rapidly that if the bonus scale had been adhered to the wages would have been cut to a point entirely out of proportion to wages in other parts of the State and too low under existing high living costs. So the signatories to the bonus scale waived their agreement and maintained the wages set forth in column No. 2:

	No. 1	No. 2
Miners	$5.00	$5.00
Shovelers	4.50	4.50
Timbermen	5.50	5.50
Timber helpers	4.75	4.50
Machinists	6.00	5.75
Machinists' helpers	5.00	5.00
Carmen	4.50	4.50
Motormen	5.00	5.00
Trainmen	4.50	4.50
Main hoistmen	5.75	5.75
Small hoistmen	5.25	5.25
Nippermen	4.50	4.75
Pump and compressormen	5.00	5.25
Surface laborers	4.50	4.50
Ore sorters	4.25	4.25
Cagers	5.25	5.25
Pipe and trackmen	5.25	5.25
Shift bosses	6.00	6.25
Blacksmiths	6.00	6.00
Blacksmith helpers	5.00	5.00
Electricians	5.50	5.25
Millmen	5.00	5.00
Mill repairmen	6.00	5.75
Mill swampers	4.50	4.50
Carpenters	6.00	6.00

The cost of board and room at company boarding houses, hotels, and at private homes averages from $1.25 to $1.50 per day. Many companies have built and are maintaining houses which are rented to their married employees, and some of the largest companies assist their employees in the construction of homes.

MINERAL RESOURCES

Idaho contains an area of 83,888 square miles; its maximum width at the southern end is approximately 312 miles, and its length from the southwest corner to the northwest corner is about 486 miles. The State is divided into 44 counties, 36 of which can be classed as having minerals of commercial importance. In 22 of these counties there are producing mines.

In the past practically all mining has been confined to the five principal metals: Lead, silver, gold, zinc, and copper, which are widely distributed throughout the State (see map, page 6). In addition to these a great variety of uncommon metals and minerals, many of which have been successfully exploited during the past few years, occur in sufficient extent to be of commercial importance.

This great diversity of mineral wealth, consisting of practically all the metals used in modern arts and many of the uncommon minerals for which a demand is continually being developed, establishes Idaho as one of the principal mining States in the Union. It also makes mining the second most important industry in the State.

The importance of Idaho's mineral wealth is well shown by statistical facts based on the production and exploitation of the five principal metals, lead, silver, gold, zinc, and copper:

Total metal production since 1860, over $1,100,000,000.
Average annual production for past 25 years, over $25,500,000.
Average annual mine pay-roll, over $9,000,000.
Average annual mine dividends from lead-silver mines, over $5,000,000.
Average annual expenditure on new mine development and prospecting, over $4,000,000.

METALS

Lead

Lead is the most important metal found in Idaho, and until 1926 this State ranked second in the United States in the production of lead, Missouri ranking first, and Utah third. Since then Utah has taken second place, although the production of the two States is almost on a parity. Idaho produces over one-fourth of the total amount of lead mined in the United States. Lead is widely distributed throughout the State, and occurs as galena (lead sulphide) and as the oxide and carbonate; silver is always associated with it, and occasionally zinc, gold, and copper.

The largest lead mine in the United States is in Idaho—the Bunker Hill & Sullivan M. & C. Co. at Kellogg. This is one of the few companies in the world that mine, mill, smelt, refine, manufacture, and market lead and lead products. Other important lead-producing mines in Idaho and their respective ranks in the United States are: Federal Mining and Smelting Co., third; Hecla Mining Co., fifth.

The principal lead mines in the State are those in Shoshone County, which produce 85 per cent of the State total. Blaine, Boundary, Bonner, Custer, Lemhi, Boise, Butte, Valley, and Camas counties are the other important lead-producing counties.

Silver

Idaho ranks third in the United States in the production of silver, the first three States in order of rank being Utah, Montana, Idaho. Idaho produces one-eighth of all the silver mined in the United States.

Silver is found associated with all of the lead, copper, zinc, and antimony ores of the State, and occasionally in associations in which it is the principal metal. It is one of the most widely distributed metals, and its occurrence is such that the mining of silver can hardly be separated from that of the other metals. Accordingly, the production of silver fluctuates with and parallels that of lead.

Shoshone County produces more silver than any other county in the State; the other important silver-producing counties are: Lemhi, Custer, Bonner, Boundary, Blaine, Butte, Owyhee, Boise, Camas, Valley, Washington, Idaho, Elmore, Adams, and Cassia.

Zinc

Zinc is found associated with lead in many of the lead mines of Idaho, although there are numerous deposits in Shoshone and Blaine counties in which it is the principal metal. In Shoshone County it occurs as sphalerite (zinc sulphide), and in Blaine County as sphalerite and smithsonite (zinc carbonate).

Selective flotation revolutionized the art of ore-dressing, and it is now possible to treat mixed lead-zinc ores which could not be separated by gravity concentration methods. As a consequence, the zinc content which was formerly lost is recovered and many mines which at one time could not be profitably operated are now being reopened in Blaine, Camas, and Shoshone counties. As a result of these modern ore-dressing methods, Idaho is one of the largest zinc-producing States in the Union.

The principal zinc-producing counties, in the order of prominence, are Shoshone, Blaine, Camas, Custer, Lemhi, Bonner, Boise, Boundary, and Butte.

Gold

Gold is found in practically all of the counties in the State, and is one of the most widely distributed metals. Prior to the World War Idaho was an important producer of this metal, but during the war period many of the mines of which the principal product was gold were closed down and have not been reopened, so at the present time the State ranks only tenth in the United States in gold production.

Gold occurs associated with almost all the lead, zinc, copper, and silver ores, and very commonly in a free-milling condition. A large amount of gold is obtained from placer deposits; at one time Idaho was among the principal placer-mining States in the Union. The greater part of the placer ground which could be hydraulicked has been exhausted, but many acres suitable for dredging still remain, and the gold lode-deposits offer greater opportunities than those of almost any other State.

The most important counties in which gold occurs are Boise, Idaho, Lemhi, Owyhee, Elmore, Shoshone, Custer, Blaine, Camas, Clearwater, Gem, and Valley.

Copper

Idaho is an important producer of copper and holds a high position among the ranking States of the Union. The many copper mines which are now under development and the numerous discovered but undeveloped veins indicate that the production of this metal will be greatly increased; the State will then be elevated to a rank higher than that of tenth, which it now holds.

Gold and silver are found associated with practically all the copper ores; and in some counties, notably in Custer and Bonner, the silver content is more valuable than the copper.

Custer, Lemhi, and Shoshone are the most important copper-producing counties; Adams and Washington counties may eventually become large producers. Bonner, Idaho, Blaine, Butte, Clearwater, Latah, and Lewis counties also contain copper mines of importance.

Antimony

Deposits of antimony, principally the sulphide (stibnite), are found in Shoshone, Valley, Boise, Blaine, Idaho, Owyhee, and Custer counties. Those in the Coeur d'Alene district of Shoshone County have been extensively developed; a number of mills for the concentration of the ore have been constructed; and in the past a large tonnage has been produced and marketed. The deposits in Blaine, Valley, and Owyhee counties contain a high-

grade ore, most of which can be shipped without preliminary treatment. During the war, when antimony commanded a high price, a large tonnage was produced and shipped from the mines in Valley County.

Antimony occurs as an accessory mineral in many lead-zinc ore bodies, also in stibnite-bearing veins in which it is the dominating metallic mineral. All of the antimony ores carry more or less silver, and many of them, particularly those of Blaine County, are more valuable for this mineral than for the antimony.

In all the above-mentioned counties there are many deposits containing a large available tonnage of commercial ore, which can be readily marketed when freight and market conditions will permit it to be produced at a profit.

Arsenic

Deposits of arsenic, principally the sulphide (arsenopyrite), occur in Blaine, Gem, and Boise counties. These deposits, although not fully developed, show a large available tonnage containing sufficient arsenic to be valuable for this metal, which can be readily marketed when the demand for it will permit profitable production. Arsenic occurs also as arsenopyrite in Ada, Elmore, and Kootenai counties, but the deposits in these counties have not been sufficiently developed to ascertain the possible tonnage.

Bismuth

Bismuth, occurring as a sulphide, has been found in Blaine County unassociated with other metals, as well as in association with many of the lead ores. It also occurs in the gold ores of the Gold Hill, Belshazzar, and Buckskin mines, Boise County, in association with lead, probably galenobismuthite or similar lead-bismuth minerals.

Cobalt

Cobalt is found in Lemhi County. During the World War, when this metal commanded a high price, the deposits were actively developed; a small mill was constructed, and concentrate with a high cobalt content was produced. These deposits are described by Frank L. Hess under "Cobalt" in U. S. Geological Survey: Mineral Resources of the United States, part I, 1917.

This metal is reported to have been found also in Kootenai and Latah counties.

Manganese

Manganese occurs in Bannock, Lemhi, Owyhee, Shoshone, Butte, and Washington counties. Some of the deposits are high in manganese content and others in manganese-iron. A substantial tonnage has been produced and marketed from the mines in Bannock County, and the deposits in Lemhi County constitute a large potential resource.

Describing the Bannock County deposits in "Manganese and Manganiferous Ores in 1926", U. S. Bureau of Mines: Mineral Resources of the United States, J. W. Furness said: "D. F. Hewett, of the United States Geological Survey, reports that the Idaho Manganese Co. has been exploiting since April, 1924, a manganese deposit on the McGregor ranch, 1 mile east of Cleveland, Bannock County, Idaho. The shipments in 1926 were 830 tons and during 1927 will probably be larger. The ore consists of nodules of the several oxides embedded in brown wad and forms a distinct bed in Pleistocene (Ice Age) sediments. In the explored area the bed will probably yield 3,000 tons per acre; the extent of the bed is assuredly several acres and may be more. Most of the shipments range from 42 to 48 per cent manganese. The ore is shipped by auto truck to Grace, 14 miles north, thence by rail to the Columbia Steel Co., Ironton, Utah."

Molybdenum

Molybdenum, occurring as the sulphide disseminated in intrusive rocks and as a molybdate of lead in fissure veins in limestone, is found in Elmore, Boundary, Custer, Idaho, and Lemhi counties.

Nickel

Nickel is found in Lemhi County. During the late war considerable development work was done on the veins in which it occurs. These deposits are described by Frank L. Hess under "Cobalt" in U. S. Geological Survey: Mineral Resources of the United States, Part I, 1917.

Quicksilver

Cinnabar, the sulphide of mercury, has been found in the placer deposits of Custer and Valley counties and in lode-deposits in Valley, Blaine, and Cassia counties. The quicksilver lode-deposits of Valley County are being extensively developed, and a little mercury has been produced from an experimental plant. The other deposits have never been opened.

Tin

Tin has been found in the placer mines in the Gravel Range mining district of Lemhi County. Its occurrence is described by Clyde P. Ross in Idaho Bureau of Mines and Geology Pamphlet No. 25, "Ore Deposits in Tertiary Lava in the Salmon River Mountains, Idaho". Mr. Ross includes in this a list of all published references relating to his subject.

Tungsten

Tungsten, in the form of scheelite and wolframite, occurs in commercial value in Shoshone, Idaho, Camas, Lemhi, Boundary, Bonner, Blaine, Valley, and Butte counties. The deposits in Shoshone County have been extensively exploited, and during the war period of high prices a large tonnage was produced and marketed; at the same time a small amount was obtained from Boundary and Camas counties. Sufficient work has been done on all these deposits to indicate that tungsten is one of the State's substantial mineral resources.

NON-METALLIC MINERALS

Asbestos

Commercial asbestos occurs in two forms: The chrysotile variety, which is adapted to spinning; and the amphibole variety, which is not adapted to spinning but is used extensively in shingles, insulation materials, paper stock, cements, and paints.

Amphibole asbestos occurs extensively in Idaho County, near Kamiah. There is a large demonstrated tonnage, but the demand is small, on account of markets and freight rates. Deposits containing chrysotile have been reported in Fremont, Teton, and Idaho counties.

Barytes

Barytes (barium sulphate) is used in the rubber, paper, linoleum, ink, and paint manufacturing industries. Its principal use is in the manufacture of lithopone, a white pigment consisting of about 70 per cent barium sulphate and 30 per cent zinc sulphide.

Some of the largest deposits of high-grade barytes found west of the Mississippi River occur in the Deer Creek and Muldoon sections of Blaine County. The deposits on Deer Creek vary in width from 50 to 100 feet, and one outcrop is over 1000 feet long; this was described by Arthur Lakes in the Mining Reporter for August 16, 1906, under the title, "A New and Large Deposit of Barite in Idaho", as follows:

"In visiting some mining prospects in the Wood River region of Idaho I came across an unusually large massive deposit of the mineral called barite.

"It forms a steep cliff on the crest of a hill and descends as a vein down the gulch. The thickness is apparently from 50 to over 100 feet. Its course passes very near some silver-lead prospects and not far from it on one side is a huge outcrop of iron oxide.

Deer Creek Barytes Deposit, Viewed from a Distance of 2000 Feet

Close-up View of Deer Creek Barytes Deposit

"The material is of a dull white color and resembles at a distance a vein of calcspar or a vein of white feldspar and quartz. It has not been opened up but there must be thousands of tons in sight."

Bentonite

Bentonite, a plastic clay, is valuable for its high absorbent qualities; it has the capacity for absorbing three times its weight or about seven times its volume of water. It is used in beauty clays; for refining oil; as a filler in paper and soaps; as an adulterant in drugs and candies, and as a packing for horses' hoofs.

Bentonite occurs in commercial extent in Clark and Custer counties, and has been reported found in Cassia County. The deposits in Clark and Custer counties are described by V. R. D. Kirkham in Pamphlet No. 19 Idaho Bureau of Mines and Geology, "A Geologic Reconnaissance of Clark and Jefferson and Parts of Butte, Custer, Fremont, Lemhi, and Madison counties, Idaho": "A commercial grade of bentonite, a peculiar type of clay with extraordinary absorptive qualities, was found at two localities in the area. One is near the railway in the vicinity of Mackay, the other is more remote and lies west of Dubois."

Building Stone

Sandstone exceptionally adapted to building purposes is found in Ada, Bear Lake, and Cassia counties. One of the principal enterprises in Ada County is that of the Boise Stone Company in quarrying and converting sandstone to building purposes. This enterprise is fully described, with illustrations, in the Twenty-sixth Annual Report of the Mining Industry of Idaho for the Year 1924. The most notable building in Idaho, the State Capitol, is constructed of this stone.

The sandstones in Bear Lake County are described in U. S. Geological Survey Professional Paper No. 152, "Geography, Geology, and Mineral Resources of Part of Southeastern Idaho", by George Rogers Mansfield; pages 336-338.

Coal

Bituminous coal of commercial importance occurs in Teton, Bonneville, Fremont, and Clark counties. No attempt has been made to exploit any of the deposits commercially except those of the Teton Coal Company in Horseshoe Basin, Teton County. In discussing the Horseshoe Basin coal in Pamphlet No. 10, Idaho Bureau of Mines and Geology, "The Horseshoe Basin Area of the Teton Coal Field in Southeastern Idaho", George Watkins Evans said:

"The chemical analysis of this coal indicates that the coal in this field is of as good quality as any mined in Utah or Wyoming. The principal question is whether or not this field can produce a sufficient percentage of lump coal to compete with the larger sizes from Utah and Wyoming.

"From the limited information at hand, it is impossible to make a reliable estimate of the minable tonnage in this field. In the first place, we do not know exactly the total area of the coal bearing strata, nor do we know the number of workable coal beds contained within this field. Any tonnage estimate made at this time must be based upon arbitrary figures and the quantity might be either much more or much less than the figures given.

"If we assume that the Horseshoe bed and the Brown Bear bed are two separate and distinct beds and that the Horseshoe bed will contain 9 feet of coal and that this bed can be mined for a distance of one-half mile on the dip, and that the bed will continue of fairly uniform character for a distance of 2 miles along the strike, there would be within the Horseshoe bed approximately 5,000,000 tons of coal, provided it will average 6 feet of minable coal and if we allow 1300 tons per foot acre. The Brown Bear bed has an average thickness of about 4 feet and on the same basis would contain a little over 3,000,000 tons of coal. The Boise bed, allowing an average thickness of 3½ feet of minable coal, contains nearly 3,000,000 tons—in all approximately 11,000,000 tons of coal.

"It is not improbable that with future investigations it will be found that the total tonnage of coal in this field is very much greater than the amount of tons suggested. On the other hand, it might be found that the coal contained within these beds is very friable and will not produce any considerable quantity of the larger sizes, and furthermore, it is probable that the market tributary to this field will be so exacting that only the larger sizes can be successfully marketed."

The Teton Coal Company has recently completed a 3600-foot crosscut with a 600-foot connecting raise to the surface, and a tipple for grading the coal. The tunnel intersected three coal beds, two of which were not included in the above estimate; as yet the tunnel has not been completed to the Horseshoe and Boise beds, so it appears that the total tonnage, when this field is fully developed, may be in excess of the estimate.

Lignite is found in Cassia, Boise, Owyhee, Washington, Idaho, Lemhi, and Clearwater counties.

Diatomaceous Earth

Diatomaceous earth is more commonly known as infusorial earth, and is sometimes referred to by its German name of kieselguhr. It is composed of the siliceous remains of minute aquatic plants known as diatoms, which are of such proportions that they must be identified chiefly by the aid of the microscope.

The principal uses of diatomaceous earth are: Sawed brick for refractory and insulation purposes; filter material at sugar factories; light-weight filler in concrete; in polishing powders; absorbent in dynamite, and in thermal insulator compounds.

Extensive beds of this mineral, in which it can be measured by the acre, are found in Owyhee, Elmore, Camas, Payette, Washington, and Idaho counties. A small tonnage has been obtained from Elmore County for use in Idaho sugar factories.

Feldspar

Common feldspars are crystalline compounds of silica, alumina, and one or more of the bases: potash, soda, and lime. There are two principal classes of feldspar—the one including the potash and potash-soda varieties; the other including the soda, soda-lime, and lime varieties. Pure potash feldspars are orthoclase and microcline. The principal use of feldspar is in the manufacture of pottery, chinaware, porcelain, enamel-ware, and enamel brick and tile.

Deposits of high-grade feldspar, occurring as orthoclase, are found in Latah and Adams counties.

Garnet

Garnet is a common accessory mineral in a large variety of rocks, occurring abundantly in contact metamorphic zones and in metamorphosed crystalline limestones. Deposits of garnet possessing the necessary qualifications for ornamental or industrial use and so situated with regard to transportation and markets that they can be exploited commercially are relatively small and occur in only a few areas throughout the United States.

The principal uses of garnet are: As settings in jewelry; jewel bearings in watches, and as an abrasive. Abrasive garnet is utilized either in the form of a manufactured paper similar to sand-paper, or as loose grain or powder for grinding and polishing.

Extensive deposits of garnet adapted to abrasive purposes occur in Adams, Lemhi, Custer, and Cassia counties.

Graphite

Graphite is a soft, black, greasy form of carbon, sometimes referred to in trade as "plumbago" and "black lead". It occurs in nature in two forms, crystalline and amorphous, each having its own peculiar uses.

The physical properties of graphite—infusibility, chemical inertness, high conductivity, extreme softness, and low specific gravity—fit it for a large number of uses: The manufacture of crucibles and other refractory products; lubricants; "lead" pencils; paints; stove polish; foundary facings, and various types of electrical appliances.

Graphite of commercial importance is found in Blaine County, but, owing to the fact that at the ordinary price of graphite it is possible to mine only the most favorably situated deposits, the known deposits in Idaho have never received much attention.

Gypsum

Gypsum is a natural hydrated sulphate of lime. It is a soft, white, chalk-like material, found widely distributed in single crystals and in thick beds. The natural product is generally very pure.

The principal uses of gypsum are as structural material—wall plaster, gypsum boards, blocks and tile—and as an ingredient in Portland cement and plaster of Paris.

Extensive deposits of high-grade gypsum are found in Lemhi, Bear Lake, and Washington counties. These deposits have never been developed, as the low price of the crude product limits production to those States located near the centers of population.

Limestone

Limestone is mined in Butte, Teton, and Bonner counties; Bannock, Blaine, and Bear Lake counties also contain deposits of importance. The limestone mined in Bonner County is shipped to Spokane, Washington, where it is manufactured into Portland cement. The limestone mined in Butte and Teton counties is shipped to the sugar factories of Idaho and Utah, where it is used in the refining of sugar.

There are unlimited deposits which are suitable to the cement industries.

Marble

Marble is dense crystalline calcium carbonate, formed from limestone by the pressure of overlying sediments and the action of underground water. The value depends on the color, which may be white, gray, red, black, or veined, and the grain and structure. Its principal use is for building and monumental purposes.

Marble suitable to commercial purposes occurs in Nez Perce, Butte, and Cassia counties. The deposits in Nez Perce and Butte counties have been slightly exploited.

Mica

The principal physical properties which give value to mica are: Its cleavage, transparency, resistance to decomposition, and non-conduction of electricity and heat. The important uses of mica are: Short mica, in the electrical industries and as glazing for stoves, screens, goggles, and lantern projection; ground mica, in fancy paints, wallpaper, tiles, concrete, rubber goods, roofing materials, lubricants, and insulating compounds.

"Mica deposits of probable value have been found in about half the States of the United States. The principal producing States have been North Carolina, New Hampshire, South Dakota, Idaho, New Mexico, Colorado, Virginia, South Carolina, Alabama, and Georgia."—Schaller, W. T., Mica: U. S. Geological Survey Mineral Resources, pt. 2, p. 280; 1915. The production which gave Idaho this prominent rank was from the mica mines in Latah County.

Deposits of commercial importance occur in Adams and Idaho counties also, although they have never been prospected or developed in proportion to the possibilities which they offer.

Mineral Waters

Mineral springs of various types occur at a great many places throughout the State, the principal types being calcareous, chalybeate, sulphurated, and saline. The temperatures of the different types vary from "cold" to "hot", with some of the latter exceeding the boiling point. Hot springs are the more numerous, and at many of them sanitariums and bathing resorts have been erected.

The chalybeate springs of Caribou County are particularly efficacious from a therapeutic standpoint, although they have never been exploited.

Monazite

The mineral monazite consists chiefly of the phosphate of cerium and variable amounts of thoria, the value depending primarily upon the thoria content. It is a resinous golden-yellow mineral occurring as a placer sand in practically all of the gold placer mines in the State; the quantity varies, and in some of the deposits it is not sufficient to be of commercial importance. The placer deposits of Ada, Idaho, Lemhi, and Owyhee counties contain an appreciable amount of this mineral, and those of Boise and Clearwater counties contain sufficient to be of commercial importance.

The principal use of thorium is in the manufacture of incandescent mantles for gas lighting. Practically all of the monazite used in the United States is imported from Brazil and India.

Nitrates

The occurrence of nitrate in Camas, Elmore, and Owyhee counties has been reported.

Oil and Gas

The same formations which are oil-producing in Wyoming are present in structures highly favorable to the accumulation of oil and gas in Caribou, Bonneville, Teton, Bear Lake, and Bingham counties. A small amount of drilling has been done in Caribou and Teton counties, but the wells were never completed to a sufficient depth to determine the possibilities for the occurrence of oil.

Gas has been developed in Payette and Washington counties.

Phosphate Rock

The greatest potential mineral resource in Idaho is the immense phosphate rock deposits in Bear Lake, Caribou, Bannock, Bingham, and Bonneville counties. Conservative estimates by members of the U. S. Geological Survey accredit Idaho with over 85 per cent of the total phosphate resources of the United States in 268,299 acres out of a total of 396,612 acres which have been withdrawn from public entry. These deposits are fully described with maps, illustrations and analyses by G. R. Mansfield in U. S. Geological Survey Professional Paper No. 152, "Geography, Geology, and Mineral Resources of Part of Southeastern Idaho", from which the following is quoted:

"In Utah, Idaho, Wyoming, and Montana the great bulk of the phosphate rock is on public land, though some has passed into private ownership. The public lands are withdrawn from entry pending their examination and classification. No estimates of the acreage of phosphate land in private ownership are available, but the acreage of the outstanding withdrawals of public land in the States named is shown in Table 38.

TABLE 38—**Outstanding phosphate withdrawals, July 31, 1927**

	Acres
Utah	301,945
Idaho	**396,612**
Wyoming	996,539
Montana	279,944
Total	1,966,390

"In addition to the land embraced in the outstanding phosphate withdrawals, 268,299 acres in Idaho, 25,293 acres in Wyoming, 3,833 acres in Montana, and 160 acres in Utah—297,585 acres in all—have been examined in detail and formally classified as phosphate land. * * *

"Under the act of July 17, 1914, agricultural entries may be made upon withdrawn phosphate lands, but the mineral rights are reserved to the United States."

TABLE 74a—Estimate of phosphate rock in the United States available December 31, 1925, in long tons

FIELD	Estimated quantity available	FIELD	Estimated quantity available
Eastern field:		Western field:	
Arkansas	20,000,000	**Idaho**	**4,997,855,000**
Florida	291,000,000	Montana	391,323,000
Kentucky	878,000	Utah	326,745,000
South Carolina	8,788,000	Wyoming	115,754,000
Tennessee	83,500,000		
			5,831,677,000
	404,166,000	Less approximate quantity mined since 1906	350,000
			5,831,327,000
			404,166,000
			6,235,493,000

Pyrite

Pyrite of commercial importance is found in Washington County. The development work which has been done on these deposits indicates an immense available tonnage.

Rutile

The occurrence of rutile in Clearwater County has been reported. Rutile, the natural titanium oxide, is used in paints; arc-light electrodes; dyes, and in the manufacture of leather.

Salt

The pioneers evaporated the brine from the salt springs of Caribou County, and this salt was transported to all of the northwestern States before the building of the railroad. The salt obtained from these springs is above the average of the commercial salts of the United States in purity and compares favorably with some of the best salt produced. The salt springs and deposits are described by W. C. Phalen, who estimates 5,000,000 tons in sight, in U. S. Geological Survey Bulletin 669, "Salt Resources of the United States":

"Although the salt bodies or old alkali flats are thus meager in extent, especially in comparison with the other prominent salt-producing areas of the United States, the conservative estimate of 5,000,000 tons for the Crow Creek rock-salt body and the possibility of a larger salt body near the Tygee and Stump Creek forks indicate that the amount of salt apparently in sight in some of the present areas would be sufficient (if proper railroad connections existed) to yield returns on large workings for a long time. It also appears quite probable that all the areas, including the smaller brine springs, contain sufficient salt to return the sums that may be advisedly invested in their development."

Sulphur

Sulphur occurring in extensive deposits and as sulphur springs is found in Caribou County. During the World War a little attempt was made toward the commercial development of these deposits.

Talc

Talc suitable to the electrical and powdered-talc industries occurs in Idaho County in sufficient extent to be of commercial importance.

ADA COUNTY

Ada is one of the southwestern counties, adjoining and lying north and east of Owyhee and Canyon counties, and south of Boise County. It contains 1154 square miles and was accredited with a population of 35,213 in the 1920 census. Boise, the largest city in the State, is the State capital and county seat. The county is noted for its excellent irrigated farms, and its livestock, farming, and fruit-raising industries.

The State highway, Oregon Trail, extending from the southeast corner of the county to Boise, thence west to Nampa, and the excellent county highways and roads, give this county some of the best roads in the State as well as easy access to the mineralized areas.

Ada is not recognized as a mining county, yet its small mountainous area was once the scene of many active mining operations; and Boise was established as the principal distributing point for miners' supplies when the rich placer diggings of Boise County and adjacent areas were worked in the early days.

The early day mining was based on free gold operations and, as the sulphide zone was encountered at a shallow depth, the mines were soon closed and have remained dormant for many years. The principal ores are lead and zinc, carrying high values in silver and gold, occurring in fissure veins and as replacement deposits in granite. The ore occurrences are well defined and offer good opportunities to prospectors and small operators in search for these metals.

The chief mineral resources are building stone, gold, lead, silver, zinc, and arsenic. Building stone and its accompanying enterprise were fully described in the 26th annual report, for the year 1924.

During 1927 the mines and prospects in this county witnessed a little increase in attention and development over that of the previous year, in addition to which there was a decided activity in promoting oil development enterprises and legendary "White Metal".

The Boise Stone Company was active throughout the year and reports that a large quantity of stone was quarried and cut.

AMERICAN MINING & MILLING CO.

Office: Boise City Nat'l. Bank Bldg., Boise. **Officers:** E. W. Johnson, Pres., Boise; W. H. Hulburt, Sec., Portland, Ore.; Hortense Adams, Mgr., Boise. **Inc.:** Nov. 12, 1919. **Capital:** 500,000 shares, par value $1; 80,000 shares issued. **Property:** Ironsides & Viola group; 2 patented, 10 unpatented claims, Black Hornet dist.; Boise. **Development:** Principally by 4 tunnels and 4 small shafts; total development, approximately 5800 feet. **Plant:** 50-ton concentrator partly dismantled; 15 h. p. air-driven hoist and small Ingersoll compressor. **Ore:** Gold-silver-iron. **Remarks:** Other than annual labor, nothing has been done on this property for nine years.

BERGDAHL OIL CO.

Office: 260-261 Sonna Bldg., Boise. **Officers:** A. F. Bergdahl, Pres.-Mgr.; H. A. Alden, Sec., both of Boise. **Inc.:** July 16, 1927. **Capital:** 1,000,000 shares; par value $1; 250,000 shares issued. **Property:** Leases on 2760 acres of patented land in Ada and Gem counties. **Development:** 2½-in. well 260 ft. deep. **Plant:** Small water well drilling equipment operated under contract. **Mineral sought:** Oil and gas. **Men employed:** None. **Remarks:** Active publicity campaign for purpose of selling stock maintained throughout the year.

GOLD KING MINES CO.

Office: 402 Empire Bldg., Boise. **Officers:** S. T. Schreiber, Mgr., Boise. **Inc.:** A copartnership. **Property:** Gold King group; 4 unpatented claims, Black Hornet dist.; Boise. **Development:** By one tunnel 50 ft. long. **Remarks:** Small amount of work during the year.

IDAHO EXPLORATION & DEVELOPMENT CO.

Office: 235 Sonna Bldg., Boise. **Officers:** J. M. McBride, Pres.; Amzi Dodd, Sec.; both of Boise. **Inc.:** June 25, 1921. **Capital:** 100,000 shares; par value 50c; 2400 shares issued. **Property:** Owns 120 acres and holds lease on 1666 acres. **Remarks:** Company was organized for the purpose of prospecting for oil and gas.

PIONEER IDAHO OIL CO.

Office: 322 Eastman Bldg., Boise. **Officers:** J. E. Nottingham, Pres.-Mgr.; P. M. Davis, Sec., both of Boise. **Inc.:** Apr. 4, 1927. **Capital:** 600,000 shares; par value $1; 200,011 shares issued. **Property:** Leases and government prospecting permits on 10,000 acres in Ada and Gem counties; Eagle. **Mineral sought:** Oil and gas.

RED ROSE GOLD MINES CO.

Office: 605 Eastman Bldg., Boise. **Officers:** J. J. Oberbillig, Pres.-Mgr., Boise. **Inc.:** Jan. 27, 1921. **Capital:** 500,000 shares; par value 5c; all shares issued. **Property:** Red Rose group; 12 patented claims, Black Hornet dist.; Boise. **Development:** By 3 tunnels, the principal one of which is 685 ft. in length; total development, 1400 ft. **Ore:** Gold-silver. **Remarks:** Idle throughout the year.

RELIANCE GOLD MINES CO.

Office: 605 Eastman Bldg., Boise. **Officers:** J. J. Oberbillig, Pres.-Mgr., Boise; Louis A. Dumond, Sec., Chicago, Ill. **Inc.:** Feb. 4, 1924. **Capital:** 1,000,000 shares; par value 10c; 350,000 shares issued. **Property:** Star group; 8 unpatented claims, Black Hornet dist.; Boise. **Development:** Principally by one tunnel which is 1350 ft. long. **Ore:** Gold-silver-arsenic. **Remarks:** Annual labor only.

ADAMS COUNTY

Adams is one of the southwestern counties, adjoining and lying south of Idaho County, north of Washington County, and west of Valley County. The Snake River, which flows north, forms the entire western boundary. The county contains 1366 square miles and was accredited with a population of 2,966 in the 1920 census, or 2.2 inhabitants to the square mile. The larger part of the population is located in Weiser River and Little Salmon River valleys. The headwaters of the Weiser River, which flows south, and those of the Little Salmon River, which flows north, are located in this county. It is primarily an agricultural county and is noted for its high-quality apples and livestock industry.

The North and South Panoramic Highway extends from the southern to the northern boundaries and is situated in about the geographical center. Branch roads leading to all of the outlying settlements are maintained by the county and U. S. Forest Service. These are kept in good repair and are open to travel during the larger part of the year. In 1925 the Legislatures of Oregon and Idaho each appropriated $25,000 for the construction of a joint State wagon bridge across the Snake River at Ballard's Landing, about three miles north of Homestead, Oregon. It has proved to be an important connecting link between the Oregon highway at Baker and the Idaho highway at Council, which is the county seat and largest settlement of Adams County.

The county is served by two railroads: the Pacific and Idaho Northern, which extends from Weiser to New Meadows, and the Oregon Short Line branch from Huntington to Homestead, Oregon.

Over 90 per cent of the county is mountainous. The mountains are rough and rugged and the bold relief that many of them show on the skyline presents scenic views that are unsurpassed in grandeur, the principal one of which is the Seven Devils, seven serrated peaks which reach high into the skyline, and from which the Seven Devils mining district is named.

During the eighties and early nineties this district was an active mining center. Many mines were in operation, a railroad was projected into it and partly constructed, a smelter was in operation, and three towns of fair sized populations were established. The boom died down in the panic of 1893 and since then no large operations or shipments of any consequence have taken place. The latent mineral resources are practically undeveloped and unprospected. The bold relief permits cheap development work by tunnels and drifts and, as the mineral resources are diverse and varied, the county offers many excellent opportunities to prospectors and development companies. The ores of the Seven Devils district are principally copper carrying silver and gold, with an occasional deposit of lead-zinc ore. The ores of the Indian Creek section are those of silver-copper and lead-zinc-silver. In addition to the five principal metals—copper, silver, gold, lead, zinc—deposits of mica, feldspar, and garnet, of commercial importance, occur in this county. The mica deposits of Council Mountain have received a little attention, although they have never been prospected or developed in proportion to the possibilities

which they offer. When the mineral resources of Adams County are properly exploited and developed this county may be recognized as one of the principal mining counties in the State.

During 1927 this county witnessed more mine development and more new mine plant installations than at any time since the "boom days" of the Seven Devils. At the Red Ledge mine the Idaho Copper Co. constructed a complete and modern mine camp and mine buildings; installed a 600-cubic foot Ingersoll-Rand compressor, driven by a 120-horsepower Diesel engine, and complete mining equipment including underground mechanical loaders; and started work on their tunnel from Eagle Bar which has a projected length of approximately 6500 feet, of which about 700 feet was completed. In addition to the foregoing, the company performed about 4000 feet of diamond drilling on Deep Creek.

At the South Peacock mine, the Idaho Copper Corporation (over 98 per cent of whose stock is owned by the Idaho Copper Co.) purchased second-hand boilers, a steam-driven compressor and hoist, and moved them to the property, where they were partly installed in a new building. A small amount of development work was performed, and a few tons of low-grade copper ore were marketed.

On November 4 all mining operations were suspended at the Red Ledge and South Peacock mines, and on November 25 the Idaho Copper Co. was placed in receivership. The complaint for receivership was filed by the Boise Association of Credit Men, and alleged disagreements between the Cooley Butler faction (originally Idaho Copper Co., Ltd.) and the George Graham Rice faction (originally Idaho Copper Corporation).

James Glass and associates, of Butte, Montana, acquired the Peacock mine under a lease and option. They reconstructed the camp buildings and commenced development work. Kleinschmidt Bros., of Helena, Montana, repaired the mine buildings and commenced work at the Blue Jacket group. The Lime Peak Copper Co., on Snake River, maintained work throughout the year. Prospectors in the Hornet Creek and Indian Creek sections were active. Also, the mica deposits in the Council Mountain district received more attention than in previous years.

AMERICAN MINING CO., LTD.

Office: 630 Monroe Ave., Helena, Mont. **Officers:** Amelia H. Kleinschmidt, Pres., Helena, Mont. **Inc.:** Sept. 11, 1911. **Capital:** 50,000 shares; par value $1; none issued. **Property:** Peacock and White Monument groups; 10 patented claims, Seven Devils dist.; Cuprum. **Ore:** Copper, silver. **Remarks:** Peacock group under lease and option to James Glass and associates, of Butte, Montana, who reconstructed the mine camp, commenced the rehabilitation of the property, and conducted development work during the four closing months of the year.

IDAHO COPPER CO.

Office: 112 N. 6th St., Boise. **Officers:** O. H. Griggs, Pres., 643 Title Ins. Bldg., Los Angeles, Calif.; Carey H. Nixon, Sec.; Frank A. Kennedy, Mgr., both of Boise. **Inc.:** Jan. 10, 1920, as Idaho Copper Co., Ltd. Name changed May 24, 1926. **Capital:** On Feb. 9, 1925, the capital was increased from 50,000 shares, par value $10, to 10,000,000 shares, par value $1; 9,526,332 shares issued. **Property:** Red Ledge group; 31 patented, 22 unpatented claims, Seven Devils dist.; R. R. and P. O., Homestead, Ore., 18 miles. **Development:** 3 tunnels on Deep Creek: No. 1, 950 ft. long; No. 2, 2400 ft. long; No. 3, 100 ft. long; tunnel No. 4 at Eagle Bar 700 ft. long. In addition to the tunnels, approximately 10,000 ft. of diamond drilling has been done on the property. **Plant:** 600-cu. ft. I. R. compressor, driven by 120 h. p. Diesel engine; complete mining equipment and camp at No. 4 tunnel. **Ore:** Copper. **Men employed:** Average, 80. **Remarks:** The 15-mile wagon road connecting Eagle Bar and Homestead, Ore., which was started in 1926, was completed early in 1927. Complete and modern mine camp and mine buildings were con-

structed; mine equipment, including mechanical loaders, was installed; work was started on No. 4 tunnel, which has a projected length of approximately 6500 ft., and advanced about 700 ft. In addition to the foregoing, approximately 4000 ft. of diamond drilling was performed on Deep Creek.

On Nov. 4 all mining operations were suspended, and on Nov. 25 the company was placed in receivership. The complaint for receivership was filed by the Boise Association of Credit Men, and alleged disagreements between the Cooley Butler faction (originally Idaho Copper Co., Ltd.) and the George Graham Rice faction (originally Idaho Copper Corporation).

IDAHO COPPER CORPORATION

Office: 112 N. 6th St., Boise. **Officers:** O. H. Griggs, Pres., 643 Title Ins. Bldg., Los Angeles, Calif.; Carey H. Nixon, Sec.; Frank A. Kennedy, Mgr., both of Boise. **Inc.:** Incorporated in Delaware, Oct., 1924; filed in Idaho, April 4, 1925. **Capital:** 2,500,000 shares; par value $1; all shares issued. **Property:** South Peacock group; 3 patented, 5 unpatented claims; Seven Devils dist.; Cuprum. **Development:** 1 vertical shaft, 325 ft. deep; completed in 1901 by prior owners. Total development, approximately 1300 ft. **Plant:** Partly installed steam-driven hoist and compressor. **Ore:** Copper. **Men employed:** Average, 20. **Remarks:** Second-hand boilers, steam-driven compressor and hoist were purchased, moved to the property and partly installed. On Nov. 4 all mining operations were suspended, and on Nov. 25 the company was placed in receivership. The complaint for receivership was filed by the Boise Association of Credit Men, and alleged disagreements between the Cooley Butler faction (originally Idaho Copper Co., Ltd.) and the George Graham Rice faction (originally Idaho Copper Corporation).

On April 7, 1926, this company was merged with the Idaho Copper Co., Ltd., on the basis of 1¾ shares of the latter for 1 share of the former. As more than 98 per cent of the stock was exchanged, the reason for a separate entity of this company is unknown.

IDAHO MINES CO., LTD.

Office: Weiser. **Officers:** S. H. Travis, Pres., Chehalis, Wn.; B. S. Varian, Sec., Weiser. **Inc.:** Jan. 5, 1904. **Capital:** 5,000,000 shares; par value $1; 1,503,700 shares issued. **Property:** California group: 3 patented claims, Seven Devils dist.; Cuprum; R. R. Homestead, Ore., 30 miles. **Ore:** Copper. **Remarks:** Idle for many years.

INDIAN CREEK MINING & DEVELOPMENT CO.

Office: 610 Eastman Bldg., Boise. **Officers:** William J. Tait, Pres.; George D. Reid, Sec.-Treas., both of Fillmore, Calif. **Inc.:** Oct. 22, 1909. **Capital:** 100,000 shares; par value $1; 82,553 shares issued. **Property:** 3 patented, 2 unpatented claims, Indian Creek, Seven Devils dist.; Cuprum. **Development:** Approximately 800 ft. of underground workings. **Ore:** Copper. **Remarks:** Idle for many years.

LIME PEAK COPPER CO.

Office: 214 Couch Bldg., Portland, Ore. **Officers:** Joseph M. Healy, Pres.; L. B. Reeder, Sec., both of Portland, Ore. **Inc.:** Form of organization unknown. **Capital:** 2,000,000 shares; par value $1; 1,425,548 shares issued. **Property:** Lime Peak group; 22 unpatented claims, Snake River; 5 miles north of Homestead, Ore.; Seven Devils dist. **Development:** By 8 tunnels, the principal one of which is 1520 ft. long. Total development, approximately 2700 ft. **Plant:** Small air compressor, driven by gasoline engine; complete mining equipment. **Ore:** Copper-silver. **Men employed:** Average, 3. **Remarks:** Active development work, which consisted of extending the principal tunnel, was conducted throughout the year; and in addition a small amount of work was done at other points on the property. A small tonnage of ore was produced and marketed.

BANNOCK COUNTY

Bannock County is one of the largest and most important of the southeastern counties. It is bounded on the north by Bingham County, on the east by Caribou and Bear Lake counties, on the south by Franklin and Oneida counties, and on the west by Power County. It has an area of 1837 square miles and was accredited with a population of 27,532 in the 1920 census. Pocatello, the second largest city in the State, is the county seat and principal division point of the Oregon Short Line Railroad.

The county is served by two State highways, the Oregon Trail, and Yellowstone Park. The former is the main east and west trunk line, and the latter is the main north and south trunk line of the State system.

The principal mineral resources are phosphate rock, limestone, manganese, copper, silver, gold, and building stone. The limestone is suitable for Portland cement and, as the deposits are extensively distributed and adjacent to transportation, they will eventually add a new and important industry. The phosphate rock covers a large area and constitutes an important latent resource. Considerable prospecting has been done on the copper veins which are found in the Portneuf Mountains south of Pocatello. A mill was constructed at one mine; but other than the necessary annual labor no work of importance has been conducted for a number of years. Reports on the manganese deposits near Cleveland and Lava Hot Springs, which were discovered during 1924, indicate that the ore is high grade and that there is a large tonnage available.

During the year the Idaho Manganese Mining Co. produced and marketed a large tonnage of high-grade manganese ore, in addition to performing considerable development work. A small amount of development work was performed by lessees on the property owned by the Cleveland Mining Corporation. The Lava Manganese Mining Co., and William Godfrey developed their manganese properties near Lava Hot Springs during the summer months.

FORT HALL MINING & MILLING CO., LTD.

Office: Pocatello. **Officers:** H. M. Palmer, Pres.-Mgr., Pocatello. **Inc.:** Sept. 5, 1902. **Capital:** 1,000,000 shares; par value $1; 260,000 shares issued. **Property:** Fort Hall group; 10 unpatented claims, Fort Hall dist.; Portneuf. **Development:** Principal tunnel 4000 ft. long; total development approximately 8000 ft. **Plant:** MINE: Steam-driven compressor, complete mining equipment. MILL: 50-ton concentrator built 1909. **Ore:** Copper. **Remarks:** Annual labor.

IDAHO MANGANESE MINING CO.

Office: Cleveland, Idaho. **Officers:** Nathan Smith, Pres.-Mgr., Cleveland; J. H. Peterson, Sec., Pocatello. **Inc.:** July 17, 1925. **Capital:** 400,000 shares; par value 10c; all shares issued. **Property:** 250 acres patented land; unorganized district; Cleveland. **Development:** By 2 tunnels. **Ore:** Manganese. **Men employed:** Average, 20. **Remarks:** Active throughout the year. A large tonnage of manganese ore was produced and marketed.

LAVA MANGANESE MINING CO.

Office: Lava Hot Springs. **Officers:** R. S. Turner, Pres.; H. R. Turner, Sec., both of Pocatello; B. C. Madill, Mgr., Lava Hot Springs. **Inc.:** Aug. 10, 1926. **Capital:** 10,000 shares; par value $10; shares issued unknown. **Property:** 5 unpatented claims, Portneuf dist.; Lava Hot Springs. **Development:** 1 tunnel 400 ft. long. **Ore:** Manganese. **Men employed:** Average, 3. **Remarks:** Small amount of development work during early part of the year.

LEAD BELL MINING CO.

Office: Lava Hot Springs. **Officers:** S. D. Colton, Pres., Salt Lake City; Drusilla Godfrey, Sec.; Wm. R. Godfrey, Mgr., both of Lava Hot Springs. **Inc.:** Nov. 12, 1925. **Capital:** 1,000,000 shares; par value 10c; all shares issued. **Property:** 9 unpatented claims, Portneuf dist.; Lava Hot Springs. **Development:** Principally by 1 tunnel, 630 feet long. **Ore:** Lead-silver. **Remarks:** Idle.

BEAR LAKE COUNTY

Bear Lake is the extreme southeastern county of the State. It is bounded on the east by the State of Wyoming and on the south by the State of Utah. On the north and west it adjoins Caribou, Bannock, and Franklin counties. It has an area of 980 square miles and was accredited with a population of 8783 in the 1920 census. Montpelier, situated in the center of a rich agricultural valley, is the largest town; and Paris, located near the north end of Bear Lake, is the county seat.

The State highway, Oregon Trail, and the main line of the Oregon Short Line Railroad traverse the county east and west, thus giving it good transportation facilities.

The principal mineral resources are phosphate rock, gypsum, manganese, copper, lead, and silver. There are also excellent possibilities for petroleum. Estimates made by geologists of the U. S. Geological Survey credit the State with more than five billion tons of minable phosphate rock, over 85 per cent of the total known phosphate resources of the world. The largest and most accessible areas containing this rock are in Bear Lake County. Phosphate is a necessary soil constituent and it is through the existence of the Idaho deposits that the future of American agriculture is assured. These deposits are practically untouched, as present freight, market, and price conditions are preventing profitable production. They are the greatest potential mineral resources within the State and when properly developed the mining enterprises will dwarf many of the now famous mining districts in the United States. These deposits are fully described, with analyses and tonnage estimates included, in the numerous publications referred to in the bibliography of this county. Four mines are properly equipped with the necessary surface and mining plants, all have a large available tonnage, and production can be started without delay whenever conditions will warrant it.

One of the most outstanding publications issued by the U. S. Geological Survey in recent years is Professional Paper 152, by G. R. Mansfield: "Geography, Geology, and Mineral Resources of Part of Southeastern Idaho." This appeared during 1927; it is profusely illustrated with pictures, maps, and diagrams, and describes in detail the subjects mentioned in its title, dealing especially with the immense areas of phosphate rock found in this county.

Many structures favorable to the accumulation of gas and petroleum in commercial quantities are found in this county. As the formation is similar to those in Wyoming which are producing oil, it is reasonable to expect that the probabilities should be at least equal on the Idaho side of the State line.

In the past a little development work has been done on the copper and lead deposits which are found in this county; and a small tonnage has been marketed. Except for the annual labor, all of the prospects have been idle for a number of years.

The San Francisco Chemical Co. was the only phosphate mine in the county which was active during the year. This company operated its mine for nine months and produced a large tonnage of rock which was shipped to San Francisco, Calif., where it was converted into superphosphate in a plant owned by the company.

The Colossus Mining & Milling Co., near Pegram, was inactive throughout the year. A mill building, power-house building, and cottages for employees were constructed in 1926. This enterprise is based on gold which is not detected by the usual methods employed in assaying for this metal. The company's officers state: "The presence of gold is determined by a special assaying and cyaniding treatment, the enterprise is predicated on these special methods and the tailings from the mill will be pressed into brick."

BLACKSTONE MINING & POWER CO.

Office: Hood River, Ore. **Officers:** E. B. Cloud, Pres.-Mgr., Hood River, Ore. **Inc.:** Jan. 28, 1907. **Capital:** 1,000,000 shares; par value $1; shares issued unknown. **Property:** Blackstone, 1 patented claim, unorganized dist.; St. Charles. **Remarks:** Idle for many years.

COLOSSUS MINING & MILLING CO.

Office: Montpelier. **Officers:** M. L. de Julien, Pres.-Mgr., Pegram; De-Meade Austin, Sec., Montpelier. **Inc.:** May 1, 1925. Charter forfeited Nov. 30, 1927. **Capital:** 1,000,000 shares; par value 1c; 612,000 shares issued. **Property:** Colossus group; 10 unpatented claims, unorganized dist.; Pegram. **Development:** By 2 tunnels: No. 1, 510 ft. long; No. 2, 100 ft. long. **Plant:** Partly constructed; building designed to house a 300-ton cyanide plant. Complete mine camp and buildings. **Ore:** Gold. **Men employed:** Average, 1 **Remarks:** A small amount of development work done during the year. In 1926 the company's officers stated: "The presence of gold is determined by a special assaying and cyaniding treatment; the enterprise is predicated on these special methods, and the tailings from the mill will be pressed into bricks."

COPPER RESERVE MINING & REDUCTION CO.

Office: Care of Walker Brothers Bank, Salt Lake City, Utah. **Officers:** John M. Wallace, Acting Pres., Salt Lake City; Thomas Doolittle, Sec., Los Angeles, Calif. **Inc.:** Aug. 5, 1912. **Capital:** 500,000 shares; par value 10c; 400,000 shares issued. **Property:** Humming Bird group; 4 patented claims, Bear Lake dist.; Paris. **Remarks:** Inactive for nine years.

KEYSTONE PHOSPHATE CO.

Office: Paris, Idaho. **Officers:** F. S. Irwin, Pres.-Mgr., Nampa; M. P. Allen, Sec., Seattle, Wash. **Inc.:** May 4, 1926. **Capital:** 75,000 shares; par value $10; 50,000 shares issued. **Property:** Sublease on 360 acres, government lease owned by Joseph Stucki, and sublease on 317 acres of patented land; Paris. **Development:** By 1 tunnel 960 ft. long. **Ore:** Phosphate rock. **Remarks:** Mining activities not reported.

LEADVILLE CONSOLIDATED MINING CO.

Office: 310 Eccles Bldg., Ogden, Utah. **Officers:** Frank Moore, Pres.; G. B. Roberts, Sec.; Walter B. Cole, Mgr., all of Ogden, Utah. **Inc.:** Filed in Idaho Dec. 3, 1927. **Capital:** 1,000,000 shares; par value 10c; 580,000 shares issued. **Property:** Paris group; 5 unpatented claims, unorganized dist.; Paris. **Ore:** Lead-silver. **Remarks:** Development work started in December.

SAN FRANCISCO CHEMICAL CO.

Office: 332 Pine St., San Francisco, Calif. **Officers:** William F. Kett, Pres., San Francisco, Calif.; Jos. J. Taylor, Mgr., Montpelier. **Inc.:** July 17, 1906. **Capital:** 2000 shares; par value $100; all shares issued. **Property:** Waterloo group; 10 patented claims; 505 acres; Montpelier. **Development:** 3 tunnels; total development, approximately 4000 ft. **Plant:** Gas-driven compressor and complete mining equipment. **Ore:** Phosphate rock. **Men employed:** Average, 15. **Remarks:** Production maintained for 9 months; a large tonnage of phosphate rock was produced and shipped to San Francisco, Calif., where it was converted into superphosphate in a plant owned by the company.

UTAH FERTILIZER & CHEMICAL MFG. CO.

Office: Los Angeles, Calif. **Officers:** F. W. Braun, Pres.; Robt. J. Shields, Mgr., both of Los Angeles, Calif. **Inc.:** Jan. 29, 1908. **Capital:** 100,000 shares; par value $1; all shares issued. **Property:** 16 patented claims; approximately 2400 acres; unorganized dist.; Georgetown; R. R., Georgetown, 8 miles. **Development:** 9 tunnels, 2 shafts, approximately 800 ft. **Ore:** Phosphate rock. **Remarks:** Idle.

UTAH-IDAHO MINING & MILLING CO.

Office: Paris, Idaho. **Officers:** L. W. Johnson, Pres., Provo, Utah; H. H. Broomhead, Sec., Bloomington. **Inc.:** Aug. 23, 1926. **Capital:** 1,000,000 shares; par value 2c; 665,000 shares issued. **Property:** Old Boulder group, 18 unpatented claims, unorganized dist.; Paris. **Development:** By 3 tun-

nels: No. 1, 400 ft. long; No. 2, 150 ft. long; No. 3, 200 ft. long. **Ore:** Copper. **Men employed:** Average, 4. **Remarks:** Small amount of development work during the year, the funds for which were derived from stock assessments.

BENEWAH COUNTY

Benewah is one of the northern counties. It is bounded on the west by the State of Washington, on the north by Kootenai County, and on the east and south by Shoshone and Latah counties. It has an area of 786 square miles and was accredited with a population of 6997 in the 1920 census. St. Maries, the county seat, is the largest town in the county. Except a small area along the St. Joe and St. Maries Rivers, and the section adjacent to the town of Plummer, which is devoted to agriculture, the entire county is mountainous and heavily timbered. The county is noted for its timber and lumbering industries.

The county is served by lake-boat transportation from Coeur d'Alene to St. Maries, and by two railroads: The Tekoa, Wn.-Wallace, Idaho, branch of the O. W. R. & N. (Union Pacific System), and the main line of the Chicago, Milwaukee & St. Paul Railroad, with its branch line extending from St. Maries to Elk River (Clearwater County).

The principal mineral resources are gold, copper, silver, lead, zinc, iron, and clay. The deposits containing the principal metals have received a small amount of attention; and many of the clays are exceptionally adapted to the ceramic industry. The St. Joe district, which lies east of St. Maries, and the Hoodoo and Camas Cove districts, in the southeastern corner, are the principal mining districts.

During 1927 three mining companies performed a small amount of development work. This, with a slight increase in the number of prospectors, gave the county a little more than its usual mining activity.

BIG FIVE MINING CO.

Office: St. Maries. **Officers:** F. E. Goude, Pres.-Mgr., Silcoos, Ore.; W. F. Sargent, Sec., St. Maries. **Inc.:** Sept. 20, 1907. **Capital:** 2,000,000 shares; par value $1; 554,335 shares issued. **Property:** Big Five group; 6 unpatented claims, St. Joe dist.; St. Maries. **Development:** By 2 tunnels: No. 1, 400 ft. long; No. 2, 450 ft. long. **Ore:** Silver, lead, copper. **Remarks:** Annual labor only.

BUTTE MINING CO.

Office: St. Maries, Ida[illegible] **Officers:** John Martindes, Pres.-Mgr.; George E. Mitchell, Sec., both of [illegible] Maries. **Inc.:** March 27, 1916. **Capital:** 500,000 shares; par value [illegible]; 399,736 shares issued. **Property:** 6 unpatented claims, St. Joe dist. [illegible] Maries. **Development:** 1 tunnel, 220 ft. long. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** Development work maintained during the summer months.

ROUND TOP MINING CO.

Office: St. Maries. **Officers:** Fulton Cook, Pres.; W. F. Sargent, Sec., both of St. Maries. **Inc.:** Jan. 21, 1926. **Capital:** 1,000,000 shares; par value 10c; 146,000 shares issued. **Property:** Roundtop group; 12 unpatented claims, St. Joe dist.; St. Maries. **Development:** 2 tunnels: No. 1, 425 ft. long; No. 2, 110 ft. long. **Plant:** Small steam-driven compressor; complete mining equipment. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** A small amount of work during the year.

BINGHAM COUNTY

Bingham, a southeastern county, is primarily an agricultural community. It occupies a large part of the Snake River Valley and is bounded by Butte, Blaine, Power, Bannock, Caribou, Bonneville, and Jefferson counties. It has an area of 2184 square miles and was accredited with a population of 18,310 in the census of 1920.

The extensive phosphate beds of southeastern Idaho are exposed in the Blackfoot Mountains which cover the eastern part of the county. Coal also has been found in these mountains, notably along Willow Creek, a small stream which flows in a northerly direction through the east end of the county. The coal beds have received a little attention from prospectors but no coal of commercial importance has been discovered. Structures that appear likely for the presence of petroleum are present also. The fine gold in the placer deposits along Snake River is the only metal resource of the county. In the past these deposits have received the attention of placer miners, but nothing of importance was reported during the year.

BLAINE COUNTY

Blaine County is bounded on the west by Camas County, on the north by Custer County, and on the east and south, in its greater extent, by Butte and Lincoln counties. Its principal area comprises the drainage basin of Big and Little Wood rivers, which flow in a southerly direction. Its total area is 2797 square miles. The 1920 census accredited the county with a population of 4473, or 1.6 persons to the square mile. In location it is one of the south-central counties and comprises part of the region known as "Central Idaho's Mineral Empire." The county is primarily recognized as a mining county, but it is also noted for its agricultural and stock raising industries; particularly sheep, as it is one of the largest sheep shipping points in the United States.

The county is served by the Wood River branch of the Oregon Short Line Railroad, which extends from Shoshone to Ketchum; by the Sawtooth Park State highway, and a well-kept system of county roads which extend into all of the various mining districts and sections. All roads are kept in good repair and are open to travel during the larger part of the year. Hailey is the largest town and county seat.

The first discovery of lead-silver ore in the State was made in Blaine County, which was then called Alturas County. The first ore was marketed in 1880 and since then this county has been a consistent producer of these metals. Most of the ores are of such high grade that they can be shipped direct to the smelter without preliminary treatment, thus assuring immediate returns from all discoveries. This fact and the possibilities of discovering and opening new ore bodies will continue to hold Blaine County, particularly the Wood River district, in popular esteem as a favorite section of the State for prospectors, development companies, and those seeking a worthy field for mining enterprises.

The high-grade ores of lead and silver are widely distributed throughout the county, as well as those of gold, zinc, and copper. In addition to the five principal metals—lead, silver, zinc, gold, and copper—deposits of arsenic, antimony, bismuth, quicksilver, graphite, barytes and limestone are found in this county. These minerals occur in sufficient extent to be of commercial importance, and many of the deposits offer an excellent opportunity to development companies or to those in search of these minerals or metals. The barytes deposits are the largest that have ever been found west of the Mississippi River. One large deposit on Deer Creek has been purchased by the Bunker Hill & Sullivan Mining & Concentrating Co., presumably in anticipation of the construction of the company's zinc smelter at Kellogg, where it will be used in the manufacture of lithopone.

The two most noteworthy events during 1927 were the reopening by the Triumph Development Co. of the old Triumph mine, which adjoins the North Star of the Federal Mining & Smelting Co., and the Mathews discovery on Kelly Mountain, west of Hailey. The success of the Triumph was a reward to a small organization for having the courage to reopen a mine which had lain dormant for over 30 years and had been rejected by some large mining

companies. After the mine was unwatered, new buildings and head-frame were constructed; mining equipment was installed, the shaft repaired, and production started at the rate of 50 tons per day; this was later increased to 75 tons. The ore is shipped to a custom milling plant at Salt Lake City, Utah, where two concentrates are made—a lead-silver and a zinc. The reopening and subsequent profitable operation of this mine were made possible by selective flotation, whereby mixed lead-zinc ores can now be treated which could not be separated by gravity concentration methods.

The Mathews disclosure was a new discovery made during the early part of the year. The large amount of surface trenching which was done on the vein opened it to a sufficient extent to permit this discovery to be classed as one of importance. After the trenching was completed, the property was incorporated as the Liberty Gem Mines, Inc. Camp buildings were constructed; mine equipment was installed; and work was started on a 100-foot vertical shaft.

In addition to the Triumph Development Co. and the Liberty Gem Mines, Inc., new companies and enterprises which started during the year were: The Homestake Mines Corporation, at the Homestake group north of Ketchum; the Daisy Mining & Milling Co., Ltd., west of Hailey in the "gold belt" district, and the large number of new locations and subsequent prospecting in the vicinity of the Mathews discovery.

The Independence mine, owned by the Federal Mining & Smelting Co., was operated throughout the year by lessees who marketed a large tonnage of high-grade hand-sorted ore, in addition to developing new ore in the mine. The Hailey Bonanza Mining Co. further explored its mine in search for the continuation of the oreshoot. Others who continued to develop their mines throughout the year were: The Idaho Democrat Mine, Inc., at the old Democrat mine and at a prospect near the Mathews discovery; the Wood River Mining Co., on Trail Creek west of Ketchum; the Eureka Development Co., Ltd., at the Eureka and Idahoan groups in the Bullion districts; F. B. Felt, at the Parker mine near Ketchum; Peter L. Kent, at the Lone Pine group on Deer Creek and at the Tungad group near the Liberty Gem Mines, Inc.; M. T. Rowland, on the Smuggler group in the Muldoon section, and A. F. Perry, who is operating under lease the famous old Vienna mine in the Sawtooth district and reports encountering some excellent high-grade silver ore. Harold Boericke, who was operating the Norris-O'Connor group in the Muldoon section, continued active development work for four months, after which the enterprise was abandoned and the equipment removed.

The famous Minnie Moore mine, which was the scene of the most extensive prospecting campaign in the county during the years 1923 to 1927, was abandoned in 1927. In August, 1923, this property was acquired by the Federal Mining & Smelting Co., who constructed new buildings, installed new mining machinery and equipment, and then commenced active mining operations which consisted of sinking the Allen shaft to the 800-foot level and driving about 1000 feet of new crosscuts, drifts, and raises. On June 16, 1924, the Federal forfeited its option; and on June 26, 1924, Harold Boericke, of Philadelphia, acquired the mine under lease and option similar to the one held by the Federal. He leased the surface plant and mining equipment from the Federal, and immediately commenced developing the mine where the former company left off. An average number of forty men was employed continuously and the work was carried forward with much vigor until December 31, 1925, at which time the operations were suspended and the property turned back to the owner, who kept the pumps running until February 2, 1926, at which time work was resumed by other interests. These operators performed a large footage of diamond drilling and crosscutting until May 25, 1926, at which time they suspended all work. The mine was then idle until June 26, 1926, when work was resumed by the Minnie Moore Syndicate, an organization whose operations were conducted through the Hecla Mining Co. of Shoshone County. This organization conducted an active exploratory campaign until November 11, 1926, at which time it suspended operations and turned the property back to the Minnie Moore Mines Co. The

president of the latter company had previously anticipated that the Minnie Moore Syndicate would forfeit its option, and was successful in having the mine refinanced by the date of forfeiture, so the change in operators was made without a suspension of operations, which were actively continued until May, 1927. The enterprise was then abandoned, the equipment removed, and the buildings dismantled.

The Radiore process of electrical exploration was applied to two properties in December, after which steps were taken toward starting mine development work based on the findings of these surveys.

ARGO MINING CORPORATION

Office: 3725 Kate Ave., Baltimore, Md. **Officers:** Henry Mencken, Pres.; F. H. Gettemuller, Sec., both of Baltimore, Md.; T. R. Bowlden, Mgr., Gannett. **Inc.:** Oct. 15, 1926. **Capital:** 500,000 shares; par value $1; 35,000 shares issued. **Property:** Cove group; 7 unpatented claims, Mineral Hill dist.; Gannett. **Development:** 4 tunnels, giving approximately 580 feet, vertical depth on vein; total development, 2533 ft. **Plant:** Steam-driven compressor on ground not installed; complete mining equipment. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** Annual labor only.

ARGOSY MINING & MILLING CO., LTD.

Office: 1125 N. Garfield Ave., Pocatello, Idaho. **Officers:** W. E. Smith, Pres.; Priscilla K. Smith, Sec., both of Pocatello. **Inc.:** Feb. 24, 1904. **Capital:** 50,000 shares; par value $1; all shares issued. **Property:** Argosy group; 5 patented claims, Little Wood River dist.; Muldoon. **Development:** By 5 tunnels; total development approximately 800 ft. **Ore:** Lead-silver. **Remarks:** Idle for 16 years.

BALTIMORE & VICTORIA MINING CO.

Office: Care of U. S. Trust Company, Terre Haute, Ind. **Officers:** William K. Hamilton, Pres., Terre Haute, Ind.; Eph Daft, Agent, Hailey. **Inc.:** July 3, 1903. **Capital:** 150,000 shares; par value 10c; all shares issued. **Property:** Ida Harland group; 5 patented, 8 unpatented claims, Warm Springs Creek dist.; Hailey. **Remarks:** Small amount of work by lessees.

HAROLD BOERICKE

Office: 1307 Packard Building, Philadelphia, Pennsylvania. **Officers:** Geo. W. Worthington, Mgr., Bellevue. **Property:** Porto Rico and Keystone groups; 24 unpatented claims, Little Wood River dist.; Muldoon. **Development:** Principally by 5 tunnels; total development over 1500 ft. **Plant:** 2 gas-driven C-P compressors; complete mining equipment and camp. **Ore:** Lead-silver, copper-gold. **Men employed:** Average, 6. **Remarks:** Active development work was maintained for 4 months, after which operations were suspended and the enterprise was abandoned.

BUNKER HILL & SULLIVAN MINING & CONCENTRATING CO.
(See Shoshone County)

Officers: F. W. Bradley, Pres., 1022 Crocker Bldg., San Francisco, Cal.; Stanly A. Easton, Mgr., Kellogg; James W. Gwinn, Local Mgr., Cascade. **Property:** 10 unpatented claims; Bullion, Mineral Hill dist.; Hailey. **Remarks:** Annual labor only.

DAISY MINING & MILLING CO., LTD.

Office: Hailey. **Officers:** A. E. Larsen, Pres., Yakima, Wash.; L. A. Devine, Sec.; C. P. Devine, Mgr., both of Hailey. **Inc.:** July 6, 1920. **Capital:** 500,000 shares; par value $1; 250,000 shares issued. **Property:** Camas group; 18 patented claims held under lease and option; Mineral Hill dist.; Hailey. **Development:** Principally by 1 tunnel 750 ft. long. **Plant:** MINE: Electrically-driven compressor and complete mining equipment. MILL: Small concentrator, including flotation. **Ore:** Lead-silver-gold. **Men employed:** Average, 5. **Remarks:** In addition to constructing a small mill, this company maintained development work throughout the year.

DISCOVERY GULCH MINING CO.

Office: 530 N. Harrison St., Pocatello, Idaho. **Officers:** G. W. Oliver, Pres.; E. H. Miley, Sec.-Treas., both of Pocatello. **Inc.:** Oct. 29, 1925. **Capital:** 50,000 shares; par value $1; all shares issued. **Property:** 1 unpatented claim; Mineral Hill dist.; Hailey. **Ore:** Lead-silver. **Development:** 1 tunnel, 193 ft. long. **Remarks:** Idle.

ERVINE MINING CO.

Office: Ketchum. **Officers:** M. A. Costello, Sec., 40 Court St., Boston, Mass.; C. Fred Howe, Mgr., Ketchum. **Inc.:** March 14, 1922. **Capital:** 1,000,000 shares; par value $1; 357,550 shares issued. **Property:** Boyle Mtn. group; 7 patented, 13 unpatented claims, 350 acres, Warm Springs Creek dist.; Ketchum. **Ore:** Silver-lead. **Remarks:** Annual labor only.

EUREKA DEVELOPMENT CO., LTD.

Office: 319 Dooly Blk., Salt Lake City, Utah. **Officers:** W. A. Wilson, Pres.-Mgr., Salt Lake City, Utah. **Inc.:** June 28, 1905. **Capital:** 200,000 shares; par value 50c; all shares issued. **Property:** Eureka group; 12 patented, 5 unpatented claims, Mineral Hill dist.; Hailey, 7 miles. **Development:** Total development approximately 12,900 ft., the length of the principal workings being: Bay State, 1000 ft.; Chicagoan, 300 ft.; Whale, 1400 ft.; Eureka, 3920 ft.; Idahoan, 5000 ft. One inclined shaft 700 ft. long; 1 inclined shaft 435 ft. long. **Plant:** MINE: 8x10 Lidgerwood hoist; 40 h. p. C-P oil-driven compressor. MILL: 25-ton concentrator. **Ore:** Lead-silver. **Men employed:** Average, 8. **Remarks:** During the early part of the year the property was under development by R. B. Whiteside of Duluth, Minn. After he suspended work, the mine was operated by lessees, who produced and marketed a small tonnage of high-grade hand-sorted ore.

FEDERAL MINING & SMELTING CO. (See Shoshone County)

Office: Wallace. **Officers:** F. H. Brownell, Pres.; J. L. Martin, Sec., both of 120 Broadway, New York City; Frederick Burbidge, Mgr., Wallace. **Property:** Independence, North Star, Koeninger and Malta groups; 36 patented, 13 unpatented claims, 762 acres, Warm Springs Creek dist.; Hailey, 12 miles. **Development:** Approximately 7 miles of underground workings, the principal of which is the Plummer, or main haulage tunnel, which is over 6000 ft. long and connects the North Star and Independence groups. **Plant:** MINE: 1 English Iron Works 202 single drum 25 h. p. electric hoist; 1 Lidgerwood 8x10 air hoist; 1 I-R 420 cu. ft. compressor; 1 C-P 765 cu. ft. compressor. All electrically driven. Electric haulage through Plummer tunnel. One Waugh drill sharpener and complete mine equipment; 4400 ft. Riblet aerial tram from Plummer tunnel to mill, capacity 20 tons an hour. Shops, timber sheds and bunk houses. MILL: 350-ton concentrator; jaw and gyratory crushers; rolls; Marcy ball mills; Hancock jigs; drag classifiers; Wilfley tables; Dorr thickeners; Oliver filters; electric power. **Ore:** Lead-silver. **Remarks:** Active mining operations were suspended on August 1, 1923, after which various parts of the Independence mine have been operated by lessees. A substantial tonnage was produced and marketed during the year.

FIELDS MUTUAL DEVELOPMENT CO.

Office: Hailey. **Officers:** Al. W. Field, Pres.-Mgr., Hailey; V. F. Rodgers, Sec., Portland, Ore. **Inc.:** Nov. 6, 1926. Formerly known as Field Mutual Mining Co. **Capital:** 500,000 shares; par value $1; 130,000 shares issued. **Property:** 14 unpatented claims, Kelly Mountain, Mineral Hill dist.; Hailey. **Development:** Approximately 3000 ft. of underground work, principally 1 tunnel 1000 ft. long. **Ore:** Lead-silver. **Men employed:** Average, 1. **Remarks:** A small amount of development work during the summer months.

HAILEY BONANZA MINING CO.

Office: Hailey. **Officers:** Carl Reisig, Pres.-Mgr.; Alfred Wolff, Sec.-Treas., both of Hailey. **Inc.:** Aug. 9, 1919. **Capital:** 500,000 shares; par value $1; all shares issued. **Property:** Imperial group; 1 patented, 24 unpatented claims, Greenhorn Gulch, Warm Springs Creek dist.; Hailey. **Development:** Approximately 3000 ft. of underground workings, the principal of which is 1 tunnel 1200 ft. long. **Plant:** MINE: Electrically-driven compressor and complete mining equipment. MILL: 100-ton concentrator consisting of tables and jigs. **Ore:** Lead-silver. **Men employed:** Average, 3. **Remarks:** Small amount of development work during the year.

HOMESTAKE MINES CORPORATION

Office: Bellevue. **Officers:** J. J. Donovan, Pres.-Mgr.; F. D. Kaufman, Sec., both of Bellevue. **Inc.:** July 27, 1927. **Capital:** 1000 shares; par value $100; all shares issued. **Property:** Homestake group; 13 unpatented claims, Warm Springs Creek dist.; Ketchum. **Development:** Approximately 3500 ft. of workings, the principal being: No. 3 tunnel, 550 ft. long; No. 4 tunnel, 1000 ft. long; No. 5 tunnel, 1900 ft. long. **Plant:** Gas-driven C-P compressor; complete mining equipment. **Ore:** Lead-silver-zinc. **Men employed:** Average, 7. **Remarks:** Active development work throughout the summer months.

IDAHO DEMOCRAT MINE, INC.

Office: 207 Glencoe Bldg., Duluth, Minn. **Officers:** A. Hagberg, Pres.; E. O. Olund, Sec., both of Duluth. **Inc.:** Jan. 30, 1924. **Capital:** 300,000 shares; par value $1; 249,671 shares issued. **Property:** Lease and option on Idaho Democrat group; 10 patented, 14 unpatented claims, Mineral Hill dist.; Hailey. **Plant:** Portable gas-driven compressor and complete mining equipment. **Ore:** Lead-silver. **Men employed:** Average, 4. **Remarks:** The mine held by this company is one of the old producers of the Wood River section. There is an extensive amount of mine workings, most of which are inaccessible. This company has abandoned all the old workings, and has devoted its activities to exploring new ground.

IDAHO MASCOT MINES COALITION

Office: 407 Newhouse Bldg., Salt Lake City, Utah. **Officers:** Charles Peter, Pres.-Mgr.; August Glissmeyer, Sec., both of Salt Lake City. **Inc.:** Jan. 8, 1926. **Capital:** 2,000,000 shares; par value $1; 1,400,000 shares issued. **Property:** Mascot group; 41 patented, 28 unpatented claims, Warm Springs Creek dist.; Hailey. Held under lease and bond from F. C. Richmond Machinery Co., Salt Lake City. **Development:** Principally by 4 tunnels; total development, approximately 11,000 ft., of which the principal tunnels are: Silver Fortune, 50 ft. long; Oregonian, 300 ft. long; Lyda, 6000 ft. long; and West Side, 2250 ft. long. **Plant:** 1 15x9x10 and 1 12x8x12 C-P gas-driven compressor; 1 160 h. p. and 1 40 h. p. C-P semi Deisel engine driving electric generators; sawmill and complete mine equipment and camp. **Ore:** Lead-silver. **Remarks:** Idle.

IDAHO MINERAL PRODUCTS CO., LTD.

Office: Hailey. **Officers:** J. F. MacClure, Pres., Burley; J. G. Hedrick, Sec., Hailey. **Inc.:** July 6, 1920. **Capital:** 100,000 shares; par value $1; shares issued, none. **Remarks:** Company owns no property.

IDAHO SILVER KING MINING CO.

Office: Huntington Beach, Calif. **Officers:** A. B. Watson, Pres., Santa Ana, Calif.; E. E. Wilson, Sec., Huntington Beach, Calif. **Inc.:** July 17, 1926. **Capital:** 500,000 shares; no par value; 270,005 shares issued. **Property:** Silver King group; 2 patented, 1 unpatented claim, Sawtooth dist.; Ketchum. **Development:** By an inclined shaft 600 ft. long, with 3 intermediate levels; total development, approximately 3000 ft. **Plant:** Steam-driven hoist. **Ore:** Silver; antimony. **Remarks:** This company owns the famous Silver King property, which at one time was one of the principal

producers in the Sawtooth district. In 1893 the shaft and head-house burned and the property lay dormant until this company reopened it during the year 1926. The shaft was unwatered, and a large tonnage of high-grade ore exposed, after which operations were suspended and the mine permitted to fill with water, pending a readjustment of the internal affairs of the company.

IVANHOE MINING CO.

Office: 485 California St., San Francisco, Calif. **Officers:** Harry L. Tevis, Pres.; William Letson, Sec., both of San Francisco, Calif. **Inc.:** July 28, 1909. **Capital:** 2500 shares; par value $1; all shares issued. **Property:** Durango group, 16 patented claims; Iris group, 5 patented claims; Mineral Hill dist.; Triumph group, 7 patented claims; Warm Springs Creek dist.

JACK POT MINING CO.

Office: Boise. **Officers:** F. J. Long, Pres., Bellevue; C. E. Beymer, Sec.-Mgr., Boise. **Inc.:** June 29, 1926. **Capital:** 120 shares; par value $100; no shares issued. **Property:** 2 unpatented claims, Mineral Hill dist.; Bellevue. **Development:** By 1 tunnel 100 ft. long. **Ore:** Lead-silver. **Remarks:** A small amount of work was done during the summer months by the majority stockholders.

LIBERTY GEM MINES, INC.

Office: 610 Eastman Bldg., Boise. **Officers:** Guy E. Mathews, Pres.; G. Arlon Mathews, Sec., both of Hailey. **Inc.:** Sept. 13, 1927. **Capital:** 250 shares; no par value; all shares issued. **Property:** Liberty group; 11 unpatented claims, Mineral Hill dist.; Hailey. **Development:** Numerous open cuts and 2 small shafts. **Plant:** Gas-driven compressor; air-driven hoist; complete mining equipment and camp. **Ore:** Lead-silver-zinc. **Men employed:** Average, 7. **Remarks:** This enterprise is based on the development of the new ore disclosures made by the Mathewses during the early part of the year. The large amount of surface trenching which was done on the vein opened it to a sufficient extent that it may be classified as one of importance. After the trenching was completed, camp buildings were constructed, mining equipment was installed, and work started on a 100-ft. vertical shaft.

MIDVALE MINING CO.

Office: Ketchum. **Officers:** M. A. Costello, Sec., 40 Court St., Boston, Mass.; C. Fred Howe, Mgr., Ketchum. **Inc.:** March 14, 1922. **Capital:** 1,000,000 shares; par value $1; 400,000 shares issued. **Property:** Pay group; 8 unpatented claims, Warm Springs Creek dist.; Ketchum. **Ore:** Zinc. **Remarks:** Annual labor only.

MINNIE MOORE MINES CO.

Office: Bellevue. **Officers:** I. E. Rockwell, Pres.-Mgr.; L. R. W. Rockwell, Sec., both of Bellevue. **Inc.:** June 17, 1912. **Capital:** 500,000 shares; par value $1; 300,000 shares issued. **Property:** Minnie Moore group; 13 patented, 5 unpatented claims. **Development:** Principally by an inclined shaft 800 ft. long, giving a vertical depth of 600 ft. Total development from this shaft, approximately 5000 ft. **Ore:** Lead-silver. **Men employed:** Average, 30. **Remarks:** Operations suspended in May. Equipment and buildings dismantled, and property abandoned.

QUINCY JUNIOR MINING CO.

Office: 319 Dooly Block, Salt Lake City, Utah. **Officers:** George L. Erwin, Pres., Consumers' Power Co., Grand Rapids, Mich.; J. T. Emery, Jr., Sec., Muskegon, Mich.; W. A. Wilson, Mgr., Salt Lake City. **Inc.:** Dec. 20, 1903. **Capital:** 150,000 shares; par value $1; 139,658 shares issued. **Property:** Red Elephant group; 10 patented claims, Mineral Hill dist.; Hailey. **Development:** Approximately 15,000 ft. underground workings. **Remarks:** Operated by lessees during part of the year.

RED ELEPHANT CONSOLIDATED MINES CO.

Office: 319 Dooly Blk., Salt Lake City, Utah. **Officers:** John Rapalji, Pres., Beacon, N. Y.; Edwin J. Webb, Sec., Beacon, N. Y. **Inc.:** June 16, 1916. **Capital:** 1,500,000 shares; par value $1; 957,167 shares issued. **Property:** Red Elephant Extension group; 1 patented, 16 unpatented claims, Mineral Hill dist.; Hailey. **Remarks:** Idle throughout the year.

SILVER SPAR MINING CO.

Office: Idaho Falls. **Officers:** B. M. Rogers, Pres.; Dr. Dwight Lenzi, Sec., both of Idaho Falls. **Inc.:** April 14, 1916, as Falls Mining Co.; name changed April 28, 1917. **Capital:** 200,000 shares; par value $1; 100,000 shares issued. **Property:** Silver Spar group; 18 patented, 7 unpatented claims, Little Wood River dist.; Muldoon. **Development:** By 5 tunnels totaling approximately 1000 ft. in length, and an inclined shaft 200 ft. long. **Plant:** Steam-driven hoist and compressor, complete mining equipment and camp. **Ore:** Silver. **Remarks:** Idle.

SUNBEAM MINING CO.

Office: 546 S. Main St., Pocatello. **Officers:** W. H. Hall, Pres.-Mgr.; Geo. H. Spongberg, Sec., both of Pocatello. **Inc.:** Sept. 28, 1926. **Capital:** 1,000,000 shares; par value 10c; 500,001 shares issued. **Property:** 2 unpatented claims, Sawtooth dist.; Ketchum. Held under lease and option from C. H. Furey, Pocatello. **Development:** Total development of approximately 300 ft. **Ore:** Silver, antimony. **Men employed:** Average, 3. **Remarks:** Active operations during the summer months.

TORBANEHILL MINING CO.

Office: 608 Deseret Bank Bldg., Salt Lake City, Utah. **Officers:** W. F. Armstrong, Pres.; Oscar W. Moyle, Sec., both of Salt Lake City, Utah. **Inc.:** Sept. 14, 1906. **Capital:** 500,000 shares; par value 1c; all shares issued. **Property:** 7 patented claims, Lava Creek dist.; Carey. **Remarks:** Idle for many years.

TRIUMPH DEVELOPMENT CO.

Office: 218 Felt Bldg., Salt Lake City, Utah. **Officers:** J. C. Jensen, Pres.-Mgr.; Geo. W. Snyder, Sec., both of Salt Lake City. **Inc.:** Never filed in Idaho. **Capital:** 1,000,000 shares; par value 10c; all shares issued. **Property:** Lease on Triumph mine, owned by Ivanhoe Mining Co.; Warm Springs Creek dist.; Hailey. **Development:** Principally by a vertical shaft 300 ft. deep in which there are 3 levels. Total development approximately 7000 ft. **Plant:** Electrically-driven hoist and compressor; steel sharpener; complete mining equipment. **Ore:** Lead-zinc-silver. **Men employed:** Average, 40. **Remarks:** All of the mining equipment was installed; new head-frame and buildings were constructed, shaft was reopened and pumped out. After this, production was started at the rate of over 50 tons per day, the ore being shipped to a custom milling plant at Salt Lake City, Utah.

All old reports and maps of the mine indicated that a large tonnage of mixed lead-zinc ore was in the property. After it had been completely rehabilitated, the operation was placed on a profitable basis—a reward to those having the courage to reopen a mine which had been abandoned for more than 30 years.

UNITED MINES CO.

Office: 420 Second St., Portland, Oregon. **Officers:** Thomas H. Hurlburt, Pres., 420 Second St., Portland, Ore. **Inc.:** April 7, 1922. **Capital:** 1200 shares; par value $50; all shares issued. **Property:** 5 unpatented claims, Garfield Gulch, Little Wood River dist.; Muldoon. **Development:** Approximately 1140 ft. of underground workings, consisting principally of 3 tunnels: No. 1, 850 ft. long; No. 2, 280 ft. long; No. 3, 90 ft. long. **Plant:** 7x6 I.-R. compressor, driven by 34 in. Pelton water wheel, and complete equipment. **Ore:** Lead-silver. **Remarks:** Annual labor only.

WAR DANCE MINING CO., LTD.

Office: P. O. Box 397, E. Auburn, Calif. **Officers:** James W. Burns, Pres., Auburn, Calif. **Inc.:** Sept. 17, 1910. **Capital:** 500,000 shares; par value $1; no shares issued. **Property:** War Dance group; 23 unpatented claims, Mineral Hill dist.; Hailey. **Development:** Over 10,000 ft. of underground workings. **Remarks:** One of Blaine County's old producers. Annual labor only.

WAVA MINING & MILLING CO.

Office: Hailey. **Officers:** C. E. Gordon, Pres., Detroit, Mich.; J. G. Hedrick, Sec., Hailey. **Inc.:** Sept. 18, 1919. **Capital:** 15,000 shares preferred; 35,000 shares common; par value $1; 4282 preferred, 24,282 common issued. **Property:** Aztec group; 5 unpatented claims. Warm Springs Creek dist.; Ketchum. **Development:** 1 tunnel, 365 ft. long. **Ore:** Lead-silver. **Remarks:** Annual labor only.

WOOD RIVER MINING CO.

Office: 204 Shane Bldg., Idaho Falls. **Officers:** H. H. Scarborough, Pres.; W. P. Holmes, Sec., both of Idaho Falls. **Inc.:** July 30, 1923. **Capital:** 1,000,000 shares; par value 10c; 606,100 shares issued. **Property:** 8 unpatented claims, Warm Springs Creek dist.; Ketchum. **Ore:** Silver and lead. **Remarks:** A small amount of development work was performed during the year.

BOISE COUNTY

Boise is one of the principal mining counties in the southwestern part of the State. It is bounded by Ada, Gem, Valley, Custer, Blaine and Elmore counties. Included within its area are a part of the drainage basin of the Payette River, practically all of the drainage basin of the South Fork of the Payette River, and all of the drainage basins of Grimes Creek and Moore Creek. The last two comprise the area generally known as the Boise Basin. The county has a total area of 1840 square miles, and was accredited with a population of 1822 in the 1920 census, or one person to the square mile. The principal industries are mining, stock raising, timber and lumbering.

Different sections of the county are served by Federal and State highways, which are supplemented by well-maintained county roads. These roads extend into all the various mining districts and are open to automobile travel during the larger part of the year. The western part of the county is traversed by the Nampa-McCall branch of the Oregon Short Line Railroad; the central part, or Boise Basin, is served by the Intermountain Railroad, which extends from Barber, near Boise, to Centerville. Idaho City, the county seat, and one of the oldest towns in the State, dates its existence from 1863, the time of the original gold rush to the Basin. It once boasted of a population as high as seven to ten thousand.

The history of Boise County dates back to the formation of the State in 1860, when placer gold was first discovered near Pierce City (Clearwater County). The overflow from this stampede resulted in the discoveries of Elk City, Florence, and Boise Basin, in quick succession; and by 1863 Boise Basin was one of the most thriving communities in the western part of the United States. In July, 1864, more than 9000 20-acre placer claims had been recorded in the three principal mining districts.

During the first few years after the discovery of gold all mining was confined to the placers which were susceptible to hand methods. After these became less profitable, numerous ditches 5 to 30 miles in length were constructed, and hydraulic mining of the higher bench gravels was started. These operations were conducted for many years, and a few have survived to the present day.

Shortly after the placer rush had subsided, attention was given to quartz mining; many discoveries soon were made, mills were constructed, and deep mining started. The principal discovery was the Gold Hill mine at Quartzburg. In 1863 the vein was exposed by placer mining, and by 1867 a mill had been built and was in operation. Except at brief periods when it was being repaired, the mill was operated continuously for 12 years. The mine has been in almost continuous operation since the day of discovery and is credited with a production of six to eight million dollars. This record gives it the distinction of being the oldest and largest producing gold mine in the State. The vein has been opened to a vertical depth of 600 feet only; at this point the ore is still persistent both in grade and extent, and there appears to be no reason why it should not continue deeper.

In addition to the Gold Hill, many other gold mines have a large production record. This production, combined with that derived from placer mining, both hydraulic and dredging, has held Boise County in first place in gold production in the State until the year 1923. The county is still an important producer of gold, but recoveries made by large dredges in other counties have displaced it from first rank. Although statistics show a continual yearly decrease in the amount of gold produced, it should not be inferred that the gold mines are becoming exhausted. There are still many mines and prospects which justify exploitation. When these are properly financed and managed this county will return to its former rank of first in gold production.

As the early-day miner was interested only in the precious metals, gold and silver, which could be recovered by the methods then in use, he disregarded all veins containing the sulphide, or base, ores. Before these ores became valuable prospecting had practically ceased, so the result is that this county offers one of the best fields in the State to prospectors or small development companies in search of lead-zinc-silver ores. Deposits of these metals are widely distributed throughout the county; and a few have been partially developed. When properly exploited and intelligently managed, they will become an important factor in the future prosperity of Boise County and the City of Boise, and will give the State an additional lead-zinc producing district. Although Boise County has always been known as a gold producing county, there are numerous widely distributed deposits of lead, silver, zinc, copper, bismuth, and antimony; in addition to these, monazite is found in the placer deposits in sufficient quantity to be of commercial importance.

During 1927 this county witnessed a large increase in new mine plant installations, new development work, and new enterprises; also many of the old companies expanded their operations over those of the previous year. Much scouting by large companies and others looking for new mines was in evidence throughout the year, and two important transactions would have taken place, had it been possible for the intending purchasers to procure the properties under favorable terms.

The largest new construction was the small dredge built by the Crooked River Mining Co. at its Kempner Ranch property on Crooked River. However, as the dredge was not properly designed or constructed, it ended in a miserable failure and an almost total loss of the money invested.

The principal new event of importance was the acquisition of the Gold Hill & Iowa mine at Quartzburg by the Talache Mines, Inc. After negotiations were completed in March, new pumps were installed and unwatering of the mine continued to completion. In addition to this, a large amount of work was performed on the 100-foot level. After unwatering to the 600-foot level was completed, new sinking equipment was installed and work started on sinking a winze to the 750-foot level. Besides proving the mine at this additional depth, the company proposes to perform a large amount of exploratory work on the upper levels.

The Idawa Gold Mining Co. maintained capacity production at its Belshazzar mine throughout the year, in addition to greatly improving its mine camp, buildings, and equipment. The amount of gold produced by this company gives it the rank of the largest gold-producing mine in the State, as well as proving that the "old" mines in this county still offer excellent opportunities.

In October the Ideal Mining Co., a new organization, acquired the old Osborne mine near Horseshoe Bend. The camp buildings were repaired, mining equipment was installed, and unwatering and rehabilitation of the shaft started.

The Gold Dredging and Power Corporation changed its dredge from steam to electrically-driven, and conducted dredging operations for a period of seven months.

In addition to performing considerable underground work, the Mineral Mining Co. conducted a large amount of investigation on the flotation of its ores. Practically all the equipment from its mill, which was completed in October, 1926, was removed, preparatory to installing new milling methods after further financing.

The Boise Placer Co. conducted mining operations for 108 days during the high-water period, after which its mine plant and equipment were overhauled and repaired in preparation for the next year.

In December D. W. Southworth acquired a lease and option on the Mountain Chief mine, owned by the National Mining and Development Co., Ltd., and commenced repairing and reopening the principal tunnels.

BIG BEND GOLD MINING CO.

Office: Gooding. **Officers:** A. B. Slater, Pres.; C. N. Seagrave, Sec.; W. C. Cooper, Mgr., all of Gooding. **Inc.:** July 25, 1927. **Capital:** 50,000 shares; par value $1; 40,000 shares issued. **Property:** Big Ben group; 3 unpatented claims held under lease and option, Placerville dist.; New Centerville. **Development:** By 1 tunnel 260 ft. long. **Ore:** Gold.

BIG ENTERPRISE MINING CO.

Office: Pioneerville. **Officers:** S. D. Whaley, Pres., Portland, Ore.; E. Lightfoot, Sec.-Mgr., Pioneerville. **Inc.:** June 24, 1915. **Capital:** 8000 shares; par value $100; 4000 shares issued. **Property:** Noble placer; 4 unpatented claims, Pioneerville dist.; Pioneerville.

BOISE PLACER CO.

Office: Idaho City. **Officers:** Fleming Howell, Pres., Buckhannon, W. Va.; W. Guy Tetrick, Sec., Clarksburg, W. Va.; E. F. Blain, Mgr., Boise. **Inc.:** Dec. 11, 1922. **Capital:** 750,000 shares; par value $1; 203,530 shares issued. **Property:** Plowman and Woodburn groups; 300 acres, Idaho City dist.; Idaho City. **Plant:** An oil-driven 10x7 compressor, and complete mining equipment. This equipment is used for the blasting of the big boulders in the hydraulic pits; complete hydraulic mining equipment. **Ore:** Placer gold. **Men employed:** Average, 20, for period of 108 days. **Remarks:** This company is the largest producer of placer gold in Boise County, and conducts the largest hydraulic mining operation in the State. Its mining operations can be conducted during the high-water season only.

CARY OIL CO.

Office: N. 119 Washington St., Spokane, Wash. **Officers:** C. J. Hoeschen, Pres., Spokane, Wash.; James H. Cary, Sec., Charlo, Mont. **Inc.:** June 16, 1926. **Capital:** 1,000,000 shares; par value 10c; shares issued, none. **Property:** Lease and option on 160 acres patented farm land near Horseshoe Bend. **Mineral sought:** Oil and gas. **Remarks:** Company in process of disincorporation.

COIN BOND GROUP

Owner: De Witt Showers, Chicago, Ill.; Local Agent, E. F. Blain, 1601 N. 12th St., Boise. **Property:** Coin Bond group; 34 unpatented claims, Placerville dist.; Placerville. **Development:** Principally by 1 long tunnel, 875 ft. of which is opened. **Ore:** Gold, lead-silver. **Men employed:** Average, 2. **Remarks:** Annual labor only. This property was formerly owned by the Boise Basin Improvement Co., Ltd., which lost it under foreclosure proceedings.

CONSOLIDATED MINES SYNDICATE

Office: 615 Empire Bldg., Boise. **Officers:** Frank E. Johnesse, Pres.; William MacLeod, Sec., both of Boise. **Inc.:** May 6, 1924. **Capital:** 10,000 shares; no par value. On August 15, 1924, the capitalization was changed to 10,000,000 shares, $2.50 par value; and on May 2, 1925, the capitalization was decreased to 10,000,000 shares, par value $1; 2,075,796 shares issued. **Property:** Washington and Subrosa groups; 4 patented, 14 unpatented claims, Gambrinus dist.; Idaho City. **Development:** Total development, approximately 12,000 ft., the principal part of which is the main crosscut tunnel 3700 ft. long, which intersects the bottom of a vertical shaft 414 ft. deep, near the bottom of which is a winze 150 ft. deep. **Plant:** MINE: Diesel oil engine driving a 480-cu.-ft. compressor, and complete mining equipment. Saw mill, modern boarding and bunk houses, change house, and complete camp. **Ore:** Silver-gold. **Remarks:** Active development work was maintained until October, 1926, by the Monetary Metals Co., which was incorporated on March 21, 1921, with a capital stock of 1,500,000 shares, par value $1, and which has expended over $340,000 in the development of this property. Since the suspension of operations in October, 1926, the mine has remained in idleness. On January 6, 1927, the Monetary Metals Co. was merged with the Consolidated Mines Syndicate on the basis of 2 shares of stock of the former for 1 share of stock of the latter. This company also owns the Princess-Blue Ribbon group in Camas County and the Blue Jacket group in Idaho County. During

the closing months of the year the company encountered considerable difficulty on account of the resignation of all its officers and directors excepting the president and the secretary.

CROOKED RIVER MINING CO.

Office: Dayton, Ohio. **Officers:** Melvin T. Rowland, Pres.-Mgr., Nampa; N. S. Talbott, Sec., Dayton, Ohio. **Inc.:** Oct. 5, 1927. **Capital:** 2000 shares common, no par value; 2000 shares preferred, par value $100; shares issued, unknown. **Property:** Kempner Ranch placer; 1 patented, 60 unpatented claims, 1760 acres, Banner dist.; Idaho City. **Plant:** Flume-type dredge, 3-cu.-ft. buckets; this dredge is driven by two 60-h. p. Diesel engines. **Ore:** Placer gold. **Men employed:** Average, 15. **Remarks:** During the year this company constructed its dredge, at a cost of $92,000; when its construction was completed, the dredge proved to be so improperly designed and faultily constructed that its operation was impossible. The officers stated that it "resulted both in a regrettable and an expensive experience."

CURRY DITCH GOLD PLACER MINES ASSOCIATION

Office: Pioneerville. **Officers:** P. E. Hall, Jr., Pres.-Mgr., 828 54th St., Oakland, Calif.; A. N. Clark, Sec., Everett, Wash. **Inc.:** An association. **Capital:** 500,000 shares; par value unfixed; 48,693 shares issued. **Property:** 3 patented, 2 unpatented placer claims, Pioneerville dist.; Pioneerville. **Remarks:** Idle.

DIAMOND L MINING CO., LTD., OF IDAHO

Office: Pioneerville. **Officers:** Lottie Morehead, Pres.-Sec.-Mgr., Pioneerville. **Inc.:** July 1, 1918. **Capital:** 500,000 shares; par value 1 mill; 282,220 shares issued. **Property:** Buckskin group; 13 unpatented claims, Pioneerville dist.; Pioneerville. **Development:** Approximately 2700 ft. of underground workings, the most important of which are 2 tunnels, 1 900 ft. long, and the other 500 ft. long. **Ore:** Lead-silver-gold. **Men employed:** Average, 2. **Remarks:** Development work was maintained throughout the year.

EDNA MINES CO.

Office: Idaho City. **Officers:** D. J. Atkins, Pres., 124 Front St., New York City; R. Dempster, Sec., Grants Pass, Ore.; F. E. Willson, Mgr., Idaho City. **Inc.:** Aug. 9, 1926. **Capital:** 200 shares; par value $100; all shares issued. **Property:** Edna group; 1 patented, 8 unpatented claims, Banner dist.; Idaho City. **Development:** Principally by 1 tunnel 1100 ft. long, and a vertical shaft 350 ft. deep with 3 intermediate levels. **Ore:** Silver-gold. **Men employed:** Average, 3. **Remarks:** A recent organization which acquired the old Edna mine and commenced its rehabilitation.

GOLD DREDGING & POWER CORPORATION

Office: 615 Empire Bldg., Boise. **Officers:** S. K. Atkinson, Pres.-Mgr.; W. A. Buis, Sec., both of Boise. **Inc.:** Jan. 30, 1922. **Capital:** 1,500,000 shares; par value $1; 900,000 shares issued. **Property:** 142 patented, 20 unpatented claims, Placerville dist.; Centerville. **Plant:** Electrically-driven Risdon dredge, 2½-cu.-ft. buckets close-connected, wooden hull. **Ore:** Placer gold. **Men employed:** Average, 12. **Remarks:** This company's dredge was originally steam-driven; in February work was started in changing it to electrically-driven; this work was completed and dredge operations started on April 7. With the exception of one short interruption, operations were continued until December 15, at which time the dredge was shut down for the winter.

GOLDEN SEAL MINING & MILLING CO.

Office: 913 Idaho St., Boise. **Officers:** E. K. Lorimer, Pres.-Mgr.; Geo. L. Fleharty, Sec., both of Boise. **Inc.:** Oct. 28, 1924. **Capital:** 1,000,000 shares; par value 25c; 859,628 shares issued. **Property:** 12 unpatented claims, unorganized dist.; Dry Creek; Boise. **Development:** By 3 tunnels: No. 1, 385 ft. long; No. 2, 100 ft. long; No. 3, 140 ft. long. **Ore:** Lead-zinc-silver. **Men employed:** Average, 1. **Remarks:** A small amount of work was done during the summer months, and an active stock-selling campaign was maintained throughout the year.

GOLD HILL & IOWA MINES CO.

Office: 605 Eastman Bldg., Boise. **Officers:** Jess Hawley, Pres., Boise; Wendell H. Marden, Sec., Boston, Mass.; James H. Hawley, Jr., Mgr., Boise. **Inc.:** June 10, 1908. **Capital:** 200,000 shares; par value $10; 194,622 shares issued. **Property:** Gold Hill & Iowa groups; 19 patented, 26 unpatented claims, Quartzburg dist.; Quartzburg. **Development:** 600-ft. 3-compartment vertical shaft and approximately 30,000 ft. of underground workings. **Plant:** MINE: 52-h. p. hoist and 452-cu.-ft. compressor, both electrically driven. MILL: 150-ton, including crusher, rolls, Hardinge ball mill, amalgamating plates, concentrating tables, regrinding tube mill and cyaniding of concentrates in Pachuca tanks, zinc box precipitation. **Ore:** Gold. **Remarks:** This property was first located in 1863, since which time it has been in practically continuous operation with a production record of approximately $8,000,000, half of which was produced during the last 15 years. Under option to Talache Mines, Inc., which see.

HALLEY PLACER CO.

Office: Placerville. **Officers:** E. F. Blain, Mgr., 1601 N. 12th St., Boise. **Inc.:** An association. **Property:** Halley Placers; 7 unpatented placer claims, Placerville dist.; Placerville. **Remarks:** Annual labor only.

IDAHO DEVELOPMENT CO.

Office: 605 Eastman Bldg., Boise. **Officers:** Wendell H. Marden, Pres., Boston; James H. Hawley, Jr., Mgr., Boise. **Inc.:** Dec. 16, 1920. **Capital:** 1000 shares; par value $10; all shares issued. **Property:** 4 unpatented claims, Placerville dist.; Placerville.

IDAWA GOLD MINING CO.

Office: Valley City, N. Dak. **Officers:** S. A. Zimmerman, Pres.-Sec., Valley City, N. Dak.; S. M. Ballard, Mgr., Placerville. **Inc.:** Jan. 3, 1919. **Capital:** 2,000,000 shares; par value 25c; 1,228,000 shares issued. **Property:** Belshazzar group, 17 unpatented claims, Quartzburg dist.; Quartzburg. **Development:** By 5 tunnels, the principal of which are No. 4, 1200 ft. long, and No. 5, 3000 ft. long. Total development, approximately 7000 ft. **Plant:** MINE: Electrically-driven compressor; complete mining equipment and camp. MILL: 25-ton amalgamation and table-concentration. **Ore:** Gold. **Men employed:** Average, 18. **Remarks:** Active throughout the year. This is one of the principal gold-producing mines in the State, all operations being conducted through No. 4 tunnel, which is connected with the mill by an aerial tramway.

IDEAL MINING CO.

Office: 212 Boise City Natl. Bank Bldg., Boise. **Officers:** H. W. Dorman, Pres.; W. E. Sullivan, Sec.; H. P. Taylor, Mgr., all of Boise. **Inc.:** Sept. 17, 1927. **Capital:** 200,000 shares; par value $1; 150,000 shares issued. **Property:** Osborne group; 5 unpatented claims, Westview dist.; Horseshoe Bend. **Development:** Principally by 1 inclined shaft. **Plant:** Electrically-driven I-R compressor; complete mining equipment. **Ore:** Gold-silver-lead. **Men employed:** Average, 6. **Remarks:** This company is a new organization, which acquired the old Osborne mine in September and immediately commenced unwatering the shaft and rehabilitating the property.

INDEPENDENT MINES SYNDICATE

Office: Owyhee Hotel, Boise. **Officers:** Geo. H. Cochran, Pres., New York; Stanley G. Smith, Mgr., Owyhee Hotel, Boise. **Inc.:** Common Law Trust. **Capital:** 1000 shares; par value $100; 780 shares issued. **Property:** Independent group; 14 unpatented claims, Pioneerville dist.; Pioneerville. **Development:** By 3 tunnels and 2 short shafts: No. 1, 200 ft. long; No. 2, 300 ft. long; No. 3, 720 ft. long. **Ore:** Gold, lead-silver-zinc. **Men employed:** Average, 1. **Remarks:** Maintenance work only throughout the year.

IRON DYKE MINES CO.
Office: 402 Empire Bldg., Boise. **Officers:** S. T. Schreiber, Pres.-Mgr., Boise. **Inc.:** April 16, 1923. **Capital:** 150,000 shares; par value $1; 100 shares issued. **Property:** Iron Dyke group; 2 patented, 18 unpatented claims, unorganized dist.; Holcomb. **Development:** By 2 tunnels: No. 1, 25 ft. long; No. 2, 20 ft. long. **Ore:** Gold, silver-lead.

MINERAL MINING CO.
Office: Placerville. **Officers:** A. C. Gallupe, Pres.-Mgr., Placerville; C. C. Fairchild, Sec., Idaho City. **Inc.:** Feb. 6, 1920. **Capital:** 2,500,000 shares; par value 6c; 2,392,000 shares issued. **Property:** Enterprise and Smuggler groups; 12 patented, 21 unpatented claims; Enterprise group held under lease and bond from Exta Lightfoot, Pioneerville; Pioneerville dist.; Pioneerville. **Development:** Approximately 8000 ft. of underground workings. **Plant:** MINE: 25-h. p. steam-driven hoist on Smuggler group; complete mining equipment and camp. MILL: 100-ton concentrator, partly dismantled. **Ore:** Lead-silver-zinc. **Men employed:** Average, 24. **Remarks:** The mill was completed and operations started in October, 1926. As originally designed, it was impractical, so during 1927 almost all the equipment was removed preparatory to changing the flow sheet to fine grinding and flotation. In addition to the changes in the mill, a small amount of mining work was performed during the year.

MISSOURI MINING CO., LTD.
Office: Pioneerville. **Officers:** Homer E. Howard, Pres.; Ezra E. Howard, Sec., both of Pioneerville. **Inc.:** Feb. 4, 1914. **Capital:** 50,000 shares; par value $1; on June 1, 1925, capitalization was increased to 1,000,000 shares, par value $1; 50,000 shares issued. **Property:** 10 unpatented claims, Pioneerville dist.; Pioneerville. **Development:** Approximately 450 ft. of underground workings. **Ore:** Lead-silver-zinc. **Men employed:** Average, 2. **Remarks:** A small amount of work was done throughout the year.

NATIONAL HYDRAULIC MINES CO.
Office: Manitou Hotel, Boise. **Officers:** Albert E. Small, Pres., Manitou Hotel, Boise; D. E. Beatty, Sec., Boise. **Inc.:** Sept. 7, 1921. **Capital:** 1,000,000 shares; par value $1; 354,648 shares issued. **Property:** 11 unpatented placer claims, 1414 acres on Moore's Creek, Idaho City dist.; Idaho City. **Plant:** Three No. 2 and No. 1 giants; 3000 ft. of pipe line, and complete hydraulic equipment. **Remarks:** Annual labor only.

NATIONAL MINING & DEVELOPMENT CO.
Office: Placerville. **Officers:** A. C. Gallupe, Pres.; E. A. Gallupe, Sec., both of Placerville. **Inc.:** Sept. 23, 1911. **Capital:** 1,000,000 shares; par value $1; 236,540 shares issued. **Property:** Mountain Chief group; 11 unpatented claims, Quartzburg dist.; Placerville. **Development:** By 5 tunnels, the principal one of which is 2200 ft. long. **Ore:** Gold. **Remarks:** Property acquired under lease and option by D. W. Southworth in December.

OX-BOW MINING CO., LTD.
Office: 24 White Memorial Bldg., Syracuse, N. Y. **Officers:** P. R. Dishaw, Pres.; J. D. Crimmins, Sec., both of Syracuse. **Inc.:** July 10, 1925. **Capital:** 1,000,000 shares; par value $1; all shares issued. **Property:** Ox-Bow placer group, 7 unpatented claims, Summit Flat dist.; Lowman. **Ore:** Placer gold. **Remarks:** Idle throughout the year. The secretary of the company stated: "This project has for its object the recovery of the placer gold contained in about 12,000 feet of the river bed, which is laid bare by diverting the entire river through a tunnel 1200 feet long which cuts through the mountains at a point where the river forms a hairpin curve."

REID PLACERS
Officers: E. S. Robinson, Mgr., Placerville. **Property:** 23 unpatented placer claims. **Plant:** 2000 ft. of pipe line; No. 3 giant and complete hydraulic equipment. **Ore:** Placer gold. **Remarks:** Annual labor only.

ROSARIAN MINERALS & POWER CO.

Office: 341 Sonna Bldg., Boise. **Officers:** J. M. Scherzinger, Pres., Corvallis, Ore.; F. J. Hartmann, Sec., Boise. **Inc.:** Sept. 19, 1924. **Capital:** 500,000 shares; par value $1; 18 shares issued. **Property:** 11 unpatented claims; Barber. **Remarks:** This company owns the property which was made "famous" by the defunct Moore's Creek Boulder Gold Dredging Co.

TALACHE MINES, INC.

Office: Quartzburg. **Officers:** A. H. Burroughs, Jr., Pres.-Mgr.; J. M. Hector, Sec., both of Quartzburg. **Inc.:** Apr. 21, 1917, as Armstead Mines, Inc.; name changed June 8, 1922. **Capital:** 1,000,000 shares common, 600,000 shares preferred; par value $1; 983,000 shares common, 579,233 shares preferred issued. **Property:** Lease and option on property owned by Gold Hill & Iowa Mines Co., which see. **Men employed:** Average, 20. **Remarks:** In March property was acquired and operations started, the principal part of which was the unwatering of underground workings. A large amount of exploratory work was performed on the 100-ft. level, and after the mine was unwatered new equipment was installed and sinking from the lowest, or 600-ft. level, was started.

WASHOE MINING CO.

Office: 605 Eastman Bldg., Boise. **Officers:** Jess Hawley, Pres.; C. W. Mack, Sec,. both of Boise; Vivian Thorn, Mgr., Banner. **Inc.:** Dec. 16, 1911. **Capital:** 100,000 shares; par value $1; all shares issued. **Property:** Banner group; 7 patented, 15 unpatented claims, Banner dist.; Idaho City. **Development:** 2 tunnels, the principal one of which is 4000 ft. long. **Plant:** 30-ton mill, tables and flotation. **Ore:** Silver. **Remarks:** Idle.

BONNER COUNTY

Bonner constitutes an important part of the Idaho Panhandle and is one of the extreme northern counties. It is bounded on the east by the State of Montana, and on the west by the State of Washington; Boundary County adjoins it on the north, and Kootenai and Shoshone counties on the south. It contains an area of 1748 square miles and was accredited with a population of 12,957 in the 1920 census. The principal industries are lumbering, mining, stock raising, and agriculture. Although the county is recognized as one of the important mining counties of the State, the proportion of the population that is interested in mining is very small.

The county is exceptionally fortunate with respect to transportation facilities, as it is served by two State highways, lake boats, and three transcontinental railroads. Boats that can reach any point on Lake Pend d'Oreille give connection with the railroads at Sandpoint and Bayview.

Practically all the mining has been devoted to the areas adjacent to Pend d'Oreille and Priest lakes and the Clark Fork River. However, mining locations are numerous and widely scattered throughout the county. The mining history of the county dates back to the discovery of silver ores near Lakeview in 1888, which resulted in a stampede from the Coeur d'Alene district. Since that time there has always been a small amount of mining, but the county did not attract attention in recent years until the Talache mine was a proved and successful operation. The Talache has been a big factor in drawing attention to the mineral possibilities and prospecting opportunities of the county, resulting in a large increase in mining activities during the past few years.

The principal minerals are those of silver, lead, copper, zinc, and gold. These metals, and the limestone quarried near Lakeview, constitute the chief mineral resources. Silver is the most widely distributed metal and constitutes the most important part of the ores.

The discovery of high-grade lead-silver ore in 1926 near Clark Fork by the Whitedelf Mining & Development Co. was further developed in 1927, and proved to be one of the important new disclosures to be made in the State in recent years. During the year a three-mile electric transmission line was constructed, a large electrically driven compressor and new shaft-sinking equipment were installed, and new mine buildings constructed. A large amount of mine development work was done, and a substantial tonnage of ore produced and marketed, the principal part of which was taken out by lessees. The excellent manner in which this property is responding as exploration progresses has been responsible for attracting a large amount of new development work and prospecting to this section of the county.

Numerous prospectors were busy throughout the year, and a number of new companies were organized and commenced operations. The principal one of these was the Hope Mining Co., which acquired the Elsie K. mine. Additional mining equipment was installed, a large amount of development work done, and a number of carloads of high-grade lead-silver ore were shipped, some of which was taken out by lessees. In addition to these new companies, the Lawrence Consolidated Mining Co. conducted operations throughout the year, so as a whole this section of Bonner County witnessed an active and prosperous year.

The International Portland Cement Co., Ltd., at its limestone quarry near Lakeview, continues to be the largest mining operation in the county. During 1927 the mine plant and equipment were greatly enlarged. A large tonnage of rock was mined and shipped to Spokane, Wash., where it is used in making Portland cement. This company's mine and plant are the most important of their kind in the State.

Another important enterprise in the Lakeview district is that of the Idaho Hewer Mines, Inc. Throughout the year this company maintained active development work with a large crew of men. The work consisted of sinking the shaft to the 900-foot level, and performing over 2000 feet of drifting on intermediate levels. Three substantial bodies of ore were disclosed, and at the close of the year the mine was being put into shape for active production.

Prospectors and small development companies in the Priest Lake district were active throughout the year, the principal ones being the Kaniksu Mining Co.; P. F. Vandever and C. W. Beardmore at the Grey Goose; and Joseph Saccomanno at the Silver King. Many others increased their usual yearly work, and there continues to be an active search for new mines.

AMERICAN EAGLE MINING CO.

Office: Sandpoint. **Officers:** R. A. Martin, Pres., Martinsdale, Mont.; H. L. Thomason, Sec.; James A. Evans, Mgr., both of Sandpoint. **Inc.:** May 28, 1919. **Capital:** 10,000 shares; par value $100; 608 shares issued. **Property:** American Eagle group; 7 unpatented claims, Pend d'Oreille dist., Sandpoint. **Development:** 1 tunnel 1750 ft. long, which is principally a drift on the vein. **Ore:** Lead-silver. **Remarks:** A small amount of development work during the year.

ARGUS MINING CO.

Office: Cleveland, Ohio. **Officers:** Daniel Myers, Pres., Athletic Club, Cleveland, Ohio. **Inc.:** April 20, 1917. **Capital:** 800,000 shares, par value $1; 500,000 shares issued. **Property:** Argus group; 5 unpatented claims, Lakeview dist.; Lakeview. **Development:** 4 tunnels, totaling approximately 800 ft. in length. **Ore:** Lead-silver. **Remarks:** Annual labor only.

AUXER GOLD MINES CO.

Office: Hope. **Officers:** James Campbell, Pres.-Mgr., Hope. **Inc.:** June 24, 1920. **Capital:** 500,000 shares; par value $1; 335,000 shares issued. **Property:** Boston group; 9 unpatented claims, Pend d'Oreille dist.; Hope. **Development:** Approximately 1300 ft. of underground workings, the principal one of which is a tunnel 700 ft. long. **Plant:** Steam-driven 6x7 I-R compressor. **Ore:** Gold. **Remarks:** Principal tunnel extended about 100 ft. during the year.

BARD MINING & MILLING CO.

Office: 517 Ziegler Bldg., Spokane, Wash. **Officers:** Mrs. R. M. B. Mobbs, Pres.; Fred C. Daeufer, Sec.-Mgr., both of Spokane. **Inc.:** Nov. 23, 1927. **Capital:** 2,000,000 shares; par value $1; 490,000 shares issued. **Property:** Bard group; 8 patented, 25 unpatented claims in Bonner, Shoshone, and Kootenai counties, unorganized dist.; Lakeview. **Development:** By 3 short tunnels. **Ore:** Lead-silver-copper. **Remarks:** A small amount of development work done during the latter part of the year. The company encountered internal difficulties through high-pressure methods being used in the sale of its stock.

BONNER MINING CO.

Office: Oakesdale, Wash. **Officers:** H. E. Kendall, Pres.; J. A. Henderson, Sec., both of Oakesdale, Wash. **Inc.:** Form of organization unknown. **Capital:** 150,000 shares; par value $1; shares issued, unknown. **Property:** Bonner group; 2 patented, 9 unpatented claims, Pend d'Oreille dist.; Hope. **Development:** By 2 tunnels: No. 1, 1500 ft. long; No. 2, 400 ft. long. **Plant:** Small water-driven compressor. **Ore:** Lead-silver. **Men employed:** Average, 3. **Remarks:** A small amount of development work during the summer months, funds for which were derived from stock assessments.

BRITANNIA MINING CO.

Office: Priest River. **Officers:** A. O. Kendall, Pres., Oregon City, Ore.; M. W. McLean, Sec.-Mgr., Priest River. **Inc.:** Nov. 8, 1912. **Capital:** 1,000,000 shares; par value $1; 770,000 shares issued. **Property:** Britannia group: 8 unpatented claims, Priest Lake dist.; Priest River. **Development:** Approximately 900 ft. of underground workings. **Ore:** Gold. **Remarks:** Under development by the owners.

CARPIE MINING CO.

Office: Cabinet, Idaho. **Officers:** J. W. Powell, Pres.-Mgr.; Cabinet. **Inc.:** An association. **Capital:** 750,000 shares; par value $1; 370,000 shares issued. **Property:** Carpie group; 4 unpatented claims, Pend d'Oreille dist.; Cabinet. **Development:** By a vertical shaft 300 ft. deep, in which are 5 levels. **Plant:** Steam-driven hoist and small Sullivan compressor. **Ore:** Copper. **Remarks:** Annual labor only since April, 1921.

CLARINDA COPPER MINING CO.

Office: 50 Broad St., New York City. **Officers:** John P. Delaney, Pres., New York City; Compton I. White, Sec.-Mgr., Clark Fork. **Inc.:** July 30, 1920. **Capital:** 1,500,000 shares; par value $1; 335,527 shares issued. **Property:** 9 unpatented claims, Pend d'Oreille dist.; Clark Fork. **Development:** By 5 tunnels, the longest of which is No. 5, totaling 2100 ft. in length. **Plant:** Electrically-driven compressor and complete mining equipment. **Ore:** Copper. **Remarks:** Idle.

COPPER GIANT MINING CO.

Office: Clark Fork. **Officers:** J. B. Whitcomb, Pres.; Miss H. F. Thibadeau, Sec.-Treas., both of Clark Fork. **Inc.:** Oct. 10, 1908. **Capital:** 1,500,000 shares; par value $1; 1,200,000 shares issued. **Property:** Copper Giant group; 5 patented claims, Pend d'Oreille dist.; Clark Fork. **Development:** Approximately 1300 ft. of underground workings. **Plant:** 10x10 electrically-driven I-R compressor. **Ore:** Copper-gold. **Remarks:** Idle throughout the year.

EMPIRE TUNGSTEN MINING CO.

Office: 1911 Sherman Ave., Evanston, Ill. **Officers:** Frank G. Forbes, Pres.; George S. Smith, Sec., both of Evanston, Ill. **Inc.:** March 20, 1914. **Capital:** 1,500,000 shares; par value 1c; all shares issued. **Property:** Rainbow; 1 patented claim, Lakeview dist.; Lakeview.

GOAT MOUNTAIN MINING CO.

Office: 414 Ziegler Blk., Spokane, Wash. **Officers:** E. C. Aschenbrenner, Pres.; Chas. Jans, Sec., both of Endicott, Wash.; J. Teague, Mgr., Clark Fork. **Inc.:** April 26, 1926. **Capital:** 1,500,000 shares; par value 10c; 500,000 shares issued. **Property:** Goat Mountain group, 11 unpatented claims, Pend d'Oreille dist.; Clark Fork. **Development:** By 2 tunnels: No. 1, 200 ft. long; No. 2, 814 ft. long. **Ore:** Lead-silver. **Remarks:** Idle.

GREEN MONARCH MINING & MILLING CO., LTD.

Office: Sandpoint. **Officers:** L. H. Jeannot, Pres.-Mgr., Dixon, Mont.; Peter Johnson, Sec., Sandpoint. **Inc.:** July 3, 1905. Charter forfeited Nov. 30, 1927. **Capital:** 1,500,000 shares; par value $1; 1,408,666 shares issued. **Property:** 11 unpatented claims, Pend d'Oreille dist.; Hope.

HAYO MINING & MILLING CO.

Office: Priest River. **Officers:** John Hamberg, Pres.-Mgr.; W. R. Hamberg, Sec., both of Priest River. **Inc.:** June 21, 1923. **Capital:** 3,000,000 shares; par value 10c; no shares issued. **Property:** 6 unpatented claims, Priest Lake dist.; Priest River. **Development:** By 2 tunnels, with a total development of 90 ft. **Ore:** Lead-silver. **Remarks:** Annual labor only.

HOPE MINING CO.

Office: Clark Fork. **Officers:** O. A. Holte, Pres., Coeur d'Alene; C. C. Jensen, Sec.; S. W. Purdy, Mgr., both of Clark Fork. **Inc.:** Nov. 19, 1927. **Capital:** 1,500,000 shares; par value 10c; 1,200,000 shares issued. **Property:** Elsie K. group; 2 unpatented claims and 320 acres patented farm land, Pend d'Oreille dist.; Clark Fork. **Development:** By 5 tunnels, with a total development of approximately 1500 ft. **Plant:** Gas-driven 6x6 compressor, complete mining equipment and camp. **Ore:** Lead-silver. **Men employed:** Average, 10. **Remarks:** A large tonnage of ore was produced and marketed during the year by lessees. In the closing months of the year additional mine equipment was installed and work started on a long lower tunnel.

IDAHO GOOD HOPE MINING CO., LTD.

Office: Grand Forks, N. D. **Officers:** G. L. Elkin, Pres., Mayville, N. D.; Samuel Torgerson, Sec., Grand Forks, N. D. **Inc.:** April 21, 1910. **Capital:** 2,500,000 shares; par value $1; 1,671,190 shares issued. **Property:** 9 patented claims; Pend d'Oreille dist.; Hope. **Remarks:** Idle for 14 years.

IDAHO HEWER MINES, INC.

Office: 502 Columbia Bldg., Spokane, Wash. **Officers:** D. M. Drumheller, Pres.-Mgr.; H. O. Kent., Sec., both of Spokane. **Inc.:** May 26, 1923, as Hewer Mining Co.; reorganized on April 10, 1926. **Capital:** 2,000,000 shares; par value 1c; 1,553,978 shares issued. **Property:** Venzwela group; 4 patented, 11 unpatented claims; 8 of which are held under lease and option. **Development:** Total development approximately 10,000 ft.; principally by 1 tunnel 2200 ft. long, in which is an inclined shaft 900 ft long. **Plant:** MINE: I-R gas-driven compressor; 8½x10 Ottumwa hoist and complete mining equipment. MILL: 100-ton concentrator, fine grinding and flotation; driven by a semi-Deisel oil engine. **Ore:** Silver-lead-zinc. **Men employed:** Average, 23. **Remarks:** Active development work was maintained throughout the year, the principal part of which consisted in sinking to a greater depth the inclined shaft, from which intermediate drifts were run on the vein. The shaft was extended approximately 300 ft. deeper, and about 2000 ft. of drifting was performed. The mill was operated a few days and concentrates were marketed. The money expended in development work was derived from stock assessments which were levied at the rate of ½c per share per month.

INTERNATIONAL PORTLAND CEMENT CO., LTD.

Office: 1124 Old National Bank Bldg., Spokane Wash. **Officers:** R. K. Neill, Pres., Spokane, Wash.; John P. Hartman, Sec., Seattle, Wash. **Inc.:** Filed in Idaho, September 9, 1911. **Capital:** 30,000 shares; par value $100; 27,233 shares issued. **Property:** 8 patented, 1 unpatented claim, 790 acres, near Bayview. **Development:** Open quarry. **Plant:** 100 cu. ft. compressor, driven by Deisel engine; steam-shovel; gas-driven shovel; crushing plant; complete mining equipment; machine shops, buildings, and mine camp. **Ore:** Limestone. **Men employed:** Average, 48. **Remarks:** This company mines all of the limestone used in its cement-manufacturing plant near Spokane, Wash. The quarry was operated throughout the year and a large tonnage of rock was mined. It is the largest operation of its kind in the State.

KANIKSU MINING CO.

Office: 302 Paulsen Bldg., Spokane, Wash. **Officers:** J. W. Lloyd, Pres.; Dr. Earl H. Current, Sec., both of Spokane, Wash. **Inc.:** Sept. 16, 1922. **Capital:** 100,000 shares; par value $1; 110,719 shares issued. **Property:** Wood Rat group; 11 unpatented claims, Priest Lake dist.; Priest River. **Development:** By a vertical shaft 350 ft. deep. **Plant:** Steam-driven hoist and complete hand-mining equipment. **Ore:** Lead-silver. **Men employed:** Average, 5. **Remarks:** Active development work throughout the year, the principal part of which was drifting on the 200-ft. and 300-ft. levels in the shaft.

KEEP COOL MINING CO.

Office: P. O. Box 2181, Spokane, Wash. **Officers:** T. S. Griffith, Pres.; R. Insinger, Sec., both of Spokane, Wash. **Inc.:** June 16, 1922. **Capital:** 1,500,000 shares; par value 5c; 1,018,167 shares issued. **Property:** Keep Cool group; 4 patented claims, Lakeview dist.; Lakeview. **Ore:** Lead-silver.

LAWRENCE CONSOLIDATED MINING CO.

Office: Clark Fork. **Officers:** Rees Bungay, Pres., Spokane, Wash.; L. J. Reed, Sec.; Joseph Reed, Mgr., both of Clark Fork. **Inc.:** March 3, 1923. **Capital:** 1,500,000 shares; par value 1c; 980,200 shares issued. **Property:** Lawrence group; 12 unpatented claims, Pend d'Oreille dist.; Clark Fork. **Development:** 5 tunnels, the principal one being 1240 ft. long; approximate total development 4800 ft. **Plant:** MINE: Water-driven compressor; complete mining equipment. MILL: 50-ton concentrator; crushers, 2 sets rolls, 2 jigs, 3 tables. **Ore:** Lead-silver. **Men employed:** Average, 3. **Remarks:** This company is a reorganization of the Lawrence Mining & Milling Co., Ltd. The mine was operated throughout the year and a small tonnage of high grade ore was produced and marketed. The money expended was derived from 5 stock assessments of 1 mill per share each.

LUCKY ABE MINING CO.

Office: Priest River. **Officers:** Abe Johnson, Pres., Opportunity, Wash.; F. F. Nelson, Sec., Priest River. **Inc.:** March 1, 1916. **Capital:** 1,000,000 shares; par value 10c; approximately 77,000 shares issued. **Property:** Lucky Abe group; 6 unpatented claims, Priest Lake dist.; Coolin. **Development:** By 2 tunnels, each of which is approximately 175 ft. long. **Ore:** Lead-silver. **Remarks:** Annual labor only.

LUCKY STRIKE MINING CO.

Office: Clark Fork. **Officers:** W. W. Webb, Pres.-Mgr., Clark Fork. **Inc.:** Oct. 25, 1913. **Capital:** 1,000,000 shares; par value $1; 762,324 shares issued. **Property:** Lucky Strike group; 7 unpatented claims, Pend d'Oreille dist.; Clark Fork. **Development:** 2 tunnels: No. 1, 55 ft. long; No. 2, 250 ft. long. **Plant:** Gardner-Ricks gas-driven compressor. **Remarks:** Idle.

MAJOR LODE MINING CO.

Office: Priest River. **Officers:** John Hamberg, Pres.-Mgr.; Philip Naccarato, Sec., both of Priest River. **Inc.:** An association. **Property:** Major Lode group, 6 unpatented claims, Priest Lake dist.; Priest River. **Development:** By 4 short tunnels. **Ore:** Lead-silver. **Remarks:** Annual labor.

OPPORTUNITY MINING CO.

Office: Sagle. **Officers:** T. J. Peet, Pres., Sandpoint; A. A. Heskestad, Sec., Sagle. **Inc.:** Aug. 18, 1919. **Capital:** 1,500,000 shares; par value 5c; 598,854 shares issued. **Property:** 6 unpatented claims, Pend d'Oreille dist.; Sagle. **Development:** Approximately 1700 ft. of underground workings, consisting of 6 tunnels and 5 shafts. **Plant:** Steam-driven compressor, complete mining equipment and camp. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** Active development work throughout the year, the funds for which were derived from stock assessments.

SILVER MOUNTAIN MINING CO.

Office: Sandpoint. **Officers:** John T. Elsasser, Mgr., Sandpoint. **Inc.:** July 24, 1909. **Capital:** 1,500,000 shares; par value $1; all shares issued. **Property:** Silver Mountain group; 6 unpatented claims, Priest Lake dist.; Priest River. **Development:** 2 tunnels: No. 1, 400 ft. long; No. 2, 625 ft. long. **Ore:** Lead-silver. **Remarks:** Annual labor only.

SILVER STAR MINING CO., LTD.

Officers: M. M. Shalz, Pres.-Mgr.; Fred Williams, Sec., both of Route 1, Sagle. **Inc.:** Jan. 19, 1927. **Capital:** 2500 shares; par value $10; 886 shares issued. **Property:** Silver Star mine; 1 unpatented claim and 140 acres patented land, Pend d'Oreille dist.; Cocolalla. **Development:** By 1 tunnel 100 ft. long. **Ore:** Lead-silver-zinc. **Men employed:** Average, 2. **Remarks:** A small amount of work during the year.

TALACHE MINES, INC.

Office: Talache. **Officers:** A. H. Burroughs, Jr., Pres.-Mgr.; J. M. Hector, Sec.; both of Quartzburg. **Inc.:** April 21, 1917, as Armstead Mines, Inc.; name changed June 8, 1922. **Capital:** 1,000,000 shares common, 600,000 shares preferred; par value $1; 983,000 shares common, 579,233 shares preferred issued. **Property:** Armstead mine; 18 patented, 44 unpatented claims, Pend d'Oreille dist.; Talache. **Development:** Approximately 34,591 ft. of underground workings, the principal of which are a main haulage tunnel, 3900 ft. long, the main inclined raise 916 ft. long and an inclined shaft 200 ft. long. **Plant:** MINE: 9x10 Hendre-Bolthoff electrically-driven geared hoist; 1574 cu. ft., 2 stage I-R type Pre-2 compressor, electrically driven; haulage, G. E. 4-ton storage battery locomotive; buildings, 44 room hotel, 24 residences, compressor house, blacksmith shop, warehouse, cook house, store, dry room and office. MILL: 150-ton flotation, 2 stage crushing to ½ in. fine grinding to 80 mesh, electrically driven. **Ore:** Silver. **Remarks:** Operations were suspended in October, 1926. In March, 1927, the famous Gold Hill & Iowa mine at Quartzburg, Boise County, was acquired and operations were transferred to that mine, which see.

WHITEDELF MINING & DEVELOPMENT CO.

Officers: John P. Delaney, Pres., 50 Broad St., New York; Compton I. White, Mgr., Clark Fork. **Inc.:** March 17, 1926. **Capital:** 100,000 shares, par value $1; 65,000 shares issued. **Property:** 160 acres of patented land, Pend d'Oreille dist.; Clark Fork. **Development:** Principally by 3 tunnels, with a total of over 2500 feet. **Plant:** Electrically-driven I-R compressor, complete mining equipment. **Ore:** Lead-silver. **Men employed:** Average, 20. **Remarks:** In addition to the work performed by the company, part of the mine was under operation by lessees. A large tonnage of high-grade lead-silver ore was produced and marketed; electric power-line constructed from Clark Fork, and complete new mining equipment installed. The discovery of this mine was one of the principal new discoveries during 1926. Its remarkable production record has resulted in attracting much attention and new development work to the Clark Fork section.

BONNEVILLE COUNTY

Bonneville County is bounded on the south by Caribou and Bingham counties, on the west by Bingham County, on the north by Jefferson, Madison and Teton counties, and on the east by the State of Wyoming. It is one of the principal, as well as one of the largest, southeastern counties; and has an area of 1904 square miles, and population of 17,501 at the time of the 1920 census. The larger part of the population is in the Snake River valley, which occupies all of the western part of the county. The southeastern part, which is occupied by the Caribou Range of the Snake River Mountains, is drained by the South Fork of the Snake River and its tributaries. It is primarily an agricultural county and is noted for its potato and sugar-beet industries, particularly potatoes, as it is one of the largest potato shipping points in the United States. Idaho Falls, the largest town, and civic center of the Upper Snake River valley, is the county seat.

Although recognized only as an agricultural community, this county was once the scene of many active mining operations. This was during the gold rush in the Mt. Pisgah, or Caribou, district at the time placer gold was discovered on McCoy and Gray's creeks. These placers produced a creditable amount of gold, and subsequently a few lode deposits were discovered and exploited. In late years a small dredge was constructed, but this and the deep mines are now idle and the only gold produced is from a few small placer operations.

The principal mineral resources of Bonneville County are gold, phosphate rock, copper, silver, and coal. Many structures favorable to the accumulation of petroleum in commercial quantity are found throughout the southern and eastern parts of the county.

The extensive phosphate beds of southeastern Idaho are exposed over a large area. These, and possibly petroleum, will eventually add to the county's prosperity and put it into the list of important mining counties.

IDAHO GOLD MINING CO.

Office: 319 Dooly Block, Salt Lake City, Utah. **Officers:** Chas. C. Dey, Pres.; W. A. Wilson, Sec.-Mgr., both of Salt Lake City, Utah. **Inc.:** April 19, 1917. **Capital:** 150,000 shares; par value 10c; 130,026 shares issued. **Property:** Robinson group; 2 patented claims, Mt. Pisgah dist.; Gray. **Ore:** Gold. **Remarks:** Idle for many years.

BOUNDARY COUNTY

Boundary County is bounded on the north by the Dominion of Canada, on the east by the State of Montana, on the west by the State of Washington, and on the south by Bonner County. Its principal area comprises the drainage basins of the Moyie River, which flows in a southerly direction, and the Kootenai River, which flows northerly from Bonners Ferry, the county seat and principal town. It has a total area of 1276 square miles, and was accredited with a population of 4474 in the 1920 census. The principal industries are lumbering, farming, and mining.

The county is served by two transcontinental railroads, the Great Northern, with its branch line from Bonners Ferry to Porthill, on the Canadian border, and the Spokane International; by the North and South Highway, with an easterly outlet from Bonners Ferry; and by a system of county roads which extend into the different sections along the main stream valleys.

The principal mineral resources are lead, silver, gold, copper, zinc, tungsten, and molybdenum. These metals are widely distributed, and a few of the deposits have been partially developed. Heavy overburden, dense overgrowth, and limited accessibility have retarded prospecting, discovery, and development. The many favorable areas and wide diversity of mineralization make this county an exceptionally favorable field for the prospector and the small development company.

The year 1927 witnessed little improvement in this county. No new ore discoveries were made, the operating companies did not expand their work, and no new enterprises were started. The Continental mine at Porthill, owned by the Idaho Continental Mining Co., was operated throughout the year by the Idaho Continental Co. On an average, about 90 men were continuously employed, and a large tonnage was produced and marketed. This mine is one of the largest lead producers in the State and its continuous operation and output are big factors in the prosperity of the county.

The Leonia Gold Mining Co., which is a reorganization of the Idaho Gold & Ruby Mining Co., maintained a payroll of approximately five men during the year, and performed considerable new work, for which the money was derived from stock assessments.

The Brush Lake Mines Co., the Golden Sceptre Mining Co., Ltd., the Moyie Gold-Copper M. & M. Co., Ltd., and the International Molybdenum Co. expanded their development operations over those of the previous year.

BRUSH LAKE MINES CO.

Office: 412 Ziegler Block, Spokane, Wash. **Officers:** J. W. Reid, Pres., Bonners Ferry; David Emley, Sec., Coolin. **Inc.:** Aug. 6, 1921. **Capital:** 2,000,000 shares; par value 10c; 1,386,682 shares issued. **Property:** Bethlehem group; 7 unpatented claims, Moyie Yaak dist.; Bonners Ferry. **Development:** Approximately 1200 ft. of underground workings. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** Property under development during part of the year. All mine buildings, excepting a small office building, were destroyed by fire.

COPPER FALLS MINING CO.

Office: Eastport. **Officers:** Gus Kallman, Pres.-Mgr., Gem; Spencer Lewis, Sec.-Treas., Eastport. **Inc.:** March 30, 1911. **Capital:** 1,000,000 shares; par value $1; 669,772 shares issued. **Property:** Copper Falls group; 5 unpatented claims, Moyie Yaak dist.; Addie. **Development:** 2 tunnels: No. 1, 240 ft. long; No. 2, 600 ft. long; 1 vertical shaft, 45 ft. deep. Total development, approximately 1185 ft. **Ore:** Lead-silver. **Remarks:** Annual labor only.

CYNIDE GOLD MINING CO.

Office: Bonners Ferry. **Officers:** H. S. Robinson, Pres., Whitefish, Mont.; Geo. R. Causton, Sec.-Mgr., Bonners Ferry. **Inc.:** Jan. 21, 1919. **Capital:** 3,500,000 shares; par value $1; 1,870,010 shares issued. **Property:** Buckhorn group; 13 unpatented claims, Moyie Yaak dist.; Bonners Ferry. **Development:** By 4 tunnels: Sand, 1180 ft.; Lower Keystone, 980 ft.; Upper Keystone, 350 ft.; Buckhorn, 1200 ft. Total development, approxi-

mately 5000 ft. **Plant:** MINE: 2 gas-driven C-P compressors; complete mining equipment and camp. MILL: 200-ton cyanide, including fine grinding. **Men employed:** 1 watchman. **Remarks:** Annual labor only.

GOLDEN SCEPTRE MINING CO., LTD.

Office: E. 245 Sprague Ave., Spokane, Wash. **Officers:** C. F. Halvorsen, Pres., E. 1001 Liberty Ave.; O. L. Elvigen, Sec., both of Spokane, Wash. **Inc.:** Aug. 30, 1909. **Capital:** 1,500,000 shares; par value 50c; 614,218 shares issued. **Property:** Golden Sceptre group; 7 unpatented claims, Porthill dist.; Porthill. **Development:** Principally by 1 tunnel 1500 ft. long. **Plant:** Gas-driven compressor and complete mining equipment. **Ore:** Copper-gold. **Men employed:** Average, 2. **Remarks:** 125 feet of tunnel were completed under contract during the year.

HOLLINGER GOLD MINES CO., LTD.

Office: Bonners Ferry. **Officers:** T. J. Hollinger, Pres.-Mgr., 8012 Dayton, N., Seattle; Geo. P. Meyers, Sec., Bonners Ferry. **Inc.:** Feb. 11, 1925. **Capital:** 2000 shares; par value $100; 371 shares issued. **Property:** Matterhorn group; 3 unpatented claims, Moyie Yaak dist.; Addie. **Ore:** Lead-silver. **Remarks:** Annual labor only.

IDAHO CONTINENTAL CO., THE

Office: 1015 Paulsen Bldg., Spokane, Wash. **Officers:** A. Klockmann, Pres.-Mgr.; Richard Schacht, Sec., both of Spokane, Wash. **Inc.:** Jan. 11, 1910. **Capital:** 1,500,000 shares; par value $1; all shares issued. **Property:** 15 patented, 5 unpatented claims, Porthill dist.; Klockmann. "The company owns by lease and exchange of shares with Idaho Continental Mining Co., the Continental, Jasper, Blue Joe, Volcanic, Morning Star, Evening Star, and outright all others." **Development:** Approximately 15,118 ft. of underground workings consisting principally of 5 tunnels: No. 1, 250 ft. long; No. 2, 100 ft. long; No. 3, 750 ft. long; No. 4, 1800 ft. long; No. 5, 2653 ft. long. **Plant:** MINE: 1200-cu.-ft. I-R Imperial type 10 compressor; Leyner drill sharpener, and complete mining equipment; 1600 ft. aerial tram between mine and mill. MILL: 250-ton concentrator; 10x20 crusher; conveyor belt; 4 double 4-compartment Hartz jigs; 3 rolls 12x20; drag classifier; 5 Wilfley tables; Hardinge ball mill; 4 Frue vanners; flotation; hydroelectric power plant. **Ore:** Lead-silver. **Men employed:** Average, 89. **Remarks:** This is one of the largest lead-producing mines in the State. Capacity production and an active mine development campaign were maintained throughout the year.

IDAHO CONTINENTAL MINING CO.

Office: 805 Sellwood Bldg., Duluth, Minn. **Officers:** Henry Turrish, Pres.; Henry Maxeiner, Sec., both of Duluth, Minn. **Inc.:** Dec. 12, 1902. **Capital:** 1,500,000 shares; par value $1; 1,200,000 shares issued. **Property:** Continental group; 7 patented, 1 unpatented claim, namely: Continental, Jasper, Blue Joe, Volcanic, Morning Star, Evening Star, and Aurora; Porthill dist.; Klockmann. **Remarks:** This is the same property as that operated by the Idaho Continental Co.

IDAHO LEAD-SILVER MINES CO.

Office: 1211 Winona Blvd., Spokane, Wash. **Officers:** J. A. Tormey, Pres.; E. B. Muna, Sec., both of Spokane. **Inc.:** Jan. 28, 1924. Charter forfeited Dec. 1, 1926. **Capital:** 999,000 shares; par value 10c; 400,000 shares issued. **Property:** 5 unpatented claims, Moyie Yaak dist.; Bonners Ferry. **Development:** By 1 short tunnel and a vertical shaft 325 ft. deep. **Ore:** Lead-silver. **Remarks:** Annual labor only.

INTERNATIONAL MOLYBDENUM CO.

Office: Porthill. **Officers:** H. A. French, Pres.; P. W. Stas, Sec., both of Porthill. **Inc.:** Feb. 3, 1926. **Capital:** 25,000 shares; par value $1; 12,453 shares issued. **Property:** Hottentot group; 4 unpatented claims, Porthill dist.; Porthill. **Development:** 2 tunnels with a total length of 142 ft., and a number of open cuts. **Ore:** Molybdenum. **Men employed:** Average, 2. **Remarks:** Active prospecting work was maintained for a period of 3 months.

LEONIA GOLD MINING CO.

Office: Leonia. **Officers:** J. S. Hutchinson, Pres., 207 City Hall, Portland, Ore.; M. E. Carson, Sec., Leonia. **Inc.:** Dec. 11, 1924. **Capital:** 1,000,000 shares; par value $1; 701,117 shares issued. **Property:** 66 placer and lode claims, approximately 2400 acres, Moyie Yaak dist.; Leonia. **Development:** 5-mile, 200 sec.-ft. capacity canal, giving a working head of approximately 430 ft.; in 2 sections, upper 3 miles long, lower 2 miles, with a difference in elevation of 210 ft. Water conducted from upper to lower through two 22-inch steel pipes. about 20 miles of road, 5 of which were very heavy construction. Lode claims developed by numerous cuts and tunnels. **Plant:** Approximately 3000 ft. steel pipe, one 8-inch giant, operating under a 430-ft. head and two 5-inch giants, operating under 130-ft. head; bed rock flume and spillway 300 ft. long on a grade of 10 inches in 12 ft.; in 3 sections, spillway 12 ft. wide by 8 ft. deep; one flume 6 ft. wide and one 12 ft wide, both 8 ft. deep. Concentrates from flume discharge into cement lined tank of approximately 15,000-ton capacity from which they are elevated into cleaning plant on top of flume. Cleaning plant consists of Ogden tables, classifiers and specially designed riffles. Complete machine shop, sawmill, planing mill, overhead cable system operated by steam; tractor haulage; complete company buildings and 35 individual homes for the men. **Ore:** Principally placer gold. **Men employed:** Average, 6. **Remarks:** This company is a reorganization of the Idaho Gold & Ruby Mining Co. During the year a small amount of work was performed on the lode claims, the funds for which were derived from stock assessments. Practically all of the placer-mining equipment, including concentrator, was destroyed by a slide.

METALS MINING CO.

Office: Bonners Ferry. **Officers:** A. Strom, Pres.; A. T. Aronson, Sec.; S. A. Anderson, Mgr., all of Bonners Ferry. **Inc.:** June 24, 1920. **Capital:** 1,000,000 shares; par value 1c; shares issued, unknown. **Property:** 8 unpatented claims, Moyie Yaak dist.; Bonners Ferry. **Development:** By 4 short tunnels, and 1 vertical shaft 90 ft. deep. **Plant:** Gas-driven hoist. **Ore:** Lead-silver. **Remarks:** Annual labor only.

MOYIE GOLD COPPER MINING & MILLING CO., LTD.

Office: Bonners Ferry. **Officers:** Geo. E. Crocker, Pres.; H. J. McNally, Sec.; A. J. Kent, Mgr., all of Bonners Ferry. **Inc.:** Sept. 16, 1911. **Capital:** 1,250,000 shares; par value $1; 950,000 shares issued. **Property:** Queen and Damon groups; 12 unpatented claims, Moyie Yaak dist.; Bonners Ferry. **Development:** 5 tunnels and 2 shafts, approximately 950 ft. **Ore:** Lead-silver. **Remarks:** Annual labor only.

BUTTE COUNTY

Butte is one of the south-central counties, being bounded by Lemhi, Custer, Blaine, Bingham, Jefferson, and Clark counties. The Big and Little Lost rivers flow in a southerly direction across the county, and the lower valleys of these rivers constitute the larger part of its area of 2048 square miles. Arco, situated near the lower end of Big Lost River valley, is the largest town and the county seat. It is primarily an agricultural and stock-raising community, although its mining industry is gaining recognition and importance. The publicity given and the travel attracted to the new national monument, the Craters of the Moon, which is located in this county, have widely advertised the resources and scenic attractions of the State.

Two State highways have been designated and partly constructed, the Lost River Highway, which extends from Blackfoot to Challis and passes through Arco and Big Lost River valley, and the Idaho Central Highway from Hailey to Dubois, which serves the Craters of the Moon. The county is served by the Blackfoot-Mackay branch of the O. S. L. Railroad.

The principal mineral resources are lead, silver, zinc, gold, tungsten, manganese, limestone, and marble, the high-grade lead-silver ores being the most important, as they are found in all the mining districts of the county. The other metals occur in sufficient extent to be of commercial importance.

Butte is one of the principal lead-silver producing counties in southern Idaho, yet its diversified mineral resources and favorable geological conditions are such that it warrants more extensive development and exploration than it has been receiving during the past few years. However, the county witnessed a large increase in lead-silver production and a small increase in new activities during 1927, as compared with the previous year.

The Wilbert Mining Co., Ltd., which was the fourth largest lead-silver producing mine in southern Idaho during 1927, maintained production throughout the year. The largest part of its production was derived from a depth of 1200 feet on the vein. This company also performed a large amount of new development work. Its mine is in the Dome district, 42 miles northeast of Arco. The Badger Mines Co. was active throughout the year; and Lew Johnson installed a small gas-driven compressor at his property, preparatory to driving a 900-foot tunnel. Both of these properties are near the Wilbert mine.

MINE CAMP AND MILL: WILBERT MINING CO., LTD.

The Horn Silver Consolidated Mines Co., controlled by the Dahle brothers, who perform all work done by this company, extended its crosscut tunnel 1200 feet during the year. These men are deserving of success for their hard work and the intelligent manner in which they are developing their mine, which is located in Lava Creek district. Others who were active in this district throughout the year were two new companies whose organization is unknown, also P. J. McGinniss at his Silver Bell group, and the Butte Antelope Mining Co. at the Foot Wall mine on Antelope Creek.

AMALGAMATED SUGAR CO.

Office: Eccles Bldg., Ogden, Utah. **Officers:** A. W. Ivins, Pres., Salt Lake City; Fera S. Young, Sec.; J. M. Eccles, Mgr., both of Ogden, Utah. **Inc.:** Filed in Idaho Apr. 24, 1915. **Capital:** 724,624 common, 50,000 shares preferred stock; no par value; all shares issued. **Property:** 4 patented claims, Arco dist.; Arco. **Plant:** 1 electrically-driven 130-cu.-ft. compressor; 3200-ft. gravity tramway and complete mining and quarrying equipment. **Mineral:** Lime rock. **Remarks:** Idle.

BADGER MINES CO.

Office: Rexburg. **Officers:** S. H. Abbott, Pres.-Mgr.; Fay Abbott, Sec., both of Rexburg. **Inc.:** June 8, 1925. **Capital:** 1,000,000 shares; par value 3c; all shares issued. **Property:** Badger group; 8 unpatented claims, Dome dist.; Howe; held under lease and option. **Development:** Principally by 1 tunnel, 1535 ft. in length. **Plant:** MINE: Gas-driven compressor and complete mining equipment. MILL: 25-ton concentrator, driven by gas engine. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** Active mining operations were conducted throughout the year.

BUTTE ANTELOPE MINING CO.

Office: 407 Ness Bldg., Salt Lake City, Utah. **Officers:** George G. Armstrong, Pres.; J. M. Hamilton, Sec., both of Salt Lake City; F. F. Williams, Mgr., Woods Cross, Utah. **Inc.:** Sept. 8, 1927. **Capital:** 1,000,000 shares; par value 5c; 425,000 shares issued. **Property:** Foot Wall group; 14 unpatented claims, Lava Creek dist.; Moore; held under lease and option from Ardell Gamett. **Development:** By 1 tunnel 200 ft. long. **Ore:** Lead-silver. **Remarks:** Small amount of work under contract during the year.

HORN SILVER CONSOLIDATED MINES CO.

Office: Arco. **Officers:** Edward Dahle, Pres.-Mgr.; M. M. Dahle, Sec., both of Arco. **Inc.:** Dec. 21, 1925. **Capital:** 100,000 shares; par value $1; all shares issued. **Property:** Horn Silver group; 3 patented, 7 unpatented claims, held under lease and option; Lava Creek dist.; Martin. **Development:** By 3 tunnels: No. 1, 630 ft.; No. 2, 530 ft.; No. 3, 1500 ft. **Plant:** Gas-driven compressor; complete mining equipment and camp. **Ore:** Lead-silver. **Men employed:** Average, 7. **Remarks:** Active development work throughout the year. All the men employed are interested in the mine and work without wages. The Dahle brothers are to be complimented for hard work, intelligent manner of developing the property, and economy of operation.

METTA MINING CO., LTD.

Office: Shelley. **Officers:** W. R. Jones, Pres., Ogden, Utah; E. Milton Christensen, Sec.-Mgr., Shelley. **Inc.:** Oct. 20, 1906. **Capital:** 1,000,000 shares; par value $1; 386,500 shares issued. **Property:** Metta group; 9 unpatented claims, Hamilton dist.; Howe. R. R. Dubois, 47 miles. **Development:** 3 short tunnels and 3 short vertical shafts; total development work approximately 880 ft. **Ore:** Lead-silver. **Remarks:** Annual labor only.

WILBERT MINING CO., LTD.

Office: 221 Kearns Bldg., Salt Lake City, Utah. **Officers:** J. A. Foley, Sec.; H. S. Knight, Mgr., both of Salt Lake City, Utah. **Inc.:** Apr. 10, 1907. **Capital:** 2,000,000 shares; par value 50c; 1,566,128 shares issued. **Property:** Daisy Black group; 6 patented, 26 unpatented claims, Dome dist.; Howe. R. R. Arco, 42 miles. **Development:** Approximately 15,000 ft. of

underground workings, the principal of which is No. 4 tunnel, in which there is an inclined shaft 250 ft. long with 2 intermediate levels. When this tunnel was completed to 2800 ft. in length, a raise was put through at its end and connection made with the old workings. **Plant:** MINE: 50-h. p. gas-driven C-P compressor, 25-h. p. gas-driven electric generator, and 20-h. p. electrically-driven hoist. MILL: 60-ton concentrator, gas-driven. **Ore:** Lead-silver. **Men employed:** Average, 22. **Remarks:** In addition to maintaining production and shipping a large tonnage of concentrate during the year, a large amount of mine development work was performed, which was successful in exposing an important showing of new ore. This property is one of the large lead-producing mines of southern Idaho.

CAMAS COUNTY

Camas County is one of the south-central counties, being bounded on the north and east by Blaine, on the south by Lincoln and Gooding, and on the west by Elmore County. It has an area of 1070 square miles, and was accredited with a population of 1730 in the 1920 census, or 1.6 persons to the square mile. The population is engaged in stockraising and dry farming, which pursuits are confined to the 300,000 fertile acres of the Camas Prairie.

The county is served by locally maintained roads, two Forest Service highways, and the Shoshone-Hill City branch of the O. S. L. Railroad. Fairfield is the largest town and county seat.

The principal mining districts are the Rosetta, Little Smoky, and Skeleton. The Skeleton district includes the drainage area forming the headwaters of the South Fork of the Boise River, and Little Smoky district comprises the drainage area of Little Smoky and Carrie Leonard Creeks. The ores found in the latter are those of lead-silver and zinc, and the mines in the former are principally gold, both placer and lode. In addition to the foregoing, the other mineral resources are copper, tungsten, and diatomaceous earth.

The mines in the Carrietown section of the Little Smoky district have a good production record to their credit, and their latent possibilities still offer excellent opportunities for profitable mines, either through the apparent possibility in some mines for finding the ore beyond the faults which caused a suspension of operations in the early nineties, or, in other mines, of adapting modern flotation methods to the large bodies of proven low-grade ore.

During 1927 this county witnessed more new mine development and new enterprises than at any time in the past ten years. Many of these are based on substantial mine foundations with excellent possibilities for profitable mines. An important factor in furthering mineral development in this county was the seven-mile extension which the Sawtooth National Forest Service made to its Fairfield-Carrietown highway, of which only five miles toward Carrietown remain to be constructed. This work was done in co-operation with the Idaho Lead Co. and the county commissioners of Camas County.

The principal new enterprises were: The Consolidated Mines Syndicate at the Princess-Blue Ribbon group; the Idaho Lead Co. at the Silver Star; the Richard Allen Mines Co. near Soldier; the development of the Stormy-Galore group by Robert Leaper and associates; and the drilling of the placer mines on the South Fork of the Boise River by a Spokane, Wash., company.

Lessees at the Carrie Leonard mine; Fletcher and Hosac at the Horn Silver mine; and the Perseverance Mines Co., Inc., at the Five Points mine were active throughout the summer months.

AMERICAN MINING & DEVELOPMENT CO.

Office: Glenns Ferry. **Officers:** J. W. Davis, Pres.; Geo. H. Hickok, Sec., both of Glenns Ferry. **Inc.:** April 19, 1920; charter forfeited Dec. 1, 1925. **Capital:** 600,000 shares; par value 10c; 400,000 shares issued. **Property:** Liberal group; 3 unpatented claims, Little Smoky dist.; Fairfield. **Development;** Principally by 1 tunnel, which is 1365 ft. long. **Plant:** MILL: 50-ton; consisting of Hardinge mill, amalgamation plates and two concentrating tables; gas driven. **Ore:** Gold-silver. **Remarks:** Annual labor only.

CARRIE LEONARD MINING CO.

Office: 319 Dooly Blk., Salt Lake City, Utah. **Officers:** Boyd T. Park, Pres.; W. A. Wilson, Sec.-Mgr., both of Salt Lake City. **Inc.:** Filed in Idaho, July 21, 1926. **Capital:** 200,000 shares; par value 10c; shares issued unknown. **Property:** Carrie Leonard group; 8 patented claims, Little Smoky dist.; Fairfield. **Ore:** Lead-silver. **Remarks:** A small amount of work was done by lessees. At one time this property was the principal producer in the Little Smoky district.

CLIPPER GOLD MINING & MILLING CO.

Office: Box 61, Fairfield. **Officers:** Chas. J. Sherry, Sr., Pres.-Mgr., Fairfield; Chas. J. Sherry, Jr., Sec., Long Beach, Calif. **Inc.:** April 3, 1907. **Capital:** 500,000 shares; par value $1; 400,000 shares issued. **Property:** Clipper group; 4 unpatented claims, Rosetta dist.; Fairfield. **Development:** By 3 short tunnels. **Remarks:** A small amount of work during the summer months.

CONSOLIDATED MINES SYNDICATE

Office: 615 Empire Bldg., Boise. **Officers:** Frank E. Johnesse, Pres.-Mgr.; Wm. MacLeod, Sec., both of Boise. **Inc.:** May 6, 1924. **Capital:** 10,000 shares; no par value. On August 15, 1924, the capitalization was changed to 10,000,000 shares, $2.50 par value; and on May 2, 1925, the capitalization was decreased to 10,000,000 shares, par value $1; 2,075,796 shares issued. **Property:** Princess-Blue Ribbon groups; 5 unpatented claims, unorganized dist.; Beaver Creek; Fairfield. **Development:** By 3 tunnels: No. 1, 170 ft.; No. 2, 225 ft.; No. 3, 115 ft. **Ore:** Lead-silver-gold. **Men employed:** Average, 9. **Remarks:** Active development work, which consisted of driving a long lower tunnel, continued for a period of 5 months. This company also owns the Washington and Subrosa groups in Boise County and the Blue Jacket group in Idaho County. During the closing months of the year the company encountered considerable difficulty on account of the resignation of all its officers and directors excepting the president and the secretary.

CRYSTAL GOLD PLACER MINING CO.

Office: Fairfield. **Officers:** Chas. A. Libby, Pres.-Mgr., Los Angeles, Calif.; S. W. Struble, Sec., Fairfield. **Inc.:** Nov. 8, 1924. **Capital:** 500,000 shares; par value $1; shares issued, unknown. **Property:** 3 unpatented claims, Skeleton dist.; Fairfield; held under lease and option. **Development:** 3 short cuts. **Ore:** Placer gold. **Remarks:** A small amount of work, including the construction of a small washing plant, ditches, and flumes, was done during the year.

EL ORO MINING CO.

Office: 642 Tremont Bldg., Boston. **Officers:** C. Wesley Smith, Pres-Mgr.; Everett H. Hadley, Sec., both of Boston. **Inc.:** March 11, 1925. **Capital:** 300,000 shares; no par value; 5 shares issued. **Property:** El Oro group; 7 unpatented claims, Skeleton dist.; Fairfield; held under lease and option from C. Wesley Smith. **Development:** 2 tunnels: No. 1, 118 ft. long; No. 2, 225 feet long; from which there are numerous drifts. **Plant:** MINE: Water-driven compressor; complete mining equipment. MILL: 30-ton stamp mill, equipped with 10 stamps and amalgamation plates. **Ore:** Gold. **Remarks:** No mining operations were conducted during the year.

HIDDEN TREASURE MINE & MILLING CO.

Office: Fairfield. **Officers:** Chas. J. Sherry, Sr., Pres.-Mgr.; Fairfield. **Inc.:** July 10, 1916. **Capital:** 500,000 shares; par value 10c; 410,000 shares issued. **Property:** Hidden Treasure group; 4 unpatented claims, Little Smoky dist.; Fairfield. **Development:** By 3 tunnels; total development, approximately 3000 ft. **Plant:** Partly dismantled 50-ton concentrator. **Ore:** Lead-silver. **Remarks:** Annual labor only.

IDAHO LEAD CO.

Office: 221 Eastman Bldg., Boise. **Officers:** Eugene B. Sherman, Pres.; M. H. Brownell, Sec., both of Boise. **Inc.:** Dec. 30, 1926. **Capital:** 1,000,000 shares common, 500,000 shares preferred; par value $1; 500,000 shares common issued. **Property:** Silver Star group; 11 patented claims, Little Smoky dist.; Fairfield. **Development:** By 3 tunnels: No. 1, 700 ft. long; No. 2, 900 ft. long; No. 3, 1100 ft. long; and an inclined shaft 200 ft. long. Total development over 6000 ft., which opens the vein to a depth of 500 ft. **Ore:** Lead-zinc-silver. **Remarks:** During 1884-87 over $500,000 was expended in developing the mine and constructing a mill on the property controlled by this company. The mill was operated but a short time when the mine was closed down, in 1887, because the milling methods then in use could not make a commercially profitable concentrate, which is now possible with differential flotation. During the year complete metallurgical tests were made on the ore and seven miles of highway constructed, in co-operation with the Sawtooth National Forest Service and Camas County, preparatory to reopening the mine.

PERSEVERANCE MINES CO., INC.

Office: 1620 N. 6th St., Boise. **Officers:** Fred R. Wilson, Pres., Spokane, Wash.; Geo. R. Colvin, Sec.-Mgr., Boise. **Inc.:** May 28, 1927. **Capital:** 1,000,000 shares; par value $1; 738,000 shares issued. **Property:** Five Points group; 11 unpatented claims, Little Smoky dist.; Fairfield. **Development:** By 3 tunnels: No. 1, 119 ft.; No. 2, 235 ft.; No. 3, 500 ft. **Plant:** Partly constructed 70-ton concentrator. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** During the year the mill was moved a distance of about 3 miles from its former location and was reconstructed. This is the third organization Mr. Colvin has had on this property, the others being the Walton Mines Co., incorporated April 28, 1921; and the Happy Bill Mines Co., incorporated Dec. 31, 1923.

RED STAR MINING CO.

Office: Boise. **Officers:** D. W. Zent, Pres. Manitou Hotel, Boise; Russell Campbell, Sec., Glenns Ferry. **Inc.:** Nov. 20, 1924. **Capital:** 250,000 shares; par value 10c; 115,000 shares issued. **Property:** Red Star group; 4 unpatented claims, Little Smoky dist.; Fairfield. **Development:** 1 tunnel 50 ft. long. **Ore:** Gold-silver-lead. **Remarks:** Annual labor only.

RICHARD ALLEN MINES CO.

Office: Gooding. **Officers:** F. D. Waganer, Pres., Gooding; A. W. Steeves, Sec., Fairfield. **Inc.:** May 23, 1927. **Capital:** 600,000 shares; par value 5c; all shares issued. **Property:** 3 unpatented claims, unorganized dist., Soldier Mountain; Fairfield. **Development:** By 3 tunnels; total development, approximately 1000 ft. **Ore:** Copper-silver-gold. **Men employed:** Average, 3. **Remarks:** Active throughout the summer months.

CARIBOU COUNTY

Caribou is one of the large southeastern counties of the State, being bounded on the east by the State of Wyoming, on the south by Bear Lake, on the east by Bannock, and on the north by Bingham and Bonneville counties. It has an area of 1263 square miles, and was accredited with a population of 2191, or 1.7 persons to the square mile, in the 1920 census. Soda Springs, the county seat and the only settlement of importance, is situated in the southeastern corner. The county is principally a sheep raising and agricultural community, and Soda Springs is one of the largest sheep shipping points in the United States.

The southeastern corner of the county is served by the main line of the O. S. L. Railroad, with an 8-mile branch road to Conda, the scene of the Anaconda Copper Mining Co.'s operation, and by the main east and west State highway, the Old Oregon Trail.

The principal mineral resources are phosphate rock, salt, sulphur, and mineral springs, and there are excellent possibilities for the discovery of petroleum. These resources are different from those of most counties, and when properly exploited will be a material factor in the prosperity of the county and State.

A large part of the five billion tons of minable phosphate rock, estimated by geologists of the U. S. Geological Survey, is in this county. These deposits are practically untouched, and constitute one of the greatest potential mineral resources of the State. They are fully described, including analyses and tonnage estimates, in the numerous publications referred to in the bibliography. The Anaconda Copper Mining Co. is pioneering in the development of the rock phosphate industry and has expended over $1,000,000 in its mine, mine plant, mill, railroad, power lines, and townsite.

One of the most outstanding publications issued by the U. S. Geological Survey in recent years is Professional Paper 152, by G. R. Mansfield: "Geography, Geology, and Mineral Resources of Part of Southeastern Idaho". This appeared during 1927; it is profusely illustrated with pictures, maps, and diagrams, and describes in detail the subjects mentioned in its title, dealing especially with the immense areas of phosphate rock found in this county.

The only salt found in the State is in Caribou County. Geologists of the U. S. Geological Survey conservatively estimate five million tons in one deposit, with the possibility of a large tonnage in adjacent areas. The deposits are located on Stump and Tygee creeks, near the State line.

The mineral springs, which are located at Soda Springs, constitute an important resource which is lying dormant. The waters from these springs have exceptional medicinal qualities, are excellent for table use, and offer a great possibility if properly developed and exploited.

A number of structures favorable to the accumulation of petroleum are found in the eastern part of the county. The location and geology of these areas are fully described in the publications issued by the Idaho Bureau of Mines and Geology.

The Anaconda Copper Mining Co. maintained production at its phosphate mine at the rate of 200 tons per day throughout the year, in addition to constructing a large number of new homes for its employees. This company's mine plant is the largest in the State, and possibly in the United States, for the mining of this mineral. The rock mined is shipped to Anaconda, Montana, where it is converted into concentrated phospatic fertilizer, the finished product being known as Anaconda treble superphosphate.

During the year, the Great Western Oil Co., whose property is located in the eastern part of the county near the Wyoming line, deepened its well a few feet under contract. At the close of the year, it had reached a total depth of about 2700 feet.

ANACONDA COPPER MINING CO.

Office: Anaconda, Mont. **Officers:** C. F. Kelley, Pres.; A. H. Melin, Sec., both of 25 Broadway, New York City; C. E. Nighman, Local Mgr., Conda, Idaho. **Inc.:** Filed in Idaho: Apr. 10, 1916. **Capital:** 6,000,000 shares; par value $50; 3,000,000 shares issued. **Property:** 23 patented claims; 3403 acres, unorganized dist.; Conda. **Development:** 2 adits, 45 ft. above railroad-track level, 9x9 ft. inside of timbers: No. 1, 5450 ft. long; No. 2, 2660 ft. long. The main operating tunnels are equipped with 25-pound rail, 36-in. gauge track, 15-ton storage-battery locomotive capable of hauling a 100-ton net load at a speed of 4 to 7 miles per hour, 10-ton side dump ore cars, power loading machines operated by compressed air and No. 4 sirocco fan. **Plant:** MINE: 1000-cu.-ft. compressor; drill sharpeners; machine, blacksmith and carpenter shops with latest type power-driven equipment; switch boards and motor generator charging set; laboratory; electric sub-station and sawmill all housed in fireproof gunited and steel buildings. MILL: Crushing and drying plant. The mill feed and storage bins are connected with the main tunnels by large trestles. The storage bins, with a capacity of over 4000 tons, and houses over them are protected with several inches of gunite. The main storage bin is equipped with an Ottumwa boxcar loader and modern railroad scales. The rock drawn from the mill feed bin, which has a capacity of 450 tons, passes over shaking grizzlies, the oversize going to a 12-inch

Traylor gyratory crusher, which reduces it to about 2½ inches. The product from the crusher and the undersize is elevated and passed over a Mitchell vibrating screen. The rock passing through this screen goes to the dryer feed bin, and the oversize to 22x54-inch Anaconda rolls that reduce it to three-fourths of an inch. The product from the rolls is elevated and again passes over the Mitchell vibrating screen. The crushed rock drawn from the dryer feed bins is conveyed into class A-12 Ruggles-Coles dryers by apron feeders. After leaving the dryer the rock goes over a shaking feeder to a chain bucket elevator. This elevator carries it to the top of the mill where it passes through a Vezin sampler, and it is then conveyed to the storage bins. The present capacity of the mill is 400 tons in 24 hours. This output can be increased to 1000 tons in the same time by adding another dryer. **Railroad:** 8-mile branch from Soda Springs to mine, with storage tracks that will accommodate 100 fifty-ton railroad cars, spurs to mill and coal bins, and wyes at each end of the yards. The gradient of the storage tracks is such that the cars are operated by gravity to and from the storage bins. **Town:** The company has erected a model mine town consisting of modern homes, which are rented to the employees at a nominal figure. Company offices, bunk and boarding houses, superintendent's home, recreation hall and a number of small homes have been erected. A fully equipped store is maintained by the company, a postoffice has been established, and a modern school erected and maintained. A complete water system for the town and plant has been installed; the water is piped a distance of 2 miles to a 100,000-gallon storage tank from which it is distributed. **Ore:** Phosphate rock. **Men employed:** Average 50. **Remarks:** During the greater part of the year active production was maintained at the rate of approximately 200 tons per day. A large number of new homes for the employees were constructed during the year. Note pages 26 to 31 of 1923 Annual Report for complete description of this operation.

GREAT WESTERN OIL CO.

Office: 1st National Bank Bldg., Pocatello. **Officers:** Thomas Hopper, Pres.; Harvey W. Dice, Sec., both of Pocatello. **Inc.:** Feb. 2, 1923. **Capital:** 1,000,000 shares; par value $1; 650,000 shares issued. **Property:** Oil and gas leases on 1383 acres of patented farm land situated on Stump and Tygee creeks, unorganized dist.; Auburn, Wyo.; R. R. Montpelier. **Development:** 2640 ft. well. **Plant:** Miller well-drilling outfit equipped with F-M 40-h. p. gas engine. **Mineral sought:** Oil and gas. **Remarks:** Small amount of drilling under contract during the year.

CASSIA COUNTY

Cassia is one of the principal southern counties, being bounded on the south by the States of Nevada and Utah, on the west by Twin Falls, and on the east by Oneida and Power counties. Snake River forms its northern boundary, which is also a part of the southern boundary of Jerome, Minidoka, Blaine, and Power counties. It has an area of 2595 square miles, and was accredited with a population of 15,659 in the 1920 census. The principal industries are stockraising and farming. Burley, which is on the Snake River, near the center of the Minidoka project of the U. S. Reclamation Service, is the largest town and county seat.

The northern part of the county is served by the Old Oregon Trail State Highway; the other parts by a well-maintained system of county roads. Its railroad is the Minidoka-Buhl branch of the O. S. L. Railroad, from which there are branch lines extending from Burley to Idahome, and from Burley to Oakley.

The minerals found in this county are silver, lead, copper, gold, limestone, building stone, marble, cinnabar, and lignite. In the past, a little drilling has been done for petroleum, but all the companies have been practically idle for the past four years. These varied mineral resources, particularly the high grade lead-silver and silver-copper ores of the Stokes and Dolomite districts, offer excellent opportunities and possibilities for prospectors and development companies.

The Silver Hills Mining Co. was the only active company during the year, although there was a large increase in the number of prospectors and the amount of work done by them.

GOOSE CREEK OIL AND DEVELOPING CO.

Office: 424 4th Ave., Pittsburgh, Pa. **Officers:** Edward Martin, Pres.; H. E. Wynn, Sec., both of Pittsburgh, Pa.; D. P. Carpenter, Mgr., Oakley. **Inc.:** Oct. 28, 1920. **Capital:** 1,000,000 shares; par value 50c; 346,600 shares issued. **Property:** Government prospecting permit on 8000 acres on Coal and Goose creeks; Oakley. **Development:** 1425 ft. well. **Mineral sought:** Oil and gas.

MELCHER MINING & MILLING CO.

Office: 503 McIntyre Bldg., Salt Lake City, Utah. **Officers:** Samuel McIntyre, Sr., Pres.; R. M. Wilkinson, Sec., both of Salt Lake City. **Inc.:** May 2, 1899. **Capital:** 500,000 shares; par value 10c; 345,396 shares issued.

OAKLEY MINING & MILLING CO.

Office: Oakley. **Officers:** John H. Fairchild, Pres.-Mgr.; Lucy A. Fairchild, Sec., both of Oakley. **Inc.:** Jan. 7, 1920. **Capital:** 1,000,000 shares; par value 10c; all shares issued. **Property:** Boulder group; 7 unpatented claims, Dolomite dist.; Oakley. **Development:** Principally by 1 tunnel 300 ft. long. **Remarks:** This company is owned by its president, who was actively developing it during the year.

SILVER HILLS MINING CO.

Office: 707 Utah Savings & Trust Bldg., Salt Lake City, Utah. **Officers:** W. J. Burridge, Pres.-Mgr., Black Pine; L. M. Francis, Sec., Salt Lake City, Utah. **Inc.:** Mar. 31, 1920. Charter forfeited Nov. 30, 1926. **Capital:** 800,000 shares; par value 10c; 532,102 shares issued. **Property:** Busy Bee and Joven groups; 23 unpatented mining claims, Black Pine dist.; Black Pine. **Development:** 3 tunnels, 1 shaft; approximately 2600 ft. total development. **Ore:** Lead-silver. **Men employed:** Average, 3. **Remarks:** Active during the greater part of the year.

WEST PEARL OIL & GAS CO.

Office: Standard Life Bldg., Pittsburgh, Pa. **Officers:** Hugh Ferguson, Pres.; William Le Goullon, Sec., both of Pittsburgh, Pa. **Inc.:** Jan. 15, 1920. **Capital:** 1,000,000 shares; par value $1; 500,000 shares issued. **Property:** 3000 acres of leased land. **Development:** Well 2825 ft. in depth.

CLARK COUNTY

Clark is one of the southeastern counties, adjoining and lying east of Lemhi and Butte counties, and bounded on the north by the State of Montana, on the east by Fremont County, and on the south by Jefferson County. It contains an area of 1778 square miles and was accredited with a population of 1886 in the 1920 census. Dubois is the principal town and county seat.

The Pocatello-Butte division of the O. S. L. Railroad, and the Idaho-Montana State highway traverse the county north and south, thus giving it good transportation facilities.

The Lemhi Mountains, which extend into the northwest corner of the county, constitute the principal mining district. This district is named from Birch Creek, which flows in a southern direction and which divides the district. The western part is an extension of the Dome, or Hamilton, district of Butte County, and the eastern part is an extension of the Nicholia district of Lemhi County. The ores found throughout this area are lead-silver, copper-silver, and zinc. The deposits have been partially developed and a small tonnage has been marketed.

Deposits of coal and bentonite of sufficient extent to be of commercial importance occur in the Beaver Head Mountains, the summit of which is the state line between Idaho and Montana.

During the year, the mines and prospects in the Birch Creek district received considerable attention by individuals, although no operations were conducted by companies. The principal properties under development and investigation were: The Worthington-Kaufman groups; the Scott mine; and the Comstock.

The geography, geology, and non-metallic resources of this county are fully described, together with maps and illustrations, in a publication issued during the year by the Idaho Bureau of Mines and Geology as Pamphlet No. 19: "A Geological Reconnaissance of Clark and Jefferson and Parts of Butte, Custer, Fremont, Lemhi and Madison Counties, Idaho," by V. R. D. Kirkham.

CLEARWATER COUNTY

Clearwater is one of the large northern counties, being bounded on the north by Shoshone County, on the east by the State of Montana, on the south by Idaho County, and on the west by Lewis, Nez Perce, and Latah counties. It has an area of 2508 square miles and was accredited with a population of 4993 in the 1920 census. Orofino, which is on the Clearwater River, near the western border, is the largest town and county seat. Except a small area adjacent to Orofino, which is devoted to agriculture, the entire county is mountainous and heavily timbered. The largest body of virgin white pine timber in the United States is located in this county.

It is served by three State highways which are partly constructed, by good county-maintained roads, and by the Lewiston-Stites branch of the Northern Pacific Railroad, which follows the Clearwater River.

Pierce City, which is the principal mining district in the county, was the scene of the first gold discovery in Idaho. This discovery was made in 1860, and the ensuing stampede soon crowded the district and the overflow spread into other sections. The stampede and resulting overflow formed the nucleus of the State, and shortly thereafter the Territory of Idaho was formed. Practically all the placer gold that could be recovered by hand methods or hydraulicking was exhausted years ago, and all recent operations have been devoted to dredging and lode mining.

Gold—placer and lode—silver, monazite, and copper are the principal minerals found in the Pierce City district. Lead, zinc, and silver occur in the Neva Hill section, and placer gold is still found in some of the isolated sections.

The year 1927 witnessed an increase in mining and mining activities throughout Clearwater County. Hydraulic operations were conducted at a few of the mines near Pierce City, and the Independence Placer Mining Co., Ltd., whose property is on Moose Creek, a tributary of the North Fork of the Clearwater River, completed the installation of its 6000 feet of hydraulic pipe and the necessary ditches, and conducted mining operations during the high water period.

The lead-silver deposits in the Neva Hill section, near Elk River, received a small amount of attention, the principal operations being those of the Ruby Creek Mining Co.

In 1925 construction work was started on a new branch line of the Northern Pacific Railroad from Orofino to Pierce City. The principal construction was done during 1926, being fully completed and opened to traffic early in 1927. While this railroad was constructed primarily to open the large timber resources of this section of the State, it is proving to be an important factor in furthering mining in the Pierce City district. This was noticeable throughout the year, as the mining activities and interest in mines greatly exceeded those of any other year since the placer mines became exhausted. Prior to the construction of the railroad, Pierce City had dwindled to a "ghost town"; the renewed interest in mining, the new logging enterprises, and the presence of the construction forces converted it into the second largest town in the county, and gave new birth to the first established town in the State.

ALDER CREEK MINING CO.

Office: 404 Court House, Duluth, Minn. **Officers:** Thos. Owens, Pres., Two Harbors, Minn.; H. J. Grannis, Sec., Duluth, Minn. **Inc.:** Apr. 4, 1902. **Capital:** 200,000 shares; par value $1; 178,000 shares issued. **Property:** 800 acres patented land, Pierce City dist.; Orofino. **Ore:** Placer gold.

AMERICAN PLACER MINING CO., LTD.

Office: Peyton Bldg., Spokane, Wash. **Officers:** J. M. Porter, Pres.; D. W. Porter, Sec., both of Spokane. **Inc.:** Nov. 18, 1893. **Capital:** 500,000 shares; par value $1; all shares issued. **Property:** 2 patented, 1 unpatented claim; Pierce.

BOLE CONSOLIDATED MINING CO.

Office: Pierce. **Officers:** F. J. McCurdy, Pres., Seattle; Alex Kasberg, Sec., Lewiston. **Inc.:** Jan. 5, 1922. **Capital:** 300,000 shares; par value $1; all shares issued. **Property:** Bole group; 32 unpatented claims, Pierce City dist.; Pierce. **Development:** 3 tunnels: No. 1, 620 ft. long; No. 2, 150 ft. long; No. 3, 100 ft. long; 1 inclined shaft 100 ft. long, in which are 200 ft. of crosscuts and drifts. **Plant:** Steam-driven hoist and pumps. **Ore:** Gold. **Remarks:** Annual labor only.

CLEARWATER DREDGING CO.

Office: 919 Lloyd Bldg., Seattle, Wash. **Officers:** R. H. Bailey, Pres.; Van G. Hammon, Sec., both of Seattle. **Inc.:** Feb. 24, 1927. Charter forfeited Nov. 30, 1927. **Capital:** 100,000 shares; par value 1c; no shares issued. **Property:** 3 unpatented claims, Pierce City dist.; Pierce. **Plant:** 4-cu.-ft. flume-type Bucyrus dredge. **Ore:** Placer gold. **Remarks:** Annual labor only.

CLEARWATER PLACER MINING CO.

Office: 601 Hutton Bldg., Spokane, Wash. **Officers:** H. E. Rhodehamel, Pres., Hyde Bldg., Spokane, Wash.; Chas. H. Ennis, Sec., 601 Hutton Bldg., Spokane, Wash. **Inc.:** Aug. 21, 1923. **Capital:** 1,400,000 shares; par value 10c; all shares issued. **Property:** 8 unpatented placer claims, 160 acres, Pierce City dist.; Pierce. **Ore:** Placer gold. **Remarks:** Annual labor only.

INDEPENDENCE PLACER MINING CO., LTD.

Office: Wallace. **Officers:** Wm. Fahle, Pres.-Mgr.; Hugh Toole, Sec., both of Wallace. **Inc.:** Oct. 25, 1906. **Capital:** 1,000,000 shares; par value $1; 912,226 shares issued. **Property:** 16 unpatented claims, Moose City dist.; Rivulet, Mont. **Men employed:** Average, 7. **Ore:** Placer gold. **Remarks:** Operations conducted for a period of 60 days. A stock assessment of 1c was levied on Feb. 12.

OXFORD COPPER MINING CO., LTD.

Office: Moscow. **Officers:** Samson Snyder, Pres., Orofino; L. F. Parsons, Sec., Moscow. **Inc.:** Apr. 10, 1907. **Capital:** 1,000,000 shares; par value $1; 611,185 shares issued. **Property:** 6 unpatented claims, Pierce City dist.; Pierce. **Development:** Approximately 500 ft. of underground workings. **Plant:** Steam-driven hoist. **Ore:** Copper. **Remarks:** Annual labor only.

RHODES CREEK MINING CO.

Office: Lewiston. **Officers:** Wm. Mallory, Pres.; L. M. Wolever, Sec., both of Lewiston. **Inc.:** June 29, 1925. Charter forfeited Nov. 30, 1927. **Capital:** 5,000,000 shares; par value 5c; 2,307,055 shares issued. **Property:** Dunn & Stowell group; 2 patented claims, Pierce City dist.; Pierce; held under lease and option to purchase. **Development:** By 1 tunnel 650 ft. long. **Plant:** Steam-driven compressor. **Ore:** Gold. **Remarks:** Idle.

RUBY CREEK MINING CO.

Office: Bovill, Idaho. **Officers:** P. A. Hughes, Pres.; J. M. Evans, Sec.; James Gilroy, Mgr., all of Bovill. **Inc.:** Sept. 14, 1925. **Capital:** 1,500,000 shares; par value 10c; 832,430 shares issued. **Property:** Ruby Creek group; 20 unpatented claims, Ruby Creek dist.; Bovill. **Development:** By 1 tunnel 560 ft. long, and a vertical shaft 170 ft. deep. **Plant:** Steam-driven compressor; complete mining equipment, and camp. **Ore:** Lead-zinc-silver. **Men employed:** Average 5. **Remarks:** A small amount of work during the summer months.

CUSTER COUNTY

Custer County is bounded on the north by Lemhi County, on the east by Butte, on the south by Blaine, and on the west by Boise and Valley counties. Its principal area comprises the drainage basins of the headwaters of the Salmon River, Big Lost River, and Little Lost River. It has an area of 4921 square miles, and was accredited with a population of 3550 in the 1920 census, or 0.7 persons to the square mile. A comparison of the area and density of population with the State of Connecticut, which contains 4845 square miles and a population of 286.4 persons to the square mile, conveys a good idea of the size of Custer County and its lack of population. It is one of the south-central counties, and the area within its borders comprises the greater part of the region known as "Central Idaho's Mineral Empire."

It is principally a mining county and always ranks as one of the principal mineral-producing counties of the State. It is also noted for its agricultural and stockraising industries, particularly sheep, as it is one of the largest sheep raising sections in the State.

The county is served by the Blackfoot-Mackay branch of the O. S. L. Railroad, by the Sawtooth Park and the Lost River State highways and by well-maintained county and Forest Service roads, which extend into all the various mining districts. The roads are kept in good repair and are open to travel during the larger part of the year. Mackay, the terminus of the railroad, is the largest town and the supply point for most of the mines. Challis, which is 60 miles northwest of Mackay, is the county seat and oldest settlement.

The principal mineral resources are lead, silver, copper, gold—placer and lode, zinc, antimony, molybdenum, tungsten, graphite, bentonite, and garnet. The deposits are widely distributed throughout the county, and many of them offer exceptionally favorable opportunities to prospectors and development companies. Excepting the flat land and river bottoms, which are suitable to dredging and which fully justify investigation, practically all the placer mines are exhausted. The diversity of mineralization and the favorable geological conditions are attracting some of the largest organizations in the United States to this county, and many resulting new discoveries fully prove the possibilities that are in store for those who possess a little courage.

During 1927, Custer County witnessed a larger amount of scouting, prospecting for new lead-silver and zinc mines, and the organization of more new mining enterprises than did any other county in southern Idaho. Practically all companies which were active in 1926 remained so throughout 1927, and some of them expanded their operations over those of the previous year.

The Livingston Mines Corporation, which attracted a large amount of attention during 1926 as a result of the announcement of an important discovery of new ore late in 1925, had the largest payroll of any mine in southern Idaho throughout the year, although it was only second in production. In addition to continuous production, this company re-designed and rebuilt its mill, performed a large amount of development work, and rebuilt and maintained over 20 miles of its road.

One of the largest new mine plants installed and constructed in the State during the year was that of the Seafoam Mines Corporation at its property in the Seafoam district. This work consisted of a 230-horse-power hydro-electric power plant; 3400 feet of flume; 4½ miles of transmission line; a 350-cubic-foot compressor; steel sharpener, and complete mining equipment; a 50-ton mill, fine grinding, amalgamation, and table concentration; 2 large bunk houses, a large boarding house, and 6 small houses; complete saw-mill; and water and electric-lighting systems. In addition to the installation of the foregoing, about 800 feet of development work was performed.

The Twin Apex Mines Co. installed a small gas-driven Sullivan compressor, with complete mining equipment, and contracted the driving of a 1000-foot crosscut tunnel, of which about 600 feet had been driven at the close of the year.

The Hecla Mining Co. maintained an active development campaign throughout the largest part of the year at the Mountain King group in the Sheep Mountain district; the Josephus Lake group at Seafoam; and the South Butte group in the Bay Horse district, adjoining the Red Bird mine of the Ford Motor Co. Operations at all these properties were suspended during the closing months of the year and all options were relinquished, although reports indicated that some of the work met with encouraging results.

The Red Bird mine of the Ford Motor Co. was idle throughout the year. However, all options were exercised, the property was paid for, and the mining claims were patented during the year. The entry of this company into Custer County attracted nation-wide attention a few years ago, and much new development work and some of the new enterprises can be accredited to this publicity. The fact that the property was purchased lends credence to the press stories circulated in 1926, to the effect that the diamond drilling and development work performed during 1925 and 1926 had proved a substantial tonnage of new ore.

The principal new companies to enter this county during the year and their chief activities were as follows: The Central Idaho Mining Co., a placer operation in the Yankee Fork district, performed a small amount of development work; the Crater Mines, Inc., whose property is at the head of Slate Creek near the Livingston mine, constructed new camp buildings, installed a small gas-driven compressor with complete mining equipment, and started active development work; the Idaho Hermit Mines, Inc., on Railroad Ridge adjoining the Livingston mine, perfected its organization, and performed a small amount of work during the summer months; the Clark Mining Co., whose property is on Kinnikinnick Creek near Clayton, did a large amount of development work, which resulted in exposing considerable additional ore, and constructed a small concentrating mill; the Sulphide Mining Co., on Salmon River about two miles below Clayton, drove its projected 900-foot tunnel about 400 feet; the Mule Shoe Mining Co., on the opposite side of the Salmon River from the Sulphide Mining Co.'s property, employed three men throughout the year in driving a lower tunnel; and the Golden Center Mining Co., which acquired the Black Rock group at the head of Big Lost River near the Blaine County line, constructed about four miles of new road at a high cost and purchased two small gas-driven compressors with complete mining equipment, but were unable to complete the road and install the equipment before winter set in. Prior to commencing operations at the Black Rock, this company performed a large amount of development work on the Williams-Dryden group in the Bay Horse district near Clayton.

The Empire mine at Mackay, owned by the Idaho Metals Co., continues to hold first place as the largest copper mine in the State. Active mining and milling operations were maintained throughout the year under the leasing system. This system does not permit the further development work which is necessary and fully warranted.

The MacGinniss-Walker Metals Co. employed six men throughout the year, in development work on the Phi Kappa group near the head of Big Lost River. Press reports averred that a large body of ore was disclosed by this work.

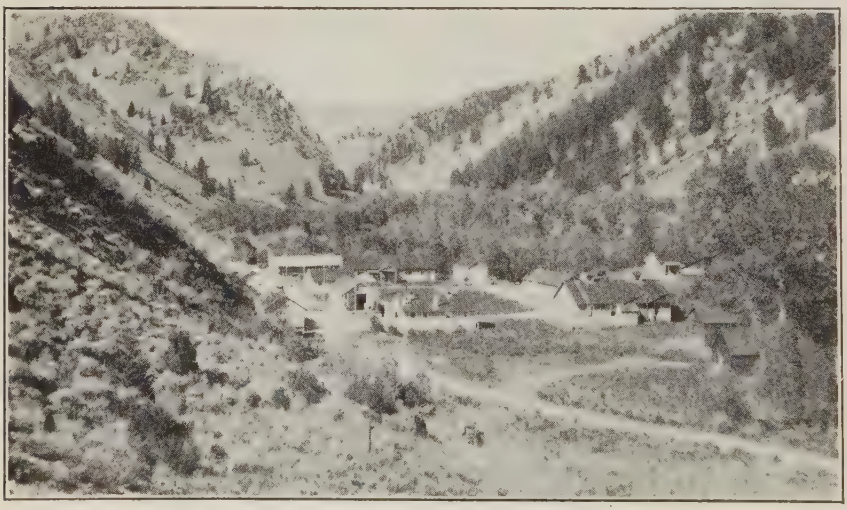
Lessees on the Blue Jay mine, near Mackay, owned by the White Knob Mining Co., and on the Ramshorn, Pacific and Beardsley-Excelsior mines near Bay Horse were active throughout the year, all of them producing and marketing a substantial tonnage of high-grade lead-silver ore.

The Kay Development Co., Ltd., which is operating the Horse Shoe mine of the Horse Shoe Copper Co., Ltd., near Mackay, conducted active operations during the early part of the year. This work disclosed a large body of complex lead-zinc ore.

AZTEC MINING & MILLING CO.

Office: 839 W. Lander St., Pocatello. **Officers:** T. W. Galigher, Pres.-Mgr., 915 N. 21st St., Boise; B. F. Anderson, Sec., Pocatello. **Inc.:** May 26, 1917. Capital stock increased Feb. 2, 1925. **Capital:** 50,000 shares; par value $1; 32,165 shares issued. **Property:** Kingfisher group; 3 unpatented claims, Stanley dist.; Stanley. **Development:** Inclined shaft 650 ft. long. Total development, approximately 1750 ft. **Plant:** MINE: 25-h. p. steam-driven hoist. MILL: Partly installed Gibson mill and amalgamation plates. **Remarks:** Small amount of labor in excess of annual requirement.

BURNS MINING & MILLING CO.



Office: Meridian. **Officers:** G. W. Parkin, Pres., J. M. Evans, Sec., both P. O. Box 63, Meridian. **Inc.:** May 3, 1911. **Capital:** 500,000 shares; par value $1; 337,877 shares issued. **Property:** Burns group; 8 unpatented claims, Seafoam dist.; Stanley. **Development:** Approximately 750 ft. of workings. **Ore:** Lead-silver, gold. **Remarks:** Annual labor only.

CENTRAL IDAHO MINING CO.

Office: Shelley. **Officers:** Roy Young, Pres.-Mgr.; A. J. Mickelson, Sec., both of Shelley. **Inc.:** Jan. 20, 1927. **Capital:** 50,000 shares; par value $1; 20,200 shares issued. **Property:** Muley Creek group; 11 unpatented claims, Yankee Fork dist.; Clayton. **Ore:** Placer gold. **Remarks:** Small amount of work during the summer months.

CLARK MINING CO.

Office: Clayton. **Officers:** E. L. Clark, Pres.-Mgr., Clayton; Harmon E. Hosier, Sec., Rupert. **Inc.:** July 15, 1927. **Capital:** 1000 shares; par value $100; 893 shares issued. **Property:** Camp Bird group; 13 unpatented claims, part of which are held under lease and option, Kinnikinnick Creek, Bay Horse dist.; Clayton. **Development:** Principally by 1 tunnel 400 ft. long. **Plant:** MINE: Small gas-driven Sullivan compressor; complete mining equipment and camp. MILL: Small concentrator. **Ore:** Lead-silver. **Men employed:** Average, 7. **Remarks:** After organization, this company performed a large amount of development work, which resulted in exposing considerable new ore; a small concentrating mill was then erected.

MINE CAMP: FORD MOTOR CO.

CRATER MINES, INC.

Office: Rigby. **Officers:** H. A. Anderson, Pres.; Geo. E. Hill, Sec.; Harry S. Thayer, Mgr., all of Rigby. **Inc.:** Aug. 30, 1927. **Capital:** 1,000,000 shares; par value $1; shares issued, unknown. **Property:** Crater group; 9 unpatented claims at the head of Slate Creek, Boulder dist.; Mackay; held under lease and option. **Development:** By 1 tunnel. **Plant:** Small gas-driven compressor. **Ore:** Lead-antimony-silver. **Men employed:** Average, 3. **Remarks:** New camp buildings were constructed, equipment was installed, and development work started during the latter part of the year.

EAST STAR MINING CO.

Office: Downey. **Officers:** Albert Christenson, Pres.; G. T. Hyde, Sec., both of Downey; L. W. Johnson, Mgr., Arco. **Inc.:** Apr. 16, 1924. **Capital:** 1,000,000 shares; par value 25c; 800,000 shares issued. **Property:** East Star group; 4 unpatented claims, Alder Creek dist.; Mackay. **Development:** By 1 tunnel 290 ft. long. **Remarks:** Small amount of development work throughout the year, funds for which were derived from stock assessments.

FORD MOTOR CO.

Office: Highland Park, Mich. **Officers:** Edsel B. Ford, Pres.; B. J. Craig, Sec., both of Highland Park, Mich. **Inc.:** Filed in Idaho, Jan. 6, 1925. **Capital:** 1,000,000 shares; par value $100. **Property:** Red Bird and Silver Rule groups; 44 patented claims and 6 millsites, Bay Horse dist.; Clayton; R. R. Mackay, 70 miles. **Development:** Principal development on Red Bird group consists of 4 tunnels: No. 1, 500 ft. long; No. 2, 1300 ft. long; No. 4, 510 ft. long; No. 9, 2127 ft. long, giving a total depth of 900 ft. on the vein; total development approximately 23,000 ft. **Plant:** 2 I-R semi-Diesel engines, type POC-2, direct connected to compressors; complete mining equipment including 2 diamond drills; shops and mining camp consisting of 11 buildings. **Ore:** Lead-silver. **Men employed:** 1 watchman. **Remarks:** Idle; all options were exercised, property was paid for, and mining claims patented during the year.

GOLDEN CENTER MINING CO.

Office: 120 Broadway, New York. **Officers:** Walter J. Mellody, Pres., New York; Wayne Darlington, Mgr., Mackay. **Inc.:** Never filed in Idaho. **Capital:** Unknown.

WILLIAMS-DRYDEN GROUP

Property: 5 unpatented claims, held under lease and option, Bay Horse dist.; Clayton. **Development:** By a 500-ft. crosscut, in which is 1000 ft. of drifting. **Ore:** Lead-silver **Men employed:** Average, 6. **Remarks:** A large amount of work was performed under contract, resulting in developing a small amount of new ore. However, options were forfeited and the enterprise was abandoned in October.

BLACK ROCK GROUP

Property: 17 unpatented claims on Big Fall Creek, Alto dist.; Mackay. **Plant:** 2 gas-driven portable compressors and complete mining equipment. **Ore:** Lead-silver. **Men employed:** Average, 25. **Remarks:** Work started in July. About 4 miles of new road was constructed and mining equipment purchased, but as the road was not completed before winter set in, it was impossible to install the equipment and commence operations.

GREYHOUND MINING & MILLING CO., LTD.

Office: Gem Bldg., Boise. **Officers:** W. C. Annett, Pres.; Edward Smith, Sec., both of Boise. **Inc.:** Sept. 2, 1902. **Capital:** 1,500,000 shares; par value $1; 1,483,299 shares issued. **Property:** Greyhound group; 7 patented claims, Seafoam dist.; Stanley. **Plant:** Stamp mill, 10 1050-lb. stamps; crusher; 2 Dorr classifiers; 4 vanners and a small circular blast furnace. **Remarks:** Idle since 1910.

HECLA MINING CO. (See Shoshone County)

Office: Wallace. **Officers:** James F. McCarthy, Pres.-Mgr.; L. E. Hanley, Sec., both of Wallace. **Inc.:** Sept. 26, 1898. **Capital:** 1,000,000 shares; par value 25c; all shares issued.

SOUTH BUTTE GROUP

Property: 17 unpatented claims, Bayhorse dist.; Clayton; held under lease and option. R. R. Mackay, 70 miles. **Development:** Principally by 1 tunnel 1000 ft. long, in which is a vertical shaft 50 ft. deep. **Plant:** Gas-driven hoist; camp and complete hand mining equipment. **Ore:** Lead-silver. **Men employed:** Average, 10. **Remarks:** In 1926 the property was acquired, mine plant and camp installed and work started on extending the shaft. In 1927 the shaft was extended to a total depth of 250 ft., at which depth a large amount of crosscutting and drifting was performed. Operations were suspended in October, and the equipment was removed.

MOUNTAIN KING GROUP

Property: 15 unpatented claims, Sheep Mountain dist.; Stanley; held under lease and option from J. B. Eldridge, Boise. R. R. Ketchum, 115 miles. **Development:** By 2 tunnels: No. 1, 250 ft. long; No. 2, 800 ft. long. They are connected by a 70-ft. raise. **Ore:** Lead-silver. **Men employed:** Average, 7. **Remarks:** Active development work maintained until August, at which time the option was surrendered.

JOSEPHUS LAKE GROUP

Property: 6 unpatented claims, Seafoam dist.; Stanley; held under lease and option from E. H. Hasbrouck, Boise. R. R. Ketchum, 110 miles. **Men employed:** Average, 4. **Remarks:** Small amount of development work during the summer months.

HORSE SHOE COPPER CO., LTD.

Office: Mackay. **Officers:** Geo. L. Morgan, Pres.-Mgr.; D. V. Archbold, Sec., both of Mackay. **Inc.:** Dec. 10, 1903. **Capital:** 1,000,000 shares; par value $1; 916,150 shares issued. **Property:** Horse Shoe group; 20 unpatented claims, Alder Creek dist.; Mackay. **Development:** This mine is developed principally by 3 tunnels and 1 vertical shaft, 350 feet deep, and a large amount of crosscuts, drifts and raises, totalling over 2000 ft. **Plant:** MINE: Electrically-driven 2-drill compressor and hoist. Complete mine camp. **Ore:** Lead-zinc-silver, copper-silver. **Remarks:** Property under lease and option to Kay Development Co., which see.

IDAHO HERMIT MINES, INC.

Office: 25 Broadway, New York. **Officers:** Kirby Thomas, Pres.-Mgr.; Geo. Hoy, Sec., both of New York. **Inc.:** May 16, 1927. **Capital:** 3,000,000 shares; par value $1; 1,500,000 shares issued. **Property:** Hermit group; 19 unpatented claims, Boulder dist.; Mackay. **Development:** Principally by 1 tunnel 600 ft. long. **Ore:** Lead-zinc-silver. **Men employed:** Average, 2. **Remarks:** Small amount of work during the summer months.

IDAHO METALS CO.

Office: Mackay. **Officers:** L. R. Eccles, Pres., Ogden, Utah; J. L. Bills, Mgr., Mackay. **Inc.:** Oct. 8, 1921. **Capital:** 1,200,000 shares; par value $1. Capitalization increased on November 27, 1926, to 2,000,000 shares; par value $1; all shares issued. **Property:** Empire Copper group; 19 patented, 21 unpatented claims, Alder Creek dist.; Mackay. **Development:** Over 20 miles of underground workings, the principal entries being the Cossack and Alberta tunnels; the Cossack is 650 ft. below the Alberta tunnel; the principal shaft is the Empire, which is in the Alberta tunnel and extends 350 ft. below. **Plant:** MINE: Air-driven hoist; 20-drill, steam-driven Laidlaw-Dunn-Gordon compressor, and an aerial tramway 16,300 ft. long connecting mine with railroad. MILL: 200-ton concentrator, consisting of fine grinding and flotation. **Ore:** Copper-silver-gold. **Men employed:** Average, 50. **Remarks:** Active mining and milling operations were maintained throughout the year under the leasing system. This system does not permit further development work, which is necessary and fully warranted, particularly in the Cossack tunnel at a depth of 1600 ft. on the vein. An attempt to finance this work was made during the year.

IVANHOE MINING CO.

Office: 485 California St., San Francisco, Cal. **Officers:** Harry L. Tevis, Pres.; William Letson, Sec., Both of San Francisco, Cal. **Inc.:** Filed in Idaho, July 28, 1909. **Capital:** 2500 shares; par value $1; all shares issued. **Property:** Badger group; 6 patented claims, Yankee Fork dist.; Clayton. **Remarks:** Idle for many years.

KAY DEVELOPMENT CO., INC.

Office: 253 Broadway, New York. **Officers:** Wayne Darlington, Pres.-Mgr., Mackay; Kenneth O'Brien, Sec., New York City. **Inc.:** March 17, 1924. **Capital:** 5000 shares; par value $100; shares issued, unknown. **Property:** Lease and option on the property of the Horse Shoe Copper Co., Ltd., Alder Creek dist.; Mackay. **Development:** Principally by 2 tunnels, No. 1, 450 ft. long; No. 2, 600 ft. long; and a 2-compartment vertical shaft 350 ft. deep, in which are 4 intermediate levels. **Plant:** Electrically-driven 2-drill compressor, and hoist; complete mining equipment and mine camp. **Ore:** Lead-zinc-silver, copper-silver. **Men employed:** Average, 4. **Remarks:** Small amount of work during the early part of the year which disclosed a large body of complex lead-zinc ore.

LIVINGSTON MINES CORPORATION

Office: 25 Broad St., New York. **Officers:** A. W. Walker, Pres.-Mgr., Mackay; James A. Dayton, Sec., New York. **Inc.:** July 23, 1923. **Capital:** 2,000,000 shares; par value $1. Capitalization increased on Sept. 21, 1926, to 3,000,000 shares; par value $1; 2,255,000 shares issued. **Property:** Livingston group; 7 patented, 13 unpatented claims, Boulder dist.; Mackay, 62 miles. **Development:** Principally by 7 tunnels, averaging from 200 to 2400 ft. in length; No. 2, or Livingston, tunnel is 2000 ft. long, in which are 3000 ft. of crosscuts and drifts. Total development on Livingston lode, approximately 8700 ft. **Plant:** MINE: 3 electrically-driven compressors, a 12x14 Sullivan, a 10x10 I-R, and a 12x16 I-R; storage-battery locomotive haulage; complete mining equipment and mine camp; 3-mile aerial tramway connecting Livingston No. 2 tunnel with the mill. MILL: 300-ton concentrator, including flotation, Blake crusher, Symonds disc-crusher, Davis rolls, 2 6-ft. Hardinge ball mills, 6 Wilfley tables, Callow flotation, complete mill camp. POWER PLANT: 380-h. p. hydroelectric power plant, supplemented with a 250-h. p. I-R vertical Diesel engine; 8-mile electric tranmission and telephone lines connecting power plant, mill and mine. **Ore:** Lead-silver. **Men employed:** Average, 128. **Remarks:** This company maintained the largest payroll of any mine in southern Idaho throughout the year. In addition to continuous production, it re-designed and rebuilt its mill, performed a large amount of development work, and rebuilt and maintained over 20 miles of its road.

LOON CREEK HYDRAULIC PLACER MINING CO., LTD.

Office: 301 S. Main St., Salt Lake City, Utah. **Officers:** J. Frank Judge, Pres., Los Angeles; John J. Harvey, Sec., Salt Lake City; John P. Boyle, Mgr., Stanley. **Inc.:** May 17, 1905. **Capital:** 300,000 shares; par value $1; all shares issued. **Property:** 4 unpatented placer claims, Loon Creek dist.; Stanley. **Plant:** 4000 ft. timber flume, 5 ft. wide and 3 ft. high; two-thirds of a mile of ditch; sawmill, and complete mine camp. **Remarks:** This company owns a large tract of placer ground suitable for hydraulic mining. Annual labor only.

LUCKY STRIKE MINING CO. NO. 1.

Office: Hollister. **Officers:** Henry Jones, Pres.; A. F. Craven, Sec.; Ora Jones, Mgr., all of Hollister. **Inc.:** April 27, 1917. **Capital:** 500,000 shares; par value $1; 465,000 shares issued. **Property:** Lucky Strike group; 5 patented claims, Joe's Gulch, Stanley dist.; Stanley. **Development:** By 3 tunnels; total development approximately 1000 ft. **Ore:** Gold. **Remarks:** Idle.

MAC GINNISS-WALKER METALS CO.

Office: Room 1618, 25 Broad St., New York City. **Officers:** John MacGinniss, Pres.; James A. Dayton, Sec., both of New York; A. W. Walker, Mgr., Mackay. **Inc.:** May 25, 1925. **Capital:** 3,000,000 shares; par value $1; all shares issued.

WHY NOT GROUP

Property: 2 patented, 3 unpatented claims, Yankee Fork dist.; Clayton. **Development:** Principally by 1 tunnel, which is over 700 ft. long. **Ore:** Gold-silver. **Men employed:** Average, 4. **Remarks:** Work was maintained throughout the year in extending the principal tunnel, which is a crosscut.

PHI KAPPA GROUP

Property: Phi Kappa group, 1 patented, 8 unpatented claims; Alto dist.; Mackay. R. R. Ketchum, 15 miles. **Plant:** Gas-driven compressor, complete mining equipment and camp. **Ore:** Lead-zinc-silver. **Men employed:** Average, 6. **Remarks:** Continuous development throughout the year.

MONTE CRISTO GOLD MINES CO.

Office: Pocatello. **Officers:** W. H. Bohlscheid, Pres.-Mgr.; E. W. Larsen Sec., both of Pocatello. **Inc.:** March 19, 1917. **Capital:** 1,000,000 shares; par value $1; 639,000 shares issued. **Property:** Monte Cristo group; 6 unpatented claims, Loon Creek dist.; Clayton. **Development:** By 2 tunnels: No. 1, 340 ft. long; No. 2, 780 ft. long. **Ore:** Gold. **Remarks:** Annual labor only.

MULE SHOE MINING CO.

Office: 580 Hamilton Court, Salt Lake City, Utah. **Officers:** R. W. Johnson, Pres.-Mgr.; R. L. Johnson, Sec., both of Salt Lake City. **Inc.:** June 6, 1927. **Capital:** 1,000,000 shares; par value 10c; 70,000 shares issued. **Property:** Mule Shoe group; 7 unpatented claims, Bayhorse dist.; Clayton. **Development:** By 2 tunnels: No. 1, 225 ft.; No. 2, 400 ft. **Ore:** Lead-silver. **Men employed:** Average, 3. **Remarks:** Active development work throughout the year, consisting of driving a lower tunnel.

PHEMSPACE MINES CO.

Office: 721 Seventh St., Rochelle, Ill. **Officers:** E. M. Wagner, Pres., P. A. Wagner, Sec., both of Rochelle, Ill. **Inc.:** Jan. 3, 1906. **Capital:** 1,000,000 shares; par value $1; 100,000 shares issued. **Property:** Phemspace group; 14 unpatented claims, Stanley dist.; Stanley. **Development:** By 5 tunnels, totaling approximately 1400 ft.

RAMSHORN MINES CO.

Office: 321 Felt Bldg., Salt Lake City, Utah. **Officers:** O. J. Salisbury, Pres.; C. B. Felt, Sec., both of Salt Lake City, Utah. **Inc.:** July 14, 1919. **Capital:** 150,000 shares; par value $10; all shares issued. **Property:** Ramshorn and Beardsley groups; 14 patented, 2 unpatented claims, Bay Horse dist.; Bay Horse. **Development:** Approximately 6½ miles of underground workings with 10 intermediate levels. **Plant:** MINE: Laidlaw-Dunn-Gordon duplex 13x8x10 compressor, electrically driven; complete mine equipment and camp. MILL: 60-ton fine grinding flotation, gyratory crusher; primary and secondary rolls; ball mill; Dorr classifier; Fagergren and Janney flotation cells; American vacuum filter; dryer. Entire mill electrically driven. **Ore:** Silver-copper, lead. **Men employed:** 10 lessees. **Remarks:** Property operated throughout the year by lessees, who produced and marketed a small tonnage of ore.

SALMON RIVER MINING CO.

Office: c-o U. S. Trust Co. Terre Haute, Ind. **Officers:** John T. Beasley, Pres.; William K. Hamilton, Sec., both of Terre Haute, Ind. **Inc.:** July 6, 1910. **Capital:** 500,000 shares; par value $1; 400,000 shares issued. **Property:** Pacific group; 12 patented claims, Bay Horse dist.; Bay Horse. **Remarks:** Idle for 14 years.

SEAFOAM MINES CORPORATION

Office: Seafoam. **Officers:** J. C. Hungerman, Pres.; Geo. L. Lafbury, Sec., both of Pittsburgh, Pa.; Walter Hovey Hill, Managing Director, Seafoam. **Inc.:** Oct. 17, 1923. **Capital:** 500,000 shares; no par value; 350,000 shares issued. **Property:** 16 patented, 1 unpatented claim, Seafoam dist.; Stanley. R. R. Ketchum, 104 miles. **Development:** Total development approximately 2300 ft., the principal part of which is confined to the Silver King claim, where it opens the vein 200 ft. in depth. **Plant:** MINE: Electrically-driven 8x10 I-R compressor; steel sharpener; complete mining equipment; steam-driven saw-mill; mine camp consisting of a large boarding house, 2 two-story bunkhouses, and 10 residences. MILL: 50-ton amalgamation, including fine grinding and table concentration. POWER PLANT: 230-h. p. hydroelectric power plant, operating under a 270-ft. head through a 3400-ft. flume; 4-mile transmission line. **Ore:** Gold-silver-lead. **Men employed:** Average, 40. **Remarks:** During the year a saw-mill, hydroelectric plant, mine plant and mill were constructed and installed; 2 large bunkhouses and 6 small houses erected; and water and electric-lighting systems installed. In addition to the foregoing, about 800 ft. of development work was performed on the Silver King claim. A post office, known as Seafoam, was created, and a mail route from Stanley established.

SULPHIDE MINING CO.

Office: Clayton. **Officers:** A. G. Clark, Pres.-Mgr., Clayton; C. E. Crissinger, Sec., Pocatello. **Inc.:** July 29, 1927. **Capital:** 50,000 shares; par value $1; 18,000 shares issued. **Property:** 17 unpatented claims, Bay Horse dist.; Clayton; held under lease and option. **Development:** Principally by 1 tunnel 400 ft. long. **Ore:** Lead-silver. **Men employed:** Average, 3. **Remarks:** A new organization, which drove its projected 900-ft. tunnel about 400 ft. during the year.

TWIN APEX MINES CO.

Office: 423 Ness Bldg., Salt Lake City. **Officers:** H. S. Brooks, Pres.; G. F. McGonagle, Sec., both of Salt Lake City; Wm. McClure, Mgr., Clayton. **Inc.:** Sept. 19, 1925. **Capital:** 1,000,000 shares; par value 5c; 683,720 shares issued. **Property:** Twin Apex group; 9 unpatented claims, on Squaw Creek, Bay Horse dist.; Clayton. **Development:** Principally by 2 tunnels: No. 2, 410 ft. long; No. 3, or crosscut, 580 ft. long. **Plant:** Gas-driven 8x9 Sullivan compressor; complete mining equipment and camp. **Ore:** Lead-silver. **Men employed:** Average, 7. **Remarks:** On Nov. 2 contract was let for driving a 1000-ft. crosscut tunnel which will open the vein 300 ft. below No. 2 tunnel; 580 ft. of this crosscut had been driven at the close of the year.

WHITE KNOB MINING CO.

Office: Newhouse Bldg., Salt Lake City, Utah. **Officers:** D. D. Muir, Jr., Pres.; W. W. Rager, Sec., both of Salt Lake City, Utah. **Inc.:** Aug. 23, 1919. **Capital:** 500,000 shares; par value $1; 127,510 shares issued. **Property:** White Knob group; 3 unpatented claims, Alder Creek dist.; Mackay. **Development:** Principally by 2 tunnels and 1 vertical shaft 250 feet deep. **Plant:** 40-h. p. gas-driven hoist. **Ore:** Lead-silver. **Remarks:** Operated by lessees who made a number of shipments during the year.

YANKEE FORK PLACER CO., LTD.

Office: 605 Eastman Bldg., Boise. **Officers:** James H. Hawley, Pres.; James H. Hawley, Jr., Mgr., both of Boise. **Inc.:** April 7, 1906. **Capital:** 400,000 shares; par value $1; all shares issued. **Property:** Bonanza group; 5 patented placer claims; 320 acres on Yankee Fork Creek, Yankee Fork dist.; Clayton.

ELMORE COUNTY

Elmore is one of the southwestern counties, being bounded on the south by Owyhee, on the west by Ada, on the north by Boise, and on the east by Blaine, Camas, and Gooding counties. A large part of the drainage basin of the Boise River is included within its 2808 square miles, which was accredited with a population of 5087 in the 1920 census. The chief industries are stockraising—principally sheep—farming, and mining.

The southern part of the county is served by the main line of the O. S. L. Railroad and the principal east-west State highway, the Old Oregon Trail; a well built and maintained system of county roads extends into all the various mining districts and sections. Mountain Home is the largest town and county seat.

The principal mineral resources are gold, silver, copper, lead, zinc, arsenic, molybdenum, diatomaceous earth, and potassium nitrate.

In past years this county was a noted producer of high-grade gold-silver ores and placer gold, particularly when the mines in the Atlanta and Rocky Bar districts were being worked. The placer ground which could be hydraulicked has long been exhausted, and the quartz mines have been dormant for years, having been closed down either through litigation, lack of power, or finances. These districts offer many opportunities to development companies and, since power is within easy reach from Featherville, there appears to be no reason why the mines are not receiving more attention.

The South Park Dredging Co. at Featherville continues to be the largest mining enterprise in the county. The dredge was operated the greater part of the year, and the tailing stacker and digging ladder were lengthened to permit digging at a greater depth. The record this enterprise is making is a big factor in the welfare of the district and is attracting attention to the mineral resources and possibilities of this part of the State.

The Rocky Bar district witnessed a little improvement over that of the previous year in the starting of new enterprises, although no work of any importance was performed.

The Atlanta district was more active, witnessing more investigations and the initiation of more new enterprises than at any time during the past ten years. Two old deep mines resumed operations under new organizations, and plant construction on a hydraulic placer mine by the La Trinidad Mining Co. was maintained throughout the summer months.

The Franklin Consolidated Gold Mines Co., at the old Franklin mine in the Pine Grove district, was idle during most of the year, due to litigation.

The Omo Mines Corporation at the Mountain View mine and the S. E. Mining Co., both at Pine; the Apex Gold Mining Co. and the Blake's Gulch Gold Mining Co., both at Rocky Bar, actively developed their mines throughout the year.

APEX GOLD MINING CO.

Office: Box 165, Nampa. **Officers:** Dr. J. C. Lay, Pres., M. A. Cook, Sec., both of Nampa. **Inc.:** Oct. 15, 1926. **Capital:** 400,000 shares; par value $1; 220,000 shares issued. **Property:** West Ophir group; 5 unpatented claims; Rocky Bar. **Development:** By 5 tunnels, totaling about 800 ft. **Ore:** Gold. **Men employed:** Average, 4. **Remarks:** Active work during the summer months.

BLACKSTONE MINING CO., LTD.

Officers: James H. Hawley, Pres.; Charles W. Mack, Sec., both of Boise. **Inc.:** Dec. 26, 1899. **Capital:** 1,000,000 shares; par value 10c; shares issued, unknown. **Property:** 5 patented claims, Blackstone dist.; Hill City.

BLAKE'S GULCH GOLD MINING CO.

Office: Mountain Home. **Officers:** Seth Harris, Pres.-Mgr.; C. B. Clays, Sec., both of Mountain Home. **Inc.:** May 11, 1927. **Capital:** 100,000 shares; par value $1; 62,800 shares issued. **Property:** Commonwealth group; 2 unpatented claims, Bear Creek dist.; Rocky Bar. **Development:** By 2 tunnels: No. 1, 185 ft.; No. 2, 600 ft. **Ore:** Gold. **Men employed:** Average, 2. **Remarks:** Active work throughout the year.

DALEY CONSOLIDATED MINES CO.

Office: Mountain Home. **Officers:** Daniel Reber, Pres.-Mgr.; Max Wagener, Sec., both of Mountain Home. **Inc.:** Nov. 1, 1913. Charter forfeited Nov. 30, 1927. **Capital:** 1,500,000 shares; par value $1; 1,200,000 shares issued. **Property:** Daley group; 50 unpatented claims, Dixie, unorganized dist.; Bennett. **Development:** Approximately 4500 ft. of underground workings, the principal of which are: A tunnel 1800 ft. long; a vertical shaft 100 ft. deep; and an inclined shaft 460 ft. long with 5 intermediate levels. **Plant:** Two 40-h. p. boilers; steam-driven hoist and compressor; complete mining equipment and camp. **Ore:** Gold-lead-silver. **Remarks:** Annual labor only.

EUREKA OIL CO.

Office: Twin Falls. **Officers:** A. Beverly Howard, Pres.-Mgr.; Orville S. Peet, Sec., both of Twin Falls. **Inc.:** April 2, 1927. **Capital:** 500,000 shares; par value $1; all shares issued. **Property:** Oil and gas leases on 610 acres of patented farm land near Hammett. **Mineral sought:** Oil and gas. **Remarks:** The president of this company states: "This company owns 3 leases in the Hammett Structure, acquired about a month ago. This company expects to be a lease-holding company until a test is completed in the Hammett Valley."

FRANKLIN CONSOLIDATED GOLD MINES CO.

Office: Pine. **Officers:** John J. Stanford, Pres.; Fred T. Kelly, Sec.-Mgr., both of Pine. **Inc.:** Dec. 22, 1925. **Capital:** 1,250,000 shares; par value $1; 634,400 shares issued. **Property:** Franklin group; 2 patented, 4 unpatented claims, held under lease and option, Pine Grove dist.; Pine. **Development:** Approximately 3000 ft. of underground workings, the principal of which is No. 3 tunnel, 860 ft. in length. **Plant:** An old 10-stamp mill including cyanide equipment. **Ore:** Gold. **Men employed:** Average, 2. **Remarks:** Owing to litigation, only the necessary annual labor was performed.

GAS DOME OIL CO.

Office: Smith-Rice Bldg., Twin Falls. **Officers:** A. Beverly Howard, Pres.-Mgr., Twin Falls; Freda Maxwell, Sec., Buhl. **Inc.:** June 20, 1927. **Capital:** 500,000 shares, par value $1; 200,000 shares issued. **Property:** Oil and gas leases on patented farm lands near Hammett. **Mineral sought:** Oil and gas.

GEORGE F. ROTH CO.

Office: P. O. Box 147, Rochester, N. Y. **Officers:** George F. Roth, Pres.; Walter J. Duffy, Sec., both of Rochester, N. Y. **Inc.:** June 17, 1909. **Capital:** 2500 shares; par value $100; 2102 shares issued. **Property:** Homestake group; 7 patented, 3 unpatented claims; Neal dist.; c-o Mayfield Stage, Boise. **Ore:** Gold. **Remarks:** Idle.

LA TRINIDAD MINING CO.

Office: Las Vegas, Nev. **Officers:** Fred Hess, Pres.; Peter Buol, Sec., both of Las Vegas, Nev.; E. P. Jeanes, Mgr., Atlanta. **Inc.:** Filed in Idaho Sept. 9, 1926. **Capital:** 2,500,000 shares; par value $1; 1,500,000 shares issued. **Property:** Black Warrior Placers; 12 unpatented claims, held under lease and option; Black Warrior dist.; Atlanta. **Plant:** Saw-mill and complete hydraulic mining equipment. **Ore:** Placer gold. **Men employed:** Average, 30. **Remarks:** During the summer months a large amount of ditching was done; camp buildings and 7 miles of road were constructed; and hydraulic equipment was installed.

LITTLE QUEEN GROUP

Owner: E. F. Money, 937 34th St., Seattle, Wash. **Inc.:** Not incorporated. **Property:** 3 unpatented claims, Middle Boise dist.; Atlanta. **Development:** Principally by 1 tunnel 100 ft. long. **Plant:** 7-ton Ellis mill and amalgamation. **Ore:** Gold. **Remarks:** Small amount of work during the year.

MARSH CREEK MINING CO.

Officers: Roy Y. Bogard, Pres.-Mgr., Burns, Ore.; Curtis F. Pike, Sec., 1317 Idaho St., Boise. **Inc.:** July 9, 1921. **Capital:** 1,000,000 shares; par value $1; 39,985 shares issued. **Property:** 2 unpatented claims on Marsh Creek, Bear Creek dist.; Featherville.

NORTHWESTERN DEVELOPMENT CO.

Office: P. O. Box 1035, Boise. **Officers:** William Williams, Pres.-Mgr.; Geo. L. Fleharty, Sec., both of Boise. **Inc.:** April 30, 1927. **Capital:** 1,500,000 shares; par value $1; 900,000 shares issued. **Property:** 5 unpatented placer claims on Boise River; unorganized dist. **Ore:** Placer gold.

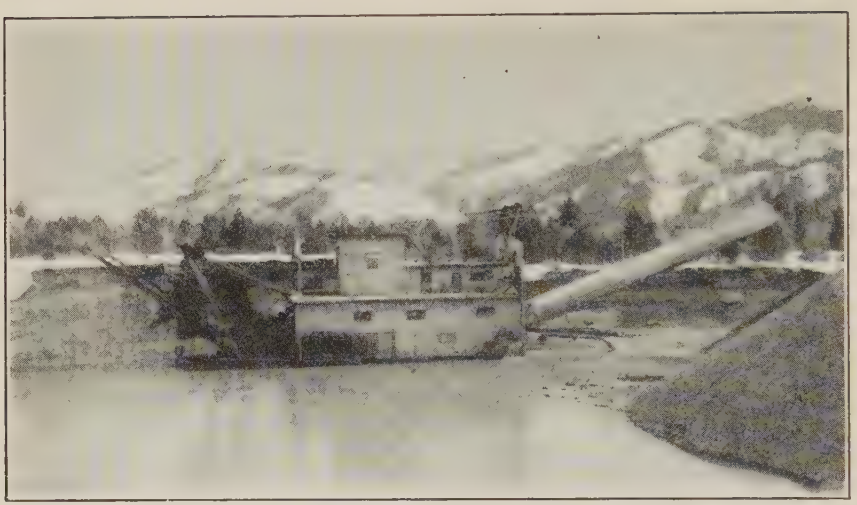
OMO MINES CORPORATION

Office: 326 Lindelle Blk., Spokane, Wash. **Officers:** J. T. Omo, Pres.-Mgr.; Alfred Hage, Sec., both of Spokane. **Inc.:** Jan. 19, 1926, as Omo Mining & Leasing Co., name changed March 3, 1926. **Capital:** 2,000,000 shares; par value 5c; 1,500,500 shares issued. **Property:** Mountain View group; 3 unpatented claims held under lease and option; Pine Grove dist.; Pine. **Ore:** Gold. **Men employed:** Average, 3. **Remarks:** Active throughout the year in extending its crosscut, the funds for which work were derived from 7 stock assessments, each at the rate of 2 mills per share.

ROCKY BAR MINING CO.

Office: 1001 Paulsen Bldg., Spokane, Wash. **Officers:** M. G. Martindale, Pres.-Mgr.; R. C. Corbet, Sec., both of Spokane. **Inc.:** Sept. 18, 1922. **Capital:** 50,000 shares; par value $1; 18,369 shares issued. **Property:** 5 patented, 7 unpatented claims, Bear Creek dist.; Rocky Bar.

S. E. MINING CO.



Office: Pine. **Officers:** W. C. Settle, Pres., Pine; G. T. Ellison, Sec., Glenns Ferry. **Inc.:** Sept. 30, 1926. **Capital:** 50,000 shares; par value $1; all shares issued. **Property:** 1 patented claim, held under lease; Pine Grove dist.; Pine. **Development:** By 2 tunnels: No. 1, 180 ft. long; No. 2, 275 ft. long. **Ore:** Gold. **Men employed:** Average, 2. **Remarks:** Active development work throughout the year.

SOUTH PARK DREDGING CO.

Office: 351 California St., San Francisco, Cal. **Officers:** W. P. Hammon, Pres.; A. L. Dahl, Sec., both of San Francisco, Cal. **Inc.:** Sept. 12, 1921. **Capital:** 50,000 shares; no par value; all shares issued. **Property:** 1100 acres of dredging land on Feather River, Featherville dist.; Featherville. **Plant:** Yuba dredge, 9-cu.-ft. buckets, close connected. The hull is constructed entirely of Oregon fir, 105 ft. long with 44 ft. 7 in. beam, 10 ft. deep, drawing 7 ft. water. The bucket line is composed of 67 buckets connected with pins weighing 150 lbs. each; the buckets weigh approximately 2000 lbs. each. The digging ladder is of the plate girder type, 75 ft. long and weighs approximately 50 tons. The lower tumbler is round and spool shaped; the upper tumbler is hexagonal. The tailing stacker is 124 ft. long and provided with a 36 in. conveyor belt. The entire dredge is electrically driven, 520 h. p. being required, and is operated from the winch room. The pump capacity is 5000 gallons per minute. **Ore:** Placer gold. **Men employed:** Average, 20. **Remarks:** Construction work was started in October, 1921, and the dredge commenced digging on August 21, 1922; a very remarkable record, as the entire dredge had to be transported 43 miles over rough mountain roads. In addition to building the dredge, a power line 43 miles long from Mountain Home to the dredge was built. The entire plant, including power line, involved an expenditure of over half a million dollars before a wheel was turned. Since digging was started active operation has been maintained. During 1926 the digging and stacker ladders were lengthened to permit mining at a greater depth. Continuous operations throughout the greater part of the year.

STANLEY-FIVE BARS MINING CO.

Office: 517 Idaho Bldg., Boise. **Officers:** O. O. Haga, Pres.; Mrs. Anna S. Waters, Vice.-Pres.-Treas., both of Boise. **Inc.:** Sept. 8, 1925. **Capital:** 25,000 shares; par value $1; 20,000 shares issued. **Property:** Five Bars group; 4 unpatented placer claims, Middle Boise dist.; Atlanta.

FREMONT COUNTY

Coal, phosphate rock, oil shale, and asbestos occur in different sections of this county. The occurrence of coal in commercial quantities in the northeastern corner of the county has been reported, but these deposits are too far removed from transportation to be available. The other deposits have never been sufficiently developed to prove their extent.

GEM COUNTY

Gem is one of the smallest counties in area in the State, but one of the largest in population per square mile. Its area is 567 square miles, and the 1920 census credited it with a population of 6427, or 11.3 persons per square mile. The chief industries are fruit growing, farming, and livestock. It is particularly noted for its fruit farming, which is confined to the valley of the Payette River, which flows westerly through the southern end of the county.

It is one of the southwestern counties, being bounded by Ada, Canyon, Payette, Washington, Adams, Valley, and Boise counties. The drainage basin of Squaw Creek and twenty-five miles of the Payette River valley make up the larger part of its area. Emmett, the county seat and only settlement of importance, is near the center of the southern part of the county.

The county is served by a good system of locally maintained roads and by the Nampa-McCall and Payette-Emmett branches of the O. S. L. Railroad.

The Pearl district, once a famous gold-producing camp, and a few undeveloped sections where a small amount of prospecting has been done, are the only mineralized areas in the county. The principal minerals occurring in these districts are gold, silver, lead, zinc, copper, and arsenic. Gold predominates, and occurs in a free-milling quartz and combined with the sulphides of lead, zinc, and iron. The deposits containing the complex sulphide ore are of commercial importance and have not been mined, as transportation and the metallurgical methods in use at the time the Pearl district was active prevented profitable operations. The sulphide ores are amenable to modern flotation methods, and, as there is a large tonnage in many of the old mines that are lying dormant, they will again become profitable operations when properly equipped, financed, and managed.

During the year much publicity was given to the possibility of finding petroleum in this county. A preliminary investigation of conditions was made by geologists of the Idaho Bureau of Mines and Geology in 1926. These men collected a large amount of fossil material, which was examined by the U. S. Geological Survey. The Bureau summarized its findings with: "* * * It

appears that the hoped-for evidence of marine strata, with which oil throughout the world is associated, has not yet been found."

The Lincoln Mine Operating Co., which acquired the old Lincoln mine in 1926 and commenced its rehabilitation, was active throughout the year. The reconstruction of the mill was completed and a few tons of high-grade concentrate were marketed, the ore being derived from the upper part of the vein through a small secondary shaft. After the removal of this ore, mining operations were suspended and work was started on reopening the main shaft.

FELIX MINING CO.

Office: Boise. **Officers:** T. J. Jones, Pres.-Mgr., Boise. **Inc.:** July 25, 1917. **Capital:** 500 shares; par value $10; all shares issued. **Property:** Felix group; 5 patented claims, West View dist.; Pearl.

LINCOLN MINE OPERATING CO.

Office: Pearl. **Officers:** Wm. I. Phillips, Pres., Miami, Fla.; M. W. Hallam, Sec.; F. C. Mitchell, Mgr., both of Pearl. **Inc.:** May 20, 1926. **Capital:** 1,000,000 shares; par value 25c; all shares issued. **Property:** Lincoln group; 3 patented, 5 unpatented claims, held under lease and option from Alexander Lewis, 115 Broadway, New York. West View dist.; Pearl. **Development:** By 2 vertical shafts, one of which is 540 ft. deep; total development, approximately 8000 ft. **Plant:** MINE: 2 electrically-driven hoists, complete mining equipment. MILL: 100-ton concentrator, including flotation. **Ore:** Gold-silver-lead. **Men employed:** Average, 20. **Remarks:** This company, which acquired the old Lincoln mine in 1926 and commenced its rehabilitation, was active throughout the year. The reconstruction of the mill was completed and a few tons of high-grade concentrate were marketed, the ore being derived from the upper part of the vein through a small secondary shaft. After the removal of this ore, mining operations were suspended and work was started on reopening the main shaft.

YELLOW GOLD PLACER CO.

Office: Mountain Home. **Officers:** Ernest Tacho, Pres.; Hilla M. Tacho, Sec.; Edward N. Crawford, Mgr., all of Mountain Home. **Inc.:** May 16, 1927. **Capital:** 500,000 shares; par value $1; 250,015 shares issued. **Property:** Lease on 320 acres of farm land, West View dist.; Pearl.

GOODING COUNTY

Placer gold, which is found in the gravel bars and sand along the Snake River, constitutes the only mineral resource of this county. These deposits are worked in a limited manner, and generally return the operator a fair profit on his labor.

NAME OF MINE	MINING DIST.	OWNER	P. O. ADDRESS
Big Body Placer	Snake River	John Criswell	Clear Lake
Black Butte Placer	Snake River	A. S. Madalena	Clear Lake

IDAHO COUNTY

This county occupies a vast region about midway between the northern and southern boundaries of the State, extending from Montana, on the east, to Oregon, on the west. It is bounded on the north by Nez Perce, Lewis, and Clearwater counties, on the east by the State of Montana, on the south by Lemhi, Valley, and Adams counties, and on the west by the State of Oregon. It contains 8539 square miles, or an area which is larger than the combined areas of the States of Rhode Island, Delaware, and Connecticut. The 1920 census accredited it with a population of 11,749, or 1.4 persons to the square mile. The larger part of the population is located on Camas Prairie, a table-land of about 400 square miles. The chief industries are farming, principally wheat, for which Camas Prairie is famous; stockraising, and mining.

The western part of the county is served by the North and South State Highway, which extends from the southern to the northern boundary, and by the Elk City and Lewis & Clark highways, which are partly constructed. Its railroads are the Lewiston-Stites branch of the Northern Pacific Railroad, and the Lewiston-Grangeville branch, which is owned jointly by the Union Pacific and Northern Pacific railroads. Both these railroads serve Camas Prairie, or the northwestern part of the county. Grangeville is the largest town and county seat.

Idaho County is the largest in the State in area, and one of the greatest in diversity of mineral resources and mining opportunities. The principal metals and minerals which occur in sufficient extent to be of commercial importance are gold—placer and lode—silver, copper, lead, zinc, antimony, tungsten, asbestos, molybdenum, talc, and mica.

During the early days of Idaho this county was one of the largest gold-producing districts in the United States, and at the present time it offers more possibilities for profitable gold mining than any other section. Many of the millions produced during those days were won from placer deposits which occur in practically all the 17 mining districts within the county. Excepting the flat land and river bottoms, which are suitable for dredging, and which fully justify investigation, practically all the placer mines are exhausted.

The greatest handicap which the county is compelled to undergo is the lack of transportation, and under present road conditions only the highest grade free-milling ores can be successfully handled. Railroads into the various mining districts are a far removed possibility; however, a good automobile or motor truck road would serve to open many of the districts which are now dormant.

Much of the ore is a free-milling gold, and if not, a high-grade concentrate can be made which will permit a long haul. The latter statement applies particularly to the ores of the Ten Mile, Orogrande, Elk City, Buffalo Hump, and Dixie districts. The highway from Harpster to Elk City up the South Fork of the Clearwater River will make all these districts accessible by a water grade road, and their development will soon follow. This highway is one of the most meritorious projects in the State, and everyone interested in mining in these districts is looking forward to its early completion. In July, 1926, the prospectors and companies holding unpatented claims in the Elk City, Orogrande, Dixie, and Buffalo Hump districts voted to do their annual labor on this road. As a result of their faith in these districts, over six miles of road and a bridge crossing the Red River were constructed on the Elk City end during 1926 and 1927. The lower end of the road was extended a distance of six miles, and a further extension of eight miles during 1928 was provided for by the Forest Service in its allotment of expenditures for that year.

The gradual return to a more normal condition, under which gold mining is again becoming profitable, was reflected in this county during the year by a small, though substantial, increase in mining operations, investigations, and new enterprises. The most important of these was an investigation of the so-called dikes—low-grade free-milling gold ore—in the Elk City district by two large mining organizations. These investigations extended over a period of 60 days, and it was reported that the properties examined were favorably recommended.

The Empire Metals Co., owning 27 claims, built about four miles of road, constructed new cabins, installed a laboratory, and drove about 2000 feet of open cuts and tunnels. Seven other companies that are holding large acreages on the "dike zones" performed the necessary annual labor.

Mining in the Ten Mile district witnessed a decided impetus during 1927, in anticipation of the completion of the Elk City highway to Huston's in 1928, which will give an outlet to the mines in this district. Four new companies were organized and commenced operations; a large number of new claims were located; more work was performed; and the influx of prospectors and others was sufficient to justify the re-establishment of the post-office at Golden and the mail route into it. The principal new companies and operations were: The Buffalo-Idaho Mining Co. at the Mackey group, where a new gas-driven compressor was installed and active development work started; the Golden Mining & Power Co., whose property was optioned late in the year and work started; Miller & Sons, at the Yellow Pine group, who conducted work throughout the year which resulted in the development of some high-grade ore; and the optioning of the Pioneer Hill group at Newsome, owned by Timin and Braig, to Seattle, Washington, interests; A. S. Johnson at the Franklin mine; F. O. Muller of Clarkston, Washington, at the Lone Pine group; the Sphinx Gold Mining Co.; and William Huntley of Spokane, Washington, at the New York mine, were active throughout the year; Huntley's activities included milling operations.

Prospecting and development work in the Orogrande district exceeded that of 1926. Drilling operations to test the placer deposits on Crooked River were started, and one company conducted a small amount of hydraulicking. Discovery of new veins containing high gold values was reported by Frank Peck, a prospector, and by the Una Mine Co.

In the Dixie district the Mammoth Mine Corporation resumed operations with a small crew; Henry S. Hazlitt at the Pacific group operated his mill for a few weeks; and a new discovery by George L. Esh and associates caused considerable attention to be directed toward the district.

The American Eagle mine, owned by the Homestake Gold Mining Co., was operated for a few months by lessees; and the discovery of lead-silver ore in Success Gulch was reported. Some work was done also at the Black Pine group. These properties are all in the Elk City district.

The Florence district was more active than at any time in the past few years. There was an increase in company operations, as well as in prospecting, and one new discovery was reported.

The Garner Electric Range Co. was a new entry into the county. This company is interested in the development of the talc deposits on Little Salmon River near Riggins. Two grades of talc were being developed: The massive, which is carved into various shapes for use in electrical appliances; and the powdered variety.

The Warren district witnessed but little new work during the year, although it was reported that the Unity Gold Mines Co. at Warren, which was idle throughout 1926, resumed operations.

The Marshall Lake district was a little more active than in 1926. Two companies, whose organization is unknown, and the Old Kentuck Mining & Milling Co., a new company, conducted prospecting operations during the summer months. The Holte Mining Co. performed a little maintenance work in addition to the annual labor requirements.

Several placer mines in the Simpson district along the Salmon River, near Lucile and Riggins, were the scene of active operations and of small plant installations. The funds for this work were derived from active stock-selling campaigns. The Irbis Placer Co. constructed a 200-horsepower hydroelectric plant and new camp buildings, and installed power-driven pumps for hydraulicking; the Ruby-Gold Development Co. constructed a small gas-driven concentrating mill, designed to recover the "black sands" contained in its gravel deposit.

ABBA CORPORATION

Office: 128 Broadway, New York City. **Officers:** Henry W. Allen, Pres.; Charles H. Suhl, Sec., both of New York City. **Inc.:** Mar. 6, 1926. **Capital:** 50,000 shares; par value $1; 45,750 shares issued. **Property:** 4 patented claims, Warren dist.; Warren. **Ore:** Silver.

ALTA-IDAHO GOLD & COPPER MINING CO.

Officers: M. C. Hetler, Pres., Berwick, Pa.; James H. Fine, Sec., Cassadaga, Fla.; Geo. M. Snyder, Mgr., Pardee. **Inc.:** Filed in Idaho, June 17, 1903. **Capital:** 1,000,000 shares; par value $1; 758,000 shares issued. **Property:** Empire group; 11 unpatented claims, on South Fork of Clearwater River, Lolo dist.; Pardee. **Development:** Approximately 450 ft. of underground workings, the principal of which is 1 tunnel 250 ft. long. **Ore:** Gold-silver-copper. **Men employed:** 1 watchman.

BADGER MOUNTAIN MINING CO.

Office: Grangeville. **Officers:** Markus Lies, Pres., Cottonwood; Will C. Jones, Sec., Route 3, Seattle, Wash. **Inc.:** Feb. 13, 1925. **Capital:** 10,000,000 shares; par value 1c; 108,800 shares issued. **Property:** 2 patented, 7 unpatented claims, held under lease and option from Homestake Gold Mining Co.; Orogrande dist.; Orogrande. **Development:** By 3 tunnels, the longest of which is 460 ft. **Ore:** Gold.

BLACKTAIL MINING CO.

Office: 1517 E. 9th Ave., Spokane, Wash. **Officers:** R. E. Wakeley, Pres.-Mgr.; N. L. Wakeley, Sec., both of Spokane. **Inc.:** Dec. 3, 1914. **Capital:** 200,000 shares; par value $1; 121,920 shares issued. **Property:** 10 unpatented claims, Harpster dist.; Harpster. **Development:** By 2 tunnels: No. 1, 370 ft. long; No. 2, 70 ft. long. **Ore:** Gold. **Remarks:** Annual labor only.

BLUE RIBBON MINE

Owner: A. W. Boyd, Agent. **Property:** Blue Ribbon group; 5 unpatented claims, Elk City dist.; Elk City. **Development:** 1 tunnel about 400 ft. long; 1 shaft 100 ft. deep. **Ore:** Gold-silver. **Remarks:** One of the principal prospects in the Elk City district in which a large tonnage of ore has been developed.

BUFFALO-IDAHO MINING CO.

Office: 264 Jersey St., Buffalo, N. Y. **Officers:** Ray R. Becker, Sec., 372 Pearl St., Buffalo, N. Y.; Joseph A. Fields, Mgr., Newsome. **Inc.:** Nov. 7, 1927. **Capital:** 250,000 shares; par value $1; 75,000 shares issued. **Property:** Mackey group; 8 unpatented claims, Ten Mile dist.; Golden. **Development:** By 2 tunnels: No. 1, 273 ft.; No. 2, 320 ft. **Ore:** Gold. **Remarks:** After incorporation, this company installed a gas-driven compressor and complete mining equipment and started work on developing the property.

CLEARWATER MINING CO.

Office: Elk City. **Officers:** Wm. Hogan, Pres.-Mgr., Elk City; Lucy Schafer, Sec., New York City. **Inc.:** May 18, 1925. **Capital:** 10,000 shares; par value $10; all shares issued. **Property:** Clearwater group; 42 unpatented claims, Elk City and Orogrande dist.; Elk City. **Development:** Approximately 7000 ft. of short open cuts and tunnels. **Ore:** Gold. **Men employed:** Average, 6. **Remarks:** Annual labor only.

COMMODORE GOLD MINING CO.

Office: Lewiston. **Officers:** Wm. C. McNutt, Pres.-Mgr.; M. R. Morgan, Sec., both of Lewiston. **Inc.:** Mar. 28, 1921. **Capital:** 1,000,000 shares; par value $1; 241,515 shares issued. **Property:** Commodore group; 38 unpatented claims, at junction of Crooked River and South Fork of Clearwater River, Orogrande dist.; Elk City. **Development:** By 10 short tunnels, totaling approximately 500 ft., and 253 discovery pits. **Ore:** Gold. **Remarks:** Annual labor only.

CROOKS CORRAL MINES, LTD.

Office: Grangeville. **Officers:** Frank McGrane, Pres.; A. F. Parker, Sec., both of Grangeville. **Inc.:** Sept. 13, 1897. **Capital:** 1,000,000 shares; par value $1; 990,000 shares issued. **Property:** 8 patented placer claims, Crooks Corral dist.; Lucile.

EMPIRE METALS CO.

Office: Elk City. **Officers:** Wm. Hogan, Pres.-Mgr.; Carl Vermillion, Sec., both of Elk City. **Inc.:** Jan. 20, 1927. **Capital:** 999,000 shares; par value 50c; all shares issued. **Property:** 27 unpatented claims, Orogrande dist.; Orogrande. **Development:** By 10 open cuts and tunnels. **Ore:** Gold. **Men employed:** Average, 10. **Remarks:** During the year about 4 miles of new road and new cabins were constructed, a laboratory installed, and about 2000 ft. of open cuts and tunnels driven.

ERICKSON RIDGE DEVELOPMENT CO., INC.

Office: Elk City. **Officers:** Wm. Hogan, Pres.-Mgr., Elk City. **Inc.:** Aug. 25, 1926. **Capital:** 200,000 shares; par value $10; all shares issued. **Property:** Erickson Ridge group; 30 unpatented claims, Elk City dist.; Elk City. **Development:** Approximately 1500 ft. of short tunnels and open cuts. **Ore:** Gold. **Men employed:** Average, 3. **Remarks:** Annual labor only.

ESPERANZA GOLD DIKES MINING CORPORATION

Office: 802 Gasco Bldg., Portland, Ore. **Officers:** Edward M. Griffith, Pres., Grangeville; C. W. Twining, Sec., Portland, Ore. **Inc.:** Sept. 14, 1925. **Capital:** 1,000,000 shares; par value 25c; all shares issued. **Property:** Champion group; 18 patented claims, Orogrande dist.; Orogrande. **Development:** Approximately 4000 ft. of old workings. **Ore:** Gold.

GARNER ELECTRIC RANGE CO.

Office: P. O. Box 1166, Kellogg. **Officers:** W. C. Garner, Pres.; Sheldon C. Cox, Sec., both of Kellogg. **Inc.:** An association. **Capital:** 1,000,000 shares; par value $1; 450,530 shares issued. **Property:** 80 acres patented farm land near Pollock, held under lease and option; Riggins. **Mineral sought:** Talc. **Men employed:** Average, 4. **Remarks:** During the year this company actively developed a talc deposit near Riggins, on the Little Salmon River.

GOLDEN MINING & POWER CO.

Office: Golden. **Officers:** A. Marcuson, Pres.; R. B. Harris, Sec., both of Golden. **Inc.:** Nov. 12, 1926. **Capital:** 100,000 shares; par value $1; 52,250 shares issued. **Property:** French Pete group; 6 unpatented claims, Ten Mile dist.; Golden. **Development:** By 2 tunnels: No. 1, 300 ft.; No. 2, 1610

ft. **Plant:** Partly installed small stamp-mill. **Ore:** Gold. **Men employed:** Average, 5. **Remarks:** Small amount of repair and development work during the year.

GOLD ZONE MINING & MILLING CO., LTD.

Office: Grangeville. **Officers:** W. W. Brown, Pres.; Frank van Deventer, Sec., both of Grangeville; J. J. Schoner, Mgr., Elk City. **Inc.:** Sept. 9, 1919. **Capital:** 1,000,000 shares; par value 5c; 700,000 shares issued. **Property:** Gold Zone group; 3 unpatented claims, Elk City dist.; Elk City. **Ore:** Gold. **Remarks:** Annual labor only.

GOODENOUGH UNITED MINING & MILLING CO., LTD.

Office: Payette. **Officers:** L. I. Purcell, Pres.-Mgr., Payette; Tim Barton, Sec., Weiser. **Inc.:** Nov. 1, 1905. **Capital:** 1,000,000 shares; par value 25c; 535,560 shares issued. **Property:** Goodenough group; 10 patented claims, Marshall Lake dist.; Burgdorf. **Remarks:** Idle for many years.

HOLTE MINING CO.

Office: 112 N. 6th St., Boise. **Officers:** Leif T. Holte, Pres.-Mgr., Burgdorf; C. H. Nixon, Sec., Boise. **Inc.:** Jan. 12, 1920. **Capital:** 2,500,000 shares; par value $1; 1,000,000 shares issued. **Property:** Holte group, 22 unpatented claims, Marshall Lake dist.; Burgdorf. **Development:** Approximately 3200 ft. of underground workings, the principal of which are 4 tunnels: No. 1, 400 ft. long; No. 2, 1860 ft. long; No. 3, 600 ft. long; No. 4, 400 ft. long; 1 vertical shaft 150 ft. deep. **Plant:** MINE: Steam-driven compressor, complete mining equipment, sawmill, assay office and complete camp. MILL: 50-ton steam-driven Lane Chilean mill; cyanide plant. **Ore:** Gold. **Men employed:** Average, 3. **Remarks:** The principal tunnel was extended 40 ft. and roads and camp were repaired during the year.

HOMESTAKE GOLD MINING CO.

Office: 345 Peyton Blk., Spokane, Wash. **Officers:** Markus Lies, Pres., Cottonwood; W. Hubert Jones, Sec., Spokane, Wash.; Will C. Jones, Mgr., Seattle, Wash. **Inc.:** Jan. 7, 1919. **Capital:** 250,000 shares; par value $1; 247,000 shares issued. **Property:** American Eagle group; 26 patented, 6 unpatented claims, Elk City dist.; Elk City. **Development:** By 4 tunnels: No. 1, 345 ft.; No. 2, 1500 ft.; No. 3, 307 ft.; No. 4, 1157 ft.; and a vertical shaft 200 ft. deep. **Plant:** MINE: Steam-and-water-driven compressor; complete mining equipment and camp. MILL: Steam-driven 10-stamp mill with concentrating tables. **Ore:** Gold. **Men employed:** Average, 6. **Remarks:** The mill was repaired, and a small amount of mining and milling operations were conducted during the summer months by lessees.

IDAHO BUSTER MINING CO., LTD.

Office: 1022 Crocker Bldg., San Francisco, Cal. **Officers:** F. W. Bradley, Pres.; J. S. Wallace, Sec., both of San Francisco, Cal. **Inc.:** Dec. 9, 1908. **Capital:** 300,000 shares; par value $1; all shares issued. **Property:** Idaho Buster group; 4 patented claims, Elk City dist.; Elk City. **Remarks:** Idle since November, 1909.

IDAHO-COMSTOCK

Office: 803 Leary Bldg., Seattle, Wash. **Officers:** Thos. H. Minear, Pres.-Mgr., People's Store, Tacoma, Wash.; Chas. E. Shepard, Sec., 803 Leary Bldg., Seattle, Wash. **Inc.:** An association. **Capital:** 2,000,000 shares; no par value; all shares issued. **Property:** Idaho-Comstock group; 12 patented claims, Dixie dist.; Dixie. **Development:** By 3 tunnels: No. 1, 700 ft. long; No. 2, 200 ft. long; No. 3, 200 ft. long; 1 vertical shaft 140 ft. deep. **Ore:** Gold. **Remarks:** Idle.

IDAHO GOLD FIELD MINING CO.

Office: 601 Mohawk Bldg., Spokane, Wash. **Officers:** J. H. LeClaire, Pres., Los Angeles, Cal.; Irene Jones, Sec.; J. E. Long, Mgr., both of Spokane. **Inc.:** Oct. 10, 1924. **Capital:** 1,000,000 shares; par value $1; no shares issued. **Property:** 14 unpatented placer claims, Newsome dist.; Newsome. **Ore:** Placer gold. **Remarks:** A small amount of work was done during the summer months.

IDAHO & NEVADA MINING CO.
Office: 209 4th St., Portland, Ore. **Officers:** Richard Becker, Pres.; Norman W. Nute, Sec., both of Portland, Ore. **Inc.:** June 9, 1924. **Capital:** 5,000,000 shares; par value 5c; 2,244,620 shares issued. **Property:** Major group; 8 unpatented claims, Elk City dist.; Elk City. **Development:** 4 tunnels; 7 shafts. **Plant:** MINE: Steam-driven hoist. MILL: 10 stamps; steam-driven. **Ore:** Gold. **Remarks:** Annual labor only.

IRBIS PLACER CO.
Office: Grangeville. **Officers:** G. S. DeWolf, Pres.-Mgr., Grangeville; J. M. McIntire, Sec., Casper, Wyo. **Inc.:** Never filed in Idaho; form of organization unknown. **Capital:** 75,000 shares; par value $1; 50,000 shares issued. **Property:** Butcher Bar group; 6 unpatented claims, Simpson dist.; Lucile. **Ore:** Placer gold. **Men employed:** Average, 10. **Remarks:** A 200-h. p. hydroelectric plant and new camp buildings were constructed, and power-driven pumps for hydraulicking partly installed.

JUMBO MINING & MILLING CO., LTD.
Office: Lewiston. **Officers:** J. C. Jansen, Pres., Lewiston Orchards; W. E. Howard, Sec., 537 San Francisco St., Pomona, Cal. **Inc.:** Aug. 13, 1902. **Property:** Jumbo group; 5 patented claims, Robins dist.; Orogrande.

LUCKY FIVE MINING CO.
Office: P. O. Box 1182, Spokane, Wash. **Officers:** Jos. Clinkenbeard, Pres.; C. Clinkenbeard, Sec.-Mgr., both of Spokane. **Inc.:** Never filed in Idaho; form of organization unknown. **Capital:** 1,499,990 shares; par value 10c; 626,590 shares issued. **Property:** Relief Creek placers; 12 unpatented claims, Orogrande dist.; Orogrande. **Ore:** Placer gold. **Men employed:** Average, 2. **Remarks:** Small amount of ditch and flume repair work done during the year.

McKINLEY GOLD MINING CO.
Office: Kellogg. **Officers:** P. P. Weber, Pres.; A. H. Polson, Sec., both of Kellogg. **Inc.:** Dec. 29, 1899. **Capital:** 1,500,000 shares; par value $1; 932,793 shares issued. **Property:** McKinley group; 4 patented, 4 unpatented claims, Simpson dist.; Lucile. **Development:** 4 tunnels: No. 1, 145 ft. long; No. 2, 1020 ft. long. Total development, approximately 1300 ft. **Ore:** Gold. **Remarks:** Annual labor only.

MAMMOTH MINE CORPORATION
Office: Lewiston. **Officers:** R. S. Erb, Pres.; R. G. Bailey, Sec., both of Lewiston. **Inc.:** Feb. 25, 1925. **Capital:** 500,000 shares; par value $1; 277,130 shares issued. **Property:** Mammoth group; 6 unpatented claims, Dixie dist.; Dixie. **Development:** By 14 open cuts and 2 short tunnels. **Men employed:** Average, 2. **Ore:** Gold. **Remarks:** A small amount of work during the latter part of the year.

MONTE CRISTO MINING CO.
Office: Lewiston Bank Bldg., Lewiston. **Officers:** Fred Johnson, Pres.-Mgr., Troy; A. P. Hagglund, Sec., Lewiston. **Inc.:** Oct. 22, 1927. **Capital:** 200,000 shares; par value $1; 80,000 shares issued. **Property:** Monte Cristo group; 2 unpatented claims, Robins dist.; Waverly; 1 patented claim, Florence dist.

NORTH HILL MINING CO.
Office: 617 Hutton Bldg., Spokane. **Officers:** J. M. McLean, Pres.; Ralston McCaig, Sec., both of Spokane. **Inc.:** Apr. 18, 1925. **Capital:** 1,500,000 shares; par value 1c; 573,464 shares issued. **Property:** Summit Flat group; 5 unpatented claims, Orogrande dist.; Orogrande. **Development:** Principally by 1 tunnel, 1150 ft. long. **Plant:** Steam-driven Gardner-Ricks compressor and hoist; camp; complete mining equipment. **Ore:** Gold. **Men employed:** Average, 2. **Remarks:** This company is a reorganization of the Summit Flat Mining Co. A small amount of work was done during the summer months.

OLD KENTUCK MINING & MILLING CO.
Office: 106 Coeur d'Alene Ave., Coeur d'Alene. **Officers:** Harvey W. Peterson, Pres.-Mgr., Burgdorf; Reginald Mellor, Sec., Coeur d'Alene. **Inc.:** July 30, 1927. **Capital:** 1,500,000 shares; par value 10c; 757,200 shares

issued. **Property:** Old Kentuck group; 14 unpatented claims, Marshall Lake dist.; Burgdorf; held under lease and option from H. H. Hackett. **Development:** Principally by 1 tunnel 900 ft. long. **Plant:** Small gas-driven compressor; complete mining equipment and camp. **Ore:** Gold. **Men employed:** Average, 3. **Remarks:** Small amount of development work during the summer months.

OROGRANDE GOLD MINING CO.

Office: 218 Columbia Bldg., Spokane, Wash. **Officers:** J. N. Pickrell, Pres., Colfax, Wash.; J. E. Pickrell, Sec., Spokane, Wash. **Inc.:** March 14, 1919. **Capital:** 3,500,000 shares; par value $1; 1,800,000 shares issued. **Property:** Orogrande group; 5 patented, 32 unpatented claims, Orogrande dist.; Orogrande. **Development:** Approximately 6000 ft. of underground workings and 4000 ft. of surface cuts on all claims. **Plant:** Stamp mill with partly completed cyanide plant; water-driven. **Ore:** Gold. **Men employed:** 1 watchman. **Remarks:** Idle.

RAPID RIVER MINING & MILLING CO.

Office: Genesee. **Officers:** D. Scharnhorst, Pres.; J. G. Meyer, Sec.; A. F. Wolff, Director, all of Genesee. **Inc.:** July 14, 1910. **Capital:** 1,500,000 shares; par value $1; 341,529 shares issued. **Property:** 4 unpatented claims, Rapid River dist.; Pollock. **Development:** By 5 tunnels; total development approximately 1600 ft. **Plant:** Small water-driven compressor. **Ore:** Copper. **Men employed:** Average, 3. **Remarks:** Small amount of development work during the summer months, the funds for which were derived from stock assessments.

REVENUE MINING & MILLING CO.

Office: 511 Kuhn Blk., Spokane, Wash. **Officers:** J. E. McCormack, Pres.; Walter Guthridge, Sec.-Treas., both of 511 Kuhn Blk., Spokane, Wash. **Inc.:** April 10, 1912. **Capital:** 500,000 shares; par value $1; 391,693 shares issued. **Property:** Revenue group; 8 patented claims, Elk City dist.; Elk City. **Development:** 2 tunnels: No. 1, 700 ft. long; No. 2, 100 ft. long. **Remarks:** Idle.

RICE MINING & MILLING CO.

Officers: Geo. F. Carson, Pres.; E. P. Adkison, Sec., both of Lewiston. **Inc.:** Apr. 8, 1920. **Capital:** 1,000,000 shares; par value $1; 530,978 shares issued. **Property:** Mother Lode group; 9 unpatented claims, Orogrande dist.; Orogrande. **Development:** Approximately 1700 ft. of underground workings. **Remarks:** Annual labor only.

RUBY-GOLD DEVELOPMENT CO.

Office: Whitebird. **Officers:** W. M. Fredericks, Pres., Whitebird; L. L. Bassett, Sec., Washtucna, Wash.; J. M. Worton, Mgr., Whitebird. **Inc.:** Apr. 29, 1927. **Capital:** 250 shares; par value $100; 177 shares issued. **Property:** Hawk group; 5 unpatented placer claims, Simpson dist.; Lucile. **Plant:** Small gas-driven concentrating mill. **Ore:** Placer gold. **Men employed:** Average, 3. **Remarks:** A small concentrating mill, which is designed to recover the "black sands" found in the gravel deposits, was constructed during the year.

SALMON RIVER DEVELOPMENT CO.

Office: Whitebird. **Officers:** W. M. Fredericks, Pres., Whitebird; L. L. Bassett, Sec., Washtucna, Wash.; J. M. Worton, Mgr., Whitebird. **Inc.:** Sept. 10, 1927. **Capital:** 500,000 shares; par value $1; 9 shares issued. **Remarks:** The president of the company stated: "Company owns 1 claim outright through transfer of holdings of Ruby-Gold Development Co. to this company, and a contract to purchase the remaining 6 claims for $5000."

SLATE CREEK GOLD MINING CO.

Office: Whitebird. **Officers:** G. A. Thomson, Pres.; W. W. White, Sec., both of Whitebird. **Inc.:** Sept. 21, 1925. **Capital:** 600,000 shares; par value 50c; 30,250 shares issued. **Property:** Lease and option on 480 acres patented farm land, Simpson dist.; Lucile. **Development:** By 3 tunnels, with a total of approximately 600 ft. **Ore:** Gold. **Men employed:** Average, 4. **Remarks:** Active throughout the year.

SPHINX GOLD MINING CO.

Office: 832 Old National Bank Bldg., Spokane, Wash. **Officers:** Sam A. McCoy, Pres.-Mgr.; E. J. Johnson, Sec., both of Spokane, Wash. **Inc.:** May 3, 1923. **Capital:** 500,000 shares; par value $1; 425,000 shares issued. **Property:** Sphinx group; 5 unpatented claims, Ten Mile dist.; Newsome. **Ore:** Gold. **Remarks:** A small amount of development work was done during the summer months.

SPRING BARR PLACER CO.

Office: 210 Eiler Bldg., Spokane, Wash. **Officers:** N. L. Wakeley, Pres.; Geo. W. McCallum, Sec.; W. L. Wakeley, Mgr., all of Spokane, Wash. **Inc.:** May 14, 1927. **Capital:** 25,000 shares; par value $1; 15,000 shares issued. **Property:** Spring Barr group; 3 unpatented placer claims, Simpson dist.; Lucile. **Ore:** Placer gold.

STOWELL GOLD MINING CO.

Office: 218 Columbia Bldg., Spokane, Wash. **Officers:** Wm. H. Stowell, Pres.; Robert A. Koontz, Sec., both of Spokane. **Inc.:** Dec. 4, 1926. **Capital:** 5,000,000 shares; par value 15c; 2,500,000 shares issued. **Property:** South Fork group; 12 unpatented claims, Elk City dist.; Elk City. **Development:** Approximately 3500 ft. of underground workings, the principal of which are: No. 1 tunnel, 1200 ft. long; No. 2, 1050 ft. long; No. 3, 1000 ft. long. **Plant:** 5-stamp mill. **Ore:** Gold. **Rrmarks:** Annual labor only. This company is a reorganization of the South Fork Mining & Milling Co.

SYLVANITE GOLD-COPPER CO.

Office: 408 E. Bridgeport Ave., Spokane, Wash. **Officers:** Wesley L. Wakeley, Pres.-Mgr.; R. L. Alexander, Sec., both of Spokane, Wash. **Inc.:** Aug. 20, 1919. **Capital:** 100 shares; par value $100; all shares issued. **Property:** Maud Randall group; 5 unpatented claims, 2 of which are held under lease and bond from Joseph Himmelspack of Grangeville; Harpster dist.; Harpster. **Development:** By 2 tunnels: No. 1, 825 ft. long; No. 2, 80 ft. long. **Plant:** Gas-driven Gardner-Ricks 6x6 compressor; complete mining equipment. **Ore:** Copper. **Remarks:** Annual labor only.

TRI METALLIC MINING CO., LTD.

Office: Pardee, Idaho. **Officers:** Frieda M. Bethmann, Pres.; Miner Bethmann, Mgr., both of Pardee. **Inc.:** Sept. 26, 1917. **Capital:** 250,000 shares; par value $1; 144,649 shares issued. **Property:** Tri Metallic group; 5 unpatented claims, Lolo dist.; Pardee. **Development:** By 3 tunnels: No. 1, 520 ft.; No. 2, 185 ft.; No. 3, 950 ft. **Ore:** Gold-silver-copper. **Remarks:** Annual labor only.

UNA MINE CO.

Office: 617 Hutton Bldg., Spokane, Wash. **Officers:** J. M. McLean, Pres.; Ralston McCaig, Sec.-Mgr., both of Spokane. **Inc.:** Feb. 6, 1925. **Capital:** 1,250,000 shares; par value 1c; 850,000 shares issued. **Property:** Una group; 4 unpatented claims, Orogrande dist.; Orogrande. **Development:** By 1 tunnel, 1100 ft. long. **Ore:** Gold. **Men employed:** Average, 2. **Remarks:** Active work during the summer months in extending the principal tunnel. The secretary reported that this work resulted in exposing a good showing of new ore.

KOOTENAI COUNTY

Kootenai is one of the northern counties and constitutes an important part of the Idaho Panhandle. It is bounded on the west by the State of Washington, on the north by Bonner County, on the east by Shoshone County, and on the south by Benewah County. It contains an area of 1253 square miles and was accredited with a population of 17,878 in the 1920 census. The principal industries are lumbering, dairying, and farming. Its lumbering industry is the most important and the largest in the State.

The county is exceptionally fortunate with respect to transportation facilities. It is served by three State highways, one of which is completed, and the other two partly so; by six railroads, which include main lines or their branches; and by lake boats on Lakes Pend d'Oreille and Coeur d'Alene. Coeur d'Alene is the largest town and county seat.

The principal mining districts are the Little North Fork of the Coeur d'Alene River, Hayden Lake, and isolated sections bordering on Lake Coeur d'Alene, throughout which zinc, lead, silver, copper, gold, arsenic, and high-grade clays occur. A limited amount of development work has been done on some of the veins, with encouraging results, and many others are worthy of further attention.

During the year surveys for a logging railroad were run up the Little North Fork River. The completion of this railroad will greatly stimulate mining and encourage the resumption of activities at those mines where the ore has been proved but operation has been impossible, on account of transportation difficulties. The companies in the Little North Fork section were idle throughout the year. Those on the West Fork of Pine Creek, near the Shoshone County line, performed the necessary annual labor.

One new lead discovery was reported in the Fourth of July Canyon section of this county, and much additional interest was shown by the old companies in the properties they were operating. The greater part of the work was confined to the sections adjacent to Coeur d'Alene Lake, particularly the Wolf Lodge and Beauty Bay districts, in which the Caribou Mining Co., Ltd.; the Beauty Bay Mining Co.; the Silver Tip Mining Association; and the Blue Bird Mining Co. were the most active.

BLUE BIRD MINING CO.

Office: Coeur d'Alene. **Officers:** Harry Phillips, Pres.-Mgr.; Wm. McFarland, Sec., both of Coeur d'Alene. **Inc.:** Sept. 2, 1924. **Capital:** 1,000,000 shares; par value 10c; 601,000 shares issued. **Property:** Blue Bird group; 9 unpatented claims, Beauty Bay and Wolf Lodge districts; Coeur d'Alene. **Development:** About 300 ft. of workings. **Ore:** Arsenic, copper, gold. **Men employed:** Average, 4. **Remarks:** Actively developed during the summer months.

BURNT CABIN MINING CO.

Office: Coeur d'Alene. **Officers:** Wm. James, Pres.; J. A. Cole, Sec., both of Coeur d'Alene. **Inc.:** Apr. 28, 1926. **Capital:** 1,500,000 shares; par value 10c; 635,927 shares issued. **Property:** Burnt Cabin group; 7 unpatented claims, Hayden Lake dist.; Hayden Lake. **Development:** By 2 tunnels: No. 1, 150 ft. long; No. 2, 547 ft. long. **Ore:** Lead-silver. **Men employed:** Average, 3. **Remarks:** Active throughout the summer months.

CARIBOU MINING CO., LTD.

Office: Coeur d'Alene. **Officers:** G. R. Scott, Pres.; C. O. Sowder, Sec., both of Coeur d'Alene. **Inc.:** July 15, 1918. **Capital:** 1,500,000 shares; par value 10c; 1,414,425 shares issued. **Property:** Caribou group; 10 unpatented claims, Wolf Lodge dist.; Coeur d'Alene. **Development:** Total development approximately 1174 ft.; consisting principally of No. 2 tunnel, 440 ft. long, and No. 3 tunnel, 580 ft. long. **Plant:** MINE: Gas-driven Gardner-Rix compressor; complete mining equipment. MILL: 75-ton concentrator, gas driven. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** Active development work throughout the year.

COEUR D'ALENE CLAY CO., LTD.
Office: 216 Sherman Ave., Coeur d'Alene. **Officers:** Oscar Nelson, Pres.; H. H. Barton, Sec.-Treas., both of Coeur d'Alene. **Inc.:** Apr. 6, 1912. **Capital:** 100,000 shares; par value $1; 18,882 shares issued. **Property:** 40 acres patented land near Coeur d'Alene. **Plant:** 1 incomplete brick-making machine, 20,000-brick capacity.

COEUR D'ALENE OIL & DEVELOPMENT CO.
Office: Coeur d'Alene. **Officers:** L. T. Severson, Pres.-Mgr., Coeur d'Alene; W. H. Rogers, Sec., Hayden Lake. **Inc.:** Nov. 19, 1927. **Capital:** 100,000 shares; par value $1; 34,000 shares issued. **Property:** 5700 acres patented farm land in the vicinity of Hayden Lake; held under oil and gas leases.

COEUR D'ALENE ROBISH MOUNTAIN MINING CO., LTD.
Office: Coeur d'Alene. **Officers:** Andrew J. Razor, Pres.; Lawrence L. Lewis, Sec., both of Coeur d'Alene; Wm. M. Hill, Mgr., Spokane. **Inc.:** Oct. 9, 1909. **Capital:** 2,750,000 shares; par value $1; 1,505,000 shares issued. **Property:** 505 acres patented land and 4 unpatented claims; Little North Fork dist.; Linfor. **Development:** Approximately 600 ft. of underground workings. **Remarks:** Annual labor only on unpatented claims.

COEUR D'ALENE-SPOKANE MINING CO.
Officers: Roy L. Black, Sec., Pocatello. **Inc.:** Sept. 6, 1918. **Capital:** 1,000,000 shares; par value $1; 500,000 shares issued. **Property:** Strobel group; 3 unpatented claims, unorganized dist.; Lane. **Ore:** Lead-silver. **Remarks:** Annual labor only.

COMMONWEALTH METALS CO.
Office: Coeur d'Alene. **Officers:** F. W. Reed, Sec., both of Coeur d'Alene. **Inc.:** Mar. 19, 1924. **Capital:** 2,500,000 shares; par value $1; 279,288 shares issued. **Property:** Commonwealth group; 7 unpatented claims, Hayden Lake dist.; Hayden Lake. **Development:** 2 small shafts and 1 short tunnel. Total development approximately 1500 ft. **Plant:** Steam-driven I-R compressor, and complete mining equipment. **Ore:** Lead-silver-copper. **Remarks:** Idle.

CONNIE MINING & MILLING CO.
Office: 310 Ziegler Bldg., Spokane, Wash. **Officers:** C. Wm. Gralaffe, Pres.; Conrad T. Hartung, Sec., both of Spokane. **Inc.:** July 11, 1927. **Capital:** 4,000,000 shares; par value 10c; all shares issued. **Property:** Chilco group; 11 unpatented claims, Hayden Lake dist.; Hayden Lake. **Development:** By 1 tunnel, 670 ft. long. **Ore:** Lead-silver. **Remarks:** Annual labor only. This company is a reorganization of the Chilco Mining & Milling Co.

ESTELLA METALLURGICAL CO.
Office: Route 5, Coeur d'Alene. **Officers:** W. C. Brower, Pres.-Mgr.; Ed. H. Preece, Sec., both of Coeur d'Alene. **Inc.:** Feb. 13, 1923. **Capital:** 5,000,000 shares; par value unknown; 3,000,000 shares issued. **Property:** 2 unpatented claims, Wolf Lodge dist.; Coeur d'Alene. **Development:** 3 short tunnels. **Ore:** Gold-silver-copper. **Remarks:** Annual labor only.

HAYDEN LAKE MINING & MILLING CO.
Office: Rathdrum. **Officers:** Fred H. Bradbury, Pres.; Chas. E. Gillespie, Sec., both of Rathdrum. **Inc.:** May 8, 1917. **Capital:** 1,000,000 shares; par value 5c; 409,000 shares issued. **Property:** Bradbury group; 14 unpatented claims, Hayden Lake dist.; Garwood. **Development:** By 2 tunnels: No. 1, 200 ft.; No. 2, 800 ft. **Plant:** Small gas-driven compressor; complete mining equipment. **Ore:** Lead-silver, copper. **Remarks:** Annual labor only.

LITTLE NORTH FORK COPPER MINING & MILLING CO., LTD.
Officers: T. R. Mason, Pres., Kellogg. **Inc.:** Sept. 29, 1903. **Capital:** 1,500,000 shares; par value $1; 1,300,000 shares issued. **Property:** Hand Spike group; 3 patented claims, Little North Fork dist.; Linfor. **Development:** 2 tunnels: No. 1, 1600 ft. long; No. 2, 500 ft. long. **Ore:** Copper.

PALISADE MINING & MILLING CO.

Office: Coeur d'Alene. **Officers:** T. W. Schmidt, Pres.-Mgr., Coeur d'Alene; A. K. Rogers, Sec., E. 1301 Providence Ave., Spokane, Wash. **Inc.:** Jan. 31, 1912. **Capital:** 1,500,000 shares; par value $1; all shares issued. **Property:** Palisade group; 16 unpatented claims, unorganized dist.; Kellogg. **Development:** Approximately 1250 ft. of tunnels, the principal of which is No. 2, 1130 ft long. **Ore:** Silver-lead. **Remarks:** In addition to annual labor, a small amount of reconstruction work was performed, after mine plant had been destroyed by a snowslide.

RED HORSE MINING CO.

Office: Harrison. **Officers:** M. W. Frost, Pres., Harrison; Otto Borchardt, Sec., Springston. **Inc.:** July 14, 1904. **Capital:** 1,500,000 shares; par value $1; 250,000 shares issued. **Property:** Red Horse group; 18 unpatented claims, Lake Front dist.; Springston. **Development:** Approximately 2720 ft. of underground workings. **Plant:** MINE: 40-h. p. F-M gas engine driving a 2-drill Sullivan compressor; complete mining equipment and camp. MILL: 5-ton gas-driven concentrator. **Ore:** Copper. **Remarks:** Annual labor only, performed by contract.

RIVERSIDE COPPER MINING CO., LTD.

Office: Kellogg. **Officers:** T. R. Mason, Pres., Kellogg; S. S. Bonham, Sec., Spokane. **Inc.:** Sept. 17, 1906. **Capital:** 1,000,000 shares; par value $1; 600,000 shares issued. **Property:** 5 patented claims, Little North Fork dist.; Linfor. **Development:** 1 tunnel, 530 ft. long. **Ore:** Lead-silver.

SILVERTIP MINING ASSOCIATION

Office: Coeur d'Alene. **Officers:** B. A. Loveless, Pres.; F. W. Reed, Sec., both of Coeur d'Alene. **Inc.:** An association. **Property:** Silvertip group; 10 unpatented claims, Wolf Lodge dist.; Coeur d'Alene. **Development:** By 1 tunnel, 250 ft. long. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** Active throughout the summer months.

TWIN GULCH MINING CO.

Office: 721 Harrison Ave., Coeur d'Alene. **Officers:** J. O. Holman, Pres.-Mgr.; G. W. Sonnichsen, Sec., both of Coeur d'Alene. **Inc.:** Feb. 2, 1924. **Capital:** 1,000,000 shares; par value 10c; 352,000 shares issued. **Property:** Twin Gulch group; unorganized dist.; Coeur d'Alene. **Development:** By 2 short tunnels. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** A small amount of development work during part of the year.

LATAH COUNTY

Latah County is bounded on the north by Benewah, on the south by Nez Perce, on the west by the State of Washington, and on the east by Shoshone and Clearwater counties. It has an area of 1071 square miles, and was accredited with a population of 18,092 in the 1920 census. Moscow is the largest town and county seat, as well as the location of the University of Idaho and the Idaho Bureau of Mines and Geology. The county is recognized primarily as an agricultural community, particularly for wheat raising.

The principal mineral resources are copper, gold, silver, opals, mica, feldspar, and high-grade fire clay. The clay occurs near the town of Troy and two companies are engaged in manufacturing it into brick, which is used by different smelters in the northwestern states. The copper, gold, silver, and mica occur in the northern part of the county, north of the towns of Harvard and Vassar, in the Gold Hill, or Blackfoot, Hoodoo, and Avon districts. These districts are served by the Washington, Idaho and Montana Railroad, which connects with the Northern Pacific and the Spokane and Eastern railroads at Palouse, Washington, and the St. Maries-Elk River branch of the Chicago, Milwaukee and St. Paul Railroad at Bovill.

The mica mines have produced a large tonnage of high-grade mica. The resources of the old ones have not been exhausted, many of the prospects justify further development, and there are still many possibilities for the discovery of new veins. As there are many chances for the development of profitable enterprises, these deposits are worthy of more attention than they have been receiving in the past few years.

During 1927, the Troy Mica Co., a new organization at Avon, conducted a small amount of work and produced and marketed a few tons of mica; and the Idaho Ceramic Materials Co. at Troy, was organized to exploit the feldspar deposits in that vicinity.

A small amount of work has been done on the copper deposits in the Hoodoo district, from which several carloads of copper ore have been marketed. The heavy overgrowth and deep soil have hindered prospecting and development work, but the discoveries that have been made and the work done on them have proved that the deposits justify development, and that there are still possibilities for the discovery of additional veins.

The Copper Mountain Mining Co., and the Gold Nugget Mining Co. performed a small amount of development work during the year.

ACE MINING CO.

Office: N. 1405 Ash St., Spokane, Wash. **Officers:** Chas. G. Taylor, Pres.-Mgr., Harvard; R. E. Gallagher, Sec., Spokane. **Inc.:** Oct. 29, 1926. **Capital:** 1,500,000 shares; par value 10c; 620,660 shares issued **Property:** 4 patented, 2 unpatented claims, Hoodoo dist.; Harvard. **Development:** By 2 tunnels: No. 1, 200 ft. long; No. 2, 80 ft. long. **Ore:** Gold. **Remarks:** New buildings constructed and a small amount of road built during the year.

CASSIDY GOLD MINING & MILLING CO., LTD.

Officers: N. J. Stockbridge, Sec., Wallace. **Inc.:** Mar. 12, 1899. **Capital:** 600,000 shares; par value 5c; 437,000 shares issued. **Property:** Cassidy; 1 patented claim, Blackfoot dist. **Ore:** Gold.

COPPER CHIEF MINING & MILLING CO., LTD.

Office: Troy. **Officers:** Robert Olson, Pres.; Albert B. Olson, Sec., both of Troy. **Inc.:** July 27, 1914. **Capital:** 1,000,000 shares; par value $1; 487,229 shares issued. **Property:** Copper Chief group; 2 unpatented claims and 10 acres of deeded land, unorganized dist.; Troy. **Development:** By 3 tunnels: No. 1, 300 ft. long; No. 2, 500 ft. long; No. 3, 550 ft. long. **Ore:** Copper. **Remarks:** Annual labor only.

COPPER MOUNTAIN MINING CO.

Office: Palouse, Wash. **Officers:** R. A. Belvail, Pres.; J. C. Northrup, Sec., both of Palouse. **Inc.:** Oct. 29, 1925. **Capital:** 3,750,000 shares; par value 1c; 2,072,676 shares issued. **Property:** Mizpah group; 20 unpatented claims, Hoodoo dist.; Harvard. **Development:** Total development approximately 2600 ft. **Plant:** A 12x14 gas-driven compressor; complete mining equipment, and camp. **Ore:** Copper. **Remarks:** A reorganization of the Merger Mining Co., Ltd. Annual labor only.

GOLD HILL MINING & MILLING CO.

Office: Harvard. **Officers:** K. F. Pinnell, Pres.-Mgr.; May Pinnell, Sec., both of Harvard. **Inc.:** Nov. 6, 1922. **Capital:** 1,000,000 shares; par value 25c; 612,959 shares issued. **Property:** Gold Bug group; 4 patented claims, 65 acres; held under lease and bond from the Garfield Mining & Milling Co., of Garfield, Wash.; Blackfoot dist.; Harvard. **Development:** Approximately 1200 ft. of tunnels and drifts, and 1 vertical shaft 300 ft. deep. **Plant:** Steam-driven hoist and compressor. **Ore:** Gold, silver, copper.

IDAHO CERAMIC MATERIALS CO.

Office: W. 326 First Ave., Spokane, Wash. **Officers:** Carl R. Suksdorf, Pres.-Mgr.; L. P. Mills, Sec., both of Spokane, Wash. **Inc.:** Sept. 17, 1927. **Capital:** 275,000 shares; par value $1; 100,000 shares issued. **Property:** 288 acres of patented farm land near Troy; held under lease and option. **Mineral sought:** Kaolin, silica, mica. **Remarks:** A recent organization, based on the exploitation of a feldspar deposit.

TROY GOLD & COPPER MINING CO., LTD.

Office: Troy. **Officers:** E. J. Gemmill, Pres.-Mgr., Moscow; T. H. Christie, Sec., Troy. **Inc.:** May 26, 1909. **Capital:** 1,000,000 shares; par value $1; 510,100 shares issued. **Property:** 20 acres patented farm land, unorganized dist.; Troy. **Ore:** Copper. **Remarks:** Idle.

TROY MICA CO.

Office: Lewiston. **Officers:** A. N. Conger, Pres.-Mgr.; O. D. Burns, Sec., both of Lewiston. **Inc.:** Aug. 10, 1926. **Capital:** 150,000 shares; par value $1; 130,080 shares issued. **Property:** Bentz and Doerr groups, Hoodoo dist.; Avon. **Development:** By 3 tunnels: No. 1, 100 ft.; No. 2, 800 ft.; No. 3, 200 ft. **Plant:** Gas-driven I-R compressor; complete mining equipment and camp. **Ore:** Mica. **Men employed:** Average, 8. **Remarks:** Small amount of development work was conducted during the year, and a few tons of mica were produced and marketed.

LEMHI COUNTY

Lemhi County is situated in central-eastern Idaho, bounded on the north and east by the State of Montana, on the west by Idaho and Valley counties, and on the south by Custer, Butte, and Clark counties. It has an area of 4597 square miles, which is about equal to the State of Connecticut, and was accredited with a population of 5164 in the 1920 census, or 1.1 persons to the square mile. A provisional county government was organized in July, 1867, and in January, 1869, the Territorial Legislature permanently established the county with Salmon City as the county seat, an honor which it has always retained. The larger part of the population is located in the Lemhi River and Pahsimeroi River valleys, and is engaged in the pursuits of agriculture and stockraising.

It is one of the principal mining counties of the State, and always ranks as one of the largest producers. The extensive and varied mineral resources; the many veins that have been discovered, yet not developed; the many undiscovered veins; the excellent mining conditions; the many producing mines and prospects; and its location, both geographically and geologically, place this county within the area known as Central Idaho's Mineral Empire.

The county is served by the Pittsburg & Gilmore Railroad, which plies between Armstead, Montana, and Salmon, with a branch line from Leadore to Gilmore; by the Sawtooth Park State highway from Challis to Salmon, which follows the Salmon River and which is fully completed; and by a system of county roads which lead into all the outlying settlements and mining districts.

The principal mineral resources are lead, copper, silver, gold, zinc, tungsten, manganese, molybdenum, nickel, cobalt, gypsum, tin, and lignite. The formations in which the various mineral deposits occur range from early sedimentary rocks to late igneous rocks and include all those which are favorable to the deposition of ore in commercial quantities. The deposits are widely distributed throughout the vast mountainous areas which comprise a large part of the county. The wide distribution of the deposits, the diversity of mineralization, the favorable geological conditions, and the many opportunities for the development of profitable enterprises, make this county an exceptionally favorable field for prospectors and development companies.

In point of production and men employed Gilmore is the most active mining camp in Idaho, outside the Coeur d'Alene district. The Pittsburgh-Idaho mine of the United Idaho Mining Co., a subsidiary of the United States Smelting, Refining & Mining Co., is the largest lead-producing mine and maintains the second largest payroll in southern Idaho. During the year this company performed a large amount of development work and improved its mine plant, in addition to producing a large tonnage of high-grade direct-shipping ore, some of it being obtained by lessees. Part of the ore mined under company operation was derived from the 800-foot level, the greatest depth ever attained in the Gilmore district. The Allie mine, owned by the Gilmore Mercantile Co. and operated by lessees throughout the year, is developing into one of the largest lead mines in southern Idaho. A large amount of new ore was exposed and opened during the year and a substantial tonnage, derived principally from development work, was shipped. A few lessees at the Latest Out mine maintained development work throughout the year. Much of the new ore developed in this district during 1927 was a result of successfully solving a faulting problem which had previously been interpreted as a termination of the ore.

The Spring Mountain and Nicholia districts, whose supply point is Gilmore, witnessed a little increase in activity over that of the previous year. The Spring Mountain Mining Co., a new organization at the Big Windy mine, repaired the mine buildings, performed a small amount of development work, and produced and marketed a small tonnage of lead-silver ore. Lessees at the old Viola mine were active the entire year.

The Leadore district witnessed a large amount of scouting and mine examination by people seeking new lead-silver mines, but except for their necessary annual labor, practically all of the mines were idle.

In the vicinity of Salmon there was a marked improvement in mining conditions. More new companies were organized and started operations and there were more investigations than at any time during the past few years. All of the old companies were active the greater part of the year.

In the Leesburg district the principal new activities of importance were concerned with the revival of hydraulic placer mining. Two new enterprises constructed ditches, dams, and flumes, installed mining equipment and commenced hydraulicking. These were: The Bonanza Placers, Inc., and H. F. Byram at the McNutt placers on Moose Creek. One other company purchased some hydraulic equipment which it proposes to install during 1928. The number of new locations filed on placer claims exceeded that of any other year during the past decade.

The Harmony Mines Co. was active for a period of three months in the early part of the year; during this time new ore-bins and a sorting plant were added to the mill, the construction of a new aerial tramway was completed, further underground exploration work was done, a small tonnage of ore was produced and the resultant concentrate marketed, after which operations were suspended pending further financing through the sale of bonds.

During the first part of the year the Pope-Shenon mine was developed through the lower, or No. 6 tunnel, by lessees. This work was successful in opening considerable new ore, after which the lease was organized as the Winder-Stillman Copper Co. The reconstruction of the mill was financed, and at the close of the year the mine and mill were ready for continuous production.

The Uncle Sam Mining & Development Co., Ltd., near Tendoy, which is owned and financed by local people, actively prosecuted the driving of a lower tunnel throughout the year.

A new entry into the county was the Gold Ore Mines of Idaho, Inc., at the old Queen of the Hills mine, eight miles northeast of Salmon. During the year the mine plant and mill, which were installed in 1906, were rehabilitated; a small amount of new equipment was added; part of the old mine workings were reopened, and a small amount of new development work was performed.

In the Shoup district, the Kentuck Mining Co. performed its necessary annual labor. Also the Western Reward Mining Co., a new organization at the old Monolith, now known as the Merry Widow, conducted a small amount of exploratory work during the early part of the year.

The Patterson Mines Corporation, which was incorporated during the year, acquired under lease and option the Ima mine on Patterson Creek, repaired the power plant and mill, and commenced development work in December.

ALLIE MINE

Office: Gilmore. **Officers:** Edgar C. Ross, Lessee; Ervin Jewett, Mgr., both of Gilmore. **Property:** Allie group; 12 patented claims, Texas dist.; Gilmore; operated under lease from the Gilmore Mercantile Co. **Development:** Principally by 1 tunnel, 6000 ft. long, in which are 2 inclined shafts with 6 intermediate levels, opening the vein 290 ft. below the tunnel. **Plant:** 40-kw. electric generator, driven by Fairbanks-Morse semi-Diesel engine; 2 electrically-driven hoists; 1200-ft. aerial tramway; mine buildings. **Ore:** Lead-silver. **Men employed:** Average, 16. **Remarks:** during the year practically all of the equipment was installed; a large amount of development work was performed; and a substantial tonnage of ore, principally derived from the development work, was shipped. This mine is developing into one of the largest lead-silver mines in southern Idaho.

BEAVERHEAD LEAD MINES CO.

Office: Mills Bldg., San Francisco, Calif. **Officers:** John Salsberry, Pres., Mills Bldg., San Francisco; Hy. H. Meday, Sec., Cheney Bldg., Reno, Nev. **Inc.:** Filed in Idaho, May 12, 1927. **Capital:** 3,000,000 shares, par value 10c; shares issued, unknown. **Property:** Viola group; 1 patented, 1 unpatented claim, Nicholia dist.; Gilmore. **Ore:** Lead-silver. **Remarks:** Operated throughout the year by 2 lessees.

BLACK PINE COPPER MINING & MILLING CO., LTD.

Office: 501 Gloyd Bldg., Kansas City, Mo. **Officers:** F. J. Fetter, Pres., Kansas City, Mo. **Inc.:** Jan. 20, 1902. **Capital:** 40,000 shares; par value $1; all shares issued. **Property:** 4 patented claims, Blackbird dist.; Salmon. **Remarks:** Idle since 1904.

BLENWICK MINING CO., LTD.

Officers: R. E. Wickham, Pres.; E. H. Casterlin, Sec., both of Salmon. **Inc.:** May 22, 1919. Charter forfeited Dec. 1, 1922. **Capital:** 500,000 shares; par value $1; shares issued, unknown. **Property:** Blenwick group; 6 unpatented claims, Eureka dist.; Salmon. **Development:** By 3 tunnels: No. 1, 260 ft. long; No. 2, 100 ft. long; No. 3, 600 ft. long. **Ore:** Gold. **Remarks:** Annual labor only.

BONANZA PLACER, INC.

Office: Leesburg. **Officers:** Carl A. Poulsen, Pres.-Mgr., Los Angeles, Calif.; Frank A. Butschke, Sec., Leesburg. **Inc.:** Filed in Idaho, Dec. 6, 1926. **Capital:** 2,500,000 shares; par value 10c; 1,950,000 shares issued. **Property:** 9 unpatented placer claims, Mackinaw dist.; Leesburg. **Ore:** Placer gold. **Remarks:** Construction of ditches, dams, and flumes completed, hydraulic equipment installed, and a small amount of mining done prior to freezing weather.

CONTINENTAL STANDARD MINING CO.

Office: Leadore. **Officers:** Dr. I. B. Keller, Pres., Meridian; C. N. Friday, Sec.-Mgr., Leadore. **Inc.:** Jan. 2, 1926. **Capital:** 100,000 shares preferred, 1,000,000 shares common; par value $1; 520,155 shares issued. **Property:** Grizzly Hill group; 18 unpatented claims, Junction dist.; Leadore. **Development:** By 3 short tunnels. **Ore:** Lead-silver. **Remarks:** Annual labor.

GOLD FLOTATION DEVELOPMENT CO.

Office: 402 Empire State Bldg., Spokane, Wash. **Officers:** Harold Williams, Pres., Masonia; H. G. Loop, Sec., Spokane, Wash. **Inc.:** May 9, 1927. **Capital:** 1,500,000 shares; par value 10c; 638,950 shares issued. **Property:** Singiser group; 4 patented claims, Gravel Range dist.; Forney. **Ore:** Gold.

GOLD ORE MINES OF IDAHO, INC.

Office: 42 Broadway, New York City. **Officers:** Fremont Wood, Pres., Boise; Hugo G. A. von Reitzenstein, Sec., New York. **Inc.:** Filed in Idaho, March 25, 1927. **Capital:** 1,500,000 shares; par value $1; 750,000 shares issued. **Property:** Queen of the Hills group; 15 unpatented claims, Eureka dist.; Salmon. **Development:** Principally by 1 tunnel 2500 ft. long, in which is a vertical shaft open to a depth of 75 ft. **Plant:** MINE: Electrically-driven I-R compressor; complete mining equipment and camp. MILL: 15-stamp mill constructed in 1909. **Ore:** Gold. **Men employed:** Average, 10. **Remarks:** During the year the mine plant and mill were rehabilitated; a small amount of new equipment was added; part of the old mine workings were reopened, and a small amount of development work was performed.

HARMONY MINES CO.

Office: Salmon. **Officers:** A. W. Nieman, Pres., 5431 Lakewood Ave., Chicago; Mrs. O. K. Mitchell, Sec., 1221 Rosemont Ave., Chicago; E. F. Nieman, Mgr., Salmon. **Inc.:** April 8, 1916. **Capital:** 3,000,000 shares; par value $1; 2,100,000 shares issued. **Property:** Harmony group; 7 patented, 17 unpatented claims, Eldorado dist.; Baker. **Development:** By 6 tunnels: No. 1, 400 ft. long; No. 2, 350 ft. long; No. 3, 1000 ft. long; No. 4, 2400 ft. long; No. 5, 2700 ft. long; No. 6, 210 ft. long; and numerous small cuts and shafts totaling approximately 8000 ft. **Plant:** MINE: 1 I-R 800-cu.-ft., 1 C-P 350-cu.-ft., and 1 C-P 210-cu-ft. electrically-driven compressor; 6-ton Mancha storage battery locomotive; 2 aerial tramways, one 800 ft. long, the other 1900 ft. long. MILL: 175-ton concentrator, including flotation; primary and secondary crushers; Hardinge ball mill; 2 Dorr classifiers; 10 Wilfley tables; 1 12-ft. and 1 6-ft. K. & K. flotation cells; 2 Aikens classifiers. Built in 1919-1920. All electrically driven. **Ore:** Copper. **Men employed:** Average, 20. **Remarks:** Active for a period of 3 months in the early part of the year. During this time new ore-bins and sorting plant were added to the mill; construction of a new aerial tramway was completed, further underground exploration work done, and a small tonnage of ore produced, after which operations were suspended, pending further financing through the sale of bonds.

HORSE CREEK MINING CO.

Office: Salmon. **Officers:** P. H. Martin, Pres.-Mgr., Alta, Mont.; H. C. Packer, Sec., Hamilton, Mont. **Inc.:** May 1, 1923. **Capital:** 100,000 shares; par value $1; 56,872 shares issued. **Property:** Horse Creek group; 7 unpatented claims, 140 acres; Mineral Hill dist.; Alta, Mont. **Development:** About 500 ft. of tunnels. **Ore:** Lead-silver. **Remarks:** In addition to annual labor, a small amount of road building was done during the year.

IDAHO MINERALS CO.

Office: Idaho Falls. **Officers:** Simon Martin, Pres.-Mgr.; Louis Saar, Sec., both of Idaho Falls. **Inc.:** Aug. 13, 1919. **Capital:** 500 shares; par value $100; 325 shares issued. **Property:** Red Warrior group; 3 unpatented claims, Spring Mountain dist.; Gilmore. **Development:** By 2 tunnels: No. 1, 180 ft. long; No. 2, 275 ft. long. **Plant:** 50-ton steam-driven concentrator, built in 1921. **Ore:** Lead-silver. **Remarks:** Idle.

IDAHO PREMIER MINES CORPORATION

Office: Kellogg. **Officers:** A. C. Beal, Pres.-Mgr.; Lester S. Harrison, Sec., both of Kellogg. **Inc.:** Mar. 28, 1927. **Capital:** 1,000,000 shares common, par value $1; 200,000 shares preferred, par value $5; 50,000 shares common and 165,000 shares preferred issued. Preferred issued in exchange for property. **Property:** Leadore group; 38 unpatented claims. Junction dist.; Leadore. **Development:** By 2 tunnels: No. 1, 500 ft. long; No. 2, 876 ft. long. **Plant:** MINE: Small gas-driven compressor. MILL: Small gas-driven concentrator. **Ore:** Lead-silver. **Remarks:** Annual labor only.

IMA CONSOLIDATED MINING & MILLING CO.

Office: 608 Deseret Bank Bldg., Salt Lake City, Utah. **Officers:** Oscar W. Moyle, Pres.; Harry W. Rudine, Sec., both of Salt Lake City, Utah. **Inc.:** Dec. 16, 1902. **Capital:** 200,000 shares; par value 1c; all shares issued. **Property:** Ima group; 21 patented, 4 unpatented claims, Blue Wing dist.; May. **Development:** By 2 tunnels: No. 1, 1250 ft. long; No. 2, 1000 ft. long. **Plant:** MINE: Water-driven compressor; complete mining equipment and camp. MILL: 100-ton water-driven concentrator, constructed in 1915. **Ore:** Silver, copper, tungsten. **Remarks:** Property under lease to Patterson Mines Corporation.

LATEST OUT MINING & SMELTING CO., LTD.

Office: Salmon. **Officers:** D. L. Nichols, Sec.-Mgr., Salmon. **Inc.:** May 23, 1910. **Capital:** 500,000 shares; par value $1; all shares issued. **Property:** Latest Out; 1 patented claim, Texas dist.; Gilmore. **Development:** 1 tunnel, 365 ft. long; 2 inclined shafts, totaling 1100 ft., giving a vertical depth on the vein of 700 ft. Total development approximately 32,000 ft. **Plant:** F-M 40-h. p. gas-driven hoist; 145-cu.-ft. I-R gas-driven compressor; gravity tram; complete mining equipment and camp. **Ore:** Lead-silver. **Remarks:** Operated throughout the year by lessees.

LEADORE-LEMHI COPPER MINING CO.

Office: Leadore. **Officers:** J. D. Pritchett, Pres.-Mgr.; Roland Davidson, Sec., both of Leadore. **Inc.:** Aug. 22, 1927. **Capital:** 500,000 shares; par value 10c; shares issued, unknown. **Property:** Baltimore group; 3 unpatented claims, McDevitt dist.; Leadore. **Development:** By 2 short tunnels. **Ore:** Copper-silver. **Men employed:** Average, 1. **Remarks:** Active during the summer months.

LEESBURG GOLD DUST MINING CO.

Officers: D. H. Wenger, Pres.; W. S. Burton, Sec., both of Salt Lake City, Utah; O. E. Kirkpatrick, Vice-Pres. & Mgr., Leesburg. **Inc.:** Apr. 14, 1911. Charter forfeited Nov. 30, 1926. **Capital:** 1,500,000 shares; par value $1; 1,200,000 shares issued. **Property:** 8 patented, 8 unpatented claims, Mackinaw dist.; Leesburg. **Development:** Principally by 1 tunnel, 1100 ft. long. **Plant:** An old 10-stamp mill. **Men employed:** Average, 2. **Ore:** Gold and silver. **Remarks:** Active during the summer months.

LEMHI MINING CO.

Office: Winchester, Ind. **Officers:** R. W. Knowlton, Pres., Ashtabula, Ohio; A. L. Nichols, Sec., Winchester, Ind.; R. E. Lee Ramey, Mgr., Salmon. **Inc.:** Jan. 16, 1924. **Capital:** 5000 shares; no par value; 4942 shares issued. **Property:** Rabbit Foot group; 8 unpatented claims, Gravel Range dist.; Forney. **Development:** By 3 tunnels, the principal one of which is 1700 ft. long. **Plant:** MINE: Steam-driven hoist. MILL: 10-stamp amalgamation. **Ore:** Gold. **Remarks:** Annual labor only.

McNUTT PLACER

Lessee: H. F. Byram, Route 8, Portland, Ore. **Property:** McNutt placer; 3 patented, 4 unpatented claims, Leesburg dist.; Leesburg; held under lease from John E. Mullen, Salmon. **Plant:** Hydraulic equipment. **Ore:** Placer gold. **Men employed:** Average, 7. **Remarks:** Ditches, dams, and flumes were constructed; mining equipment was installed; and a small amount of hydraulicking was performed during the year.

MONTANA MINING & LIVESTOCK CO.

Office: 1037 S. Flower St., Los Angeles, Calif. **Officers:** C. A. Devlan, Pres.-Mgr., Leesburg; E. H. Devlan, Sec., Los Angeles, Calif. **Inc.:** Mar. 8, 1919. **Capital:** 5,000,000 shares; par value 10c; 4,875,213 shares issued. **Property:** Leesburg group; 11 unpatented placer claims, Mackinaw dist.; Leesburg. **Plant:** Steam-driven hoist and 100-cu.-ft. I-R compressor; complete mining and logging equipment; saw mill; complete camp and buildings. **Ore:** Placer gold. **Remarks:** Small amount of work during the summer months.

NORTHWESTERN DEVELOPMENT CO., LTD.
Office: Ashland, Ky. **Officers:** C. E. Williams, Pres.; Thomas Boggess, Sec., both of Ashland, Ky. **Inc.:** Aug. 28, 1916. **Capital:** 500,000 shares; par value $1; 239,840 shares issued. **Property:** Primrose group; 6 patented claims, Eldorado dist.; Salmon. **Plant:** Gas-driven compressor; complete mining equipment and mine camp. **Ore:** Gold-silver-copper. **Remarks:** Idle.

PARKER MINING CO., LTD.
Office: Blackfoot. **Officers:** F. W. Mitchell, Pres.; F. J. Cowen, Sec., both of Blackfoot. **Inc.:** Feb. 18, 1909; charter forfeited Dec. 1, 1925. **Capital:** 400,000 shares; par value $1; all shares issued. **Property:** Parker group; 3 unpatented claims, Parker dist.; Challis. **Development:** By 3 tunnels: No. 1, 150 ft. long; No. 2, 50 ft. long; No. 3, 40 ft. long. **Ore:** Gold, silver. **Remarks:** Annual labor only.

PATTERSON MINES CORPORATION
Office: First National Bank Bldg., Pocatello. **Officers:** Finis Bentley, Pres.; W. R. Howard, Sec., both of Pocatello; W. P. Barton, Mgr., May. **Inc.:** Apr. 3, 1927. **Capital:** 1,000,000 shares; par value $1; 530,500 shares issued. **Property:** Lease and option on property of Ima Consolidated Mining & Milling Co. **Men employed:** Average, 4. **Remarks:** Mill and power plant repaired during the year.

POPE-SHENON MINING CO.
Office: 408 Vermont Bldg., Salt Lake City, Utah. **Officers:** R. H. Winder, Pres.; George A. Smith, Sec.-Mgr., both of Salt Lake City, Utah. **Inc.:** Dec. 3, 1917. Charter forfeited Nov. 30, 1927. **Capital:** 1,000,000 shares; par value 20c; 571,714 shares issued. **Property:** Pope-Shenon group; 12 patented claims, Eureka dist.; Salmon. **Development:** 6 tunnels: No. 1, 70 ft. long; No. 2, 80 ft. long; No. 3, 400 ft. long; No. 4, 130 ft. long; No. 5, 800 ft. long; No. 6, 1000 ft. long. Total development approximately 3000 ft. of underground workings. **Plant:** MINE: 12x10 I-R electrically-driven compressor; Sullivan steel sharpener; complete mining equipment and camp. MILL: 60-ton electrically-driven concentrator, including fine grinding and flotation. **Ore:** Copper. **Remarks:** Under option to Winder-Stillman Copper Co., which see.

PORTLAND MINING CO.
Office: Butte, Mont. **Officers:** E. J. Carleton, Pres., N. Y. Life Bldg., Minneapolis, Minn.; W. S. Shaw, Sec., Butte, Mont. **Inc.:** Aug. 11, 1920. **Capital:** 500,000 shares; par value $1; all shares issued. **Property:** Portland group; 3 patented, 11 unpatented claims, Texas dist.; Gilmore. **Remarks:** Small amount of development work.

PROVIDENCIA MINING CO., LTD.
Office: Salmon. **Officers:** L. E. Glennon, Pres.; John E. Rees, Sec.; Camele Rock, Mgr., all of Salmon. **Inc.:** Sept. 6, 1927. **Capital:** 1,000,000 shares; par value $1; 225,000 shares issued. **Property:** Providencia group; 6 unpatented claims, Dahlonega dist.; Gibbonsville. **Development:** By 3 tunnels: No. 1, 308 ft.; No. 2, 360 ft.; No. 3, 400 ft. **Ore:** Gold. **Remarks:** Annual labor only.

RESCUE GOLD MINES CO.
Office: P. O. 624, Pasadena, Calif. **Officers:** Chas. Mushrush, Pres.; Willis H. Brown, Sec., both of Pasadena, Calif. **Inc.:** Apr. 25, 1919. Charter forfeited Nov. 30, 1926. **Capital:** 90,000 shares; par value $1; 13,303 shares issued. **Property:** Rescue group; 23 patented claims, Dahlonega dist.; Gibbonsville. **Ore:** Gold. **Remarks:** Idle.

SPRING MOUNTAIN MINING CO., INC.
Office: Newhall, Calif. **Officers:** E. G. Carlson, Pres.; A. S. Weiss, Sec., both of Newhall, Calif.; Ray Rasmussen, Mgr., Gilmore. **Inc.:** Filed in Idaho, Dec. 19, 1927. **Capital:** 1000 shares; par value $100; all shares issued. **Property:** Big Windy group; 8 unpatented claims, Spring Mountain dist.; Gilmore; held under lease and option. **Development:** By 3 tunnels: No. 1, 275 ft.; No. 2, 875 ft.; No. 3, 200 ft. **Ore:** Lead-silver. **Men**

employed: Average, 6. **Remarks:** Mine buildings repaired; small amount of development work performed; small tonnage of ore produced and marketed.

UNCLE SAM MINING & DEVELOPMENT CO., LTD.
Office: Salmon. **Officers:** Owen Swift, Pres.-Mgr.; L. E. Glennon, Sec., both of Salmon. **Inc.:** May 20, 1926. **Capital:** 250,000 shares; par value 10c; 133,350 shares issued. **Property:** Uncle Sam group; 4 unpatented claims, Eldorado dist.; Tendoy. **Development:** By 1 tunnel 200 ft. long. **Men employed:** Average, 2. **Ore:** Copper. **Remarks:** This property is owned and financed by local people, who actively prosecuted the driving of the tunnel throughout the year.

UNITED IDAHO MINING CO.
Office: No. 1, State St., c|o U. S. Smelting, Refining & Mining Co., Boston. **Officers:** C. A. Hight, Pres.; F. W. Batchelder, Sec., both of Boston; D. D. Muir, Jr., Mgr., Newhouse Bldg., Salt Lake City. **Inc.:** Oct. 18, 1924. **Capital:** 10,000 shares common, no par value; 10,000 shares preferred, par value $10; 7053 shares common issued. **Property:** Pittsburg-Idaho group; 5 patented claims, Texas dist.; Gilmore. **Development:** 4 tunnels: No. 1, 600 ft. long; No. 2, 950 ft. long; No. 3, 1600 ft. long; No. 4, 1300 ft. long, in which is an inclined shaft 970 ft. long, which gives a vertical depth of 850 ft. on the vein. **Plant:** MINE: 1 200-kw. Allis-Chalmers Diesel engine with generator, 1 I-R electrically-driven 9x8, and 1 C-P gas-driven compressor; 100-h. p. electrically-driven double-drum hoist; complete mining equipment, camp, and buildings. MILL: 50-ton gas-driven concentrator. **Ore:** Lead-silver. **Men employed:** Average, 69. **Remarks:** This mine is the largest lead-silver mine in southern Idaho and maintains the second largest payroll. A large tonnage was produced and marketed, part of which was extracted by lessees; and active mine development work was maintained throughout the year.

UTANA MINING CORPORATION
Office: 205 Felt Bldg., Salt Lake City, Utah. **Officers:** W. H. Penner, Pres.-Mgr.; Web Greene, Sec., both of Salt Lake City. **Inc.:** Aug. 4, 1921. **Capital:** 1,000,000 common, par value 10c; 100,000 preferred, par value $1; 119,000 shares issued. **Property:** Big Dyke group; 22 unpatented claims, Freeman dist.; Salmon. **Development:** Approximately 1600 ft. of underground workings. **Plant:** Steam-driven compressor; complete mining equipment and camp; complete machinery and equipment for a cyanide plant. **Ore:** Lead, silver, copper, zinc. **Remarks:** Annual labor only.

VIRGINIA GOLD MINING & MILLING CO.
Office: Atlas Bldg., Salt Lake City, Utah. **Officers:** W. A. Shaw, Pres.; L. M. Byers, Sec., both of Salt Lake City. **Inc.:** Aug. 21, 1925. **Capital:** 2,500,000 shares; par value 1c; 2,000,000 shares issued. **Property:** Virginia group; 18 patented, 7 unpatented claims, Eureka dist.; Baker.

WESTERN REWARD MINING CO.
Office: Salmon. **Officers:** Chas. E. Van Ness, Pres.-Mgr.; Nellie M. Gorman, Sec., both of Salmon. **Inc.:** Filed in Idaho, Feb. 15, 1927. **Capital:** 2,000,000 shares; par value 10c; 752,000 shares issued. **Property:** Monolith-Merry Widow groups; 2 unpatented claims, Shoup dist.; Shoup; held under lease and option. **Remarks:** Small amount of development work during the early part of the year.

WINDER-STILLMAN COPPER CO.
Office: Salmon. **Officers:** R. H. Winder, Pres., Salt Lake City; J. W. Jones, Sec.-Mgr., Salmon. **Inc.:** Unknown. **Capital:** 1,000,000 shares; par value 1c; 342,670 shares issued. **Property:** Lease and option on property of Pope-Shenon Mining Co., which see. **Men employed:** Average, 8. **Remarks:** In addition to performing a large amount of development work, the company repaired the mill, enlarged it, added a flotation unit, and placed the mine in condition to commence active production after the first of the year.

LEWIS COUNTY

Lewis is one of the northern counties, being bounded on the north and west by Nez Perce, on the northeast by Clearwater, and on the east and south by Idaho County. Containing an area of but 470 square miles, and a population of 12.4 persons to the square mile, it is one of the smallest counties in the State in area and one of the largest in density of population. Excepting the small area occupied by Craig Mountains, practically all the county is tillable, and the principal industries are wheat raising and lumbering.

The county is served by the North and South State highway, by the Lewiston-Stites branch of the Northern Pacific Railroad, by the Lewiston-Grangeville branch, which is owned jointly by the Union Pacific and Northern Pacific railroads, by the Nez Perce & Idaho Railroad from Craigmont to Nez Perce, the county seat, and by the Craig Mountain Railroad from Reubens to Winchester.

The principal mineral resources are copper, gold, silver, marble, and limestone. Veins containing copper, gold, and silver have been discovered and developed in the Craig Mountains, principally along Deer Creek. At one time this section received considerable attention, and a small mill was constructed at one of the mines. The marble and limestone occur on Mission Creek near the Nez Perce County line. The marble occurs in all shades, colors, and diagrams familiar to the marble industry; it is exceptionally adaptable to commercial use and one enterprise has been started to utilize and manufacture the marble and limestone into marketable products.

The Winchester Copper Mining & Smelting Co., which acquired the Forest group of copper claims on Deer Creek in 1926, constructed new buildings, installed a small compressor, and commenced active development work during the latter part of the year.

CRAIG MOUNTAIN MINING & MILLING CO.

Office: Lewiston. **Officers:** Ben L. Schultz, Pres.-Mgr., Lewiston; W. W. Burr, Sec., Genesee. **Inc.:** Nov. 30, 1925. **Capital:** 600,000 shares; par value $1; 475,000 shares issued. **Property:** Craig Mountain group; 20 unpatented claims, Deer Creek dist.; Winchester. **Development:** Total development, approximately 5000 ft. **Plant:** Old mining and milling plant and equipment, installed in 1915. **Ore:** Copper. **Remarks:** Annual labor only.

WINCHESTER COPPER MINING & SMELTING CO.

Office: Winchester. **Officers:** D. Nicholson, Pres.; W. M. Nicholson, Sec., both of Winchester. **Inc.:** Aug. 7, 1926. **Capital:** 1,500,000 shares; par value 10c; 265,520 shares issued. **Property:** Forest group; 11 unpatented claims, Deer Creek dist.; Winchester. **Development:** By 2 tunnels: No. 1, 249 ft. long; No. 2, 200 ft. long. **Ore:** Copper-silver. **Remarks:** A small amount of development work during the year.

NEZ PERCE COUNTY

Nez Perce is one of the principal northern counties, bounded on the south and east by Idaho and Lewis counties, on the north and east by Clearwater and Latah counties, and on the west by the States of Washington and Oregon. It has an area of 851 square miles and was accredited with a population of 15,253 in the 1920 census. It is primarily an agricultural county, and Lewiston, the largest town and civic center of north-central Idaho, is the county seat. The county was originally organized under an act of the Legislature of Washington Territory before the Territory of Idaho was organized, and Lewiston was first settled in 1861, consequent to the discovery of, and as a supply point for, the placer mines in Clearwater and Idaho counties.

Lewiston is at the junction of the Snake and Clearwater rivers; steamboats can reach it from Portland, Oregon, although they are not used as a means of transportation from that point, and both rivers are navigable for boats of light draft. In addition to river boats, the county is served by the Union Pacific and Northern Pacific railroads, and by the North and South, and Lewis and Clark State highways.

The principal mineral resources are copper, silver, gold, marble, and limestone. The metals occur in isolated sections of the county and have never received much attention. The limestone, which is adaptable to Portland cement, occurs on the Snake River north of Lewiston, but the deposits have never been developed. The marble, which is of excellent grade and quality, occurs on the Clearwater River near Agatha. A little attempt has been made to exploit the marble deposits.

INDEPENDENT MARBLE & LIME CO.

Office: Lewiston. **Officers:** F. S. Johnson, Pres., Nez Perce; P. R. Bevis, Sec., Lewiston. **Inc.:** Jan. 25, 1926. **Capital:** 1,000,000 shares; par value $1; 250,000 shares issued. **Property:** 220 acres held under lease and option; on Mission Creek. **Mineral sought:** Limestone.

OWYHEE COUNTY

Owyhee is one of the historic counties of Idaho. It is situated in the southwestern portion of the State, and is bounded on the north by Canyon, Ada and Elmore counties, on the east by Twin Falls County, on the south by the State of Nevada, and on the west by the State of Oregon. Its area is 7956 square miles, being larger than the State of New Jersey, and its population according to the 1920 census was only 4694, or 0.6 persons to the square mile. The principal industries are farming, stockraising, and mining. Silver City, one of the oldest towns in the State, is the county seat.

The history of this county dates back to the discovery of placer gold and the rich veins of War Eagle Mountain in 1863. The first quartz mill was constructed in 1864, and for many years thereafter Owyhee was the principal mining county. The ores which occur in this county are the richest gold-silver ores ever discovered in the State, and many tons which were either milled or sent directly to smelter had a phenomenal value. Early statistics are not very reliable, but from the best sources available, an estimated production of over $40,000,000 is conservative.

The principal mineral resources of the county are silver, gold, copper, lead, zinc, antimony, diatomaceous earth, opals, manganese, and nitrates. The diversity of mineralization, the favorable geological conditions, and the wide distribution of the deposits throughout the county make it an exceptionally favorable field for prospectors and development companies, particularly because all the high-grade ore in the old mines has not been exhausted, nor have all the veins been discovered.

Owyhee County continues to attract prospectors and investigators seeking new enterprises. The fact that this county still offers excellent opportunities was proved during 1927 by the number of engineers who visited the county, as well as by the new construction and new enterprises which were initiated.

The largest expenditure which has been made on new construction in this county for over five years was made by the American Gold Dredging Corporation on its new flume-type dredge, new mine camp, and four miles of electric transmission line, at its property on Meadow Creek near Triangle. The dredge was designed, manufactured, and erected by the Yuba Manufacturing Co. It is equipped with 2½-cubic-foot close-connected buckets, and is electrically driven and controlled.

New mills to be constructed during the year were those of the Owyhee Gold Mining Co., on War Eagle Mountain, and the Idaho Development Co., at the Evans mine on Poison Creek. Each of these companies completed its mill buildings, and purchased and partly installed the machinery, but neither was ready for operation at the close of the year. In addition to the mills, new camp buildings were erected. The Idaho Development Co. installed a gas-driven hoist and compressor, and complete mining equipment.

The Golconda group in the South Mountain district, owned by the Golconda Group Mining Co., was under option for a few months, during which time a small gas-driven compressor and complete small mining equipment were installed. The geology and mineral resources of the district in which this mine is located are fully described in a new publication issued by the Idaho Bureau of Mines and Geology: Pamphlet No. 22, "The Geology and Ore Deposits of the South Mountain Mining District, Owyhee County, Idaho," by Robert E. Sorenson.

The Great Western Mines Co., whose property is on War Eagle Mountain, maintained active development work throughout a large part of the year. This company is deserving of success for the honest and persistent effort it has been displaying in developing its mine for the past seven years.

The Never Sweat Mining Co. operated its mill for a few days on ore which was extracted under contract. The Hoosier Leasing Co., on the Alpine vein in the Trade Dollar, produced and marketed a small amount of high-grade ore. The Castle Creek Mining & Milling Co. resumed operations the latter part of the year, after perfecting a reorganization of the company.

New companies entering the county during the year were: The Afterthought Mining Co., on the Afterthought; the Big Four Development Co., on the Cumberland; and the War Eagle Mining & Milling Co., on the Red Jacket group. All these are located on War Eagle Mountain.

Drilling for "platinum" in the Bruneau section, in the artesian basin of Little Valley, was active during the early part of the year. Press reports indicated that results were discouraging, and that practically all of the enterprises were abandoned.

AFTERTHOUGHT MINING CO.

Office: 323 Sonna Bldg., Boise. **Officers:** J. W. Jones, Pres.-Mgr.; S. L. Tipton, Sec., both of Boise. **Inc.:** Feb. 15, 1927. **Capital:** 500,000 shares; par value $1; 165,030 shares issued. **Property:** Afterthought group; 1 patented, 3 unpatented claims; French dist.; Silver City; held under lease and option from E. V. Orford, Boise. **Development:** Principally by a vertical shaft 470 ft. deep, in which there are 5 intermediate levels. **Ore:** Silver-gold. **Remarks:** Small amount of repair work during the summer months.

AMERICAN GOLD DREDGING CORPORATION'S DREDGE

AMERICAN GOLD DREDGING CORPORATION

Office: 505 Railway Exchange Bldg., Detroit, Mich. **Officers:** Walter J. Long, Pres.-Mgr., 8th St. & Garden Ave., Boise; Louis B. Hyde, Sec., Detroit, Mich. **Inc.:** Filed in Idaho, Jan. 2, 1926. **Capital:** 300,000 shares common, 200,000 shares preferred; par value $1; 155,000 shares common, 74,340 shares preferred issued. **Property:** Meadow Creek group; 18 unpatented placer claims, containing 360 acres, part of which are held under lease and option; Steele dist.; Triangle. **Plant:** Electrically-driven flume-type Yuba dredge with 2½-cu.-ft. buckets close collected. **Ore:** Placer gold. **Men employed:** Average, 15. **Remarks:** During the year this company constructed its dredge, new mine camp, and 4-mile electric transmission line. All work was completed and dredge made ready to commence operations by the first of January, 1928.

BANNER MINING & MILLING CO.

Office: 1122 State St., Boise. **Officers:** Peter Steele, Pres.-Mgr., Silver City; F. S. Heer, Sec., Boise. **Inc.:** June 15, 1905. **Capital:** 1,500,000 shares; par value $1; 1,200,000 shares issued. **Property:** Banner group; 10 patented, 12 unpatented claims, Carson dist.; Silver City. **Development:** Over 11,000 ft. of underground workings. **Remarks:** Idle since 1923.

BIG FOUR DEVELOPMENT CO.
Office: Box 1061, Boise. **Officers:** C. C. Zumwalt, Pres.-Mgr., Boise; M. H. Eustace, Sec., Caldwell. **Inc.:** Apr. 2, 1924. **Capital:** 500,000 shares; par value $1; 260,000 shares issued. **Property:** Cumberland group; 3 patented claims, War Eagle Mountain, French dist.; Silver City; held under lease and option.

CASTLE CREEK MINING & MILLING CO.
Office: 319 Yates Bldg., Boise. **Officers:** A. C. Bunger, Pres.; W. P. Nelson, Sec.; Harry L. Fisher, Mgr., all of Boise. **Inc.:** An association. **Capital:** 500,000 shares; par value $1; 490,000 shares issued. **Property:** 8 patented, 2 unpatented claims in Pixley Basin, unorganized dist.; Grandview. **Development:** Principally by 3 tunnels: No. 1, 150 ft. long; No. 2, 350 ft. long; No. 3, 800 ft long; an inclined shaft 220 ft. long. **Plant:** MINE: 10x10 gas-driven compressor; complete mining equipment and camp. MILL: 30-ton gas-driven concentrator including flotation. **Ore:** Silver. **Men employed:** Average, 2. **Remarks:** Company reorganized and development work started during the latter part of the year.

COSMOPOLITAN MINING CO., LTD.
Office: Murphy. **Officers:** H. C. Simonsen, Pres., Nampa; Oscar Brunzell, Sec., Murphy. **Inc.:** Nov. 17, 1923. **Capital:** 500,000 shares; par value $1; 119,992 shares issued. **Property:** Hammond group; 5 unpatented claims, Carson dist.; Silver City. **Development:** By 2 tunnels: No. 1, 420 ft. long; No. 2, 344 ft. long. **Ore:** Antimony-silver. **Remarks:** A small amount of work during the year.

EMPIRE MINES CO.
Office: 1122 State St., Boise. **Officers:** Peter Steele, Pres.-Mgr., Silver City; F. S. Heer, Sec., Boise. **Inc.:** Sept. 15, 1923. **Capital:** 2,500,000 shares; par value $1; 2300 shares issued. **Property:** Trade Dollar group; 37 patented, 6 unpatented claims, Carson dist.; Silver City **Remarks:** Part of mine under option by the Hoosier Leasing Co.

GOLCONDA GROUP MINING CO.
Office: N. 610 Washington St., Spokane, Wash. **Officers:** G. A. Sonneman, Pres.-Mgr.; E. W. Sonneman, Sec., both of Spokane, Wash. **Inc.:** Jan. 11, 1908. **Capital:** 1,500,000 shares; par value 1c; all shares issued. **Property:** South Mountain group; 15 patented claims, South Mountain dist.; Jordan Valley, Ore. **Plant:** Small gas-driven compressor. **Ore:** Lead-zinc-silver. **Remarks:** Under option for a few months, during which time a small gas-driven compressor and complete small mining equipment were installed.

GREAT WESTERN MINES CO.
Office: Room 169, Republican House, Milwaukee, Wis. **Officers:** A. J. Kraemer, Pres., Menomonee Falls, Wis.; F. H. Mayhew, Sec., Milwaukee, Wis.; T. W. Galigher, Agent, 915 N. 21st St., Boise. **Inc.:** Nov. 29, 1920. **Capital:** 1,500,000 shares; par value 1c; 1,000,000 shares issued. **Property:** Chapman group, owned by Chapman & Emerson, Boise; 5 unpatented claims, held under lease and bond. Company owns 3 and a fraction unpatented claims, French dist.; Silver City. **Development:** By 2 tunnels: No. 1, 2600 ft. long; No. 2, 2800 ft. long. **Plant:** Electrically-driven 10x10 compressor; complete mining equipment and camp. **Ore:** Gold. **Men employed:** Average, 3. **Remarks:** Active development work throughout a large part of the year.

HOOSIER LEASING CO.
Office: Silver City. **Officers:** Charles A. Hackney, Pres.; Peter Steele, Mgr., both of Silver City; Victor Shawe, Sec., Boise. **Inc.:** Nov. 16, 1926. **Capital:** 100,000 shares; par value $1; 32,250 shares issued. **Property:** Lease on Alpine vein from Empire Mines Co.; Carson dist.; Silver City. **Development:** Operations conducted through Blaine tunnel. **Ore:** Gold-silver. **Men employed:** Average, 4. **Remarks:** A small amount of high-grade ore was produced and marketed during the early part of the year.

IDAHO DEVELOPMENT CO.

Office: 610 Eastman Bldg., Boise. **Officers:** W. R. Millard, Pres.-Mgr., Grandview; Harry D. Mills, Sec., Reno, Nev. **Inc.:** Filed in Idaho, Feb. 28, 1927. **Capital:** 400,000 shares; par value $1; 200,000 shares issued. **Property:** Evans group; 7 unpatented claims on Poison Creek; Grandview; held under lease and option from A. T. Evans. **Development:** By 2 short shafts. **Plant:** MINE: Gas-driven hoist and compressor; complete mining equipment and camp. MILL: 30-ton mill, amalgamation and concentration; gas-driven. **Ore:** Silver-gold. **Men employed:** Average, 6. **Remarks:** Mining equipment installed; mill building constructed and machinery partly installed; small amount of development work during year.

IDAHO GOLD & PLATINUM MINING CO.

Office: Mountain Home. **Officers:** J. R. Prentice, Pres.-Mgr.; Willa G. Mundell, Sec., both of Mountain Home. **Inc.:** July 6, 1925. **Capital:** 2,500,000 shares; par value 10c; shares issued, unknown. **Property:** 2 unpatented claims, 160 acres, unorganized dist., Little Valley; Bruneau. **Ore:** Platinum. **Remarks:** This company's enterprise is based on the presence of platinum in a volcanic glass sand lying at a depth of about 250 ft. in an artesian basin. During the early part of the year, an attempt toward sinking a shaft was made, and a few test holes were driven by churn drills.

IMPERIAL MINING & MILLING CO., LTD.

Office: 816-819 Foster Bldg., Denver, Colo. **Officers:** B. M. Webster, Sec., Denver, Colo. **Inc.:** Mar. 13, 1903. **Capital:** 500,000 shares; par value $1; all shares issued. **Property:** Imperial Lode; 1 patented claim, French dist.; Silver City.

NEVER SWEAT MINING CO.

Office: Nampa. **Officers:** Windsor J. Lloyd, Pres.; D. L. Rhodes, Sec., both of Nampa. **Inc.:** July 6, 1922. **Capital:** 50,000 shares; par value $10; 27,000 shares issued. **Property:** Never-Sweat group; 12 unpatented claims, French dist.; Silver City. **Development:** By 2 tunnels: No. 1, 2200 ft. long; No. 2, 1100 ft. long, in which is a vertical shaft 50 ft. deep. **Plant:** MINE: Electrically-driven compressor and complete mining equipment. MILL: 50-ton mill; fine grinding, amalgamation plates, and concentrating tables. Complete mine camp. **Ore:** Silver-gold. **Remarks:** Mill operated for a few days on ore which was extracted by 2 men under contract.

MINE CAMP AND MILL: OWYHEE GOLD MINING CO.

OWYHEE GOLD MINING CO.

Office: Nampa. **Officers:** M. D. Polk, Pres.; V. C. Belknap, Sec., both of Nampa; John B. Platts, Mgr., Wallace. **Inc.:** Sept. 3, 1925. **Capital:** 500,000 shares; par value $1; 248,900 shares issued. **Property:** Mountain Chief group; 2 unpatented claims, French dist.; Silver City. **Development:** Principally by 3 tunnels: No. 1, 200 ft.; No. 2, 175 ft.; No. 3, 850 ft. Total development, approximately 1750 ft., which opens the vein to a total depth of 400 ft. **Plant:** 50-ton amalgamation mill. **Men employed:** Average, 8. **Ore:** Gold. **Remarks:** During the year complete new mine camp was constructed, mill building erected, and milling machinery partly installed.

ROOSTER COMB MINING CO.

Office: 1704 N. 25th St., Boise. **Officers:** J. M. McBride, Pres.; W. H. Campbell, Sec., both of Boise. **Inc.:** Jan. 7, 1926. **Capital:** 100,000 shares; par value $1; 75,000 shares issued. **Property:** 8 unpatented claims on Reynolds Creek, held under lease and option, unorganized dist.; Murphy. **Development:** By 1 tunnel 700 ft. long, and 1 shaft 50 ft. deep. **Ore:** Gold. **Remarks:** Small amount of work during the year.

WAR EAGLE CONSOLIDATED MINING CO.

Office: 919 Real Estate Trust Bldg., Philadelphia, Pa. **Officers:** Frank S. Lewis, Pres.; H. L. Siddell, Ass't. Sec., both of Philadelphia. **Inc.:** Apr. 22, 1907. Charter forfeited Dec. 1, 1912. **Capital:** 60,000 shares preferred, 240,000 shares common; par value $50; all shares issued. **Property:** South Oro Fino and Mahogany groups; 8 patented, 2 unpatented claims, French dist.; Silver City. **Remarks:** Company operations suspended in 1923, since which time occasional lessees have performed a little work.

WAR EAGLE MINING & MILLING CO.

Office: Boise. **Officers:** Harry Keyser, Pres.; E. P. Barnes, Sec.; Lafayette Boone, Mgr., all of Boise. **Inc.:** January 4, 1927. **Capital:** 1,000,000 shares; par value 10c; 510,000 shares issued. **Property:** Red Jacket group; 5 unpatented claims, French dist.; Silver City. **Development:** By 3 tunnels: No. 1, 600 ft.; No. 2, 600 ft.; No. 3, 2000 ft. **Ore:** Gold. **Remarks:** Small amount of work under contract.

PAYETTE COUNTY

The only known mineral resources of this county are diatomaceous earth; various clays of excellent quality; and gas, which has been developed at Payette.

Late in 1926 the Idaho Petroleum Co. at Payette acquired the property and equipment owned by the Idaho Oil & Gas Co., whose well was 1100 feet deep. Work was then started sinking the well to a further depth and was carried on intermittently throughout 1927, until a total depth of 1800 feet was gained. The encountering of gas was reported at the depths of 1485 and 1550 feet.

POWER COUNTY

The most active development work done in this county during the year was that of the Independent Mining Co. at its lead-silver prospect near Rockland. The mine is equipped with small machinery and nine men were employed in sinking a shaft.

The Gem State Petroleum Co. extended its well 325 feet; and the Rockland Valley Oil Co. added 450 feet to its bore.

A few placer mines along the Snake River produced and marketed a small amount of placer gold.

ARBON VALLEY OIL CO.

Office: Pocatello. **Officers:** D. C. Ray, Pres.; L. B. Evans, Sec., both of Pocatello. **Inc.:** Feb. 20, 1923. **Capital:** 250,000 shares; par value $1; 120,000 shares issued. **Property:** Oil leases on patented farm land which have been assigned to Gem State Petroleum Co.

GEM STATE PETROLEUM CO.

Office: Pocatello. **Officers:** H. C. Harris, Pres.-Mgr.; S. G. Baker, Sec., both of Pocatello. **Inc.:** Oct. 2, 1923. **Capital:** 300,000 shares; par value $1; 286,123 shares issued. **Property:** Oil and gas leases on 15,000 acres of farm land in Arbon Valley. **Development:** 10-inch well, 2550 ft. deep. **Mineral sought:** Oil and gas. **Remarks:** Well extended 325 ft. during the year.

IDAHO RESEARCH AND DEVELOPMENT CO.

Office: 810 S. 4th Ave., Pocatello. **Officers:** Geo. Williams, Pres., Pocatello; Geo. Stoll, Sr., Sec.-Mgr., 836 E. 67th N., Portland, Ore. **Inc.:** Aug. 2, 1920. **Capital:** 200,000 shares; par value $5; 123,504 shares issued. **Property:** Oil and gas leases on 8000 acres in Arbon Valley. **Plant:** 15-h. p. steam-driven well-drilling rig and equipment. **Mineral sought:** Oil and gas. **Remarks:** Idle throughout the year. Leases assigned to Gem State Petroleum Co.

INDEPENDENT MINING CO.

Office: Rockland. **Officers:** G. B. Geswaldi, Pres.-Mgr.; W. M. Hines, Sec., both of Rockland. **Inc.:** Oct. 24, 1925. **Capital:** 2,000,000 shares; par value 25c; 1,088,952 shares issued. **Property:** Independent group; 16 unpatented claims, unorganized dist.; Rockland. **Development:** By 1 shaft 170 ft. deep. **Plant:** Gas-driven 8x10 Sullivan compressor; small air-driven hoist; complete mining equipment. **Ore:** Lead-silver. **Men employed:** Average, 9. **Remarks:** Active throughout the year in sinking shaft.

ROCKLAND VALLEY OIL CO.

Office: Rockland. **Officers:** W. M. Hines, Pres.; Ed. N. Morris, Sec.; J. F. Hautzinger, Mgr., all of Rockland. **Inc.:** June 7, 1923. **Capital:** 150,000 shares; par value $1; 80,527 shares issued. **Property:** Oil and gas leases on 16,300 acres; Rockland. **Development:** 1 well, 1700 ft. deep. **Plant:** Steam-driven drilling rig and complete equipment. **Remarks:** A stock assessment of 2 cents per share was levied on Jan. 31. Well extended 450 ft. during the year.

SHOSHONE COUNTY

Shoshone County lies in the northern part of the State, and is bounded on the east by the State of Montana, on the south by Clearwater County, on the west by Latah, Benewah, and Kootenai counties, and on the north by Bonner County. In area it is one of the largest counties in the State covering 2597 square miles. Lying approximately in the geographical center of the county is the famous Coeur d'Alene mining district, which contains an area of approximately 400 square miles, and which is known throughout the world as one of the largest lead-silver producing regions of the United States.

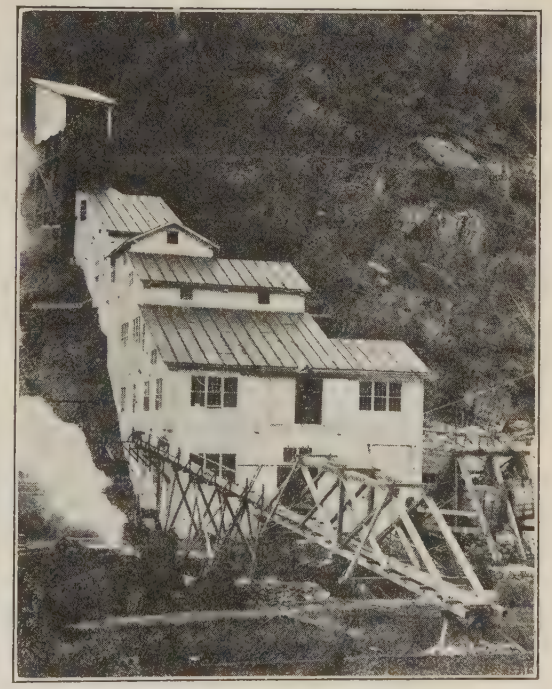
The entire county is mountainous, containing but a very small area of agricultural land, and is entirely dependent upon the mining and timber industries, particularly mining. These industries are well established, and it is to them that credit must be given for making this county one of the wealthiest in the State, as well as the county having the smallest public debt, one of the lowest tax levies, and the greatest per capita wealth.

It is the largest and most important mining county in the State, and for many years has produced 90 per cent of the lead and 85 per cent of the silver that has been derived from Idaho mines. Its importance can be better judged from the fact that Idaho ranks third in the United States in the production of lead and third in the production of silver. In addition to its production of lead and silver, Shoshone is the principal zinc producing county in the State, and one of the most important gold producers. The other metals which occur in commercial quantities are copper, antimony, and tungsten. At one time copper was one of the principal metal products and the largest copper mines ever developed in the State were those near Mullan.

The county is served by the O.-W. R. & N. and Northern Pacific railroads, by the Coeur d'Alene-Yellowstone State highway, which is paved between Mullan, Wallace, and Kellogg, and by well-maintained county roads, which reach the principal mines. Wallace is the largest town, the county seat, and the civic and business center.

Mining conditions in the Coeur d'Alene district reflected the general sound prosperity that the country has witnessed throughout the year. Practically all the large producers maintained capacity production, and in some instances output was increased above normal. The mines are in excellent shape both as to future life and physical condition, and the district is assured that many years will elapse before the end of the principal mines can even be predicted. In addition to the fact that the present large producers have almost unlimited resources, there is also the possibility of discovering new mines throughout this vast mineralized area. In the past, famous producers have become exhausted, yet the closing of these properties has not affected the prosperity of the district, because when one mine has become exhausted a new one almost invariably has been discovered or developed to take its place.

During 1927 this county witnessed more new development, the starting of more new enterprises, more new dividend-paying and profitably operating mines, and a larger production than at any time since the peak of wartime activities. As many of the new enterprises are based on substantial mine foundations, the possibility for adding additional new producers to the present long list of profitable operations is greatly increased. All the large mines conducted active development work throughout the year which proved the extent of their ore bodies at greater depth and laterally. The increased ore reserves and the improvements added to mine, mill, and smelting plants have enhanced the physical condition and future life of the mines, as well as insuring a long period of prosperity for the Coeur d'Alene district.



The principal producing mines in which the ore reserves were increased by new development work during the year were: The Bunker Hill mine of the Bunker Hill & Sullivan M. & C. Co.; the Hecla mine of the Hecla Mining Co.; the Morning and Page mines of the Federal M. & S. Co.; the Tamarack mine of the Tamarack & Custer Consolidated Mining Co.; the Stratton and Panhandle mines of the Strattons Mines Co.; the Sidney mine of the

Sidney Leasing Co.; the Sunshine mine of the Sunshine Mining Co.; the Gold Hunter mine of the Gold Hunter Mines, Inc.; the Galena mine of the Callahan Zinc-Lead Co.; the Jack Waite mine of the Jack Waite Mining Co.; and the Constitution mine of the Constitution Mining & Milling Co.

Companies which entered the ranks of dividend payers during the year were: The Sunshine Mining Co. at its Sunshine mine; and the Sidney Leasing Co. at the Sidney mine. Mines which were placed on a profitable operating basis were: The Galena mine of the Callahan Zinc-Lead Co.; and the Page mine of the Federal M. & S. Co.

The principal new ore disclosures and discoveries of importance were those at the Tamarack mine of the Tamarack & Custer Consolidated Mining Co.; the Dickens mine of the Dickens Consolidated Mines Co.; the Sherman mine of the Sherman Lead Co.; the Douglas mine of the Douglas Mining Co.; the Alameda mine of the Alameda Mining Co.; and the Golconda mine of the Golconda Lead Mines.

The most important new construction work maintained throughout the year was at the electrolytic zinc plant at Kellogg, which is being built by the Sullivan Mining Co. to treat the zinc-lead ores of the Coeur d'Alene district. The Sullivan Mining Co. is owned jointly by the Bunker Hill & Sullivan M. & C. Co. and the Hecla Mining Co. The Hercules mill at Wallace, owned by the Hercules Mining Co., was rebuilt, a zinc flotation unit added, and it was converted into a custom mill which now offers milling facilities for small mines without mills in the vicinity of Wallace. The mill on Big Creek which was formerly owned by the Big Creek Mining Co., Ltd., whose property was acquired under foreclosure proceedings by the Bunker Hill & Sullivan M. & C. Co., was entirely rebuilt to treat the ore from the Bunker Hill's Crescent mine. This mill is now known as the Crescent. The Cedar Creek Mining & Development Co., Ltd., constructed a new mill at its property in the Summit district. The design of this mill followed that of the Galena mill of the Callahan Zinc-Lead Co. and includes fine grinding with lead and zinc units.

CRESCENT MILL: BUNKER HILL & SULLIVAN M. & C. CO.

The largest and most important expenditures made in Shoshone County during the year in mine development and new exploration work were those of the Hercules Mining Co. and its allied companies, all of which are controlled by Jerome J. Day and Harry L. Day, at the following operating mining companies or mines: Tamarack & Custer Consolidated Mining Co.; Strattons Mines Co.; Ambergris Mines Co.; Sherman Lead Co.; the Maher-Hearn group; Honolulu Mining Co.; Humming Bird Mining Co., and Roanoke Min-

ing Co. All of these mines are in favorable locations, and, as the work is being actively and intelligently directed, there are excellent possibilities for some of them to become important producers.

Working conditions throughout the Coeur d'Alene district are exceptionally favorable. All the mines are well ventilated, and the operators devote much time and thought to making the mines safe and keeping them in such condition that the men can do a full day's work without expending the energy that is necessary in poorly ventilated mines. Both attention and money have been devoted to this phase of the operations, and it can safely be said that these are the best ventilated mines in the country. Serious attention is given not only to ventilation, but to safety, recreation, and general welfare. The value of the welfare work to company employees and to the communities has been demonstrated through the Morning Club, erected at Mullan by the Federal M. & S. Co.; the Y. M. C. A. Building at Kellogg, donated by the Bunker Hill & Sullivan M. & C. Co.; and the Hercules Hall at Burke, erected by the Hercules Mining Co. Another outstanding contribution to this work is the base-ball field—located a short distance above the town of Burke and named Hearn Field in honor of W. F. Hearn of that town—which the Hecla Mining Co. constructed and donated to the community during the year. The building of the field involved engineering and construction difficulties, as level land in this vicinity is unknown; it was done in the interests of inter-mine base-ball teams, which are sponsored by all the large mines and between which there is keen rivalry.

Favorable working conditions attract first-class workmen to the district who remain permanently, with the result that the labor turnover is always at a low point. The wage scale is the highest of any mining camp in the United States, averaging from $1.00 to $1.50 a day above any other district. The scale is based on the price of lead, so that when this metal is selling at a high price, the workmen benefit, as well as the mining companies. As all the operators have adopted the sliding scale, there is no hesitation in granting an increase in wages with the increase in the price of lead; and it follows that there are no labor controversies or agitation. This high wage scale is also reflected in the general prosperity of the county, which during 1927 was not exceeded by any other county or district in the State.

The outstanding new developments, construction and enterprises can best be reviewed through an outline by companies.

The extensive development work which was done during 1927 in the Bunker Hill mine greatly increased its resources. The completion of the shaft to the 1900-foot level and the opening of the ore bodies at that depth, where the ore and geological conditions were found to be normal, added much to the life of the mine which is estimated in decades instead of in years. The Bunker Hill & Sullivan Mining & Concentrating Co., because of the magnitude of the Bunker Hill mine, has become more of a manufacturing than a mining operation, and with its smelter, mills, experimental plants, and organization, is one of the largest of its kind in the world. Its stock was listed on the New York Curb Exchange during the latter part of 1926; in January, 1927, this stock sold at a low of $67.50 per share and in September it had risen to a high of $156.00 per share. This company maintained its usual production record throughout the year, and the many plant betterments which were added greatly increased the efficiency of the enterprise. The principal betterments were the remodeling of the Sweeny mill, and enlargements and improvements at the smelter and the surface plant of the mine. The Tainton electro-chemical experimental lead-leaching plant was modified and improved, and many details perfected which add greatly to the importance of the process. In addition to extensive development work in the Bunker Hill mine, this company was actively engaged in prospecting and developing other properties throughout the Coeur d'Alene district, in Valley County, and in Nevada, Alaska, and Canada. At one of these, the Crescent in Shoshone County, the old mill of the Big Creek Mining Co. was acquired and rebuilt for the purpose of milling the ore from this mine.

The Hecla Mining Co., which is recognized as one of the principal lead-silver producing companies of the United States, greatly increased its ore reserves and resources in the Hecla mine. The vein was further explored on the 2800-foot level and work was started in sinking the main shaft to this level. The mine and mill plants were enlarged and improved, and the mine maintained in first-class condition. At the old Tiger-Poorman mine, which was purchased in 1920, machinery and equipment were installed and work started on unwatering it to the 600-foot level. In furtherance of a policy adopted a few years ago to expand its operations, this company developed three properties in the southern part of the State throughout a large part of the year, and an active search for others worthy of development was carried on in Idaho, Nevada, Washington, and Canada.

The Morning mine of the Federal Mining & Smelting Co., which is one of the oldest in the Coeur d'Alene district in point of continuous production, as well as one of the largest lead-silver-zinc mines in the United States, was maintained at capacity production throughout the year. The number of years that this record will continue is unknown, as development work on the 2850 and 3050-foot levels has proved the ore bodies to be larger and more extensive than on any of the upper levels. During the year the 2850-foot level was opened to the full length of the ore, a contract was let for sinking the shaft from the 3050 to the 3450-foot level, and mine and mill plants were greatly enlarged and improved. The change in the milling methods from jigs and tables to fine grinding and flotation resulted in a reduction of milling costs and an increase in recoveries. In addition to the ore mined under company operations, a large tonnage was extracted from the upper levels by a number of lessees; the most important of these is the Sheridan Lease, which employs over 100 men.

The Page mine of the Federal Mining & Smelting Co., in Government Gulch near Kellogg, was reopened in 1926, equipped with mine and milling plants and placed on a producing basis. It was operated throughout 1927 on a profitable production basis. The plants were improved, mine camp was enlarged, the shaft extended 300 feet from the 600 to the 900-foot level, and the ore bodies were opened to a greater extent on the intermediate levels. The success of this operation can be accredited entirely to flotation, because with the old milling methods it was impossible to mine and mill such low-grade ore at a profit. The average metal content of the ore mined during the year was: Lead, 6.93 per cent; zinc, 2.78 per cent; silver, 2.17 ounces.

The Sullivan Mining Co. suspended production at its Star mine, pending completion of its new electrolytic zinc plant at Kellogg, and devoted all its energies to this construction and to underground development work. The 4000-foot level of the Star mine is connected with the 2000-foot level of the Hecla mine by the Star crosscut, which is 8900 feet long. This crosscut made a blind connection with the Star vein at a point 2800 feet below the Star tunnel, and a vertical operating raise is now being driven to connect crosscut and tunnel. During the year this raise was advanced 1500 feet and a connection made with the 800-foot or No. 6 tunnel level of the Morning mine. Also the Hecla mining plant was enlarged to accommodate Star ore. It was expected that the zinc plant would be completed and production resumed in April, 1928.

The Tamarack & Custer Consolidated Mining Co., which is recognized as one of the substantial producing mines of the Coeur d'Alene district, maintained a steady output and an extensive mine development campaign throughout the year. During the early part of the year, the development work resulted in opening up a large, previously unknown ore body on the No. 4 shaft level which was later opened on adjacent levels. The extent and grade of this new ore, as opened up at the close of the year, indicated that many years had been added to the life of the mine.

At the Galena mine of the Callahan Zinc-Lead Co., which was placed on a profitable operating basis late in 1926, capacity output, together with an extensive development campaign, was maintained throughout the year. The new work increased the ore reserves, and late in the year arrangements were

completed for opening the mine to an additional depth of 800 feet, from the 1400-foot level to the 2200-foot level. New sinking equipment was installed on the 1400-foot level, and at the close of the year the shaft had been extended to the 1600-foot level. As this mine is located in the so-called "dry belt," or south side of the district, the success it is attaining has been an important factor in stimulating development throughout this area.

The addition of the Sunshine Mining Co. to the list of dividend-paying mines of Shoshone County was one of the most important events of the year, particularly because this company's mine is also situated in the south side of the district. The mine plant and mill were enlarged and improved; a 250-foot inclined winze was sunk from the 500-foot level in the mine, and new hoisting machinery installed for conducting operations through it, also a large amount of lateral development on various levels was performed, which new work greatly increased the ore reserves.

The Sidney, operated by the Sidney Leasing Co., was the second addition to the list of dividend payers during 1927. The fact that this mine, located on Pine Creek, is being operated at a substantial profit with metals at a low price is significant in proving that this section of the Coeur d'Alene district is not without merit, and opinions as to its possbilties are changing. Much credit is due the Bunker Hill & Sullivan M. & C. Co. for the success of this enterprise in having financed the construction of its aerial tramway and given assistance to its operation. In addition to maintaining a constant output throughout the year, the Sidney Leasing Co. sank a 200-foot shaft from No. 6 tunnel, installed a new hoist, performed a large amount of lateral development work, and enlarged the mine camp.

One of the large and active development campaigns conducted during the year and including mine improvements and additions to mine plants was that of the Strattons Mines Co. at the Stratton and Panhandle mines, which also produced and marketed a substantial tonnage of ore. In December this company obtained from the Option Mining Co. a lease on the Ohio claim, and arrangements were completed for developing it from the 200-foot level in the Stratton shaft.

The Gold Hunter Mines, Inc., at Mullan, one of the oldest mines in Shoshone County in point of continuous production, maintained capacity output and an extensive development campaign during the year. The principal new work was in sinking the winze in the 1200-foot level from the 1400 to the 1600-foot level, and drifting on the 1500 and 1600-foot levels, which resulted in exposing new ore at these depths. By proving the continuation of its ore at depth, this company greatly increased its resources and future life.

In August the Jack Waite Mining Co., Ltd., purchased the lease and assets of the Jack Waite Leasing Co., consisting of a 150-ton mill, camp buildings, mine plant, power lines, and railroad, and assumed operation of the mine. New ore bins, a tramway and a sorting plant were installed, and the sinking of a winze on the ore in the lower tunnel was commenced. This enterprise is the largest producer in the north side, or Murray section, of the Coeur d'Alene district.

The Constitution Mining & Milling Co., whose mine is on Pine Creek, modified and enlarged its mill by adding new machinery and changing it to a straight flotation plant. The company also performed a large amount of development work, part of which consisted in sinking a new shaft 240 feet deep on the 200-foot level, and produced and marketed a large tonnage of concentrates during the year. The development work increased the known ore reserves, and the production maintained the company's record as one of the important mines of the district.

Production at the Douglas mine on Pine Creek, near the Constitution, was maintained until May, after which the Douglas Mining Co. assumed charge and conducted an intensive development campaign throughout the remainder of the year. This work resulted in greatly increasing the ore reserves, and was made possible through the purchase of the company's treasury stock by the Bunker Hill & Sullivan M. & C. Co.

AEROPLANE VIEW OF BUNKER HILL & SULLIVAN M & C. CO.'S MILLS AND MINE BUILDINGS

The Dickens Consolidated Mines Co., whose property is on Moon Creek, conducted an active development campaign throughout the year. A large hoist was purchased and installed; the shaft was sunk from the 400 to the 500-foot level, and a large amount of crosscutting and drifting was performed on each of these levels. The success with which this company is meeting was responsible for stimulating much new development work to this part of the Coeur d'Alene district.

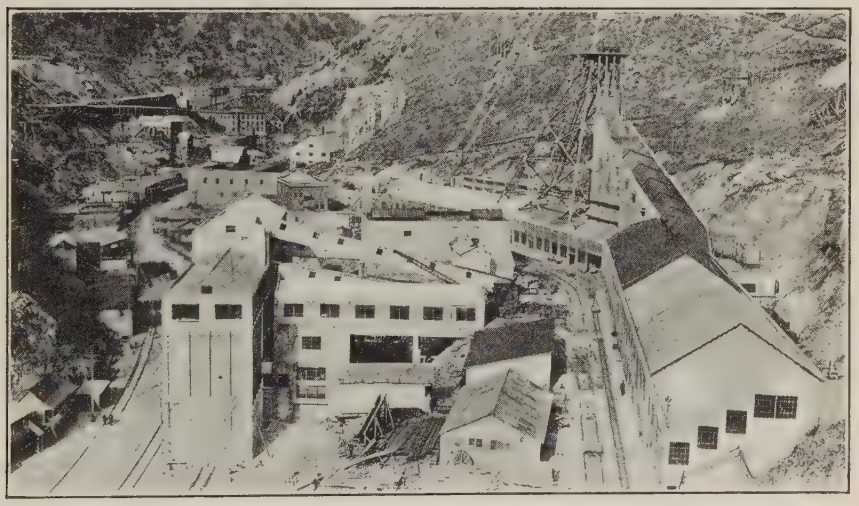
One of the largest and most important new development enterprises to be conducted during the year was that of the Sherman Lead Co. Its mine was connected with No. 5 tunnel of the Hercules mine through the Humming Bird workings, a large electrically-driven hoist installed, a 1000-foot raise driven on the vein, and connections made with all of the old workings. Press reports at the end of the year were to the effect that the mine was being placed in condition for stoping ore, which would be taken to the Hercules Mining Co.'s mill at Wallace for reduction.

The largest development campaign conducted on Pine Creek during the year was by the Lookout Mountain Mining & Milling Co. This company extended its lower crosscut, No. 3 tunnel, from a length of 500 feet to 1800 feet, where it intersected the vein at a depth of 500 feet below No. 2 tunnel, after which drifting on the vein was started in both directions.

Operations by the Alameda Mining Co., whose property adjoins the Success mine on Nine Mile Creek, were resumed during the year, after a long period of idleness. More than 600 feet of drifts and crosscuts were driven, which resulted in the exposure of a large amount of new ore at a distance of about 2000 feet from the portal of the lower tunnel.

In 1926 N. C. Sheridan and associates, of Wallace, obtained a lease and option on the property owned by the Hector Mining Co., Ltd., and an operating right-of-way through the 4000-foot tunnel of the Mayflower Mining & Developing Co., Ltd., that had previously been driven about 1000 feet into the Hector ground. This tunnel was repaired and reopened and drifting on the vein started. In January, 1927, the undertaking was incorporated as Golconda Lead Mines. The drift was continued for about 500 feet and a large tonnage of high-grade mill ore was exposed. Stopes were then started and carried up about 40 feet, the ore being shipped to the local mills for treatment. In order to open sufficient ore to justify the erection of a mill, stoping was discontinued; a 200-foot raise and a 200-foot shaft were started. Before the beginning of this work, a 750-cubic-foot Sullivan electrically-driven compressor, a power line and transformers, electrical storage-battery haulage, two air-driven hoists, complete mining equipment, and mine buildings were installed and erected. Work on the raise and shaft was prosecuted to completion, and at the close of the year the vein was proved to a sufficient extent to warrant the construction of a mill.

One of the principal new mills constructed during the year was the 100-ton flotation concentrator of the Cedar Creek Mining & Development Co., Ltd., at its property in the north side, or Murray section. The mill building was erected and machinery and equipment were installed, but freezing weather had set in before completion, so operations were deferred until early in 1928. In addition to the mill, the company erected new boarding and bunk houses, installed additional mining machinery, and placed the mine in condition for stoping operations.



The Highland-Surprise Consolidated Mining Co. opened its mine to a greater depth, remodeled its mill, and marketed a large tonnage of concentrates during the early part of the year, after which operations were suspended pending completion of the Sullivan electrolytic zinc plant. The operations of this company added materially to the activities of the Pine Creek section.

The United Metals Co. maintained an extensive exploration campaign until October, principally on the Black Bear and Bell groups. This company is holding and developing the mines owned by the Bell Mining Co., the Black Bear Mines Co., the Goodenough Mining Co., and the Western Pacific Mining Co., all of which are located on Canyon Creek near the Frisco mine of the Federal Mining & Smelting Co.

The Lincoln Mining Co., which owns the old Silverado mine about midway between the Sunshine and Galena mines, maintained active development work for a period of six months.

The Atlas Mining Co., which is a consolidation of the Idaho-Carbonate Hill Consolidated Mining Co., the Idaho Giant Mining Co., and the Boulder Creek Mining & Milling Co., Ltd., maintained active work until April, at which time its long tunnel had been advanced to a total length of 7030 feet.

Companies which installed new equipment and conducted development work during all or part of the year were as follows: Evolution Mining Co., at the Evolution mine near Osburn, electrically-driven compressor, hoist, new buildings, and work started; Little Sunshine Mining Co., at the Palmer group on Big Creek, electrically-driven compressor and complete mining equipment installed, and contract let for driving a 2000-foot exploratory crosscut; Wolverine Mining Co., Ltd., electrically-driven compressor and air hoist installed and drifting done at bottom of 200-foot shaft; Bismarck Mining Co., small gas-driven compressor and complete mining equipment installed and work started on a 1200-foot tunnel, of which 700 feet had been driven at the close of the year; Mutual Mines Development Co., power line, transformers, electrically-driven compressor, steel sharpener and complete equipment installed and active development work performed throughout the year.

HECLA MINING CO.'S MINE BUILDINGS AND TOWN OF BURKE

Companies which employed more than six men and which conducted development work throughout the year were as follows: Hypotheek Mining & Milling Co., which unwatered its shaft from the 900 to the 1100-foot level, performed a large amount of drifting on the 1100-foot level, and started a raise on the vein to the 900-foot level, also producing and shipping a substantial tonnage of crude ore and concentrate; Ajax Mining Co., which sank a 200-foot shaft at the bottom of which over 1000 feet of drifts on the vein were run (press reports were to the effect that the drifts encountered some good milling ore); Delaware Mines Corporation, which conducted development work and reopened old entries, a small tonnage of ore being produced by lessees; Independence Lead Mines, Ltd., which developed its property on the lowest, or No. 4, level.

AETNA MINES CORPORATION

Office: Empire State Bldg., Spokane, Wash. **Officers:** Peter Reid, Pres.; Geo. H. Walters, Sec., both of Spokane, Wash. **Inc.:** Apr. 22, 1927. **Capital:** 1,000,000 shares; par value 25c; 900,000 shares issued. **Property:** Lucky Stone group; 2 patented, 22 unpatented claims, Evolution dist.; Wallace. **Development:** By numerous crosscuts and tunnels, the longest of which is No. 4 tunnel, 1000 ft. in length. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** Annual labor only. This company is a reorganization of the Lucky Stone Mining Co. Stock assessments were levied during the year as follows: March 1, 3 mills; June 6, 3 mills; August 5, 3 mills; October 10, 3 mills.

AETNA MINING & MILLING CO., LTD.

Office: Wallace. **Officers:** P. J. Maggy, Pres.; W. A. Devan, Sec., both of Wallace. **Inc.:** March 9, 1915. **Capital:** 1,500,000 shares; par value 10c; all shares issued. **Property:** 4 unpatented claims, Lelande dist.; Burke. **Development:** By 2 tunnels: No. 1, 250 ft. long; No. 2, 762 ft. long. **Remarks:** Annual labor only. A stock assessment of 1 mill levied on June 8.

AJAX MINING CO.

Office: 714 W. 14th Ave., Spokane. **Officers:** F. Moriarity, Pres.; J. A. Havighorst, Sec., both of Spokane, Wash.; A. G. Anderson, Mgr., Burke. **Inc.:** Oct. 20, 1902. **Capital:** The capital stock was increased to 2,000,000 shares on July 6, 1925; par value $1; 1,613,022 shares issued. **Property:** 15 patented claims, Lelande dist.; Burke. **Development:** Principally by 3 tunnels and 3 shafts. Total development approximately 20,000 ft. Main or No. 7 tunnel is located in Gorge Gulch a short distance above the town of Burke. This tunnel intersects the Ajax vein at a distance of 6000 ft., at which point is a 200 ft. vertical shaft with 1000 ft. of drifting at the bottom. **Plant:** MINE: Type-10 I-R 550 cu. ft. electrically-driven air compressor; I-R No. 50 steel sharpener; Hoar shovel. **Ore:** Lead-silver. **Men employed:** Average, 13. **Remarks:** During the year the 200-ft. shaft in No. 7 tunnel was driven and 1000 ft. of drifting was run on the vein in both directions. Press reports were to the effect that this work encountered some good milling ore. Stock assessments were levied during 1927 as follows: March 29, 1c; July 12, 1c; November 9, 1c.

ALAMEDA MINING CO.

Office: Wallace. **Officers:** O. W. Lewis, Pres.; James A. Wayne, Sec.-Mgr., both of Wallace. **Inc.:** Feb. 14, 1910. **Capital:** 1,500,000 shares; par value $1; all shares issued. **Property:** Alameda group; 4 patented, 4 unpatented claims, Lelande dist.; Wallace. **Development:** By 2 tunnels: No. 1, 500 ft. long; No. 2, 3200 ft. long. **Plant:** Electrically-driven I-R compressor and complete mining equipment. **Ore:** Lead-zinc-silver. **Men employed:** Average, 5. **Remarks:** This company's property adjoins the famous old Success mine on Nine Mile Creek and has been idle for a long period of years. During 1927 the mine plant was rehabilitated and work started at a distance of about 2000 ft. from the portal of No. 2 tunnel, at which point press reports stated that an excellent body of ore was disclosed. Stock assessments were levied during the year as follows: May 14, 5 mills; October 14, 5 mills.

ALHAMBRA MINING CO., LTD.

Office: 504 Empire State Bldg., Spokane, Wash. **Officers:** W. J. C. Wakefield, Pres., Peyton Bldg., Spokane, Wash.; William A. Corey, Sec., Spokane, Wash. **Inc.:** Dec. 26, 1898. **Capital:** 1,000,000 shares; par value $1; 987,399 shares issued. **Property:** Alhambra group; 23 patented claims, Yreka dist.; Kellogg. **Development:** Approximately 13,200 ft. **Ore:** Lead-silver. **Plant:** MINE: 12x12 Laidlaw-Dunn Gordon electrically-driven compressor, complete mining equipment. **Remarks:** Property operated under lease by the Bunker Hill & Sullivan M. & C. Co. The 75-ton flotation concentrator which was on this property was destroyed by fire early in the year. The lessee then rebuilt the mill formerly owned by the Big Creek Mining Co., Ltd., now known as the Crescent mill, for the treatment of ore from the Alhambra and Crescent mines.

ALICE MINING CO.
Office: Wallace. **Officers:** James F. McCarthy, Pres.; Leo J. Hoban, Sec., both of Wallace. **Inc.:** July 30, 1902. **Capital:** 1,000,000 shares; par value $1; all shares issued. **Property:** 21 patented, 2 unpatented claims, Hunter dist.; 3½ miles east of Wallace. **Development:** 10,000 ft. of underground workings. **Plant:** MINE: Complete mine camp and buildings. MILL: Partly dismantled 125-ton concentrator. **Ore:** Lead-silver. **Remarks:** Idle.

ALMA RAY MINING CO.
Office: Kellogg. **Officers:** Elmer E. Brown, Pres.-Mgr.; C. B. Forbes, Sec., both of Kellogg. **Inc.:** April 21, 1917. **Capital:** 1,500,000 shares; par value 25c; 350,000 shares issued. **Property:** Alma Ray group, 5 unpatented claims, Yreka dist.; Kellogg. **Development:** Principally by 2 tunnels: No. 1, 300 ft. long; No. 2, 480 ft. long. **Ore:** Lead-silver, copper. **Men employed:** Average, 2. **Remarks:** Small amount of work by contract during the year. A stock assessment of 1½ mills was levied on Apr. 25, 1927.

ALPENA COPPER MINING CO., LTD.
Office: Wallace. **Officers:** C. W. Beale, Pres.; A. H. Featherstone, Sec.; J. C. Purcell, Mgr., all of Wallace. **Inc.:** Aug. 9, 1900. **Capital:** 1,000,000 shares; par value 10c; all shares issued. **Property:** Alpena group; 6 unpatented claims, St. Joe dist.; Adair. **Ore:** Copper-gold. **Remarks:** Annual labor only.

AMAZON MANHATTAN MINING CO.
Office: Wallace. **Officers:** P. J. Maggy, Clerk, Wallace. **Inc.:** A partnership. **Property:** Amazon Manhattan group; 9 patented claims, Beaver dist.; Carbonite. **Development:** By 3 tunnels: No. 1, 510 ft.; No. 2, 1180 ft.; No. 3, 3856 ft. **Ore:** Lead-zinc-silver. **Remarks:** Idle.

AMBERGRIS MINES CO.
Office: Wallace. **Officers:** Harry L. Day, Pres.; W. B. Heitfeld, Sec., both of Wallace. **Inc.:** June 16, 1916. **Capital:** 1,000,000 shares; par value $1; 978,452 shares issued. **Property:** Ambergris group; 8 patented claims, Lelande & Placer Center dists.; Burke. **Development:** Mine opened and operated through No. 5 Hercules tunnel, in addition to which there are 3 intermediate tunnels and 3 shafts; total development, approximately 13,000 ft. **Ore:** Lead-silver. **Men employed:** Average, 12. **Remarks:** During the early part of the year a substantial tonnage of ore was mined, which was treated and milled at the Hercules mill at Wallace. Operations were suspended in March and all equipment was removed from the property.

AMERICAN-COMMANDER MINING & MILLING CO., LTD.
Office: Wallace. **Officers:** J. A. Glowe, Pres., Mullan; Herman Marquardt, Sec., Wallace. **Inc.:** Oct. 24, 1901. **Capital:** 2,000,000 shares; par value $1; 1,553,988 shares issued. **Property:** American-Commander group; 2 patented claims, Hunter dist.; Mullan. **Development:** By 4 tunnels: No. 1, 190 ft. long; No. 2, 1160 ft. long; No. 3, 1300 ft. long; No. 4, 2500 ft. long. **Plant:** Electrically-driven 9x12 Sullivan compressor; complete mining equipment. **Ore:** Lead-silver. **Men employed:** Average, 6. **Remarks:** Active development work in No. 2 tunnel was maintained for a period of 6 months.

AMERICAN LEAD MINES, LTD.
Office: 323 Lindelle Block, Spokane. **Officers:** R. L. Brainard, Pres., Kellogg; Matt Baumgartner, Sec.-Mgr., Spokane. **Inc.:** Feb. 2, 1925. **Capital:** 1,000,000 shares; par value 10c; 685,500 shares issued. **Property:** Crescent group; 10 unpatented claims on the West Fork of Big Creek, Yreka dist.; Kellogg. **Development:** By 1 tunnel 475 ft. long. **Ore:** Lead-silver. **Men employed:** Average, 1. **Remarks:** Small amount of work. Stock assessments were levied during the year as follows: May 24, 4 mills; July 23, 4 mills; Sept. 19, 4 mills; Nov. 12, 4 mills.

AMERICAN MINING CO., LTD.
Office: Wallace. **Officers:** T. Sheppard, Pres.; W. E. Stache, Sec., both of Wallace. **Inc.:** Nov. 1, 1899. **Capital:** 1,000,000 shares; par value 10c; 405,625 shares issued. **Property:** American group; 2 unpatented claims, Placer Center dist.; Wallace. **Development:** 3 tunnels: No. 1, 65 ft. long; No. 2, 80 ft. long; No. 3, 300 ft. long. **Ore:** Lead-silver. **Remarks:** Annual labor only. A stock assessment of 2 mills was levied on March 7, 1927.

AMY MATCHLESS MINING & MILLING CO.
Office: Mankato, Minn. **Officers:** George Weidenman, Pres.; W. A. Beach, Sec., both of Mankato, Minn.; J. G. Schrodt, Mgr., Kellogg. **Inc.:** Nov. 24, 1913. **Capital:** 1,250.000 shares; par value $1; 819,909 shares issued. **Property:** Amy group; 5 patented, 18 unpatented claims, Yreka dist.; Pine Creek, Kellogg. **Development:** Principally by an inclined shaft, 200 ft. deep. Total development, approximately 8500 ft. **Plant:** MINE: Hoist and 2 compressors, both electrically driven; sawmill and camp. MILL: 75-ton concentrator, consisting of jigs, tables, and flotation. **Ore:** Lead-silver-zinc. **Men employed:** Average, 6. **Remarks:** The shaft was unwatered, and drifting on the 200-ft. level was maintained for a period of 9 months. A stock assessment of 5 mills was levied on Nov. 29, 1927.

ANCHOR MINING CO.
Office: 863 Sherwood Bldg., Spokane, Wash. **Officers:** H. S. Stoolfire, Pres.; J. L. Prickett, Sec., both of Spokane, Wash. **Inc.:** Nov. 18, 1897. **Capital:** 1,500,000 shares; par value $1; all shares issued. **Property:** Anchor group; 8 patented claims, Lelande dist.; Burke. **Development:** Principally by one tunnel 6000 ft. long and one vertical shaft 210 ft. deep. **Plant:** 20-h. p. hoist and 3-drill I-R compressor, both electrically driven. **Ore:** Lead-silver. **Remarks:** Property under option to Hecla Extension Mining Co.

ARCTIC MINING & MILLING CO., LTD.
Office: Kellogg. **Officers:** Henry Lalonde, Pres., Wallace; Geo. H. Heller, Sec., Kellogg. **Inc.:** July 5, 1907. **Capital:** 1,500,000 shares; par value $1; 980,280 shares issued. **Property:** Arctic group; 5 unpatented claims, Placer Center dist.; Wallace. **Development:** By 1 tunnel 865 ft. long. **Ore:** Lead-silver. **Remarks:** Annual labor only.

ARGENTA MINING CO., LTD.
Office: Wallace. **Officers:** W. C. Richardson, Pres.-Mgr., Mullan; C. D. Brock, Sec., Wallace. **Inc.:** Dec. 10, 1906. **Capital:** 1,500,000 shares; par value $1; 1,108,000 shares issued. **Property:** Argenta group; 3 patented claims, Hunter dist.; Mullan. **Development:** 2 tunnels: No. 1, 900 ft. long; No. 2, 250 ft. long. **Ore:** Lead-silver. **Remarks:** Idle throughout the year.

ATLANTIC MINING CO.
Office: Wallace. **Officers:** Herman J. Rossi, Pres.; Otto A. Olsson, Sec.-Mgr., both of Wallace. **Inc.:** June 11, 1897. **Capital:** 1,000,000 shares; par value $1; all shares issued. **Property:** Atlantic group; 7 unpatented claims, Beaver dist.; Prichard. **Development:** Principally by 1 tunnel 340 ft. long. **Ore:** Lead-silver. **Remarks:** Annual labor only.

ATLAS MINING CO.
Office: Mullan. **Officers:** Thomas F. Keeley, Pres.; Patrick J. Lawler, Sec., both of 516 E. 28th St., Chicago; W. Earl Greenough, Mgr., Mullan. **Inc.:** March 4, 1924. **Capital:** 2,000,000 shares; par value $1; all shares issued. **Property:** Atlas group; 19 patented, 19 unpatented claims, Hunter dist.; Mullan. **Development:** 7 tunnels and 2 inclined shafts, the principal of which is the Horseshoe tunnel 7030 ft. long. **Plant:** Electrically-driven compressor, and complete mining equipment. **Ore:** Lead-silver. **Men employed:** Average, 15. **Remarks:** The property of the Atlas Mining Co. is a consolidation of three properties, the Carbonate Hill, Idaho Giant, and Boulder Creek, on which has been done approximately 10,500 ft. of tunneling, drifting, crosscutting, and sinking. The Horseshoe tunnel was advanced to a length of 7030 ft. when operations were suspended in April.

AULBACH GROUP

Owner: Adam Aulbach, Murray. **Property:** Aulbach and Buckeye Boy groups; 10 patented claims, Coeur d'Alene dist.; Murray. **Development:** Approximately 4000 ft. of work on both groups. **Ore:** Lead-silver and gold. **Remarks:** These properties comprise two of the oldest locations in the Coeur d'Alene district and have been held almost continuously by the present owner.

BASIN MINING CO.

Office: Wallace. **Officers:** Jerome J. Day, Pres.; P. J. Maggy, Sec., both of Wallace. **Inc.:** June 22, 1915. **Capital:** 1,500,000 shares; par value 5c; 1,000,000 shares issued. **Property:** Basin group; 5 patented claims, Lelande dist.; Burke.

BEAR PLACER MINING CO.

Office: 608 Empire State Bldg., Spokane, Wash. **Officers:** F. R. Clark, Pres.; G. M. Johnson, Sec., both of Spokane. **Inc.:** Aug. 5, 1924. **Capital:** 10,000 shares; par value $10; 5085 shares issued. **Property:** Bear Placer group: 2 unpatented placer claims, unorganized dist.; on St. Joe River; Superior, Mont. **Ore:** Placer gold. **Men employed:** Average, 3. **Remarks:** Small amount of hydraulic equipment was installed and development work performed during a period of 3 months.

BELL MINING CO.

Office: 504 Empire State Bldg., Spokane, Wash. **Officers:** Robert C. Moffitt, Pres., Seattle; Charles Hussey, Sec., Spokane, Wash. **Inc.:** Oct. 17, 1898. **Capital:** 500,000 shares; par value 25c; 495,500 shares issued. **Property:** 9 patented claims, Lelande dist.; Wallace. **Remarks:** Under development by the United Metals Co.

BELL OF THE WEST MINING CO.

Office: Wallace. **Officers:** George R. Trask, Pres.-Mgr.; M. E. Trask, Sec., both of Wallace. **Inc.:** Oct. 23, 1899. **Capital:** 1,500,000 shares; par value 5c; all shares issued. **Property:** Bell of the West group; 2 patented, 2 unpatented claims, Placer Center dist.; Wallace. **Development:** 2 tunnels: No. 1, 250 ft. long; No. 2, 1000 ft. long with 300 ft. of crosscuts. **Ore:** Lead-silver. **Remarks:** Annual labor only.

BELMONT MINING CO., LTD.

Office: Wallace. **Officers:** M. E. Hess, Vice-Pres.; Frank P. Hess, Sec., both of Wallace. **Inc.:** March 26, 1900. **Capital:** 1,000,000 shares; par value $1; 275,700 shares issued. **Property:** Belmont group; 10 unpatented claims, Evolution dist.; Osburn. **Development:** Principally by 1 tunnel 900 ft. long. **Ore:** Lead-silver. **Remarks:** Annual labor performed under contract. A stock assessment of 4 mills was levied on June 4, 1927.

BENTON MINING CO., LTD.

Office: Wallace. **Officers:** Mary Callahan, Pres., Spokane, Wash.; E. G. Gnaedinger, Sec.-Mgr., Wallace. **Inc.:** Feb. 14, 1903. **Capital:** 1,500,000 shares; par value $1; 1,230,000 shares issued. **Property:** Benton group; 5 patented claims, Lelande dist.; Burke. **Development:** By 6 tunnels, the principal one of which is 2500 ft. long, and one vertical shaft 200 ft. deep.

BIG DIVIDE MINING CO., LTD.

Office: Fresno, Calif. **Officers:** Frank P. Markwell, Pres., Tujunga, Calif.; J. F. Markwell, Sec., Fresno, Calif. **Inc.:** Aug. 23, 1904. **Capital:** 1,500,000 shares; par value $1; all shares issued. **Property:** Big Divide group; 10 patented, 5 unpatented claims, Lelande dist.; Wallace. **Plant:** Large air compressor driven by 150-h. p. electric motor. **Ore:** Lead-silver. **Remarks:** Small amount of work by lessees.

BIG ELK MINING CO., LTD.

Office: Wallace. **Officers:** Peter Peterson, Pres.-Mgr., Saltese, Mont.; A. H. Featherstone, Sec., Wallace. **Inc.:** April 26, 1909. **Capital:** 2,000,000 shares; par value $1; all shares issued. **Property:** Big Elk group; 17 unpatented claims, St. Joe dist.; Delage. **Ore:** Copper-gold. **Remarks:** Annual labor only.

BIG IT MINING & MILLING CO.

Office: Kellogg. **Officers:** H. S. Davenport, Pres.; L. G. Stuntebeck, Sec., both of Enaville; M. L. Pratt, Mgr., Kellogg. **Inc.:** Dec. 5, 1916. Charter forfeited Dec. 1, 1920. **Capital:** 1,500,000 shares; par value 10c; 1,015,000 shares issued. **Property:** Big It group; 13 unpatented claims, Yreka dist.; Masonia. **Development:** By 2 tunnels: No. 1, 270 ft.; No. 2, 850 ft. **Ore:** Lead-zinc-silver. **Remarks:** Annual labor only.

BISMARCK MINING CO.

Office: Wallace. **Officers:** E. V. Lange, Pres., Amsterdam, Holland; W. H. Herrick, Mgr., Wallace. **Inc.:** Jan. 18, 1924. **Capital:** 1,250,000 shares; par value 10c; 600,000 shares issued. **Property:** Bismarck group; 3 unpatented claims, Big Creek, Yreka dist.; Kellogg. **Development:** By 1 tunnel 300 ft. long. **Plant:** Gas-driven compressor; complete mining equipment. **Ore:** Lead-silver. **Men employed:** Average, 6. **Remarks:** Bunk house constructed, equipment installed, and work started on a 1200-ft. tunnel, of which 700 ft. was driven during the year.

BITTER ROOT MOUNTAIN MINING CO.

Office: 939 S. Cowley St., Spokane, Wash. **Officers:** W. P. Flood, Pres.; Mrs. F. A. Noteware, Sec., both of Spokane, Wash. **Inc.:** May 6, 1901. **Capital:** 1,500,000 shares; par value 5c; all shares issued. **Property:** Lookout group; 3 patented claims, Hunter dist.; Mullan. **Development:** Principally by 1 tunnel 1000 ft. long. **Ore:** Lead-silver. **Remarks:** Inactive since 1900.

BLACK BEAR MINES CO.

Office: Wallace. **Officers:** C. A. Hagan, Pres., Moscow; H. J. Arnett, Sec., Wallace. **Inc.:** Feb. 24, 1917. **Capital:** 2,000,000 shares; par value 20c; 1,379,583 shares issued. **Property:** Black Bear group; 5 patented, 2 unpatented claims, Lelande dist.; Wallace. **Development:** Principally by 1 tunnel 4100 ft. long. **Plant:** 750 cu. ft. electrically-driven compressor; complete mining equipment. **Ore:** Lead-zinc-silver. **Remarks:** Under option to the United Metals Co.

BLACK HAWK MINING & DEVELOPMENT CO., LTD.

Office: Wallace. **Officers:** Alfred Page, Pres., Spokane, Wash.; A. W. Hoover, Sec.; Frederick Burbidge, Mgr., both of Wallace. **Inc.:** Aug. 19, 1901. **Capital:** 1,500,000 shares; par value 10c; 1,332,352 shares issued. **Property:** Black Hawk group; 13 patented claims, Yreka dist.; Kellogg. **Development:** By 2 tunnels: Black Hawk, 2920 ft. long; Page, 2600 ft. long. **Ore:** Silver-lead-zinc. **Remarks:** Property under lease to the Federal M. & S. Co., which operated it throughout the year in conjunction with the Page mine, which see.

BLAINE & EMMETT MINING CO., LTD.

Office: Kellogg. **Officers:** Merrill Heblethwaite, Pres.-Mgr., Prichard; R. W. Skeman, Sec., Murray. **Inc.:** Dec. 20, 1909. **Capital:** 1,000,000 shares; par value $1; 480,812 shares issued. **Property:** Blaine & Emmett group; 5 unpatented claims, Eagle dist.; Prichard. **Development:** 2 tunnels: No. 1, 300 ft. long; No. 2, 650 ft. long. **Ore:** Lead-zinc-silver. **Remarks:** Annual labor only.

BLUE EAGLE MINING CO.

Office: Kellogg. **Officers:** Ed McCarty, Pres.; C. B. Forbes, Sec., both of Kellogg. **Inc.:** April 18, 1925. **Capital:** 1,500,000 shares; par value 1c; 1,250,000 shares issued. **Property:** Blue Eagle group; 15 unpatented claims, Pine Creek, Yreka dist.; Kellogg. **Development:** By 2 tunnels: No. 1, 185 ft. long; No. 2, 400 ft. long. **Plant:** Electrically-driven 8x9 I-R compressor; complete mining equipment. **Ore:** Lead-zinc-silver. **Men employed:** Average, 2. **Remarks:** Active work in lower tunnel throughout the year.

BLUE RIBBON MINING CO.

Office: 601 N. Monroe St., Spokane, Wash. **Officers:** A. Held, Pres.; Al Harris, Sec., both of Spokane, Wash. **Inc.:** Oct. 22, 1914. **Capital:** 1,500,000 shares; par value 10c; 300,000 shares issued. **Property:** Blue Ribbon group; 7 unpatented claims, Hunter and Lelande dists.; Burke. **Development:** Principally by 1 tunnel 2400 ft. long. **Men employed:** Average, 3. **Remarks:** Work in the tunnel maintained throughout the year. Funds were derived from stock assessments at the rate of 2 mills per share bimonthly.

BLUE STAR MINING & MILLING CO., LTD.

Office: Kingston. **Officers:** Peter Wuda, Pres., Kellogg; A. C. Morbeck, Sec., Kingston. **Inc.:** June 8, 1909. **Capital:** 1,000,000 shares; par value $1; 300,000 shares issued. **Property:** Blue Star group; 8 patented claims, Pine Creek, Yreka dist.; Kingston. **Ore:** Lead-silver. **Remarks:** Idle.

BLUE WING MINING CO., LTD.

Office: Wallace. **Officers:** Herman J. Rossi, Sec., Wallace. **Inc.:** July 8, 1901. **Capital:** 1,000,000 shares; par value 10c; 774,775 shares issued. **Property:** Blue Wing group; 5 unpatented claims, Placer Center dist.; Wallace. **Ore:** Lead-silver. **Remarks:** Annual labor only. A stock assessment of 5 mills was levied on May 5, 1927.

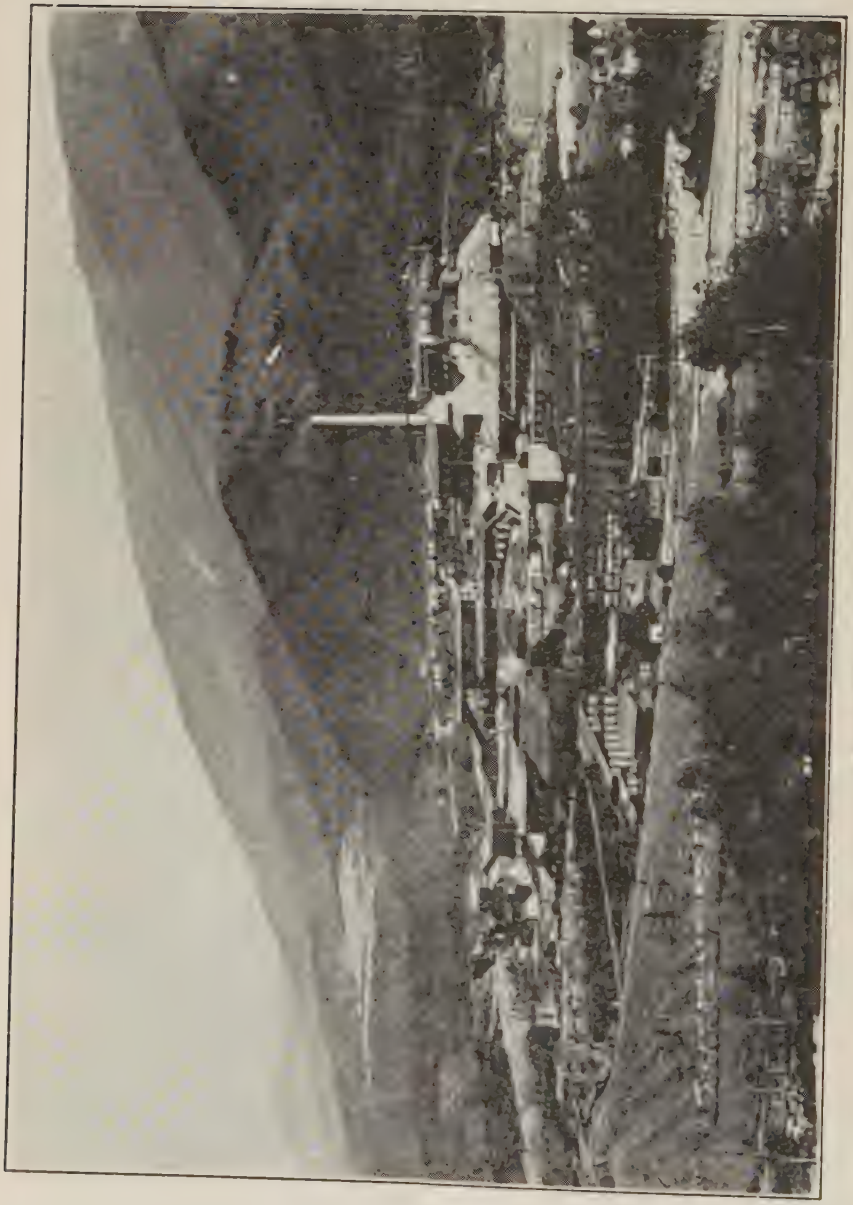
BOBBY ANDERSON GROUP MINING CO.

Office: Kellogg. **Officers:** Theo. Brown, Pres.-Mgr.; Harvey A. Miller, Sec., both of Kellogg. **Inc.:** June 16, 1906. **Capital:** 1,500,000 shares; par value $1; 775,833 shares issued. **Property:** Bobby Anderson group; 6 unpatented claims, Yreka dist.; Kellogg. **Development:** 3 tunnels and 1 shaft. **Ore:** Lead-zinc-silver. **Men employed:** Average, 2. **Remarks:** Property rehabilitated and a small amount of work during the year.

BONANZA MINES CORPORATION

Office: Wallace. **Officers:** W. Howard Moore, Pres., Burke; Therrett Towles, Sec., Wallace; Nicholas Fillpott, Mgr., Burke. **Inc.:** July 12, 1927. **Capital:** 1,500,000 shares; par value 25c; 500,000 shares issued. **Property:** Bonanza group; 10 unpatented claims, Eagle dist.; Prichard; held under lease and option. **Development:** By 3 tunnels: No. 1, 350 ft.; No. 2, 572 ft.; No. 3, 50 ft. **Plant:** Complete mining equipment, operated by compressed air from Jack Waite Mining Co., Ltd. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** Active development work throughout the year.

BUCKEYE MINING CO.



Office: 519 W. 5th Ave., Spokane. **Officers:** F. W. Julian, Pres.; John Ellwanger, Sec., both of Spokane. **Inc.:** October 14, 1924. Charter forfeited Nov. 30, 1927. **Capital:** 1,500,000 shares; par value 10c; 1,238,000 shares issued.

BULLION MINING CO., LTD.

Office: Wallace. **Officers:** William Squance, Pres.; James H. Taylor, Sec.-Mgr., both of Wallace. **Inc.:** Dec. 5, 1902. **Capital:** 1,500,000 shares; par value $1; all shares issued. **Property:** Bullion group; 16 patented, 1 unpatented claim, St. Joe dist.; Mullan. **Development:** 3 tunnels: No. 1, 500 ft. long; No. 2, 2000 ft. long; No. 3, 4800 ft. long; 1 vertical shaft 100 ft. deep. **Plant:** Pelton water wheel driving an I-R compressor. **Ore:** Copper-gold. **Men employed:** Average, 3. **Remarks:** Small amount of work during early part of the year.

BUNKER CHANCE MINING CO.

Office: Wardner. **Officers:** Nick Petrinovich, Pres.-Mgr.; R. L. Brainard, Sec., both of Wardner. **Inc.:** May 8, 1922. **Capital:** 1,500,000 shares; par value 25c; 1,325,000 shares issued. **Property:** Bunker Chance group; 1 patented, 6 unpatented claims, Yreka dist.; Wardner. **Development:** By 4 tunnels, the principal one of which is 2200 ft. long. **Plant:** Complete mining equipment; compressed air received from North Bunker Hill Mining Co., Ltd. **Ore:** Lead-silver. **Men employed:** Average, 3. **Remarks:** Active throughout the year in extending a crosscut from Butler tunnel.

BUNKER HILL SMELTER

BUNKER HILL & SULLIVAN MINING & CONCENTRATING CO.

Office: Kellogg. **Officers:** F. W. Bradley, Pres.; J. W. Crosby, Sec., both of 1022 Crocker Bldg., San Francisco, Calif.; Stanly A. Easton, Mgr., Kellogg. **Inc.:** Originally incorporated in Oregon and filed in Idaho, Aug. 20, 1903; changed to a Delaware corporation and filed in Idaho, April 16, 1924. **Capital:** 327,000 shares common; par value $10; 20,000 shares preferred; par value $100; all common shares issued. **Property:** Bunker Hill; 336 patented, 24 unpatented claims, Yreka dist.; Kellogg. **Development:** The principal adit is the Kellogg tunnel, which is 24,000 ft. long, in which are the two principal inclined shafts, one of which is known as the White Raise, and the other the main shaft, which is approximately 2785 ft. long, giving a vertical depth of 1900 ft. below the Kellogg tunnel level. In the main shaft are 13 intermediate levels. Total development, approximately 57 miles. **Plant:** MINE: Two electrically-driven hoists, two electrically-driven I-R compressors, one steam-driven Nordberg compressor. Trolley locomotive haulage in Kellogg tunnel; storage battery locomotive haulage in intermediate levels. Complete and modern machine shop, blacksmith shop and change house. MILL: Three complete and modern concentrators, including flotation. Daily capacity, approximately 2100 tons. **Ore:** Lead-silver. **Men employed:** In mine, mill and smelter, average, 1100.

BUNKER HILL SMELTER

Officers: Frank M. Smith, Director, 1117 Paulsen Bldg., Spokane, Wash.; M. H. Sullivan, Supt., Kellogg. **Remarks:** This smelter was erected during 1917, since which time it has been continually enlarged and improved and is now one of the most modern, complete and up-to-date plants in the United States. The smelting plant covers an area of about 30 acres and consists of complete buildings and equipment for sampling, roasting, sintering, smelting and refining lead, silver, and gold ores. In addition to refined lead, silver, and gold, antimonial lead and copper sulphate are also produced. The principal supply of ore is from the company's own mine and the mines of the Coeur d'Alene district. The company is doing a general custom business and is drawing ore from all of the northwestern states as well as from British Columbia and Alaska, and is becoming a strong competitor in the smelting business. This smelter and its operations are fully described and illustrated in many of the articles listed under the bibliography of Shoshone County.

REMARKS

This company is the largest dividend payer and maintains the largest pay roll of any mine in Idaho; it is also the largest producer of lead-silver ore in the State, if not in the world; and is one of the few companies in the United States that mine, mill, smelt, refine, manufacture, and sell lead ore and lead products. The enterprise, particularly the mine and mill, has been established for such a long period and all operations have become so well founded that it has practically expanded into a manufacturing operation. The mine is opened by over 57 miles of underground workings and has a sufficient tonnage of ore reserves to assure many years of continued operations.

During the past few years this organization has been actively engaged in prospecting and developing mining properties throughout the State, and during 1924 acquired the mines owned by the Hall-Interstate Mining Co. and the Lost Pilgrim Mining Co., situated near the head of the Deadwood River in Valley County. The interest shown in developing lead mines outside of the Coeur d'Alene district is having a tremendous influence in attracting attention to the State's undeveloped resources.

The management is progressive and intelligent and an unusual amount of initiative is shown in the conduct of the affairs of the company and civic activities. An excellent spirit of cooperation has been created and maintained in the employees, and everything possible is done to promote their welfare. An example of this attitude was the announcement by the company that it had arranged to give the employees an op-

portunity to purchase a part of the new issue of preferred stock. Three thousand shares of this stock were set aside for the employees, to be purchased for cash or upon the installment plan. This stock has a par value of $100 per share, and bears 6 per cent interest. It is also subject to a bonus of 50 cents per share per quarter, making an assured interest rate of 8 per cent, while the holder is an employee of the company, and an additional bonus of as much more per quarter as the common stock received in dividends in excess of $1.50 per share during the previous quarter. This preferred stock is redeemable at $110 a share. The common stock was listed on the New York Curb Exchange during the latter part of 1926; in January, 1927, it sold at a low of $67.50 per share and by September it had risen to a high of $156 per share.

This company owns a 50 per cent interest with the Hecla Mining Co. in the Sullivan Mining Co., the owner of the Star mine in the Coeur d'Alene district; and a 50 per cent interest in the Alaska-Treadwell Gold Mining Co. and the Treadwell Yukon Co., Ltd., both of Alaska. Ore from the latter property was shipped to the smelter at Kellogg. In addition to the foregoing, the company is actively interested in developing properties in Nevada and at Sudbury, Ontario, Canada.

The extensive development work done in the Bunker Hill mine during the year greatly increased the known ore reserves. This work consisted principally of completing the shaft to the 1900-ft. level and opening the east and west ore bodies at this additional depth, where ore and geological conditions were found to be normal. The mine, mill, and smelting plants were enlarged and improved. The Sweeny mill was altered to accommodate custom ores, particularly those from Pine Creek; and the mill formerly owned by the Big Creek Mining Co., Ltd., on Big Creek was rebuilt to treat the ore from the Alhambra and Crescent mines.

The Tainton electrochemical experimental lead-leaching plant was modified and improved. Many details were perfected which add greatly to the improvement of the process.

See page 44 for an extended remark on this company's accident rate.

BURKE MINING CO., LTD.

Office: Wallace. **Officers:** Henry Garber, Pres., Spokane, Wash.; John C. Glahe, Sec., Wallace. **Inc.:** May 31, 1902. **Capital:** 1,000,000 shares; par value $1; 760,737 shares issued. **Property:** 12 patented claims, Lelande dist.; Burke. **Development:** 2 tunnels: No. 1, 125 ft. long; No. 2, 1000 ft. long. **Ore:** Lead-silver.

BUTTE & COEUR D'ALENE DEVELOPMENT CO.

Office: Wallace. **Officers:** T. B. Cosgrove, Pres.-Mgr., Mullan; Elmer E. Johnston, Sec., Kellogg. **Inc.:** Sept. 17, 1927. **Capital:** 2,500,000 shares; par value $1; 225,000 shares issued. **Property:** Butte & Coeur d'Alene group; 8 patented claims; Hunter dist.; Mullan; held under lease and option from Butte & Coeur d'Alene Mining Co. **Development:** By 1 tunnel 1500 ft. long, in which is a vertical shaft 400 ft. deep. **Plant:** Electrically-driven compressor; air-driven hoist; complete mining equipment and camp. **Ore:** Lead-silver. **Men employed:** Average, 5. **Remarks:** Principal activity during the year consisted of unwatering the shaft to the 200-ft. level and starting development work on that level.

CALEDONIA MINING CO.

Office: Kellogg. **Officers:** Stanly A. Easton, Pres.-Mgr.; Lee Prather, Sec., both of Kellogg. **Inc.:** July 1, 1907. **Capital:** 2,605,000 shares; par value $1; all shares issued. **Property:** Caledonia; 2 patented claims, Yreka dist.; Kellogg. **Development:** Approximately 19,250 ft. of underground workings. **Plant:** Equipment rented from Bunker Hill & Sullivan M. & C. Co. **Ore:** Silver-lead. **Men employed:** Average, 5. **Remarks:** At one time this company was a large dividend payer. Final distribution of remaining assets was held up on account of unsettled Government income taxes. These were adjusted during the year; two final dividends were declared; company operations were suspended in August, and the mine was turned over to a few lessees.

CALEDONIA SILVER-LEAD MINING CO.

Office: Kellogg. **Officers:** A. C. Beal, Pres.-Mgr.; Lester S. Harrison, Sec., both of Kellogg. **Inc.:** Oct. 24, 1927. **Capital:** 800,000 shares common, par value 25c; 10,000 shares preferred, par value $5; shares issued, unknown. **Property:** New Caledonia group; 4 patented, 4 unpatented claims, Yreka dist.; Kellogg. **Development:** By 1 tunnel 1400 ft. long. **Plant:** Electrically-driven compressor; complete mining equipment. **Ore:** Lead-silver. **Remarks:** Idle. Incomplete reports indicate that this company may be a reorganization of the New Caledonia Consolidated Mining Co.

CALIFORNIA GULCH PLACER MINING CO.

Office: Wallace. **Officers:** A. O. Rickert, Pres.; Flora Rickert, Sec.; Julia B. Hammond, Mgr., all of Sharon, Wash. **Inc.:** April 26, 1920. **Capital:** 200,000 shares; par value 25c; shares issued, unknown. **Property:** 8 unpatented placer claims, unorganized dist., on St. Joe River; nearest P. O., Superior, Mont.

CALLAHAN ZINC-LEAD CO.

Office: Wallace. **Officers:** D. A. Callahan, Pres.; C. W. Newton, Sec.-Mgr., both of Wallace. **Inc.:** July 18, 1912, as Consolidated Interstate Mining Co.; name changed March 25, 1921. **Capital:** 1,000,000 shares; par value $10; 716,592 shares issued.

CALLAHAN MINE

Property: Interstate-Callahan group; 81 patented, 2 unpatented claims, Beaver dist.; Interstate. **Development:** Principal development is main transportation tunnel which is 5500 ft. long and a three-compartment vertical shaft 2000 ft. deep. Total development, approximately 10 miles. **Plant:** MINE: Two single drum air-driven hoists and one 250-h. p. electrically-driven double drum hoist; three large I-R electrically-driven compressors; trolley locomotive haulage in main tunnel. Complete and modern blacksmith shop, machine shop, sawmill, mine equipment, camp and company buildings. MILL: 600-ton concentrator, including flotation. **Ore:** Zinc-lead-silver. **Men employed:** Average, 2. **Remarks:** At one time this property was one of the largest zinc mines in the United States. No ore has been mined since October, 1923.

GALENA MINE

Property: Chicago-Boston, Killbuck, Vulcan, Argentine, Wallace, and Silver Range groups; 16 patented, 74 unpatented claims, Lake Gulch, Placer Center dist.; Wallace. **Development:** By 33 tunnels and two vertical shafts. Total development, approximately 32,000 ft. **Plant:** MINE: One 150-h. p. Lidgerwood, one 200-h. p. Coeur d'Alene Hdw. electrically-driven hoist; 3 I-R electrically-driven compressors, total capacity 1500 cu. ft.; complete equipment and mine camp. MILL: 150-ton flotation. **Ore:** Lead-silver. **Men employed:** Average, 100. **Remarks:** In addition to maintaining capacity output, the company performed a large amount of development work; auxiliary machinery was placed on the 1400-ft. level and work started on sinking to the 2200-ft. level. At the close of the year the shaft had been extended to the 1600-ft. level.

This company is well financed and intelligently directed. Its Galena mine was operated at a profit throughout the year, and as the development work greatly increased the known ore reserves, there is a strong probability that the company will again enter the list of dividend payers, a position it held when the Callahan mine was under operation.

CANYON CREEK MILLING CO.

Office: Wallace. **Officers:** C. R. Nordquist, Pres.-Mgr.; A. D. Gamble, Sec., both of Wallace. **Inc.:** May 28, 1926. **Capital:** 25,000 shares; par value $1; 19,406 shares issued. **Property:** Lease on tailings in Canyon Creek. **Plant:** 35-ton electrically-driven concentrator, including tables and flotation. **Ore:** Lead-silver. **Men employed:** Average, 5. **Remarks:** Mill was operated for 3 months during the early part of the year. A stock assessment of 10c per share was levied on May 14, 1927.

CARBONATE MINING & MILLING CO.

Office: Wardner. **Officers:** C. Wiese, Pres.-Mgr., Wardner. **Inc.:** Oct. 7, 1899. **Capital:** 1,000,000 shares; par value 25c; 445,465 shares issued. **Property:** Carbonate group; 4 unpatented claims, Pine Creek, Yreka dist.; Beeler. **Development:** By 2 tunnels: No. 1, 600 ft.; No. 2, 300 ft. **Ore:** Lead-zinc-silver. **Remarks:** Lower tunnel was advanced 100 ft. under contract during the year. A stock assessment of 2 mills was levied on April 16, 1927.

CARNEY COPPER CO., LTD.

Office: Mullan. **Officers:** J. L. Martin, Pres.-Mgr.; C. D. Miller, Sec., both of Mullan. **Inc.:** Nov. 24, 1906. **Capital:** 1,500,000 shares; par value $1; 665,122 shares issued. **Property:** Carney group; 8 unpatented claims, Hunter dist.; Mullan. **Development:** Approximately 5000 ft. of underground workings. **Ore:** Lead-silver. **Remarks:** Annual labor only. A stock assessment of 1 mill was levied on Apr. 27, 1927.

GALENA MILL: CALLAHAN ZINC-LEAD CO.

CEDAR CREEK MINING & DEVELOPMENT CO., LTD.

Office: Wallace. **Officers:** J. W. Weyer, Pres.; William Becker, Sec., both of Wallace. **Inc.:** June 28, 1905. **Capital:** 1,000,000 shares; par value $1; 823,746.44 shares issued. **Property:** Cedar Creek group; 5 patented, 24 unpatented claims, Summit dist.; Murray. **Development:** 3 tunnels: No. 1, 587 ft. long; No. 2, 1050 ft. long; No. 3, 2550 ft. long; 1 inclined shaft 320 ft. long. Total development, approximately 8760 ft. **Plant:** MINE: 12x12 electrically-driven compressor and air-driven hoist; complete mining equipment and camp. MILL: 100-ton flotation concentrator. **Ore:** Lead-zinc-silver. **Men employed:** Average, 20. **Remarks:** Mill was completely constructed during the year, but operations deferred until early in 1928; new boarding and bunk houses were erected, additional mining machinery was installed, and the mine placed in condition for stoping operations. Stock assessments were levied during the year as follows: June 6, 3 mills; August 20, 2c.

CENTRAL MINING CO.

Office: Burke. **Officers:** M. V. McNamee, Pres.; F. H. Richardson, Sec.; F. C. Richardson, Mgr., all of Burke. **Inc.:** Oct. 28, 1911. **Capital:** 1,500,000 shares; par value $1; all shares issued. **Property:** Central group; 5 patented claims, lying between Hercules and Oom Paul; Lelande dist.;

Burke. **Development:** Approximately 1200 ft., principally tunnels. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** Machinery and equipment of Oom Paul mine used, as well as the Oom Paul tunnel, through which the company is developing its property.

CHESTER CONSOLIDATED MINING CO.

Office: Wallace. **Officers:** Arthur Schanck, Pres., Metamora, Mich.; Morgan E. Siple, Sec., Pontiac, Mich. **Inc.:** Dec. 6, 1924. **Capital:** 50,000 shares common, no par value; 50,000 shares preferred, par value $5; all shares issued. **Property:** Terrible Edith group; 21 unpatented claims, Eagle dist.; Murray. **Development:** By 4 tunnels: No. 2, 410 ft.; No. 3, 1030 ft.; No. 4, 2380 ft. **Plant:** Electrically-driven I-R compressor; complete mining equipment and camp. **Ore:** Lead-zinc-silver. **Men employed:** Average, 10. **Remarks:** Small amount of development work performed during a period of about 60 days.

CHESTER MINING CO., LTD.

Office: Kellogg. **Officers:** P. P. Weber, Pres.; C. W. Simmons, Sec., both of Kellogg. **Inc.:** July 31, 1900. **Capital:** 1,000,000 shares; par value $1; 923,945 shares issued. **Property:** Chester group; 6 patented claims, Yreka dist.; Kellogg.

CINCINNATI MINING CO .

Office: Wallace. **Officers:** R. E. Seysler, Pres.; W. H. Herrick, Sec.-Mgr., both of Wallace. **Inc.:** Jan. 18, 1924. **Capital:** 1,000,000 shares; par value 25c; 21,500 shares issued. **Property:** Cincinnati group; 5 unpatented claims, Hunter dist.; Mullan. **Development:** By 2 tunnels: No. 1, 800 ft. long; No. 2, 900 ft. long. **Ore:** Lead-silver. **Men employed:** Average, 1. **Remarks:** Annual labor only.

CLARK-MONTANA REALTY CO.

Office: P. O. Box 1368, Butte, Mont. **Officers:** W. A. Clark, Pres.; J. L. Templeman, Sec.; William C. Siderfin, Mgr., all of Butte, Mont. **Inc.:** May 7, 1921. **Capital:** 35,000 shares; par value $100; 15,000 shares issued. **Property:** Sunset group; 3 patented claims, Beaver dist.; Wallace. **Development:** By 1 tunnel 3600 ft. long and a vertical shaft 800 ft. deep with 4 intermediate levels. Total development, approximately 10,000 ft. **Ore:** Lead-silver-zinc. **Remarks:** Under option to Long Wait Mining Co.

CLEAR GRIT MINING CO., LTD.

Office: Wallace. **Officers:** F. C. Rood, Pres.-Mgr., Longview, Wash.; O. W. Lewis, Sec., Wallace. **Inc.:** May 9, 1906. **Capital:** 1,000,000 shares; par value $1; all shares issued. **Property:** 5 unpatented claims, Beaver dist.; Prichard. **Development:** By 1 tunnel approximately 2000 ft. long. **Ore:** Lead-silver. **Remarks:** Annual labor only.

CLIMAX SILVER-LEAD MINING CO.

Officers: James A. Wayne, Pres.; H. V. Edwards, Sec.-Mgr., both of Wallace. **Inc.:** April 22, 1914. **Capital:** 1,500,000 shares; par value 25c; 1,300,000 shares issued. **Property:** Climax group; 2 patented, 1 unpatented claim, Evolution dist.; Wallace. **Development:** By 3 tunnels, the principal one of which is 2800 ft. long. **Plant:** 10x10 electrically-driven compressor and complete mining equipment. **Ore:** Lead-silver. **Remarks:** Idle.

COEUR D'ALENE BIG CREEK MINING CO.

Office: 916 Alaska Bldg., Seattle, Wash. **Officers:** E. J. Brown, Pres.; C. F. Uhden, Sec., both of Seattle. **Inc.:** Jan. 31, 1925. **Capital:** 1,500,000 shares; par value 10c; all shares issued. **Property:** 4 unpatented claims, Yreka dist.; Big Creek; Kellogg. **Development:** Principally by 1 tunnel 1407 ft. long. **Plant:** 12x10 C-P compressor, electrically driven; drill sharpener; complete mining equipment and camp. **Ore:** Lead-silver. **Men employed:** Average, 4. **Remarks:** Tunnel extended about 500 ft. during the year.

COEUR D'ALENE CHAMPION MINING CO.

Office: E. 1827 Sprague Ave., Spokane, Wash. **Officers:** J. Reeves, Pres.; James Keith, Sec.-Mgr., both of Spokane, Wash. **Inc.:** Jan. 22, 1907. **Capital:** 1,500,000 shares; par value $1; 740,455 shares issued. **Property:** Champion group; 13 unpatented claims, near the head of Military Gulch;

Hunter and Lelande dists.; Burke. **Development:** Principally by 4 tunnels: No. 1, 160 ft. long; No. 2, 700 ft. long; No. 3, 3300 ft. long; No. 4, 180 ft. long. **Ore:** Lead-silver. **Men employed:** Average, 3. **Remarks:** Annual labor only.

COEUR D'ALENE CRESCENT MINING CO.

Office: 404 Jamieson Bldg., Spokane, Wash. **Officers:** J. B. Millspaugh, Pres.; F. W. Mauser, Sec., both of Spokane, Wash. **Inc.:** Dec. 12, 1913. **Capital:** 1,250,000 shares; par value $1; 650,000 shares issued. **Property:** Evolution group; 7 unpatented claims, Evolution dist.; Osburn. **Development:** By 1 tunnel, approximately 500 ft. long, and a vertical shaft 300 ft. deep. **Plant:** An old steam-driven hoist. **Ore:** Lead-silver. **Remarks:** Under option to Evolution Mining Co.

COEUR D'ALENE METALS CO.

Office: Eagle Blk., Wallace. **Officers:** C. A. Keating, Pres.; A. G. Kennedy, Sec., both of Wallace. **Inc.:** Jan. 18, 1926. **Capital:** 10,000 shares; par value $100; 3 shares issued. **Remarks:** Owns no property.

COEUR D'ALENE MINING CO.

Office: Ames Bldg., Boston, Mass. **Officers:** Burton E. James, Pres.; John P. Wright, Sec., both of Boston, Mass. **Inc.:** July 20, 1900. **Capital:** 125,000 shares; par value $10; 118,586 shares issued. **Property:** Placer claims, which were exhausted by Yukon Gold Co.

COEUR D'ALENE MINING & SMELTING CO.

Office: Wallace. **Officers:** A. D. Wallace, Pres.-Mgr.; F. F. Brewer, Sec., both of Wallace. **Inc.:** July 18, 1904. **Capital:** 1,000,000 shares; par value $1; 923,800 shares issued. **Property:** 9 unpatented claims, Placer Center dist.; Wallace. **Development:** By 2 tunnels: No. 1, 300 ft.; No. 2, 1400 ft. long. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** Active development work throughout the year. Stock assessments were levied during 1927 as follows: Apr. 7, 2 mills; Aug. 13, 2 mills.

COEUR D'ALENE PREMIER MINES CORPORATION

Office: Kellogg. **Officers:** John C. Dwyer, Pres., Coeur d'Alene; J. W. Bishop, Sec., Kellogg. **Inc.:** June 1, 1927. **Capital:** 3,000,000 shares; par value 5c; 45,000 shares issued. **Property:** 9 unpatented claims on west fork of Pine Creek; Yreka dist.; Kellogg. **Development:** By 2 tunnels: No. 1, 450 ft.; No. 2, 150 ft. **Ore:** Lead-silver.

COEUR D'ALENE SILVER-LEAD MINING CO.

Office: 1004 E. 8th Ave., Spokane, Wash. **Officers:** Charles J. Heidenreich, Pres., Spokane, Wash. **Inc.:** June 16, 1916; charter forfeited Dec. 1, 1922. **Capital:** 1,200,000 shares; par value $1; 752,800 shares issued. **Property:** 6 patented claims, Hunter dist.; Mullan. **Development:** By 2 tunnels: No. 1, 1200 ft. long; No. 2, 300 ft. long. **Ore:** Lead-silver. **Remarks:** Idle for 9 years.

COEUR D'ALENE SYNDICATE MINING CO.

Office: Wallace. **Officers:** Philip Wiseman, Vice-Pres.; P. Kenneth Wiseman, Sec., both of 1206 Pacific Mutual Bldg., Los Angeles, Calif. **Inc.:** Sept. 16, 1922. **Capital:** 900,000 shares; 200,000 preferred, par value $5; 700,000 common, par value $1; 85,933 common shares issued. **Property:** Flynn and Senator groups held under lease and bond; 42 patented, 4 unpatented claims, Lelande and Hunter dists.; Gem. **Development:** 11,000 ft. of underground workings. **Plant:** Electrically-driven 900-cu. ft. I-R compressor; drill sharpener and complete mining equipment; Hoar shovel. **Ore:** Lead-silver. **Remarks:** 1900 ft. of diamond drilling performed during the year.

COLUMBIA COPPER CO., LTD.

Office: Wallace. **Officers:** Joseph Huber, Pres.-Mgr., Mullan; C. W. Betts, Sec., Wallace. **Inc.:** April 24, 1914. **Capital:** 2,500,000 shares; par value $1; 1,305,385 shares issued. **Property:** Columbia group; 22 unpatented claims, Hunter dist.; Mullan. **Development:** By 11 tunnels, totaling approximately 2500 ft. **Ore:** Lead-silver, copper. **Remarks:** Annual labor only.

COMMERCIAL TRAVELER MINING CO.

Office: W. 426 Sprague Ave., Spokane, Wash. **Officers:** H. N. Deas, Pres.; E. E. Jordan, Sec., both of Spokane; Fred McHugh, Mgr., Masonia. **Inc.:** May 6, 1926. **Capital:** 2,000,000 shares; par value 5c; 750,000 shares issued. **Property:** 7 unpatented claims, Pine Creek, Yreka dist.; Kellogg; held under lease and option from Shrine Mining Co. **Remarks:** Property acquired and a small amount of work started in March.

COMSTOCK COPPER MINING CO.

Office: Wallace. **Officers:** Therrett Towles, Pres.; Otto A. Olsson, Sec., both of Wallace. **Inc.:** Nov. 23, 1906. **Capital:** 1,000,000 shares; par value $1; all shares issued. **Property:** Fannie group; 5 unpatented claims, Beaver dist.; Prichard. **Development:** By 3 tunnels: No. 1, 350 ft.; No. 2, 500 ft.; No. 3, 75 ft. **Ore:** Copper-gold. **Remarks:** Small amount of work by lessees.

CONSTITUTION MINING & MILLING CO.

Office: Masonia. **Officers:** Frank T. Post, Pres.; B. H. Kizer, Sec., both of Spokane, Wash.; Wm. P. White, Mgr., Masonia. **Inc.:** Sept. 17, 1902. **Capital:** 1,750,000 shares; par value $1; 1,741,250 shares issued. **Property:** Constitution group; 12 patented, 27 unpatented claims, Pine Creek, Yreka dist.; Kellogg. **Development:** By 3 tunnels: No. 1, 205 ft.; No. 2, 2508 ft.; No. 3, 2359 ft.; and an inclined shaft from the surface 240 ft. deep, extending to the 200-ft. level, in which is a 200-ft. vertical shaft. Total development, approximately 7800 ft. **Plant:** MINE: A 600-cu.-ft. I-R and a 500-cu.-ft. C-P compressor, both electrically driven; drill sharpeners; complete mining equipment; storage-battery locomotive haulage. MILL: 200-ton concentrator, fine grinding and flotation. **Ore:** Lead-zinc-silver. **Men employed:** Average, 72. **Remarks:** This company is the largest operator on Pine Creek. During the year the mill was enlarged and changed to straight flotation; production was constantly maintained; and a large amount of mine development work was done, part of which was the sinking of a 200-ft. vertical shaft on the 200-ft. level. This work increased the known ore reserves, and the enlargements and improvements added to mine and mill plants greatly increased their operating efficiency.

CONSTITUTION M. & M. CO.'S MILL

COPPER CHIEF MINING CO.

Office: Wallace. **Officers:** D. E. Wickward, Pres.; James H. Taylor, Sec.-Mgr., both of Wallace. **Inc.:** Sept. 25, 1907. **Capital:** 1,000,000 shares; par value $1; shares issued, unknown. **Property:** Copper Chief group; 7 patented, 4 unpatented claims, St. Joe dist.; Adair. **Ore:** Copper-gold.

COPPER KING MINING & SMELTING CO.

Office: Mullan. **Officers:** Dave Holzman, Pres., Spokane, Wash.; H. W. Ingalls, Sec.-Mgr., Mullan. **Inc.:** Aug. 13, 1901. **Capital:** 1,500,000 shares; par value $1; 1,470,000 shares issued. **Property:** Copper King group; 18 unpatented claims, Lelande and Hunter dists.; Mullan. **Development:** Principally by 3 tunnels: No. 1, 200 ft. long; No. 2, 1800 ft. long; No. 3, 4800 ft. long. Total development, approximately 10,000 ft. **Plant:** Electrically-driven compressor and complete mining equipment and camp. **Ore:** Lead-silver. **Remarks:** Annual labor only. A stock assessment of 5 mills was levied on Nov. 23, 1927.

CRESENT MINING & MILLING CO.

Office: Kellogg. **Officers:** David B. Inghram, Pres., Kellogg; Dennis P. Woods, Sec.-Mgr., 707 Hutton Bldg., Spokane, Wash. **Inc.:** June 22, 1912. **Capital:** 1,500,000 shares; par value $1; all shares issued. **Property:** Crescent group; 5 unpatented claims, Moon Creek, Yreka dist.; Kellogg. **Development:** By 5 tunnels and a vertical shaft 215 ft. deep. **Plant:** Electrically-driven I-R compressor and hoist; complete mining equipment and camp. **Ore:** Lead-zinc-silver. **Remarks:** Property under option to Washington-Idaho Mining Co.

C. & R. MINING CO.

Office: 312 Old Nat'l Bank Bldg., Spokane, Wash. **Officers:** E. R. Week, Pres.; Ben L. Collins, Sec.; Russell F. Collins, Mgr., all of Spokane, Wash. **Inc.:** June 16, 1904. **Capital:** 1,250,000 shares; par value $1; all shares issued. **Property:** C. & R. group; 9 patented, 1 unpatented claim, on Sunset Peak, Lelande dist.; Burke. **Development:** By 3 tunnels: No. 1, 400 ft.; No. 2, 1200 ft.; No. 3, 6000 ft. **Plant:** Electrically-driven I-R compressor; complete mining equipment. **Ore:** Lead-silver.

CUBA MINING CO.

Office: Wallace. **Officers:** W. H. Hanson, Pres.; Herman Marquardt, Sec., both of Wallace. **Inc.:** Nov. 18, 1899. **Capital:** 1,000,000 shares; par value $1; all shares issued. **Property:** Cuba group; 2 patented claims, Placer Center dist.; Wallace. **Development:** 2 tunnels: No. 1, 500 ft. long; No. 2, 1100 ft. long. **Plant:** Electrically-driven I-R compressor; complete mining equipment. **Ore:** Lead-silver. **Remarks:** This company is controlled by the Plymouth Lead Mines Co.

DECKER DEVELOPMENT CO.

Office: Kellogg. **Officers:** George Decker, Pres.; Mrs. M. E. Morgan, Sec.; Al Coneybeare, Mgr., all of Kellogg. **Inc.:** Oct. 1, 1927. **Capital:** 500,000 shares; par value 10c; 30 shares issued. **Property:** Stewart group; 4 patented, 2 unpatented claims, held under lease; Yreka dist.; Kellogg. **Development:** By 1 tunnel 2200 ft. long. **Ore:** Lead-silver. **Men employed:** Average, 6. **Remarks:** A recent organization, which acquired a lease on the famous old Stewart mine. After the company's organization was completed, work was started on reopening the lower or Fir tunnel; at the close of the year approximately 2500 ft. of this tunnel had been reopened.

DEEP WONDER MINING CO.

Office: 408 Ziegler Bldg., Spokane, Wash. **Officers:** James H. Taylor, Pres., Wallace; Charles J. Kapps, Sec.-Mgr., Spokane, Wash. **Inc.:** Dec. 13, 1912; charter forfeited Dec. 2, 1916. **Capital:** 2,000,000 shares; par value $1; 1,738,678 shares issued. **Property:** Deep Wonder group; 12 patented claims, Hunter dist.; Mullan. **Development:** By 4 tunnels, the principal one of which is No. 2, 2400 ft. long. **Ore:** Lead-silver. **Remarks:** Property under lease to Mutual Mines Development Co.

DEER CREEK MINING CO.

Office: Wallace. **Officers:** C. E. Biggs, Pres.-Mgr., Lewiston; Jas. A. MacGowan, Sec., Great Falls, Mont. **Inc.:** May 23, 1925. **Capital:** 2,000,000 shares; par value 1c; 1,199,500 shares issued. **Property:** Deer Creek group; 23 unpatented claims, Beaver dist.; Wallace. **Development:** By 3 tunnels: No. 1, 200 ft. long; No. 2, 800 ft. long; No. 3, 200 ft. long; and an inclined shaft 100 ft. deep. **Plant:** Gas-driven Sullivan compressor, complete mining equipment and camp. **Ore:** Lead-silver. **Men employed:** Average, 4. **Remarks:** Small amount of work during the early part of the year.

DELAWARE MINES CORPORATION

Office: 323 Lindelle Bldg., Spokane, Wash. **Officers:** Matt Baumgartner, Pres.; A. L. Hooper, Sec., both of Spokane; F. C. Bailey, Mgr., Wallace. **Inc.:** March 10, 1926. **Capital:** 5,000,000 shares; par value 10c; 3,056,727 shares issued. **Property:** Rex and Red Monarch groups; 6 patented, 51 unpatented claims, Placer Center and Beaver dists.; Wallace. **Development:** By 4 tunnels, the principal of which are No. 4 or Rex tunnel, approximately 4000 ft. long, in which is a vertical shaft 700 ft. deep; and No. 1 or Red Monarch tunnel, 4400 ft. long. **Plant:** Electrically-driven compressor; complete mining equipment and camp. **Ore:** Lead-zinc-silver. **Men employed:** Average, 4. **Remarks:** This company acquired the property owned by the Rex Consolidated Mines Co. in May, 1926. A large amount of development work, including reopening of old entries, was performed during 1927. A small tonnage of ore was produced and marketed by lessees.

DICKENS CONSOLIDATED MINES CO.

Office: 212 Gyde-Taylor Bldg., Wallace. **Officers:** C. H. Whittum, Pres., Rawlings, Wyo.; C. F. Kratzer, Sec., Spokane, Wash.; Alfred Brile, Mgr., Wallace. **Inc.:** March 18, 1925. **Capital:** 2,500,000 shares; par value 10c; all shares issued. **Property:** Dickens group; 22 unpatented claims, Moon Creek, Evolution and Yreka dists.; Kellogg. **Development:** Principally by a vertical shaft 500 ft. deep. **Plant:** 900-cu.-ft. Sullivan compressor and hoist, both electrically driven; complete mining equipment and camp. **Ore:** Lead-zinc-silver. **Men employed:** Average, 11. **Remarks:** During the year, a large electrically-driven hoist was purchased and installed; shaft was sunk from the 400-ft. to the 500-ft. level, and a large amount of crosscutting and drifting was performed on each of these levels. The development work exposed a substantial amount of new ore. Stock assessments were levied during 1927 as follows: March 9, 10 mills; May 14, 10 mills; July 15, 10 mills; Dec. 6, 10 mills.

DOBSON PASS MINING CO.

Office: Wallace. **Officers:** J. P. Rogers, Pres.-Mgr.; S. M. Rogers, Sec., both of Wallace. **Inc.:** July 14, 1900. Charter forfeited Nov. 30, 1927. **Capital:** 1,000,000 shares; par value 10c; all shares issued. **Property:** Dobson Pass group; 5 unpatented claims, Placer Center dist.; Wallace. **Remarks:** Annual labor only.

DOUGLAS MINING CO., LTD.

Office: Wallace. **Officers:** Frank F. Johnson, Pres., Boise; H. C. Adami, Sec.; H. J. Rossi, Mgr., both of Wallace. **Inc.:** Oct. 24, 1903. **Capital:** 1,200,000 shares; par value $1; 853,500 shares issued. **Property:** Douglas group; 10 patented, 2 unpatented claims, Pine Creek, Yreka dist.; Kellogg. **Development:** By 3 tunnels: No. 1, 930 ft.; No. 2, 675 ft.; No. 3, 327 ft. **Plant:** Electrically-driven compressor; air hoist; complete mining equipment and camp. **Ore:** Zinc-lead-silver. **Men employed:** Average, 12. **Remarks:** During the early part of the year property was operated by lessees, who produced and marketed a large tonnage of ore. The lease was cancelled in May; company then assumed operation of the mine and commenced an active development campaign, the funds for which were derived from the sale of treasury stock to the Bunker Hill & Sullivan M. & C. Co.

DU BOIS MINING CO.
Office: Kellogg. **Officers:** H. E. Ginter, Pres., Du Bois, Pa.; J. B. Eberhart, Sec.-Treas., Punxsutawney, Pa. **Inc.:** Aug. 9, 1914. **Capital:** 1,000,000 shares; par value $1; 300.000 shares issued. **Property:** 7 patented, 1 unpatented claim, Yreka dist.; Kellogg. **Development:** Principally by 1 tunnel 1250 ft. long. **Ore:** Lead-silver. **Remarks:** Idle for many years.

DULUTH MINING CO.
Office: Wallace. **Officers:** W. B. Heitfeld, Pres.; John E. Ryan, Sec., both of Wallace. **Inc.:** June 10, 1909. **Capital:** 1,500,000 shares; par value 25c; 522,710 shares issued. **Property:** Duluth group; 7 unpatented claims, Lelande dist.; Burke. **Development:** By 5 tunnels, with a total development of approximately 1000 ft. **Ore:** Lead-silver. **Remarks:** Annual labor only. A stock assessment of 6 mills was levied on July 18, 1927.

EAST ALAMEDA MINING CO., LTD.
Office: Avalon, Calif. **Officers:** Frank P. Markwell, Pres., Tajunga, Calif.; Everett H. Pattison, Sec., Avalon, Calif. **Inc.:** July 25, 1907. **Capital:** 1,000,000 shares; par value $1; all shares issued. **Property:** East Alameda group; 1 patented, 1 unpatented claim, Lelande dist.; Black Bear. **Ore:** Lead-silver.

EAST CALEDONIA MINES CO.
Office: Wallace. **Officers:** H. J. Rossi, Pres.; Franklin Pfirman, Sec., both of Wallace. **Inc.:** Mar. 6, 1915. **Capital:** 1,000,000 shares; par value 25c; 156,730 shares issued. **Property:** East Caledonia group; 2 patented, 5 unpatented claims, Yreka dist.; Kellogg. **Plant:** Electrically-driven I-R compressor, electrically-driven hoist, complete mining equipment. **Ore:** Lead-silver. **Remarks:** Annual labor only.

EAST HECLA MINING CO., LTD.
Office: Wallace. **Officers:** John P. Gray, Pres., Coeur d'Alene; A. H. Featherstone, Sec., Wallace. **Inc.:** Nov. 24, 1906. **Capital:** 1,500,000 shares; par value $1; all shares issued. **Property:** East Hecla group; 4 patented claims, Hunter dist.; Mullan. **Remarks:** Idle for a number of years.

EASTERN STAR MINING CO., LTD.
Office: Wallace. **Officers:** Jack Johnstone, Pres.-Mgr., Burke; John C. Glahe, Sec., Wallace. **Inc.:** Aug. 29, 1906. **Capital:** 1,000,000 shares; par value $1; 600,000 shares issued. **Property:** Eastern Star group; 18 unpatented claims, Lelande dist.; Burke. **Development:** 2 tunnels: No. 1, 150 ft. long; No. 2, 800 ft. long. **Ore:** Lead-silver. **Remarks:** Annual labor only.

ELDORADO MINING & SMELTING CO., LTD.
Office: Wallace. **Officers:** J. C. Waddell, Pres., Rose Lake; G. W. Dougherty, Sec., Wallace. **Inc.:** July 5, 1907. **Capital:** 1,250,000 shares; par value 10c; 1,204,820 shares issued. **Property:** 4 unpatented claims, Yreka dist.; Kellogg. **Development:** By 1 tunnel, approximately 750 ft. long. **Plant:** Gas-driven compressor. **Ore:** Lead-silver. **Remarks:** Annual labor only.

ENTERPRISE MINING CO.
Office: Kellogg. **Officers:** Fred F. Donaldson, Pres.-Mgr.; W. A. Tuson, Sec., both of Kellogg. **Inc.:** June 4, 1910. **Capital:** 1,000,000 shares; par value $1; 664,500 shares issued. **Property:** Enterprise group; 6 unpatented claims; Kellogg. **Development:** By 3 tunnels: No. 1, 150 ft. long; No. 2, 180 ft. long; No. 3, 1300 ft. long. **Ore:** Lead-silver. **Remarks:** Lower tunnel advanced 100 ft. during the year. Stock assessments were levied during 1927 as follows: Feb. 15, 3 mills; Apr. 15, 3 mills; June 20, 3 mills; Nov. 23, 3 mills.

EQUITABLE MINING & MILLING CO.
Office: 317 Sherman Ave., Coeur d'Alene. **Officers:** C. L. Dittimore, Pres.; H. W. Fintzel, Sec., both of Coeur d'Alene. **Inc.:** April 3, 1916. **Capital:** 1,250,000 shares; par value 1c; 599,926 shares issued. **Property:** 7 unpatented claims; Pine Creek, Yreka dist.; Kellogg. **Development:** Principally by 1 tunnel 850 ft. long. **Ore:** Lead-zinc-silver. **Remarks:** Tunnel advanced 100 ft. during the year. A stock assessment of 1½ mills was levied on May 15, 1927.

EUREKA MINING & MILLING CO., LTD.

Office: Wallace. **Officers:** W. R. Prowell, Pres., Wenatchee, Wash.; A. D. Marshall, Sec., Wallace. **Inc.:** May 3, 1906. **Capital:** 1,000,000 shares; par value $1; 713,100 shares issued. **Property:** Eureka group; 7 patented claims, Placer Center dist.; Wallace. **Plant:** Electrically-driven compressor and complete mining equipment. **Ore:** Lead-silver. **Remarks:** Idle since 1921.

EVOLUTION MINING CO.

Office: 405 Mohawk Bldg., Spokane, Wash. **Officers:** Montgomery Waddell, Pres., New York City; C. A. Fay, Sec., Wallace; Conrad Wolfle, Mgr., Spokane. **Inc.:** July 25, 1927. **Capital:** 1,000,000 shares; par value $1; 600,000 shares issued. **Property:** Evolution group; 8 unpatented claims, Evolution dist.; Osburn; held under lease and option from the Coeur d'Alene Crescent Mining Co. **Development:** By 1 tunnel 500 ft. long and a vertical shaft 250 ft. deep. **Plant:** Electrically-driven compressor; air hoist; complete mining equipment. **Ore:** Lead-silver. **Men employed:** Average, 5. **Remarks:** A new enterprise. Property was acquired, buildings erected, equipment installed, shaft unwatered, and development work started during the latter part of the year.

FAIRVIEW MINING CO., LTD.

Office: Mullan. **Officers:** J. E. Quinlan, Pres.; Katherine Dowling, Sec., both of Mullan. **Inc.:** Mar. 13, 1905. Charter forfeited Nov. 30, 1927. **Capital:** 1,000,000 shares; par value $1; all shares issued. **Property:** Fairview group; 3 unpatented claims, Hunter dist.; Mullan. **Development:** By 1 tunnel 1100 ft. long. **Remarks:** Annual labor only.

FANNIE GREMM MINING CO.

Office: Wallace. **Officers:** P. P. Weber, Pres., Kellogg; Alfred J. Dunn, Sec., Wallace. **Inc.:** Dec. 6, 1900. **Capital:** 1,000,000 shares; par value $1; all shares issued. **Property:** 2 patented claims adjoining the Morning mine on the east, Hunter dist.; Mullan. **Development:** Approximately 16,000 ft. of underground workings. **Ore:** Lead-silver. **Remarks:** Idle. A stock assessment of ½ mill was levied on Dec. 23, 1927. Property under option to Little Sunshine Mining Co.

FEDERAL MINING & SMELTING CO.

Office: 120 Broadway, New York City. **Officers:** F. H. Brownell, Pres.; J. L. Martin, Sec., both of New York City; Frederick Burbidge, Mgr., Wallace. **Inc.:** Sept. 24, 1903. **Capital:** 200,000 shares preferred, 100,000 shares common; par value of each, $100; 120,000 shares preferred, 60,000 shares common issued.

MORNING GROUP

Property: 40 patented, 1 unpatented claim, Hunter dist.; Mullan. **Development:** The two principal tunnels are No. 5, 1600 ft. long, and No. 6, the main transportation tunnel, 9500 ft. long. The principal shaft, which is located in No. 6 tunnel, is a vertical, 4-compartment shaft, 2250 ft. deep, with 11 intermediate levels below No. 6 tunnel, which opens the vein to a total depth of approximately 4600 ft. Total development, approximately **36 miles.** **Plant:** MINE: Fraser-Chalmers double-reel duplex Corliss hoist, size 20x60-inch stroke; one Nordberg single-reel geared hoist, driven by 300-h. p. electric motor; 1 water-driven 5200-cu.-ft. Ricks compressor; one Laidlaw-Dunn-Gordon 3200-cu.-ft. compressor, and two Ingersoll-Rand 2500-cu.-ft. compressors; one Prescott pump, 400 gal. capacity, on 2450 level; all electrically driven; complete mining equipment, machine shops, sawmill, company buildings and hotel. HAULAGE: 500-volt electric in main, or No. 6, tunnel; 250-volt electric and 7 storage-battery locomotives in intermediate levels. MILL: 1200-ton concentrator, including flotation. Two ore-sorting plants and complete modern change house. **Ore:** Lead-silver-zinc. **Men employed:** Average, 766, exclusive of lessees. **Remarks:** Replacement value of surface plant approximately $1,200,000. The principal new improvements, new equipment, and alterations made at this mine during the year were: The replacing of Callow flotation cells, jigs, and tables, by O & D flotation machines; the addition

of 2 drag classifiers, 1 thickener, and 1 Hardinge mill, in the mill; and 3 storage-battery locomotives in the intermediate levels.

PAGE GROUP

Property: 86 patented claims, Yreka dist.; Kellogg. **Development:** By 9 tunnels, the principal one of which is the Curlew, 650 ft. long; and an inclined shaft 900 ft. long, giving a vertical depth of 700 ft. Total development, approximately 12,000 ft. **Plant:** MINE: Electrically-driven 100-h. p. hoist; a 400-cu-ft. and an 800-cu.-ft. electrically-driven compressor; 1 trolley locomotive and 2 storage-battery locomotives; complete and modern mine camp, equipment, and buildings. MILL: 300-ton flotation concentrator. **Ore:** Lead-zinc-silver. **Men employed:** Average, 135. **Remarks:** In 1925 power lines were extended to the mine, the mine plant was installed, the shaft unwatered, and active development work started. In 1926 the mine was further developed, additional equipment added, the mill constructed, and the enterprise placed on a profitable operating basis. During 1927 the mine and mill plants were enlarged and improved, the mine camp was enlarged, the shaft extended 300 ft. from the 600 to the 900-ft. level, and the ore bodies were opened to a greater extent on the intermediate levels. The success of the operation can be accredited entirely to flotation, because with the old milling methods it was impossible to mine and mill at a profit the type of ore occurring in this mine.

PAGE MINE: FEDERAL M. & S. CO.

MACE GROUP

Property: 35 patented claims, Lelande dist.; Mace. **Development:** Principal development consists of No. 6 tunnel, 3600 ft. long; No. 2, Campbell, 3000 ft. long; and a 3-compartment vertical shaft 2400 ft. deep, with 22 intermediate levels. Total development: Approximately 4 miles. **Plant:** MILL: Two 500-ton concentrators, including flotation. **Ore:** Lead-silver.

Remarks: Except for the operation of a few lessees, who produced a small tonnage of ore, this property was idle. No. 6 tunnel is now known as No. 7 of the Tamarack & Custer Consolidated Mining Co.

BURKE GROUP

Property: One millsite, Lelande dist.; Burke. **Plant:** A small hydroelectric power plant.

FRISCO GROUP

Property: 15 patented claims, Lelande dist.; Gem. **Development:** Principally by 4 tunnels: No. 1, 1000 ft. long; No. 2, 1500 ft. long; No. 3, 550 ft. long; No. 4, 1000 ft. long; and a vertical 4-compartment shaft 1650 ft. deep. Total development, approximately 6 miles. **Ore:** Lead-zinc-silver. **Remarks:** A substantial tonnage of ore was produced by lessees during the year.

BIG CREEK GROUP

Property: 3 patented claims, Evolution dist.; Kellogg. **Development:** By 1 tunnel, 75 ft. long. **Ore:** Lead-zinc-silver.

GOVERNMENT GULCH GROUP

Property: Five-sixteenths interest in 1 patented claim, Yreka dist.; Kellogg. **Development:** Principally by 1 tunnel, which is 500 ft. long. Total development, approximately 1700 ft. **Ore:** Lead-silver.

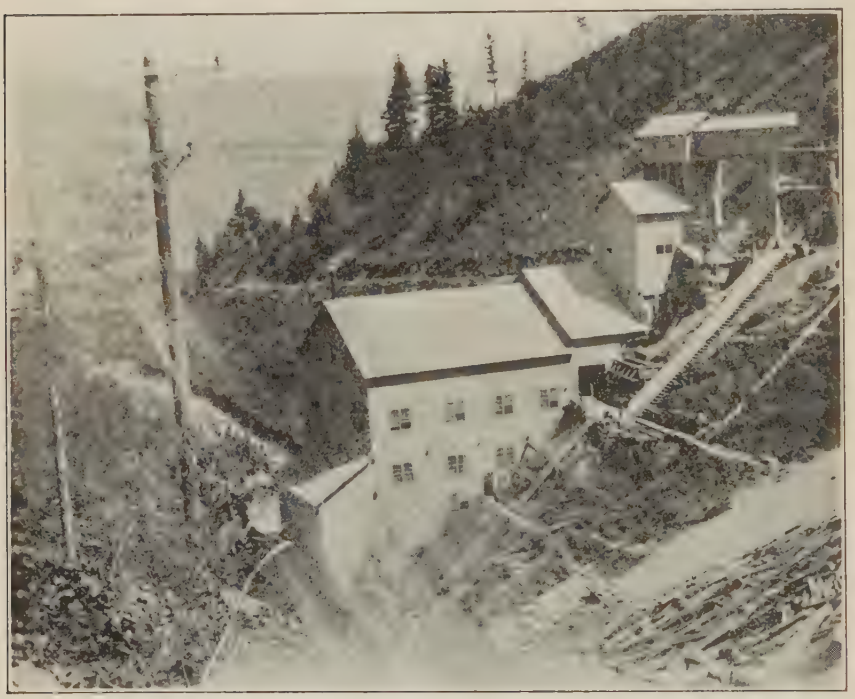
CON. BIEDERMAN GROUP

Property: One-half interest in 2 patented claims and one-third interest in 2 patented claims, Yreka dist.; Kellogg. **Development:** By 2 tunnels: No. 1, 320 ft. long; No. 2, 125 ft. long. **Ore:** Lead-zinc-silver.

REMARKS

This company is one of the largest operators in Shoshone County both in property owned and in production, although for the past few years practically all of its production came from the Morning mine. This mine is one of the largest producers of lead-silver and zinc ores in the Coeur d'Alene district and capacity production was maintained throughout the year. During the year many alterations and additions were made to the mine and mill plants as well as many extensive improvements in the mine, the most important being the completion of the shaft to the 3050-ft. level, including concrete lining; the opening of the ore bodies on the 2850 and 3050 levels; and the improved methods installed in the mill. Leasing operations in the upper part of the Morning mine greatly added to the company's production, which for the year 1927 was one of the largest ever made. The largest lease in the Morning Mine is the Sheridan Leasing Co., which employs about 100 men.

FIDELITY COMPANY, LTD.



Office: Wallace. **Officers:** Oscar B. Bergstrom, Pres., 149 Broadway, New York City; Allan G. Kennedy, Sec.-Mgr., Wallace. **Inc.:** Nov. 5, 1915. **Capital:** 2,500,000 shares; par value 20c; 1,675,309 shares issued. **Property:** Monarch group; 7 patented, 29 unpatented claims, Summit dist.; Murray. **Development:** By 3 tunnels, the principal of which is No. 3, or main crosscut tunnel, which is 3120 ft. long; and an inclined shaft 300 ft. deep; total development, approximately 13,500 ft. **Plant:** MINE: Ottumwa air-driven hoist, 10-drill water-driven compressor, complete mining equipment and camp. MILL: 150-ton concentrator, jigs and tables. **Ore:** Lead-zinc-silver. **Men employed:** 1 watchman. **Remarks:** Annual labor only on unpatented claims.

FIRST NATIONAL SILVER MINES, LTD.

Office: 323 Lindelle Blk., Spokane, Wash. **Officers:** Dan Krehbiel, Pres., Lind, Wash.; Matt Baumgartner, Sec.-Mgr., Spokane, Wash. **Inc.:** April 7, 1920. **Capital:** 3,000,000 shares; par value 5c; 2,276,534 shares issued. **Property:** Liston group; 7 patented, 26 unpatented claims, Big Creek, Evolution dist.; Kellogg. **Development:** By 3 tunnels: No. 1, 1000 ft. long; No. 2, 2500 ft. long; No. 3, 3300 ft. long. **Plant:** Steam-driven compressor, and complete mining equipment. **Ore:** Lead-silver. **Men employed:** Average, 5. **Remarks:** No. 3 tunnel was extended about 700 ft. during the year. Funds for this work were derived from stock assessments.

FLAGSTAFF MINING CO.

Office: Wallace. **Officers:** Emery Guay, Pres.; Evelyn Vaures, Sec., both of Spokane, Wash.; E. L. Vaures, Mgr., Prichard. **Inc.:** Oct. 29, 1927. **Capital:** 1,000,000 shares; par value 10c; 375,000 shares issued. **Property:** Jippo group; 5 unpatented claims, Eagle dist.; Prichard. **Remarks:** A small amount of preliminary work during the summer months.

PAGE MILL: FEDERAL M. & S. CO.

FLORENCE MINING & MILLING CO., LTD.

Office: Kellogg. **Officers:** Charles Dallaire, Pres.; John B. Steffes, Sec., both of Kellogg. **Inc.:** Aug. 15, 1908. **Capital:** 1,000,000 shares; par value $1; 285,000 shares issued. **Property:** Dallaire group; 10 unpatented claims; Big Creek, Yreka dist.; Kellogg. **Development:** 5 tunnels: No. 1, 100 ft. long; No. 2, 150 ft. long; No. 3, 80 ft. long; No. 4, 180 ft. long; No. 5, 150 ft. long. **Ore:** Lead-silver. **Remarks:** In October a contract was let to extend the lower tunnel 200 ft.

FLYNN GROUP MINING CO.

Office: Wallace. **Officers:** J. J. Cronin, Pres.; J. F. Whelan, Sec., both of Wallace. **Inc.:** Aug. 21, 1905. **Capital:** 2,500,000 shares; par value 25c; 1,605,000 shares issued. **Property:** Flynn group; 21 patented claims, Lelande dist.; Black Bear. **Development:** Total development, 6600 ft. **Remarks:** Under option to Coeur d'Alene Syndicate Mining Co.

FORMOSA LEAD MINING CO., LTD.

Office: 504 Empire State Bldg., Spokane, Wash. **Officers:** Charles Hussey, Sec., Spokane, Wash. **Inc.:** Jan. 19, 1907. **Capital:** 1,500,000 shares; par value $1; all shares issued. **Property:** 3 patented claims, Lelande dist.; Wallace. **Remarks:** Under development by Mutual Mines Development Co., which see.

FORT WAYNE MINING CO.

Office: 213 Shannon, Spokane, Wash. **Officers:** E. W. Conrad, Pres.-Mgr.; J. M. Henneck, Sec., both of Spokane. **Inc.:** Sept. 22, 1924. **Capital:** 1,500,000 shares; par value 33 1-3c; 1,089,153 shares issued. **Property:** Eclipse group; 19 unpatented claims, Evolution dist.; Osburn. **Development:** Principally by 1 tunnel, which is 1900 ft. long. **Plant:** Gas-driven compressor. **Ore:** Lead-silver. **Remarks:** Annual labor only. A stock assessment of 2 mills was levied on Feb. 1, 1927.

GEM STATE MINING CO.

Office: 720 Peyton Bldg., Spokane, Wash. **Officers:** J. M. Porter, Pres.-Mgr.; W. E. Horstkotte, Sec., both of Spokane, Wash. **Inc.:** Aug. 25, 1924. **Capital:** 2,200,000 shares; no par value; 1,100,000 shares issued. **Property:** 8 patented, 12 unpatented claims, Hunter dist.; Wallace. **Development:** By 6 tunnels, the longest of which is No. 4, 1878 ft. in length. **Ore:** Lead-silver-zinc. **Remarks:** An organization which is a consolidation of the properties owned by the Coeur d'Alene Silver-Lead Mining Co., and the Silver Mountain Mining Co. Annual labor only. A stock assessment of 1½ mills was levied on June 7, 1927.

GENERAL MINES CORPORATION

Office: 402 Empire State Bldg., Spokane, Wash. **Officers:** C. Roholt, Pres., Worley; H. G. Loop, Sec., Spokane, Wash. **Inc.:** Nov. 23, 1925. **Capital:** 2,000,000 shares; par value 5c; 250,000 shares issued. **Property:** Big Eight group; 10 unpatented claims, Yreka dist.; Kellogg. **Development:** Total development, approximately 2600 ft. **Ore:** Lead-silver. **Remarks:** Property acquired in December.

GERTIE MINING CO.

Office: Wallace. **Officers:** E. E. Flood, Pres.; F. M. Rothrock, Sec., both of Spokane, Wash. **Inc.:** July 23, 1914. **Capital:** 2,500,000 shares; par value 10c; all shares issued. **Property:** Gertie group; 3 patented claims, Lelande dist.; Burke. **Development:** Principally by 1 tunnel, which is over 1 mile in length. **Remarks:** This company was absorbed by the Hercules Mining Co. in 1924; new equipment was installed, the tunnel rehabilitated and active work commenced in extending the tunnel into the Maher-Hearn group, since which time this work has continued without interruption.

GIANT MINING & DEVELOPMENT CO.

Office: Wallace. **Officers:** Paul Liver, Pres.-Mgr.; E. R. Turk, Sec., both of Wallace. **Inc.:** Sept. 22, 1899. **Capital:** 1,000,000 shares; par value 10c; 650,500 shares issued. **Property:** 8 unpatented claims, Beaver dist.; Wallace. **Development:** Principally by 1 tunnel, which is 4500 ft. long. **Ore:** Lead-silver. **Men empoyed:** Average, 2. **Remarks:** The company was active throughout the year. Stock assessments were levied during 1927 as follows: Jan. 3, 2 mills; Apr. 15, 2 mills; Aug. 11, 3 mills.

GOLCONDA LEAD MINES

Office: Barnard Block, Wallace. **Officers:** A. H. Featherstone, Pres.; O. W. Lewis, Sec., both of Wallace. **Inc.:** Jan. 18, 1927. **Capital:** 1,500,000 shares; par value $1; 800,000 shares issued. **Property:** Hector group; 14 patented, 3 unpatented claims, Hunter dist.; Wallace. **Development:** Mine opened by the Mayflower tunnel, 5000 ft. in length, an inclined raise 200 ft. long, and a vertical shaft 200 ft. deep. **Plant:** Electrically-driven 750-cu.-ft. Sullivan compressor; 2 air-driven hoists; storage-battery locomotive haulage; complete mining equipment. **Ore:** Lead-zinc-silver. **Men employed:** Average, 15. **Remarks:** Equipment installed, 200-ft. raise driven, and 200-ft. shaft sunk during the year.

GOLD HUNTER MINES, INC.

Office: 516 E. 28th St., Chicago, Ill. **Officers:** Edwin C. Hennessy, Pres.; Thomas F. Keeley, Sec., both of Chicago, Ill.; C. K. Cartwright, Mgr., Mullan. **Inc.:** April 24, 1925; formerly Gold Hunter Mining & Smelting Co. **Capital:** 20,000 shares; par value $10; all shares issued. **Property:** Gold Hunter; 12 patented claims, Hunter dist.; Mullan. **Development:**

Principal main haulage tunnel 7600 ft. long, from which level is a shaft 1500 ft. deep to the 1200-ft. level, in which there is another shaft 400 ft. deep. **Plant:** MINE: Complete and modern; electric hoist; two 3000-cu-ft. electrically-driven compressors; pumps; machine and blacksmith shop; electric haulage. MILL: 500-ton concentrator, including flotation. **Ore:** Lead-silver. **Men employed:** Average, 140. **Remarks:** This company is one of the old and substantial producers of the Coeur d'Alene district. Capacity production was maintained; a large amount of development work was done in the mine; and the new shaft, on the vein in the 1200-ft. level, was extended from the 1400 to the 1600-ft. level. This development work encountered one of the principal showings of new ore disclosed in the Coeur d'Alene district during the year. Capacity production was maintained without interruption. By proving the continuation of its ore at depth, this company greatly increased its resources and future life.

GOODENOUGH MINING CO.

Office: Fresno, Calif. **Officers:** F. P. Markwell, Pres., Tujunga, Calif.; J. Fred Markwell, Sec., Fresno, Calif. **Inc.:** April 6, 1922. **Capital:** 2,500,000 shares; par value 1c; all shares issued. **Property:** Goodenough group; 13 patented, 5 unpatented claims, Lelande and Hunter dists.; Gem. **Remarks:** Property under option to United Metals Co.

GOVERNMENT GULCH MINING CO.

Office: Wallace. **Officers:** Frederick Burbidge, Pres.-Mgr.; A. W. Hoover, Sec., both of Wallace. **Inc.:** July 15, 1918. **Capital:** 1,500,000 shares; par value 10c; 1,350,567 shares issued. **Property:** Government Gulch group; 6 patented claims, Yreka dist.; Kellogg. **Development:** Principally by 1 tunnel 500 ft. long and a vertical shaft 100 ft. deep. Total development, approximately 1800 ft. **Ore:** Lead-zinc-silver. **Remarks:** Idle.

GREAT DUNKER MINING & MILLING CO.

Office: 316 Lindelle Bldg., Spokane, Wash. **Officers:** J. G. Johnson, Pres., Spokane, Wash.; Carl A. Pearson, Sec.-Mgr., Star Route, Kellogg. **Inc.:** Jan. 11, 1924. **Capital:** 1,000,000 shares; par value 10c; 311,080 shares issued. **Property:** Great Dunker group; 3 patented, 2 unpatented claims, Pine Creek, Yreka dist.; Kellogg. **Development:** By 7 short tunnels. **Ore:** Lead-zinc-silver, antimony. **Men employed:** Average, 2. **Remarks:** A small amount of work during the year.

GREAT EASTERN MINING CO., LTD.

Office: Wallace. **Officers:** John Carlson, Pres., Gem; John C. Furst, Sec., Wallace. **Inc.:** Oct. 22, 1900. **Capital:** 1,000,000 shares; par value $1; 750,000 shares issued. **Property:** Great Eastern group; 13 patented claims, Lelande dist.; Gem. **Development:** Total development, approximately 4000 ft.; the principal tunnel is 600 ft. long. **Ore:** Lead-silver-zinc.

GREAT HELENA MINING & MILLING CO.

Office: Kellogg. **Officers:** Philip J. Lynch, Pres.; Thomas C. Lynch, Sec.-Mgr., both of Kellogg. **Inc.:** Aug. 24, 1922; charter forfeited Dec. 1, 1925. **Capital:** 1,500,000 shares; par value 20c; no shares issued. **Property:** 7 unpatented claims, Pine Creek, Yreka dist.; Kellogg. **Development:** By 6 tunnels, the principal one of which is 550 ft. long. **Ore:** Lead-zinc-silver. **Remarks:** Small amount of work during the year.

GREEN HILL CLEVELAND MINING CO.

Office: Wallace. **Officers:** F. H. Brownell, Pres., 120 Broadway, New York City; John H. Wourms, Sec.; Frederick Burbidge, Mgr., both of Wallace. **Inc.:** Oct. 7, 1912. **Capital:** 320,000 shares; par value $1; all shares issued. **Property:** Green Hill group; 3 patented claims, Lelande dist.; Mace. **Ore:** Silver-lead-zinc. **Remarks:** Idle since 1917.

GUELPH MINING & MILLING CO., LTD.

Office: Kellogg. **Officers:** B. Coyle, Pres., 716 E. Everett St., Portland, Ore.; F. Wm. Voigtlander, Sec., Kellogg. **Inc.:** March 27, 1906. **Capital:** 1,500,000 shares; par value $1; 1,380,967 shares issued. **Property:** Guelph group; 5 patented, 4 unpatented claims, Beaver dist.; Wallace. **Develop-**

ment: Principally by 3 tunnels: No. 1, 150 ft. long; No. 2, 850 ft. long; No. 3, 1600 ft. long; and a vertical shaft 250 ft. deep. **Plant:** 5-drill, 2-stage Sullivan compressor driven by a 75-h. p. electric motor; air-driven hoist; complete mining equipment and camp. **Ore:** Lead-silver. **Remarks:** Annual labor only.

HAPPY DAY MINING CO., LTD.

Office: Day Bldg., Wallace. **Officers:** Daniel Morgan, Pres., Spokane, Wash.; John E. Ryan, Sec., Wallace. **Inc.:** Sept. 30, 1899. **Capital:** 1,000,000 shares; par value 10c; 791,737 shares issued. **Property:** Happy Day group; 6 patented claims, Lelande dist.; Burke. **Development:** Principally by 1 tunnel 1500 ft. long. **Ore:** Lead-silver.

HAPPY JACK MINING CO.

Office: Wallace. **Officers:** Len Lussier, Pres., Spokane, Wash.; H. V. Edwards, Sec.-Mgr., Wallace. **Inc.:** June 9, 1924. **Capital:** 1,500,000 shares; par value 10c; 350,000 shares issued. **Property:** 4 unpatented claims, held under lease and option from the Climax Silver-Lead Mining Co., Placer Center dist.; Wallace. **Development:** By 2 tunnels: No. 1, 50 ft. long; No. 2, 360 ft. long. **Ore:** Lead-silver. **Remarks:** Annual labor only.

HAYES CO.

Office: Kellogg. **Officers:** Arthur Hayes, Pres.; Martin Nicholson, Sec.; Stanly A. Easton, Mgr., all of Kellogg. **Inc.:** May 11, 1916. **Capital:** 25,000 shares; par value $1; 12,500 shares issued. **Property:** 1200 acres river bottom land held under lease; Yreka dist.; Kellogg. **Plant:** MILL: 100-ton flotation concentrator; Orange-peel dredge and sand pumps. **Ore:** Lead-silver from river tailings. **Men employed:** Average, 12. **Remarks:** Profitably operated throughout the year.

HECLA EXTENSION MINING CO.

Office: Wallace. **Officers:** Chas. Oster, Pres., 1 Wall St., New York; Geo. C. Hollister, Sec., 60 Broadway, New York; Patrick Brady, Mgr., Burke. **Inc.:** Oct. 21, 1926. **Capital:** 1,500,000 shares; par value 25c; all shares issued. **Property:** Anchor group; 8 patented claims, held under lease and option from the Anchor Mining Co., and 7 unpatented claims; Lelande dist.; Burke. **Development:** By 2 tunnels: No. 1, 700 ft. long; No. 2, 2800 ft. long; and a 200-ft. vertical shaft. **Plant:** Electrically-driven I-R compressor and complete mining equipment. **Ore:** Lead-silver. **Men employed:** Average, 6. **Remarks:** The shaft was unwatered, and a small amount of development work performed.

HECLA MINING CO.

Office: Wallace. **Officers:** James F. McCarthy, Pres.-Mgr.; L. E. Hanley, Sec., both of Wallace. **Inc.:** Sept. 26, 1898. **Capital:** 1,000,000 shares; par value 25c; all shares issued. **Property:** 47 patented, 1 unpatented claim, Lelande dist.; Burke. **Development:** Principally by a 4-compartment vertical shaft, which is 2000 ft. deep, and a 3-compartment vertical shaft from the 2000-ft. level, which is 800 ft. deep. Total development, approximately 8 miles. **Plant:** MINE: One of the most complete and modern in the State. MILL: 700-ton concentrator, including flotation. **Ore:** Lead-silver. **Men employed:** Average, 525.

REMARKS

During the year the Hecla ore body was further proven on the 2400 and the 2800-ft. levels, 400 and 800 ft. below the present working level. The long raise and the lateral development work in the Star mine greatly enlarged the known ore reserves. These increased ore reserves have assured the Hecla Co. many years of uninterrupted operations and dividend payments, as well as being instrumental in causing a big increase in the value of Hecla stock.

The par value of this stock is 25 cents per share and during the early days of the mine sold as low as 3 cents per share. After ore was first struck, the stock had a marked increase in value, although fluctuating until 1919. Since then it has been continually on the increase. On Nov. 25, 1919, the stock was selling at $3.15 per share; during 1924 it was rap-

idly rising; by March, 1926, it had reached a high of $19.25; and during 1927 it averaged $18, a remarkable record for the mine and for a stock of low value.

On July 13, 1923, the entire surface plant was destroyed by the disastrous fire which wiped out the town of Burke. Before the ruins had quit smouldering, plans for reconstruction were under way, and were completed before the wreckage was cleared up. Rebuilding rapidly progressed, and on Jan. 27, 1924, full time operations and production were resumed. During the time from the date of the fire to the resumption of operations, the usual dividends were paid without interruption. This was made possible by the $1,000,000 "Use and Occupancy" insurance with which the company had protected its operations, and which reflected greatly to the credit and foresight of the management.

The destroyed buildings were replaced with modern fireproof buildings constructed entirely of steel and concrete; a new all-steel headframe was installed; and the yards were rearranged. All construction was completed during 1925. The new plant was designed to handle the ore from the Star mine, as well as that from the Hecla, and as completed is one of the most modern in the State.

HECLA MINING CO.'S MILL

During the year work was started in sinking the main shaft to the 2800-ft. level; the mine and mill plants were enlarged and improved; and the mine was maintained in first-class condition.

The Hecla management are progressive and intelligent; they have engendered an excellent spirit of cooperation among the employees and are giving the utmost consideration to safety and welfare provisions. Under such conditions, and with the life of the mine assured for many years, the outlook for the company is exceedingly favorable.

At the old Tiger-Poorman mine, which was purchased in 1920, machinery and equipment were installed and work started on unwatering it to the 600-ft. level.

In furtherance of a policy adopted a few years ago to expand its operations, this company developed three properties in the southern part of the State throughout a large part of the year, and an active search for others worthy of development was carried on in Idaho, Nevada, Washington, and Canada.

HELVETIA MINING CO.

Office: Wallace. **Officers:** L. R. Terry, Pres., Orient, Wash.; Thos. W. Lane, Sec.-Mgr., Wallace. **Inc.:** Mar. 8, 1907. **Capital:** 1,000,000 shares; par value $1; 400,000 shares issued. **Property:** Helvetia group; 5 unpatented claims, Placer Center dist.; Wallace. **Development:** By 1 tunnel 360 ft. long. **Ore:** Lead-silver. **Remarks:** Annual labor only.

HERCULES MINING CO.

Office: Wallace. **Officers:** Harry L. Day, Pres.-Mgr.; A. P. Ramstedt, Sec., both of Wallace. **Inc.:** Dec. 31, 1923. **Capital:** 500,000 shares; par value $10; 430,180 shares issued.

HERCULES GROUP

Property: Hercules group, 38 patented claims; Columbia lode, 1 patented claim; Lelande and Placer Center dists.; Burke. **Development:** Principally by 5 tunnels: No. 1, 280 ft.; No. 2, 3350 ft.; No. 3, 3900 ft.; No. 4, 5900 ft.; No. 5, 8550 ft.; and a 4-compartment vertical shaft 1300 ft. deep, with 8 intermediate levels. Total development, approximately 18 miles. **Plant:** MINE: Special first motion, double-reel, Nordberg electric hoist, direct connected to 700-h. p. motor. One 22x16 I-R and 1 29x21 I-R compressor, both electrically driven. Electric trolley locomotive in main transportation tunnel and storage-battery locomotives in intermediate levels. Complete and modern mine equipment and shops. MILL: 600-ton concentrator, including flotation. **Ore:** Lead-silver. **Men employed:** Average, 60.

MAHER-HEARN GROUP

Property: 29 patented claims; Lelande dist.; Burke. **Development:** Through 4500-ft. tunnel of Gertie Mining Co., at the end of which is over 4000 ft. of tunnel and a 400-ft. vertical shaft. **Plant:** Electrically-driven 1000-cu.-ft. I-R compressor; air-driven hoist; trolley electric locomotive haulage; complete and modern equipment. **Ore:** Lead-silver. **Men employed:** Average, 60.

REMARKS

Because of the exhaustion of the great ore bodies in the Hercules mine, the company suspended operations at this mine in April, 1925, thus adding one more famous producer to the fate that awaits all mines.

After years of effort and self-denial by the owners in developing the mine, the ore was encountered in 1900. The magnitude of the ore body and grade of the ore electrified the mining world, and shortly thereafter the mine was on a self-sustaining basis. The first dividend was paid in 1901, and excepting periods of idleness caused by external conditions, dividends were paid without interruption up to the date of closing.

Until Dec. 31, 1923, the mine had always been operated as a partnership, which comprised practically all of the original owners. On this date the company was incorporated as a Delaware corporation.

Because the ownership was closely held, with the majority interest in the Day family, no reports were ever published; consequently the exact production and amount of dividends paid will probably never be known. However, estimates place the production record at more than $75,000,000 and dividends paid at over $18,000,000—a most remarkable record, and one that fully justified the name given to the mine in its early days, "The Bonanza Mine of the Coeur d'Alenes."

The passing of the Hercules mine does not mean the end of the Hercules Mining Co. Before the mine was closed, the company had commenced to expand, and by the time operations ceased, work had advanced sufficiently at other mines that were owned or controlled by this company to absorb the larger part of the payroll that had been maintained at the Hercules.

During 1927 this company, and those allied with it, performed a larger amount of new development and exploration work than any other company in Shoshone County. Practically all of the properties are in favorable locations, and, as the work is being intelligently directed, there

are excellent possibilities that this company will again take its place among the important dividend payers.

The principal mines and companies which this company owns or controls are: Hercules and Maher-Hearn mines; Strattons Mines Co.; Ambergris Mines Co.; Sherman Lead Co.; Honolulu Mining Co.; Humming Bird Mining Co.; Roanoke Mining Co.; Stanley Mining Co.; Happy Day Mining Co.; Western Union Mining Co.; Success Mining Co., Ltd. The following of these produced a substantial tonnage during the year: Humming Bird Mining Co.; Strattons Mines Co. at the Stratton and Panhandle mines; Sherman Lead Co.; Ambergris Mines Co. Lessees at the Success and Western Union mines produced a small amount of ore.

HIDDEN TREASURE MINING CO.

Office: Wallace. **Officers:** Frederick Burbidge, Pres.-Mgr.; A. W. Hoover, Sec., both of Wallace. **Inc.:** May 18, 1908. **Capital:** 500,000 shares; par value $10; all shares issued. **Property:** Hidden Treasure group; 4 patented claims, Lelande dist.; Burke. **Development:** Principally by 1 tunnel 2540 ft. long. **Ore:** Silver-lead-zinc.

HIGH CROPPING SILVER-LEAD MINING CO.

Office: Burke. **Officers:** Hugh Gibson, Pres.-Mgr.; J. F. Hurtubise, Sec., both of Burke. **Inc.:** Sept. 18, 1924. **Capital:** 1,500,000 shares; par value 25c; 773,000 shares issued. **Property:** High Cropping group; 7 unpatented claims, Lelande dist.; Burke. **Development:** 1 tunnel, 265 ft. long. **Ore:** Lead-silver. **Remarks:** A small amount of development work. A stock assessment of 1 mill was levied on May 16, 1927.

HIGH GRADE MINING CO.

Office: First State Bank Bldg., Kellogg. **Officers:** James McConnell, Pres.; L. L. Ruthruff, Sec., both of Kellogg. **Inc.:** Mar. 5, 1923. **Capital:** 1,500,000 shares; par value 10c; shares issued, unknown. **Property:** High Grade group; 5 unpatented claims, Big Creek, Yreka dist.; Kellogg. **Development:** By 1 tunnel 1200 ft. long. **Ore:** Lead-silver. **Remarks:** Small amount of work during the year.

HIGHLAND-SURPRISE CONSOLIDATED MINING CO.

Office: Kellogg. **Officers:** Dr. Charles R. Mowery, Pres., Wallace; George D. Lamielle, Sec., Kellogg; A. L. Dempster, Mgr., Masonia. **Inc.:** Aug. 27, 1912. **Capital:** 1,200,000 shares; par value $1; 1,191,493 shares issued. **Property:** 3 patented, 30 unpatented claims, Pine Creek, Yreka dist.; Kellogg. **Development:** Approximately 2 miles of underground workings. **Plant:** MINE: A 7-drill I-R compressor, electrically driven; complete mining equipment and camp. MILL: 150-ton concentrator. **Ore:** Lead-zinc-silver. **Men employed:** Average, 58. **Remarks:** During 1926 this company was one of the largest producing mines on Pine Creek, its zinc concentrate being shipped to Belgium for treatment. On May 1, 1927, this contract expired; after which operations were suspended, pending completion of the Sullivan electrolytic zinc plant at Kellogg.

HILARITY LEAD-SILVER MINING CO.

Office: Mullan. **Officers:** J. A. Glowe, Pres.; H. W. Ingalls, Sec.-Mgr., both of Mullan. **Inc.:** Apr. 24, 1916, as Pine Creek Mining & Milling Co.; name changed May 7, 1923. **Capital:** 2,000,000 shares; par value 10c; 1,700,000 shares issued. **Property:** 12 unpatented claims, Pine Creek, Yreka dist.; Kellogg. **Development:** Principally by 1 tunnel 500 ft. long, and a 200-ft. vertical shaft. **Ore:** Lead-zinc-silver. **Remarks:** Annual labor only. Stock assessments were levied during the year as follows: Feb. 5, 1c; May 14, 5 mills; Oct. 8, 5 mills.

HILL MINING & MILLING CO.

Office: First State Bank Bldg., Kellogg. **Officers:** Elmer Brown, Pres.-Mgr.; L. L. Ruthruff, Sec., both of Kellogg. **Inc.:** May 10, 1916. **Capital:** 1,000,000 shares; par value 2c; 431,193 shares issued. **Property:** Hill group; 2 unpatented claims, Yreka dist.; Kellogg. **Development:** By 1 tunnel 800 ft. long. **Ore:** Lead-silver. **Remarks:** Small amount of work during the summer months. A stock assessment of 2 mills was levied on June 12.

HONOLULU MINING CO., LTD.

Office: Wallace. **Officers:** J. W. Tabor, Pres., Wallace; John P. Mahoney, Sec., Spokane; Geo. W. Tabor, Asst. Sec., Wallace. **Inc.:** Apr. 4, 1906. **Capital:** 1,000,000 shares; par value $1; all shares issued. **Property:** 4 unpatented claims adjoining Hercules mine, Lelande dist.; Burke. **Development:** Principally by a 2400-ft. crosscut from the No. 4 Hercules tunnel. **Ore:** Lead-silver. **Remarks:** Actively prospected during the early part of the year by the Hercules Mining Co.

HORNSILVER MINING & MILLING CO.

Office: Wallace. **Officers:** Ben L. Collins, Pres., 312 Old National Bank Bldg., Spokane, Wash.; Russell F. Collins, Sec.-Mgr., Wallace. **Inc.:** May 31, 1901. **Capital:** 1,000,000 shares; par value 10c; 887,100 shares issued. **Property:** 5 unpatented claims. Placer Center dist.; Wallace. **Development:** 1 tunnel, 800 ft. long. **Ore:** Lead-silver-gold. **Remarks:** Annual labor only. A stock assessment of 2 mills was levied on Feb. 17, 1927.

HORSESHOE MINING CO.

Office: Mullan. **Officers:** Jas. B. Scoles, Pres.-Mgr., Mullan; N. S. Jacobs, Sec., Lewiston. **Inc.:** July 16, 1908. **Capital:** 1,500,000 shares; par value $1; 898,000 shares issued. **Property:** Horseshoe group; 9 unpatented claims, Hunter dist.; Mullan. **Development:** 2 tunnels: No. 1, 400 ft. long; No. 2, 3000 ft. long. **Ore:** Lead-silver. **Remarks:** Tunnel controlled by Atlas Mining Co.

HUMBOLT MINING CO.

Office: Wallace. **Officers:** James Mooney, Sec., Wallace. **Inc.:** An association. **Capital:** Sale of units. **Property:** 8 unpatented claims, Lelande dist.; Burke. **Development:** By 2 tunnels: No. 1, 80 ft. long; No. 2, 50 ft. long. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** A small amount of work during the year.

HUMMING BIRD MINING CO.

Office: Burke. **Officers:** Harry L. Day, Pres.-Mgr., Wallace; W. H. Hoover, Sec., Burke. **Inc.:** June 27, 1898. **Capital:** 1,500,000 shares; par value $1; 1,411,075 shares issued. **Property:** Humming Bird group; 18 patented claims, Lelande dist.; Burke. **Development:** Total development, approximately 12,400 ft. of tunnels, the principal of which are No. 4, 1253 ft. long, and No. 5, Hercules, 12,086 ft. long. **Plant:** All equipment used in operation furnished by Hercules Mining Co. **Ore:** Lead-silver. **Men employed:** Average, 21. **Remarks:** In addition to performing a large amount of development work, the company produced a substantial tonnage of ore, which was milled at the Hercules mill. All operations were suspended in June.

HYPOTHEEK MINING & MILLING CO.

Office: Wallace. **Officers:** C. D. Brock, Pres.; Otto A. Olsson, Sec.-Mgr., both of Wallace. **Inc.:** Feb. 13, 1901. **Capital:** 2,000,000 shares; par value 10c; all shares issued. **Property:** 760 acres of patented land, Yreka dist.; Kellogg. **Development:** By 2 tunnels: No. 1, 700 ft. long; No. 2, 1500 ft. long; and a vertical shaft 1100 ft. deep. Total development, approximately 10,000 ft. **Plant:** MINE: Double-drum electric hoist; No. 10 I-R compressor, electrically driven; machine shop; sawmill; and complete mining equipment; 12 buildings. MILL: 200-ton concentrator. **Ore:** Lead-silver. **Men employed:** Average, 19. **Remarks:** In addition to producing and marketing a large tonnage of crude ore and concentrate, this company unwatered its shaft from the 900 to the 1100-ft. level, performed a large amount of drifting on the 1100-ft. level, and started a raise on the vein to the 900-ft. level.

IDAHO AMERICAN MINING & MILLING CO.

Office: Kellogg. **Officers:** Lloyd McDougall, Pres.; A. E. Cowles, Sec., both of Kellogg. **Inc.:** Feb. 7, 1923. **Capital:** 100,000 shares; increased Mar. 30, 1926, to 2,000,000 shares; par value 25c; 732,700 shares issued. **Property:** O. K. group; 12 patented, 1 unpatented claim, Yreka dist.; Kellogg. **Ore:** Lead-zinc-silver. **Remarks:** Small amount of maintenance work. A stock assessment of 1c was levied on Apr. 5, 1927.

IDAHO COPPER MINING CO., LTD.
Office: Wallace. **Officers:** W. H. Herrick, Pres.; A. H. Featherstone, Sec., both of Wallace. **Inc.:** Aug. 24, 1906. **Capital:** 1,250,000 shares; par value $1; all shares issued. **Property:** 3 patented claims, Hunter dist.; Mullan. **Ore:** Copper. **Remarks:** Idle for a number of years.

IDAHO & EASTERN MINING & MILLING CO.
Office: Wallace. **Officers:** John H. Wourms, Pres.; W. A. Devan, Sec., both of Wallace. **Inc.:** Aug. 20, 1903. **Capital:** 1,000,000 shares; par value $1; 910,215 shares issued. **Property:** Idaho & Eastern group; 3 patented, 2 unpatented claims, Lelande dist.; Burke. **Development:** By 1 tunnel 86 ft. long. **Ore:** Lead-silver. **Remarks:** Tunnel advanced about 30 ft. during the year. A stock assessment of 7 mills was levied on Aug. 15, 1927.

IDAHO GALENA MINING CO.
Office: Wallace. **Officers:** A. H. Featherstone, Pres.; Herman Marquardt, Sec.; C. A. Fay, Mgr., all of Wallace. **Inc.:** July 28, 1927. **Capital:** 5,000,000 shares; par value 25c; 2,500,000 shares issued. **Property:** 9 unpatented claims, Placer Center dist.; Wallace. **Development:** By 1 tunnel 200 ft. long. **Ore:** Lead-silver. **Men employed:** Average, 4. **Remarks:** Small amount of work during the year.

IDAHO-LEADVILLE MINES CO.
Office: 823 First Ave., Spokane, Wash. **Officers:** Thomas Fahey, Pres.; E. P. Ryan, Sec., both of Spokane, Wash. **Inc.:** Apr. 1, 1914. **Capital:** 1,000,000 shares; par value 10c; 548,020 shares issued. **Property:** 12 unpatented claims, Evolution dist.; Osburn. **Development:** By 2 tunnels: No. 1, 900 ft. long; No. 2, 145 ft. long. **Ore:** Lead-silver. **Remarks:** Idle.

IDAHO & LOS ANGELES MINING & MILLING CO.
Office: Wallace. **Officers:** Thomas McCabe, Pres.; Alfred J. Dunn, Sec.-Mgr., both of Wallace. **Inc.:** June 6, 1904; charter forfeited Dec. 2, 1916. **Capital:** 1,000,000 shares; par value $1; 820,000 shares issued. **Property:** 16 patented claims, Beaver dist.; Wallace. **Development:** By 3 tunnels: No. 1, 150 ft. long; No. 2, 1700 ft. long; No. 3, 800 ft. long. **Ore:** Lead-zinc-silver. **Remarks:** Idle.

IDAHO-MONTANA AND ORLANDO CONSOLIDATED MINING CO.
Office: Wallace. **Officers:** John A. Swan, Pres.-Mgr., Burke; Hazel Swan, Sec., Detroit, Mich. **Inc.:** July 14, 1925. **Capital:** 1,500,000 shares; par value 10c; 1,037,002 shares issued. **Property:** 7 unpatented claims, Lelande dist.; Burke. **Development:** By 3 tunnels: No. 1, 80 ft. long; No. 2, 500 ft. long; No. 3, 600 ft. long. **Ore:** Lead-silver. **Remarks:** Idle.

IDAHO STAR MINING CO.
Office: 212 Eagle Bldg., Spokane, Wash. **Officers:** Hans Peterson, Pres.; R. T. Lawrence, Sec.-Mgr., both of Spokane, Wash. **Inc.:** Oct. 8, 1924. **Capital:** 1,500,000 shares; par value 10c; all shares issued. **Property:** 24 unpatented claims, St. Joe dist.; Adair. **Development:** By 1 tunnel 460 ft. long. **Plant:** Water-driven compressor. **Ore:** Lead-silver. **Remarks:** Small amount of work during the summer months.

IDORA MINING CO., LTD.
Office: Jamieson Blk., Spokane, Wash. **Officers:** James C. Broad, Pres.; C. E. Mallette, Sec.-Mgr., both of Spokane, Wash. **Inc.:** Apr. 23, 1915. **Capital:** 1,500,000 shares; par value 10c; 600,000 shares issued. **Property:** Idora group; 1 patented, 8 unpatented claims, Beaver dist.; Carbonite. **Plant:** MINE: 1 electrically-driven compressor. MILL: 100-ton concentrator. **Ore:** Lead-zinc-silver. **Remarks:** Property operated by lessees.

IMPERIAL MINING CO.
Office: Wallace. **Officers:** William Becker, Pres.; Homer G. Brown, Sec.-Mgr., both of Wallace. **Inc.:** Nov. 21, 1906. **Capital:** 1,500,000 shares; par value $1; 1,174,931 shares issued. **Property:** Imperial group; 8 patented claims, Lelande dist.; Burke. **Development:** Principally by 2 tunnels: No. 2, 1000 ft. long; No. 3, 4000 ft. long. Total development, approximately 10,000 ft. **Plant:** Electrically-driven 4-drill I-R compressor; complete mining equipment and camp. **Ore:** Lead-silver. **Remarks:** Idle throughout the year.

INDEPENDENCE LEAD MINES, LTD.
Office: Wallace. **Officers:** H. B. Kingsbury, Pres.-Mgr., Mullan; Herman Marquardt, Sec., Wallace. **Inc.:** Nov. 30, 1914, as New Independent Mining Co.; name changed Aug. 23, 1915. **Capital:** 1,500,000 shares; par value $1; all shares issued. **Property:** Gettysburg group; 10 patented claims, Hunter dist.; Mullan. **Development:** Principally by 5 tunnels: No. 1, 100 ft. long; No. 2, 300 ft. long; No. 3, 1200 ft. long; No. 4, 5800 ft. long; Independence, 300 ft. long; and a vertical raise 313 ft. long connecting No. 3 and No. 4 tunnels. **Plant:** Complete mining equipment. Power furnished by American Commander M. & M. Co. **Ore:** Lead-silver. **Men employed:** Average, 6. **Remarks:** Development work progressed without interruption throughout the year. This work consisted principally of extending No. 4 tunnel, which is the lowest level in the mine. Stock assessments were levied during 1927 as follows: Jan. 4, 2c; Sept. 6, 2c.

INLAND EMPIRE MINING & MILLING CO.
Office: 310 Ziegler Bldg., Spokane, Wash. **Officers:** A. C. Schirmer, Pres.-Mgr., Hibbing, Minn.; John H. Roche, Sec., Spokane, Wash. **Inc.:** June 18, 1910. **Capital:** 1,000,000 shares; par value $1; all shares issued. **Property:** Never Sweat; 1 patented claim, Lelande dist.; Burke. **Development:** By 2 tunnels: No. 1, 350 ft. long; No. 2, 400 ft. long; and an inclined shaft 300 ft. deep. **Plant:** Electrically-driven compressor and complete mining equipment. **Ore:** Lead-silver.

INTERNATIONAL MINES, LTD.
Office: Wallace. **Officers:** James White, Pres.; A. H. Featherstone, Sec., both of Wallace. **Inc.:** July 2, 1903. **Capital:** 1,500,000 shares; par value $1; all shares issued. **Property:** 13 patented claims, Lelande dist.; Burke. **Ore:** Lead-silver. **Remarks:** Idle for 9 years.

INTERNATIONAL MINING CO.
Office: Kellogg. **Officers:** Charles May, Pres., Minneapolis, Minn.; Fred May, Mgr., Kellogg. **Inc.:** July 8, 1912. **Capital:** 1,000,000 shares; par value $1; 600,000 shares issued. **Property:** International group; 10 unpatented claims, Pine Creek, Yreka dist.; Kellogg. **Development:** Principally by 2 tunnels: No. 1, 150 ft. long; No. 2, 1500 ft. long. **Plant:** Gas-driven 6x6 compressor; complete mining equipment and small camp. **Ore:** Lead-silver. **Remarks:** Annual labor only.

IONE MINING CO.
Office: Wallace. **Officers:** H. O. Solum, Pres.; Le Roy Massey, Sec.; O. M. Nordquist, Mgr., all of Wallace. **Inc.:** Dec. 19, 1922. **Capital:** 1,500,000 shares; par value 10c; 300,000 shares issued. **Property:** Ione group; 4 unpatented claims, held under lease and option; Summit dist.; Murray. **Development:** By 2 tunnels: No. 1, 470 ft. long; No. 2, 1386 ft. long. **Ore:** Lead-silver. **Remarks:** Annual labor only.

IRON KING MINING CO., LTD.
Office: Wallace. **Officers:** Herman J. Rossi, Pres.; Otto A. Olsson, Sec., both of Wallace. **Inc.:** Jan. 8, 1904. **Capital:** 1,000,000 shares; par value $1; all shares issued. **Property:** Iron King group; 4 unpatented claims, Evolution dist.; Wallace. **Development:** Principally by 2 tunnels: No. 1, 2000 ft. long; No. 2, 150 ft. long. **Ore:** Lead-silver. **Remarks:** Annual labor only.

IRON SPAR COPPER MINING CO.
Office: Wallace. **Officers:** Wesley Everett, Pres.; G. W. Dougherty, Sec.; A. L. Honeker, Mgr., all of Wallace. **Inc.:** May 18, 1904. **Capital:** 1,000,000 shares; par value $1; all shares issued. **Property:** 4 unpatented claims, Hunter dist.; Mullan. **Development:** By 1 tunnel 800 ft. long. **Ore:** Copper-gold-lead-silver. **Remarks:** Annual labor only.

IVANHOE MINING CO., LTD.
Office: Mullan. **Officers:** J. A. Bean, Pres., Sumdor, Ariz.; C. D. Miller, Sec., Mullan. **Inc.:** Oct. 18, 1906. **Capital:** 1,500,000 shares; par value $1; 1,494,950 shares issued. **Property:** 2 patented claims, Hunter dist.; Mullan. **Ore:** Lead-silver. **Remarks:** Idle for 8 years.

JACK WAITE MINING CO., LTD.

Office: Wallace. **Officers:** Herman J. Rossi, Pres.; R. C. Russell, Sec., both of Wallace; M. L. ROYAL MINING CO.

Office: Coeur d'Alene. **Officers:** A. H. Moe, Pres.-Mgr.; Soren Simonson, Sec., both of Coeur d'Alene. **Inc.:** Dec. 24, 1910. **Capital:** 1,500,000 shares; par value $1; 783,053 shares issued. **Property:** Royal group; 11 unpatented claims; West Fork of Slate Creek; St. Joe dist.; Avery. **Development:** Approximately 2000 ft. of workings. **Plant:** 6x6 compressor driven by a Pelton water-wheel; complete mining equipment and camp. **Ore:** Lead-silver-copper. **Remarks:** Annual labor only.

RUTH CONSOLIDATED MINING & MILLING CO.

Office: 727 Old National Bank Bldg., Spokane, Wash. **Officers:** C. M. Crego, Pres.; G. D. Crego, Sec., both of Spokane, Wash. **Inc.:** Sept. 15, 1906. **Capital:** 1,500,000 shares; par value $1; all shares issued. **Property:** Ruth group; 7 patented claims, Placer Center dist.; Wallace. **Devel-**

opment: By 2 tunnels: No. 1, 800 ft. long; No. 2, 3030 ft. long. **Plant:** Electrically-driven Laidlaw-Dunn-Gordon compressor; complete mining equipment. **Ore:** Lead-silver. **Remarks:** The lower tunnel was advanced 330 ft. under contract.

SAINT LOUIS & IDAHO MINING & MILLING CO.

Office: Wallace. **Officers:** Russell F. Collins, Pres.-Mgr.; S. B. Collins, Sec., both of Wallace. **Inc.:** June 24, 1903. **Capital:** 1,000,000 shares; par value $1; 840,251 shares issued. **Property:** Saint Louis & Idaho group; 3 unpatented claims, Lelande dist.; Burke. **Development:** By 2 tunnels: No. 1, 1000 ft. long; No. 2, 2000 ft. long. **Ore:** Lead-silver.

SAMSON MINING & DEVELOPMENT CO., LTD.

Office: Wardner. **Officers:** D. W. Raines, Pres., Spokane; R. L. Brainard, Sec., Wardner. **Inc.:** Aug. 15, 1904. **Capital:** 1,000,000 shares; par value $1; 900,000 shares issued. **Property:** Samson group; 8 unpatented claims, Eagle dist.; Prichard. **Development:** Principally by 1 tunnel 1000 ft. long. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** Small amount of work during the year. A stock assessment of 2 mills was levied on June 30, 1927.

SANDERS METALS CORPORATION

Office: 53 Park Place, New York City. **Officers:** W. Murray Sanders, Pres.-Mgr.; Mary S. Jones, Sec., both of New York City. **Inc.:** Mar. 22, 1926. **Capital:** 7000 shares; par value $50; 6030 shares issued. **Property:** Lease on property of Oasis Mining Co.; Kellogg. **Plant:** 200-ton flotation concentrator; 1¼-yd. clamshell bucket dredge. **Ore:** Lead-silver from reclaimed river-bottom tailings. **Men employed:** Average, 6. **Remarks:** Mill operated for a few days during early part of the year.

SENATOR MINING CO.

Office: Wallace. **Officers:** Rush J. White, Pres.-Mgr.; John J. Ferguson, Sec., both of Wallace. **Inc.:** May 3, 1920. **Capital:** 2,500,000 shares; par value 25c; 1,915,024 shares issued. **Property:** Senator group; 18 patented claims, Lelande dist.; Gem. **Remarks:** Under lease and bond to Coeur d'Alene Syndicate Mining Co., which see.

SHERMAN LEAD CO.

Office: Wallace. **Officers:** Jerome J. Day, Pres.; P. J. Maggy, Sec., both of Wallace. **Inc.:** Nov. 4, 1918. **Capital:** 3,500,000 shares; par value 25c; all shares issued. **Property:** Sherman group; 4 patented claims, Lelande dist.; Burke. **Development:** Total development, over 13,000 ft., consisting principally of Sherman No. 5 tunnel, 5660 ft. long; Sherman No. 6 tunnel, 2000 ft. long; and a 1000-ft. inclined raise. **Plant:** 2 electrically-driven hoists; trolley locomotive haulage and all mining equipment, furnished by Hercules Mining Co. **Ore:** Lead-silver. **Men employed:** Average, 12. **Remarks:** During the year the mine was connected with No. 5 tunnel of the Hercules mine, through the Humming Bird workings. Hoists were installed, 1000-ft. raise driven on the vein, and connections made with all of the old workings. A substantial tonnage of ore was removed in the development work and sent to the Hercules mill for treatment. Stock assessments were levied during 1927 as follows: June 20, 5 mills; Oct. 5, 5 mills; Dec. 7, 7½ mills.

SHRINE MINING CO.

Office: Kellogg. **Officers:** A. C. Beal, Pres.; Lester S. Harrison, Sec., both of Kellogg. **Inc.:** May 29, 1926. **Capital:** 2,000,000 shares; par value 5c; 1,000,000 shares issued. **Property:** 7 unpatented claims on Pine Creek, Yreka dist.; Masonia. **Development:** Principally by 1 tunnel 1200 ft. long. **Ore:** Lead-silver, antimony. **Remarks:** Property under option to Commercial Traveler Mining Co.

SIDNEY LEASING CO.

Office: Kellogg. **Officers:** J. B. Cox, Pres.; W. T. Simons, Sec., both of Kellogg. **Inc.:** Feb. 27, 1925. **Capital:** 25,000 shares; par value $1; 7215 shares issued. **Property:** Lease on property of the Sidney Mining Co. **Plant:** 4½-mile aerial tramway; 538-cu.-ft. I-R electrically-driven compressor; electrically driven hoist; Waugh drill sharpener; complete min-

ing equipment and camp. **Ore:** Lead-zinc-silver. **Men employed:** Average, 50. **Remarks:** In addition to maintaining a constant output throughout the year, a hoist was installed, a 200-ft. shaft sunk in No. 6 tunnel, a large amount of lateral development work performed, and the mine camp enlarged. During the year, this enterprise entered the lists of dividend-paying mines; much credit is due to the Bunker Hill & Sullivan M. & C. Co. for this success, as it financed the construction of the Sidney aerial tramway and gave assistance in its operation.

SIDNEY MINING CO.

Office: Kellogg. **Officers:** H. M. Ross, Pres., Seattle, Wash.; W. T. Simons, Sec., Kellogg. **Inc.:** June 20, 1910. **Capital:** 1,500,000 shares; par value $1; all shares issued. **Property:** Sidney group; 8 patented, 10 unpatented claims, Pine Creek, Yreka dist.; Kellogg. **Development:** By 6 tunnels: No. 1, 400 ft.; No. 3, 700 ft.; No. 5, 600 ft.; No. 6, 800 ft.; and a shaft 200 ft. deep. **Ore:** Lead-zinc-silver. **Remarks:** Under lease to Sidney Leasing Co., which see.

SIERRA NEVADA CONSOLIDATED MINING CO.

Office: Kellogg. **Officers:** Stanly A. Easton, Pres.-Mgr.; C. W. Simmons, Sec., both of Kellogg. **Inc.:** May 21, 1887. **Capital:** 1,000,000 shares; par value $1; all shares issued. **Property:** Sierra Nevada group; 5 patented claims, Yreka dist.; Kellogg. **Development:** Principally by 4 tunnels: No. 1, 4550 ft. long; No. 2, 275 ft. long; No. 3, 700 ft. long; No. 4, 625 ft. long. Total development, approximately 10,000 ft. **Ore:** Lead-silver. **Remarks:** Property under operation throughout the year by lessees, who produced and marketed a small tonnage of ore.

SILVER CABLE CONSOLIDATED MINING CO.

Office: 338 Peyton Bldg., Spokane, Wash. **Officers:** Morris Pearson, Pres.; L. O. Tollefson, Sec., both of Spokane, Wash. **Inc.:** Sept. 27, 1927. **Capital:** 5,000,000 shares; par value 25c; no shares issued. **Property:** Silver Cable group; 6 patented, 3 unpatented claims, Hunter dist.; Mullan. **Development:** By 3 tunnels: No. 1, 600 ft.; No. 2, 700 ft.; No. 3, 7000 ft. **Ore:** Lead-zinc-silver. **Remarks:** A small amount of work by lessees during the year.

SILVER CLIFF GOLD & COPPER MINING CO., LTD.

Office: Wallace. **Officers:** Sidney L. Shonts, Pres.; Ed. C. Young, Sec.-Mgr., both of Wallace. **Inc.:** Oct. 6, 1900. **Capital:** 1,500,000 shares; par value $1; 1,416,000 shares issued. **Property:** Silver Cliff group; 19 unpatented claims, Hunter dist.; Mullan. **Development:** Over 2 miles of underground workings. **Plant:** An old water-driven compressor. **Ore:** Copper-silver. **Men employed:** Average, 2. **Remarks:** Active throughout the year. Stock assessments were levied during 1927 as follows: Apr. 20, 1¼ mills; Sept. 26, 3 mills.

SILVER CRESCENT MINING CO.

Office: Wallace. **Officers:** A. L. Hooper, Pres., Spokane, Wash.; F. C. Bailey, Sec.-Mgr., Wallace. **Inc.:** Oct. 19, 1911, as Placer Creek Silver-Lead Mining & Milling Co.; name changed, Aug. 31, 1922. **Capital:** 1,000,000 shares; par value $1; 100,000 shares issued. **Property:** Silver Crescent group; 7 unpatented claims, on Moon Creek, Yreka dist.; Kellogg. **Development:** By 4 tunnels, with a total development of approximately 1000 ft. **Ore:** Lead-silver. **Remarks:** Under option to Washington-Idaho Mining Co.

SILVER DALE AND BIG HILL MINING CO.

Office: Kellogg. **Officers:** Carl Arenander, Pres.-Mgr.; D W. Knudson, Sec., both of Kellogg. **Inc.:** Sept. 10, 1917. **Capital:** 1,000,000 shares; par value 1c; increased Oct. 25, 1927, to 1,000,000 shares; par value 25c; 550,000 shares issued. **Property:** 21 unpatented claims, Big Creek, Yreka dist.; Kellogg. **Development:** Principally by 1 tunnel 2500 ft. long. **Plant:** Water-driven 12x12 compressor. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** Principal tunnel extended 250 ft. during the year. Stock assessments were levied during 1927 as follows: May 23, 2 mills; Oct. 31, 5 mills.

SILVER EAGLE MINING CO., LTD.

Office: Wallace. **Officers:** John J. Hogus, Pres.; C. W. Betts, Sec., both of Wallace. **Inc.:** Nov. 12, 1906. **Capital:** 1,000,000 shares; par value $1; 656,110 shares issued. **Property:** Silver Eagle group; 6 patented, 5 unpatented claims, Placer Center dist.; Wallace. **Development:** 4 tunnels: No. 1, 900 ft. long; No. 2, 400 ft. long; No. 3, 400 ft. long; No. 4, 300 ft. long. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** Principal tunnel extended 100 ft. during the year.

SILVER MOON MINING CO., LTD.

Office: Palmerston Hotel, Spokane, Wash. **Officers:** H. C. Lambach, Pres.; Gus Ehrenberg, Sec., both of Spokane, Wash. **Inc.:** Aug. 31, 1906. **Capital:** 1,500,000 shares; par value $1; 774,390 shares issued. **Property:** Silver Moon group; 9 unpatented claims, Leland dist.; Gem. **Development:** Principally by 1 tunnel 2850 ft. long. **Plant:** Electrically-driven 200-cu.-ft. compressor; complete mining equipment. **Ore:** Lead-silver. **Remarks:** Annual labor only.

SILVER REEF MINING CO.

Office: P. O. Box 558, Spokane, Wash. **Officers:** W. J. Buhler, Pres., Port Townsend, Wash.; Harry C. Buhler, Sec.-Mgr., Spokane, Wash. **Inc.:** Apr. 6, 1920. **Capital:** 1,500,000 shares; par value 10c; 1,200,000 shares issued. **Property:** 1 patented, 4 unpatented claims, Hunter dist.; Mullan. **Development:** By 2 tunnels: No. 1, 1500 ft. long; No. 2, 2000 ft. long. **Plant:** Electrically-driven compressor; complete mining equipment. **Ore:** Lead-silver. **Remarks:** Annual labor only, funds for which were derived from stock assessments.

SILVER STANDARD MINING CO.

Office: E. 604 Heroy Ave., Spokane, Wash. **Officers:** S. L. Shaw, Pres.; Mrs. C. M. Shaw, Sec., both of Spokane. **Inc.:** Unknown; never filed in Idaho. **Capital:** 2,000,000 shares; par value 25c; 262,240 shares issued. **Property:** 11 unpatented claims, Evolution dist.; Osburn. **Development:** By 2 tunnels: No. 1, 411 ft. long; No. 2, 560 ft. long. **Plant:** Water-driven Sullivan compressor. **Ore:** Lead-silver. **Remarks:** Annual labor only.

SILVER SUMMIT MINING CO.

Office: Wallace. **Officers:** Harry P. Pearson, Pres.-Mgr., Wallace. **Inc.:** Mar. 7, 1927. **Capital:** 1,500,000 shares; par value $1; shares issued, unknown. **Property:** Coeur d'Alene-Jumbo group; 21 unpatented claims, Evolution dist.; Osburn. **Development:** Over 1500 ft. of underground workings. **Ore:** Lead-silver. **Men employed:** Average, 3. **Remarks:** Work on a new tunnel was started and continued without interruption.

SISTER MINING & MILLING CO., LTD.

Office: 1160 Winston Ave., San Marino, Calif. **Officers:** Frank P. Markwell, Pres., Los Angeles, Calif.; Everett H. Pattison, Sec., San Marino, Calif. **Inc.:** Dec. 12, 1899. **Capital:** 1,500,000 shares; par value 10c; all shares issued. **Property:** Sister group; 7 patented claims, Placer Center dist.; Wallace. **Development:** By 4 tunnels: No. 1, 108 ft.; No. 2, 1069 ft.; No. 3, 2500 ft.; No. 4, 209 ft.; a 210-ft. raise, and a 264-ft. vertical shaft. **Ore:** Lead-zinc-silver. **Remarks:** Under lease to Sisters Leasing Co.

SISTERS LEASING CO.

Office: Wallace. **Officers:** Dan Murphy, Pres.; A. G. Kennedy, Sec., both of Wallace. **Inc.:** Feb. 16, 1920. **Capital:** 10,000 shares; par value $1; no shares issued. **Property:** Lease on property of Sister Mining & Milling Co., Ltd. **Remarks:** In addition to driving No. 4 tunnel, the company produced and shipped a small tonnage of ore during the year.

SLAVONIAN MINING CO.

Office: Wallace. **Officers:** Risto V. Kojovich, Pres.-Mgr., Wardner; G. W. Dougherty, Sec., Wallace. **Inc.:** Nov. 26, 1910. **Capital:** 1,500,000 shares; par value $1; all shares issued. **Property:** 4 unpatented claims, Yreka dist.; Wardner. **Development:** Principally by 1 tunnel 1100 ft. long. **Ore:** Lead-silver. **Remarks:** A small amount of development work during the year with a power connection from the Last Chance compressor of the Bunker Hill & Sullivan M. & C. Co.

SMUGGLER CONSOLIDATED MINING CO.
Office: 8 Germond Bldg., Spokane, Wash. **Officers:** D. Holman, Pres.; J. A. Reubens, Sec., both of Spokane. **Inc.:** June 29, 1927. **Capital:** 1,000,000 shares; par value 10c; 639,500 shares issued. **Property:** Smuggler group; 4 patented claims, Lelande dist.; Burke. **Ore:** Lead-silver. **Remarks:** A reorganization of the Smuggler-Virginia Mining Co. A stock assessment of 5 mills was levied on Aug. 11, 1927.

SNOWSHOE MINING CO.
Office: Wallace. **Officers:** Walter H. Hanson, Pres.; Herman Marquardt, Sec., both of Wallace. **Inc.:** Sept. 30, 1903. **Capital:** 2,000,000 shares; par value $1; 260,000 shares issued. **Property:** Snowshoe; 8 patented claims, Hunter dist.; Mullan. **Development:** Approximately 4000 ft. of workings, the principal of which are No. 2 tunnel, 3000 ft. long, and No. 1 tunnel, 900 ft. long. **Plant:** Electrically-driven 3-drill compressor. **Ore:** Copper-silver. **Remarks:** Idle. A stock assessment of 1c was levied on May 2, 1927.

SNOW STORM LEASING CO.
Office: Wallace. **Officers:** Wm. Ziegler, Pres., Mullan; W. J. Stratton, Sec., Wallace. **Inc.:** Feb. 19, 1925; charter forfeited Dec. 1, 1925. **Capital:** 50,000 shares; par value $1; all shares issued. **Property:** Lease on property of Snow Storm Silver Lead Co. **Remarks:** Sub-leased to Oregon-Idaho C. & M. Co.

SPOKANE TUNNEL MINING CO.
Office: Wallace. **Officers:** John I. Johnson, Pres.-Mgr.; Otto A. Olsson, Sec., both of Wallace. **Inc.:** Oct. 29, 1906. **Capital:** 1,500,000 shares; par value $1; all shares issued. **Property:** 3 unpatented claims, Placer Center dist.; Wallace. **Development:** Approximately 1200 ft. of workings. **Ore:** Lead-silver. **Remarks:** Annual labor only.

SQUARE DEAL MINING & MILLING CO., LTD.
Office: Wallace. **Officers:** A. J. Dunn, Pres.-Mgr.; M. K. Howes, Sec., both of Wallace. **Inc.:** Oct. 29, 1906. **Capital:** 1,000,000 shares; par value $1; all shares issued. **Property:** Square Deal group; 9 unpatented claims, Hunter dist.; Wallace. **Development:** By 3 tunnels: No. 1, 150 ft.; No. 2, 600 ft.; No. 3, 800 ft. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** A small amount of work during the year. A stock assessment of 1½ mills was levied on May 6, 1927.

STANLEY MINING CO.
Office: Wallace. **Officers:** John H. Wourms, Pres., Wallace. **Inc.:** Apr. 16, 1926. **Capital:** 1,500,000 shares; par value 10c; all shares issued. **Property:** Stanley group; 13 patented, 2 unpatented claims, Lelande dist.; Burke. **Development:** By 3 tunnels: No. 1, 290 ft. long; No. 2, 950 ft. long; No. 3, 1630 ft. long. **Ore:** Antimony-gold. **Remarks:** A reorganization of the Stanley Consolidated Mining & Milling Co. Annual labor on unpatented claims. A stock assessment of 4 mills was levied on Feb. 26, 1927.

STAR MINING CO.
Office: 504 Empire State Bldg., Spokane, Wash. **Officers:** W. J. C. Wakefield, Pres.; Charles Hussey, Sec., both of Spokane, Wash.; James F. McCarthy, Mgr., Wallace. **Inc.:** Sept. 17, 1900. **Capital:** 1,000,000 shares; par value $1; all shares issued. **Property:** Star; 15 patented claims, Hunter dist.; Mullan. **Ore:** Silver-lead-zinc. **Remarks:** Property sold to Sullivan Mining Co. This company is being held together for the purpose of distributing the funds received from the sale.

STERLING MINING CO., LTD.
Office: Wallace. **Officers:** Mrs. Winnefred Presley, Pres.; J. Clarence Presley, Sec.-Mgr., both of Wallace. **Inc.:** Feb. 21, 1903. **Capital:** 1,500,000 shares; par value $1; 970,000 shares issued. **Property:** 13 unpatented claims, Evolution dist.; Wallace. **Development:** 1 tunnel, 600 ft. long. **Ore:** Lead-silver. **Remarks:** Annual labor only.

STERLING SILVER MOUNTAIN MINING CO., LTD.

Office: 323 Lindelle Blk., Spokane, Wash. **Officers:** R. L. Brainard, Pres., Wardner; Matt Baumgartner, Sec.-Mgr., Spokane, Wash. **Inc.:** Oct. 22, 1919. **Capital:** 2,000,000 shares; par value 5c; 1,537,500 shares issued. **Property:** 17 unpatented claims, Big Creek, Evolution dist.; Kellogg. **Development:** Principally by 1 tunnel, 1500 ft. long. **Plant:** 5x5 1-R gas-driven compressor. **Ore:** Lead-silver. **Men employed:** Average, 3. **Remarks:** Principal tunnel extended 200 ft. during the year, the funds for which were derived from stock assessments.

STRATTONS MINES CO.

Office: Wallace. **Officers:** F. M. Rothrock, Pres., Spokane; John E. Ryan, Sec., Wallace. **Inc.:** Nov. 30, 1923. **Capital:** 2,000,000 shares; par value 10c; 1,682,050 shares issued. **Property:** Stratton, Panhandle, and Monarch-Bonanza groups; 17 patented, 28 unpatented claims, Placer Center dist.; Wallace. **Development:** Stratton group: Principally by 1 tunnel 1450 ft. long, in which is an inclined shaft 326 ft. long, with 3 intermediate levels, which opens the vein to a vertical depth of 286 ft. Panhandle group: Principally by 1 tunnel 1562 ft. long, and an inclined shaft 288 ft. long, with 3 intermediate levels, which opens the vein to a vertical depth of 253 ft. Total development in both groups, over 9000 ft. **Plant:** Stratton group: Electrically-driven hoist, hand mining equipment. Panhandle group: Electrically-driven hoist and compressor; complete mining equipment. **Ore:** Lead-silver. **Men employed:** Average, 55. **Remarks:** This company conducted an active development campaign at the Stratton and Panhandle groups throughout the year. Many improvements were made in the mines, the plants were enlarged, and a substantial tonnage of ore was produced and marketed from each group.

SUCCESS MINING CO., LTD.

Office: Wallace. **Officers:** Dan P. Mahoney, Pres., Perma, Mont.; H. H. Miller, Sec., Wallace. **Inc.:** April 7, 1905. **Capital:** 1,500,000 shares; par value $1; all shares issued. **Property:** Success group; 8 patented claims, Placer Center dist.; Wallace. **Development:** Principally by 3 tunnels: No. 1, 1320 ft. long; No. 2, 4585 ft. long; No. 3, 3360 ft. long; and a vertical shaft 1070 ft. deep, with 8 intermediate levels; total development, approximately 25,700 ft. **Plant:** MINE: Electrically-driven double-drum hoist; 2 electrically-driven compressors; complete mining equipment. MILL: 300-ton concentrator, including flotation and magnetic separation. **Ore:** Lead-zinc-silver. **Remarks:** In July, 1926, all operations were suspended, underground equipment was removed, and part of the mining and milling equipment was disposed of. During 1927 a few lessees extracted a small tonnage of ore.

SULLIVAN MINING CO.

Office: Kellogg. **Officers:** Stanly A. Easton, Pres.; C. W. Simmons, Sec., both of Kellogg. **Inc.:** May 22, 1917. **Capital:** 500,000 shares; par value $3; 37,448 shares issued. **Property:** Star group; 22 patented claims, Hunter and Lelande dists.; Burke. **Development:** By a crosscut tunnel known as "Star crosscut," over 4000 ft. of drifting on vein, and a 1500-ft. vertical raise. The Star crosscut is on the 2000-ft. level of the Hecla mine and it is 8900 ft. long. **Plant:** MINE: All mine equipment furnished by Hecla Mining Co. MILL: All ore is milled by Bunker Hill & Sullivan M. & C. Co. in its South mill at Kellogg. ELECTROLYTIC ZINC PLANT: See pages 33-38. **Ore:** Lead-zinc-silver. **Men employed:** Average, 66 at mine and 83 at zinc plant.

REMARKS

In 1916 the Bunker Hill & Sullivan M. & C. Co. secured an option on the Star mine from the Star Mining Co.; as the most feasible method of opening this mine was through the Hecla mine, the Hecla Mining Co. was offered and accepted a 50 per cent interest in the option.

The Sullivan Mining Co. was then formed to take over the Star option and to operate the mine. After litigation to perfect title to the Star vein system was settled in favor of the Star Mining Co., the Star crosscut was

started and continued without interruption, excepting the time lost from July 13, 1923, to March 1, 1924, as a result of the Burke fire.

On November 13, 1925, the Star ore body was encountered at a point 1650 ft. west of the east end-line, and at a depth of 4000 ft. below the apex of the vein. After encountering the ore body development work continued, and during 1925 it was opened the entire distance of 1650 ft. and a connection was made with the 2250 level of the Morning mine of the Federal Mining & Smelting Co. On account of the great depth of the Star crosscut, the development work necessary to open the mine for the extraction of ore involved a large amount of drifting and raising. This work progressed throughout 1927 and the principal raise was extended a distance of 1500 ft., at which point a connection was made with No. 6 tunnel-level of the Morning mine. The most important new construction work in the State during the year was the electrolytic zinc plant which this company is constructing at Kellogg.

In addition to construction work and mine development, a large tonnage of ore was produced during the months of January, February, and March, the zinc concentrate being shipped to Belgium. As the Belgian contract was terminated in April, production was then suspended until completion of the zinc plant.

The Star crosscut is 4000 ft. below the apex and about 70 ft. below the 2250 level of the Morning mine; the Morning vein has been proved to the 3050-ft. level, and as the Morning and Star veins are conceded to be the same, it is evident that the Star mine contains an ore body of tremendous size. An authorized statement made during 1926 was to the effect that: "At the present capacity (475 tons per day) there is sufficient proven ore in the Star mine to assure it a life of 50 years."

SUNSET MINING CO.

Office: 781 Corbett St., Portland, Ore. **Officers:** A. H. Ruedy, Pres., Oakland, Calif.; E. G. Ruedy, Sec., Portland, Ore. **Inc.:** Mar. 3, 1926. **Capital:** 500,000 shares; par value $1; 352,403 shares issued. **Property:** 10 patented, 1 unpatented claim, Placer Center and Beaver dists.; Wallace. **Development:** By 2 tunnels: No. 1, 810 ft. long; No. 2, 220 ft. long. **Plant:** 10x10 electrically-driven compressor. **Ore:** Lead-zinc-silver. **Remarks:** Annual labor only.

SUNSHINE MINING CO.

Office: Yakima, Wash. **Officers:** John Sawbridge, Pres.; F. H. Church, Sec., both of Yakima, Wash.; C. C. Samuels, Mgr., Kellogg. **Inc.:** Jan. 3, 1921. **Capital:** 1,500,000 shares; par value 10c; 1,490,793 shares issued. **Property:** Yankee group; 5 patented, 15 unpatented claims, Yreka dist.; Kellogg. **Development:** Principal development by 5 tunnels: No. 1, 100 ft. long; No. 2, 170 ft. long; No. 3, 800 ft. long; No. 4, 1000 ft. long; No. 5, 3000 ft. long; 1 vertical shaft 500 ft. deep, located in No. 5 tunnel; and 1 inclined shaft 250 ft. long, in No. 5 shaft-level. **Plant:** MINE: 2 I-R compressors, 1 Burry compressor, 2 hoists, all electrically driven; complete mining equipment, buildings, and camp. MILL: 100-ton concentrator, including fine grinding and flotation. **Ore:** Lead-silver. **Men employed:** Average, 113.

REMARKS

During the year, the company entered the list of dividend-paying mines of Shoshone County. The mine and mill plants were enlarged and improved; a 250-ft. inclined winze was sunk from the 500-ft. level in the mine, new hoisting machinery installed on the winze, and a large amount of development work performed on various levels. The development work greatly increased the known ore reserves.

The developing of the Sunshine into a dividend-paying mine is of vast importance to the "south side" section of the Coeur d'Alene district in which it is located. This section has always been frowned upon and considered as unlikely for ore bodies of commercial importance, but this mine has upset all of the theories, and as a result much new development work in this section was started and carried on with much vigor throughout the year.

SUNSHINE MINING CO., LTD.
Office: Wallace. **Officers:** D. C. Smith, Pres., Missoula, Mont.; H. J. Hull, Sec., Wallace. **Inc.:** Jan. 5, 1907. **Capital:** 2,700,000 shares; par value $1; 1,395,129 shares issued. **Property:** Sunshine group; 4 patented, 14 unpatented claims, Beaver dist.; Wallace. **Development:** Over 6000 ft. of underground workings. **Plant:** Electrically-driven I-R 5-drill compressor; complete mining equipment and camp. **Ore:** Lead-zinc-silver. **Remarks:** Annual labor only.

SYNDICATE MINING & EXPLORATION CO., LTD.
Office: Kellogg. **Officers:** Ed. Lagerstrom, Pres.; J. L. Moore, Sec., both of Kellogg. **Inc.:** June 24, 1907. **Capital:** 1,500,000 shares; par value 25c; 742,526 shares issued. **Property:** 7 unpatented claims, Yreka dist.; Kellogg. **Development:** Principally by 1 tunnel, 1800 ft. long. **Ore:** Lead-silver. **Remarks:** Principal tunnel was extended 300 ft. during the year. Stock assessments were levied during 1927 as follows: May 2, 1 mill; Sept. 6, 1 mill.

TAMARACK & CUSTER CONSOLIDATED MINING CO.
Office: Wallace. **Officers:** Jerome J. Day, Pres.-Mgr.; Harry L. Day, Sec., both of Wallace. **Inc.:** Aug. 6, 1912. **Capital:** 5,000,000 shares; par value $1; all shares issued. **Property:** Tamarack & Custer; 56 patented, 2 unpatented claims, Lelande and Placer Center dists.; Gem. **Development:** The three principal tunnels are: No. 5, 10,958 ft. long; No. 6, 7386 ft. long; and No. 7, 9753 ft. long. The principal shaft is a 3-compartment, vertical shaft, 600 ft. deep; and a 3-compartment raise 800 ft. long connecting No. 6 and No. 7 tunnels. Total development, approximately **12** miles. **Plant:** MINE: 100-h. p. electrically-driven hoist; 3 1300-cu.-ft. electrically-driven compressors; storage battery haulage on intermediate levels and trolley locomotive haulage on main levels. Complete mining equipment. Modern and complete machine shop. Modern hotel, change houses, and camp. MILL: 500-ton concentrator, including flotation. **Ore:** Lead-silver-zinc. **Men employed:** Average, 334. **Remarks:** The property owned by this company is one of the substantial mines of the Coeur d'Alene district and is completely equipped with modern and up-to-date mine and mill plants. During 1922 a right-of-way through No. 6 tunnel of the Mace group, commonly known as the Mammoth tunnel, owned by the Federal Mining & Smelting Co., was acquired and the tunnel renamed Tamarack No. 7. Electric haulage, a new compressor, and complete mining equipment were installed, the tunnel was extended to the Tamarack and Custer veins, and an 800-ft. raise was driven to connect this tunnel with No. 6. During 1927 over 1½ miles of development work was done and capacity production maintained. This work resulted in opening up a large, previously unknown ore body on the No. 4 shaft-level which was later opened on adjacent levels. The extent and grade of this new ore, as opened up at the close of the year, indicated that many years had been added to the life of the mine.

TEDDY MINING & MILLING CO., LTD.
Office: Kellogg. **Officers:** T. R. Mason, Pres.; S. M. Marchesi, Sec., both of Kellogg. **Inc.:** Dec. 1, 1904. **Capital:** 1,000,000 shares; par value $1; 770,000 shares issued. **Property:** Teddy group; 9 unpatented claims, Yreka dist.; Kellogg. **Development:** Over 1800 ft. of tunnels, the principal one of which is approximately 800 ft. long. **Ore:** Lead-zinc-silver. **Remarks:** Small amount of work by lessees. A stock assessment of 2 mills was levied on Feb. 18, 1927.

TIBERIUS MINING CO.
Office: 205 Zeigler Blk., Spokane, Wash. **Officers:** S. H. Knepper, Pres., Moscow; M. L. Lewis, Sec., Spokane, Wash. **Inc.:** Mar. 9, 1916. **Capital:** 1,000,000 shares; par value 10c; 611,450 shares issued. **Property:** 40 acres of patented land on Pine Creek, Yreka dist.; Kellogg. **Ore:** Lead-zinc-silver.

TRADE DOLLAR MINING CO., LTD.
Office: 1160 Winston Ave., San Marino, Calif. **Officers:** Morton Webster, Pres., Wallace; Everett H. Pattison, Sec., San Marino, Calif. **Inc.:** Oct. 18, 1901. **Capital:** 1,000,000 shares; par value 10c; all shares issued. **Property:** Trade Dollar group; 6 patented claims, Lelande dist.; Burke. **Remarks:** Idle throughout the year.

TREASURE VAULT MINING CO., LTD.
Office: Wallace. **Officers:** P. J. Maggy, Pres.; W. A. Devan, Sec., both of Wallace. **Inc.:** Oct. 29, 1906. **Capital:** 1,000,000 shares; par value $1; all shares issued. **Property:** Treasure Vault group; 4 patented claims, Placer Center dist.; Sunset. **Ore:** Lead-silver. **Remarks:** Idle. A stock assessment of 1 mill was levied on June 22, 1927.

TUCKER MINING & MILLING CO.
Office: Wallace. **Officers:** Peter Bahn, Pres.-Mgr.; W. R. Turner, Sec., both of Wallace. **Inc.:** Mar. 30, 1907. **Capital:** 1,000,000 shares; par value $1; all shares issued. **Property:** Tucker group; 6 unpatented claims, Hunter dist.; Mullan. **Development:** Principally by 1 tunnel which is 1300 ft. long. **Ore:** Lead-silver. **Remarks:** Annual labor only.

UNITED METALS CO.
Office: Wallace. **Officers:** M. W. Neary, Pres.-Mgr., San Francisco, Calif.; A. G. Kennedy, Sec., Wallace. **Inc.:** Sept. 2, 1924. **Capital:** 2,000,000 shares; par value 50c; 1,441,146 shares issued. **Property:** 61% of stock of Black Bear Mines Co.; property of Western Pacific Mining Co., Goodenough Mining Co., and Bell Mining Co. held under 50-yr. lease. 36 patented, 14 unpatented claims, Lelande and Hunter dists.; Wallace. **Development:** Principally by 2 tunnels: No. 1, 800 ft. long; No. 2, or Black Bear, 4000 ft. long. **Plant:** Electrically-driven 3-drill compressor; complete mining equipment. **Ore:** Lead-zinc-silver. **Men employed:** Average, 6. **Remarks:** Active development work until October, at which time operations were temporarily suspended.

VENDETTA CHIEF MINING CO.
Office: Murray. **Officers:** John Lillie, Pres.; E. W. Lutjens, Mgr., both of Murray. **Inc.:** Mar. 13, 1924. **Capital:** 1,000,000 shares; par value 10c; 30 shares issued. **Property:** 3 unpatented claims, Summit dist.; Murray. **Development:** 2 tunnels: No. 1, 300 ft. long; No. 2, 275 ft. long. **Ore:** Lead-silver-gold. **Men employed:** Average, 2. **Remarks:** Annual labor.

VIENNA-INTERNATIONAL MINING & MILLING CO., LTD.
Office: Wallace. **Officers:** A. H. Featherstone, Pres.; R. A. Marshall, Sec., both of Wallace. **Inc.:** Sept. 10, 1906. **Capital:** 1,500,000 shares; par value $1; all shares issued. **Property:** Vienna International; 4 patented claims, Placer Center dist.; Wallace. **Development:** Approximately 1300 ft. of tunnels. **Ore:** Lead-silver. **Remarks:** Idle for several years.

VINDICATOR MINING CO.
Office: 2122 Dwight Way, Berkeley, Calif. **Officers:** Kathryn Powers, Pres.; Grace Powers, Sec., both of Berkeley, Calif. **Inc.:** June 9, 1902. **Capital:** 1,000,000 shares; par value 10c; all shares issued. **Property:** 5 unpatented claims, Hunter dist.; Mullan. **Development:** By 1 tunnel 1100 ft. long. **Remarks:** Annual labor only.

WALL STREET MINING CO.
Office: Mullan. **Officers:** C. A. Pooley, Pres.-Mgr., Mullan; C. Fred Kratzer, Sec., 519 Waverly Place, Spokane, Wash. **Inc.:** Apr. 20, 1907. **Capital:** 1,250,000 shares; par value $1; 1,240,000 shares issued. **Property:** 17 unpatented claims, Hunter dist.; Mullan. **Development:** Principally by 3 tunnels, the longest of which is 1400 ft. **Plant:** Electrically-driven compressor; complete mining equipment. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** Small amount of work during the year.

WASHINGTON-IDAHO MINING CO.
Office: c/o Federal Land Bank, Spokane, Wash. **Officers:** Dr. Jas. Murray, Pres., Hayden Lake; A. B. Thomson, Sec.; Thos. Murray, Mgr., both of Spokane, Wash. **Inc.:** Oct. 21, 1927. **Capital:** 2,500,000 shares; par value 10c; 1,000,000 shares issued. **Property:** Crescent group; 15 unpat-

ented claims, held under lease and option from the Silver Crescent Mining Co. and the Crescent Mining & Milling Co.; Moon Creek, Yreka dist.; Kellogg. **Ore:** Lead-zinc-silver. **Remarks:** A new organization.

WASHINGTON MINING CO.

Office: Burke. **Officers:** John B. Finley, Pres., Mullan; R. W. Campbell, Sec., Burke. **Inc.:** Jan. 14, 1911. **Capital:** 1,500,000 shares; par value $1; 822,840 shares issued. **Property:** Washington group; 6 unpatented claims, Lelande dist.; Burke. **Development:** By 2 tunnels: No. 1, 300 ft. long; No. 2, 928 ft. long. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** A small amount of work by contract. A stock assessment of 2 mills was levied on Mar. 28, 1927.

WEST BELL MINING CO., LTD.

Office: Wallace. **Officers:** Oscar J. Nordquist, Pres.; Otto A. Olsson, Sec., both of Wallace. **Inc.:** May 8, 1899. **Capital:** 1,000,000 shares; par value 5c; all shares issued. **Property:** West Bell group; 5 patented, 4 unpatented claims, Lelande dist.; Black Bear. **Development:** 1 tunnel, 2300 ft. long. **Ore:** Lead-silver. **Men employed:** Average, 1. **Remarks:** Active throughout the year.

WEST GEM MINING CO.

Office: 1160 Winston Ave., San Marino, Calif. **Officers:** J. Fred Markwell, Pres., Fresno, Calif.; E. H. Pattison, Sec., San Marino, Calif. **Inc.:** Feb. 1, 1912. Charter forfeited Nov. 30, 1927. **Capital:** 1,000,000 shares; par value $1; all shares issued. **Property:** 1 patented claim, Lelande dist.; Wallace.

WEST HECLA MINING CO.

Office: Spokane, Wash., Box 1620. **Officers:** Dr. T. A. Russell, Pres.; J. V. Pohlman, Sec., both of Spokane, Wash. **Inc.:** Feb. 18, 1907. **Capital:** 1,500,000 shares; par value $1; 1,450,000 shares issued. **Property:** 3 patented claims, Lelande dist.; Burke. **Development:** Principally by 1 tunnel 1650 ft. long. **Ore:** Lead-silver.

WEST HUNTER MINING CO., LTD.

Office: Wallace. **Officers:** T. B. Cosgrove, Pres.-Mgr., Mullan; Herman Marquardt, Sec., Wallace. **Inc.:** July 29, 1915. **Capital:** 1,500,000 shares; par value 10c; all shares issued. **Property:** 1 patented, 12 unpatented claims, Hunter dist.; Mullan. **Development:** About 2700 ft. of tunnels. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** A small amount of work during a period of 4 months. This consisted principally of extending the principal tunnel on the west side of Mill Creek. A stock assessment of 5 mills was levied on Oct. 13, 1927.

WEST MAMMOTH MINING CO.

Office: Symons Bldg., Spokane, Wash. **Officers:** H. C. Lambach, Pres.; A. A. Booth, Sec., both of Spokane. **Inc.:** July 30, 1926. **Capital:** 1,500,000 shares; par value 25c; 1,132,000 shares issued. **Property:** Lease and option on property owned by Headlight Mining Co., Ltd., and Big Divide Mining Co., Ltd. **Development:** By 2 tunnels: Headlight, 1300 ft. long; Silvermoon, 2190 ft. long. **Plant:** Electrically-driven compressor; complete mining equipment. **Ore:** Lead-silver. **Men employed:** Average, 6. **Remarks:** Active development work throughout the year in Headlight tunnel.

WESTERN PACIFIC MINING CO.

Office: Wallace. **Officers:** J. Fred Markwell, Sec., Fresno, Calif. **Inc.:** Apr. 6, 1922. **Capital:** 2,500,000 shares; par value 10c; all shares issued. **Property:** 10 patented, 2 unpatented claims, Lelande dist.; Burke. Under option to United Metals Co.

WESTERN UNION MINING CO.

Office: Wallace. **Officers:** Harry L. Day, Pres.-Mgr.; W. B. Heitfield, Sec., both of Wallace. **Inc.:** Jan. 27, 1916. **Capital:** 2,000,000 shares; par value 10c; 1,997,656 shares issued. **Property:** Western Union group; 11 patented, 19 unpatented claims, Evolution dist.; Wallace. **Development:** Principally by 4 tunnels: No. 3, 3000 ft. long, and No. 4, 7000 ft. long; and a vertical shaft 477 ft. deep, with 4 intermediate levels. Total development, approximately 18,000 ft. **Plant:** I-R and Gardner-Ricks elec-

trically-driven compressors; air-driven hoist; complete mining equipment and camp. **Ore:** Lead-silver. **Remarks:** Mine operated throughout the year by lessees, who produced a small tonnage of ore. Press reports indicated that an important disclosure of new ore was made during the year.

WILBUR MINING CO., LTD.

Office: Wallace. **Officers:** A. T. Jenkins, Pres.; H. H. Miller, Sec., both of Wallace. **Inc.:** Nov. 24, 1906. **Capital:** 2,000,000 shares; par value 25c; 1,300,000 shares issued. **Property:** Wilbur group; 19 unpatented claims, Evolution dist.; Wallace. **Development:** Developed through No. 4 Western Union tunnel. **Ore:** Lead-silver. **Remarks:** Control of this company is held by the Western Union Mining Co. Annual labor only. A stock assessment of 5 mills was levied Feb. 19, 1927.

WILCOX LEASING CO.

Office: Wallace. **Officers:** Dr. R. B. Lundy, Pres.-Mgr.; Herman Marquardt, Sec., both of Wallace. **Inc.:** Mar. 25, 1924. **Capital:** 500,000 shares; par value 10c.

WILLOW CREEK MINING CO.

Office: 303 Hyde Blk., Spokane, Wash. **Officers:** Andrew Hedin, Pres.-Mgr.; John E. Hoppe, Sec., both of Spokane, Wash. **Inc.:** Jan. 25, 1924. **Capital:** 1,500,000 shares; par value 5c; 962,500 shares issued. **Property:** 12 unpatented claims, Hunter dist.; Mullan. **Development:** Principal tunnel 1650 ft. long. **Plant:** A gas-driven compressor and complete mining equipment. **Ore:** Silver-lead. **Men employed:** Average, 2. **Remarks:** A small amount of work during the year, the money for which was derived from stock assessments.

WILSON LEASING CO.

Office: Kellogg. **Officers:** O. L. Wilson, Pres.; Elmer E. Johnston, Sec.; L. D. Wick, Mgr., all of Kellogg. **Inc.:** Sept. 6, 1927. **Capital:** 250,000 shares; par value 10c; 15 shares issued.

WISCONSIN MINING CO.

Office: Kellogg. **Officers:** Louis Bolduc, Pres.-Mgr.; L. L. Ruthruff, Sec., both of Kellogg. **Inc.:** Mar. 13, 1913. **Capital:** 1,500,000 shares; par value $1; 490,975 shares issued. **Property:** Wisconsin group; 5 unpatented claims, Yreka dist.; Kellogg. **Development:** 1 tunnel 500 ft. long and a vertical shaft 100 ft. deep. **Plant:** Water-driven compressor; hoist; and complete mining equipment. **Ore:** Lead-silver. **Remarks:** Annual labor only.

WOLVERINE MINING CO., LTD.

Office: McConnell Hotel, Kellogg. **Officers:** P. C. Harrington, Pres.-Mgr., 502 W. 6th St., Spokane, Wash.; Faune Harrington, Sec., R. F. D. No. 1, Dishman, Wash. **Inc.:** Aug. 4, 1909. **Capital:** 1,250,000 shares; par value $1; 900,000 shares issued. **Property:** Wolverine group; 6 unpatented claims, Big Creek, Yreka dist.; Kellogg. **Development:** By 3 tunnels: No. 1, 350 ft. long; No. 2, 315 ft. long; No. 3, 60 ft. long; and a vertical shaft 200 ft. deep. **Plant:** Electrically-driven Sullivan compressor; hoist, and complete mining equipment. **Ore:** Lead-silver. **Men employed:** Average, 4. **Remarks:** Hoist and compressor installed, and a large amount of drifting on the 200-ft. level of the shaft performed during the year.

WONDERFUL MINING CO., LTD.

Office: Wallace. **Officers:** W. H. Holden, Pres., Coeur d'Alene; A. H. Featherstone, Sec., Wallace. **Inc.:** Oct. 15, 1906. **Capital:** 1,500,000 shares; par value $1; all shares issued. **Property:** Wonderful group; 4 patented claims, St. Joe dist.; Mullan. **Remarks:** Idle for a number of years.

WYOMING MINING & MILLING CO., LTD.

Office: Wallace. **Officers:** Alfred Page, Pres., Spokane, Wash.; A. W. Hoover, Sec.; Frederick Burbidge, Mgr., both of Wallace. **Inc.:** May 3, 1901. **Capital:** 1,000,000 shares; par value 10c; 935,554 shares issued. **Property:** Wyoming group; 11 patented claims, Yreka dist.; Kellogg. **Development:** Principally by 2 tunnels: Ranger, 2150 ft. long; Wyoming, 500 ft. long. Total development, approximately 5400 ft. **Ore:** Lead-zinc-silver. **Remarks:** A small tonnage of ore was produced during the year by lessees.

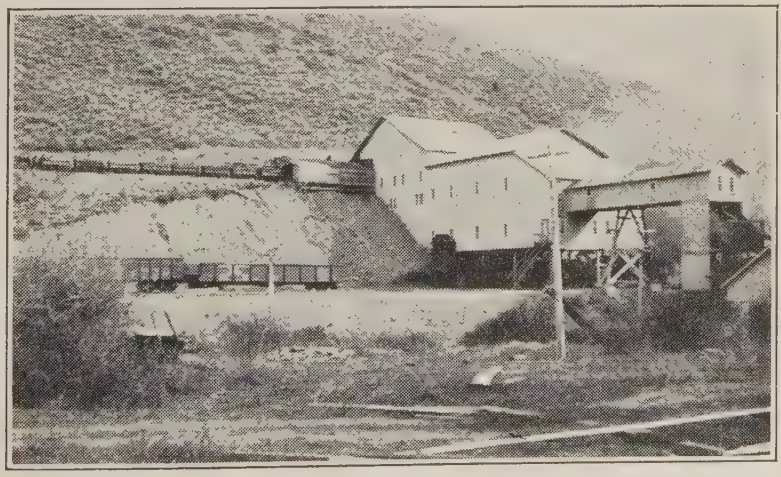
TETON COUNTY



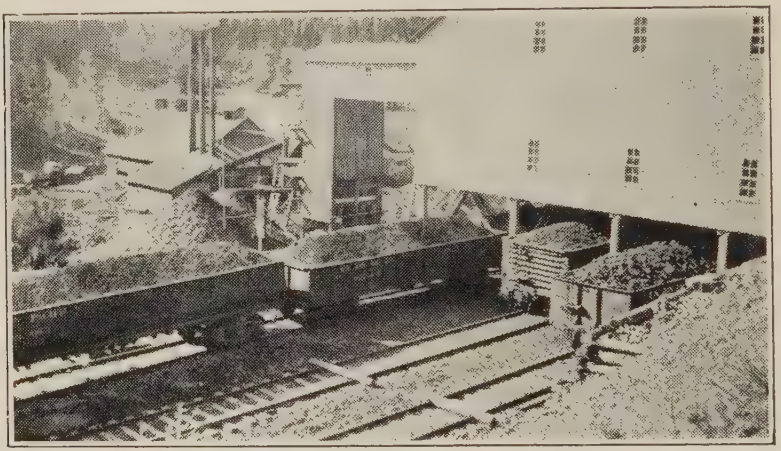
Teton is one of the southeastern counties, being bounded on the east by the State of Wyoming, on the south by Bonneville County, on the west by Madison County, and on the north by Fremont County. Containing an area of but 463 square miles, it is the second smallest county in the State. The 1920 census accredited it with a population of 3921, or 8.5 persons to the square mile, the larger part of which is located in the Teton River valley. Practically all the county is farming land, and the principal industries are wheat, potato and stockraising.

The county is served by the Teton State highway, good county roads, and the Ashton-Victor branch of the O. S. L. Railroad. Driggs is the largest town and county seat.

The principal mineral resources of Teton County are coal, phosphate rock, natural gas, limestone, and asbestos; and there are excellent possibilities for the discovery of petroleum. This county is one of the few in the State in which coal occurs in commercial quantity. Compared with the coal produced at Rock Springs, Wyoming, it is equal in quality and similar in appearance. As well as being of excellent quality for domestic and industrial purposes, it is especially adaptable for powdered coal.

The principal coal-bearing area is the Horseshoe district, seven miles west of Driggs. This district has never been sufficiently developed to prove the number or extent of the coal beds. Those which have been proved vary from one to eleven feet in thickness and repose at an angle of approximately 45 degrees. The Horseshoe district has been examined by the U. S. Geological Survey and by the U. S. Bureau of Mines in cooperation with the Idaho Bureau of Mines and Geology. The reports issued by these organizations are listed in the bibliographies, to which the reader is referred for complete descriptions, analyses, and tonnage estimates.

During the year the Teton Coal Co. completed construction of its tipple; improved and enlarged its mine plant, tunnel, and camp; and produced and marketed the largest tonnage of coal which it has ever mined in any one year. The tipple consists of sizing, screening, sorting, and loading machinery, with the necessary bins; it has a capacity of 1000 tons in 24 hours. Changes in the management and the operating personnel greatly increased the efficiency of the enterprise.



TIPPLE: TETON COAL CO.

The Superior Coal Mining Co., whose property is adjacent to that of the Teton Coal Co., conducted active development work throughout a large part of the year. This work consisted principally in driving a tunnel to intersect the Brown Bear and one other coal bed.

The Idaho Coal Mining Co., on Horseshoe Creek near the Teton Coal Co.'s property, conducted a small amount of development work throughout the year.

The Tieton Valley Land & Leasing Co., whose well reached a depth of 1325 feet in 1926, encountering a strong flow of gas, was idle throughout the year, on account of inability to finance the project to completion.

LOADING TRACKS, TETON COAL CO.'S TIPPLE

IDAHO COAL MINING CO.

Office: Driggs. **Officers:** Peter Mickelsen, Pres., Rexburg; J. F. Miller, Sec., Rigby; John R. Cluff, Mgr., Driggs. **Inc.:** Aug. 13, 1926. **Capital:** 100,000 shares; par value $1; 40,400 shares issued. **Property:** Government prospecting permit on 2160 acres, Horseshoe dist.; Sam. **Development:** By 3 tunnels: No. 1, 338 ft.; No. 2, 172 ft.; No. 3, 132 ft. **Mineral sought:** Coal. **Men employed:** Average, 2. **Remarks:** Small amount of development work during the year.

SUPERIOR COAL MINING CO.

Office: Pocatello. **Officers:** Roy L. Black, Vice-Pres.; S. Hansen, Sec., both of Pocatello. **Inc.:** Dec. 24, 1924. **Capital:** 1,000,000 shares; par value $1; 225,000 shares issued. **Property:** Assignment of prospecting permits and applications for lease on 2400 acres; Horseshoe dist.; Sam. **Development:** By 8 short tunnels, the longest being 200 ft.. all of which are drifts on coal veins; and an inclined shaft 158 ft. long. **Plant:** Steam-driven hoist. **Mineral sought:** Coal. **Men employed:** Average, 6. **Remarks:** This company's property adjoins that of the Teton Coal Co. Active development work, which consisted principally in driving a tunnel to intersect the Brown Bear and one other coal bed, was conducted throughout the greater part of the year.

TETON COAL CO.

Office: Sam. **Officers:** H. F. Samuels, Pres.; J. B. Forrester, Sec.-Mgr., both of Sam. **Inc.:** Oct. 3, 1923. **Capital:** 1,000,000 shares; no par value; 825,000 shares issued. **Property:** Brown Bear group; 1080 acres patented land, Horseshoe dist.; Sam. **Development:** By an inclined shaft 640 ft. long and a 5400-ft. crosscut tunnel. Total development, approximately 16,000 ft. **Plant:** Steam-driven hoist and 2 steam-driven compressors; tipple capable of handling 1000 tons in 24 hrs.; complete mining equip-

ment and camp. **Mineral sought:** Coal. **Men employed:** Average, 50. **Remarks:** During the year this company completed construction of its tipple; improved and enlarged its mine plant, tunnel, and camp; and produced and marketed the largest tonnage of coal which it has ever mined in any one year. The tipple consists of sizing, screening, sorting, and loading machinery, with the necessary bins; it has a capacity of 1000 tons in 24 hours. Changes in the management and the operating personnel greatly increased the efficiency of the enterprise.

TIETON VALLEY LAND & LEASING CO.

Office: Astoria, Ore. **Officers:** S. W. Lovell, Pres.; Charles Anet, Sec., both of Astoria, Ore.; F. J. Johnston, Mgr., Driggs. **Inc.:** Aug. 11, 1923. **Capital:** 100,000 shares; par value $1; 85,000 shares issued. **Property:** Oil and gas lease on 6000 acres of patented land lying west of Driggs. **Development:** 1325-ft. well. **Plant:** No. 26 Star drilling rig and complete drilling equipment. **Mineral sought:** Oil and gas. **Remarks:** Idle.

VALLEY COUNTY

Valley County occupies the geographical center of the State. It is bounded on the north by Idaho, on the east by Lemhi and Custer, on the south by Boise, and on the west by Gem and Adams counties. It contains an area of 3779 square miles, and was accredited with a population of 2524 in the 1920 census, or 0.7 persons to the square mile. The principal industries are farming, stockraising, lumbering and mining. Cascade is the county seat.

The State highway, Payette, extending from Boise to Cascade, McCall, and New Meadows, is the principal highway; the Forest Service highways from Cascade to Knox and Yellow Pine, and from Knox into Deadwood Basin and Bear Valley, connecting with the Sawtooth Park and Payette highways, are practically completed and opened to travel. The Nampa-McCall branch of the O. S. L. Railroad is the only railroad in the county.

Isolation and lack of transportation have prevented mineral development and compelled many valuable properties to lie idle, but the system of forest roads which has been designated and partly constructed, is making many of the various sections accessible to travel, and is stimulating mining. When these roads are completed the largest undeveloped mineralized area in the State will become available to profitable development and exploitation.

The principal mineral resources of Valley County are gold (placer and lode), lead, silver, zinc, antimony, mercury, copper, tungsten, molybdenum, and monazite. Many mines containing these minerals are undeveloped but justify the finances to prove their possibilities, and many others warrant investigation. These properties and the possibilities in undiscovered veins present many opportunities to the investor, prospector, and development company.

One of the outstanding disclosures of new ore in 1926 was made in this county by the Bunker Hill & Sullivan Mining & Concentrating Co. at the Hall-Interstate mine in Deadwood Basin. The exposures were in a long crosscut tunnel which intersected the vein approximately 600 feet below the outcrop. At the point of intersection the vein was determined to be approximately 50 feet wide, throughout the largest part of which the ore was of commercial grade. During 1927 this ore was sufficiently explored to warrant building a mill, and construction work was started on a 100-ton flotation concentrator and a 250-horsepower hydroelectric power plant. In addition to this large construction program, new camp buildings were erected: and mine development work, consisting principally of a 700-foot raise to connect the lower and upper tunnels, was maintained. As the Hall-Interstate vein occurs in granite or allied rocks, this enterprise is of value to the State, as it is stimulating prospecting and encouraging the investment of capital for the development of the many similar occurrences which are found throughout the granite area of central Idaho. In past years, this area has been looked upon with disfavor, but this demonstration fully proves the potentialities of these veins.

One of the largest and most important new enterprises started in the State during the year was that of Fred W. Bradley, president of the Bunker Hill & Sullivan M. & C. Co., as the Yellow Pine Syndicate. This company acquired the Meadow Creek and Cinnabar groups owned by the United Mercury Mines Co. The mine camps at each group were enlarged and improved; a new camp was constructed on the Meadow Creek group; and an active development campaign was inaugurated. The new camp on the Meadow Creek was at a distance of 14,000 feet from the old camp and 500 feet lower in elevation. Throughout this distance the vein has been traced on the surface, and mining work at the new camp is designed to prove the vein at that point. The Meadow Creek vein is a large low-grade gold deposit about 40 feet in width. The Cinnabar group contains a large deposit of mercury ore.

The Profile Gap and Edwardsburg districts witnessed more development work by prospectors, small companies, and investigators than for many years. Two new discoveries of lead-silver ore were reported and three new companies started work; one hydraulic mining enterprise installed a small amount of new equipment.

In the Thunder Mountain district, McRae and Davis maintained active work at the Sunnyside mine throughout the year, and produced and milled a small tonnage of gold ore. An important publication issued in 1927 which is of much value in displaying the possibilities of this district is Pamphlet 25 of the Idaho Bureau of Mines and Geology (Moscow, Idaho): "Ore Deposits in the Tertiary Lava in the Salmon River Mountains, Idaho", by C. P. Ross.

BUNKER HILL & SULLIVAN MINING & CONCENTRATING CO.

(See Shoshone County.)

Officers: F. W. Bradley, Pres., 1022 Crocker Bldg., San Francisco, Calif.; Stanly A. Easton, Mgr., Kellogg; James W. Gwinn, Local Mgr., Cascade. **Property:** Lease and bond on mines owned by Hall Interstate Mining Co., and Lost Pilgrim Mining Co., Deadwood dist.; Cascade, 52 miles; Bernard. **Development:** Approximately 7000 ft. on both groups. **Plant:** 150-kw. hydroelectric power plant operating under a 510-ft. head; 385-cu-ft. I-R compressor; complete mining equipment and camp. **Ore:** Lead-silver. **Men employed:** Average, 40.

REMARKS

The properties controlled by this company were acquired in May, 1924, after many months of negotiation; immediately thereafter arrangements were completed for the construction of the necessary buildings and the installation of the equipment.

A large two-story boarding-house, a power-house, shop, barn, and outbuildings were built. The power plant was constructed, and the compressor and mining equipment were installed; mining operations were commenced on Oct. 24, 1924, and conducted without interruption throughout 1927.

The development campaign outlined consisted of extending the Independence tunnel, of the Hall group, a distance of 1500 ft., where it intersected the Hall vein at a vertical depth of approximately 600 ft. below the apex. During 1927 this ore was sufficiently explored to warrant building a mill, and construction work was started on a 100-ton flotation concentrator and a 250-h. p. hydroelectric power plant. In addition to this large construction program, new camp buildings were erected; and mine development work, consisting principally of a 700-ft. raise to connect the lower and upper tunnels, was maintained.

CASCADE VALLEY CORPORATION

Office: Fulton Nat'l Bank Bldg., Atlanta, Ga. **Officers:** N. S. Turner, Pres., Covington, Ga.; Ronald Ransom, Sec., Atlanta, Ga. **Inc.:** Apr. 27, 1925. **Capital:** 600 shares; par value $100; all shares issued. **Property:** Sunday group; 7 patented claims, Edwardsburg dist.; Edwardsburg.

DEADWOOD MINING CO., LTD.

Office: Boise. **Officers:** Jas. H. Hawley, Pres.; C. B. Steunenberg, Sec., both of Boise. **Inc.:** June 10, 1921. **Capital:** 1,000,000 shares; par value 10c; 307,504 shares issued. **Property:** Deadwood group; 8 unpatented claims, Deadwood dist.; Knox. **Development:** Principally by 1 tunnel, 600 ft. long. **Ore:** Lead-silver. **Remarks:** A small amount of development work during the year.

GOLD FORK MINING CO.

Office: 218 N. Eighth St., Boise. **Officers:** W. E. Pierce, Pres.; W. Clyde Cox, Sec., both of Boise. **Inc.:** Jan. 18, 1916. **Capital:** 2000 shares; par value $100; all shares issued. **Property:** 1520 acres patented placer ground, Gold Fork dist.; Roseberry. **Ore:** Placer gold. **Remarks:** Idle throughout the year.

GREAT NORTHERN MINES CO.

Officers: Albert Hennessy, Pres., Yellow Pine. **Inc.:** Feb. 7, 1924. **Capital:** 100,000 shares; par value $1; all shares issued. **Property:** 11 unpatented claims, Yellow Pine dist.; Yellow Pine. **Development:** By 2 short tunnels. **Ore:** Gold. **Remarks:** Developed throughout the year by the president.

HALL INTERSTATE MINING CO.

Office: Boise. **Officers:** Jas. H. Hawley, Pres.; Chas. W. Mack, Sec., both of Boise. **Inc.:** Oct. 30, 1915. **Capital:** 1,000,000 shares; par value 25c; 155,500 shares issued. **Property:** Hall group; 5 unpatented claims, Deadwood dist.; Knox. **Development:** By 2 tunnels: Independence, 6000 ft. long; Anderson, 300 ft. long. **Ore:** Lead-silver. **Remarks:** Under lease and option to Bunker Hill & Sullivan M. & C. Co.

HOLCOMB CO., LTD.

Office: Boise. **Officers:** Ario Pardee, Sec., 1600 Walnut St., Philadelphia; Chas. W. Mack, Mgr., Boise. **Inc.:** Apr. 20, 1908. **Capital:** 500,000 shares; par value $1; 169,280 shares issued. **Property:** 16 patented claims, Thunder Mountain dist.; Yellow Pine. **Ore:** Gold.

HURLEY CREEK MINING & MILLING CO.

Office: Cascade. **Officers:** Chas. C. Smith, Pres., Smiths Ferry; Forest E. Robb, Sec., Cascade. **Inc.:** Aug. 21, 1923. **Capital:** 1,000,000 shares; par value 10c; 628,676 shares issued. **Property:** Maloney group; 10 unpatented claims, unorganized dist.; Cabarton. **Development:** By 3 tunnels: No. 1, 450 ft. long; No. 2, 200 ft. long; No. 3, 780 ft. long. **Ore:** Silver-gold-copper. **Men employed:** Average, 2. **Remarks:** This company is operating the Maloney group and actively developed the property during the greater part of the year.

IDAHO CENTRAL MINES CO.

Office: Mabton, Wash. **Officers:** A. L. Livingston, Pres.; H. S. Whiting, Sec., both of Mabton, Wash.; J. R. Butler, Mgr., Clover. **Inc.:** May 12, 1927. **Capital:** 3,000,000 shares; par value $1; 1,550,010 shares issued. **Property:** Idaho Central group; 5 unpatented claims, Thunder Mountain dist.; Clover. **Development:** By 2 short tunnels. **Ore:** Copper-gold. **Remarks:** Small amount of work during the summer months.

INDEPENDENCE MINES & POWER CO.
Office: Topeka, Kan. **Officers:** W. H. Davis, Pres.; L. Biscoe, Sec., both of Topeka, Kan. **Inc.:** Apr. 27, 1906. **Capital:** 500,000 shares; par value 5c; 250,000 shares issued. **Property:** 10 patented claims, Big Creek dist.; Yellow Pine. **Development:** By 1 tunnel 500 ft. long. **Ore:** Copper-silver-gold. **Remarks:** Idle for many years.

IRON CLAD MINING & MILLING CO.
Office: Caldwell. **Officers:** Dr. W. M. Munsell, Pres., Grandview, Wash.; H. C. Heise, Sec., Mabton, Wash.; Jesse R. Butler, Mgr., Clover. **Inc.:** Apr. 9, 1924. **Capital:** 200,000 shares; par value $1; 160,000 shares issued. **Property:** Iron Clad group; 5 unpatented claims, Thunder Mountain dist.; Clover. **Plant:** 5-stamp mill. **Ore:** Gold-silver-copper. **Remarks:** A small amount of development work performed during the year.

LOST PILGRIM MINING CO.
Office: Boise. **Officers:** Jas. H. Hawley, Pres.; Chas. W. Mack, Sec., both of Boise. **Inc.:** Nov. 22, 1921. **Capital:** 600,000 shares; par value $1; 355,144 shares issued. **Property:** Lost Pilgrim group; 8 unpatented claims, Deadwood dist.; Knox. **Development:** By 2 tunnels: No. 1, 400 ft. long; No. 2, 300 ft. long; and 1 vertical shaft 40 ft. deep, at the bottom of which is a 70-ft. drift on the vein. Total development, approximately 1500 ft. **Ore:** Silver. **Remarks:** Under lease and option to Bunker Hill & Sullivan M. & C. Co.

MERRY BLUE MINING CO.
Office: Idanha Hotel, Boise. **Inc.:** A partnership consisting of Thomas McMillan and Henry Vernon, both of Boise. **Property:** Merry Blue group; 8 unpatented claims, Deadwood dist.; Lowman. **Development:** Principally by 2 tunnels: Merry Blue, 500 ft. long; Fourth of July, 900 ft. long. **Plant:** MINE: Steam-driven compressor; complete mining equipment, and sawmill. MILL: Steam-driven amalgamation mill. **Ore:** Gold. **Men employed:** Average, 2. **Remarks:** Active development work throughout the summer months.

PROFILE-TAMARACK MINES CO.
Office: Yellow Pine. **Officers:** H. T. Abstein, Pres.-Mgr., Yellow Pine; Emil P. Slovarp, Sec., Henry Bldg., Portland, Ore. **Inc.:** June 18, 1926. **Capital:** 20,000 shares; no par value; 10,300 shares issued. **Property:** 27 unpatented claims, Missouri and Profile creeks, Yellow Pine dist.; Yellow Pine. **Development:** Approximately 860 ft. of workings on both groups. **Ore:** Lead-silver, copper-gold. **Men employed:** Average, 3. **Remarks:** Active development work throughout the summer months.

PROSPECTORS MINING & DEVELOPING CO., LTD.
Office: Yellow Pine. **Officers:** H. T. Abstein, Pres.-Mgr., Yellow Pine; Homer I. Clark, Sec.-Mgr., Kuna. **Inc.:** Apr. 12, 1906. **Capital:** 50,000 shares; par value $1; 27,725 shares issued. **Property:** Golden Ibex group; on Wilson Creek, Thunder Mountain dist.; Meyers Cove. **Development:** Approximately 525 ft. of workings, the principal one of which is a tunnel 125 ft. long. **Ore:** Gold. **Men employed:** Average, 1. **Remarks:** Annual labor only.

RETALLAC MINING CO.
Office: 695 Multnomah St., Portland, Ore. **Officers:** Fenton Merrill, Pres., P. O. Box 1221, Seattle, Wash.; Paul DeHaas, Sec., Portland, Ore. **Inc.:** Unknown. **Capital:** 5000 shares; par value $1; all shares issued. **Property:** 2 unpatented claims, Yellow Pine dist.; Yellow Pine. **Ore:** Gold. **Remarks:** Annual labor only.

SMITH CREEK HYDRAULIC MINING CO.
Office: 311 McCarty Bldg., Boise. **Officers:** J. K. Burns, Pres.-Mgr.; H. M. Nelson, Sec., both of Boise. **Inc.:** Common-law trust. **Capital:** 200,000 shares; par value $1; 161,027 shares issued. **Property:** Smith Creek group; 20 unpatented placer claims, Edwardsburg dist.; Edwardsburg. **Ore:** Placer gold. **Men employed:** Average, 4. **Remarks:** Hydraulic equipment installed and a small amount of work during the year, which consisted principally of ditch and road construction.

UNITED MERCURY MINES CO.

Office: 605 Eastman Bldg., Boise. **Officers:** J. J. Oberbillig, Pres.-Mgr.; J. F. Koelsch, Sec., both of Boise. **Inc.:** Jan. 20, 1921. **Capital:** 5,000,000 shares; par value 10c; 4,340,491 shares issued. **Property:** 11 patented, 193 unpatented claims, consisting of 3 groups: Hermes, principal ore, cinnabar; Meadow Creek, principal ore, gold; Babbitt Metal, principal ore, antimony; Yellow Pine dist.; Yellow Pine. **Development:** Total development, approximately 10,000 ft. on all groups, consisting principally of No. 1 tunnel, 900 ft. long; No. 2 tunnel, 2700 ft. long, on Cinnabar group, and 1 tunnel 1700 ft. long on Meadow Creek group. **Plant:** A 6-cylindrical tube retort. **Ore:** Mercury, gold, silver, lead, and antimony. **Remarks:** Cinnabar and Meadow Creek groups under option to Yellow Pine Syndicate, which see. Annual labor only on Babbitt Metal group.

VENABLE GROUP

Owner: J. M. Venable, Boise. **Property:** Venable group; 3 unpatented claims adjoining the Sunnyside mine, Thunder Mountain dist.; Cascade. **Development:** Principally by a crosscut tunnel 840 ft. long, in which is a 150-ft. drift on the vein. **Ore:** Gold. **Remarks:** Annual labor only. The owner reports a good showing of low-grade gold ore.

WEST MOUNTAIN MINING CO.

Office: 314 Yates Bldg., Boise. **Officers:** John Alden, Pres.; H. A. Alden, Sec., both of Boise. **Inc.:** Mar. 8, 1922. **Capital:** 1,000,000 shares; par value 1c; 764,619 shares issued. **Property:** Silver Bell group; 13 unpatented claims, West Mountain dist.; Cascade. **Development:** By 2 tunnels: No. 1, 40 ft. long; No. 2, 700 ft. long. **Ore:** Lead-silver-gold-zinc. **Remarks:** Annual labor only.

YELLOW PINE SYNDICATE

Office: 1022 Crocker Bldg., San Francisco, Calif. **Officers:** Fred W. Bradley, Pres.; E. A. Griffin, Sec.; Clifford G. Dennis, Mgr., all of San Francisco; J. A. White, Supt., Yellow Pine. **Inc.:** An association. **Property:** Lease and option on Cinnabar group, 116 claims, and Meadow Creek group, 84 claims, owned by United Mercury Mines Co. **Ore:** Mercury, gold-silver. **Men employed:** Average, 30. **Remarks:** One of the largest and most important new enterprises started in the State during the year was that of this company. The mine camps at each group were enlarged and improved; a new camp was constructed on the Meadow Creek group; and an active development campaign was inaugurated. The new camp on the Meadow Creek was a distance of 14,000 ft. from the old camp and 500 ft. lower in elevation. Throughout this distance the vein has been traced on the surface, and mining work at the new camp is designed to prove the vein at that point. The Meadow Creek vein is a large low-grade gold deposit about 40 ft. in width. The Cinnabar group contains a large deposit of mercury ore.

WASHINGTON COUNTY

Washington is one of the southwestern counties, adjoining and lying north of Payette and Gem counties, east of Gem, and east and south of Adams County. The Snake River, which flows north, forms the entire western boundary. The county contains an area of 1479 square miles, and was accredited with a population of 9424 in the 1920 census. It is primarily an agricultural and stockraising community; that part which occupies the Snake River Valley is intensively cultivated, and is the location of the larger part of the population. Weiser is the county seat.

The North and South highway extends from the southern to the northern boundary and is situated about in the geographical center. Branch roads leading to all the settlements are maintained by the county; these are kept in good repair and open to travel the larger part of the year. The county is served by three railroads, the Pacific and Idaho Northern, which extends from Weiser to New Meadows; the main line of the O. S. L. Railroad, and the Huntington-Homestead, Oregon, branch of the same road.

The principal mineral resources are silver, copper, gold, lead, zinc, manganese, diatomaceous earth, pyrites, gypsum, clay, and garnet, practically all of which occur in the three mining districts—Washington, Cuddy Mountain, and Heath—the principal of which is the Washington, or Mineral, district. At one time the Mineral district was a large producer of silver; two blast furnaces were in operation, and the camp of Mineral was a good-sized town; but it has been deserted for many years, the smelters have been dismantled, and the district has almost reverted to its primitive condition. Nearly all the deposits are high-grade silver-copper ores, rather complex, and in some mines partly oxidized, but amenable to modern flotation methods. Many of the deposits in this district are extensive, a large tonnage of ore is available, and there appears to be no reason why the district should not be receiving more attention than it has during the past few years, as there are many properties that are worthy of investigation and development. Large deposits of pyrites and disseminated copper ore also occur in this district.

During 1927 Washington County witnessed but little improvement in mining activities over the previous year. One organization which is operating in the Cuddy Mountain district performed a small amount of work, and an organization operating at Mineral worked a few men during part of the year. One operator on Cuddy Mountain marketed a small shipment of lead-silver ore.

EDNA MAY MINES CO., INC.

Office: 1019 Grove St., Boise. **Officers:** E. W. Levander, Pres., Council; Walter Black, Sec.-Mgr., Boise. **Inc.:** Aug. 13, 1926. **Capital:** 1,200,000 shares; par value 25c; 604,625 shares issued. **Property:** 21 unpatented claims, Cuddy Mountain dist.; Council. **Development:** Principally by 1 tunnel 400 ft. long. **Ore:** Lead-silver-copper. **Men employed:** Average, 3. **Remarks:** During the year, roads were repaired and new camp buildings constructed, as those erected in 1926 were destroyed by a snowslide.

IDAHO-OREGON COAL MINING CO.

Office: 1014 N. 8th St., Boise. **Officers:** A. E. Price, Pres.-Mgr.; A. Affleck, Sec., both of Boise. **Inc.:** Nov. 5, 1920. **Capital:** 100,000 shares; par value $1; 69,000 shares issued. **Property:** Government prospecting permit on 1282 acres near Cobb Siding; Weiser. **Development:** By 1 tunnel 500 ft. long. **Mineral sought:** Coal.

SILVER STILL MINING CO.

Office: Weiser. **Officers:** John G. Still, Pres., Huntington, Ore.; E. R. Coulter, Sec., Weiser. **Inc.:** Aug. 21, 1924. **Capital:** 10,000 shares; par value $1; all shares issued. **Property:** 10 unpatented claims, Mineral dist.; Home, Ore. **Development:** 6 short tunnels, 1 shaft. **Ore:** Silver-copper. **Remarks:** A small amount of work during the year.

SNAKE RIVER GYPSUM CO.

Office: P. O. Box 1250, Boise. **Officers:** H. G. Myers, Pres.; W. G. Ash, Sec., both of Boise. **Inc.:** May 8, 1924. **Capital:** 250,000 shares; no par

value; 125,000 shares issued. **Property:** Columbine; 1 unpatented claim, unorganized dist.; Huntington, Ore. **Development:** Principally by 4 short tunnels. **Mineral sought:** Gypsum. **Remarks:** Annual labor only.

DELINQUENT MINING COMPANIES

The Idaho mining law, section 5474, Idaho Compiled Statutes, was enacted with the intent to assist the inspector of mines in properly discharging his official duties. The Blue Sky law, as applicable to mining companies, section 5320, Idaho Compiled Statutes, was enacted on the assumption that if a mining company publicly files the facts relative to its mine and organization, this information should be sufficient to indicate the character and extent of the company and its undertaking.

The forms on which the reports are to be made to the inspector are mailed out in May of each year. These forms are so arranged that the required facts can be given with little effort, and as ignorance of the law is no excuse, there must be other reasons why many reports are not filed and why many that are filed are not complete. Possibly there might be some excuse for an inactive company neglecting to comply with the law, but none can be offered for a company that is operating, and most particularly when the stock is being actively marketed or when stock assessments are being levied.

Every effort possible has been put forth during the year to get a report from all mining companies operating in Idaho whose charters are in good standing. This effort has not been entirely successful, and, believing that the list of "Delinquent Mining Companies" as published in previous annual reports has been informative, a similar list for 1927 is included.

Corporations that have forfeited their charters, and that have failed to file their reports as required by law, have been considered as legally dead; therefore no mention is made of them.

Companies whose corporate charters are in good standing, but who have failed to file annual reports with inspector of mines, as provided in sections 5320 and 5474 of Idaho Compiled Statutes:

COMPANY NAME	OFFICER	P. O. ADDRESS

1927 METAL PRODUCTION

The total value of the gold, silver, lead, zinc, and copper produced in Idaho in 1927 was $30,794,913.64, a decrease of $2,174,950.36 in value under the production of 1926, which was $32,969,864.02. The large decrease in value does not reflect the true situation, for the total production of silver, in ounces, and of lead and zinc, in pounds, exceeded that of any year during the past ten; the production of copper approximately doubled that of the previous year; and there was a large increase in the amount of gold produced. Excepting Boundary and Custer counties, which recorded a decline in lead and silver, every metal-producing county witnessed a substantial increase. Practically all of the mines operated at full capacity; in a few instances, production was increased over that of 1926, and the total was supplemented by an increase in production from new mines. The only curtailment was in the suspension of operations at the Star mine of the Sullivan Mining Co. and a 25 per cent reduction by one large producer, both in Shoshone County. However, the increase in the amount of the five principal metals produced was not sufficient to offset the decrease in value due to the decline in the prices of lead, zinc, and silver under those of the previous year. If the prices of these three metals had remained the same during the past two years, the value of the 1927 production would have exceeded that of 1926 by about $5,000,000.

Shoshone County maintained its position as the principal mining county in the State. Although its total production greatly exceeded that of 1926, the increase in production in other counties reduced its percentage of total State production. In 1926 its production amounted to $31,008,975.64, or 94.5 per cent of the total State production, while in 1927 it amounted to $28,574,-891.88, or 92.79 per cent of the total for the State. This county held first place for the production of lead, silver, and zinc; Custer County held first place for the production of copper from strictly copper-producing mines; and Boise County held first place for the production of gold.

The respective rank of the principal mining counties in point of total production was: Shoshone, Lemhi, Custer, Blaine, Bonner, Butte, Boise, Elmore, Boundary, Gem, Idaho, and Owyhee.

Gold

The 1927 output of gold was 15,592.01 ounces, valued at $322,286.86, an increase of 837.37 ounces and $17,308.47 as compared with that of 1926, which was 14,754.64 ounces valued at $304,978.39. On a comparative basis the increase is small, yet there was a sufficient production from new mines to partly offset the loss caused by the suspension of dredging operations by the Yukon Gold Co.; a comparison with other years, after eliminating this company's production, shows a large increase. This is significant in indicating that interest is again being taken in gold mining.

The respective rank of the leading mining counties in point of total gold produced was: Boise, Elmore, Custer, Gem, Lemhi, and Shoshone. The principal gold-producing companies were: South Park Dredging Co., in Elmore County; Idawa Gold Mining Co., Gold Dredging & Power Corporation, Mineral Mining Co., and Boise Placer Co., all in Boise County; Idaho Metals Co., in Custer County; United Idaho Mining Co., in Lemhi County; and Lincoln Mine Operating Co., in Gem County.

Silver

The output of silver increased from 7,552,881.88 ounces with a value of $4,672,236.26, in 1926, to 8,896,293.08 ounces with a value of $5,014,840.42, in 1927, an increase of 1,373,411.20 ounces and of $342,604.16 in value. The small increase in value as compared with the large increase in production is attributed to the low price of silver during the year; its average price in 1927

was $0.5637 per ounce, as against $0.6211 per ounce in 1926. The greater part of the increase was in Shoshone County, although Blaine, Lemhi, Butte, Boise, and Gem counties recorded a substantial increase in production over that of 1926.

The 1927 silver production in Shoshone County was 8,236,341.70 ounces valued at $4,642,825.82, as compared with 6,930,126.97 ounces valued at $4,304,093.96 for 1926. This record production, 92.58 per cent of the total for the State, indicates the importance of the Coeur d'Alene district and Shoshone County, particularly as Idaho produces one-third of all the silver of the United States. The order of prominence of the principal silver-producing counties was: Shoshone, Lemhi, Custer, Bonner, Blaine, Butte, Boise, and Boundary. The largest producers in Shoshone County were: Federal M. & S. Co., Bunker Hill & Sullivan M. & C. Co., Hecla Mining Co., Sunshine Mining Co., Tamarack & Custer Consolidated Mining Co., Gold Hunter Mines, Inc., Callahan Zinc-Lead Co., Strattons Mines Co., Sidney Leasing Co., and Constitution Mining & Milling Co. In other counties the most important producers were: United Idaho Mining Co. and the Allie mine, in Lemhi County; Livingston Mines Corporation, Ramshorn mine, and Idaho Metals Co., in Custer County; Whitedelf Mining & Development Co. and Elsie K. mine, in Bonner County; Triumph Development Co. and Independence mine of the Federal M. & S. Co., in Blaine County; Wilbert Mining Co., Ltd., in Butte County; and the Continental mine, in Boundary County.

Lead

The 1927 production of lead exceeded that of 1926 by 29,465,332 pounds, the largest production which has been obtained since the war period. However, on account of the great decrease in the price of lead during 1927 from that of 1926, the value of the 1927 production was $2,718,155.11 less than the value of the 1926 output.

The 1927 output was 312,770,885 pounds valued at $21,127,673,28, as compared with 283,305,553 pounds valued at $23,845,828.39 in 1926. The average price of lead in 1926 was 8.417 cents a pound, and in 1927 it was 6.755 cents a pound. If the price of lead had remained the same in 1927 as in 1926, the value of the 1927 production would have exceeded that of 1926 by approximately $4,000,000.

Shoshone County furnished 93.91 per cent of the State total with a production of 293,728,390 pounds, an increase of 26,316,808 pounds over that of the previous year. But the large increase in lead production by the mines in Lemhi, Blaine, and Bonner counties reduced its total percentage from 94.39 in 1926 to 93.91 in 1927.

The importance of Idaho as a lead-producing State, and particularly of Shoshone County, is apparent from the fact that the entire State production is approximately one-fourth that of the entire United States.

The order of prominence of the principal lead-producing counties was: Shoshone, Lemhi, Custer, Bonner, Butte, Blaine, Boundary, and Boise.

The Bunker Hill & Sullivan M. & C. Co. maintained its record as the largest lead-producing company in the State, if not in the United States; the Federal M. & S. Co. was second; and the Hecla Mining Co. was third. The other large lead-producing companies in Shoshone County, in their order of prominence, were: Tamarack & Custer Consolidated Mining Co., Gold Hunter Mines, Inc., Callahan Zinc-Lead Co., Sidney Leasing Co., Strattons Mines Co., Sullivan Mining Co., Constitution Mining & Milling Co., Jack Waite Mining Co., Ltd., Sunshine Mining Co., Hypotheek Mining & Milling Co., and Hayes Co. Important lead producers in other counties were: United Idaho Mining Co. and Allie mine, in Lemhi County; Livingston Mines Corporation and Ramshorn mine, in Custer County; Whitedelf Mining & Development Co., Elsie K. mine, and Lawrence Consolidated Mining Co., in Bonner County; Wilbert Mining Co., Ltd., in Butte County; Triumph Development Co. and the Independence mine of the Federal M. &. S. Co., in Blaine County; Continental mine, in Boundary County; and Mineral Mining Co., in Boise County.

Zinc

The 1927 production of recoverable zinc was greater than that of any year since 1917, exceeding the 1926 production by 10,557,713 pounds and $68,565.23 in value. The total production was 64,479,833 pounds valued at $4,024,831.18, as compared with 53,922,120 pounds valued at $3,956,265.95 in 1926. The cancellation of the contracts between the Veille-Montagne Zinc Co. of Chenee, Belgium, the Sullivan Mining Co., and the Highland-Surprise Consolidated Mining Co., resulting in the suspension of production by these companies in May, together with the Douglas Mining Co.'s suspending production, greatly reduced the possible output.

The satisfactory price level which zinc maintained throughout the year was a dominant factor in stimulating production, and improvements in milling practice, particularly in flotation, were responsible for an increase in recoveries and grade of concentrate produced. In 1927 the price of zinc averaged 6.242 cents a pound, as compared with a price of 7.337 cents a pound in 1926.

The Veille-Montagne Zinc Co. of Chenee, Belgium, and the Anaconda Copper Mining Co. of Anaconda, Montana, were the principal buyers of zinc concentrate. However, the Bunker Hill and Sullivan M. & C. Co. purchased and stock-piled a large tonnage, pending completion of the Sullivan electrolytic zinc plant at Kellogg.

Shoshone, Blaine, Custer, and Camas were the only counties that produced a marketable zinc product. The output of the latter two was unimportant, but the Blaine County production, which was obtained principally from the Triumph mine by the Triumph Development Co., was quite significant. The principal zinc-producing companies in Shoshone County were: Federal M. & S. Co., Sidney Leasing Co., Constitution Mining & Milling Co., Sullivan Mining Co., Highland-Surprise Consolidated Mining Co., Humming Bird Mining Co., Douglas Mining Co., and Tamarack & Custer Consolidated Mining Co.

Copper

The output of copper in 1927 was 2,362,863 pounds valued at $305,281.90, an increase of 981,529 pounds and $114,726.87 in value over that of 1926, which was 1,381,334 pounds valued at $190,555.03. The price of copper averaged 12.92 cents a pound in 1927, and 13.795 cents a pound in 1926. The increase in production was due to the resumption of operations by the Idaho Metals Co. in Custer County, which was active throughout a large part of the year; to a short period of productive operations by the Harmony Mines Co. in Lemhi County; to an increase in output by lessees at the Snow Storm mine in Shoshone County; and to an increase in the production of lead.

The order of prominence of the principal copper-producing counties was: Shoshone, Custer, and Lemhi. The principal copper-producing companies or mines were: The Idaho Metals Co., in Custer County; lessees at the Snow Storm mine, in Shoshone County; and the Harmony Mines Co., in Lemhi County. Excepting the copper produced by these companies and a few isolated small shipments, the remainder of the copper produced in the State was associated with lead-silver ores and was recovered by the smelters as a by-product.

STATISTICS

The production statistics are based upon the gross metal content of all ores or bullion produced and sold from Idaho mines during 1927. The tabulation constitutes the production as reported to the inspector's office, reports have been verified in every possible manner, and no estimates have been used in the compilation. If any error exists in the totals, it is due to unreported production, and as production statements were furnished by all the large producers, the margin of error is very small. Any unreported production would cause these figures to be larger than the amounts set forth, so this compilation represents, as nearly as possible, the correct minimum production.

The values have been figured from the average price of metals for the year, based on New York and St. Louis quotations, as published in the Engineering & Mining Journal.

1927 METAL PRODUCTION BY COUNTIES

Number of Producers				Value
	ADA COUNTY			
4	Gold	22.43	oz.	$ 463.63
	Silver	20.24	oz.	11.41
	Lead	306.00	lbs.	20.67
	Copper	24.00	lbs.	3.10
				$ 498.81
	ADAMS COUNTY			
2	Gold	7.12	oz.	$ 147.17
	Silver	870.91	oz.	490.93
	Copper	54,145.00	lbs.	6,995.53
				$ 7,633.63
	BEAR LAKE COUNTY			
1	Silver	40.03	oz.	$ 22.56
	Lead	31,183.00	lbs.	2,106.41
				$ 2,128.97
	BLAINE COUNTY			
12	Gold	102.27	oz.	$ 2,113.92
	Silver	96,168.00	oz.	54,209.90

THIRTIETH
ANNUAL REPORT

OF THE

Mining Industry of IDAHO

FOR THE YEAR

1928

STEWART CAMPBELL
INSPECTOR OF MINES

ALICE DARRAH
SECRETARY

LETTER OF TRANSMITTAL

To His Excellency,
THE HONORABLE H. C. BALDRIDGE,
Governor of Idaho.

SIR:

In compliance with the provisions of section 5480, Idaho Compiled Statutes, I have the honor to transmit herewith the annual report of the inspector of mines for the year ended December 31, 1928.

Respectfully submitted,

STEWART CAMPBELL,
Inspector of Mines.

FOREWORD

One of the dominating ideas of this administration has been that it is the legal and moral duty of the inspector of mines to encourage and promote the development of Idaho's mineral resources, and that this can best be done by protecting the public against fake promotions and dishonorable promoters. If the investing public can be impressed with the fact that Idaho is using every precaution and is particularly vigilant in preventing shady promotions, and that through this attitude fair treatment can be expected, then the prospector, the miner, the legitimate promoter, and the State will benefit by this faith. If, on the other hand, the public is excited and deceived into buying stock in fraudulent promotions, which almost invariably result in total loss, then the cause of honest mineral development is injured, and not only does the State suffer, but every legitimate miner and operator as well.

The policy of encouraging the development of Idaho's mineral resources and the right of this department to permanently protect the reputation and honor of the State for fairness in mining development were attacked by the Idaho Copper Corporation. On May 19, 1925, this company filed, in the District Court of the United States, in and for the District of Idaho, Southern Division, a suit against the inspector of mines for $100,000, alleging the publication of false, malicious and defamatory statements. The suit was against the inspector, as an individual, for attacking the company's promotion methods in his official capacity. It questioned the right of this department to guard the investing public against misrepresentations and unjustifiable inducements for stock-gambling purposes.

After the suit was filed, the company availed itself of all dilatory proceedings to prevent the suit coming to trial, but the inspector assumed the initiative and was successful in having the case set for trial on May 6, 1926. On May 5, 1926, the company dismissed this suit and simultaneously filed a new one for $500,000, which was similar in all particulars to the first, except that one new alleged libelous statement was added. Objection to a dismissal of the first suit was filed, and a strenuous effort made to have the issues heard at that time, but the objection was overruled.

After the second suit was filed, the initiative was again assumed by this department, and the case was finally set for hearing on October 12, 1926. The inspector cast aside his defenses of privilege and mitigation of damages in order to squarely present the case to an Idaho jury on the sole issue of the truth of his statements. So the only question involved was the truth of the statements, some of which were:

> "What difference does it make where the property is located, if the promotion is a swindle?"
>
> * * * * * * * *
>
> "That you may know our position, and why we have requested that the stock of the Idaho Copper Corporation be removed from listing and trading on your exchange, we will state that this department is endeavoring to be particularly vigilant concerning all mining promotions, because experience has proven that when misleading and extravagant statements have been made in the sale of mining stocks and when the purchasers of these stocks discover that they are misled, they never place the blame where it rightfully belongs, that is, upon the promoters and brokers, but they place the blame upon the State in which the mine is located. As the circulars recommending the purchase of Idaho Copper Corporation stock which have come to the attention of this department (but not officially), some of which are represented to be the president's report, are grossly misleading and greatly divergent from the facts,

we feel it to be our duty to warn the public; but before issuing this warning we deemed it advisable to inform your exchange; hence our reason for wiring you on March 24, in part as follows:

> 'This department requests that in behalf of the investing public and the honor of your exchange that this stock be removed from listing and trading until such time as this company complies with all necessary laws and until statements relative to the mine are confined to the facts.'
>
> * * * * * * * *
>
> "This department is maintaining that any corporation holding mining property in Idaho must comply with this law (Section 5320-A, Chap. 151, 1925 Session Laws) regardless of the residence of the one distributing the advertising. It is our opinion that if mining companies, promoters, or brokers are confining their statements to the facts, such companies, promoters or brokers will be glad to comply with this and all other laws; and when compliance is refused, it is but natural for this department to assume that the promotion will not bear inspection and that the public should be warned.
>
> "The statements and recommendations concerning the stock and the mine of the Idaho Copper Corporation are so grossly misleading and extravagant that they are discrediting the good name of the State. Idaho regrets that your exchange is being used as a medium of foisting the stock upon the public and we trust that in behalf of the honor of the Boston Curb Exchange that you will accede to our request.
>
> * * * * * * * *

The issue of truth alone caused the plaintiff to plead for nominal damages only, and the plaintiff's leading counsel, in his argument to the jury, said:

> " * * * We don't ask to punish him; we don't ask for large damages. That isn't what we are here for. We ask to have from your hands a vindication of that foul charge that we are swindlers. That is why we come here; that is why I am facing you; that is why I ask you, as business men, to vindicate these men from that charge—the charge that this promotion was organized in bad faith and for the purpose of effecting a swindle. * * * I leave the case with you, gentlemen, asking that you do what you think is right—not to punish anybody, but vindication. A verdict from your hands which will show the world that twelve men of the State of Idaho, sitting upon a jury, and hearing all the facts, do not believe that foul charge that these men are swindlers. * * * "

In closing the final argument to the jury, associate counsel for the plaintiff said:

> " * * * A verdict against them means that they didn't act in good faith; a verdict for them, however nominal in amount, refutes that charge that they acted in bad faith, and that is all we ask of you. We want vindication. * * * "

In his brief statement to the jury, Jess Hawley, of Hawley & Hawley, Boise, Idaho, counsel for the inspector, said:

> " * * * I ask you to bear in mind that in March of 1925, when Mr. Campbell, with all the bravery, with all the courage and all the character that any man may possess, threw down the gauntlet against the spider of Wall Street, who sits and weaves and weaves and weaves; who had brought many and many a stockholder into the Idaho Copper Corporation, as he did this man Hawes, prior to the date that the mine could be seen or entered; * * * * * I only ask you to read the report of Yorston and the Iconoclast papers in evidence, and then, gentlemen, bring in a verdict that will make it clear that Idaho is not, so long as honest men live in

it, so long as brave and courageous men represent it as public officials, going to permit a wrong to be done to the investing public, and to the mining industry, by permitting stock manipulations and misleading statements to be made in furtherance of a stock-jobbing proposition."

The jury promptly returned a verdict for the inspector. The company then sought a new trial, which Judge Frank S. Dietrich denied and upheld the decision of the jury. In so doing, among other things he said:

" * * * As stated from the bench at the time of the oral hearing upon the motion, I have no question that while the evidence was in a measure circumstantial it was abundant to support a finding by the jury that the articles in the Iconoclast were published with the knowledge, consent and encouragement, and indirectly by the procurement, of plaintiff; and furthermore that the jury was amply warranted in finding from all of the evidence, including that furnished by the publications themselves, that the representations made were substantially of the character charged in the alleged libelous writings. For the purpose of showing that the verdict is supported by the evidence, it would be interesting to analyze these articles and to explain the history of the promotion and the means by which investment in stock was made alluring to unsophisticated purchasers, but at this juncture that is not thought to be necessary. * * * "

In commenting upon the plaintiff's appeal to the jury for vindication, Judge Dietrich said:

" * * * Upon this, the real issue, upon which plaintiff thus earnestly asked for an unequivocal finding, the jury decided squarely against it. * * * They were convinced that the defendant's charges were true and that plaintiff had been engaged in a swindle. * * * "

On February 1, 1927, the plaintiff filed an appeal from this decision to the United States Circuit Court of Appeals for the Ninth Circuit. The company again availed itself of all dilatory proceedings, and the case was finally submitted on briefs on the 30th of July, 1928. On August 20, 1928, the Circuit Court affirmed the finding of the jury and the decision of Judge Dietrich.

In commenting upon the plaintiff's appeal the Circuit Court said, in part:

"This is a writ of error to review a judgment in favor of the defendant in an action for libel. * * *

"The property of the corporation consisted largely of mining claims and properties in the State of Idaho. For some time prior to March 24, 1925, The Wall Street Iconoclast carried advertisements giving rather a glowing description of the mining properties of the corporation and recommending its stock to the investing public. As stated by the court below in its opinion on motion for a new trial, the evidence was ample to justify a finding by the jury that the articles published in the Iconoclast were so published with the knowledge and consent, and indirectly by the procurement of the plaintiff in error.

* * * * * * * *

"The sole defense relied upon at the trial was the truth of the publications as made. * * * The principal issue in the case was the truth or falsity of the charges contained in the telegram and letters of which the defendant in error was the author, and these charges had nothing whatever to do with the future development of the mines or the future expenditures by the plaintiffs in error. The only fraud charged or intimated had to do with the representations contained in the advertising matter circulated by the plaintiff in error or on its behalf and its failure to comply with the Blue Sky Law of the State of Idaho, and, while subsequent develop-

ment and expenses might tend to prove the good faith of the plaintiff in error and its officers, it would have no tendency to prove either the truth of the representations contained in the advertisements or the falsity of the charges preferred by the defendant in error. For these reasons, there was no error either in the rejection of the testimony or in limiting the scope of the testimony admitted."

Shortly after the Circuit Court rendered its decision, the plaintiff filed a petition for a rehearing. This petition was denied on October 1, 1928, thus definitely ending the case and fully sustaining the inspector in all of his acts.

However, during the interim the United States Post Office authorities were giving this promotion their attention, and on February 27, 1928, George Graham Rice, editor and publisher of the Wall Street Iconoclast, Walter K. Yorston, organizer and first president of the Idaho Copper Corporation, the Wall Street Iconoclast, The Idaho Copper Corporation, and others, were indicted in the United States District Court, Southern Division of New York. The indictment charged conspiracy to use the mails in a scheme to defraud in the promotion of stock of the Idaho Copper Corporation on the Boston Curb Exchange.

The trial under this indictment was started on November 14, 1928, and continued to December 14, resulting in the conviction of Rice, Yorston, the Wall Street Iconoclast, and the corporation. On December 21 Rice was sentenced to four years in the Atlanta Penitentiary and to pay a fine of $5,000; Yorston was sentenced to nine months in the penitentiary of Westchester County, New York; and each received an additional sentence of five years' imprisonment to begin at the expiration of the first, which was suspended during good behavior throughout the five-year period. The Wall Street Iconoclast was fined $10,000, and sentence was suspended on the Idaho Copper Corporation. After the sentences were pronounced the attorneys for the defendants announced that they would ask writs of error pending appeal.

ANNUAL REPORTS

The first report submitted by the present inspector, in 1921, was largely an experiment. It introduced much miscellaneous matter never previously printed in such a report and presented detailed information concerning Idaho mining companies in the form of a directory. It was, in fact, a handbook rather than a formal report. It received such favorable press comment, notably by the Engineering and Mining Journal, the foremost mining magazine of the United States, that the same plan was followed in subsequent reports. As these proved equally popular with the mining public of Idaho and other states, the 1928 report is offered in the same form.

It is a cause for great satisfaction that it has been possible to increase the size of the report each year, without adding greatly to the expense. The 1921 issue consisted of but 150 pages; that of 1922 of 200 pages, that of 1923 of 221 pages, that of 1924 of 249 pages, that of 1925 of 270 pages, with five insert diagrams of mill flow sheets, that of 1926 of 269 pages, and that of 1927 of 280 pages. As the 1923, 1924, 1925, 1926, and 1927 editions were printed more compactly, they included much more additional information than their increased bulk would indicate. The increase in size has been made possible by the growing cooperation of mining companies in the matter of filing full reports concerning their organization, property, plant equipment, and development campaigns. The reports for the years 1923, 1924, 1925, 1926, 1927, and 1928 have also been rendered more interesting by the inclusion of many pictures of various Idaho mining plants.

Idaho is the only state in the Union which is presenting the data and information relative to its mineral resources in this form. The merit and popularity of the report are proved by the continually increasing demand for copies of it, as well as by the efforts those interested in mining in other states have made toward having their state governments publish a similar report. Less than 1,000 copies of the 1921 report were distributed, while 2900 copies of the 1927 report were not sufficient to meet the demand.

The list of prospects contained in this report has been corrected and brought down to date through the cooperation and assistance of the auditors and recorders of many of the principal mining counties. Appreciation for this assistance is extended to the following:

Matilda Moser, Adams County.
C. G. Cromwell, Benewah County.
P. B. Dance, Bingham County.
B. P. Thamm, Blaine County.
Robert S. McCrea, Bonner County.
George Witt, Bonneville County.
B. F. Wilson, Cassia County.
G. B. Allen, Clark County.
Joseph Kauffman, Clearwater County.
Emmett Donohue, Custer County.
Frank M. Hobbs, Elmore County.
Lillian M. Campbell, Gem County.
Henry Telcher, Idaho County.
Chas. O. Sowder, Kootenai County.
Harry A. Thatcher, Latah County.
W. A. Lewis, Owyhee County.
Harry A. Rogers, Shoshone County.
Forest E. Robb, Valley County.
Frank E. Smith, Washington County.

Many of these prospects are worthy of more prominent mention, but, as the owners failed to submit data, it is impossible to give further information than the owner's name and address, location of his mine and its name. If the small mine-owner could realize that it would be beneficial to him if he furnished detailed information to the inspector, it would greatly assist in displaying the mining possibilities of Idaho and result in his property receiving more attention. The list published in the twenty-third annual report was the first of its kind ever compiled in Idaho and proved that the practice is worthy of continuation, as it has been a guide to those looking for mines. These lists have found extensive use and in a number of cases resulted in the prospect being examined and a sale made.

Unincorporated mines have been included in the body of this report on the same basis as the reporting mining companies, whenever their owners submitted the data. This policy will be continued in the future. The necessary form on which the data can be submitted is mailed on request to all those interested in having their properties receive a more prominent mention.

NEWSPAPERS

As pointed out in previous years, the visits which the inspector makes to the numerous mining counties are necessarily so short that they are inadequate to enable him to keep directly in touch with all mining activities, so that it is always necessary that he supplement his personal information by that gleaned from the press. Most of the publishers located in mining communities have been very willing to furnish gratuitous subscriptions of their newspapers to the office of the inspector. This courtesy is greatly appreciated, and has been of much assistance in enabling the inspector to keep abreast of the mining news. Accordingly, the State of Idaho, through the mine inspector, extends its thanks to the following:

Arco Advertiser	Arco
Idaho County Free Press	Grangeville
Kellogg-Wardner News	Kellogg
Lemhi County Recorder Herald	Salmon
The Mackay Miner	Mackay
Mining Truth	Spokane
Mullan News	Mullan
Pend d'Oreille Review	Sandpoint
Priest River Times	Priest River

The Salt Lake Mining Review	Salt Lake City
The Times-Register	Idaho Falls
The Wallace Miner	Wallace
Wallace Press-Times	Wallace

MINERAL MARKET INFORMATION

As there has continued to be a demand for possible markets for uncommon minerals and metals, the lists prepared in 1921, which include the names and addresses of the purchasers or users, have been brought up to date wherever it has been possible to obtain the information. The office will be glad to furnish copies of the list for any particular mineral or metal upon request. The following are listed:

Aluminium	Fluorspar	Pumice
Antimony	Fullers Earth	Radium
Arsenic	Graphite	Silica Sand
Asbestos	Gypsum	Sodium
Barytes	Magnesium	Strontium
Bauxite	Magnesite	Talc
Bismuth	Manganese	Tin
Cadmium	Mica	Titanium
Chromium	Molybdenum	Tripoli
Cobalt	Monazite	Tungsten
Diatomaceous Earth	Nickel	Uranium
Feldspar	Platinum	Vanadium

LIBRARY

The library, which was started by the present mine inspector during 1921, and which now consists of over 3,500 volumes, is believed to be the largest library of its kind in the State. It contains virtually every publication of the U. S. Geological Survey and U. S. Bureau of Mines, most of the U. S. Mint Reports, numerous volumes published by the geological surveys of other states, and many volumes of journals dealing with mining and geology.

Except a few articles published in old issues of the various journals, everything of importance dealing with the mining industry of Idaho, including geology, mineralogy and mineral resources, is contained in the library. Whenever requests are made for any of the missing articles, photographic copies are procured from the publishers or from some large research library.

The following magazines are regularly received: Engineering and Mining Journal; Mining Review; Mining Truth; The Mining Congress Journal; Mining and Metallurgy; Rock Products; Compressed Air Magazine; The Explosive Engineer; Economic Geology; and Asbestos. Complete files of these magazines are being preserved for reference use. Although most of them have been received only since 1921, the file of the Engineering and Mining Journal is virtually complete for the past 20 years, the present mine inspector having donated to the State his personal files of this journal for the years 1911 to 1920, inclusive.

The State of Idaho, through the inspector of mines, takes this opportunity of thanking Mr. Walter Hovey Hill for his donation to the library of bound volumes of the Transactions of the American Institute of Mining and Metallurgical Engineers for the years 1900 to 1920, inclusive. These volumes have added greatly to the value of the library.

The library is equipped with the U. S. Geological Survey Finding List of States, Areas and Subjects, which makes it possible to locate quickly and completely all publications of the U. S. Geological Survey concerning the geology and mineral resources of any state of the United States or concerning any particular mineral.

Visitors are always welcome to consult the books of the library or to read the magazines. The office is open from 9 a. m. to noon and from 1 p. m. to 5 p. m. In the absence of the inspector, the secretary will be glad to assist visitors in finding desired information.

In order to accommodate readers who find it inconvenient to consult books in the library at the inspector's office, the practice of lending books for a period of not over two weeks has been established, and they are mailed out to all responsible persons within the State upon request. A few rare volumes, now out of print, and of which the library contains no duplicates, and books frequently called for at the office, cannot be mailed out. Individuals not personally acquainted with the inspector, when writing in for books, should accompany their requests by letters of introduction or recommendation from some reliable person in their community personally known to the office, or by a letter from the nearest public library.

MINING LAWS

In May, 1923, the inspector caused to be published a new edition of the State mining laws; and as the 1925 Legislature passed a few amendments to them, a supplement containing these changes and a few extracts from the corporation law was published in 1925. These two pamphlets contained all of the Idaho mining laws as well as extracts from the United States mining laws, and amendments. The supply of these pamphlets is completely exhausted, so they are no longer available for distribution. However, a new edition will be published early in 1929, and copies will be mailed to anyone interested on request.

BIBLIOGRAPHIES

Much information concerning the geology, mineralogy and mineral resources of Idaho has been collected and published by the U. S. Geological Survey, the U. S. Bureau of Mines, and the Idaho Bureau of Mines and Geology. Much is also contained in the various reports of the inspector of mines and in journals dealing with mining and geology. In order to make this information readily available to the public, in 1921 the inspector indexed this material according to counties and subjects and published it in his report. The indexing has been kept up to date, and so far as is known, each county bibliography contains references to all material of any importance that has ever been published concerning that county. Publications relating to specific minerals found in the State are listed also under the "General Bibliography" in the back of the report. The usefulness of the bibliographies has been further increased by including publishers' addresses and information as to whether each particular reference can be procured or not. Symbols have been added as a guide to facilitate explaining this information. Practically all of the publications listed are found in the inspector's library, and arrangements have been made so that copies of those not on file can be procured when requested. However, **these publications may be consulted in all large libraries.**

GENERAL REVIEW AND 1928 ACTIVITIES

During 1928 the mining industry of Idaho witnessed a more prosperous year than at any period during the past eight years. This prosperous condition was brought about through a substantial increase in production, ore reserves of the producing mines, new ore discoveries and disclosures, new milling plants, new mine plants, new mining enterprises, one new dividend-paying mine, and larger pay rolls. In addition to the foregoing, the year witnessed the coming in of at least four large new producing mines in the Coeur d'Alene district which should equal some of the large ones which have previously been exhausted. Excepting at the Star mine of the Sullivan Mining Company, which was idle throughout the year, capacity production was maintained by all of the producers. In a few instances, production was increased over that of 1927 and there was a substantial increase in the number of new small producers.

All of the principal producing companies conducted active development work which proved the extent of their ore bodies at greater depth and laterally. The increased ore reserves and the improvements added to mine and mill plants have greatly enhanced the physical condition and future life of these mines and, added to the new enterprises, have caused an expansion of the industry for the entire State.

Many new companies were organized and much new work was undertaken by old companies. Many of these were started in the southern part of the State, although the increase in the Coeur d'Alene district exceeded that of any year during the past eight. In addition to the new enterprises, new discoveries, and improved conditions throughout the State, there were also many inquiries and investigations by those seeking mines and mining investments, particularly in Custer, Boise, Valley, and Camas counties. Many of these inquiries were conducted by large mining companies who in some instances were favorably impressed by their investigations. As Idaho offers unequalled opportunities in mining and the diversity of its mineral wealth exceeds that of any state of similar size in the Union, the substantial growth witnessed during 1928 should be maintained in the future. The healthy condition of Idaho's mining industry at the close of the year can best be outlined by the five principal factors responsible for it:

1. Increased ore reserves of producing mines.
2. New ore disclosures of importance.
3. New reduction plants.
4. New dividend-paying mines.
5. New enterprises including new mine plants.

1. Increased Ore Reserves of Producing Mines:

The principal producing mines in which the ore reserves were increased by new development work during the year were: Bunker Hill mine of the Bunker Hill & Sullivan M. & C. Co., Morning and Page mines of the Federal Mining & Smelting Co., Sunshine mine of the Sunshine Mining Co., Sidney mine, being operated by the Sidney Leasing Co., Stratton mine of the Dayrock Mining Co., and Sherman mine of the Sherman Lead Co., all in Shoshone County; Whitedelf mine of the Whitedelf Mining & Development Co., and the Elsie K. mine of the Hope Mining Co., both in Bonner County; Pittsburgh-Idaho mine of the United Idaho Mining Co., and the Allie mine owned by the Gilmore Mercantile Co., both in Lemhi County; Lone Pine mine at Golden, owned by O. F. Miiller, in Idaho County; and the Livingston mine of the Livingston Mines Corporation, in Custer County.

2. New Ore Disclosures of Importance:

The principal new ore disclosures and new discoveries of importance were those at: The Douglas mine of the Douglas Mining Co., Lookout Mountain mine of the Lookout Mountain Mining & Milling Co., and the Dickens mine of the Dickens Consolidated Mines Co., in Shoshone County: Triumph mine of the Triumph Development Co., and the Jennie R. mine, owned by

W. P. Fowler, both in Blaine County; Belshazzar mine of the Idawa Gold Mining Co., and the Gold Hill & Iowa mine of the Talache Mines Inc., in Boise County; Boyer mine under operation by the Boyer Bros. Mining Co. and the Katherine B. mine owned by H. L. Thomason and James Evans, in Bonner County; Silver Bell mine of the Federal Mining & Smelting Co. and Hornsilver mine of the Hornsilver Mining Co., in Butte County; Hall Interstate mine of the Bunker Hill & Sullivan M. & C. Co., in Valley County; and Empire copper mine of the Mackay Metals, in Custer County.

3. New Reduction Plants:

The most important new construction work to be completed during the year was the electrolytic zinc smelter at Kellogg, constructed by the Sullivan Mining Co., which is owned jointly by the Bunker Hill & Sullivan M. & C. Co. and the Hecla Mining Co. The plant was completed and operations started with a capacity of 50 tons of zinc metal per day. Metal produced by this plant is the world's highest grade zinc; for this the company is receiving a substantial bonus, the metal being so pure that new methods for its analysis had to be devised. The construction of this plant will tend to perpetuate the mining industry of the Coeur d'Alene district, as well as giving a market for the immense proved and potential tonnage of zinc ores in this district.

The principal new milling plant construction during the year was: Completion of the mill at the Hall Interstate mine by the Bunker Hill & Sullivan M. & C. Co., Valley County; completion of the mill at the Pope-Shenon mine by the Winder-Stillman Copper Co., and rebuilding of mill at Copper Queen mine by the Tendoy Copper Queen Mining Co., Lemhi County; new mill at the Golconda mine by the Golconda Lead Mines, rebuilding of the Jack Waite mill by the Jack Waite Consolidated Mining Co., new mill at the Dickens mine by the Dickens Consolidated Mines Co., all in Shoshone County; the starting of construction on new mills by the Whitedelf Mining & Development Co., in Bonner County, and by the Talache Mines, Inc., at the Gold Hill & Iowa mine in Boise County.

4. New Dividend-Paying Mines:

The year also witnessed the coming in of a new dividend-paying mine in the Belshazzar of the Idawa Gold Mining Co., located near Placerville, Boise County. This mine is the largest and most important producer of gold ore in the State, and its entry into the dividend-paying ranks will have an important bearing on the future of Boise County and the city of Boise in particular, as it is stimulating gold mining. Two other companies operated at a substantial profit, but neither of them declared an initial dividend.

5. New Enterprises Including New Mine Plants:

The outstanding new enterprises, developments, construction, mine plant installations, and principal activities can best be reviewed through an outline by counties:

Adams County

This county witnessed but little mining activity during the year, and no new enterprises were started. The Idaho Copper Company, whose properties were placed under receivership in November, 1927, continued in receivership and no development work of any kind was performed. A small amount of development work was done on the old Peacock and Bluejacket properties near Helena, and a few prospectors in other parts of the county performed a small amount of new work. The mica deposits in the Council Mountain district received more attention than in previous years, and the work done during the year greatly enhanced the possibility of these deposits being of commercial importance.

Bannock County

One of the most important new enterprises to be started in the State during the year was that of the Idaho Portland Cement Co., near Inkom, about 12 miles south of Pocatello. This company acquired a large deposit of limestone, constructed a new railroad siding, and commenced installation of a 1500-barrel cement plant. The manganese mines near Cleveland and

Lava Hot Springs were active throughout the greater part of the year. A substantial tonnage of high-grade manganese ore was produced and marketed, and three new companies were actively engaged in developing their properties.

Bear Lake County

The San Francisco Chemical Co. was the only phosphate mine in this county which was active during the year. A substantial tonnage of phosphate rock was produced and shipped to San Francisco, California, where the company manufactures it into a high-grade fertilizer. During the year four new mining enterprises, based on the development of the lead and copper properties, were organized and development work started. These were: Gold Star Mining Co.; Leadville Consolidated Mining Co.; Utah-Idaho M. & M. Co.; and Wasatch Mining & Development Co. In addition to these, the Sunset Mining Co. was active throughout the summer months, and produced and marketed one shipment of high-grade lead ore.

Blaine County

The principal operation in this county throughout the year was that of the Triumph Development Co. at the old Triumph mine, which adjoins the North Star of the Federal Mining & Smelting Co. A large tonnage of mixed ore was produced and sent to a milling plant in Utah for reduction. During the closing months of the year surveys and plans were completed for the construction of an aerial tramway, four miles long, and a mill at a point adjacent to the railroad. The Liberty Gem Mines, Inc., which was organized in 1927 to develop the new discovery made by the Mathewses in the early part of that year, maintained active development work throughout 1928. This work exposed a large amount of new ore, and at the close of the year arrangements had been completed to extend the shaft to a total depth of 150 feet. The Hailey Bonanza Mining Co., whose property is in Greenhorn Gulch north of Hailey, maintained work throughout the greater part of the year with a small crew and produced and marketed a small shipment of crude ore. The Crooked River Mining Co., operating in the Muldoon district, installed a gas-driven compressor and complete mining equipment, and actively developed its property by contract throughout the year. A new organization, the Pandora Mining Co., with property in the Lava Creek district adjacent to that of the Federal Mining & Smelting Co., in Butte County, installed a gas-driven compressor and complete mining equipment, constructed new camp buildings, and started active development work. The Vienna mine in the Sawtooth district was under operation by A. F. Peery; the Parker mine near Ketchum was actively developed throughout the year; and a few lessees produced and marketed a substantial tonnage of ore from the Independence and North Star mines owned by the Federal Mining & Smelting Co. What appears to be a substantial discovery of new ore was made by W. P. Fowler at the Jennie R. mine in the Rock Creek district. This new ore was uncovered during the closing months of the year, so at the present time its extent is not definitely known. The Wood River Mining Co. near Ketchum was active for eight months with a small crew, the funds for this work being derived from stock assessments. Peter L. Kent at the Lone Pine group on Deer Creek performed a small amount of work, and lessees at the Eureka and Idahoan groups in the Bullion district were also active.

Boise County

During 1928 this county witnessed a larger increase in new mine plant installation, new development work, new enterprises, and new discoveries than at any period during the past ten years, all of which greatly stimulated prospecting, new locations and investigations by those seeking gold mines. The most important discoveries and opening up of new ore were: That of the Talache Mines Inc., at its Gold Hill & Iowa mine, where a substantial showing of high-grade gold ore was opened up on the 700-foot level; the high-grade gold ore opened by the Idawa Gold Mining Co. at the Belshazzar mine; and the opening up of gold ore of importance which was reported at the Mountain Chief mine. The most important construction work was the

rebuilding of the mine surface plant and the installation of a new mill at the Gold Hill & Iowa mine by the Talache Mines Inc., the remodeling of its mill by the Idawa Gold Mining Co., and the remodeling of the mill at the Mountain Chief mine, which is being operated by the Federated Mines Co., a new organization. Others who developed their mines throughout the year were: The American Mines Development Co., a new organization which is operating the Brunnell group near Grimes Pass; the Missouri Mining Co., Ltd.; the Penn Mining Co. at the Coin Bond group; and Jarvis Bros. at the Hay Fork. The Idaho Gold Dredging Corporation and the Boise Placer Co., both producers of placer gold, were active throughout the summer months and each increased its production over that of the previous year. The Crooked River Mining Co. reconstructed its new dredge, which sank on being put into operation in 1927.

Bonner County

This county witnessed a greater substantial improvement in the development of new ore by old companies, new mine plant and mill plant installation, discoveries of new ore, development work by prospectors and new organizations than it had witnessed in many years. The Whitedelf Mining & Development Co. and the Hope Mining Co. both proved their properties and the continuation of ore at a greater depth, and both produced and marketed a greater tonnage of ore than for any previous year. The Whitedelf completed plans for and commenced the construction of a 75-ton flotation concentrator during the closing months of the year. Other new discoveries of importance were: That of the Boyer Bros. at the property now known as the Boyer Bros. Mining Co.; that at the Catherine group near Talache, by H. L. Thomason and James Evans; and that at the old Minerva, which was operated by lessees. The Hewer Mining Co. was reorganized as the Idaho Lakeview Mines Co., the mine reopened and active development work started. The International Portland Cement Co., with quarries at Bayview, mined the largest tonnage of limestone that it has ever produced in any one year. This limestone is ferried across the lake and then sent by rail to Spokane, where it is manufactured into cement.

Bonneville County

One of the most important new enterprises to start during the year was that of The California Co., a subsidiary of the Standard Oil Co. of California, which acquired a large acreage on the Meadow Creek structure in Bonneville County, installed a drilling rig and equipment capable of drilling to a depth of 6000 feet, and began drilling operations, the well being 14 inches in diameter. This company's activities were instrumental in the starting of other drilling operations by small companies and the investigation of petroleum possibilities in eastern Idaho by two large oil companies.

Butte County

This county witnessed more new mine development, more new investigations and more prospecting and location of new claims than during the past 30 years. A large amount of these activities were inspired to a great degree by the entry into this county of the Federal Mining & Smelting Co., who acquired the Silver Bell group in the Lava Creek district, installed complete mining equipment, and commenced driving a long crosscut tunnel. This tunnel encountered two blind veins which greatly enhance the possibility of the property developing into a substantial producer. The Wilbert Mining Co., Ltd., operating in the Dome district, maintained active production and mine development work throughout the year. This company is one of the largest producers of lead-silver ore in southern Idaho. The Dahle Bros. at the Hornsilver mine, known as the Horn Silver Consolidated Mines Co., maintained active development work throughout the year and were successful in proving a substantial showing of new ore.

Camas County

The Consolidated Mines Syndicate, which is developing a prospect in the Willow Creek district, maintained exploration work with a small crew throughout the summer months. I. E. Haight at the Tafe mine on Little

Smoky installed complete mining equipment, erected new camp buildings, and started an active mine development campaign. This work proved to be encouraging through the exposure of a substantial showing of new ore.

Caribou County

The Anaconda Copper Mining Co., which is operating one of the largest phosphate mines in the United States, enlarged its mining equipment, constructed nine new homes for its employees, and maintained capacity production throughout the greater part of the year. The phosphate rock which this company is producing is shipped to Anaconda, Montana, where it is manufactured into high-grade fertilizer and sold under the trade name of "Anaconda treble superphosphate."

Custer County

The most important event in this county during 1928 was the acquisition of the Empire copper mine at Mackay by the Mackay Metals in June. After this new company acquired control of the property, the mine and mill plants were entirely rebuilt, the mine rehabilitated, an active mine development campaign was started and operations commenced by a large number of lessees. The development work opened up a substantial tonnage of new ore, and at the end of the year the mine and mill were practically on capacity production. The Camp Bird group near Clayton was acquired by H. B. Kingsbury of Wallace and Wilbur Greenough of Spokane, who immediately started mine development and the construction of a hydroelectric power plant. After the plant is completed, during the early part of 1929, it is proposed to develop the property by a new 400-foot shaft.

The Livingston Mines Corporation improved and enlarged its mine and mill plants and proved the extent of its ore reserves through additional development at depth. This company is the largest producer of lead and zinc ore and concentrates in southern Idaho and maintains one of the largest pay rolls. The Twin Apex Mining Co. on Squaw Creek near Clayton, the Aztec Mining & Milling Co. on Fourth of July Creek, and the Crater Mines Co. on Lake Creek conducted active operations during the summer months. A large amount of new development work was performed by the MacGinniss-Walker Metals Co. at the Phi Kappa group and the Black Rock group, both on the head of Big Lost River, and the Franklin group on Yankee Fork. The Red Bird mine of the Ford Motor Co. was idle throughout the year, while the only operation conducted at the Ramshorn was that conducted by lessees, who produced and marketed a small tonnage of high-grade hand-sorted ore.

Gem County

The only active mine in this county was the Lincoln Mine Operating Co., which controls the famous old Lincoln mine at Pearl. This company maintained a pay roll of 20 men throughout the year, unwatered and repaired the 600-foot vertical shaft, and performed a small amount of development work.

Idaho County

A gradual return to more normal conditions, under which gold mining is again becoming profitable, affected this county during the year by a small substantial increase in mining operations, investigations, new enterprises and increased production. The most important of these was the resumption of operations by the Unity Gold Mines Co., which remodeled its mill, adding flotation cells, and performed a large amount of new development work in addition to operating the mill throughout the greater part of the year. An important production from a new mine was that from the Lone Pine group at Golden, Ten-Mile district, which is owned by F. O. Miiller and son; they remodeled their 5-stamp mill, constructed new camp buildings, performed a large amount of development work, and marketed a substantial amount of bullion. A new enterprise of importance is the Golden Anchor Mining Co., which purchased the Holte mine in the Marshall Lake district, constructed a small hydroelectric power plant, and commenced driving a long crosscut tunnel which will intersect the Holte vein at a substantial depth below the present workings.

The Buffalo-Idaho Mining Co. at the Mackey group in the Ten-Mile district, the Garner Electric Range Co., developing a talc property near Pollock on the Little Salmon River, and the Moose Creek Placers Co. at Elk City were active throughout the year. The principal development of importance in the Elk City district was that of George Henton, who was actively engaged in churn-drilling extensive placer ground in that vicinity. The results of this work were satisfactory, a company has been organized, and an additional drill will be installed early in 1929, that all of the ground may be prospected at an early date, in anticipation of the construction of a large dredge. The Salmon River Development Co., whose enterprise is based on the recovery of black sand from the bars of the Salmon River, commenced the construction of a large flume to convey the waters of Lake Creek to the ground it proposes to mine.

Kootenai County

This county witnessed more development and prospecting in the vicinity of Coeur d'Alene Lake than at any time during the past few years. The principal companies developing prospects in this vicinity are: Silvertip Mining Association, Caribou Mining Co., Ltd., Bluebird Mining Co., Royal Mining Co., Gray Wolf Mining Co., and Wolf Lodge Mining Co.

Latah County

The development of the mica deposits in this county was resumed during the year. The principal one of these was the Muscovite Mica Co., which reported that it had driven a 300-ft. tunnel to intersect the vein at greater depth.

Lemhi County

In point of production and number of men employed, Gilmore continues to be the most active mining camp in Idaho outside of the Coeur d'Alene district. The Pittsburgh-Idaho mine of the United Idaho Mining Co., a subsidiary of the U. S. Smelting, Refining & Mining Co., is the largest lead-producing mine and maintains the second largest pay roll in southern Idaho. During the year this company extended its shaft from the 800-foot level to the 1000-foot level, where the ore bodies proved to be of greater extent than on the 800-foot level. In addition to sinking the shaft, this company performed a large amount of development work and produced and marketed a large tonnage of high-grade, direct-shipping ore, some of which was obtained by lessees. During the year the United States Smelting, Refining & Mining Co. obtained a lease and option on the Allie mine and commenced developing it through what is known as the Transportation tunnel. This tunnel is about 600 feet under the upper workings, which were operated throughout the year by lessees who produced a substantial tonnage of direct-shipping ore. Two small organizations developing prospects in the Gilmore district were also active during the year. The Spring Mountain and Nicholia districts witnessed a little increase in activity over the previous year, and one small organization shipped two carloads of hand-sorted ore.

The only work done in the Leadore district during the year was necessary annual labor. In the vicinity of Salmon there was a marked improvement in mining conditions which was principally brought about by the operations at the Pope-Shenon mine by the lessee, the Winder-Stillman Copper Co., which rebuilt the mill, added flotation cells, performed a large amount of development work in the mine, and produced and marketed a substantial tonnage of high-grade copper concentrate. The Tendoy-Copper Queen Mining Co., operating the Copper Queen mine, rebuilt the mill, constructed new mine camp buildings, and placed the mine in condition for operation. The Harmony Mines Co. performed a small amount of development work and operated its mill for a short period, although the company's principal activity appeared to be that of raising more funds.

In the Leesburg district the principal new activities were based on the revival of hydraulic placer mining. Four enterprises constructed ditches, dams, and flumes, completed the installation of hydraulic mining equipment, and performed a small amount of hydraulicking. These were: Bonanza Placer, Inc.; H. F. Byram at the McNutt Placers on Moose Creek; Montana

Mining & Livestock Co.; and Leesburg Placer Mine Co. The Patterson Mines Corporation, which is operating the Ima mine on Patterson Creek in the Pahsimeroi district, completed the rehabilitation of the power plant and mill and commenced active mine development work. The Clipper Bullion mine in the Shoup district was acquired by H. W. Ingalls and associates of Mullan, and development work started in October. The Buckhorn Mining Co., a new organization on the Sellers Bros. property on Little Eight-Mile, installed a compressor, complete mining equipment, and began the active development of the property.

Owyhee County

The new dredge of the American Gold Dredging Corporation, being of the flume type, was completed and placed in operation in January, 1928, and continued without much interruption throughout the year. During the year three new development enterprises were started, and a large number of investigations by those seeking gold-silver mines were conducted.

Shoshone County

During 1928 this county witnessed more new development, the starting of more new enterprises, more new profitably operating mines, a larger pay roll, and a greater production than at any time since the peak of wartime activities. At least three new producers reached the stage that places them in the list of mines with an assured future, and two others rapidly approached that position. All the large mines conducted active development work throughout the year which proved the extent of their ore bodies at increased depth and laterally. The increased ore reserves and the improvements added to mine, mill, and smelter plants, together with the new Sullivan zinc plant, have greatly enhanced the physical condition and future life of the mines, as well as assuring a long period of prosperity for the Coeur d'Alene district. The thought and attention that all of the large operators are giving to safety conditions and safety supervision were reflected in the smallest number of fatal accidents that have ever happened throughout the district in any one year.

The principal producing mines in which the ore reserves were increased by new development work during the year were: The Bunker Hill mine of the Bunker Hill & Sullivan M. & C. Co., whose ore deposits were opened on the 1900-foot level; the Hecla mine of the Hecla Mining Co., where the shaft was extended and ore opened to the 2800-foot level from the 2000-foot level; the Morning mine of the Federal M. & S. Co., opened to the 3450-foot level, and the Page mine of the same company to the 900-foot level; the Sunshine mine of the Sunshine Mining Co., to the 900-foot level; the Dayrock Mining Co., formerly the Strattons Mines Co.; Sidney Leasing Co.; Jack Waite Consolidated Mining Co.; Sherman Lead Co.; Douglas Mining Co.; Galena mine of the Callahan Zinc-Lead Co.

The most important new construction work completed during the year was the electrolytic zinc plant at Kellogg which was built by the Sullivan Mining Co. to treat the zinc ores of the Coeur d'Alene district. The Sullivan Mining Co. is owned jointly by the Bunker Hill & Sullivan M. & C. Co. and the Hecla Mining Co. The Hercules mill at Wallace, owned by the Hercules Mining Co., was rebuilt, a zinc flotation unit added, and converted into a custom mill which now offers milling facilities for practically all the mines operating in the vicinity of Wallace. During the year this mill treated the ores from the following mines: Tamarack & Custer Consolidated Mining Co.; the Humming Bird Mining Co.; the Sherman Lead Co.; and the Dayrock Mining Co., as well as from a few small producers.

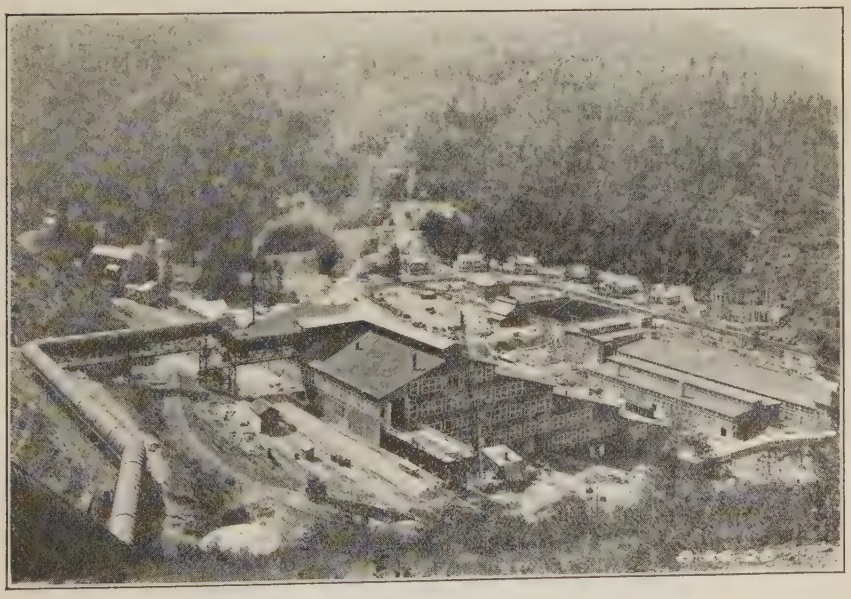
Other new construction work was: New flotation concentrator of the Dickens Consolidated Mines Co.; new flotation concentrator of the Golconda Lead Mines; the rehabilitation of the Amy Matchless mill by the Lookout Mountain Mining & Milling Co.; and completion of the new flotation concentrator of the Cedar Creek Mining & Development Co.

Working conditions throughout the Coeur d'Alene district are exceptionally favorable. All the mines are well ventilated, and the operators devote much time and thought to making the mines safe and keeping them in

such condition that the men can do a full day's work without expending the energy that is necessary in poorly ventilated mines. Both attention and money have been devoted to this phase of the operations, and it can safely be said that these are the best ventilated mines in the country. Serious attention is given not only to ventilation, but to safety, recreation, and general welfare. The value of the welfare work to company employees and to the communities has been demonstrated through the Morning Club at Mullan and the new club house built at the Page mine in 1928, both erected by the Federal M. & S. Co.; the Y. M. C. A. Building at Kellogg, donated by the Bunker Hill & Sullivan M. & C. Co.; and the Hercules Hall at Burke, erected by the Hercules Mining Co. Another outstanding contribution to this work is the baseball field—located a short distance above the town of Burke and named Hearn Field in honor of W. F. Hearn of that town—which the Hecla Mining Co. constructed and donated to the community during 1927. The building of the field involved engineering and construction difficulties, as level land in this vicinity is unknown; it was done in the interests of inter-mine baseball teams, which are sponsored by all the large mines and between which there is keen rivalry.

The outstanding new developments, new construction and new enterprises can best be reviewed through an outline by companies.

The extensive development work which was done during 1927 in the Bunker Hill mine greatly increased its resources. The completion of the shaft to the 1900-foot level and the opening of the ore bodies at that depth, where the ore and geological conditions were found to be normal, added much to the life of the mine which is estimated in decades instead of in years. The Bunker Hill & Sullivan M. & C. Co., because of the magnitude of the Bunker Hill mine, has become more of a manufacturing than a mining operation, and with its smelter, mills, experimental plants, and organization, is one of the largest of its kind in the world. This company maintained its usual production record throughout the year, and the many plant betterments which were added greatly increased the efficiency of the enterprise. The principal betterments were the remodeling of the Sweeny mill and enlargements and improvements at the smelter and the surface plant of the mine. The Tainton electrochemical experimental lead-leaching plant was modified and improved, and many details perfected which add greatly to the importance of the process. In addition to extensive development work in the Bunker Hill mine, this company was actively engaged in prospecting and developing other properties throughout the Coeur d'Alene district, in Valley County, and in Nevada, Alaska, and Canada. A projected tunnel one mile in length, to intersect the Crescent vein at a greater depth, was started on the property formerly owned by the Big Creek Mining Co., the portal of this tunnel being located adjacent to the Crescent mill, which was constructed in 1927.



The Hecla Mining Co., which is recognized as one of the principal lead-silver producing companies of the United States, greatly increased its ore reserves and resources in the Hecla mine. The vein was further explored on the 2800-foot level and work was completed in sinking the main shaft to this level. The mine and mill plants were enlarged and improved, and the mine maintained in first-class condition. In addition to this, the contract was let for and construction was started on the installation of a powerful new electrically operated hoist; when installed, this hoist will be the largest and most complete in the Coeur d'Alene district. At the old Tiger-Poorman mine, which was purchased in 1920, machinery and equipment were installed in 1927 and work was started on unwatering it to the 600-foot level. During 1928 this work was completed, and a large amount of exploration work was done on the 300-foot and 600-foot levels.

The Morning mine of the Federal Mining & Smelting Co., which is one of the oldest in the Coeur d'Alene district in point of continuous production, as well as one of the largest lead-silver-zinc mines in the United States, was maintained at capacity production throughout the year. The number of years that this record will continue is unknown, as development

work on the 3250 and 3450-foot levels has proved the ore bodies to be larger and more extensive than on any of the upper levels. During the year the 3050-foot level was opened to the full length of the ore, and the shaft completed from the 3050 to the 3450-foot level. The mine and mill plants were greatly enlarged and improved. The principal improvement was the installation of a modern electrically operated hoist, which required the cutting of a new station for its accommodation. The change in the milling methods from jigs and tables to fine grinding and flotation resulted in a reduction of milling costs and an increase in recoveries. In addition to the ore mined under company operation, a large tonnage was extracted from the upper levels by a number of lessees; the most important of these is the Sheridan Lease, which employes over 100 men.

The Page mine of the Federal Mining & Smelting Co., in Government Gulch near Kellogg, was reopened in 1926, equipped with mine and milling plants, and placed on a producing basis. It was operated throughout 1928 on a profitable producing basis. During the year the ore bodies were fully opened on the 900-foot level, at which point they proved to be of greater extent and higher grade than on any of the upper levels. The success of this operation can be accredited entirely to flotation, because with the old milling methods it was impossible to mine and mill such low-grade ore at a profit. One of the valuable improvements added to this mine during the year by the company was the construction of a club house and recreation hall for the benefit of the employees.

The Sullivan Mining Co. suspended production in 1927 at its Star mine, pending completion of its new electrolytic zinc plant at Kellogg, and devoted all its energies to this construction and to underground development work. The 4000-foot level of the Star mine is connected with the 2000-foot level of the Hecla mine by the Star crosscut, which is 8900 feet long. This crosscut made a blind connection with the Star vein at a point 2800 feet below the Star tunnel, and a vertical operating raise, which was driven to connect the crosscut and Star tunnels, was completed during the year. In addition to this work, the mine was further placed in a position

SULLIVAN ELECTROLYTIC ZINC PLANT.

to permit production, which is anticipated early in 1929. The zinc plant, which was fully described, with flow sheet and illustrations, in the 1927 report of the mining industry of Idaho, was completed and formally placed in operation on June 24, and the first metallic zinc was produced on August 3. The metal produced by this plant is of exceptionally high grade and is finding a ready market at an increase in price over that of any other zinc metal. This part of the Sullivan Mining Co. now constitutes one of the largest and most important enterprises in the Pacific Northwest, and one which assures the perpetuation of the mining industry in Shoshone County.

The Tamarack & Custer Consolidated Mining Co., which operates one of the substantial producing mines of the Coeur d'Alene district, maintained a steady output and an extensive mine development campaign throughout the year. During the year a sorting plant was installed at the portal of No. 7 tunnel; the mill and tramway were abandoned, and No. 7 tunnel was converted into the outlet for the ore, whence it was transported to railroad cars and then to the Hercules Mining Co.'s mill at Wallace, which began to treat the entire output from this mine.

At the Galena mine of the Callahan Zinc-Lead Co. capacity output, together with an extensive development campaign, was maintained until July, at which time the mill was placed on a one-shift basis, the men being taken from production work in order to increase development. At the same time an extensive diamond-drilling campaign was started. The diamond drilling was successful in encountering a heretofore unknown vein, and at the close of the year work had started on driving a crosscut to it. As this mine is located in the so-called "dry belt," or south side of the district, the success it is attaining has been an important factor in stimulating development throughout this area.

The Sunshine Mining Co. improved its mine and mill plants, and installed a new eletrically driven hoist at the winze on the 500-foot level. The extension of the winze from the 700 to the 900-foot level was completed and the ore opened on both of these levels, at which points it proved to be of greater extent and value than at any of the upper levels. In addition to the foregoing, a large amount of lateral development on the various levels was performed. This work greatly increased the ore reserves. The payment of dividends, which was started in 1927, was continued throughout the year.

The Sidney, operated by the Sidney Leasing Co., suffered a severe handicap through the destruction by fire of the upper terminal of its tramway. This retarded production, as well as decreasing the dividend payments from those made during previous years. The terminal was reconstructed, the shaft sunk an additional 200 feet in depth, and a large amount of lateral development work performed. This work greatly increased the ore reserves. The fact that this mine, located on Pine Creek, is being operated at a substantial profit, is significant in proving that this section of the Coeur d'Alene district is not without merit.

One of the large and most active development campaigns conducted during the year, including mine improvement, was that of the Dayrock Mining Co., formerly Strattons Mines Co., at the Stratton mine. During the year the shaft was extended to the 400-foot level and a large amount of development work performed on the 300-foot level. This work greatly increased the known ore reserves. In addition to the foregoing, production was maintained throughout the year and the enterprise was placed on a profitably operating basis. This mine is fast developing into one of the important producers of the Coeur d'Alene district.

The Gold Hunter Mines, Inc., at Mullan, one of the oldest mines in Shoshone County in point of continuous production, maintained capacity output and an extensive development campaign during the year. The principal new work was drifting on the 1500 and 1600-foot levels, which resulted in exposing new ore. By proving the continuation of its ore at this depth, the company greatly increased its resources and future life.

In addition to the foregoing work, the mill was enlarged and improved by the addition of more modern equipment.

In January the Jack Waite Mining Co., Ltd., which owned the Jack Waite mine on the Idaho side of the State line, and the Silver King Mining Co., a Montana corporation which owned the Jack Waite Extension on the Montana side of the line, were merged as the Jack Waite Consolidated Mining Co., after which the mine was entirely rehabilitated, electric-trolley haulage installed, the mill modernized and its capacity increased to 400 tons per day, a large amount of lateral development work performed, and a winze sunk on the ore body to a depth of 200 feet. The new improvements and the additional ore exposed added greatly to the importance of this enterprise.

The Constitution Mining & Milling Co., whose mine is on Pine Creek, was idle throughout the greater part of the year, because of fire destroying the entire surface mine plant. The plant was reconstructed, new equipment installed (including a new electrically driven hoist), and the shaft from the tunnel level to the 400-foot level was completed.

The Douglas Mining Co., Ltd., whose property is located on Pine Creek near the Constitution, maintained an active development campaign until February, at which time the entire surface plant was destroyed by fire. As rapidly thereafter as possible, complete new buildings were constructed, new equipment installed (including electrically driven hoist), and operations were resumed. The development work consisted principally of extending the No. 2 and No. 3 tunnels; in December work was started extending the shaft from the 180 to the 300-foot level. This work resulted in greatly increasing the known ore reserves.

One of the largest new mills to be constructed in Shoshone County during the year was that of the Dickens Consolidated Mines Co., whose property is on Moon Creek. In addition to constructing the mill, the company maintained an active development campaign throughout the year. This work consisted principally of sinking the shaft from the No. 5 to the No. 7 level and lateral development work on both of these levels.

One of the principal new mines which started production during the year was that of the Sherman Lead Co., whose property is on Canyon Creek east of the Tamarack & Custer. Its mine is connected with the No. 5 tunnel of the Hercules mine through the Humming Bird workings, and the ore was taken to the Hercules Mining Co.'s mill at Wallace for reduction. In addition to maintaining production throughout the greater part of the year, a large amount of development work was performed. This company absorbed the Oreano Mining Co., Ltd., through an exchange of stock, thus adding five important mining claims to its holdings.

The Humming Bird Mining Co. conducted an active development campaign throughout the year and produced a substantial tonnage of ore, which was sent to the Hercules Mining Co.'s mill at Wallace for treatment.

One of the largest development campaigns on Pine Creek during the year was that of the Lookout Mountain Mining & Milling Co., which also performed some new construction and installed new equipment. In March its No. 3 tunnel encountered an excellent showing of ore, after which ore-bins were constructed, an aerial tramway 1600 feet in length installed, new camp buildings erected, and the Amy Matchless mill acquired under lease and rehabilitated. After this work was completed, the ore was transported from the terminal of the tramway to the mill by truck and a small tonnage of concentrate was produced. The vein was opened to a depth of 150 feet below No. 3 tunnel by a shaft.

One of the principal new mills constructed during the year was the 200-ton flotation concentrator of the Golconda Lead Mines. The mill building was erected, machinery and equipment installed, and operations started on August 1, after which capacity production was maintained on a 24-hour operating basis for the remainder of the year. During construction of the mill, the mine was actively developed and placed in position for production. This work consisted principally of completing the

800-foot raise from the Mayflower tunnel to the surface and extending the vertical shaft from the 1200 to the 1400-foot level. In November this company purchased the property owned by the Mayflower Mining & Development Co., thus acquiring title to its principal operating tunnel and greatly adding to the extent of its holdings.

On Nine Mile Creek near the old Success mine, the Bell of the West Mining Co. constructed two large boarding and bunk houses, office building, blacksmith shop, and compressor building and installed an electrically driven hoist and complete mining equipment preparatory to starting an active development campaign.

At the King of Pine Creek mine the New Jersey Consolidated Mines Co. constructed a new blacksmith shop and a compressor building, installed an electrically driven compressor and an air-driven hoist, erected a headframe, and commenced sinking a 200-foot vertical shaft.

Companies which installed new equipment and conducted active development work during all or part of the year were as follows:

The Cedar Creek Mining & Development Co., Ltd., installed a large electrically driven compressor, completed adjustments on its new mill, which was built in 1927, and commenced milling operations in April. After running the mill a short period it was found necessary to suspend operations pending installation of the new compressor.

The Delaware Mines Corporation installed a new electrically driven compressor and complete mining equipment at the Red Monarch tunnel and commenced the extension of this tunnel under contract.

The Lansing Silver-Lead Mining Co. installed a small gas-driven compressor and complete mining equipment, and conducted an active development campaign throughout the greater part of the year.

The Mutual Mines Development Co. erected a new building and installed a new electrically driven compressor to replace its former equipment which was destroyed by fire in February. Excepting the time lost on account of the fire, this company maintained an active development campaign throughout the entire year.

The Blue Eagle Mining Co., whose property is on Pine Creek, installed a new electrically driven compressor and complete mining equipment, and performed a small amount of development work under contract.

The Commercial Traveler Mining Co. installed an electrically driven compressor and complete mining equipment, and drove a 500-foot crosscut tunnel under contract.

The Decker Development Co., which controls the old Stewart mine at Kellogg, installed a 4-drill electrically driven compressor and reopened the main haulage tunnel.

Companies which employed more than five men and which conducted development work throughout the year were as follows:

The Alameda Mining Co., whose property adjoins the Success mine on Nine Mile Creek, further explored the vein by drifts and raises.

The Ajax Mining Co. extended its shaft from the 200-foot to the 400-foot level, and performed a large amount of development work at the lower levels.

In April the Atlas Mining Co. commenced work on a projected 3000-foot drift on the Carbonate Hill vein. The Evolution Mining Co. performed a small amount of development work on the 300-foot level and commenced extending the shaft an additional 200 feet. The Hecla Extension Mining Co. unwatered the Anchor shaft to the 600-foot level, after which a large amount of development work was performed on that level. Part of this work consisted of diamond drilling. The Hypotheek Mining & Milling Co. performed a large amount of drifting and crosscutting on the 900-foot level of its mine.

The Independence Lead Mines, Ltd., maintained an active development campaign throughout the year. This work consisted principally of extending the No. 4 tunnel, which is the lowest level in the mine. The Little Sunshine Mining Co. completed its crosscut to a total length of 2700 feet.

The Nabob Silver-Lead Mining Co. unwatered its 300-foot shaft and performed 1200 feet of development work by contract.

The Olympic Mines Co., whose property is on Pine Creek, was active throughout the year. At the property of the Silver Summit Mining Co. mine buildings were erected and work was started on a projected 4000-foot crosscut. The Wolverine Mining Co., Ltd., extended its shaft from the 150-foot level to the 450-foot level and commenced drifting at the lower level.

Valley County

One of the largest and most important enterprises bearing on the future of south-central Idaho is the mine plant installed, buildings erected, and road construction performed during 1928 by Fred W. Bradley, president of the Bunker Hill & Sullivan M. & C. Co., operating as the Yellow Pine Co. near Yellow Pine. During the year construction on a 12-mile highway from Yellow Pine to Meadow Creek was started; a steam-driven sawmill, compressor, and complete mining equipment were installed at a large expenditure, as the equipment had to be drawn over the old Thunder Mountain road. The Yellow Pine Co. is developing the Meadow Creek gold mine and the quicksilver properties of the United Mercury Mines Co. Another large operation in this county which is also of importance to southern Idaho is that of the Bunker Hill & Sullivan M. & C. Co. at the Hall Interstate and Lost Pilgrim mines. During the year this company completed the erection and installation of a 100-ton flotation concentrator with a building of sufficient capacity to house a 300-ton one, performed a large amount of development work, and placed the mine and mill in condition for production early in 1929.

The beginning of construction by the U. S. Forest Reserve on its projected highway from Yellow Pine over Profile Gap into the Edwardsburg and Big Creek districts, of which approximately 4 miles were constructed during the year, was one of the principal new road projects to be started. This road and the road into Meadow Creek, which is being constructed by the Yellow Pine Co., will open up one of the largest virgin mineral districts in the State—the Big Creek and Edwardsburg districts. During the year these districts received more attention from prospectors and large organizations seeking gold-mining enterprises than at any time since the Thunder Mountain boom, and at the close of the year three new organizations were actively engaged in raising funds with which to commence work in 1929.

TRANSPORTATION DURING WINTER MONTHS IN CENTRAL VALLEY COUNTY.

OWNERSHIP OF TIMBER ON UNPATENTED MINING CLAIMS IN FOREST RESERVES

On February 11, 1928, Judge C. C. Cavanah, of the District Court of the United States for the District of Idaho, Northern Division, rendered an important decision bearing upon the ownership of timber on unpatented mining claims in Forest Reserves and the right of the Secretary of Agriculture, through the Forest Service, to sell or dispose of any timber within the boundaries of such a claim.

The case originated in Shoshone County, where the Forest Service had entered into a timber sale contract with the Jack Waite Mining Company. In accordance with the terms of this contract the mining company was permitted to cut "approximately 500,000 feet of timber * * * from certain mining claims located and possessed by" Dan Beasy, Frank McLaughlin, James Leary and Dennis Conners. These men, acting through their attorneys, applied to the State District Court of Shoshone County for a restraining order temporarily forbidding the mining company to cut timber on the mining claims in question. This order was granted. Shortly thereafter the United States District Attorney, upon representations made by the Forest Service, brought an action in the Federal Court, in the name of the United States Government, against the owners of the mining claims. This action asked the court to restrain the claim owners from interfering with the mining company in carrying out the terms of its contract with the Forest Service. In denying the Government's prayer for a temporary injunction, Judge Cavanah said in part:

> " * * * * The only contention of the government is that the Secretary of Agriculture has a right to sell and dispose of the timber in the national forests, and that although the defendants may have a valid lode mining location, yet they have no exclusive right to the timber growing thereon.
>
> "This brings us to a consideration of the principal question involved, as to what are the rights of the locator of a mining claim upon public lands, and we must turn to Section 2322 of the Revised Statutes of the United States (U. S. Comp. Stats., Sec. 4618, p. 5466) to determine it.
>
> "It is there declared that the locators 'shall have the exclusive right of possession and enjoyment of all the surface included within the lines of their locations, and of all veins, lodes, and ledges throughout their entire depth, the top or apex of which lies inside of such surface-lines extended downward vertically,' etc. This right has been extended to the use of sufficient timber upon the claim for development purposes, and includes the use of timber for fuel and what is necessary for shafts, tunnels and the construction of buildings as may be necessary as an adjunct to such development. The purpose of Congress in enacting this statute was to secure the fullest working of the mines and complete development of the mineral property by securing to the locator the undisturbed possession of not less than a specified amount of surface, and this surface is as much the property of the locator as the vein or lode discovered and located by him. * * *

"It is true that the locator has only a possessory title, but it is just the same a valuable property right, and as long as he complies with the law it is good against the United States as well as the world. * * And when it appears, as it does here, that the locators of these claims have initiated them in good faith, and have complied with the spirit of the law, their rights will be protected not only to extract ore from the claims, but also to the use of the timber growing thereon in the development thereof, against any act or attempt on the part of the United States to deprive them of such use of the timber.

"In the well considered opinions in Teller v. United States, 113 Fed. 273, and United States v. Rizzinelli, et al., 182 Fed. 675, the conclusion is reached that the rights of a locator of a mining claim within the boundaries of a forest reserve are substantially those of one who locates such claim upon the public domain, and gives the locator the right of 'exclusive possession and enjoyment of all the surface of their locations.' His rights of enjoyment, including the surface of his claim, are not qualified nor can they be infringed upon by including the claims in a forest reserve.

"The general mining laws of the United States apply to mining claims located within the forest reserves, as the Act creating the national forests declares that any mineral lands therein which have been or which may be shown to be such, and subject to entry under the existing mining laws of the United States, shall continue to be subject to such location and entry, notwithstanding any provision of the National Forest Act.

"Having reached the conclusion that the defendants have initiated in good faith their location of these claims, and are complying with the law in possessing and operating the same, and have exclusive right to the use of the timber in question for mining purposes, we then find from the undisputed affidavits presented by the defendants that all of the 750,000 feet of timber growing upon the claims will be needed in their development, and that one-fifth of that amount has already been cut and removed by the defendants. If the Secretary of Agriculture can deprive these locators of two-thirds of the timber upon the contention that they do not need but one-third thereof, he would be granted the power of deciding what amount of timber is necessary to be used in the development of mines, and those engaged in locating and developing mining property would have to secure permission from the Secretary as to the amount of timber they could use upon their claims. The law does not contemplate such a course to be taken. Should the court restrain the defendants from cutting and using the 500,000 feet of timber covered by the contract of sale between the United States and the company, and the company is permitted to deprive the locators of the necessary use of it in the development of their claims, then we have a situation of the Government first, by statute, granting to the defendants, as locators, the exclusive right to the timber, and thereafter conveying it to another, thus depriving the first locators of their statutory right of use. It would be an idle thing to grant an exclusive right by one act of law, and then take it away by another. This course is not only in violation of their rights granted by the statute, but does not appeal to a court of equity as being just."

Fig. 1. 110,000-VOLT TRANSMISSION LINE IN BURKE CANYON

ELECTRICITY IN THE COEUR D'ALENE DISTRICT

By R. B. Childs,
The Washington Water Power Company.

The use of electricity for mining operations in the Coeur d'Alene mining district is not a new idea. Thirty years ago there were several small isolated plants in the district, both hydroelectric and steam, that supplied power for pumps, compressors and small miscellaneous motors. The early prospectors and operators believed that there were tremendous ore bodies awaiting development and that the district contained untold mineral wealth. It was evident that considerably more power than was then available in the territory was essential if these developments were to be made, and it was logical to obtain such power from some public utility generating power outside the district.

Fig. 2. 20,000 K.V.A. BUNKER HILL SUBSTATION

In 1903, The Washington Water Power Company built the first high tension transmission line into the Coeur d'Alene from its plants near Spokane. Electric power was delivered over this line at a potential of 60,000 volts as far as Kellogg, in August of 1903, and by December of the same year, the line was extended to Burke. This marked the beginning of increased mining and milling operations which have gone forward steadily year by year. Believing in the future growth of the district and in order to make the existing service more reliable, the Power Company built another 60,000-volt line in 1907 from Spokane as far as Cataldo and continued this second line on to the switching station at Mullan Junction in 1909. These two lines supplied all the power used in the territory up to 1915 when the Idaho Trans-

mission Company built two 110,000-volt lines into the Burke district and supplied power from Thompson Falls to various customers in that area.

In the meantime, the growth in the Power Company's load kept pace with the increased mining operations. As the ore persisted to depth, existing shafts were deepened; larger compressors were installed; electricity was available at lower and lower levels in the mines; the faithful mule moved into the background and was replaced by the electric locomotive; the increased tonnage necessitated construction of new and larger mills; new ore bodies were discovered, necessitating an ever increasing extension of power lines, and many new other uses were found for electric power. From the early isolated power plants furnishing light and power to the mines thirty-odd years ago, the load has grown steadily until at the present time the use of electric power in the entire Coeur d'Alene district amounts to a demand of some 40,000 horse power.

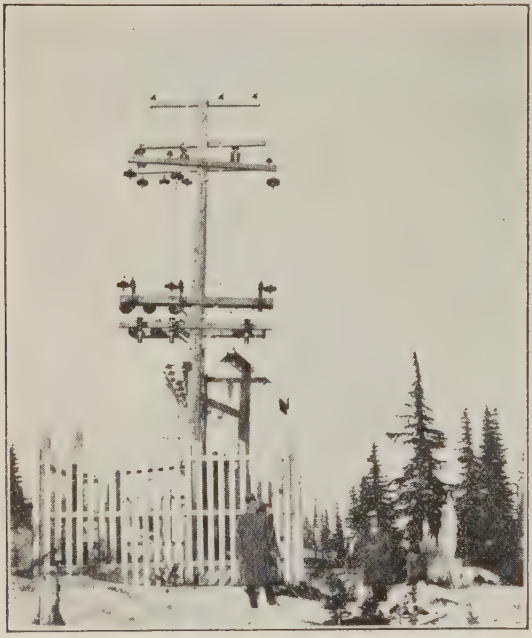


Fig. 3. TYPICAL 13,000 TO 2300-VOLT DISTRIBUTION SUBSTATION

Four years ago, it was felt that the two 60,000-volt lines of The Washington Water Power Company were not going to be large enough to supply the future electric power needs in the district, and in 1926, the Power Company built a new large capacity 110,000-volt line which replaced the original 60,000-volt line built in 1903. The general type of construction of this new line and some of the country which it serves are shown in Figure 1. The second 60,000-volt line referred to above, is still in service, supplementing the new 110,000-volt line and is connected to the latter at the Power Company's substation at Government Gulch.

Power is thus delivered in the Coeur d'Alene mining district from the Power Company's system at 110,000 volts. This is reduced to 13,000 volts through banks of transformers at two main switching stations: one at Kellogg and the other at Mullan Junction. The Bunker Hill substation at Kellogg, shown in Figure 2, supplies power from Cataldo on the west to Osburn on the east. A similar substation at Mullan Junction supplies the load from Osburn to the Wallace district, up the Burke canyon, as far as Larson on the east and into the Murray district on the north. From these switching stations, secondary feeder lines are built operating at 13,000 volts which spread out like the spokes of a wheel, forming a network over the territory. Certain additional feeders can be arranged to connect the main 13,000-volt feeders together in cases of emergency, thus insuring better service and continuity of operation on the secondary network. Power is delivered to the customers for mining operations at 2300 volts and in most cases therefore it is necessary to install a transformer on the customer's premises which reduces the line voltage of 13,000 down to 2300 volts. Figure 3 shows the

general type of construction of such a distribution substation. Where it is possible, more than one customer is served from one of these stations, the determining factors being the size of the customer's load, its location, and possible additional load that may be secured in the future near that particular point.

Outside of the larger operators with extensive surface operations, the mining customers of the Power Company are fortunate in that their operations are underground and are not influenced by weather conditions. The rugged and broken character of the Coeur d'Alene country, the excessive snowfall and storms during the winter months, and the fire and lightning hazard during the dry summer months, all combine to handicap the Power Company in the original construction of its lines and in the maintenance of reliable and continuous service after the lines are built. Reference to Figure 4 will indicate some of the difficulties which the Power Company experiences in maintaining its lines. This is a portion of a 13,000-volt line in the Murray district on the summit near the Idaho-Montana line. In this particular location, the winter conditions are extremely severe and in order to maintain service at all, it was found necessary to replace the ordinary copper wire with five-sixteenths stranded steel wire, to more than double the normal number of poles per mile and to guy practically every structure four ways.

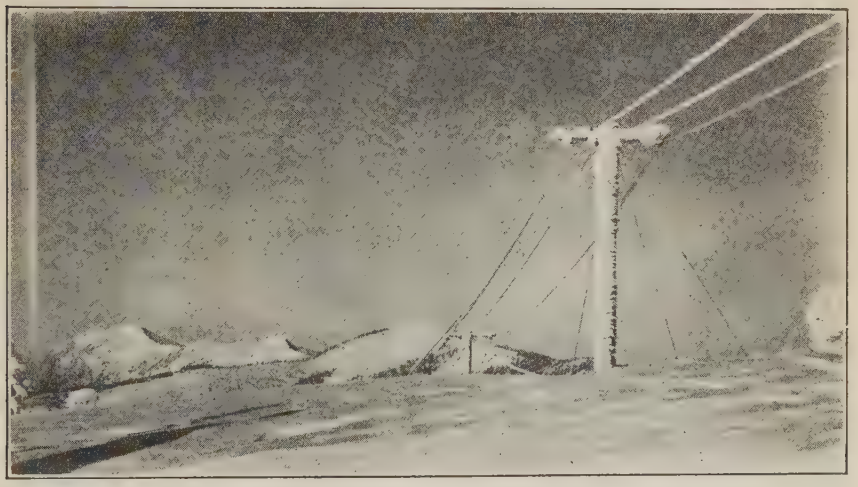

Fig. 4. WINTER SCENE ON 13,000-VOLT FEEDER NEAR IDAHO-MONTANA SUMMIT

Patrolling and maintaining distribution lines over much of the Power Company's Coeur d'Alene territory necessitates the use of snowshoes during the winter months. At such times, travel by automobile is often out of the question, and material and supplies must be handled by horses. Severe storms and the accompanying heavy snows retard the work of repairing any damage to the lines, and reduce very materially the physical effort which a man can put forth on such work. Nevertheless the service must be maintained and the Power Company uses its best endeavor to do so by providing stability in the original construction of its lines, followed by frequent patrolling and inspection. The contour of the country not only makes line construction difficult but also offers obstacles in the location and erection of substations. In the Burke Canyon level ground is at a premium, as the design of the substation shown in Figure 5 will indicate. In this case it was necessary to put the transformers on one level, the 110,000-volt oil cir-

cuit breakers on a higher level and the low-tension switches, lightning arresters and meters on still a higher level.

The flexibility and reliability of electricity make it an ideal form of power for mining operations. This is particularly true in the Coeur d'Alene. If electric power were not universally available in the district, other forms of energy would have to be used, necessitating long and expensive hauling of fuels, oil, supplies, etc. This alone would add materially to the cost of mining operations without taking into account the losses due to delays occasioned by improper functioning of the particular form of motive power employed. Distances in the territory are no real handicap to the transmission of electric power, hence it is relatively as simple to the customer to receive power half way up the side of a mountain as it would be if he were immediately adjacent to one of the main transforming substations.

The uses to which the power is put are varied, and include all the steps in the process incident to the extraction and reduction of the ores. Following the early discovery, electricity provides the energy for the resulting mining, hoisting, milling, concentrating, smelting and refining operations. It is quite a step forward from the early one-man-power hand-operated windlass to the modern 2000-horsepower electrically operated hoist serving depths of over 3000 feet; it is an equally long step from the former discarded complex zinc-lead ores to the modern, highly technical electrolytic deposition of zinc metal. Electric power has played its part in these developments and will continue to help the further advances that are forecasted for the metallurgical art. The past year has witnessed a very material increase in mining activities throughout the entire Coeur d'Alene district, and all indications point toward a continuation of its growth and prosperity.

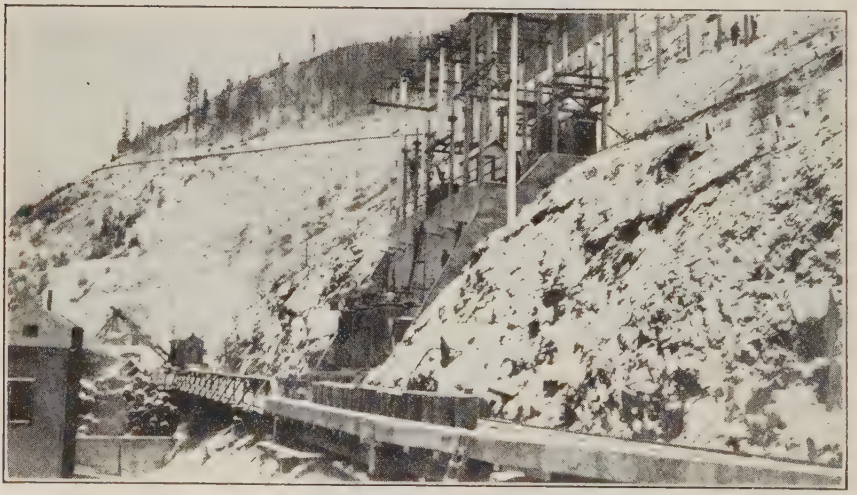

Fig. 5. CONSTRUCTION OF 6,000 K.V.A. SUBSTATION ON HILLSIDE

MINE-RESCUE WORK IN THE COEUR D'ALENE DISTRICT

By K. T. SPARKS, Director, Central Mine Rescue Station.

One of the worst catastrophes that can happen in the mining industry is an underground fire, and few mines are free from such a hazard. If the fire is accompanied by any great loss of life, thereafter that mine has a "black eye" in the minds of the underground workers. In the event of a large fire, a great amount of repair work is necessary before the mine returns to a production basis, and much money is lost on account of the enforced shutdown.

Every mine which has passed the prospect stage should install and maintain a mine-rescue station suitable to its requirements, just as all villages and towns, however small, have some sort of fire department. Stringent fire-prevention measures are a necessity, and next in importance is equipment for fire fighting, including the necessary training of the personnel in the use of the equipment.

In 1923 the principal mine operators in the Coeur d'Alene district, realizing the necessity of mine-rescue equipment and training, established a central mine-rescue station. Since then it has been in operation, working smoothly and at small expense.

The central station is a mine-rescue car, which is maintained in Wallace on a spur track common to both railroads of the district, in order that it may be quickly moved to any point where needed. This car is a large railroad coach rebuilt for mine-rescue purposes. It carries 14 sets of oxygen breathing-apparatus, commonly called "helmets"; 12 large storage tanks of oxygen; 1000 regenerating cans; one power-driven and one hand-operated pump; also spare parts, necessary tools, and miscellaneous equipment, including resuscitating apparatus and various gas-testing devices, as well as a complete line of fire-hose fittings, revolving nozzles, spray nozzles, and quick connectors. The car is equipped with living quarters for a small crew and is ready to move at any time.

MINE-RESCUE CAR

Rescue Stations Located at Mines

The Hecla Mining Co. and the Hercules Mining Co., both at Burke, the Federal Mining & Smelting Co. at Mullan, the Tamarack & Custer Consolidated Mining Co. at Gem, and the Bunker Hill and Sullivan Mining & Concentrating Co. at Kellogg all have complete rescue stations located at their mines. Each of these stations has from 8 to 15 sets of breathing-apparatus and an ample supply of spare parts, regenerating cans, and oxygen pumps. In the event of a large mine fire in the district, the equipment from all the mine stations, together with the apparatus from the mine-rescue car, can be concentrated at one place in a very short time, thus making available about 100 sets of apparatus and a large quantity of spare parts.

Type of Breathing-Apparatus

The Paul self-contained breathing-apparatus is standardized for use in the Coeur d'Alene district, and all the mine stations and the mine-rescue car are equipped with this type. Standardization is an important factor when men from different mines are called upon to help fight a fire in a strange mine, as they gain confidence upon discovering that the apparatus in use is similar to that which they have been trained to use.

The Paul breathing-apparatus weighs about 40 pounds. As the oxygen feed is controlled by automatic valves which give the wearer the amount of oxygen he requires, it is practically "fool-proof". The valves are so set that the pressure inside the machine is slightly greater than that of the surrounding atmosphere, so should a leak develop while the machine is in use there is no danger of the wearer being gassed. This apparatus supplies the wearer with ample oxygen, under average working conditions, for a period of two and one-half hours.

Training of "Helmetmen"

During the year 1928, continuous mine-rescue training was maintained at the large mines mentioned above, so, with men previously trained, there are at present about 225 competent "helmetmen" in the district, and they, together with the breathing-apparatus and equipment, are all available in the event of a fire at any mine.

The men are trained in groups of five, which number has been found to be the most conveniently handled unit for maximum efficiency, both in training and in actual underground fire-fighting. Their training covers a period of three months at three-week intervals for a duration of four hours each time. Preliminary training consists of acquiring the basic principles in the construction, oxygen circulation, and testing of the breathing-apparatus. The men wear the machines first in fresh air and then in an irrespirable atmosphere, which usually consists of formaldehyde fumes or wood smoke. They are required to perform physical labor, both in the fresh air and in smoke, thus learning the limitations of the machines, which establishes their confidence in the apparatus because they know how much work may safely be done while wearing it and the limit for which it can be used at one time. After completing the first course of training, they receive practice one afternoon at intervals of six weeks throughout the year.

First-Aid Work

U. S. Bureau of Mines Car No. 9 visits the Coeur d'Alene district for a period of from five weeks to two months each year. During this period classes are conducted at all the large mines in the district, not only for the miners, but for the general public as well. The course lasts two and one-half hours a night for five nights, and everyone who completes it is given a Government certificate of competency and a First-Aid Manual.

First aid is merely the treatment given a person who has suffered an accident, bridging the time before a doctor can reach the case. The Bureau of Mines course consists of teaching bandaging for wounds on all parts of the body; the application of tourniquets to check arterial bleeding; the proper methods for reducing and dressing dislocations; and the application of splints

for fractured bones. Artificial respiration, burns, nervous shock, strains, and sprains are all discussed and the correct treatment demonstrated. Any one who completes the course has a good working knowledge of first aid and will be competent to handle almost any accident that may happen.

Stench Warning System Installed in Mines

Several of the mines of the district have installed a stench warning system to notify men employed underground that a fire has broken out in the mine. As the name implies, a "stench warning" is obtained by introducing an offensive-smelling substance into the compressed-air pipes and ventilating current. The odor quickly penetrates to all parts of the mine; the men, detecting it, know that a fire has occurred and that they must hasten to the nearest available exit.

The stench system consists essentially of an injector placed in the compressed-air line by means of which the stench material may be introduced into the compressed air. Usually the injector is placed in a by-pass, as it is essential that the stench material should drop on a screen which assists in disseminating it; as such a screen in the main air line is objectionable in normal mine usage, the by-pass is added to the air lines.

The stench material is a liquid with a very offensive odor, having the property of vaporizing quickly and not to be mistaken for any of the usual mine smells. In the Coeur d'Alene district the stench material used is ethyl mercaptan (CH_3CH_2SH); it has a peculiar, strong, onion-like odor, and one pint is sufficient to saturate the air in a large mine. Tests made at one of the largest mines in the district proved that this odor was plainly discernible 4000 feet from the point of injection in a little less than six minutes. The stench material is usually kept in a cabinet near the injector, and a small atomizer or sprayer is provided for introducing it into the injector and the ventilating current.

Value of Oxygen Breathing-Apparatus

During the past ten years there has been a noticeable increase in the use of breathing-apparatus through the United States. Several States now require mines of a certain size to be equipped with oxygen breathing-apparatus and to train their employees in the use of it, and some States maintain well-equipped rescue stations. Several insurance companies grant reduced rates to mining companies whose mines are provided with rescue apparatus and regularly trained men, so the mines in the Coeur d'Alene district are receiving this indirect benefit as a reward for their progressiveness.

The value of mining property saved through the use of oxygen breathing-apparatus is, of course, enormous, and properly maintained apparatus, together with a crew of trained men, is a real asset to any mining company. Apparatus crews have on numerous occasions made hazardous trips through gas-filled passages of mines to rescue the living and recover the bodies of the dead; they have, at the request of responsible authority, changed the ventilation currents, bulk-headed underground fires to localize them, and in many instances fought fires directly. The history of mining is replete with instances in which a mine that has had an underground fire has been saved for future operation solely through the accomplishment of the apparatus men.

The organization of the central mine-rescue station, installation of mine stations, selection of equipment, first-aid and mine-rescue training, fighting of underground fires and rescue work performed have been described in the 1923, 1924, 1925, 1926, and 1927 Annual Reports of the Mining Industry of Idaho. These articles are profusely illustrated with pictures of mine stations, Paul breathing-apparatus, gas masks, and mine-rescue crews from the principal mines in the district.

ACCIDENTS

The minor accidents listed in the accompanying table, pages 40 and 41, "Classification of Accidents", are taken from the records of the Industrial Accident Board and arranged to comply more nearly with the classifications made by the U. S. Bureau of Mines. The table is somewhat misleading, as a very large proportion of the accidents listed "Time Lost Over 14 Days" did not greatly exceed this number of days, and the majority of those listed "One to 14 Days" did not exceed seven days. All accidents that did not cause a loss of time of more than seven days should not have been included, as no compensation is paid. However, as the U. S. Bureau of Mines and many State officials are including these minor injuries in their reports, they are therefore included in the accompanying table as a matter of uniformity.

A comparison of the total accidents in 1928 with those in 1927 shows a decrease of 9 in the number of fatal accidents and a decrease of 184 in the number of minor accidents. A comparison of the total number of men employed with the total number of accidents shows the very low accident rate of 0.48 accidents per 1000 man-shifts. This low rate can be attributed to a great extent to the safety organizations, to the first-aid training given the men by all the larger mining companies, and to the sustained effort and interest maintained in safety work by those in charge, further augmented by close supervision. The results of this work are particularly apparent in the small number of fatal accidents in the large mines of Shoshone County; these mines employ over 80 per cent of the total number of men working in the mines of the State, yet out of a total of 13 fatal accidents during the year only 4 occurred in them.

A comparison of the number of accidents with the number of men employed shows that the accident rate is in direct proportion to the efforts given to maintaining and enforcing safety provisions. The Bunker Hill and Sullivan Mining & Concentrating Co., which has always been very vigilant, has demonstrated that this effort is successful by establishing an accident rate that reflects greatly to the company's credit, showing a large decrease in the number of accidents during 1928 as compared with the number in 1927. During 1928 this company had an average payroll of 985 men, and its accident rate was 0.25 accidents per 1000 man-shifts, as compared with a rate of 0.32 in 1927. Its nearest competitors among the large mines were the Federal Mining & Smelting Co., with an accident rate of 0.88 per 1000 man-shifts, and the Hecla Mining Co., with a rate of 1.14 accidents per 1000 man-shifts.

Out of a total of 1120 accidents during the year, 13 were fatal, which is the smallest number in any year since 1921. Seven of these fatalities could have been prevented, had the victims been more careful; company responsibility can be placed for two of them; and the others were unavoidable. Out of the 1107 minor accidents listed, 552 did not compel a loss of time to exceed 14 days; 511 incapacitated the injured person for more than 14 days; and 44 resulted in a permanent injury.

The loss of both legs or arms, one leg and one arm, total loss of eyesight, paralysis or other condition permanently incapacitating a workman from doing any work of a gainful occupation, is classified as "Permanent Total Disability." The loss of one foot, leg, hand, eye, one or more fingers, one or more toes, any dislocation where ligaments are severed, or other injury known in surgery to be a permanent partial disability, is classified as "Permanent Partial Disability."

Notes on Fatal Accidents

January 6, John Colonello, Lessee; Shoshone County. John Colonello, age 38, married, lessee. Deceased and Olaf Wold were going down into the mine in a skip. When they came to the 200-foot level two other miners were retimbering a cave and were having some trouble inserting the lagging. Colonello stopped and helped them place the lagging, which one of the men

wished to nail, but Colonello told him to leave it as it was, that it was perfectly safe, and for the two of them to get another lagging. Colonello and Wold then continued on down in the skip to the 500-foot level. As the other two men returned with the lagging which they had been sent to get, they saw the lagging that had recently been placed fall out and drop down the shaft. When the skip stopped at the 500-foot level they waited to see if a signal was given to move the skip. None being given, they decided to climb down and see what had happened. They found Wold outside the skip with his side torn and disemboweled, while Colonello was found inside the skip with his chest in the heart region terribly crushed. Both men had met instant death. The lagging was lying by the side of the skip. The miner who wanted to nail this lagging in place evidently knew that there was danger in leaving it unsecured; when Colonello told him not to do it but to get another lagging, it is conclusive that Colonello was willing to take a chance for the sake of saving a little time. The result was that no time was saved and two lives were lost.

January 6, Sather Lease; Shoshone County. Olaf Wold, age 33, single, miner. Deceased and John Colonello were going down into the mine in a skip. When they came to the 200-foot level two other miners were retimbering a cave and were having some trouble inserting the lagging. Colonello stopped and helped them place the lagging, which one of the men wished to nail, but Colonello told him to leave it as it was, that it was perfectly safe, and for the two of them to get another lagging. Colonello and Wold then continued on down in the skip to the 500-foot level. As the other two men returned with the lagging which they had been sent to get, they saw the lagging that had recently been placed fall out and drop down the shaft. When the skip stopped at the 500-foot level they waited to see if a signal was given to move the skip. None being given, they decided to climb down and see what had happened. They found Wold outside the skip with his side torn and disemboweled, while Colonello was found inside the skip with his chest in the heart region terribly crushed. Both had met instant death. The lagging was lying by the side of the skip. The miner who wanted to nail this lagging in place evidently knew that there was danger in leaving it unsecured; when Colonello told him not to do it but to get another lagging, it is conclusive that Colonello was willing to take a chance for the sake of saving a little time. The result was that no time was saved and two lives were lost.

April 23, Hecla Mining Co.; Shoshone County. John Mansfield, age 21, single, shoveler. Deceased was shoveling in the face of a stope. A large slab of rock fell from the face of the stope one floor above him. The rock broke through the floor under which he was working and struck him, killing him almost instantly.

May 14, Sherman Lead Co.; Shoshone County. Donald C. Paterson, age 26, married, shoveler. The shift boss and cager were drawing rock from a long raise chute. Deceased was sent to top of chute to observe and signal when the rock in the chute had been sufficiently lowered. Not receiving a signal after considerable rock had been removed, the two of them went to top of chute, but deceased was missing. On investigation it was found that the rock from an underhand stope which was fed into the raise chute by stope chute had hung up in the latter, and that deceased in attempting to loosen the rock with a bar had either stepped on the rock in the raise chute and been drawn down with the rock, or that he slipped and fell into the chute; apparently the latter, as his head was crushed and neck broken.

June 25, Federal Mining & Smelting Co., Morning mine; Shoshone County. William Willoughby, age 32, single, timberman-miner. Two large timbers are carried over all drift sets and are pushed forward as the drift advances for the protection of the men working in the untimbered face. Deceased was on top of the drift set, in the act of pushing the timbers forward, when a large slab of ore fell from the top of the drift, striking and instantly killing him.

CLASSIFICATION OF ACCIDENTS

MINE	Killed	Seriously Injured Time Lost More Than 14 Days: Permanent total disability	Seriously Injured Time Lost More Than 14 Days: Permanent partial disability	Slightly Injured: Time lost over 14 days	Slightly Injured: Time lost 1 to 14 days
UNDERGROUND					
1. Fall of rock or ore from roof or wall	4		7	100	92
2. Rock or ore while loading at working face or chute			1	34	45
3. Timber				29	22
4. Explosives	3		1	2	3
5. Haulage, Cars or Motors	1		3	50	37
6. Persons falling down chute, winze, raise or stope	1			18	15
7. Drilling (by machine or hand drills)			1	14	14
8. Hand tools			1	33	34
9. Machinery (other than motors or drills)			4	9	9
10. Flying or falling objects			4	31	90
11. Fall of persons				34	24
12. Lifting			1	15	17
13. Nails and splinters			1	13	27
14. Other causes			2	6	10
Total	9		26	388	439

MILL	Killed	Seriously Injured Time Lost More Than 14 Days: Permanent total disability	Seriously Injured Time Lost More Than 14 Days: Permanent partial disability	Slightly Injured: Time lost over 14 days	Slightly Injured: Time lost 1 to 14 days
MILLING ACCIDENTS					
1. Haulage (cars and locomotives)				3	3
2. Railway cars or motors					
3. Crushers, rolls or stamps			1	1	2
4. Tables, jigs, etc					1

July 18, Talache Mines Inc., Gold Hill mine; Boise County. Frank J. Kraus, age 35, single, electrician. Deceased was cutting over one end of a 3-wire, 440-volt power distribution line to change it from an exposed wire system to a lead-armored cable. He was working from a ladder, and a pair of pliers were the only tools used. The working place was alongside the shaft house, about 10 feet above the ground. The new lead-armored cable, extending from a pole to the shaft house, a distance of about 75 feet, had been installed and all that remained to be done was to cut over the old wires to the new cable, paralleling or shunting each old wire with a new one in the cable and then cutting down the old wires. It is presumed that deceased accidentally reached over and made contact with the sheet-iron building, but there is no way of determining how the accident occurred. It is possible also that he was suddenly taken ill and fell against the building while still holding to the wire. His end of the cable was found hanging loose after the accident, and it was later learned that he complained to one of his fellow workers of feeling dizzy at times. He was unconscious when picked up, showed no heart beat or respiration, and could not be revived.

July 19, Mackay Metals; Custer County. Sam Unyok, age unknown, single, miner. Deceased noticed that one hole from a previous round in the face of a tunnel had failed to explode. He started to drill a hole about three feet from it for the purpose of putting in a new charge of powder to explode it. After he had been drilling a short time, the missed hole discharged and instantly killed him.

July 23, Patterson Mines Corporation; Lemhi County. Thomas W. Shinderling, age 40, single, mill helper. While oiling or inspecting a bearing on a countershaft, deceased slipped or fell upon the revolving shaft, which entangled his clothing. He was whirled over, his head struck a timber, and his neck was broken. Death was instantaneous.

September 28, Auxer Gold Mines Co.; Bonner County. Leo G. Mintz, age 35, single, miner. One hole from a previous round in the face of a tunnel had failed to explode. Deceased was alone at the time, but as nearly as could be ascertained, he had started to dig the powder from the unexploded hole when it discharged and killed him instantly.

October 9, Bunker Hill & Sullivan M. & C. Co.; Shoshone County. Henry Clancy, age 43, married, shoveler. On the approach of a train of cars which was being pushed by an electric motor, deceased stepped to the side of the tunnel near a post. After the cars had passed him, he moved sufficiently to be caught by the motor and crushed to death between it and the post.

October 24, Sidney Leasing Co.; Shoshone County. Jerry Bland, age 57, single, shoveler. Deceased was drawing ore into an ore chute from the face of a stope about six feet in width. He undermined a large boulder on the hanging wall side of the stope so that it became dislodged and in falling crushed him to death against the footwall.

November 10, Federated Mines Co.; Boise County. Hampton B. Cooper, age 51, miner. Deceased and an assistant were engaged in widening a drift. The previous shift, which had blasted four hours earlier, reported that two holes had failed to explode. When the two men entered the drift the holes which had failed could not be located, so while waiting for the face to be cleared of broken rock, deceased set up the air drill on top of the rock and commenced drilling an upper hole in the face. While he was doing so, one of the holes in the bottom exploded and killed him instantly.

December 21, Idaho Lakeview Mines Co.; Bonner County. Peter Harrington, age unknown, married or single unknown, shaft miner. Deceased was engaged in retimbering a tunnel at the collar of a winze; before placing the new timbers he was barring down the loose ground overhead. This ground commenced to fall, and for reasons unknown the deceased jumped and was caught by the falling rock, which crushed him to death.

CONSTITUTION M. & M. CO.'S MILL

MEN EMPLOYED AND WAGES

The year closed with practically all the producing mines in the State in operation, and with the largest payroll that has been witnessed during the past 10 years. As a whole, 1928, from a labor standpoint, was one of the best years ever experienced. There was a surplus of labor throughout the year and the turnover was exceedingly small, thus assuring the companies a constant working force without the necessity of breaking in new men. However, competent and experienced miners and timbermen were continually in demand, and some of the large companies had a little difficulty in meeting their requirements.

It is practically impossible to obtain complete and accurate statistics of the number of men employed in the mines; a great many are employed by prospectors and small companies that do not report to the inspector of mines and that do not maintain continuous work throughout the year; and records furnished by the companies reporting vary as to the number of days. The average payroll reported was 5500, and 1000 has been added as an estimate to cover lessees, prospectors and small companies that did not report, thus giving a total of 6500 for the year, which is known to be a conservative estimate.

The table printed below gives the different wage scales that were in force in the State during 1928. Column No. 1 gives the average wage throughout the State for the year, and column No. 2 gives the wage scale in effect in the Coeur d'Alene district from March 1, 1927, to December 31, 1928.

Under an agreement adopted on November 16, 1925, the wages in the Coeur d'Alene district were to be adjusted each month in accordance with a bonus rate based on the selling price of lead in New York. This scale was based on a wage for miners of $3.75 per day when lead is selling under 5½c per pound; the bonus to be added was as follows:

When the price of lead is 5c	and under 6c	$0.25 per day
When the price of lead is 6c	and under 6½c	.50 per day
When the price of lead is 6½c	and under 7c	.75 per day
When the price of lead is 7c	and under 7½c	1.00 per day
When the price of lead is 7½c	and under 8c	1.25 per day
When the price of lead is 8c	and under 8½c	1.50 per day
When the price of lead is 8½c	and under 9c	1.75 per day
When the price of lead is 9c	and under 9½c	2.00 per day
When the price of lead is 9½c	and under 10c	2.25 per day
When the price of lead is 10c	and under 10½c	2.50 per day
When the price of lead is 10½c	and under 11c	2.75 per day

After March 1, 1927, the price of lead declined so rapidly that if the bonus scale had been adhered to the wages would have been cut to a point entirely out of proportion to wages in other parts of the State and too low under existing high living costs. So the signatories to the bonus scale waived their agreement and maintained the wages set forth in column No. 2:

	No. 1	No. 2
Miners	$5.00	$5.00
Shovelers	4.50	4.50
Timbermen	5.50	5.50
Timber helpers	4.75	4.50
Machinists	6.00	5.75
Machinists' helpers	5.00	5.00
Carmen	4.50	4.50
Motormen	5.00	5.00
Trainmen	4.50	4.50
Main hoistmen	5.75	5.75
Small hoistmen	5.25	5.25
Nippermen	4.50	4.75
Pump and compressormen	5.00	5.25
Surface laborers	4.50	4.50
Ore sorters	4.25	4.25
Cagers	5.25	5.25
Pipe and trackmen	5.25	5.25
Shift bosses	6.00	6.25
Blacksmiths	6.00	6.00
Blacksmith helpers	5.00	5.00
Electricians	5.50	5.25
Millmen	5.00	5.00
Mill repairmen	6.00	5.75
Mill swampers	4.50	4.50
Carpenters	6.00	6.00

The cost of board and room at company boarding houses, hotels, and at private homes averages from $1.25 to $1.50 per day. Many companies have built and are maintaining houses which are rented to their married employees, and some of the largest companies assist their employees in the construction of homes.

MINERAL RESOURCES

Idaho contains an area of 83,888 square miles; its maximum width at the southern end is approximately 312 miles, and its length from the southwest corner to the northwest corner is about 486 miles. The State is divided into 44 counties, 36 of which can be classed as having minerals of commercial importance. In 22 of these counties there are producing mines.

In the past practically all mining has been confined to the five principal metals: Lead, silver, gold, zinc, and copper, which are widely distributed throughout the State (see map, page 6). In addition to these a great variety of uncommon metals and minerals, many of which have been successfully exploited during the past few years, occur in sufficient extent to be of commercial importance.

This great diversity of mineral wealth, consisting of practically all the metals used in modern arts and many of the uncommon minerals for which a demand is continually being developed, establishes Idaho as one of the principal mining States in the Union. It also makes mining the second most important industry in the State.

The importance of Idaho's mineral wealth is well shown by statistical facts based on the production and exploitation of the five principal metals, lead, silver, gold, zinc, and copper:

Total metal production since 1860, over $1,100,000,000.
Average annual production for past 25 years, over $25,500,000.
Average annual mine payroll, over $9,000,000.
Average annual mine dividends from lead-silver mines, over $5,000,000.
Average annual expenditure on new mine development and prospecting, over $4,000,000.

METALS

Lead

Lead is the most important metal found in Idaho, and excepting in the years 1926 and 1927, this State has always ranked second in the United States in the production of lead, Missouri ranking first, and Utah third. During the two years aforementioned Utah held second place, although the production of the two States was almost on a parity. Idaho produces over one-fourth of the total amount of lead mined in the United States. Lead is widely distributed throughout the State, and occurs as galena (lead sulphide) and as the oxide and carbonate; silver is always associated with it, and occasionally zinc, gold, and copper.

The largest lead mine in the United States is in Idaho—the Bunker Hill & Sullivan M. & C. Co. at Kellogg. This is one of the few companies in the world that mine, mill, smelt, refine, manufacture, and market lead and lead products. Other important lead-producing mines in Idaho and their respective ranks in the United States are: Federal Mining and Smelting Co., third; Hecla Mining Co., fifth.

The principal lead mines in the State are those in Shoshone County, which produce 85 per cent of the State total. Blaine, Boundary, Bonner, Custer, Lemhi, Boise, Butte, Valley, and Camas counties are the other important lead-producing counties.

Silver

Idaho ranks third in the United States in the production of silver, the first three States in order of rank being Utah, Montana, Idaho. Idaho produces one-eighth of all the silver mined in the United States.

Silver is found associated with all of the lead, copper, zinc, and antimony ores of the State, and occasionally in associations in which it is the principal metal. It is one of the most widely distributed metals, and its occurrence is such that the mining of silver can hardly be separated from that of the other metals. Accordingly, the production of silver fluctuates with and parallels that of lead.

Shoshone County produces more silver than any other county in the State; the other important silver-producing counties are: Lemhi, Custer, Bonner, Boundary, Blaine, Butte, Owyhee, Boise, Camas, Valley, Washington, Idaho, Elmore, Adams, and Cassia.

Zinc

Zinc is found associated with lead in many of the lead mines of Idaho, although there are numerous deposits in Shoshone and Blaine counties in which it is the principal metal. In Shoshone County it occurs as sphalerite (zinc sulphide), and in Blaine County as sphalerite and smithsonite (zinc carbonate).

Selective flotation revolutionized the art of ore-dressing, and it is now possible to treat mixed lead-zinc ores which could not be separated by gravity concentration methods. As a consequence, the zinc content which was formerly lost is recovered and many mines which at one time could not be profitably operated are now being reopened in Blaine, Camas, and Shoshone counties. As a result of these modern ore-dressing methods, Idaho is one of the largest zinc-producing States in the Union.

The principal zinc-producing counties, in the order of prominence, are Shoshone, Blaine, Camas, Custer, Lemhi, Bonner, Boise, Boundary, and Butte.

Gold

Gold is found in practically all of the counties in the State, and is one of the most widely distributed metals. Prior to the World War Idaho was an important producer of this metal, but during the war period many of the mines of which the principal product was gold were closed down and have not been reopened, so at the present time the State ranks only tenth in the United States in gold production.

Gold occurs associated with almost all the lead, zinc, copper, and silver ores, and very commonly in a free-milling condition. A large amount of gold is obtained from placer deposits; at one time Idaho was among the principal placer-mining States in the Union. The greater part of the placer ground which could be hydraulicked has been exhausted, but many acres suitable for dredging still remain, and the gold lode-deposits offer greater opportunities than those of almost any other State.

The most important counties in which gold occurs are Boise, Idaho, Lemhi, Owyhee, Elmore, Shoshone, Custer, Blaine, Camas, Clearwater, Gem, and Valley.

Copper

Idaho is an important producer of copper and holds a high position among the ranking States of the Union. The many copper mines which are now under development and the numerous discovered but undeveloped veins indicate that the production of this metal will be greatly increased; the State will then be elevated to a rank higher than that of tenth, which it now holds.

Gold and silver are found associated with practically all the copper ores; and in some counties, notably in Custer and Bonner, the silver content is more valuable than the copper.

Custer, Lemhi, and Shoshone are the most important copper-producing counties; Adams and Washington counties may eventually become large producers. Bonner, Idaho, Blaine, Butte, Clearwater, Latah, and Lewis counties also contain copper mines of importance.

Antimony

Deposits of antimony, principally the sulphide (stibnite), are found in Shoshone, Valley, Boise, Blaine, Idaho, Owyhee, and Custer counties. Those in the Coeur d'Alene district of Shoshone County have been extensively developed; a number of mills for the concentration of the ore have been constructed; and in the past a large tonnage has been produced and marketed. The deposits in Blaine, Valley, and Owyhee counties contain a high-

grade ore, most of which can be shipped without preliminary treatment. During the war, when antimony commanded a high price, a large tonnage was produced and shipped from the mines in Valley County.

Antimony occurs as an accessory mineral in many lead-zinc ore bodies, also in stibnite-bearing veins in which it is the dominating metallic mineral. All of the antimony ores carry more or less silver, and many of them, particularly those of Blaine County, are more valuable for this mineral than for the antimony.

In all the above-mentioned counties there are many deposits containing a large available tonnage of commercial ore, which can be readily marketed when freight and market conditions will permit it to be produced at a profit.

Arsenic

Deposits of arsenic, principally the sulphide (arsenopyrite), occur in Blaine, Gem, and Boise counties. These deposits, although not fully developed, show a large available tonnage containing sufficient arsenic to be valuable for this metal, which can be readily marketed when the demand for it will permit profitable production. Arsenic occurs also as arsenopyrite in Ada, Elmore, and Kootenai counties, but the deposits in these counties have not been sufficiently developed to ascertain the possible tonnage.

Bismuth

Bismuth, occurring as a sulphide, has been found in Blaine County unassociated with other metals, as well as in association with many of the lead ores. It also occurs in the gold ores of the Gold Hill, Belshazzar, and Buckskin mines, Boise County, in association with lead, probably galenobismuthite or similar lead-bismuth minerals.

Cobalt

Cobalt is found in Lemhi County. During the World War, when this metal commanded a high price, the deposits were actively developed; a small mill was constructed, and concentrate with a high cobalt content was produced. These deposits are described by Frank L. Hess under "Cobalt" in U. S. Geological Survey: Mineral Resources of the United States, part I, 1917.

This metal is reported to have been found also in Kootenai and Latah counties.

Manganese

Manganese occurs in Bannock, Lemhi, Owyhee, Shoshone, Butte, and Washington counties. Some of the deposits are high in manganese content and others in manganese-iron. A substantial tonnage has been produced and marketed from the mines in Bannock County, and the deposits in Lemhi County constitute a large potential resource.

Describing the Bannock County deposits in "Manganese and Manganiferous Ores in 1926", U. S. Bureau of Mines: Mineral Resources of the United States, J. W. Furness said: "D. F. Hewett, of the United States Geological Survey, reports that the Idaho Manganese Co. has been exploiting since April, 1924, a manganese deposit on the McGregor ranch, 1 mile east of Cleveland, Bannock County, Idaho. The shipments in 1926 were 830 tons and during 1927 will probably be larger. The ore consists of nodules of the several oxides embedded in brown wad and forms a distinct bed in Pleistocene (Ice Age) sediments. In the explored area the bed will probably yield 3,000 tons per acre; the extent of the bed is assuredly several acres and may be more. Most of the shipments range from 42 to 48 per cent manganese. The ore is shipped by auto truck to Grace, 14 miles north, thence by rail to the Columbia Steel Co., Ironton, Utah."

Molybdenum

Molybdenum, occurring as the sulphide disseminated in intrusive rocks and as a molybdate of lead in fissure veins in limestone, is found in Elmore, Boundary, Custer, Idaho, and Lemhi counties.

Nickel

Nickel is found in Lemhi County. During the late war considerable development work was done on the veins in which it occurs. These deposits are described by Frank L. Hess under "Cobalt" in U. S. Geological Survey: Mineral Resources of the United States, Part I, 1917.

Quicksilver

Cinnabar, the sulphide of mercury, has been found in the placer deposits of Custer and Valley counties and in lode-deposits in Valley, Blaine, and Cassia counties. The quicksilver lode-deposits of Valley County are being extensively developed, and a little mercury has been produced from an experimental plant. The other deposits have never been opened.

Tin

Tin has been found in the placer mines in the Gravel Range mining district of Lemhi County. Its occurrence is described by Clyde P. Ross in Idaho Bureau of Mines and Geology Pamphlet No. 25, "Ore Deposits in Tertiary Lava in the Salmon River Mountains, Idaho". Mr. Ross includes in this a list of all published references relating to his subject.

Tungsten

Tungsten, in the form of scheelite and wolframite, occurs in commercial value in Shoshone, Idaho, Camas, Lemhi, Boundary, Bonner, Blaine, Valley, and Butte counties. The deposits in Shoshone County have been extensively exploited, and during the war period of high prices a large tonnage was produced and marketed; at the same time a small amount was obtained from Boundary and Camas counties. Sufficient work has been done on all these deposits to indicate that tungsten is one of the State's substantial mineral resources.

NON-METALLIC MINERALS

Asbestos

Commercial asbestos occurs in two forms: The chrysotile variety, which is adapted to spinning; and the amphibole variety, which is not adapted to spinning but is used extensively in shingles, insulation materials, paper stock, cements, and paints.

Amphibole asbestos occurs extensively in Idaho County, near Kamiah. There is a large demonstrated tonnage, but the demand is small, on account of markets and freight rates. Deposits containing chrysotile have been reported in Fremont, Teton, and Idaho counties.

Barytes

Barytes (barium sulphate) is used in the rubber, paper, linoleum, ink, and paint manufacturing industries. Its principal use is in the manufacture of lithopone, a white pigment consisting of about 70 per cent barium sulphate and 30 per cent zinc sulphide.

Some of the largest deposits of high-grade barytes found west of the Mississippi River occur in the Deer Creek and Muldoon sections of Blaine County. The deposits on Deer Creek vary in width from 50 to 100 feet, and one outcrop is over 1000 feet long; this was described by Arthur Lakes in the Mining Reporter for August 16, 1906, under the title, "A New and Large Deposit of Barite in Idaho", as follows:

"In visiting some mining prospects in the Wood River region of Idaho I came across an unusually large massive deposit of the mineral called barite.

"It forms a steep cliff on the crest of a hill and descends as a vein down the gulch. The thickness is apparently from 50 to over 100 feet. Its course passes very near some silver-lead prospects and not far from it on one side is a huge outcrop of iron oxide.

Deer Creek Barytes Deposit, Viewed from a Distance of 2000 Feet

Close-up View of Deer Creek Barytes Deposit

"The material is of a dull white color and resembles at a distance a vein of calcspar or a vein of white feldspar and quartz. It has not been opened up but there must be thousands of tons in sight."

Bentonite

Bentonite, a plastic clay, is valuable for its high absorbent qualities; it has the capacity for absorbing three times its weight or about seven times its volume of water. It is used in beauty clays; for refining oil; as a filler in paper and soaps; as an adulterant in drugs and candies; and as a packing for horses' hoofs.

Bentonite occurs in commercial extent in Clark and Custer counties, and has been reported found in Cassia County. The deposits in Clark and Custer counties are described by V. R. D. Kirkham in Pamphlet No. 19 Idaho Bureau of Mines and Geology, "A Geologic Reconnaissance of Clark and Jefferson and Parts of Butte, Custer, Fremont, Lemhi, and Madison counties, Idaho": "A commercial grade of bentonite, a peculiar type of clay with extraordinary absorptive qualities, was found at two localities in the area. One is near the railway in the vicinity of Mackay, the other is more remote and lies west of Dubois."

Building Stone

Sandstone exceptionally adapted to building purposes is found in Ada, Bear Lake, and Cassia counties. One of the principal enterprises in Ada County is that of the Boise Stone Company in quarrying and converting sandstone to building purposes. This enterprise is fully described, with illustrations, in the Twenty-sixth Annual Report of the Mining Industry of Idaho for the Year 1924. The most notable building in Idaho, the State Capitol, is constructed of this stone.

The sandstones in Bear Lake County are described in U. S. Geological Survey Professional Paper No. 152, "Geography, Geology, and Mineral Resources of Part of Southeastern Idaho", by George Rogers Mansfield; pages 336-338.

Coal

Bituminous coal of commercial importance occurs in Teton, Bonneville, Fremont, and Clark counties. No attempt has been made to exploit any of the deposits commercially except those of the Teton Coal Company in Horseshoe Basin, Teton County. In discussing the Horseshoe Basin coal in Pamphlet No. 10, Idaho Bureau of Mines and Geology, "The Horseshoe Basin Area of the Teton Coal Field in Southeastern Idaho", George Watkins Evans said:

"The chemical analysis of this coal indicates that the coal in this field is of as good quality as any mined in Utah or Wyoming. The principal question is whether or not this field can produce a sufficient percentage of lump coal to compete with the larger sizes from Utah and Wyoming.

"From the limited information at hand, it is impossible to make a reliable estimate of the minable tonnage in this field. In the first place, we do not know exactly the total area of the coal bearing strata, nor do we know the number of workable coal beds contained within this field. Any tonnage estimate made at this time must be based upon arbitrary figures and the quantity might be either much more or much less than the figures given.

"If we assume that the Horseshoe bed and the Brown Bear bed are two separate and distinct beds and that the Horseshoe bed will contain 9 feet of coal and that this bed can be mined for a distance of one-half mile on the dip, and that the bed will continue of fairly uniform character for a distance of 2 miles along the strike, there would be within the Horseshoe bed approximately 5,000,000 tons of coal, provided it will average 6 feet of minable coal and if we allow 1300 tons per foot acre. The Brown Bear bed has an average thickness of about 4 feet and on the same basis would contain a little over 3,000,000 tons of coal. The Boise bed, allowing an average thickness of 3½ feet of minable coal, contains nearly 3,000,000 tons—in all approximately 11,000,000 tons of coal.

"It is not improbable that with future investigations it will be found that the total tonnage of coal in this field is very much greater than the amount of tons suggested. On the other hand, it might be found that the coal contained within these beds is very friable and will not produce any considerable quantity of the larger sizes, and furthermore, it is probable that the market tributary to this field will be so exacting that only the larger sizes can be successfully marketed."

The Teton Coal Company has recently completed a 3600-foot crosscut with a 600-foot connecting raise to the surface, and a tipple for grading the

coal. The tunnel intersected three coal beds, two of which were not included in the above estimate; as yet the tunnel has not been completed to the Horseshoe and Boise beds, so it appears that the total tonnage, when this field is fully developed, may be in excess of the estimate.

Lignite is found in Cassia, Boise, Owyhee, Washington, Idaho, Lemhi, and Clearwater counties.

Diatomaceous Earth

Diatomaceous earth is more commonly known as infusorial earth, and is sometimes referred to by its German name of kieselguhr. It is composed of the siliceous remains of minute aquatic plants known as diatoms, which are of such proportions that they must be identified chiefly by the aid of the microscope.

The principal uses of diatomaceous earth are: Sawed brick for refractory and insulation purposes; filter material at sugar factories; light-weight filler in concrete; in polishing powders; absorbent in dynamite, and in thermal insulator compounds.

Extensive beds of this mineral, in which it can be measured by the acre, are found in Owyhee, Elmore, Camas, Payette, Washington, and Idaho counties. A small tonnage has been obtained from Elmore County for use in Idaho sugar factories.

Feldspar

Common feldspars are crystalline compounds of silica, alumina, and one or more of the bases: potash, soda, and lime. There are two principal classes of feldspar—the one including the potash and potash-soda varieties; the other including the soda, soda-lime, and lime varieties. Pure potash feldspars are orthoclase and microcline. The principal use of feldspar is in the manufacture of pottery, chinaware, porcelain, enamel-ware, and enamel brick and tile.

Deposits of high-grade feldspar, occurring as orthoclase, are found in Latah and Adams counties.

Garnet

Garnet is a common accessory mineral in a large variety of rocks, occurring abundantly in contact metamorphic zones and in metamorphosed crystalline limestones. Deposits of garnet possessing the necessary qualifications for ornamental or industrial use and so situated with regard to transportation and markets that they can be exploited commercially are relatively small and occur in only a few areas throughout the United States.

The principal uses of garnet are: As settings in jewelry; jewel bearings in watches; and as an abrasive. Abrasive garnet is utilized either in the form of a manufactured paper similar to sand-paper, or as loose grain or powder for grinding and polishing.

Extensive deposits of garnet adapted to abrasive purposes occur in Adams, Lemhi, Custer, and Cassia counties.

Graphite

Graphite is a soft, black, greasy form of carbon, sometimes referred to in trade as "plumbago" and "black lead". It occurs in nature in two forms, crystalline and amorphous, each having its own peculiar uses.

The physical properties of graphite—infusibility, chemical inertness, high conductivity, extreme softness, and low specific gravity—fit it for a large number of uses: The manufacture of crucibles and other refractory products; lubricants; "lead" pencils; paints; stove polish; foundry facings; and various types of electrical appliances.

Graphite of commercial importance is found in Blaine County, but, owing to the fact that at the ordinary price of graphite it is possible to mine only the most favorably situated deposits, the known deposits in Idaho have never received much attention.

Gypsum

Gypsum is a natural hydrated sulphate of lime. It is a soft, white, chalk-like material, found widely distributed in single crystals and in thick beds. The natural product is generally very pure.

The principal uses of gypsum are as structural material—wall plaster, gypsum boards, blocks and tile—and as an ingredient in Portland cement and plaster of Paris.

Extensive deposits of high-grade gypsum are found in Lemhi, Bear Lake, and Washington counties. These deposits have never been developed, as the low price of the crude product limits production to those States located near the centers of population.

Limestone

Limestone is mined in Butte, Teton, and Bonner counties; Bannock, Blaine, and Bear Lake counties also contain deposits of importance. The limestone mined in Bonner County is shipped to Spokane, Washington, where it is manufactured into Portland cement. The limestone mined in Butte and Teton counties is shipped to the sugar factories of Idaho and Utah, where it is used in the refining of sugar.

There are unlimited deposits which are suitable to the cement industries.

Marble

Marble is dense crystalline calcium carbonate, formed from limestone by the pressure of overlying sediments and the action of underground water. The value depends on the color, which may be white, gray, red, black, or veined, and the grain and structure. Its principal use is for building and monumental purposes.

Marble suitable to commercial purposes occurs in Nez Perce, Butte, and Cassia counties. The deposits in Nez Perce and Butte counties have been slightly exploited.

Mica

The principal physical properties which give value to mica are: Its cleavage, transparency, resistance to decomposition, and non-conduction of electricity and heat. The important uses of mica are: Short mica, in the electrical industries and as glazing for stoves, screens, goggles, and lantern projection; ground mica, in fancy paints, wallpaper, tiles, concrete, rubber goods, roofing materials, lubricants, and insulating compounds.

"Mica deposits of probable value have been found in about half the States of the United States. The principal producing States have been North Carolina, New Hampshire, South Dakota, Idaho, New Mexico, Colorado, Virginia, South Carolina, Alabama, and Georgia."—Schaller, W. T., Mica: U. S. Geological Survey Mineral Resources, pt. 2, p. 280; 1915. The production which gave Idaho this prominent rank was from the mica mines in Latah County.

Deposits of commercial importance occur in Adams and Idaho counties also, although they have never been prospected or developed in proportion to the possibilities which they offer.

Mineral Waters

Mineral springs of various types occur at a great many places throughout the State, the principal types being calcareous, chalybeate, sulphurated, and saline. The temperatures of the different types vary from "cold" to "hot", with some of the latter exceeding the boiling point. Hot springs are the more numerous, and at many of them sanitariums and bathing resorts have been erected.

The chalybeate springs of Caribou County are particularly efficacious from a therapeutic standpoint, although they have never been exploited.

Monazite

The mineral monazite consists chiefly of the phosphate of cerium and variable amounts of thoria, the value depending primarily upon the thoria content. It is a resinous golden-yellow mineral occurring as a placer sand in practically all of the gold placer mines in the State; the quantity varies, and in some of the deposits it is not sufficient to be of commercial importance. The placer deposits of Ada, Idaho, Lemhi, and Owyhee counties contain an appreciable amount of this mineral, and those of Boise and Clearwater counties contain sufficient to be of commercial importance.

The principal use of thorium is in the manufacture of incandescent mantles for gas lighting. Practically all of the monazite used in the United States is imported from Brazil and India.

Nitrates

The occurrence of nitrate in Camas, Elmore, and Owyhee counties has been reported.

Oil and Gas

The same formations which are oil-producing in Wyoming are present in structures highly favorable to the accumulation of oil and gas in Caribou, Bonneville, Teton, Bear Lake, and Bingham counties. A small amount of drilling has been done in Caribou and Teton counties, but the wells were never completed to a sufficient depth to determine the possibilities for the occurrence of oil.

Gas has been developed in Payette and Washington counties.

Phosphate Rock

The greatest potential mineral resource in Idaho is the immense phosphate rock deposits in Bear Lake, Caribou, Bannock, Bingham, and Bonneville counties. Conservative estimates by members of the U. S. Geological Survey accredit Idaho with over 85 per cent of the total phosphate resources of the United States in 268,299 acres out of a total of 396,612 acres which have been withdrawn from public entry. These deposits are fully described with maps, illustrations and analyses by G. R. Mansfield in U. S. Geological Survey Professional Paper No. 152, "Geography, Geology, and Mineral Resources of Part of Southeastern Idaho", from which the following is quoted:

"In Utah, Idaho, Wyoming, and Montana the great bulk of the phosphate rock is on public land, though some has passed into private ownership. The public lands are withdrawn from entry pending their examination and classification. No estimates of the acreage of phosphate land in private ownership are available, but the acreage of the outstanding withdrawals of public land in the States named is shown in Table 38.

TABLE 38—**Outstanding phosphate withdrawals, July 31, 1927**

	Acres
Utah	301,945
Idaho	**396,612**
Wyoming	996,539
Montana	279,944
Total	1,966,390

"In addition to the land embraced in the outstanding phosphate withdrawals, 268,299 acres in Idaho, 25,293 acres in Wyoming, 3,833 acres in Montana, and 160 acres in Utah—297,585 acres in all—have been examined in detail and formally classified as phosphate land. * * *

"Under the act of July 17, 1914, agricultural entries may be made upon withdrawn phosphate lands, but the mineral rights are reserved to the United States."

TABLE 74a—Estimate of phosphate rock in the United States available December 31, 1925, in long tons

FIELD	Estimated quantity available	FIELD	Estimated quantity available
Eastern field:		Western field:	
Arkansas	20,000,000	**Idaho**	**4,997,855,000**
Florida	291,000,000	Montana	391,323,000
Kentucky	878,000	Utah	326,745,000
South Carolina	8,788,000	Wyoming	115,754,000
Tennessee	83,500,000		5,831,677,000
	404,166,000	Less approximate quantity mined since 1906	350,000
			5,831,327,000
			404,166,000
			6,235,493,000

Pyrite

Pyrite of commercial importance is found in Washington County. The development work which has been done on these deposits indicates an immense available tonnage.

Rutile

The occurrence of rutile in Clearwater County has been reported. Rutile, the natural titanium oxide, is used in paints; arc-light electrodes; dyes; and in the manufacture of leather.

Salt

The pioneers evaporated the brine from the salt springs of Caribou County, and this salt was transported to all of the northwestern States before the building of the railroad. The salt obtained from these springs is above the average of the commercial salts of the United States in purity and compares favorably with some of the best salt produced. The salt springs and deposits are described by W. C. Phalen, who estimates 5,000,000 tons in sight, in U. S. Geological Survey Bulletin 669, "Salt Resources of the United States":

"Although the salt bodies or old alkali flats are thus meager in extent, especially in comparison with the other prominent salt-producing areas of the United States, the conservative estimate of 5,000,000 tons for the Crow Creek rock-salt body and the possibility of a larger salt body near the Tygee and Stump Creek forks indicate that the amount of salt apparently in sight in some of the present areas would be sufficient (if proper railroad connections existed) to yield returns on large workings for a long time. It also appears quite probable that all the areas, including the smaller brine springs, contain sufficient salt to return the sums that may be advisedly invested in their development."

Sulphur

Sulphur occurring in extensive deposits and as sulphur springs is found in Caribou County. During the World War a little attempt was made toward the commercial development of these deposits.

Talc

Talc suitable to the electrical and powdered-talc industries occurs in Idaho County in sufficient extent to be of commercial importance.

ADA COUNTY

Ada is one of the southwestern counties, adjoining and lying north and east of Owyhee and Canyon counties, and south of Boise County. It contains 1154 square miles and was accredited with a population of 35,213 in the 1920 census. Boise, the largest city in the State, is the State capital and county seat. The county is noted for its excellent irrigated farms, and its livestock, farming, and fruit-raising industries.

The State highway, Oregon Trail, extending from the southeast corner of the county to Boise, thence west to Nampa, and the excellent county highways and roads, give this county some of the best roads in the State as well as easy access to the mineralized areas.

Ada is not recognized as a mining county, yet its small mountainous area was once the scene of many active mining operations; and Boise was established as the principal distributing point for miners' supplies when the rich placer diggings of Boise County and adjacent areas were worked in the early days.

The early day mining was based on free gold operations and, as the sulphide zone was encountered at a shallow depth, the mines were soon closed and have remained dormant for many years. The principal ores are lead and zinc, carrying high values in silver and gold, occurring in fissure veins and as replacement deposits in granite. The ore occurrences are well defined and offer good opportunities to prospectors and small operators in search for these metals.

The chief mineral resources are building stone, gold, lead, silver, zinc, and arsenic. Building stone and its accompanying enterprise were fully described in the 26th annual report, for the year 1924.

During 1928 the mines and prospects in this county witnessed but little increase in attention and development over that of the previous year, in addition to which there was a decided activity coupled with publicity in the promotion of oil development enterprises.

The Boise Stone Company was active throughout the year and reports that a large quantity of stone was quarried and cut.

BERGDAHL OIL CO.

Office: 260-261 Sonna Bldg., Boise. **Officers:** A. F. Bergdahl, Pres.-Mgr.; C. M. Godfrey, Sec., both of Boise. **Inc.:** July 16, 1927. **Capital:** 1,000,000 shares; par value $1; 250,000 shares issued. **Property:** Leases on 2760 acres of patented land in Ada and Gem counties. **Development:** 2½-in. well 260 ft. deep. **Plant:** Small water well drilling equipment operated under contract. **Mineral sought:** Oil and gas. **Men employed:** None. **Remarks:** Active publicity campaign for purpose of selling stock maintained throughout the year.

GOLD KING MINES CO.

Office: 402 Empire Bldg., Boise. **Officers:** S. T. Schreiber, Mgr., Boise. **Inc.:** A copartnership. **Property:** Gold King group; 4 unpatented claims, Black Hornet dist.; Boise. **Development:** By one tunnel 50 ft. long. **Remarks:** Small amount of work during the year.

PIONEER IDAHO OIL CO.

Office: 322 Eastman Bldg., Boise. **Officers:** J. E. Nottingham, Pres.-Mgr.; P. M. Davis, Sec., both of Boise. **Inc.:** Apr. 4, 1927. **Capital:** 600,000 shares; par value $1; 1137 shares issued. **Property:** Leases and government prospecting permits on 10,000 acres in Ada and Gem counties; Eagle. **Mineral sought:** Oil and gas.

RED ROSE GOLD MINES CO.

Office: 605 Eastman Bldg., Boise. **Officers:** J. J. Oberbillig, Pres.-Mgr., Boise. **Inc.:** Jan. 27, 1921. **Capital:** 500,000 shares; par value 5c; all shares issued. **Property:** Red Rose group; 12 patented claims, Black Hornet dist.; Boise. **Development:** By 3 tunnels, the principal one of which is 685 ft. in length; total development, 1400 ft. **Ore:** Gold-silver. **Remarks:** Idle throughout the year.

RELIANCE GOLD MINES CO.

Office: 605 Eastman Bldg., Boise. **Officers:** J. J. Oberbillig, Pres.-Mgr., Boise; Louis A. Dumond, Sec., Chicago, Ill. **Inc.:** Feb. 4, 1924. **Capital:** 1,000,000 shares; par value 10c; 350,000 shares issued. **Property:** Star group; 8 unpatented claims, Black Hornet dist.; Boise. **Development:** Principally by one tunnel which is 1350 ft. long. **Ore:** Gold-silver-arsenic. **Remarks:** Annual labor only.

ADAMS COUNTY

Adams is one of the southwestern counties, adjoining and lying south of Idaho County, north of Washington County, and west of Valley County. The Snake River, which flows north, forms the entire western boundary. The county contains 1366 square miles and was accredited with a population of 2,966 in the 1920 census, or 2.2 inhabitants to the square mile. The larger part of the population is located in Weiser River and Little Salmon River valleys. The headwaters of the Weiser River, which flows south, and those of the Little Salmon River, which flows north, are located in this county. It is primarily an agricultural county and is noted for its high-quality apples and livestock industry.

The North and South Panoramic Highway extends from the southern to the northern boundaries and is situated in about the geographical center. Branch roads leading to all of the outlying settlements are maintained by the county and U. S. Forest Service. These are kept in good repair and are open to travel during the larger part of the year. In 1925 the Legislatures of Oregon and Idaho each appropriated $25,000 for the construction of a joint State wagon bridge across the Snake River at Ballard's Landing, about three miles north of Homestead, Oregon. It has proved to be an important connecting link between the Oregon highway at Baker and the Idaho highway at Council, which is the county seat and largest settlement of Adams County.

The county is served by two railroads: the Pacific and Idaho Northern, which extends from Weiser to New Meadows, and the Oregon Short Line branch from Huntington to Homestead, Oregon.

Over 90 per cent of the county is mountainous. The mountains are rough and rugged and the bold relief that many of them show on the skyline presents scenic views that are unsurpassed in grandeur, the principal one of which is the Seven Devils, seven serrated peaks which reach high into the skyline, and from which the Seven Devils mining district is named.

During the eighties and early nineties this district was an active mining center. Many mines were in operation, a railroad was projected into it and partly constructed, a smelter was in operation, and three towns of fair sized populations were established. The boom died down in the panic of 1893 and since then no large operations or shipments of any consequence have taken place. The latent mineral resources are practically undeveloped and unprospected. The bold relief permits cheap development work by tunnels and drifts and, as the mineral resources are diverse and varied, the county offers many excellent opportunities to prospectors and development companies. The ores of the Seven Devils district are principally copper carrying silver and gold, with an occasional deposit of lead-zinc ore. The ores of the Indian Creek section are those of silver-copper and lead-zinc-silver. In addition to the five principal metals—copper, silver, gold, lead, zinc—deposits of mica, feldspar, and garnet, of commercial importance, occur in this county. The mica deposits of Council Mountain have received a little attention, although they have never been prospected or developed in proportion to the possibilities which they offer. When the mineral resources of Adams County are properly exploited and developed this county may be recognized as one of the principal mining counties in the State.

This county witnessed but little mining activity during the year, and no new enterprises were started. The Idaho Copper Company, whose properties were placed under receivership in November, 1927, continued in receivership and no development work of any kind was performed. A small amount of development work was done on the old Peacock and Bluejacket properties near Helena, and a few prospectors in other parts of the county performed a small amount of new work. The mica deposits in the Council Mountain district received more attention than in previous years, and the work done during the year greatly enhanced the possibility of these deposits being of commercial importance.

AMERICAN MINING CO., LTD.

Office: 630 Monroe Ave., Helena, Mont. **Officers:** Amelia H. Kleinschmidt, Pres., Helena, Mont. **Inc.:** Sept. 11, 1911. **Capital:** 50,000 shares; par value $1; none issued. **Property:** Peacock and White Monument groups; 10 patented claims, Seven Devils dist.; Cuprum. **Ore:** Copper, silver. **Remarks:** Peacock group under lease and option to James Glass and associates, of Butte, Montana, who conducted a small amount of development work during the year.

IDAHO COPPER CO.

Office: 112 N. 6th St., Boise. **Officers:** O. H. Griggs, Pres., 643 Rowan Bldg., Los Angeles, Calif.; Carey H. Nixon, Sec.; Edwin Snow, Receiver, both of Boise. **Inc.:** Jan. 10, 1920, as Idaho Copper Co., Ltd. Name changed May 24, 1926. **Capital:** On Feb. 9, 1925, the capital was increased from 50,000 shares, par value $10, to 10,000,000 shares, par value $1; 9,646,600 shares issued. **Property:** Red Ledge group; 31 patented, 22 unpatented claims, Seven Devils dist.; R. R. and P. O., Homestead, Ore., 18 miles. **Development:** 3 tunnels on Deep Creek: No. 1, 950 ft. long; No. 2, 2400 ft. long; No. 3, 100 ft. long; tunnel No. 4 at Eagle Bar 700 ft. long. In addition to the tunnels, approximately 10,000 ft. of diamond drilling has been done on the property. **Plant:** 600-cu. ft. I. R. compressor, driven by 120 h. p. Diesel engine; complete mining equipment and camp at No. 4 tunnel. **Ore:** Copper. **Men employed:** None. **Remarks:** On Nov. 4, 1927, all mining operations were suspended, and on Nov. 25, 1927, the company was placed in receivership. The complaint for receivership was filed by the Boise Association of Credit Men, and alleged disagreements between the Cooley Butler faction (originally Idaho Copper Co., Ltd.) and the George Graham Rice faction (originally Idaho Copper Corporation).

IDAHO COPPER CORPORATION

Office: 112 N. 6th St., Boise. **Officers:** O. H. Griggs, Pres., 643 Rowan Bldg., Los Angeles, Calif.; Carey H. Nixon, Sec.; Edwin Snow, Receiver, both of Boise. **Inc.:** Incorporated in Delaware, Oct., 1924; filed in Idaho, April 4, 1925. **Capital:** 2,500,000 shares; par value $1; all shares issued. **Property:** South Peacock group; 3 patented, 5 unpatented claims; Seven Devils dist.; Cuprum. **Development:** 1 vertical shaft, 325 ft. deep; completed in 1901 by prior owners. Total development, approximately 1300 ft. **Plant:** Partly installed steam-driven hoist and compressor. **Ore:** Copper. **Men employed:** None. **Remarks:** On Nov. 4, 1927, all mining operations were suspended, and on Nov. 25, 1927, the company was placed in receivership. The complaint for receivership was filed by the Boise Association of Credit Men, and alleged disagreements between the Cooley Butler faction (originally Idaho Copper Co., Ltd.) and the George Graham Rice faction (originally Idaho Copper Corporation). On Dec. 14, 1928, George Graham Rice and the corporation were convicted of using the mails to defraud in a scheme for the promotion of this stock. (See Foreword.)

IDAHO MINES CO., LTD.

Office: Weiser. **Officers:** S. H. Travis, Pres., Chehalis, Wn.; B. S. Varian, Sec., Weiser. **Inc.:** Jan. 5, 1904. **Capital:** 5,000,000 shares; par value $1; 1,503,700 shares issued. **Property:** California group: 3 patented claims, Seven Devils dist.; Cuprum; R. R. Homestead, Ore., 30 miles. **Ore:** Copper. **Remarks:** Idle for many years.

INDIAN CREEK MINING & DEVELOPMENT CO.

Office: 610 Eastman Bldg., Boise. William J. Tait, Pres., Santa Paula, Calif.; George D. Reid, Sec.-Treas., Fillmore, Calif. **Inc.:** Oct. 22, 1909. **Capital:** 100,000 shares; par value $1; 82,553 shares issued. **Property:** 3 patented, 2 unpatented claims, Indian Creek, Seven Devils dist.; Cuprum. **Development:** Approximately 800 ft. of underground workings. **Ore:** Copper. **Remarks:** Idle for many years.

BANNOCK COUNTY

Bannock County is one of the largest and most important of the southeastern counties. It is bounded on the north by Bingham County, on the east by Caribou and Bear Lake counties, on the south by Franklin and Oneida counties, and on the west by Power County. It has an area of 1837 square miles and was accredited with a population of 27,532 in the 1920 census. Pocatello, the second largest city in the State, is the county seat and principal division point of the Oregon Short Line Railroad.

The county is served by two State highways, the Oregon Trail, and Yellowstone Park. The former is the main east and west trunk line, and the latter is the main north and south trunk line of the State system.

The principal mineral resources are phosphate rock, limestone, manganese, copper, silver, gold, and building stone. The limestone is suitable for Portland cement and, as the deposits are extensively distributed and adjacent to transportation, they will eventually add a new and important industry. The phosphate rock covers a large area and constitutes an important latent resource. Considerable prospecting has been done on the copper veins which are found in the Portneuf Mountains south of Pocatello. In 1909 a mill was constructed at one mine; but other than the necessary annual labor no work of importance has been conducted for a number of years. Reports on the manganese deposits near Cleveland and Lava Hot Springs, which were discovered during 1924, indicate that the ore is high grade and that there is a large tonnage available.

One of the most important new enterprises to be started in the State during the year was that of the Idaho Portland Cement Co., near Inkom, about 12 miles south of Pocatello. This company acquired a large deposit of limestone, constructed a new railroad siding, and commenced installation of a 1500-barrel cement plant. The manganese mines near Cleveland and Lava Hot Springs were active throughout the greater part of the year. A substantial tonnage of high-grade manganese ore was produced and marketed, and three new companies were actively engaged in developing their properties.

BANNOCK MANGANESE MINING CO., LTD.

Office: Box 502, Pocatello. **Officers:** M. E. Hooker, Pres.; L. E. Glennon, Sec.; Wm. Sharp, Mgr., all of Pocatello. **Inc.:** Dec. 17, 1928. **Capital:** 100,000 shares; par value $1; 75,000 shares issued. **Property:** Lava View group: 2 unpatented claims, Portneuf dist.; Lava Hot Springs. Held under lease and option. **Development:** By 1 tunnel 130 ft. long. **Ore:** Manganese. **Men employed:** Average, 4. **Remarks:** A small amount of development work during the closing months of the year.

CLEVELAND MINING CORPORATION

Office: Cleveland. **Officers:** A. K. Vandenakker, Pres., Grace; Clark Gray, Sec., Cleveland. **Inc.:** July 13, 1925. **Capital:** 400,000 shares, par value 10c; 320,000 shares issued. **Property:** Lease and option on 420 acres of patented farm land, unorganized dist.; Cleveland. **Development:** Principally by 2 tunnels: No. 1, 300 ft. long; No. 2, 200 ft. long. **Ore:** Manganese. **Remarks:** A small amount of development work during the summer months.

FORT HALL MINING & MILLING CO., LTD.

Office: Pocatello. **Officers:** H. M. Palmer, Pres.-Mgr., Pocatello. **Inc.:** Sept. 5, 1902. **Capital:** 1,000,000 shares; par value $1; 260,000 shares issued. **Property:** Fort Hall group; 10 unpatented claims, Fort Hall dist.; Portneuf. **Development:** Principal tunnel 4000 ft. long; total development approximately 8000 ft. **Plant:** MINE: Steam-driven compressor, complete mining equipment. MILL: 50-ton concentrator built 1909. **Ore:** Copper. **Remarks:** Annual labor.

IDAHO PORTLAND CEMENT CO.

Office: Carlson Bldg., Pocatello. **Officers:** E. J. Simons, Pres., Spokane, Wash.; J. B. Maxfield, Sec., Pocatello. **Inc.:** July 20, 1928. **Capital:** 6,000 shares common, no par value; 5,000 shares preferred, par value $100; 8,500 shares common issued. **Property:** 160 acres patented land, unorganized dist.; near Inkom. **Ore:** Limestone. **Remarks:** A railroad siding was constructed and work started on the installation of a 1,000-barrel Portland cement plant.

LAVA MANGANESE MINING CO.

Office: Lava Hot Springs. **Officers:** R. S. Turner, Pres.; H. R. Turner, Sec., both of Pocatello. **Inc.:** Aug. 10, 1926. **Capital:** 10,000 shares; par value $10; shares issued unknown. **Property:** 3 unpatented claims. **Pertinent dist.:** Lava Hot Springs. **Development:** 1 tunnel, 450 ft. long. **Ore:** Manganese. **Men employed:** Average, 8. **Remarks:** Property under lease to R. E. Wickham, who performed a small amount of development work and shipped a small tonnage of manganese ore during the year.

NORTON GAS & OIL CO.

Office: Pocatello. **Officers:** E. C. Norton, Pres.; Fred P. Brandt, Sec., both of Pocatello. **Inc.:** May 7, 1928. **Capital:** 250,000 shares, par value $1; 200,000 shares issued. **Property:** Oil and gas leases on 646 acres, Arimo. **Mineral sought:** Oil and gas. **Remarks:** Press reports were to the effect that this company installed equipment and commenced drilling operations.

WESTERN MANGANESE CO.

Office: 408 Carlson Bldg., Pocatello. **Officers:** J. S. Bussell, Pres.; E. G. Frawley, Sec., both of Pocatello; William McLean, Mgr., Grace. **Inc.:** Mar. 16, 1928. Charter forfeited Nov. 30, 1928. **Capital:** 120 shares, par value $100; all shares issued. **Property:** Lease on 120 acres patented farm land, unorganized dist.; Cleveland. **Development:** By 2 tunnels: No. 1, 250 ft. long; No. 2, 275 ft. long. **Ore:** Manganese. **Remarks:** Small amount of development work.

BEAR LAKE COUNTY

Bear Lake is the extreme southeastern county of the State. It is bounded on the east by the State of Wyoming and on the south by the State of Utah. On the north and west it adjoins Caribou, Bannock, and Franklin counties. It has an area of 980 square miles and was accredited with a population of 8783 in the 1920 census. Montpelier, situated in the center of a rich agricultural valley, is the largest town; and Paris, located near the north end of Bear Lake, is the county seat.

The State highway, Oregon Trail, and the main line of the Oregon Short Line Railroad traverse the county east and west, thus giving it good transportation facilities.

The principal mineral resources are phosphate rock, gypsum, manganese, copper, lead, and silver. There are also excellent possibilities for petroleum. Estimates made by geologists of the U. S. Geological Survey credit the State with more than five billion tons of minable phosphate rock, over 85 per cent of the total known phosphate resources of the world. The largest and most accessible areas containing this rock are in Bear Lake County. Phosphate is a necessary soil constituent and it is through the existence of the Idaho deposits that the future of American agriculture is assured. These deposits are practically untouched, as present freight, market, and price conditions are preventing profitable production. They are the greatest potential mineral resources within the State and when properly developed the mining enterprises will dwarf many of the now famous mining districts in the United States. These deposits are fully described, with analyses and tonnage estimates included, in the numerous publications referred to in the bibliography of this county. Four mines are properly equipped with the necessary surface and mining plants, all have a large available tonnage, and production can be started without delay whenever conditions will warrant it.

One of the most outstanding publications issued by the U. S. Geological Survey in recent years is Professional Paper 152, by G. R. Mansfield: "Geography, Geology, and Mineral Resources of Part of Southeastern Idaho." This appeared during 1927; it is profusely illustrated with pictures, maps, and diagrams, and describes in detail the subjects mentioned in its title, dealing especially with the immense areas of phosphate rock found in this county.

Many structures favorable to the accumulation of gas and petroleum in commercial quantities are found in this county. As the formation is similar to those in Wyoming which are producing oil, it is reasonable to expect that the probabilities should be at least equal on the Idaho side of the State line.

The San Francisco Chemical Co. was the only phosphate mine in this county which was active during the year. A substantial tonnage of phosphate rock was produced and shipped to San Francisco, California, where the company manufactures it into a high-grade fertilizer. During the year four new mining enterprises, based on the development of the lead and copper properties, were organized and development work started. These were: Gold Star Mining Co.; Leadville Consolidated Mining Co.; Utah-Idaho M. & M. Co.; and Wasatch Mining & Development Co. In addition to these, the Sunset Mining Co. was active throughout the summer months, and produced and marketed one shipment of high-grade lead ore.

APEX MINING CO.

Office: Pegram. **Officers:** M. L. de Julien, Pres.-Mgr., Pegram; R. A. White, Sec., Laramie, Wyo. **Inc.:** May 5, 1921. **Capital:** 1,000,000 shares, value 1c; 400,000 shares issued. **Property:** Apex group; 10 unpatented claims, unorganized dist.: Pegram. **Development:** By 2 tunnels: No. 1, 120 ft. long; No. 2, 20 ft. long. **Ore:** Gold. **Remarks:** Annual labor only.

BLACKSTONE MINING & POWER CO.

Office: Hood River, Ore. **Officers:** E. B. Cloud, Pres.-Mgr., Hood River, Ore. **Inc.:** Jan. 28, 1907. **Capital:** 1,000,000 shares; par value $1; shares issued unknown. **Property:** Blackstone, 1 patented claim, unorganized dist.; St. Charles. **Remarks:** Idle for many years.

COLOSSUS MINING & MILLING CO.

Office: Montpelier. **Officers:** M. L. de Julien, Pres.-Mgr., Pegram; De-Meade Austin, Sec., Montpelier. **Inc.:** May 1, 1925. Charter forfeited Nov. 30, 1927. **Capital:** 1,000,000 shares; par value 1c; 612,000 shares issued. **Property:** Colossus group; 10 unpatented claims, unorganized dist.; Pegram. **Development:** By 2 tunnels: No. 1, 510 ft. long; No. 2, 100 ft. long. **Plant:** Partly constructed; building designed to house a 300-ton cyanide plant. Complete mine camp and buildings. **Ore:** Gold. **Remarks:** Annual labor only.

COPPER RESERVE MINING & REDUCTION CO.

Office: Care of Walker Brothers Bank, Salt Lake City, Utah. **Officers:** John M. Wallace, Acting Pres., Salt Lake City; Thomas Doolittle, Sec., Los Angeles, Calif. **Inc.:** Aug. 5, 1912. **Capital:** 500,000 shares; par value 10c; 400,000 shares issued. **Property:** Humming Bird group; 4 patented claims, Bear Lake dist.; Paris. **Remarks:** Inactive for nine years.

GOLD STAR MINING CO.

Office: Paris. **Officers:** L. W. Johnson, Pres.-Mgr.; C. S. Bean, Sec., both of Provo, Utah. **Inc.:** May 9, 1928. **Capital:** 1,000,000 shares; par value 2c; 605,000 shares issued. **Property:** 9 unpatented claims, unorganized dist.; Paris. **Development:** By 3 short entries. **Ore:** Lead-copper. **Remarks:** A small sum was expended in development work during the summer months.

KEYSTONE PHOSPHATE CO.

Office: Paris, Idaho. **Officers:** F. S. Irwin, Pres.-Mgr.; Harold F. Irwin, Sec., both of Nampa. **Inc.:** May 4, 1926. **Capital:** 75,000 shares; par value $10; 50,000 shares issued. **Property:** Sublease on 360 acres, government lease owned by Joseph Stucki, and sublease on 317 acres of patented land; Paris. **Development:** By 1 tunnel 960 ft. long. **Ore:** Phosphate rock. **Remarks:** Idle. Active attempt throughout the year on part of officers to finance.

LEADVILLE CONSOLIDATED MINING CO.

Office: 310 Eccles Bldg., Ogden, Utah. **Officers:** Frank Moore, Pres.; G. B. Roberts, Sec.; Walter B. Cole, Mgr., all of Ogden, Utah. **Inc.:** Filed in Idaho Dec. 3, 1927. **Capital:** 1,000,000 shares; par value 10c; 336,424 shares issued. **Property:** Paris group; 6 unpatented claims, unorganized dist.; Paris. **Development:** By an 80-ft. shaft, at the bottom of which is 75 ft. of drifting. **Ore:** Lead-silver. **Men employed:** Average, 4. **Remarks:** Entries listed under "Development" driven during the year.

SAN FRANCISCO CHEMICAL CO.

Office: 332 Pine St., San Francisco, Calif. **Officers:** William F. Kett, Pres., San Francisco, Calif.; Jos. J. Taylor, Mgr., Montpelier. **Inc.:** July 17, 1906. **Capital:** 2000 shares; par value $100; all shares issued. **Property:** Waterloo group; 10 patented claims; 505 acres; Montpelier. **Development:** 3 tunnels; total development, approximately 4000 ft. **Plant:** Gas-driven compressor and complete mining equipment. **Ore:** Phosphate rock. **Men employed:** Average, 15. **Remarks:** Production maintained for 3 months; a substantial tonnage of phosphate rock was produced and shipped to San Francisco, Calif., where it was converted into superphosphate in a plant owned by the company.

STOCKHOLDERS' SYNDICATE

Office: 1240 So. Main St., Los Angeles, Calif. **Officers:** F. W. Braun, Pres.; Roy V. Boswell, Sec., both of Los Angeles, Calif. **Inc.:** May 27, 1913. **Capital:** 500 shares, par value $100; all shares issued. **Property:** 16 patented claims; approximately 2400 acres; unorganized dist.; Georgetown; R. R., Georgetown, 8 miles. **Development:** 9 tunnels, 2 shafts, approximately 800 ft. **Ore:** Phosphate rock. **Remarks:** Idle. This company owns the property formerly owned by the Utah Fertilizer & Chemical Mfg. Co.

UTAH-IDAHO MINING & MILLING CO.

Office: Paris, Idaho. **Officers:** L. W. Johnson, Pres., Provo, Utah; H. H. Broomhead, Sec., Bloomington. **Inc.:** Aug. 23, 1926. **Capital:** 1,000,000 shares; par value 2c; 712,300 shares issued. **Property:** Old Boulder group, 18 unpatented claims, unorganized dist.; Paris. **Development:** By 3 tunnels: No. 1, 600 ft. long; No. 2, 150 ft. long; No. 3, 200 ft. long; and a vertical shaft 160 ft. deep. **Ore:** Copper. **Men employed:** Average, 4. **Remarks:** Shaft extended 100 ft. during the year under contract, the the equipment used consisting of gas-driven compressor and hoist which were furnished by the contractor. The funds for this work were derived from stock assessments.

WASATCH MINING & DEVELOPMENT CO.

Office: Preston. **Officers:** G. A. Ransom, Pres.-Mgr., Paris; Chas. Ransom, Sec., Cleveland. **Inc.:** Feb. 6, 1928. **Capital:** 500,000 shares; par value 10c; 260,000 shares issued. **Property:** Midway group; 5 unpatented claims held under lease and option; unorganized dist.; Bloomington. **Development:** By 2 tunnels: No. 1, 40 ft. long; No. 2, 70 ft. long. **Men employed:** Average, 3. **Remarks:** Principal tunnel extended 100 feet during the year.

BENEWAH COUNTY

Benewah is one of the northern counties. It is bounded on the west by the State of Washington, on the north by Kootenai County, and on the east and south by Shoshone and Latah counties. It has an area of 786 square miles and was accredited with a population of 6997 in the 1920 census. St. Maries, the county seat, is the largest town in the county. Except a small area along the St. Joe and St. Maries Rivers, and the section adjacent to the town of Plummer, which is devoted to agriculture, the entire county is mountainous and heavily timbered. The county is noted for its timber and lumbering industries.

The county is served by lake-boat transportation from Coeur d'Alene to St. Maries, and by two railroads: The Tekoa, Wn.-Wallace, Idaho, branch of the O. W. R. & N. (Union Pacific System), and the main line of the Chicago, Milwaukee & St. Paul Railroad, with its branch line extending from St. Maries to Elk River (Clearwater County).

The principal mineral resources are gold, copper, silver, lead, zinc, iron, and clay. The deposits containing the principal metals have received a small amount of attention; and many of the clays are exceptionally adapted to the ceramic industry. The St. Joe district, which lies east of St. Maries, and the Hoodoo and Camas Cove districts, in the southeastern corner, are the principal mining districts.

During 1928 three mining companies performed a small amount of development work. This, with a slight increase in the number of prospectors, gave the county a little more than its usual mining activity.

BUTTE MINING CO.

Office: St. Maries, Idaho. **Officers:** John Martindes, Pres.-Mgr.; George E. Mitchell, Sec., both of St. Maries. **Inc.:** March 27, 1916. **Capital:** 500,000 shares; par value 50c; 399,736 shares issued. **Property:** 6 unpatented claims, St. Joe dist.; St. Maries. **Development:** 1 tunnel, 240 ft. long. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** Annual labor only, the funds for which were derived from a stock assessment.

RAINBOW MINING & MILLING CO., LTD.

Office: 303 Mohawk Bldg., Spokane, Wash. **Officers:** Geo. Austin, Pres.-Mgr., Spokane, Wash.; John F. Gearon, Sec., Wallace. **Inc.:** June 20, 1907. **Capital:** 2,000,000 shares; par value 25c; 1,335,000 shares issued. **Property:** 2 unpatented claims, St. Joe dist.; Medimont. **Development:** By 2 short tunnels. **Ore:** Lead-silver. **Remarks:** A small amount of diamond drilling was done during the summer months.

BINGHAM COUNTY

Bingham, a southeastern county, is primarily an agricultural community. It occupies a large part of the Snake River Valley and is bounded by Butte, Blaine, Power, Bannock, Caribou, Bonneville, and Jefferson counties. It has an area of 2184 square miles and was accredited with a population of 18,310 in the census of 1920.

The extensive phosphate beds of southeastern Idaho are exposed in the Blackfoot Mountains which cover the eastern part of the county. Coal also has been found in these mountains, notably along Willow Creek, a small stream which flows in a northerly direction through the east end of the county. The coal beds have received a little attention from prospectors but no coal of commercial importance has been discovered. Structures that appear likely for the presence of petroleum are present also. The fine gold in the placer deposits along Snake River is the only metal resource of the county. In the past these deposits have received the attention of placer miners, but nothing of importance was reported during the year.

MARY LEE GOLD MINING CO.

Office: Gallipolis, Ohio. **Officers:** Harold Wolfe, Pres.; J. V. Lee, Sec.-Treas., both of Gallipolis, Ohio. **Inc.:** Jan. 29, 1919. **Capital:** 1,000,000 shares; par value $1; 500,000 shares issued. **Property:** 47½ acres unpatented land. **Ore:** Placer gold.

BLAINE COUNTY

Blaine County is bounded on the west by Camas County, on the north by Custer County, and on the east and south, in its greater extent, by Butte and Lincoln counties. Its principal area comprises the drainage basin of Big and Little Wood rivers, which flow in a southerly direction. Its total area is 2797 square miles. The 1920 census accredited the county with a population of 4473, or 1.6 persons to the square mile. In location it is one of the south-central counties and comprises part of the region known as "Central Idaho's Mineral Empire." The county is primarily recognized as a mining county, but it is also noted for its agricultural and stock raising industries; particularly sheep, as it is one of the largest sheep shipping points in the United States.

The county is served by the Wood River branch of the Oregon Short Line Railroad, which extends from Shoshone to Ketchum; by the Sawtooth Park State highway, and a well-kept system of county roads which extend into all of the various mining districts and sections. All roads are kept in good repair and are open to travel during the larger part of the year. Hailey is the largest town and county seat.

The first discovery of lead-silver ore in the State was made in Blaine County, which was then called Alturas County. The first ore was marketed in 1880 and since then this county has been a consistent producer of these metals. Most of the ores are of such high grade that they can be shipped direct to the smelter without preliminary treatment, thus assuring immediate returns from all discoveries. This fact and the possibilities of discovering and opening new ore bodies will continue to hold Blaine County, particularly the Wood River district, in popular esteem as a favorite section of the State for prospectors, development companies, and those seeking a worthy field for mining enterprises.

The high-grade ores of lead and silver are widely distributed throughout the county, as well as those of gold, zinc, and copper. In addition to the five principal metals—lead, silver, zinc, gold, and copper—deposits of arsenic,

antimony, bismuth, quicksilver, graphite, barytes and limestone are found in this county. These minerals occur in sufficient extent to be of commercial importance, and many of the deposits offer an excellent opportunity to development companies or to those in search of these minerals or metals. The barytes deposits are the largest that have ever been found west of the Mississippi River. One large deposit on Deer Creek has been purchased by the Bunker Hill & Sullivan Mining & Concentrating Co., presumably in anticipation of the construction of the company's zinc smelter at Kellogg, where it will be used in the manufacture of lithopone.

The principal operation in this county throughout the year was that of the Triumph Development Co. at the old Triumph mine, which adjoins the North Star of the Federal Mining & Smelting Co. A large tonnage of mixed ore was produced and sent to a milling plant in Utah for reduction. During the closing months of the year surveys and plans were completed for the construction of an aerial tramway, four miles long, and a mill at a point adjacent to the railroad. The Liberty Gem Mines, Inc., which was organized in 1927 to develop the new discovery made by the Mathewses in the early part of that year, maintained active development work throughout 1928. This work exposed a large amount of new ore, and at the close of the year arrangements had been completed to extend the shaft to a total depth of 150 feet. The Hailey Bonanza Mining Co., whose property is in Greenhorn Gulch north of Hailey, maintained work throughout the greater part of the year with a small crew and produced and marketed a small shipment of crude ore. The Crooked River Mining Co., operating in the Muldoon district, installed a gas-driven compressor and complete mining equipment, and actively developed its property by contract throughout the year. A new organization, the Pandora Mining Co., with property in the Lava Creek district adjacent to that of the Federal Mining & Smelting Co., in Butte County, installed a gas-driven compressor and complete mining equipment, constructed new camp buildings, and started active development work. The Vienna mine in the Sawtooth district was under operation by A. F. Peery; the Parker mine near Ketchum was actively developed throughout the year; and a few lessees produced and marketed a substantial tonnage of ore from the Independence and North Star mines owned by the Federal Mining & Smelting Co. What appears to be a substantial discovery of new ore was made by W. P. Fowler at the Jennie R. mine in the Rock Creek district. This new ore was uncovered during the closing months of the year, so at the present time its extent is not definitely known. The Wood River Mining Co. near Ketchum was active for eight months with a small crew, the funds for this work being derived from stock assessments. Peter L. Kent at the Lone Pine group on Deer Creek performed a small amount of work, and lessees at the Eureka and Idahoan groups in the Bullion district were also active.

ARGO MINING CORPORATION

Office: 3725 Kate Ave., Baltimore, Md. **Officers:** Henry Mencken, Pres.; F. H. Gettemuller, Sec., both of Baltimore, Md.; T. R. Bowlden, Mgr., Gannett. **Inc.:** Oct. 15, 1926. **Capital:** 500,000 shares; par value $1; 35,000 shares issued. **Property:** Cove group; 7 unpatented claims, Mineral Hill dist.; Gannett. **Development:** 4 tunnels, giving approximately 580 feet, vertical depth on vein; total development, 2533 ft. **Plant:** Steam-driven compressor on ground not installed; complete mining equipment. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** Annual labor only.

ARGOSY MINING & MILLING CO., LTD.

Office: 1125 N. Garfield Ave., Pocatello, Idaho. **Officers:** W. E. Smith, Pres.; Priscilla K. Smith, Sec., both of Pocatello. **Inc.:** Feb. 24, 1904. **Capital:** 50,000 shares; par value $1; all shares issued. **Property:** Argosy group; 5 patented claims, Little Wood River dist.; Muldoon. **Development:** By 5 tunnels; total development approximately 800 ft. **Ore:** Lead-silver. **Remarks:** Idle for 16 years.

BALTIMORE & VICTORIA MINING CO.
Office: Care of Terre Haute Nat'l Bank & Trust Co., Terre Haute, Ind. **Officers:** William K. Hamilton, Pres., Terre Haute, Ind.; Eph Daft, Agent, Hailey. **Inc.:** July 3, 1903. **Capital:** 150,000 shares; par value 10c; all shares issued. **Property:** Ida Harland group; 5 patented, 8 unpatented claims, Warm Springs Creek dist.; Hailey. **Remarks:** Small amount of work by lessees.

BUNKER HILL & SULLIVAN MINING & CONCENTRATING CO.
(See Shoshone County)
Officers: F. W. Bradley, Pres., 1022 Crocker Bldg., San Francisco, Cal.; Stanly A. Easton, Mgr., Kellogg; James W. Gwinn, Local Mgr., Cascade. **Property:** 10 unpatented claims; Bullion, Mineral Hill dist.; Hailey. **Remarks:** Annual labor only.

CROOKED RIVER MINING CO.
Office: Box 158, Nampa. **Officers:** Melvin T. Rowland, Pres.-Mgr., Nampa; N. S. Talbott, Sec., Dayton, Ohio. **Inc.:** Oct. 5, 1927. **Capital:** 2000 shares, par value $100; 2000 shares, no par value; no shares issued. **Property:** Smuggler and Jupiter groups; 6 unpatented claims held under lease and option, Little Wood River dist.; Muldoon. **Development:** 6 tunnels, totaling over 2,000 ft. **Plant:** Gas-driven C-P compressor; complete mining equipment. **Ore:** Lead-silver. **Men employed:** Average, 4. **Remarks:** Equipment installed and 400 feet of development work performed during the year.

DAISY MINING & MILLING CO., LTD.
Office: Hailey. **Officers:** A. E. Larsen, Pres., Yakima, Wash.; L. A. Devine, Sec., Hailey. **Inc.:** July 6, 1920. **Capital:** 500,000 shares; par value $1; all shares issued. **Property:** Camas group; 18 patented claims held under lease and option; Mineral Hill dist.; Hailey. **Development:** Principally by 1 tunnel 800 ft. long. **Plant:** MINE: Electrically-driven compressor and complete mining equipment. MILL: Small concentrator, including flotation. **Ore:** Lead-silver-gold. **Remarks:** Idle.

ERVINE MINING CO.
Office: Ketchum. **Officers:** M. A. Costello, Sec., 40 Court St., Boston, Mass.; C. Fred Howe, Mgr., Ketchum. **Inc.:** March 14, 1922. **Capital:** 1,000,000 shares; par value $1; 357,550 shares issued. **Property:** Boyle Mtn. group; 7 patented, 13 unpatented claims, 350 acres, Warm Springs Creek dist.; Ketchum. **Ore:** Silver-lead. **Remarks:** Annual labor only.

EUREKA DEVELOPMENT CO., LTD.
Office: 319 Dooly Blk., Salt Lake City, Utah. **Officers:** W. A. Wilson, Pres.-Mgr., Salt Lake City, Utah. **Inc.:** June 28, 1905. **Capital:** 200,000 shares; par value 50c; all shares issued. **Property:** Eureka group; 12 patented, 5 unpatented claims, Mineral Hill dist.; Hailey, 7 miles. **Development:** Total development approximately 12,900 ft., the length of the principal workings being: Bay State, 1000 ft.; Chicagoan, 300 ft.; Whale, 1400 ft.; Eureka, 3920 ft.; Idahoan, 5000 ft. One inclined shaft 700 ft. long; 1 inclined shaft 435 ft. long. **Plant:** MINE: 8x10 Lidgerwood hoist; 40 h. p. C-P oil-driven compressor. MILL: 25-ton concentrator. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** The mine was operated by lessees, who produced and marketed a small tonnage of high-grade hand-sorted ore.

FEDERAL MINING & SMELTING CO. (See Shoshone County)
Office: Wallace. **Officers:** F. H. Brownell, Pres.; J. L. Martin, Sec., both of 120 Broadway, New York City; Frederick Burbidge, Mgr., Wallace. **Property:** Independence, North Star, Koeninger and Malta groups; 36 patented, 13 unpatented claims, 762 acres, Warm Springs Creek dist.; Hailey, 12 miles. **Development:** Approximately 7 miles of underground workings, the principal of which is the Plummer, or main haulage tunnel, which is over 6000 ft. long and connects the North Star and Independence groups. **Plant:** MINE: 1 English Iron Works 202 single drum 25 h. p. electric hoist; 1 Lidgerwood 8x10 air hoist; 1 I-R 420 cu. ft. com-

pressor; 1 C-P 765 cu. ft. compressor. All electrically driven. Electric haulage through Plummer tunnel. One Waugh drill sharpener and complete mine equipment; 4400 ft. Riblet aerial tram from Plummer tunnel to mill, capacity 20 tons an hour. Shops, timber sheds and bunk houses. MILL: 350-ton concentrator; jaw and gyratory crushers; rolls; Marcy ball mills; Hancock jigs; drag classifiers; Wilfley tables; Dorr thickeners; Oliver filters; electric power. **Ore:** Lead-silver. **Remarks:** Active mining operations were suspended on August 1, 1923, after which various parts of the Indepencence and North Star mines have been operated by lessees. A substantial tonnage was produced and marketed during the year.

FIELDS MUTUAL DEVELOPMENT CO.

Office: Hailey. **Officers:** Al. W. Field, Pres.-Mgr., Hailey; V. F. Rodgers, Sec., Portland, Ore. **Inc.:** Nov. 6, 1926. Formerly known as Field Mutual Mining Co. **Capital:** 500,000 shares; par value $1; 195,000 shares issued. **Property:** 14 unpatented claims, Kelly Mountain, Mineral Hill dist.; Hailey. **Development:** Approximately 3000 ft. of underground work, principally 1 tunnel 1000 ft. long. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** A small amount of development work during the summer months.

HAILEY BONANZA MINING CO.

Office: Hailey. **Officers:** Carl Reisig, Pres.-Mgr.; Alfred Wolff, Sec.-Treas., both of Hailey. **Inc.:** Aug. 9, 1919. **Capital:** 500,000 shares; par value $1; all shares issued. **Property:** Imperial group; 1 patented, 24 unpatented claims, Greenhorn Gulch, Warm Springs Creek dist.; Hailey. **Development:** Approximately 3000 ft. of underground workings, the principal of which is 1 tunnel 1200 ft. long. **Plant:** MINE: Electrically-driven compressor and complete mining equipment. MILL: 100-ton concentrator consisting of tables and jigs. **Ore:** Lead-silver. **Men employed:** Average, 3. **Remarks:** During the year a small tonnage of hand-sorted ore was produced and marketed.

HOMESTAKE MINES CORPORATION

Office: Bellevue. **Officers:** F. D. Kaufman, Sec., Bellevue. **Inc.:** July 27, 1927. **Capital:** 1000 shares; par value $100; all shares issued. **Property:** Homestake group; 13 unpatented claims, Warm Springs Creek dist.; Ketchum. **Development:** Approximately 3500 ft. of workings, the principal being: No. 3 tunnel, 550 ft. long; No. 4 tunnel, 1000 ft. long; No. 5 tunnel, 1900 ft. long. **Plant:** Gas-driven C-P compressor; complete mining equipment. **Ore:** Lead-silver-zinc. **Remarks:** Annual labor only.

IDAHO DEMOCRAT MINE, INC.

Office: 207 Glencoe Bldg., Duluth, Minn. **Officers:** A. Hagberg, Pres.; E. O. Olund, Sec., both of Duluth. **Inc.:** Jan. 30, 1924. **Capital:** 300,000 shares; par value $1; 249,671 shares issued. **Property:** Badger group; 3 unpatented claims held under lease and option, Mineral Hill dist.; Hailey. **Plant:** Portable gas-driven compressor and complete mining equipment. **Ore:** Lead-silver. **Men employed:** Average, 3. **Remarks:** A small amount of prospecting work by churn drilling was performed.

IDAHO MASCOT MINES COALITION

Office: 407 Newhouse Bldg., Salt Lake City, Utah. **Officers:** Charles Peter, Pres.-Mgr.; August Glissmeyer, Sec., both of Salt Lake City. **Inc.:** Jan. 8, 1926. **Capital:** 2,000,000 shares; par value $1; 1,400,000 shares issued. **Property:** Mascot group; 41 patented, 28 unpatented claims, Warm Springs Creek dist.; Hailey. Held under lease and bond from F. C. Richmond Machinery Co., Salt Lake City. **Development:** Principally by 4 tunnels; total development, approximately 11,000 ft., of which the principal tunnels are; Silver Fortune, 50 ft. long; Oregonian, 300 ft. long; Lyda, 6000 ft. long; and West Side, 2250 ft. long. **Plant:** 1 15x9x10 and 1 12x8x12 C-P gas-driven compressor; 1 160 h. p. and 1 40 h. p. C-P semi Deisel engine driving electric generators; sawmill and complete mine equipment and camp. **Ore:** Lead-silver. **Remarks:** Idle.

IDAHO MINERAL PRODUCTS CO., LTD.

Office: Hailey. **Officers:** J. F. McClure, Pres., Montpelier; J. G. Hedrick, Sec., Hailey. **Inc.:** July 6, 1920. **Capital:** 100,000 shares; par value $1; shares issued, none. **Remarks:** Company owns no property.

IDAHO SILVER KING MINING CO.

Office: Huntington Beach, Calif. **Officers:** A. B. Watson, Pres., Santa Ana, Calif.; E. E. Wilson, Sec., Huntington Beach, Calif. **Inc.:** July 17, 1926. **Capital:** 500,000 shares; no par value; 270,005 shares issued. **Property:** Silver King group; 2 patented, 1 unpatented claim, Sawtooth dist.; Ketchum. **Development:** By an inclined shaft 600 ft. long, with 3 intermediate levels; total development, approximately 3000 ft. **Plant:** Steam-driven hoist. **Ore:** Silver, antimony. **Remarks:** Idle.

IVANHOE MINING CO.

Office: 485 California St., San Francisco, Calif. **Officers:** Harry L. Tevis, Pres.; William Letson, Sec., both of San Francisco, Calif. **Inc.:** July 28, 1909. **Capital:** 2500 shares; par value $1; all shares issued. **Property:** Durango group, 16 patented claims; Iris group, 5 patented claims; Mineral Hill dist.; Triumph group, 7 patented claims; Warm Springs Creek dist.

LIBERTY GEM MINES, INC.

Office: 610 Eastman Bldg., Boise. **Officers:** Guy E. Mathews, Pres.; G. Arlon Mathews, Sec., both of Hailey. **Inc.:** Sept. 13, 1927. **Capital:** 250 shares; no par value; all shares issued. **Property:** Liberty group; 11 unpatented claims, Mineral Hill dist.; Hailey. **Development:** Numerous open cuts and 4 small vertical shafts, the deepest of which is 75 ft. Total development, 450 ft. **Plant:** Gas-driven compressor; air-driven hoist; complete mining equipment and camp. **Ore:** Lead-silver-zinc. **Men employed:** Average, 7. **Remarks:** This enterprise is based on the development of the new ore disclosures made by the Mathewses during the early part of 1927. The development work has proved that this property may be classified as one of importance. Active throughout the year.

MIDVALE MINING CO.

Office: Ketchum. **Officers:** M. A. Costello, Sec., 40 Court St., Boston, Mass.; C. Fred Howe, Mgr., Ketchum. **Inc.:** March 14, 1922. **Capital:** 1,000,000 shares; par value $1; 400,000 shares issued. **Property:** Pay group; 8 unpatented claims, Warm Springs Creek dist.; Ketchum. **Ore:** Zinc. **Remarks:** Annual labor only.

PANDORA MINING CO.

Office: Miller Bldg., Yakima, Wash. **Officers:** Charles A. Mayo, Pres.-Mgr., Carey; R. Strobach, Sec., Yakima, Wash. **Inc.:** Unknown. **Capital:** 500,000 shares; par value 10c; 250,000 shares issued. **Property:** Pandora group; 15 unpatented claims held under lease and option, Lava Creek dist.; Blaine and Butte counties; Carey. **Plant:** Portable I-R gas-driven compressor; complete mining equipment and camp. **Ore:** Lead-silver. **Men employed:** Average, 4. **Remarks:** A new organization which acquired its property, constructed camp buildings, installed equipment, and commenced active development work during the closing months of the year, the work being confined to the Blaine County side.

QUINCY JUNIOR MINING CO.

Office: 319 Dooly Block, Salt Lake City, Utah. **Officers:** George L. Erwin, Pres.; Geo. T. Peterson, Sec.; W. A. Wilson, Mgr., all of Salt Lake City. **Inc.:** Dec. 20, 1903. **Capital:** 150,000 shares; par value $1; 139,658 shares issued. **Property:** Red Elephant group; 10 patented claims, Mineral Hill dist.; Hailey. **Development:** Approximately 15,000 ft. underground workings. **Remarks:** Annual labor only.

RED ELEPHANT CONSOLIDATED MINES CO.

Office: 319 Dooly Blk., Salt Lake City, Utah. **Officers:** John Rapalji, Pres., Beacon, N. Y.; Edwin J. Webb, Sec., Beacon, N. Y. **Inc.:** June 16, 1916. **Capital:** 1,500,000 shares; par value $1; 957,167 shares issued. **Property:** Red Elephant Extension group; 1 patented, 16 unpatented claims, Mineral Hill dist.; Hailey. **Remarks:** Idle throughout the year.

SILVER SPAR MINING CO.

Office: Idaho Falls. **Officers:** B. M. Rogers, Pres.; Dr. Dwight Lenzi, Sec., both of Idaho Falls. **Inc.:** April 14, 1916, as Falls Mining Co.; name changed April 28, 1917. **Capital:** 200,000 shares; par value $1; 100,000 shares issued. **Property:** Silver Spar group; 18 patented, 7 unpatented claims, Little Wood River dist.; Muldoon. **Development:** By 5 tunnels totaling approximately 1000 ft. in length, and an inclined shaft 200 ft. long. **Plant:** Steam-driven hoist and compressor, complete mining equipment and camp. **Ore:** Silver. **Remarks:** Annual labor only.

SUNBEAM MINING CO.

Office: 655 S. Hayes St., Pocatello. **Officers:** W. H. Hall, Pres.-Mgr.; Geo. H. Spongberg, Sec., both of Pocatello. **Inc.:** Sept. 28, 1926. **Capital:** 1,000,000 shares; par value 10c; 500,001 shares issued. **Property:** 2 unpatented claims, Sawtooth dist.; Ketchum. Held under lease and option from C. H. Furey, Pocatello. **Development:** Total development of approximately 300 ft. **Ore:** Silver, antimony. **Men employed:** Average, 2. **Remarks:** Active for 3 months.

TORBANEHILL MINING CO.

Office: 608 Deseret Bank Bldg., Salt Lake City, Utah. **Officers:** W. F. Armstrong, Pres.; Oscar W. Moyle, Sec., both of Salt Lake City, Utah. **Inc.:** Sept. 14, 1906. **Capital:** 500,000 shares; par value 1c; all shares issued. **Property:** 7 patented claims, Lava Creek dist.; Carey. **Remarks:** Idle for many years.

TRIUMPH DEVELOPMENT CO.

Office: 218 Felt Bldg., Salt Lake City, Utah. **Officers:** J. C. Jensen, Pres.-Mgr.; Geo. W. Snyder, Sec., both of Salt Lake City. **Inc.:** Mar. 28, 1928. Charter forfeited Nov. 30, 1928. **Capital:** 1,000,000 shares; par value 10c; all shares issued. **Property:** Lease on Triumph mine, owned by Ivanhoe Mining Co.; Warm Springs Creek dist.; Hailey. **Development:** Principally by a vertical shaft 300 ft. deep in which there are 3 levels, and an inclined winze in No. 3 level 100 ft. long. Total development approximately 13,000 ft. **Plant:** Electrically-driven double-drum hoist and 700 cu. ft. compressor; steel sharpener; complete mining equipment. **Ore:** Lead-zinc-silver. **Men employed:** Average, 65. **Remarks:** Production at the rate of 75 tons per day was maintained until September, at which time it was suspended, pending sinking the winze to a greater depth, installing a tramway from the mine to a point adjacent to the railroad, and constructing a mill near the railroad siding.

UNITED MINES CO.

Office: 1st and Washington St., Portland, Ore. **Officers:** Thomas H. Hurlburt, Pres.; A. Pearson, Sec., both of Portland, Ore. **Inc.:** April 7, 1922. **Capital:** 1200 shares; par value $50; all shares issued. **Property:** 5 unpatented claims, Garfield Gulch, Little Wood River dist.; Muldoon. **Development:** Approximately 1140 ft. of underground workings, consisting principally of 3 tunnels: No. 1, 850 ft. long; No. 2, 280 ft. long; No. 3, 90 ft. long. **Plant:** 7x6 I-R compressor, driven by 34 in. Pelton water wheel, and complete equipment. **Ore:** Lead-silver. **Men employed:** Average, 4. **Remarks:** During the summer months an additional camp building was constructed and a small amount of development work performed.

UTAH-BELLEVUE MINES CO.

Office: Box 1975, Salt Lake City, Utah. **Officers:** E. W. Totten, Pres.; O. R. Totten, Sec.; A. W. Kelley, Mgr.; all of Salt Lake City. **Inc.:** Filed in Idaho Dec. 19, 1914. **Capital:** 500,000 shares; par value 10c; 203,455 shares issued. **Property:** Kelley group; 6 unpatented claims, Mineral Hill dist.; Bellevue. **Development:** Principally by 1 tunnel 600 ft. long and a vertical shaft 125 ft. deep. **Plant:** Small gas-driven compressor and air-driven hoist. **Ore:** Lead-silver. **Remarks:** Annual labor only.

WAR DANCE MINING CO., LTD.

Office: P. O. Box 397, E. Auburn, Calif. **Officers:** James W. Burns, Pres., Auburn, Calif. **Inc.:** Sept. 17, 1910. **Capital:** 500,000 shares; par value $1; no shares issued. **Property:** War Dance group; 23 unpatented claims, Mineral Hill dist.; Hailey. **Development:** Over 10,000 ft. of underground workings. **Remarks:** One of Blaine County's old producers. Annual labor only.

WAVA MINING & MILLING CO.

Office: Hailey. **Officers:** C. E. Gordon, Pres., Detroit, Mich.; J. G. Hedrick, Sec., Hailey. **Inc.:** Sept. 18, 1919. **Capital:** 15,000 shares preferred; 35,000 shares common; par value $1; 4282 preferred, 24,282 common issued. **Remarks:** Owns no property.

WOOD RIVER MINING CO.

Office: Thorsen Bldg., Blackfoot. **Officers:** H. H. Scarborough, Pres., Idaho Falls; B. J. Coumerilh, Sec., Blackfoot. **Inc.:** July 30, 1923. **Capital:** 1,000,000 shares; par value 10c; 491,240 shares issued. **Property:** 8 unpatented claims, Warm Springs Creek dist.; Ketchum. **Ore:** Silver and lead. **Men employed:** Average, 4. **Remarks:** A small amount of development work was performed during the summer months. Stock assessments were levied during 1928 as follows: Apr. 10, 1c; Nov. 3, 1c.

BOISE COUNTY

Boise is one of the principal mining counties in the southwestern part of the State. It is bounded by Ada, Gem, Valley, Custer, Blaine and Elmore counties. Included within its area are a part of the drainage basin of the Payette River, practically all of the drainage basin of the South Fork of the Payette River, and all of the drainage basins of Grimes Creek and Moore Creek. The last two comprise the area generally known as the Boise Basin. The county has a total area of 1840 square miles, and was accredited with a population of 1822 in the 1920 census, or one person to the square mile. The principal industries are mining, stock raising, timber and lumbering.

Different sections of the county are served by Federal and State highways, which are supplemented by well-maintained county roads. These roads extend into all the various mining districts and are open to automobile travel during the larger part of the year. The western part of the county is traversed by the Nampa-McCall branch of the Oregon Short Line Railroad; the central part, or Boise Basin, is served by the Intermountain Railroad, which extends from Barber, near Boise, to Centerville. Idaho City, the county seat, and one of the oldest towns in the State, dates its existence from 1863, the time of the original gold rush to the Basin. It once boasted of a population as high as seven to ten thousand.

The history of Boise County dates back to the formation of the State in 1860, when placer gold was first discovered near Pierce City (Clearwater County). The overflow from this stampede resulted in the discoveries of Elk City, Florence, and Boise Basin, in quick succession; and by 1863 Boise Basin was one of the most thriving communities in the western part of the United States. In July, 1864, more than 9000 20-acre placer claims had been recorded in the three principal mining districts.

During the first few years after the discovery of gold all mining was confined to the placers which were susceptible to hand methods. After these became less profitable, numerous ditches 5 to 30 miles in length were constructed, and hydraulic mining of the higher bench gravels was started. These operations were conducted for many years, and a few have survived to the present day.

Shortly after the placer rush had subsided, attention was given to quartz mining; many discoveries soon were made, mills were constructed, and deep mining started. The principal discovery was the Gold Hill mine at Quartzburg. In 1863 the vein was exposed by placer mining, and by 1867 a mill had been built and was in operation. Except at brief periods when it was being repaired, the mill was operated continuously for 12 years. The mine has been in almost continuous operation since the day of discovery and is credited with a production of six to eight million dollars. This record gives it the distinction of being the oldest and largest producing gold mine in the State. The vein has been opened to a vertical depth of 600 feet only; at this point the ore is still persistent both in grade and extent, and there appears to be no reason why it should not continue deeper.

In addition to the Gold Hill, many other gold mines have a large production record. This production, combined with that derived from placer mining, both hydraulic and dredging, held Boise County in first place in gold production in the State until the year 1923, and it regained this position in 1928. The opening of the ore bodies on the 700-ft. level of the Gold Hill mine, the production from the Belshazzar mine, and the new ore disclosures made during 1928 were instrumental in attracting much attention to the district, as well as proving the permanence of the ore bodies.

As the early-day miner was interested only in the precious metals, gold and silver, which could be recovered by the methods then in use, he disregarded all veins containing the sulphide, or base, ores. Before these ores became valuable prospecting had practically ceased, so the result is that this county offers one of the best fields in the State to prospectors or small development companies in search of lead-zinc-silver ores. Deposits of these metals are widely distributed throughout the county; and a few have been partially developed. When properly exploited and intelligently managed, they will become an important factor in the future prosperity of Boise County and the City of Boise, and will give the State an additional lead-zinc producing district. Although Boise County has always been known as a gold producing county, there are numerous widely distributed deposits of lead, silver, zinc, copper, bismuth, and antimony; in addition to these, monazite is found in the placer deposits in sufficient quantity to be of commercial importance.

During 1928 this county witnessed a larger increase in new mine plant installation, new development work, new enterprises, and new discoveries than at any period during the past ten years, all of which greatly stimulated prospecting, new locations and investigations by those seeking gold mines. The most important discoveries and opening up of new ore were: That of the Talache Mines Inc., at its Gold Hill & Iowa mine, where a substantial showing of high-grade gold ore was opened up on the 700-foot level; the high-grade gold ore opened by the Idawa Gold Mining Co. at the Belshazzar mine; and the opening up of gold ore of importance which was reported at the Mountain Chief mine. The most important construction work was the rebuilding of the mine surface plant and the installation of a new mill at the Gold Hill & Iowa mine by the Talache Mines Inc., the remodeling of its mill by the Idawa Gold Mining Co., and the remodeling of the mill at the Mountain Chief Mine, which is being operated by the Federated Mines Co., a new organization. Others who developed their mines throughout the year were: The American Mines Development Co., a new organization which is operating the Brunnell group near Grimes Pass; the Missouri Mining Co., Ltd.; the Penn Mining Co. at the Coin Bond group; and Jarvis Bros. at the Hay Fork. The Idaho Gold Dredging Corporation and the Boise Placer Co., both producers of placer gold, were active throughout the summer months and each increased its production over that of the previous year. The Crooked River Mining Co. reconstructed its new dredge, which sank on being put into operation in 1927.

AMERICAN MINES DEVELOPMENT CO.

Office: Room 11, Shaw Bldg., Boise. **Officers:** L. S. Honstead, Pres.-Mgr.; C. R. Hanan, Sec., both of Boise. **Inc.:** Mar. 15, 1928. **Capital:** 1,000,000 shares; par value $1; 130,000 shares issued. **Property:** Grandview group; 6 unpatented claims held under lease and option, Pioneerville dist.; Grimes Pass. **Development:** By 2 tunnels: No. 1, 210 ft. long; No. 2, 200 ft. long. **Ore:** Gold. **Men employed:** Average, 3. **Remarks:** Active development work in extending No. 2 tunnel was maintained throughout the year after date of organization.

BIG ENTERPRISE MINING CO.

Office: Pioneerville. **Officers:** S. D. Whaley, Pres., Portland, Ore.; E. Lightfoot, Sec.-Mgr., Pioneerville. **Inc.:** June 24, 1915. **Capital:** 8000 shares; par value $100; 4000 shares issued. **Property:** Noble placer; 4 unpatented claims, Pioneerville dist.; Pioneerville.

BOISE PLACER CO.

Office: Idaho City. **Officers:** Fleming Howell, Pres., Buckhannon, W. Va.; W. Guy Tetrick, Sec., Clarksburg, W. Va.; E. F. Blain, Mgr., Boise. **Inc.:** Dec. 11, 1922. **Capital:** 750,000 shares; par value $1; 203,530 shares issued. **Property:** Plowman and Woodburn groups; 300 acres, Idaho City dist.; Idaho City. **Plant:** An oil-driven 10x7 compressor, and complete mining equipment. This equipment is used for the blasting of the big boulders in the hydraulic pits; complete hydraulic mining equipment. **Ore:** Placer gold. **Men employed:** Average, 24, for period of 120 days. **Remarks:** This company is the largest producer of placer gold in Boise County, and conducts the largest hydraulic mining operation in the State. Its mining operations can be conducted during the high-water season only.

CONSOLIDATED MINES SYNDICATE

Office: 615 Empire Bldg., Boise. **Officers:** Frank E. Johnesse, Pres.; William MacLeod, Sec., both of Boise. **Inc.:** May 6, 1924. **Capital:** 10,000 shares; no par value. On August 15, 1924, the capitalization was changed to 10,000,000 shares, $2.50 par value; and on May 2, 1925, the capitalization was decreased to 10,000,000 shares, par value $1; 2,075,796 shares issued. **Property:** Washington and Subrosa groups; 4 patented, 14 unpatented claims, Gambrinus dist.; Idaho City. **Development:** Total development, approximately 12,000 ft., the principal part of which is the main crosscut tunnel 3700 ft. long, which intersects the bottom of a vertical shaft 414 ft. deep, near the bottom of which is a winze 150 ft. deep. **Plant:** MINE: Diesel oil engine driving a 480-cu.-ft. compressor, and complete mining equipment. Saw mill, modern boarding and bunk houses, change house, and complete camp. **Ore:** Silver-gold. **Remarks:** Idle since 1926.

CROOKED RIVER MINING CO.

Office: Dayton, Ohio. **Officers:** Melvin T. Rowland, Pres.-Mgr., Nampa; N. S. Talbott, Sec., Dayton, Ohio. **Inc.:** Oct. 5, 1927. **Capital:** 2000 shares common, no par value; 2000 shares preferred, par value $100; shares issued, unknown. **Property:** Kempner Ranch placer; 1 patented, 60 unpatented claims, 1960 acres, Banner dist.; Idaho City. **Plant:** Flume-type dredge, 3-cu.-ft. buckets; this dredge is driven by two 60-h. p. Diesel engines. **Ore:** Placer gold. **Men employed:** Average, 20. **Remarks:** During 1927 this company constructed its dredge at a cost of $92,000; when completed, it proved to be so improperly designed and faultily constructed that its operation was impossible and it sank. During 1928 approximately $60,000 was expended in wholly reconstructing it.

CURRY DITCH GOLD PLACER MINES ASSOCIATION

Office: Pioneerville. **Officers:** P. E. Hall, Jr., Pres.-Mgr., 2712 Kingsland Ave., Oakland, Calif.; A. N. Clark, Sec., Everett, Wash. **Inc.:** An association. **Capital:** 500,000 shares; par value unfixed; 48,693 shares issued. **Property:** 3 patented, 2 unpatented placer claims, Pioneerville dist.; Pioneerville. **Remarks:** Idle.

DIAMOND L MINING CO., LTD., OF IDAHO

Office: Pioneerville. **Officers:** Lottie Morehead, Pres.-Sec.-Mgr., Idanha Hotel, Boise. **Inc.:** July 1, 1918. **Capital:** 500,000 shares; par value 1 mill; 282,220 shares issued. **Property:** Buckskin group; 13 unpatented claims, Pioneerville dist.; Pioneerville. **Development:** Approximately 2700 ft. of underground workings, the most important of which are 2 tunnels, 1 900 ft. long, and the other 500 ft. long. **Ore:** Lead-silver-gold. **Men employed:** Average, 2. **Remarks:** Development work was maintained throughout the year.

EDNA MINES CO.

Office: Idaho City. **Officers:** D. J. Atkins, Pres., 124 Front St., New York City. **Inc.:** Aug. 9, 1926. **Capital:** 200 shares; par value $100; all shares issued. **Property:** Edna group; 1 patented, 8 unpatented claims, Banner dist.; Idaho City. **Development:** Principally by 1 tunnel 1100 ft. long, and a vertical shaft 350 ft. deep with 3 intermediate levels. **Ore:** Silver-gold. **Men employed:** Average, 3. **Remarks:** Active development work throughout the year.

FEDERATED MINES CO.
Office: Room 206, Idanha Hotel, Boise. **Officers:** Wm. W. Dey, Pres., New York City; Edward L. Morgan, Sec.; Frank T. Day, Mgr., both of Boise. **Inc.:** June 26, 1928. **Capital:** 5,000,000 shares; par value $1; 3,000,000 shares issued. **Property:** Mountain Chief group, 12 unpatented claims; Canyon Creek group, 9 unpatented claims; Hanley group, 6 unpatented claims; all held under lease and option; Quartzburg dist.; Placerville. **Development:** By 5 tunnels, the principal one of which is over 2,000 ft. long. **Plant:** 2,000-ft. aerial tramway connecting mill building and No. 4 tunnel. **Ore:** Gold. **Men employed:** Average, 40. **Remarks:** This company acquired its property in August and immediately commenced the rehabilitation of the mine and reconstruction of the old mill, including installation of new equipment.

FRANKLIN PLACER CO.
Office: Placerville. **Officers:** W. W. Miller, Pres.; Paul C. Moore, Sec., both of Franklin, Pa.; E. F. Blain, Mgr., Boise. **Inc.:** July 21, 1928. **Capital:** 300,000 shares; par value $1; 115,000 shares issued. **Property:** Leary and Brogan group, Placerville dist.; Placerville. **Ore:** Placer gold. **Remarks:** During the summer months the Leary and Brogan ditch was cleaned out and enlarged and many of the old flumes were replaced, preparatory to conducting operations.

GOLDEN AGE JR. MINING CO.
Office: 508 Capital Nat'l Bank Bldg., Lansing, Mich. **Officers:** F. M. Siebley, Pres., Los Angeles, Calif.; F. W. Griswold, Sec., Lansing, Mich. **Inc.:** Apr. 19, 1915. **Capital:** 1,000,000 shares; par value $1; 992,096 shares issued. **Property:** Golden Age group; 19 patented claims, Pioneerville dist.; Pioneerville. **Remarks:** Idle for about 4 years.

GOLDEN SEAL MINING & MILLING CO.
Office: 919 Idaho St., Boise. **Officers:** Harry S. Kessler, Pres.; Geo. L. Fleharty, Sec.; E. K. Lorimer, Mgr., all of Boise. **Inc.:** Oct. 28, 1924. **Capital:** 1,000,000 shares; par value 25c; 898,088 shares issued. **Property:** 12 unpatented claims, unorganized dist.; Dry Creek; Boise. **Development:** By 3 tunnels: No. 1, 385 ft. long; No. 2, 100 ft. long; No. 3, 140 ft. long. **Ore:** Lead-zinc-silver. **Men employed:** Average, 5. **Remarks:** A small amount of work was done during the summer months.

GOLD HILL & IOWA MINES CO.
Office: 605 Eastman Bldg., Boise. **Officers:** Jess Hawley, Pres., Boise; Wendell H. Marden, Sec., Boston, Mass.; James H. Hawley, Jr., Mgr., Boise. **Inc.:** June 10, 1908. **Capital:** 200,000 shares; par value $10; 194,622 shares issued. **Property:** Gold Hill & Iowa groups; 19 patented, 26 unpatented claims, Quartzburg dist.; Quartzburg. **Remarks:** Under option to Talache Mines, Inc., which see.

HALLEY PLACER CO.
Office: Placerville. **Officers:** E. F. Blain, Mgr., 1601 N. 12th St., Boise. **Inc.:** An association. **Property:** Halley Placers; 7 unpatented placer claims, Placerville dist.; Placerville. **Remarks:** Annual labor only.

IDAHO DEVELOPMENT CO.
Office: 605 Eastman Bldg., Boise. **Officers:** Wendell H. Marden, Pres., Boston; James H. Hawley, Jr., Mgr., Boise. **Inc.:** Dec. 16, 1920. **Capital:** 1000 shares; par value $10; all shares issued. **Property:** 4 unpatented claims, Placerville dist.; Placerville.

IDAHO GOLD DREDGING CORPORATION
Office: 615 Empire Bldg., Boise. **Officers:** S. K. Atkinson, Pres.-Mgr.; W. A. Buis, Sec., both of Boise. **Inc.:** Apr. 9, 1928. **Capital:** 4,000,000 shares; par value 25c; 1,000,000 shares issued. **Property:** 142 patented, 20 unpatented claims, Placerville dist.; Centerville. **Plant:** Electrically driven Risdon dredge, 2½-cu.-ft. buckets close connected, wood hull. **Ore:** Placer gold. **Men employed:** Average, 12. **Remarks:** A reorganization of the Gold Dredging & Power Corporation. Active operations throughout the summer months, consisting principally of the dredge digging its way through a narrow channel of Grimes Creek in order to reach a large dredgeable area on the upper end.

IDAWA GOLD MINING CO.

Office: 521 Idaho Bldg., Boise. **Officers:** S. A. Zimmerman, Pres., Valley City, N. D.; E. A. Nordquist, Sec., Boise; S. M. Ballard, Mgr., Quartzburg. **Inc.:** Jan. 3, 1919. **Capital:** 2,000,000 shares; par value 25c; 1,228,000 shares issued. **Property:** Belshazzar group, 22 unpatented claims, Quartzburg dist.; Quartzburg. **Development:** By 5 tunnels, the principal of which are No. 4, 1200 ft. long, and No. 5, 3000 ft. long. Total development, approximately 7000 ft. **Plant:** MINE: Electrically-driven compressor; complete mining equipment and camp. MILL: 25-ton amalgamation and table-concentration. **Ore:** Gold. **Men employed:** Average, 26. **Remarks:** Active throughout the year. This is one of the principal gold-producing mines in the State, all operations being conducted through No. 4 tunnel, which is connected with the mill by an aerial tramway. An initial dividend of $50,000 was paid in December. This company's mill is fully described in our 1927 report of the mining industry of Idaho.

IDEAL MINING CO.

Office: 212 Boise City Natl. Bank Bldg., Boise. **Officers:** H. W. Dorman, Pres.; W. E. Sullivan, Sec.; H. P. Taylor, Mgr., all of Boise. **Inc.:** Sept. 17, 1927. **Capital:** 200,000 shares; par value $1; 150,000 shares issued. **Property:** Osborne group; 5 unpatented claims, Westview dist.; Horseshoe Bend. **Development:** Principally by 1 inclined shaft. **Plant:** Electrically-driven I-R compressor; complete mining equipment. **Ore:** Gold-silver-lead. **Men employed:** Average, 9. **Remarks:** In September, 1927, this company commenced unwatering the shaft and rehabilitating the property. This work was continued to the 300-ft. level, at which point a large amount of drifting on the vein was done. Operations were temporarily suspended in October, 1928.

INDEPENDENT MINES SYNDICATE

Office: Owyhee Hotel, Boise. **Officers:** Geo. H. Cochran, Pres., New York; Stanley G. Smith, Mgr., Owyhee Hotel, Boise. **Inc.:** Common Law Trust. **Capital:** 1000 shares; par value $100; 780 shares issued. **Property:** Independent group; 14 unpatented claims, Pioneerville dist.; Pioneerville. **Development:** By 3 tunnels and 2 short shafts: No. 1, 200 ft. long; No. 2, 300 ft. long; No. 3, 720 ft. long. **Ore:** Gold, lead-silver-zinc. **Men employed:** Average, 1. **Remarks:** Maintenance work only throughout the year.

IRON DYKE MINES CO.

Office: 402 Empire Bldg., Boise. **Officers:** S. T. Schreiber, Pres.-Mgr., Boise. **Inc.:** April 16, 1923. **Capital:** 150,000 shares; par value $1; 100 shares issued. **Property:** Iron Dyke group; 2 patented, 18 unpatented claims, unorganized dist.; Holcomb. **Development:** By 2 tunnels: No. 1, 25 ft. long; No. 2, 20 ft. long. **Ore:** Gold, silver-lead.

MEADOW CREEK GOLD PLACER CO.

Office: Boise. **Officers:** S. O. Kerley, Pres.; Fred E. Lukens, Sec., both of Boise. **Inc.:** Sept. 13, 1924. **Capital:** 500,000 shares; par value 5c; 450,000 shares issued. **Property:** Meadow Creek group; 4 unpatented placer claims, Idaho City dist.; Idaho City.

MINERAL MINING CO.

Office: Placerville. **Officers:** A. C. Gallupe, Pres.-Mgr., Placerville; C. C. Fairchild, Sec., Idaho City. **Inc.:** Feb. 6, 1920. **Capital:** 2,500,000 shares; par value 6c; 2,392,000 shares issued. **Property:** Enterprise and Smuggler groups; 12 patented, 21 unpatented claims; Enterprise group held under lease and bond from Exta Lightfoot, Pioneerville; Pioneerville dist.; Pioneerville. **Development:** Approximately 8000 ft. of underground workings. **Plant:** MINE: 25-h. p. steam-driven hoist on Smuggler group; complete mining equipment and camp. MILL: 100-ton concentrator, partly dismantled. **Ore:** Lead-silver-zinc. **Men employed:** Average, 4. **Remarks:** The mill was completed and operations started in October, 1926. As originally designed, it was impractical, so during 1927 almost all the equipment was removed preparatory to changing the flow sheet

to fine grinding and flotation; in addition to these changes in the mill, a small hydroelectric power plant was constructed. Annual labor only during 1928.

MISSOURI MINING CO., LTD.

Office: Pioneerville. **Officers:** Homer E. Howard, Pres.; Ezra E. Howard, Sec., both of Pioneerville. **Inc.:** Feb. 4, 1914. **Capital:** 50,000 shares; par value $1; on June 1, 1925, capitalization was increased to 1,000,000 shares, par value $1; 50,000 shares issued. **Property:** 10 unpatented claims, Pioneerville dist.; Pioneerville. **Development:** Approximately 450 ft. of underground workings. **Ore:** Lead-silver-zinc. **Men employed:** Average, 2. **Remarks:** A small amount of work was done throughout the year and plans were perfected for the installation of a small concentrating mill.

NATIONAL HYDRAULIC MINES CO.

Office: 708 Washington St., Boise. **Officers:** Albert E. Small, Pres.; Dora Small, Sec., both of Boise. **Inc.:** Sept. 7, 1921. **Capital:** 1,000,000 shares; par value $1; 354,648 shares issued. **Property:** 11 unpatented placer claims, 1414 acres on Moore's Creek, Idaho City dist.; Idaho City. **Plant:** Three No. 2 and No. 1 giants; 3000 ft. of pipe line, and complete hydraulic equipment. **Remarks:** Annual labor only.

NATIONAL MINING & DEVELOPMENT CO.

Office: Placerville. **Officers:** A. C. Gallupe, Pres.; E. A. Gallupe, Sec., both of Placerville. **Inc.:** Sept. 23, 1911. **Capital:** 1,000,000 shares; par value $1; 236,540 shares issued. **Property:** Mountain Chief group; 11 unpatented claims, Quartzburg dist.; Placerville. **Ore:** Gold. **Remarks:** Property under option to Federated Mines Co.

OX-BOW MINING CO., LTD.

Office: 411 State Tower Bldg., Syracuse, N. Y. **Officers:** P. R. Dishaw, Pres.; J. D. Crimmins, Sec., both of Syracuse. **Inc.:** July 10, 1925. **Capital:** 1,000,000 shares; par value $1; all shares issued. **Property:** Ox-Bow placer group, 7 unpatented claims, Summit Flat dist.; Lowman. **Ore:** Placer gold. **Remarks:** Idle throughout the year. The secretary of the company stated: "This project has for its object the recovery of the placer gold contained in about 12,000 feet of the river bed, which is laid bare by diverting the entire river through a tunnel 1200 feet long which cuts through the mountains at a point where the river forms a hairpin curve."

PAYETTE COAL MINING CO.

Office: P. O. Box 104, Payette. **Officers:** F. A. Wilbur, Pres.; J. C. Anderson, Sec., both of Payette. **Inc.:** Oct. 6, 1928. **Capital:** 500 shares; no par value; all shares issued. **Property:** 320 acres of patented land; Horse Shoe Bend. **Mineral sought:** Coal.

PENN MINING CO.

Office: Boise. **Officers:** W. W. Miller, Pres.; Paul C. Moore, Sec., both of Franklin, Pa.; E. F. Blain, Mgr., Boise. **Inc.:** Jan. 8, 1929. **Capital:** 200,000 shares preferred, 750,000 shares common; par value $1; 72,500 shares preferred, all shares common issued. **Property:** Coin Bond group; 34 unpatented claims, Placerville dist.; Placerville. **Development:** Principally by 1 long tunnel, 875 ft. of which is opened. **Ore:** Gold, lead-silver. **Men employed:** Average, 4. **Remarks:** Active development work throughout the year by the owners, previous to incorporation of the company.

TALACHE MINES, INC.

Office: Quartzburg. **Officers:** A. H. Burroughs, Jr., Pres.-Mgr.; J. M. Hector, Sec., both of Quartzburg. **Inc.:** Apr. 21, 1917, as Armstead Mines, Inc.; name changed June 8, 1922. **Capital:** 1,000,000 shares common, 600,000 shares preferred; par value $1; 983,000 shares common, 579,233 shares preferred issued. **Property:** Lease and option on property owned by Gold Hill & Iowa Mines Co., which see. **Development:** Principally by a 600-ft., 3-compartment, vertical shaft and a 100-ft. vertical winze on the 600-ft. level. Total development, over 35,000 ft. in Gold Hill mine.

Plant: MINE: 52-h.p. hoist and 452-cu.-ft. compressor, both electrically driven. MILL: 150-ton, including crusher, rolls, Hardinge ball mill, amalgamating plates and concentrating tables. **Ore:** Gold. **Men employed:** Average, 50. **Remarks:** In March, 1927, property was acquired and operations started, the principal part of which was the unwatering of underground workings. This was completed early in the year, after which a 100-ft. vertical winze was sunk from the 600-ft. level on the ore body. This winze and the drifts at the bottom of it proved the extension of the ore to this level, at which point it was more extensive and of higher grade than on the 600-ft. level. During the closing months of the year work was started on rebuilding and rehabilitating the mine surface plant and completely reconstructing the mill. This property was first located in 1865, since which time it has been in practically continuous operation, with a production record of approximately $8,000,000, half of which was produced during the last 15 years prior to 1926, at which time the mine was closed down and permitted to fill with water. Its reopening, rehabilitation, and new ore disclosures indicate a future productive period, the length of which can not yet be determined.

WASHOE MINING CO.

Office: 605 Eastman Bldg., Boise. **Officers:** Jess Hawley, Pres.; C. W. Mack, Sec,. both of Boise; Vivian Thorn, Mgr., Banner. **Inc.:** Dec. 16, 1911. **Capital:** 100,000 shares; par value $1; all shares issued. **Property:** Banner group; 7 patented, 15 unpatented claims, Banner dist.; Idaho City. **Development:** 2 tunnels, the principal one of which is 4000 ft. long. **Plant:** 30-ton mill, tables and flotation. **Ore:** Silver. **Remarks:** Idle.

BONNER COUNTY

Bonner constitutes an important part of the Idaho Panhandle and is one of the extreme northern counties. It is bounded on the east by the State of Montana, and on the west by the State of Washington; Boundary County adjoins it on the north, and Kootenai and Shoshone counties on the south. It contains an area of 1748 square miles and was accredited with a population of 12,957 in the 1920 census. The principal industries are lumbering, mining, stock raising, and agriculture. Although the county is recognized as one of the important mining counties of the State, the proportion of the population that is interested in mining is very small.

The county is exceptionally fortunate with respect to transportation facilities; as it is served by two State highways, lake boats, and three transcontinental railroads. Boats that can reach any point on Lake Pend d'Oreille give connection with the railroads at Sandpoint and Bayview.

Practically all the mining has been devoted to the areas adjacent to Pend d'Oreille and Priest lakes and the Clark Fork River. However, mining locations are numerous and widely scattered throughout the county. The mining history of the county dates back to the discovery of silver ores near Lakeview in 1888, which resulted in a stampede from the Coeur d'Alene district. Since that time there has always been a small amount of mining, but the county did not attract attention in recent years until the Talache mine was a proved and successful operation. The Talache has been a big factor in drawing attention to the mineral possibilities and prospecting opportunities of the county, resulting in a large increase in mining activities during the past few years.

The principal minerals are those of silver, lead, copper, zinc, and gold. These metals, and the limestone quarried near Lakeview, constitute the chief mineral resources. Silver is the most widely distributed metal and constitutes the most important part of the ores.

This county witnessed a greater substantial improvement in the development of new ore by old companies, new mine plant and mill plant installation, discoveries of new ore, development work by prospectors and new organizations than it had witnessed in many years. The Whitedelf Mining & Development Co. and the Hope Mining Co. both proved their properties and the continuation of ore at a greater depth, and both produced and marketed a greater tonnage of ore than for any previous year. The Whitedelf completed plans for and commenced the construction of a 75-ton flotation concentrator during the closing months of the year. Other new discoveries of importance were: That of the Boyer Bros. at the property now known as the Boyer Bros. Mining Co.; that at the Catherine group near Talache, by H. L. Thomason and James Evans; and that at the old Minerva, which was operated by lessees. The Hewer Mining Co. was reorganized as the Idaho Lakeview Mines Co., the mine reopened and active development work started. The International Portland Cement Co., with quarries at Bayview, mined the largest tonnage of limestone that it has ever produced in any one year. This limestone is ferried across the lake and then sent by rail to Spokane, where it is manufactured into cement.

Prospectors and small development companies in the Priest Lake district were active throughout the year, the principal ones being the Kaniksu Mining Co.; P. F. Vandever and C. W. Beardmore at the Grey Goose; Joseph Saccomanno at the Silver King; and Andrew Coolin at the Diggins. Many others increased their usual yearly work, and there continues to be an active search for new mines.

AMERICAN EAGLE MINING CO.

Office: Sandpoint. **Officers:** R. A. Martin, Pres., Martinsdale, Mont.; H. L. Thomason, Sec.; James A. Evans, Mgr., both of Sandpoint. **Inc.:** May 28, 1919. **Capital:** 10,000 shares; par value $100; 608 shares issued. **Property:** American Eagle group; 7 unpatented claims, Pend d'Oreille dist., Sandpoint. **Development:** 1 tunnel 1790 ft. long, which is principally a drift on the vein. **Ore:** Lead-silver. **Remarks:** A small amount of development work during the year.

ARGUS MINING CO.

Office: Cleveland, Ohio. **Officers:** Daniel Myers, Pres., Athletic Club, Cleveland, Ohio. **Inc.:** April 20, 1917. **Capital:** 800,000 shares, par value $1; 500,000 shares issued. **Property:** Argus group; 5 unpatented claims, Lakeview dist.; Lakeview. **Development:** 4 tunnels, totaling approximately 800 ft. in length. **Ore:** Lead-silver. **Remarks:** Commencing in August, a small amount of development work was performed by lessees.

AUXER GOLD MINES CO.

Office: Hope. **Officers:** James Campbell, Pres.-Mgr., Hope. **Inc.:** June 24, 1920. **Capital:** 500,000 shares; par value $1; 335,000 shares issued. **Property:** Boston group; 9 unpatented claims, Pend d'Oreille dist.; Hope. **Development:** Approximately 1300 ft. of underground workings, the principal one of which is a tunnel 865 ft. long. **Plant:** Gas-driven compressor and complete mining equipment. **Ore:** Gold. **Men employed:** Average, 4. **Remarks:** Principal tunnel was extended 140 ft. during the year.

BARD MINING & MILLING CO.

Office: 517 Ziegler Bldg., Spokane, Wash. **Officers:** Mrs. R. M. B. Mobbs, Pres.; Fred C. Daeufer, Sec.-Mgr., both of Spokane. **Inc.:** Nov. 23, 1927. **Capital:** 2,000,000 shares; par value $1; 686,670 shares issued. **Property:** Bard group; 8 patented, 25 unpatented claims in Bonner, Shoshone, and Kootenai counties, unorganized dist.; Lakeview. **Development:** By 3 short tunnels. **Ore:** Lead-silver-copper. **Remarks:** A small amount of development work done during the summer months.

BIG FIVE MINING CO.

Officers: Earl Eagan, Sec., Hope. **Inc.:** June 10, 1910. **Capital:** 1,500,000 shares; par value $1; 1,079,852 shares issued. **Development:** 1 tunnel 640 ft. long. **Plant:** Steam-driven Sullivan compressor; complete mining equipment. **Ore:** Lead-silver. **Remarks:** Annual labor only.

BRITANNIA MINING CO.

Office: Priest River. **Officers:** M. Young, Pres., Spokane, Wash.; M. W. McLean, Sec.-Mgr., Priest River. **Inc.:** Nov. 8, 1912. **Capital:** 1,000,000 shares; par value $1; 930,000 shares issued. **Property:** Britannia group: 8 unpatented claims, Priest Lake dist.; Priest River. **Development:** Approximately 900 ft. of underground workings. **Ore:** Gold. **Remarks:** Annual labor only, performed by the officers of the company.

CAMPBIRD MINING & DEVELOPMENT CO.

Office: Sandpoint. **Officers:** J. W. Lloyd, Pres., Spokane, Wash.; E. E. Boies, Sec.; E. W. Dreisbach, Mgr., both of Sandpoint. **Inc.:** Aug. 21, 1911. **Capital:** 1,500,000 shares; par value $1; 1,375,000 shares issued. **Property:** Campbird group; 5 patented, 2 unpatented claims, Priest Lake dist.; Priest River. **Development:** By 3 tunnels: No. 1, 750 ft. long; No. 2, 150 ft. long; No. 3, 700 ft. long. **Ore:** Lead-silver. **Remarks:** Annual labor only.

CARPIE MINING CO.

Office: Cabinet, Idaho. **Officers:** J. W. Powell, Pres.-Mgr.; Cabinet. **Inc.:** An association. **Capital:** 750,000 shares; par value $1; 400,000 shares issued. **Property:** Carpie group; 4 unpatented claims, Pend d'Oreille dist.; Cabinet. **Development:** By a vertical shaft 300 ft. deep, in which are 5 levels. **Plant:** Steam-driven hoist and small Sullivan compressor. **Ore:** Copper. **Remarks:** Annual labor only since April, 1921.

CLARINDA COPPER MINING CO.

Office: 50 Broad St., New York City. **Officers:** John P. Delaney, Pres., New York City; Compton I. White, Sec.-Mgr., Clark Fork. **Inc.:** July 30, 1920. **Capital:** 1,500,000 shares; par value $1; 335,527 shares issued. **Property:** 9 unpatented claims, Pend d'Oreille dist.; Clark Fork. **Development:** By 5 tunnels, the longest of which is No. 5, totaling 2100 ft. in length. **Plant:** Electrically-driven compressor and complete mining equipment. **Ore:** Copper. **Remarks:** Annual labor only. Involved in litigation.

COPPER GIANT MINING CO.

Office: Clark Fork. **Officers:** J. B. Whitcomb, Pres.; Miss H. F. Thibadeau, Sec.-Treas., both of Clark Fork. **Inc.:** Oct. 10, 1908. **Capital:** 1,500,000 shares; par value $1; 1,200,000 shares issued. **Property:** Copper Giant group; 5 patented claims, Pend d'Oreille dist.; Clark Fork. **Development:** Approximately 1300 ft. of underground workings. **Plant:** 10x10 electrically-driven I-R compressor. **Ore:** Copper-gold. **Remarks:** Idle throughout the year. Involved in litigation.

EMPIRE TUNGSTEN MINING CO.

Office: 526 Greenwood Blvd., Evanston, Ill. **Officers:** Frank G. Forbes, Pres.; George S. Smith, Sec., both of Evanston, Ill. **Inc.:** March 20, 1914. **Capital:** 1,500,000 shares; par value 1c; all shares issued. **Property:** Rainbow; 1 patented claim, Lakeview dist.; Lakeview.

GOAT MOUNTAIN MINING CO.

Office: Clark Fork. **Officers:** E. C. Aschenbrenner, Pres., Endicott, Wash.; Chas. Jans, Sec., Edwall, Wash.; J. Teague, Mgr., Clark Fork. **Inc.:** April 26, 1926. **Capital:** 1,500,000 shares; par value 10c; 387,250 shares issued. **Property:** Goat Mountain group, 11 unpatented claims, Pend d'Oreille dist.; Clark Fork. **Development:** By 2 tunnels: No. 1, 200 ft. long; No. 2, 814 ft. long. **Ore:** Lead-silver. **Remarks:** Buildings repaired and annual labor performed.

HAYO MINING & MILLING CO.

Office: Priest River. **Officers:** John Hamberg, Pres.-Mgr.; W. R. Hamberg, Sec., both of Priest River. **Inc.:** June 21, 1923. Charter forfeited Nov. 30, 1928. **Capital:** 3,000,000 shares; par value 10c; no shares issued. **Property:** 6 unpatented claims, Priest Lake dist.; Priest River. **Development:** By 2 tunnels, with a total development of 90 ft. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** Active for 4 months.

HOPE MINING CO.

Office: Clark Fork. **Officers:** O. A. Holte, Pres., Coeur d'Alene; C. C. Jensen, Sec.; S. W. Purdy, Mgr., both of Clark Fork. **Inc.:** Nov. 19, 1927. **Capital:** 1,500,000 shares; par value 10c; 1,320,000 shares issued. **Property:** Elsie K. group; 2 unpatented claims and 320 acres patented farm land, Pend d'Oreille dist.; Clark Fork. **Development:** By 5 tunnels, the principal one of which is No. 4, 600 ft. long. Total development about 2000 ft. **Plant:** Gas-driven 6x6 compressor, complete mining equipment and camp. **Ore:** Lead-silver. **Men employed:** Average, 8. **Remarks:** No. 4 tunnel, which is 150 ft. below No. 3, intersected the ore at this additional depth. In addition to the driving of No. 4 tunnel, a substantial tonnage of ore was produced and marketed by company and lessee operations. This property appears to be developing into one of the substantial mines of the Clark Fork district.

IDAHO GOOD HOPE MINING CO., LTD.

Office: Grand Forks, N. D. **Officers:** G. L. Elkin, Pres., Mayville, N. D.; Samuel Torgerson, Sec., Grand Forks, N. D. **Inc.:** April 21, 1910. **Capital:** 2,500,000 shares; par value $1; 1,671,190 shares issued. **Property:** 9 patented claims; Pend d'Oreille dist.; Hope. **Remarks:** Idle for 14 years.

IDAHO HEWER MINES, INC.

Office: 502 Columbia Bldg., Spokane, Wash. **Officers:** D. M. Drumheller, Pres.-Mgr.; H. O. Kent., Sec., both of Spokane. **Inc.:** May 26, 1923, as Hewer Mining Co.; reorganized on April 10, 1926. **Capital:** 2,000,000 shares; par value 1c; 1,529,578 shares issued. **Property:** Venzwela group; 4 patented, 11 unpatented claims; 8 of which are held under lease and option. **Development:** Total development approximately 10,000 ft.; principally by 1 tunnel 2200 ft. long, in which is an inclined shaft 900 ft long. **Plant:** MINE: I-R gas-driven compressor; 8½x10 Ottumwa hoist and complete mining equipment. MILL: 100-ton concentrator, fine grinding and flotation; driven by a semi-Deisel oil engine. **Ore:** Silver-lead-zinc. **Remarks:** Reorganized as Idaho Lakeview Mines Co. Unwatering of shaft and rehabilitation of mine started in October.

INTERNATIONAL PORTLAND CEMENT CO., LTD.

Office: 1124 Old National Bank Bldg., Spokane, Wash. **Officers:** R. K. Neill, Pres.; J. B. Maxfield, Sec., both of Spokane, Wash. **Inc.:** Filed in Idaho, September 9, 1911. **Capital:** 30,000 shares; par value $100; 27,233 shares issued. **Property:** 8 patented, 1 unpatented claim, 790 acres, near Bayview. **Development:** Open quarry. **Plant:** 100 cu. ft. compressor, driven by Deisel engine; steam-shovel; gas-driven shovel; crushing plant; complete mining equipment; machine shops, buildings, and mine camp. **Ore:** Limestone. **Men employed:** Average, 48. **Remarks:** This company mines all of the limestone used in its cement-manufacturing plant near Spokane, Wash. The quarry was operated throughout the year and a large tonnage of rock was mined. It is the largest operation of its kind in the State.

KANIKSU MINING CO.

Office: 302 Paulsen Bldg., Spokane, Wash. **Officers:** J. W. Lloyd, Pres.; Dr. Earl H. Current, Sec., both of Spokane, Wash. **Inc.:** Sept. 16, 1922. **Capital:** 100,000 shares; par value $1; 120,837 shares issued. **Property:** Wood Rat group; 11 unpatented claims, Priest Lake dist.; Priest River. **Development:** By a vertical shaft 350 ft. deep. **Plant:** Steam-driven hoist and complete hand-mining equipment. **Ore:** Lead-silver. **Men employed:** Average, 5. **Remarks:** Active development work throughout the year.

KEEP COOL MINING CO.

Office: P. O. Box 2181, Spokane, Wash. **Officers:** T. S. Griffith, Pres.; R. Insinger, Sec., both of Spokane, Wash. **Inc.:** June 16, 1922. **Capital:** 1,500,000 shares; par value 5c; 1,018,167 shares issued. **Property:** Keep Cool group; 4 patented claims, Lakeview dist.; Lakeview. **Ore:** Lead-silver.

LAWRENCE CONSOLIDATED MINING CO.

Office: Clark Fork. **Officers:** Rees Bungay, Pres., Spokane, Wash.; L. J. Reed, Sec.; Joseph Reed, Mgr., both of Clark Fork. **Inc.:** March 3, 1923. **Capital:** 1,500,000 shares; par value 1c; 980,200 shares issued.

Property: Lawrence group; 12 unpatented claims, Pend d'Oreille dist.; Clark Fork. **Development:** 5 tunnels, the principal one being 1240 ft. long; approximate total development 4800 ft. **Plant:** MINE: Water-driven compressor; complete mining equipment. MILL: 50-ton concentrator; crushers, 2 sets rolls, 2 jigs, 3 tables. **Ore:** Lead-silver. **Men employed:** Average, 3 for 6 months. **Remarks:** Practically idle throughout the year, pending sale of property. Small tonnage of concentrate was produced and marketed.

LUCKY ABE MINING CO.

Office: Priest River. **Officers:** Abe Johnson, Pres., Opportunity, Wash.; F. F. Nelson, Sec., Priest River. **Inc.:** March 1, 1916. **Capital:** 1,000,000 shares; par value 10c; approximately 77,000 shares issued. **Property:** Lucky Abe group; 6 unpatented claims, Priest Lake dist.; Coolin. **Development:** By 2 tunnels, each of which is approximately 175 ft. long. **Ore:** Lead-silver. **Remarks:** Annual labor only.

LUCKY STRIKE MINING CO.

Office: Clark Fork. **Officers:** W. W. Webb, Pres.-Mgr., Clark Fork. **Inc.:** Oct. 25, 1913. **Capital:** 1,000,000 shares; par value $1; 731,673 shares issued. **Property:** Lucky Strike group; 7 unpatented claims, Pend d'Oreille dist.; Clark Fork. **Development:** 2 tunnels: No. 1, 55 ft. long; No. 2, 250 ft. long. **Plant:** Gardner-Ricks gas-driven compressor. **Men employed:** Average, 2. **Remarks:** Lower tunnel extended a short distance during the year.

MAJOR LODE MINING CO.

Office: Priest River. **Officers:** Philip Naccarato, Sec., Priest River. **Inc.:** An association. **Property:** Major Lode group, 6 unpatented claims, Priest Lake dist.; Priest River. **Development:** By 4 short tunnels. **Ore:** Lead-silver. **Remarks:** Annual labor.

MILWAUKEE MINES

Office: 501 City Hall Bldg., Spokane, Wash. **Officers:** J. W. Lloyd, Pres.; Arthur L. Hooper, Sec.-Mgr., both of Spokane, Wash. **Inc.:** Apr. 6, 1928. **Capital:** 2,000,000 shares; par value 25c; 640,000 shares issued. **Property:** Milwaukee group; 64 unpatented claims, Priest Lake dist.; Nordman.

OPPORTUNITY MINING CO.

Office: Sagle. **Officers:** Peter Moinzer, Pres.; A. A. Heskestad, Sec., both of Sagle. **Inc.:** Aug. 18, 1919. **Capital:** 1,500,000 shares; par value 5c 533,610 shares issued. **Property:** 8 unpatented claims, Pend d'Oreille dist.; Sagle. **Development:** Approximately 1700 ft. of underground workings, consisting of 6 tunnels and 5 shafts, the principal tunnel being 650 ft. long. **Plant:** Steam-driven compressor, complete mining equipment and camp. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** Active development work throughout the year, the funds for which were derived from stock assessments.

PONDERA MINING & POWER CO.

Office: Grand Forks, N. D. **Officers:** P. Bilden, Pres., Northwood, N. D.; H. H. Aaker, Sec., Grand Forks, N. D. **Inc.:** July 2, 1912. **Capital:** 2,000,000 shares; par value $1; 240,384 shares issued. **Property:** 3 unpatented claims, Pend d'Oreille dist.; Sandpoint.

PONDOROSA MINING CO.

Office: Clark Fork. **Officers:** J. P. Delaney, Pres., New York City; Compton I. White, Sec., Clark Fork. **Inc.:** Jan. 18, 1927. **Capital:** 1,500,000 shares; par value $1; shares issued, unknown. **Property:** Pondorosa group; 6 unpatented claims, Pend d'Oreille dist.; Clark Fork.

REGAL MINING CORPORATION

Office: 50 Broad St., New York City. **Officers:** J. P. Delaney, Pres., W. M. Thompson, Sec., both of New York City; Compton I. White, Mgr., Clark Fork. **Inc.:** Feb. 10, 1928. **Capital:** 1,000,000 shares; par value $1; 900,000 shares issued. **Property:** 8 unpatented claims, Pend d'Oreille dist.; Clark Fork. **Development:** By 2 short tunnels. **Remarks:** Press reports stated that this company installed a gas-driven compressor and commenced developing its property during the summer months.

R. J. PRICE MINING CO.

Office: Pasco, Wash. **Officers:** J. W. Blanton, Pres.; Tom Summers, Sec., both of Pasco, Wash. **Inc.:** Sept. 20, 1923. **Capital:** 500,000 shares; par value $1. On June 5, 1928, increased to 1,000,000 shares; par value $1; 609,335 shares issued. **Property:** 3 unpatented claims, Pend d'Oreille dist.; Cabinet. **Development:** By one tunnel 150 ft. long.

SILVER MOUNTAIN MINING CO.

Office: Sandpoint. **Officers:** John T. Elsasser, Mgr., Sandpoint. **Inc.:** July 24, 1909. **Capital:** 1,500,000 shares; par value $1; all shares issued. **Property:** Silver Mountain group; 6 unpatented claims, Priest Lake dist.; Priest River. **Development:** 2 tunnels: No. 1, 400 ft. long; No. 2, 625 ft. long. **Ore:** Lead-silver. **Remarks:** Annual labor only.

SILVER STAR MINING CO., LTD.

Officers: N. M. Sholz, Pres.-Mgr.; Ray Dahlberg, Sec., both of Route 1; Sagle. **Inc.:** Jan. 19, 1927. **Capital:** 2500 shares; par value $10; 886 shares issued. **Property:** Silver Star mine; 1 unpatented claim and 140 acres patented land, Pend d'Oreille dist.; Cocolalla. **Development:** By 1 tunnel 100 ft. long. **Ore:** Lead-silver-zinc.

SYRINGA MINING CO.

Office: Sandpoint. **Officers:** Ralph M. Mellor, Pres.; B. I. Hunt, Sec., both of Sandpoint. **Inc.:** Dec. 17, 1928. **Capital:** 300 shares; par value $100; 232 shares issued. **Property:** 328 acres patented land, Pend d'Oreille dist.; Sandpoint. **Development:** One tunnel 140 ft. long. **Plant:** Small gas-driven compressor. **Ore:** Gold.

TALACHE MINES, INC.

Office: Talache. **Officers:** A. H. Burroughs, Jr., Pres.-Mgr.; J. M. Hector, Sec.; both of Quartzburg. **Inc.:** April 21, 1917, as Armstead Mines, Inc.; name changed June 8, 1922. **Capital:** 1,000,000 shares common, 600,000 shares preferred; par value $1; 983,000 shares common, 579,233 shares preferred issued. **Property:** Armstead mine; 18 patented, 44 unpatented claims, Pend d'Oreille dist.; Talache. **Development:** Approximately 34,591 ft. of underground workings, the principal of which are a main haulage tunnel, 3900 ft. long, the main inclined raise 916 ft. long and an inclined shaft 200 ft. long. **Plant:** MINE: 9x10 Hendre-Bolthoff electrically-driven geared hoist; 1574 cu. ft., 2 stage I-R type Pre-2 compressor, electrically driven; haulage, G. E. 4-ton storage battery locomotive; buildings, 44 room hotel, 24 residences, compressor house, blacksmith shop, warehouse, cook house, store, dry room and office. MILL: 150-ton flotation, 2 stage crushing to ½ in. fine grinding to 80 mesh, electrically driven. **Ore:** Silver. **Remarks:** Operations were suspended in October, 1926. In March, 1927, the famous Gold Hill & Iowa mine at Quartzburg, Boise County, was acquired and operations were transferred to that mine, which see.

WHITEDELF MINING & DEVELOPMENT CO.

Officers: John P. Delaney, Pres., 50 Broad St., New York; Compton I. White, Mgr., Clark Fork. **Inc.:** March 17, 1926. **Capital:** 100,000 shares, par value $1; 65,000 shares issued. **Property:** 160 acres of patented land, Pend d'Oreille dist.; Clark Fork. **Development:** Principally by 3 tunnels, with a total of over 2500 feet, and an inclined shaft 300 ft. long. **Plant:** Electrically-driven Sullivan compressor and hoist, complete mining equipment. **Ore:** Lead-silver. **Men employed:** Average, 20. **Remarks:** In addition to the work performed by the company, part of the mine was under operation by lessees. A large tonnage of high-grade lead-silver ore was produced and marketed. The development work consisted principally of extending the shaft an additional 150 ft. and of lateral work, on the 200 and 300-ft. levels. This work opened a substantial tonnage of ore and during the closing months of the year plans were perfected and work was started on a 75-ton flotation concentrator. The success with which this enterprise is meeting has been instrumental in attracting a large amount of attention to the Clark Fork district.

BONNEVILLE COUNTY

Bonneville County is bounded on the south by Caribou and Bingham counties, on the west by Bingham County, on the north by Jefferson, Madison and Teton counties, and on the east by the State of Wyoming. It is one of the principal, as well as one of the largest, southeastern counties; and has an area of 1904 square miles, and population of 17,501 at the time of the 1920 census. The larger part of the population is in the Snake River valley, which occupies all of the western part of the county. The southeastern part, which is occupied by the Caribou Range of the Snake River Mountains, is drained by the South Fork of the Snake River and its tributaries. It is primarily an agricultural county and is noted for its potato and sugar-beet industries, particularly potatoes, as it is one of the largest potato shipping points in the United States. Idaho Falls, the largest town, and civic center of the Upper Snake River valley, is the county seat.

Although recognized only as an agricultural community, this county was once the scene of many active mining operations. This was during the gold rush in the Mt. Pisgah, or Caribou, district at the time placer gold was discovered on McCoy and Gray's creeks. These placers produced a creditable amount of gold, and subsequently a few lode deposits were discovered and exploited. In late years a small dredge was constructed, but this and the deep mines are now idle and the only gold produced is from a few small placer operations.

The principal mineral resources of Bonneville County are gold, phosphate rock, copper, silver, and coal. Many structures favorable to the accumulation of petroleum in commercial quantity are found throughout the southern and eastern parts of the county.

The extensive phosphate beds of southeastern Idaho are exposed over a large area. These, and possibly petroleum, will eventually add to the county's prosperity and put it into the list of important mining counties.

One of the most important new enterprises to start during the year was that of The California Co., a subsidiary of the Standard Oil Co. of California, which acquired a large acreage on the Meadow Creek structure in Bonneville County, installed a drilling rig and equipment capable of drilling to a depth of 6000 feet, and began drilling operation, the well being 14 inches in diameter. This company's activities were instrumental in the starting of other drilling operations by small companies and the investigation of petroleum possibilities in eastern Idaho by two large oil companies.

THE CALIFORNIA CO.

Office: 225 Bush St., San Francisco, Calif. **Officers:** K. R. Kingsbury, Pres.; J. H. Tuttle, Sec., both of San Francisco; D. G. Lawson, Mgr., Kemmerer, Wyo. **Inc.:** Filed in Idaho Mar. 19, 1928. **Capital:** 5,000 shares; par value $100; 1,000 shares issued. **Property:** 920 acres held under oil and gas lease. **Plant:** 90-ft. steel derrick; complete drilling equipment, gas-driven; complete and modern camp. **Mineral sought:** Oil and gas. **Men employed:** Average, 12. **Remarks:** This company is a subsidiary of the Standard Oil Co. of California. The rig was installed in May, and active well-drilling operations were commenced on June 10 and continued without interruption throughout the year. The well, which has a diameter of 14 inches, was sunk to a depth of approximately 1800 ft.

GOLD PAN PLACER MINING CO.

Office: Templeton Bldg., Salt Lake City, Utah. **Officers:** D. J. Davis, Pres.; Hawley Bagley, Sec., both of Salt Lake City, Utah; Almorean Bagley, Mgr., Dingle. **Inc.:** Mar. 29, 1928. Charter forfeited Nov. 30, 1928. **Capital:** 250,000 shares; par value $1; 110,460 shares issued. **Property:** 4 unpatented placer claims, unorganized dist.; Alpine. **Plant:** 30-ton Ainlay gold centrifugal separator. **Ore:** Placer gold. **Men employed:** Average, 3. **Remarks:** Active prospecting and experimental work throughout the summer months.

IDAHO GOLD MINING CO.

Office: 319 Dooly Block, Salt Lake City, Utah. **Officers:** Chas. C. Dey, Pres.; W. A. Wilson, Sec.-Mgr., both of Salt Lake City, Utah. **Inc.:** April 19, 1917. **Capital:** 150,000 shares; par value 10c; 130,026 shares issued. **Property:** Robinson group; 2 patented claims, Mt. Pisgah dist.; Gray. **Ore:** Gold. **Remarks:** Idle for many years.

THE CALIFORNIA COMPANY'S DERRICK

BOUNDARY COUNTY

Boundary County is bounded on the north by the Dominion of Canada, on the east by the State of Montana, on the west by the State of Washington, and on the south by Bonner County. Its principal area comprises the drainage basins of the Moyie River, which flows in a southerly direction, and the Kootenai River, which flows northerly from Bonners Ferry, the county seat and principal town. It has a total area of 1276 square miles, and was accredited with a population of 4474 in the 1920 census. The principal industries are lumbering, farming, and mining.

The county is served by two transcontinental railroads, the Great Northern, with its branch line from Bonners Ferry to Porthill, on the Canadian border, and the Spokane International; by the North and South Highway, with an easterly outlet from Bonners Ferry; and by a system of county roads which extend into the different sections along the main stream valleys.

The principal mineral resources are lead, silver, gold, copper, zinc, tungsten, and molybdenum. These metals are widely distributed, and a few of the deposits have been partially developed. Heavy overburden, dense overgrowth, and limited accessibility have retarded prospecting, discovery, and development. The many favorable areas and wide diversity of mineralization make this county an exceptionally favorable field for the prospector and the small development company.

The year 1928 witnessed but little improvement in this county. One new ore discovery was made and two new enterprises were started. The Continental mine at Porthill, owned by the Idaho Continental Mining Co., was operated by the Idaho Continental Co. until February, at which time production was suspended.

The Leonia Gold Mining Co. was reorganized as the Idamont Lead-Zinc Mines Co., in order to place its stock on an assessable basis.

The Moyie Gold-Copper M. & M. Co., Ltd., and the International Molybdenum Co. expanded their operations over those of the previous year. During the closing months of the year considerable interest was shown in the molybdenum deposits of the county.

BORDER MINING CO.

Office: Bonners Ferry. **Officers:** C. L. Wickstrom, Pres.-Mgr., Bonners Ferry. **Inc.:** Not incorporated. **Property:** Two Tails group; 5 unpatented claims held under lease and option, Moyie-Yaak dist.; Bonners Ferry. **Development:** By 2 tunnels: No. 1, 360 ft. long; No. 2, 550 ft. long; and an inclined shaft 375 ft. long. **Plant:** Gas-driven Sullivan compressor; complete mining equipment and camp. **Ore:** Lead-silver. **Men employed:** Average, 7. **Remarks:** Active throughout the year in extending No. 2 tunnel.

BOUNDARY CONSOLIDATED MINING CO.

Office: 748 Peyton Bldg., Spokane, Wash. **Officers:** A. S. Stacy, Pres., Lewiston; E. C. Outlaw, Sec.-Mgr., Spokane, Wash. **Inc.:** Feb. 4, 1928. **Capital:** 20,000,000 shares; par value 5c; 1,430,050 shares issued. Sale of 9,800,000 shares optioned for financing purposes. **Property:** 15 claims, 9 of which are held under lease and option; Moyie-Yaak dist.; Addie. **Development:** By 2 tunnels: No. 1, 160 ft. long; No. 2, 14 ft. long. **Plant:** Small gas-driven compressor. **Ore:** Lead-silver.

BRUSH LAKE MINES CO.

Office: 412 Ziegler Block, Spokane, Wash. **Officers:** J. W. Reid, Pres., Bonners Ferry; David Emley, Sec., Coolin. **Inc.:** Aug. 6, 1921. **Capital:** 2,000,000 shares; par value 10c; 1,386,682 shares issued. **Property:** Bethlehem group; 7 unpatented claims, Moyie Yaak dist.; Bonners Ferry. **Development:** Approximately 1200 ft. of underground workings. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** Property under development during part of the year.

COPPER FALLS MINING CO.

Office: Eastport. **Officers:** Gus Kallman, Pres.-Mgr., Gem; Spencer Lewis, Sec.-Treas., Eastport. **Inc.:** March 30, 1911. **Capital:** 1,000,000 shares; par value $1; 669,772 shares issued. **Property:** Copper Falls group; 5 unpatented claims, Moyie Yaak dist.; Addie. **Development:** 2 tunnels: No. 1, 240 ft. long; No. 2, 600 ft. long; 1 vertical shaft, 45 ft. deep. Total development, approximately 1185 ft. **Ore:** Lead-silver. **Remarks:** Annual labor.

CYNIDE GOLD MINING CO.

Office: Bonners Ferry. **Officers:** H. S. Robinson, Pres., Whitefish, Mont.; Geo. R. Causton, Sec.-Mgr., Bonners Ferry. **Inc.:** Jan. 21, 1919. **Capital:** 3,500,000 shares; par value $1; 1,960,637 shares issued. **Property:** Buckhorn group; 15 unpatented claims, Moyie Yaak dist.; Bonners Ferry. **Development:** By 4 tunnels: Sand, 1230 ft.; Lower Keystone, 980 ft.; Upper Keystone, 350 ft.; Buckhorn, 1200 ft. Total development, approximately 5000 ft. **Plant:** MINE: 2 gas-driven C-P compressors; complete mining equipment and camp. MILL: 200-ton cyanide, including fine grinding. **Men employed:** 1 watchman. **Remarks:** Annual labor only.

GOLDEN SCEPTRE MINING CO., LTD.

Office: E. 245 Sprague Ave., Spokane, Wash. **Officers:** O. L. Elvigen, Pres.; C. F. Halverson, Sec., both of Spokane, Wash. **Inc.:** Aug. 30, 1909. **Capital:** 1,500,000 shares; par value 50c; 652,841 shares issued. **Property:** Golden Sceptre group; 7 unpatented claims, Porthill dist.; Porthill. **Development:** Principally by 1 tunnel 1800 ft. long. **Plant:** Gas-driven compressor and complete mining equipment. **Ore:** Copper-gold. **Remarks:** Annual labor only.

IDAHO CONTINENTAL CO., THE

Office: 1015 Paulsen Bldg., Spokane, Wash. **Officers:** A. Klockmann, Pres.-Mgr.; Richard Schacht, Sec., both of Spokane, Wash. **Inc.:** Jan. 11, 1910. **Capital:** 1,500,000 shares; par value $1; all shares issued. **Property:** 15 patented, 5 unpatented claims, Porthill dist.; Klockmann. "The company owns by lease and exchange of shares with Idaho Continental Mining Co., the Continental, Jasper, Blue Joe, Volcanic, Morning Star, Evening Star, and outright all others." **Development:** Approximately 15,118 ft. of underground workings consisting principally of 5 tunnels: No. 1, 250 ft. long; No. 2, 100 ft. long; No. 3, 750 ft. long; No. 4, 1800 ft. long; No. 5, 2653 ft. long. **Plant:** MINE: 1200-cu.-ft. I-R Imperial type 10 compressor; Leyner drill sharpener, and complete mining equipment; 1600 ft. aerial tram between mine and mill. MILL: 250-ton concentrator; 10x20 crusher; conveyor belt; 4 double 4-compartment Hartz jigs; 3 rolls 12x20; drag classifier; 5 Wilfley tables; Hardinge ball mill; 4 Frue vanners; flotation; hydroelectric power plant. **Ore:** Lead-silver. **Men employed:** Average, 89. **Remarks:** This is one of the largest lead-producing mines in the State. Capacity production and an active mine development campaign were maintained until February, at which time production was suspended and development work continued with 15 men.

IDAHO CONTINENTAL MINING CO.

Office: 805 Sellwood Bldg., Duluth, Minn. **Officers:** Henry Turrish, Pres.; Henry Maxeiner, Sec., both of Duluth, Minn. **Inc.:** Dec. 12, 1902. **Capital:** 1,500,000 shares; par value $1; 1,200,000 shares issued. **Property:** Continental group; 7 patented, 1 unpatented claim, namely: Continental, Jasper, Blue Joe, Volcanic, Morning Star, Evening Star, and Aurora; Porthill dist.; Klockmann. **Remarks:** This is the same property as that operated by the Idaho Continental Co.

IDAMONT LEAD-ZINC MINES CO.

Office: Leonia. **Officers:** J. S. Hutchinson, Pres., Portland, Ore; M. E. Carson, Sec., Leonia. **Inc.:** Sept. 10, 1928. **Capital:** 1,000,000 shares; par value $1; 624,130 shares issued. **Property:** 66 placer and lode claims, approximately 2400 acres, Moyie Yaak dist.; Leonia. **Development:** 5-mile, 200 sec.-ft. capacity canal, giving a working head of approximately 430 ft.; in 2 sections, upper 3 miles long, lower 2 miles, with a difference in elevation of 210 ft. Water conducted from upper to lower through two 22-inch steel pipes; about 20 miles of road, 5 of which were very heavy construction. Lode claims developed by numerous cuts and tunnels. **Plant:** Approximately 3000 ft. steel pipe, one 8-inch giant, operating under a 430-ft. head and two 5-inch giants, operating under 130-ft. head; bed rock flume and spillway 300 ft. long on a grade of 10 inches in 12 ft.; in 3 sections, spillway 12 ft. wide by 8 ft. deep; one flume 6 ft. wide and one 12 ft wide, both 8 ft. deep. Concentrates from flume discharge into cement lined tank of approximately 15,000-ton capacity from which they are elevated into cleaning plant on top of flume. Cleaning plant consists of Ogden tables, classifiers and specially designed riffles. Complete machine shop, sawmill, planing mill, overhead cable system operated by steam; tractor haulage; complete company buildings and 35 individual homes for the men. **Ore:** Principally placer gold. **Men employed:** Average, 6. **Remarks:** A reorganization of the Leonia Gold Mining Co., in order that the stock might be made assessable. Annual labor only.

INTERNATIONAL MOLYBDENUM CO.

Office: Porthill. **Officers:** H. A. French, Pres.; P. W. Stas, Sec., both of Porthill. **Inc.:** Feb. 3, 1926. **Capital:** 25,000 shares; par value $1; 12,453 shares issued. **Property:** Hottentot group; 4 unpatented claims, Porthill dist.; Porthill. **Development:** 2 tunnels with a total length of 142 ft., and a number of open cuts. **Ore:** Molybdenum. **Men employed:** Average, 2. **Remarks:** Active prospecting work was maintained for a period of 3 months.

MOYIE GOLD COPPER MINING & MILLING CO., LTD.

Office: Bonners Ferry. **Officers:** Geo. E. Crocker, Pres.; H. J. McNally, Sec.; A. J. Kent, Mgr., all of Bonners Ferry. **Inc.:** Sept. 16, 1911. **Capital:** 1,250,000 shares; par value $1; 950,000 shares issued. **Property:** Queen group; 5 unpatented claims, Moyie Yaak dist.; Bonners Ferry. **Development:** 3 tunnels and 2 shafts, approximately 500 ft. **Ore:** Lead-silver. **Men employed:** Average, 4. **Remarks:** Active development work throughout the year. Press reports were to the effect that this work was successful in exposing a substantial showing of ore.

BUTTE COUNTY

Butte is one of the south-central counties, being bounded by Lemhi, Custer, Blaine, Bingham, Jefferson, and Clark counties. The Big and Little Lost rivers flow in a southerly direction across the county, and the lower valleys of these rivers constitute the larger part of its area of 2048 square miles. Arco, situated near the lower end of Big Lost River valley, is the largest town and the county seat. It is primarily an agricultural and stock-raising community, although its mining industry is gaining recognition and importance. The publicity given and the travel attracted to the new national monument, the Craters of the Moon, which is located in this county, have widely advertised the resources and scenic attractions of the State.

Two State highways have been designated and partly constructed, the Lost River Highway, which extends from Blackfoot to Challis and passes through Arco and Big Lost River valley, and the Idaho Central Highway from Hailey to Dubois, which serves the Craters of the Moon. The county is served by the Blackfoot-Mackay branch of the O. S. L. Railroad.

The principal mineral resources are lead, silver, zinc, gold, tungsten, manganese, limestone, and marble, the high-grade lead-silver ores being the most important, as they are found in all the mining districts of the county. The other metals occur in sufficient extent to be of commercial importance. Butte is one of the principal lead-silver producing counties in southern Idaho.

This county witnessed more new mine development, more new investigations and more prospecting and location of new claims than during the past 30 years. A large amount of these activities were inspired to a great degree by the entry into this county of the Federal Mining & Smelting Co., which acquired the Silver Bell group in the Lava Creek district, installed complete mining equipment, and commenced driving a long crosscut tunnel.

This tunnel encountered two blind veins which greatly enhance the possibility of the property developing into a substantial producer. The Wilbert Mining Co., Ltd., operating in the Dome district, maintained active production and mine development work throughout the year. This company is one of the largest producers of lead-silver ore in southern Idaho. The Dahle Bros. at the Hornsilver mine, known as the Horn Silver Consolidated Mines Co., maintained active development work throughout the year and were successful in proving a substantial showing of new ore.

MINE CAMP AND MILL: WILBERT MINING CO., LTD.

AMALGAMATED SUGAR CO.

Office: Eccles Bldg., Ogden, Utah. **Officers:** A. W. Ivins, Pres., Salt Lake City; Fera S. Young, Sec.; J. M. Eccles, Mgr., both of Ogden, Utah. **Inc.:** Filed in Idaho Apr. 24, 1915. **Capital:** 724,624 common, 50,000 shares preferred stock; no par value; all shares issued. **Property:** 4 patented claims, Arco dist.; Arco. **Plant:** 1 electrically-driven 130-cu.-ft. compressor; 3200-ft. gravity tramway and complete mining and quarrying equipment. **Mineral:** Lime rock. **Remarks:** Buildings and equipment removed and no further quarrying operations contemplated.

BADGER MINES CO.

Office: Rexburg. **Officers:** S. H. Abbott, Pres.-Mgr.; Fay Abbott, Sec., both of Rexburg. **Inc.:** June 8, 1925. **Capital:** 1,000,000 shares; par value 3c; all shares issued. **Property:** Badger group; 8 unpatented claims, Dome dist.; Howe; held under lease and option. **Development:** Principally by 1 tunnel, 2135 ft. in length. **Plant:** MINE: Gas-driven compressor and complete mining equipment. MILL: 25-ton concentrator, driven by gas engine. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** Tunnel extended 600 ft. during the year.

BUTTE ANTELOPE MINING CO.

Office: 407 Ness Bldg., Salt Lake City, Utah. **Officers:** George G. Armstrong, Pres.; J. M. Hamilton, Sec., both of Salt Lake City; F. F. Williams, Mgr., Grouse. **Inc.:** Sept. 8, 1927. **Capital:** 1,000,000 shares; par value 5c; 385,000 shares issued. **Property:** Foot Wall group; 14 unpatented claims, Lava Creek dist.; Moore; held under lease and option from Ardell Gamett. **Development:** By 1 tunnel 200 ft. long. **Ore:** Lead-silver. **Men employed:** Average, 3. **Remarks:** Tunnel extended 100 ft. during the year.

FEDERAL MINING & SMELTING CO. (See Shoshone County)
Office: Wallace. **Officers:** F. H. Brownell, Pres.; J. L. Martin, Sec., both of 120 Broadway, New York City; Frederick Burbidge, Mgr., Wallace; John L. Stone, Supt., Martin. **Property:** Silver Bell group; Lava Creek dist.; Martin. **Development:** Principally by a 600-ft. crosscut. **Plant:** Gas-driven compressor; complete mining equipment. **Ore:** Lead-silver. **Men employed:** Average, 15. **Remarks:** During the early part of the year, the property was acquired, plant and equipment installed, and work started on a long crosscut to intersect the veins at an additional depth below the former workings. This crosscut intersected 3 veins.

HORN SILVER CONSOLIDATED MINES CO.
Office: Arco. **Officers:** Edward Dahle, Pres.-Mgr.; M. M. Dahle, Sec., both of Arco. **Inc.:** Dec. 21, 1925. **Capital:** 100,000 shares; par value $1; all shares issued. **Property:** Horn Silver group; 3 patented, 7 unpatented claims, held under lease and option; Lava Creek dist.; Martin. **Development:** By 3 tunnels: No. 1, 630 ft.; No. 2, 530 ft.; No. 3, 1500 ft. **Plant:** Gas-driven compressor; complete mining equipment and camp. **Ore:** Lead-silver. **Men employed:** Average, 7. **Remarks:** Active development work throughout the year, which consisted principally of drifting on the vein in No. 3 tunnel. This work opened a substantial showing of ore. All the men employed are interested in the mine and work without wages. The Dahle brothers are to be complimented for hard work, intelligent manner of developing the property and economy of operation.

METTA MINING CO., LTD.
Office: Shelley. **Officers:** W. R. Jones, Pres., Ogden, Utah; E. Milton Christensen, Sec.-Mgr., Shelley. **Inc.:** Oct. 20, 1906. **Capital:** 1,000,000 shares; par value $1; 386,500 shares issued. **Property:** Metta group; 9 unpatented claims, Hamilton dist.; Howe. R. R. Dubois, 47 miles. **Development:** 3 short tunnels and 3 short vertical shafts; total development work approximately 880 ft. **Ore:** Lead-silver. **Remarks:** Annual labor only.

ST. LOUIS MINING CO.
Office: 981 First Ave., Salt Lake City, Utah. **Officers:** Earl Wright, Pres.; Mrs. Jessie B. Russell, Sec., both of Salt Lake City. **Inc.:** Unknown; never filed in Idaho. **Capital:** 750,000 shares; par value 1c; 449,000 shares issued. **Property:** St. Louis group; 5 unpatented claims, Lava Creek dist.; Arco. **Development:** By 3 tunnels: No. 1, 560 ft. long, No. 2, 290 ft. long, No. 3, 180 ft. long; and an inclined shaft 160 ft. long. **Plant:** Gas-driven Gardner compressor; small air-driven hoist; complete mining equipment. **Ore:** Silver. **Remarks:** Operated during part of the year by a lessee who employed 4 men.

WILBERT MINING CO., LTD.
Office: 221 Kearns Bldg., Salt Lake City, Utah. **Officers:** J. A. Foley, Sec.; H. S. Knight, Mgr., both of Salt Lake City, Utah. **Inc.:** Apr. 10, 1907. **Capital:** 2,000,000 shares; par value 50c; 1,566,128 shares issued. **Property:** Daisy Black group; 6 patented, 30 unpatented claims Dome dist.; Howe. R. R. Arco, 42 miles. **Development:** Approximately 15,000 ft. of underground workings, the principal of which is No. 4 tunnel, in which there is an inclined shaft 350 ft. long with 3 intermediate levels. When this tunnel was completed to 2800 ft. in length, a raise was put through at its end and connection made with the old workings. **Plant:** MINE: 50-h. p. gas-driven C-P compressor, 25-h. p. gas-driven electric generator, and 20-h. p. electrically-driven hoist. MILL: 60-ton concentrator, gas-driven. **Ore:** Lead-silver. **Men employed:** Average, 25. **Remarks:** In addition to maintaining production and shipping a large tonnage of concentrate during the year, a large amount of mine development work was performed. This work consisted principally of extending the shaft 150 ft., which was successful in opening a substantial tonnage of new ore. This property is one of the largest lead-producing mines of southern Idaho.

CAMAS COUNTY

Camas County is one of the south-central counties, being bounded on the north and east by Blaine, on the south by Lincoln and Gooding, and on the west by Elmore County. It has an area of 1070 square miles, and was accredited with a population of 1730 in the 1920 census, or 1.6 persons to the square mile. The population is engaged in stockraising and dry farming, which pursuits are confined to the 300,000 fertile acres of the Camas Prairie.

The county is served by locally maintained roads, two Forest Service highways, and the Shoshone-Hill City branch of the O. S. L. Railroad. Fairfield is the largest town and county seat.

The principal mining districts are the Rosetta, Little Smoky, and Skeleton. The Skeleton district includes the drainage area forming the headwaters of the South Fork of the Boise River, and Little Smoky district comprises the drainage area of Little Smoky and Carrie Leonard Creeks. The ores found in the latter are those of lead-silver and zinc, and the mines in the former are principally gold, both placer and lode. In addition to the foregoing, the other mineral resources are copper, tungsten, and diatomaceous earth.

The mines in the Carrietown section of the Little Smoky district have a good production record to their credit, and their latent possibilities still offer excellent opportunities for profitable mines, either through the apparent possibility in some mines for finding the ore beyond the faults which caused a suspension of operations in the early nineties, or, in other mines, of adapting modern flotation methods to the large bodies of proven low-grade ore.

The Consolidated Mines Syndicate, which is developing a prospect in the Willow Creek district, maintained exploration work with a small crew throughout the summer months. I. E. Haight at the Taft mine on Little Smoky installed complete mining equipment, erected new camp buildings, and started an active mine development campaign. This work proved to be encouraging through the exposure of a substantial showing of new ore.

AMERICAN MINING & DEVELOPMENT CO.

Office: Glenns Ferry. **Officers:** J. W. Davis, Pres., Glenns Ferry; Geo. H. Hickok, Sec., Pocatello. **Inc.:** Apr. 19, 1920; charter forfeited Dec. 1, 1925. **Capital:** 600,000 shares; par value 10c; 190,000 shares issued. **Property:** Liberal group; 3 unpatented claims, Little Smoky dist.; Fairfield. **Development;** Principally by 1 tunnel, which is 1365 ft. long. **Plant:** MILL: 50-ton; consisting of Hardinge mill, amalgamation plates and two concentrating tables; gas driven. **Ore:** Gold-silver. **Remarks:** Annual labor only.

CARRIE LEONARD MINING CO.

Office: 319 Dooly Blk., Salt Lake City, Utah. **Officers:** Boyd T. Park, Pres.; W. A. Wilson, Sec.-Mgr., both of Salt Lake City. **Inc.:** Filed in Idaho, July 21, 1926. **Capital:** 200,000 shares; par value 10c; shares issued unknown. **Property:** Carrie Leonard group; 8 patented claims, Little Smoky dist.; Fairfield. **Ore:** Lead-silver. **Remarks:** Idle. At one time this property was the principal producer in the Little Smoky district.

CLIPPER GOLD MINING & MILLING CO.

Office: Box 61, Fairfield. **Officers:** Chas. J. Sherry, Sr., Pres.-Mgr., Fairfield; Chas. J. Sherry, Jr., Sec., Long Beach, Calif. **Inc.:** April 3, 1907. **Capital:** 500,000 shares; par value $1; 400,000 shares issued. **Property:** Clipper group; 4 unpatented claims, Rosetta dist.; Fairfield. **Development:** By 3 short tunnels. **Remarks:** Annual labor only.

CONSOLIDATED MINES SYNDICATE

Office: 623 First Nat'l Bank Bldg., Boise. **Officers:** Frank E. Johnesse, Pres.-Mgr.; Wm. MacLeod, Sec., both of Boise. **Inc.:** May 6, 1924. **Capital:** 10,000 shares; no par value. On August 15, 1924, the capitalization was changed to 10,000,000 shares, $2.50 par value; and on May 2, 1925, the capitalization was decreased to 10,000,000 shares, par value $1; 2,449,004 shares issued. **Property:** Princess-Blue Ribbon groups; 7 unpatented claims, unorganized dist.; Beaver Creek; Fairfield. **Development:** By 3 tunnels: No. 1, 170 ft.; No. 2, 225 ft.; No. 3, 415 ft. **Ore:** Lead-silver-gold. **Men employed:** Average, 9. **Remarks:** Active development work, which consisted of driving an intermediate tunnel.

CRYSTAL GOLD PLACER MINING CO.

Office: Fairfield. **Officers:** S. B. McEwen, Pres., San Gabriel, Calif.; S. W. Struble, Sec., Fairfield. **Inc.:** Nov. 8, 1924. **Capital:** 500,000 shares; par value $1; 53,000 shares issued. **Property:** 7 unpatented claims, Skeleton dist.; Fairfield; held under lease and option. **Development:** 3 short cuts. **Plant:** Small sawmill and small concentrating plant, both gas-driven. **Ore:** Placer gold. **Remarks:** Annual labor only.

HIDDEN TREASURE MINE & MILLING CO.

Office: Fairfield. **Officers:** Chas. J. Sherry, Sr., Pres.-Mgr.; Fairfield. **Inc.:** July 10, 1916. **Capital:** 500,000 shares; par value 10c; 5,000 shares issued. **Property:** Hidden Treasure group; 4 unpatented claims, Little Smoky dist.; Fairfield. **Development:** By 3 tunnels; total development, approximately 3000 ft. **Plant:** Partly dismantled 50-ton concentrator. **Ore:** Lead-silver. **Remarks:** Annual labor only.

IDAHO LEAD CO.

Office: 221 Eastman Bldg., Boise. **Officers:** Eugene B. Sherman, Pres.; M. H. Brownell, Sec., both of Boise. **Inc.:** Dec. 30, 1926. **Capital:** 1,000,000 shares common, 500,000 shares preferred; par value $1; 506,309 shares common, 6,300 shares preferred issued. **Property:** Silver Star group; 11 patented claims, Little Smoky dist.; Fairfield. **Development:** By 3 tunnels: No. 1, 700 ft. long; No. 2, 900 ft. long; No. 3, 1100 ft. long; and an inclined shaft 200 ft. long. Total development over 6000 ft., which opens the vein to a depth of 500 ft. **Ore:** Lead-zinc-silver. **Remarks:** No. 3 tunnel partly rehabilitated during the year.

PERSEVERANCE MINES CO., INC.

Office: 1620 N. 6th St., Boise. **Officers:** Fred R. Wilson, Pres., Spokane, Wash.; Geo. R. Colvin, Sec.-Mgr., Boise. **Inc.:** May 28, 1927. **Capital:** 4,000,000 shares; par value 25c; 800,000 shares issued. **Property:** Five Points group; 11 unpatented claims, Little Smoky dist.; Fairfield. **Development:** By 3 tunnels: No. 1, 119 ft.; No. 2, 235 ft.; No. 3, 500 ft. **Plant:** Partly constructed 70-ton concentrator. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** During the year a small rod-mill was installed in the mill and some work done on installation of other mill equipment. Most of the funds expended during the year were derived from continuous stock assessments. This is the third organization Mr. Colvin has had on this property, the others being the Walton Mines Co., incorporated April 28, 1921; and the Happy Bill Mines Co., incorporated Dec. 31, 1923.

RED STAR MINING CO.

Office: Boise. **Officers:** D. W. Zent, Pres., Fairfield; John M. Berry, Sec., Gooding. **Inc.:** Nov. 20, 1924. **Capital:** 250,000 shares; par value 10c; 130,000 shares issued. **Property:** Red Star group; 4 unpatented claims, Little Smoky dist.; Fairfield. **Development:** 1 tunnel 50 ft. long. **Ore:** Gold-silver-lead. **Remarks:** Annual labor only.

RICHARD ALLEN MINES CO.

Office: Gooding. **Officers:** F. D. Wagner, Pres., Gooding; A. W. Steeves, Sec., Fairfield. **Inc.:** May 23, 1927. **Capital:** 600,000 shares; par value 5c; 50,000 shares issued. **Property:** 3 unpatented claims, unorganized dist. Soldier Mountain; Fairfield. **Development:** By 3 tunnels; total development, approximately 1000 ft. **Ore:** Copper-silver-gold. **Men employed:** Average, 3. **Remarks:** Principal tunnel extended 200 ft. during the year.

TAFT MINE

Office: Hailey. **Owner:** Homer D. Jones, Hailey. **Property:** Taft group; 4 unpatented claims, Little Smoky dist.; Fairfield. **Development:** By 2 tunnels: No. 1, 165 ft. long; No. 2, 200 ft. long. **Ore:** Lead-zinc-silver. **Men employed:** Average, 8. **Remarks:** Property under lease and option to I. E. Haight, who constructed new camp buildings, installed equipment, and commenced active development work.

CARIBOU COUNTY

Caribou is one of the large southeastern counties of the State, being bounded on the east by the State of Wyoming, on the south by Bear Lake, on the east by Bannock, and on the north by Bingham and Bonneville counties. It has an area of 1263 square miles, and was accredited with a population of 2191, or 1.7 persons to the square mile, in the 1920 census. Soda Springs, the county seat and the only settlement of importance, is situated in the southeastern corner. The county is principally a sheep raising and agricultural community, and Soda Springs is one of the largest sheep shipping points in the United States.

The southeastern corner of the county is served by the main line of the O. S. L. Railroad, with an 8-mile branch road to Conda, the scene of the Anaconda Copper Mining Co.'s operation, and by the main east and west State highway, the Old Oregon Trail.

The principal mineral resources are phosphate rock, salt, sulphur, and mineral springs, and there are excellent possibilities for the discovery of petroleum. These resources are different from those of most counties, and when properly exploited will be a material factor in the prosperity of the county and State.

A large part of the five billion tons of minable phosphate rock, estimated by geologists of the U. S. Geological Survey, is in this county. These deposits are practically untouched, and constitute one of the greatest potential mineral resources of the State. They are fully described, including analyses and tonnage estimates, in the numerous publications referred to in the bibliography. The Anaconda Copper Mining Co. is pioneering in the development of the rock phosphate industry and has expended over $1,000,000 in its mine, mine plant, mill, railroad, power lines, and townsite.

One of the most outstanding publications issued by the U. S. Geological Survey in recent years is Professional Paper 152, by G. R. Mansfield: "Geography, Geology, and Mineral Resources of Part of Southeastern Idaho". This appeared during 1927; it is profusely illustrated with pictures, maps, and diagrams, and describes in detail the subjects mentioned in its title, dealing especially with the immense areas of phosphate rock found in this county.

The only salt found in the State is in Caribou County. Geologists of the U. S. Geological Survey conservatively estimate five million tons in one deposit, with the possibility of a large tonnage in adjacent areas. The deposits are located on Stump and Tygee creeks, near the State line.

The mineral springs, which are located at Soda Springs, constitute an important resource which is lying dormant. The waters from these springs have exceptional medicinal qualities, are excellent for table use, and offer a great possibility if properly developed and exploited.

A number of structures favorable to the accumulation of petroleum are found in the eastern part of the county. The location and geology of these areas are fully described in the publications issued by the Idaho Bureau of Mines and Geology.

The Anaconda Copper Mining Co., which is operating one of the largest phosphate mines in the United States, enlarged its mining equipment, constructed nine new homes for its employees, and maintained capacity production throughout the greater part of the year. The phosphate rock which this company is producing is shipped to Anaconda, Montana, where it is manufactured into high-grade fertilizer and sold under the trade name of "Anaconda treble superphosphate."

ANACONDA COPPER MINING CO.

Office: Anaconda, Mont. **Officers:** C. F. Kelley, Pres.; A. H. Melin, Sec., both of 25 Broadway, New York City; E. M. Norris, Local Mgr., Conda, Idaho. **Inc.:** Filed in Idaho: Apr. 10, 1916. **Capital:** 6,000,000 shares; par value $50; 3,000,000 shares issued. **Property:** 23 patented claims; 3403 acres, unorganized dist.; Conda. **Development:** 3 adits, 45 ft. above railroad-track level, 9x9 ft. inside of timbers: No. 1, 6050 ft. long; No. 2, 2660 ft. long; No. 3, 5120 ft. long. The main operating tunnels are equipped with 25-lb. rail, 36-in. gauge track, 15-ton storage-battery locomotive capable of hauling a 100-ton net load at a speed of 4 to 7 miles per hour, 10-ton side dump ore cars, power loading machines operated by compressed air and No. 4 sirocco fan. **Plant:** MINE: 1000-cu.-ft. compressor; drill sharpeners; machine, blacksmith and carpenter shops with latest type power-driven equipment; switch boards and motor generator charging set; laboratory; electric sub-station and sawmill all housed in fireproof gunited and steel buildings. MILL: Crushing and drying plant. The mill feed and storage bins are connected with the main tunnels by large trestles. The storage bins, with a capacity of over 4000 tons, and houses over them are protected with several inches of gunite. The main storage bin is equipped with an Ottumwa boxcar loader and modern railroad scales. The rock drawn from the mill feed bin, which has a capacity of 450 tons, passes over shaking grizzlies, the oversize going to a 12-inch Traylor gyratory crusher, which reduces it to about 2½ inches. The product from the crusher and the undersize is elevated and passed over a Mitchell vibrating screen. The rock passing through this screen goes to the dryer feed bin, and the oversize to 22x54-inch Anaconda rolls that reduce it to three-fourths of an inch. The product from the rolls is elevated and again passes over the Mitchell vibrating screen. The crushed rock drawn from the dryer feed bins is conveyed into class A-12 Ruggles-Coles dryers by apron feeders. After leaving the dryer the rock goes over a shaking feeder to a chain bucket elevator. This elevator carries it to the top of the mill where it passes through a Vezin sampler, and it is then conveyed to the storage bins. The present capacity of the mill is 400 tons in 24 hours. This output can be increased to 1000 tons in the same time by adding another dryer. **Railroad:** 8-mile branch from Soda Springs to mine, with storage tracks that will accommodate 100 fifty-ton railroad cars, spurs to mill and coal bins, and wyes at each end of the yards. The gradient of the storage tracks is such that the cars are operated by gravity to and from the storage bins. **Town:** The company has erected a model mine town consisting of modern homes, which are rented to the employees at a nominal figure. Company offices, bunk and boarding houses, superintendent's home, recreation hall and a number of small homes have been erected. A fully equipped store is maintained by the company, a postoffice has been established, and a modern school erected and maintained. A complete water system for the town and plant has

been installed; the water is piped a distance of 2 miles to a 100,000-gallon storage tank from which it is distributed. **Ore:** Phosphate rock. **Men employed:** Average, 70. **Remarks:** During the greater part of the year active production was maintained at the rate of approximately 200 tons per day. A large number of new homes for the employees were constructed, mine plant was enlarged, and an additional storage-battery locomotive added during the year. Note pages 26 to 31 of 1923 Annual Report for complete description of this operation.

GREAT WESTERN OIL CO.

Office: 953 W. Lander St., Pocatello. **Officers:** L. M. Capps, Pres., Blackfoot; Harvey W. Dice, Sec., Pocatello. **Inc.:** Feb. 2, 1923. **Capital:** 1,000,000 shares; par value $1; 658,146 shares issued. **Property:** Oil and gas leases on 1383 acres of patented farm land situated on Stump and Tygee creeks, unorganized dist.; Auburn, Wyo.; R. R. Montpelier. **Development:** 2640 ft. well. **Plant:** Miller well-drilling outfit equipped with F-M 40-h. p. gas engine. **Mineral sought:** Oil and gas. **Remarks:** Idle.

CASSIA COUNTY

Cassia is one of the principal southern counties, being bounded on the south by the States of Nevada and Utah, on the west by Twin Falls, and on the east by Oneida and Power counties. Snake River forms its northern boundary, which is also a part of the southern boundary of Jerome, Minidoka, Blaine, and Power counties. It has an area of 2595 square miles, and was accredited with a population of 15,659 in the 1920 census. The principal industries are stockraising and farming. Burley, which is on the Snake River, near the center of the Minidoka project of the U. S. Reclamation Service, is the largest town and county seat.

The northern part of the county is served by the Old Oregon Trail State Highway; the other parts by a well-maintained system of county roads. Its railroad is the Minidoka-Buhl branch of the O. S. L. Railroad, from which there are branch lines extending from Burley to Idahome, and from Burley to Oakley.

The minerals found in this county are silver, lead, copper, gold, limestone, building stone, marble, cinnabar, and lignite. In the past, a little drilling has been done for petroleum, but all the companies have been practically idle for the past four years. These varied mineral resources, particularly the high grade lead-silver and silver-copper ores of the Stokes and Dolomite districts, offer excellent opportunities and possibilities for prospectors and development companies.

The Silver Hills Mining Co. and the Big Bertha Mining Co. were the only active companies during the year, although there was an increase in the number of prospectors and the amount of work done by them.

BIG BERTHA MINING CO.

Office: Albion. **Officers:** R. A. Bohn, Pres., Oakland, Calif.; R. E. Bohn, Sec., Escondida, Calif. **Inc.:** Sept. 30, 1924. **Capital:** 25,000 shares; par value $1; 5 shares issued. **Property:** Big Bertha group; 13 unpatented claims, Stokes dist.; Declo. **Development:** By 2 tunnels: No. 1, 500 ft. long; No. 2, 400 ft. long. **Plant:** Small gas-driven compressor; complete mining equipment and camp. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** Principal tunnel extended 190 ft. during the year.

GOOSE CREEK OIL AND DEVELOPING CO.

Office: 424 4th Ave., Pittsburgh, Pa. **Officers:** Edward Martin, Pres.; H. E. Wynn, Sec., both of Pittsburgh, Pa.; D. P. Carpenter, Mgr., Oakley. **Inc.:** Oct. 28, 1920. **Capital:** 1,000,000 shares; par value 50c; 346,600 shares issued. **Property:** Government prospecting permit on 8000 acres on Coal and Goose creeks; Oakley. **Development:** 1425 ft. well. **Mineral sought:** Oil and gas.

MELCHER MINING & MILLING CO.

Office: 503 McIntyre Bldg., Salt Lake City, Utah. **Officers:** Samuel McIntyre, Sr., Pres.; Roy A. McIntyre, Sec., both of Salt Lake City. **Inc.:** May 2, 1899. **Capital:** 500,000 shares; par value 10c; all shares issued. **Development:** By 2 tunnels: No. 1, 3300 ft. long; No. 2, 1600 ft. long. **Remarks:** Annual labor only.

SILVER HILLS MINING CO.

Office: 1258 Crandall Ave., Salt Lake City, Utah. **Officers:** W. J. Burridge, Pres.-Mgr., Black Pine; L. M. Francis, Sec., Salt Lake City, Utah. **Inc.:** Mar. 31, 1920. Charter forfeited Nov. 30, 1926. **Capital:** 800,000 shares; par value 10c; 532,102 shares issued. **Property:** Busy Bee and Joven groups; 30 unpatented mining claims, Black Pine dist.; Black Pine. **Development:** 3 tunnels, 1 shaft; approximately 2600 ft. total development. **Ore:** Lead-silver. **Men employed:** Average, 3. **Remarks:** Small amount of development work during the summer months.

CLARK COUNTY

Clark is one of the southeastern counties, adjoining and lying east of Lemhi and Butte counties, and bounded on the north by the State of Montana, on the east by Fremont County, and on the south by Jefferson County. It contains an area of 1778 square miles and was accredited with a population of 1886 in the 1920 census. Dubois is the principal town and county seat.

The Pocatello-Butte division of the O. S. L. Railroad, and the Idaho-Montana State highway traverse the county north and south, thus giving it good transportation facilities.

The Lemhi Mountains, which extend into the northwest corner of the county, constitute the principal mining district. This district is named from Birch Creek, which flows in a southern direction and which divides the district. The western part is an extension of the Dome, or Hamilton, district of Butte County, and the eastern part is an extension of the Nicholia district of Lemhi County. The ores found throughout this area are lead-silver, copper-silver, and zinc. The deposits have been partially developed and a small tonnage has been marketed.

Deposits of coal and bentonite of sufficient extent to be of commercial importance occur in the Beaver Head Mountains, the summit of which is the state line between Idaho and Montana.

The geography, geology, and ore deposits of the Birch Creek district are fully described, together with maps and illustrations, in a publication issued during the year by the Idaho Bureau of Mines and Geology as Pamphlet No. 27: "Geology and Ore Deposits of the Birch Creek District, Idaho," by P. J. Shenon.

CLEARWATER COUNTY

Clearwater is one of the large northern counties, being bounded on the north by Shoshone County, on the east by the State of Montana, on the south by Idaho County, and on the west by Lewis, Nez Perce, and Latah counties. It has an area of 2508 square miles and was accredited with a population of 4993 in the 1920 census. Orofino, which is on the Clearwater River, near the western border, is the largest town and county seat. Except a small area adjacent to Orofino, which is devoted to agriculture, the entire county is mountainous and heavily timbered. The largest body of virgin white pine timber in the United States is located in this county.

It is served by three State highways which are partly constructed, by good county-maintained roads, and by the Lewiston-Stites branch of the Northern Pacific Railroad, which follows the Clearwater River.

Pierce City, which is the principal mining district in the county, was the scene of the first gold discovery in Idaho. This discovery was made in 1860, and the ensuing stampede soon crowded the district and the overflow spread into other sections. The stampede and resulting overflow formed the nucleus of the State, and shortly thereafter the Territory of Idaho was formed. Practically all the placer gold that could be recovered by hand methods or hydraulicking was exhausted years ago, and all recent operations have been devoted to dredging and lode mining.

Gold—placer and lode—silver, monazite, and copper are the principal minerals found in the Pierce City district. Lead, zinc, and silver occur in the Neva Hill section, and placer gold is still found in some of the isolated sections.

The lead-silver deposits in the Neva Hill section, near Elk River, received a small amount of attention, the principal operations being those of the Ruby Creek Mining Co.

Near Orofino the Clearwater Lime Products Co., a new enterprise based on the mining and marketing of a high-grade white crystalline limestone, installed its plant and equipment and produced and marketed a substantial tonnage during the year. Its products are sold principally to the agricultural industries.

ALDER CREEK MINING CO.

Office: 404 Court House, Duluth, Minn. **Officers:** Thos. Owens, Pres., Two Harbors, Minn.; H. J. Grannis, Sec., Duluth, Minn. **Inc.:** Apr. 4, 1902. **Capital:** 200,000 shares; par value $1; 178,000 shares issued. **Property:** 800 acres patented land, Pierce City dist.; Orofino. **Ore:** Placer gold.

AMERICAN PLACER MINING CO., LTD.

Office: Peyton Bldg., Spokane, Wash. **Officers:** J. M. Porter, Pres.; D. W. Porter, Sec., both of Spokane. **Inc.:** Nov. 18, 1893. **Capital:** 500,000 shares; par value $1; all shares issued. **Property:** 3 patented, 1 unpatented claim; Pierce.

CLEARWATER LIME PRODUCTS CO.

Office: 422 Breier Blk., Lewiston. **Officers:** Walter Harr, Pres., Orofino; L. A. Strickfaden, Sec., Lewiston; Elmer Harr, Mgr., Orofino. **Inc.:** Sept. 4, 1928. **Capital:** 500,000 shares; par value $1; 150,000 shares issued. **Property:** 247 acres held under lease and 80 acres patented land, unorganized dist.; Orofino. **Development:** Quarry. **Plant:** MINE: Electrically-driven compressor; complete mining equipment. MILL: Electrically-driven crusher, pulverizer, and screens. **Ore:** Limestone. **Men employed:** Average, 8. **Remarks:** A new enterprise based on the mining and marketing of a high-grade white crystalline limestone, which is sold principally to the agricultural industries. Plant and equipment were installed and a substantial tonnage was produced and marketed during the year.

CLEARWATER PLACER MINING CO.

Office: 601 Hutton Bldg., Spokane, Wash. **Officers:** H. E. Rhodehamel, Pres., Hyde Bldg., Spokane, Wash.; Chas. H. Ennis, Sec., 601 Hutton Bldg., Spokane, Wash. **Inc.:** Aug. 21, 1923. **Capital:** 1,400,000 shares; par value 10c; all shares issued. **Property:** 8 unpatented placer claims, 160 acres, Pierce City dist.; Pierce. **Ore:** Placer gold. **Remarks:** Annual labor only.

COBRA MINING & MILLING CO.

Office: Lewiston. **Officers:** Robert Anderson, Pres.; W. C. Kirby, Sec.-Mgr., both of Lewiston. **Inc.:** May 7, 1925. **Capital:** 5,000,000 shares; par value 1c; 305,500 shares issued. **Property:** Cobra group; 4 unpatented claims, Pierce City dist.; Pierce City. **Ore:** Copper.

INDEPENDENCE PLACER MINING CO., LTD.

Office: Wallace. **Officers:** Wm. Fahle, Pres.-Mgr.; Hugh Toole, Sec., both of Wallace. **Inc.:** Oct. 25, 1906. **Capital:** 1,000,000 shares; par value $1; 888,893 shares issued. **Property:** 16 unpatented claims, Moose City dist.: Rivulet, Mont. **Men employed:** Average, 7. **Ore:** Placer gold. **Remarks:** Operations conducted for a period of 190 days. A stock assessment of 6 mills was levied on June 25.

OXFORD COPPER MINING CO., LTD.

Office: Moscow. **Officers:** Samson Snyder, Pres., Orofino; L. F. Parsons, Sec., Moscow. **Inc.:** Apr. 10, 1907. **Capital:** 1,000,000 shares; par value $1; 611,185 shares issued. **Property:** 6 unpatented claims, Pierce City dist.; Pierce. **Development:** Approximately 500 ft. of underground workings. **Plant:** Steam-driven hoist. **Ore:** Copper. **Remarks:** Annual labor only.

RUBY CREEK MINING CO.

Office: Bovill, Idaho. **Officers:** P. A. Hughes, Pres.; J. M. Evans, Sec.; James Gilroy, Mgr., all of Bovill. **Inc.:** Sept. 14, 1925. **Capital:** 1,500,000 shares; par value 10c; 667,095 shares issued. **Property:** Ruby Creek group; 20 unpatented claims, Ruby Creek dist.; Bovill. **Development:** By 1 tunnel 665 ft. long, and a vertical shaft 170 ft. deep. **Plant:** Steam-driven compressor; complete mining equipment, and camp. **Ore:** Lead-zinc-silver. **Men employed:** Average, 5. **Remarks:** Operated throughout the year by lessees, who reported the development of a substantial tonnage of ore.

CUSTER COUNTY

Custer County is bounded on the north by Lemhi County, on the east by Butte, on the south by Blaine, and on the west by Boise and Valley counties. Its principal area comprises the drainage basins of the headwaters of the Salmon River, Big Lost River, and Little Lost River. It has an area of 4921 square miles, and was accredited with a population of 3550 in the 1920 census, or 0.7 persons to the square mile. A comparison of the area and density of population with the State of Connecticut, which contains 4845 square miles and a population of 286.4 persons to the square mile, conveys a good idea of the size of Custer County and its lack of population. It is one of the south-central counties, and the area within its borders comprises the greater part of the region known as "Central Idaho's Mineral Empire."

It is principally a mining county and always ranks as one of the principal mineral-producing counties of the State. It is also noted for its agricultural and stockraising industries, particularly sheep, as it is one of the largest sheep raising sections in the State.

The county is served by the Blackfoot-Mackay branch of the O. S. L. Railroad, by the Sawtooth Park and the Lost River State highways and by well-maintained county and Forest Service roads, which extend into all the various mining districts. The roads are kept in good repair and are open to travel during the larger part of the year. Mackay, the terminus of the railroad, is the largest town and the supply point for most of the mines. Challis, which is 60 miles northwest of Mackay, is the county seat and oldest settlement.

The principal mineral resources are lead, silver, copper, gold—placer and lode, zinc, antimony, molybdenum, tungsten, graphite, bentonite, and garnet. The deposits are widely distributed throughout the county, and many of them offer exceptionally favorable opportunities to prospectors and development companies. Excepting the flat land and river bottoms, which are suitable to dredging and which fully justify investigation, practically all the placer mines are exhausted. The diversity of mineralization and the favorable geological conditions are attracting some of the largest organizations in the United States to this county, and many resulting new discoveries fully prove the possibilities that are in store for those who possess a little courage.

The most important event in this county during 1928 was the acquisition of the Empire copper mine at Mackay by the Mackay Metals in June. After this new company acquired control of the property, the mine and mill plants were entirely rebuilt, the mine rehabilitated, an active mine development campaign was started and operations commenced by a large number of lessees. The development work opened up a substantial tonnage of new ore, and at the end of the year the mine and mill were practically on capacity production. The Camp Bird group near Clayton was acquired by H. B. Kingsbury of Wallace and Wilbur Greenough of Spokane, who immediately started mine development and the construction of a hydroelectric power plant. After the plant is completed, during the early part of 1929, it is proposed to develop the property by a new 400-foot shaft.

The Livingston Mines Corporation improved and enlarged its mine and mill plants and proved the extent of its ore reserves through additional development at depth. This company is the largest producer of lead and zinc ore and concentrates in southern Idaho and maintains one of the largest pay rolls. The Twin Apex Mining Co. on Squaw Creek near Clayton, the Aztec Mining & Milling Co. on Fourth of July Creek, and the Crater Mines Co. on Lake Creek conducted active operations during the summer months. A large amount of new development work was performed by the MacGinniss-Walker Metals Co. at the Phi Kappa group and the Black Rock group, both on the head of Big Lost River, and the Franklin group on Yankee Fork. The Red Bird mine of the Ford Motor Co. was idle throughout the year, while the only operation conducted at the Ramshorn was that conducted by lessees, who produced and marketed a small tonnage of high-grade hand-sorted ore,

AZTEC MINING & MILLING CO.

Office: 839 W. Lander St., Pocatello. **Officers:** D. C. Ray, Pres.; Ben F. Anderson, Sec., both of Pocatello; T. W. Galigher, Mgr., Boise. **Inc.:** May 26, 1917. Capital stock increased Feb. 2, 1925. **Capital:** 50,000 shares; par value $1; 34,000 shares issued. **Property:** Kingfisher group; 3 unpatented claims, Stanley dist.; Stanley. **Development:** Inclined shaft 650 ft. long. Total development, approximately 1750 ft. **Plant:** MINE: 25-h. p. steam-driven hoist. MILL: Partly installed Gibson mill and amalgamation plates. **Remarks:** Small amount of labor in excess of annual requirement.

BAYHORSE MINES, INC.

Office: Mackay. **Officers:** Wayne Darlington, Pres.; Chase A. Clark, Sec.; R. R. Huffman, Mgr., all of Mackay. **Inc.:** Nov. 12, 1927. **Capital:** 500,000 shares; par value $1. Increased on June 22, 1928, to 1,000,000 shares; par value $1; shares issued, unknown. **Property:** Beardsley group; 3 patented, 5 unpatented claims, held under lease and option; Bay Horse dist.; Challis.

BURNS MINING & MILLING CO.

Office: Meridian. **Officers:** G. W. Parkin, Pres., J. M. Evans, Sec., both P. O. Box 63, Meridian. **Inc.:** May 3, 1911. **Capital:** 500,000 shares; par value $1; 332,819 shares issued. **Property:** Burns group; 7 unpatented claims, Seafoam dist.; Stanley. **Development:** Approximately 750 ft. of workings. **Ore:** Lead-silver, gold. **Remarks:** Annual labor only.

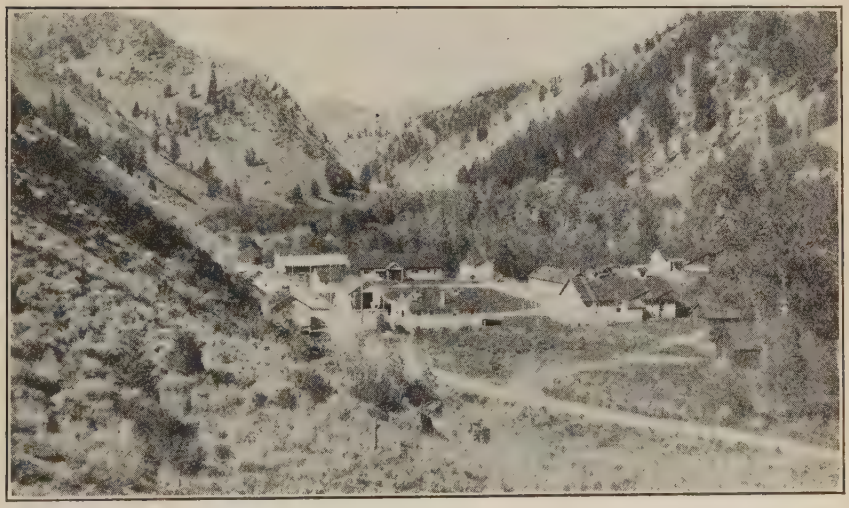
CAMP BIRD GROUP

Owners: H. B. Kingsbury, Wallace, and Wilbur Greenough, Spokane, Wash. **Property:** Camp Bird group; 7 unpatented claims, Kinnikinnick Creek; Bay Horse dist.; Clayton. **Development:** Principally by 1 tunnel 800 ft. long. **Plant:** MINE: Small gas-driven Sullivan compressor; complete mining equipment and camp. MILL: Small concentrator. **Ore:** Lead-silver. **Men employed:** Average, 10. **Remarks:** During the closing months of the year, work was started on the construction of a small hydroelectric power plant. After this plant is completed, the owners expect to sink a 400-ft. vertical shaft to further prove the extent of the substantial showing of ore which has been exposed in the tunnel.

CENTRAL IDAHO MINING CO.

Office: Shelley. **Officers:** Roy Young, Pres.-Mgr.; A. J. Mickelson, Sec., both of Shelley. **Inc.:** Jan. 20, 1927. **Capital:** 50,000 shares; par value $1; 19,700 shares issued. **Property:** Muley Creek group; 11 unpatented claims, Yankee Fork dist.; Clayton. **Ore:** Placer gold. **Remarks:** Annual labor only since August, 1927.

CRATER MINES, INC.



Office: Rigby. **Officers:** Harry S. Thayer, Pres.-Mgr., Idaho Falls; Geo. E. Hill, Sec., Rigby. **Inc.:** Aug. 30, 1927. **Capital:** 1,000,000 shares; par value $1; 515,000 shares issued. **Property:** Crater group; 9 unpatented claims at the head of Slate Creek, Boulder dist.; Mackay; held under lease and option. **Development:** By 1 tunnel. **Plant:** Small gas-driven compressor. **Ore:** Lead-antimony-silver. **Men employed:** Average, 6. **Remarks:** New camp buildings were constructed and equipment was installed during the latter part of 1927. Work continued without interruption throughout 1928.

EAST STAR MINING CO.

Office: Downey. **Officers:** Albert Christenson, Pres.; G. T. Hyde, Sec., both of Downey; L. W. Johnson, Mgr., Moore. **Inc.:** Apr. 16, 1924. **Capital:** 1,000,000 shares; par value 25c; 800,000 shares issued. **Property:** East Star group; 4 unpatented claims, Alder Creek dist.; Mackay. **Development:** By 1 tunnel 290 ft. long. **Remarks:** Small amount of development work throughout the year, funds for which were derived from stock assessments. Press reports during the latter part of the year were to the effect that a new showing of high-grade copper ore was disclosed.

FORD MOTOR CO.

Office: Highland Park, Mich. **Officers:** Edsel B. Ford, Pres.; B. J. Craig, Sec., both of Highland Park, Mich. **Inc.:** Filed in Idaho, Jan. 6, 1925. **Capital:** 1,000,000 shares; par value $100. **Property:** Red Bird and Silver Rule groups; 44 patented claims and 6 millsites, Bay Horse dist.; Clayton; R. R. Mackay, 70 miles. **Development:** Principal development on Red Bird group consists of 4 tunnels: No. 1, 500 ft. long; No. 2, 1300 ft. long; No. 4, 510 ft. long; No. 9, 2127 ft. long, giving a total depth of 900 ft. on the vein; total development approximately 23,000 ft. **Plant:** 2 1-R semi-Diesel engines, type POC-2, direct connected to compressors; complete mining equipment including 2 diamond drills; shops and mining camp consisting of 11 buildings. **Ore:** Lead-silver. **Men employed:** 1 watchman. **Remarks:** Idle.

MINE CAMP: FORD MOTOR CO.

GREYHOUND MINING & MILLING CO., LTD.

Office: Gem Bldg., Boise. **Officers:** W. C. Annett, Pres.; Edward Smith, Sec., both of Boise. **Inc.:** Sept. 2, 1902. **Capital:** 1,500,000 shares; par value $1; 1,483,299 shares issued. **Property:** Greyhound group; 7 patented claims, Seafoam dist.; Stanley. **Plant:** Stamp mill, 10 1050-lb. stamps; crusher; 2 Dorr classifiers; 4 vanners and a small circular blast furnace. **Remarks:** Small tonnage of ore was produced and marketed by lessees during the year.

HORSE SHOE COPPER CO., LTD.

Office: Mackay. **Officers:** Geo. L. Morgan, Pres.-Mgr.; D. V. Archbold, Sec., both of Mackay. **Inc.:** Dec. 10, 1903. **Capital:** 1,000,000 shares; par value $1; 916,150 shares issued. **Property:** Horse Shoe group; 20 unpatented claims, Alder Creek dist.; Mackay. **Development:** This mine is developed principally by 3 tunnels and 1 vertical shaft, 350 feet deep, and a large amount of crosscuts, drifts and raises, totalling over 2000 ft. **Plant:** MINE: Electrically-driven 2-drill compressor and hoist. Complete mine camp. **Ore:** Lead-zinc-silver, copper-silver. **Remarks:** Property under lease and option to Ray Strunk of Mackay.

IDAHO SILVER & LEAD MINES, INC.

Office: 139 N. Clark St., Chicago, Ill. **Officers:** James R. Howe, Pres.; R. H. Van Meter, Sec., both of Chicago; Dr. C. S. Ellis, Mgr., Challis. **Inc.:** May 10, 1928. **Capital:** 2,000,000 shares; par value $1; all shares issued. **Property:** Vulture group; 13 unpatented claims, Stanley dist.; Obsidian. **Ore:** Lead-silver. **Men employed:** Average, 10. **Remarks:** A new organization which commenced development work during the year.

IVANHOE MINING CO.

Office: 485 California St., San Francisco, Cal. **Officers:** Harry L. Tevis, Pres.; William Letson, Sec., Both of San Francisco, Cal. **Inc.:** Filed in Idaho, July 28, 1909. **Capital:** 2500 shares; par value $1; all shares issued. **Property:** Badger group; 6 patented claims, Yankee Fork dist.; Clayton. **Remarks:** Idle for many years.

KAY DEVELOPMENT CO., INC.

Office: 253 Broadway, New York. **Officers:** Wayne Darlington, Pres.-Mgr., Mackay; Kenneth O'Brien, Sec., New York City. **Inc.:** March 17, 1924. **Capital:** 5000 shares; par value $100; all shares issued.

LIVINGSTON MINES CORPORATION

Office: 25 Broad St., New York. **Officers:** A. W. Walker, Pres.-Mgr., Mackay; L. M. Turner, Sec., New York. **Inc.:** July 23, 1923. **Capital:** 2,000,000 shares; par value $1. Capitalization increased on Sept. 21, 1926, to 3,000,000 shares; par value $1; all shares issued. **Property:** Livingston group; 7 patented, 16 unpatented claims, Boulder dist.; Mackay, 62 miles. **Development:** Principally by 7 tunnels, averaging from 200 to 2400 ft. in length; No. 2, or Livingston, tunnel is 2000 ft. long, in which are 3000 ft. of crosscuts and drifts. Total development on Livingston lode, approximately 22,000 ft. **Plant:** MINE: 3 electrically-driven compressors, a 12x14 Sullivan, a 10x10 I-R, and a 12x16 I-R; storage-battery locomotive haulage; complete mining equipment and mine camp; 3-mile aerial tramway connecting Livingston No. 2 tunnel with the mill. MILL: 300-ton concentrator, including flotation, Blake crusher, Symonds disc-crusher, Davis rolls, 2 6-ft. Hardinge ball mills, 6 Wilfley tables, Callow flotation, complete mill camp. POWER PLANT: 380-h. p. hydroelectric power plant, supplemented with a 250-h. p. I-R vertical Diesel engine; 8-mile electric transmission and telephone lines connecting power plant, mill and mine. **Ore:** Lead-silver. **Men employed:** Average, 93. **Remarks:** This company maintained the largest payroll of any mine in southern Idaho throughout the year. In addition to continuous production, it re-designed and rebuilt its mill, installed an electrically-driven hoist, sank a vertical shaft 400 ft. deep in No. 2 tunnel, performed a large amount of lateral development work, and maintained over 20 miles of its road. Ore is hauled by motor trucks from the mill to Mackay by an independent contractor.

LOON CREEK HYDRAULIC PLACER MINING CO., LTD.

Office: Judge Bldg., Salt Lake City, Utah. **Officers:** J. Frank Judge, Pres., John J. Harvey, Sec., both of Salt Lake City; John P. Boyle, Mgr., Stanley. **Inc.:** May 17, 1905. **Capital:** 300,000 shares; par value $1; all shares issued. **Property:** 4 unpatented placer claims, Loon Creek dist.; Stanley. **Plant:** 4000 ft. timber flume, 5 ft. wide and 3 ft. high; two-thirds of a mile of ditch; sawmill, and complete mine camp. **Remarks:** This company owns a large tract of placer ground suitable for hydraulic mining. Annual labor only.

LUCKY STRIKE MINING CO. NO. 1

Office: Hollister. **Officers:** Henry Jones, Pres.; A. F. Craven, Sec.; Ora Jones, Mgr., all of Hollister. **Inc.:** April 27, 1917. **Capital:** 500,000 shares; par value $1; 465,000 shares issued. **Property:** Lucky Strike group; 5 unpatented claims, Joe's Gulch, Stanley dist.; Stanley. **Development:** By 3 tunnels; total development approximately 1000 ft. **Ore:** Gold. **Remarks:** Idle.

MAC GINNISS-WALKER METALS CO.

Office: Room 1618, 25 Broad St., New York City. **Officers:** John MacGinniss, Pres.; James A. Dayton, Sec., both of New York; A. W. Walker, Mgr., Mackay. **Inc.:** May 25, 1925. Charter forfeited Nov. 30, 1928. **Capital:** 3,000,000 shares; par value $1; all shares issued.

WHY NOT GROUP

Property: 2 patented, 3 unpatented claims, Yankee Fork dist.; Clayton. **Development:** Principally by 1 tunnel, which is over 700 ft. long. **Ore:** Gold-silver. **Men employed:** Average, 4. **Remarks:** Work was maintained throughout the year in extending the principal tunnel, which is a crosscut.

PHI KAPPA GROUP

Property: Phi Kappa group, 1 patented, 8 unpatented claims; Alto dist.; Mackay. R. R. Ketchum, 15 miles. **Development:** By 2 tunnels: No. 1, 225 ft. long; No. 2, 2100 ft. long. **Plant:** Gas-driven compressor, complete mining equipment and camp. **Ore:** Lead-zinc-silver. **Men employed:** Average, 6. **Remarks:** Continuous development throughout the year.

BLACK ROCK GROUP

Property: 17 unpatented claims on Big Fall Creek, Alto dist.; Mackay. **Development:** By 1 tunnel 250 ft. long. **Plant:** 2 gas-driven portable compressors and complete mining equipment. **Ore:** Lead-silver. **Men employed:** Average, 3. **Remarks:** Active development work throughout the year.

MACKAY METALS

Office: Mackay. **Officers:** Chase A. Clark, Pres.; W. E. Narkaus, Sec.-Mgr., both of Mackay. **Inc.:** June 4, 1928. **Capital:** 1,500,000 shares; par value $1; 1,400,000 shares issued. **Property:** Empire Copper group; 20 patented, 10 unpatented claims, Alder Creek dist.; Mackay. **Development:** Over 20 miles of underground workings, the principal entries being the Cossack and Alberta tunnels; the Cossack is 650 ft. below the Alberta tunnel; the principal shaft is the Empire, which is in the Alberta tunnel and extends 350 ft. below. **Plant:** MINE: Air-driven hoist; 20-drill, steam-driven Laidlaw-Dunn-Gordon compressor, and an aerial tramway 16,300 ft. long connecting mine with railroad. MILL: 200-ton concentrator, consisting of fine grinding and flotation. **Ore:** Copper-silver-gold. **Men employed:** Average, 100. **Remarks:** A new organization. The property was acquired in June, after which the mine, mine plant, and equipment were entirely rehabilitated and the mill was repaired. After this an active development campaign was started, part of which included prospecting by "long drill holes" . A large part of the mine was subleased, and during the closing months of the year ore produced by company and lessee operations was sufficient to maintain the mill on a 24-hour basis.

MONTE CRISTO GOLD MINES CO.

Office: Pocatello. **Officers:** C. A. Garrett, Pres.-Mgr.; E. W. Larsen, Sec., both of Pocatello. **Inc.:** March 19, 1917. **Capital:** 1,000,000 shares; par value $1; 680,789 shares issued. **Property:** Monte Cristo group; 10 unpatented claims, Loon Creek dist.; Clayton. **Development:** By 2 tunnels: No. 1, 340 ft. long; No. 2, 780 ft. long. **Ore:** Gold. **Remarks:** Annual labor only.

PHEMSPACE MINES CO.

Office: 721 Seventh St., Rochelle, Ill. **Officers:** E. M. Wagner, Pres., P. A. Wagner, Sec., both of Rochelle, Ill. **Inc.:** Jan. 3, 1906. **Capital:** 1,000,000 shares; par value $1; 70,000 shares issued. **Property:** Phemspace group; 14 unpatented claims, Stanley dist.; Stanley. **Development:** By 5 tunnels, totaling approximately 1400 ft.

PIG TAIL PLACER, INC.

Office: Twin Falls. **Officers:** Geo. R. Easley, Pres.-Mgr.; E. M. Sweeley, Sec., both of Twin Falls. **Inc.:** Mar. 30, 1928. **Capital:** 25 shares; no par value; 22 shares issued. **Property:** Pig Tail Placer group; 7 unpatented claims, Stanley dist.; Obsidian. **Ore:** Placer gold. **Men employed:** Average, 3. **Remarks:** Commenced work on installation of hydraulicking equipment during the summer months.

RAMSHORN MINES CO.

Office: 321 Felt Bldg., Salt Lake City, Utah. **Officers:** O. J. Salisbury, Pres.; C. B. Felt, Sec., both of Salt Lake City, Utah. **Inc.:** July 14, 1919. **Capital:** 150,000 shares; par value $10; all shares issued. **Property:** Ramshorn and Beardsley groups; 14 patented, 2 unpatented claims, Bay Horse dist.; Bay Horse. **Development:** Approximately 6½ miles of underground workings with 10 intermediate levels. **Plant:** MINE: Laidlaw-Dunn-Gordon duplex 13x8x10 compressor, electrically driven; complete mine equipment and camp. MILL: 60-ton fine grinding flotation, gyratory crusher; primary and secondary rolls; ball mill; Dorr classifier; Fagergren and Janney flotation cells; American vacuum filter; dryer. Entire mill electrically driven. **Ore:** Silver-copper, lead. **Men employed:** 10 lessees. **Remarks:** Property operated throughout the year by lessees, who produced and marketed a small tonnage of ore.

SALMON RIVER MINING CO.

Office: c|o Terre Haute Nat'l Bank & Trust Co., Terre Haute, Ind. **Officers:** John T. Beasley, Pres.; William K. Hamilton, Sec., both of Terre Haute, Ind. **Inc.:** July 6, 1910. **Capital:** 500,000 shares; par value $1; 400,000 shares issued. **Property:** Pacific group; 12 patented claims, Bay Horse dist.; Bay Horse. **Remarks:** Idle for 14 years.

SEAFOAM MINES CORPORATION

Office: 1903 Penn Ave., Pittsburgh, Pa. **Officers:** J. C. Hungerman, Pres.; George L. Lafbury, Sec., both of Pittsburgh, Pa. **Inc.:** Oct. 17, 1923. **Capital:** 500,000 shares; no par value; 350,000 shares issued. **Property:** 16 patented, 1 unpatented claim, Seafoam dist.; Stanley. R. R. Ketchum, 104 miles. **Development:** Total development approximately 2300 ft., the principal part of which is confined to the Silver King claim, where it opens the vein 200 ft. in depth. **Plant:** MINE: Electrically-driven 8x10 I-R compressor; steel sharpener; complete mining equipment; steam-driven saw-mill; mine camp consisting of a large boarding house, 2 two-story bunkhouses, and 10 residences. MILL: 50-ton amalgamation, including fine grinding and table concentration. POWER PLANT: 230-h. p. hydroelectric power plant, operating under a 270-ft. head through a 3400-ft. flume; 4-mile transmission line. **Ore:** Gold-silver-lead. **Men employed:** Average, 15. **Remarks:** 30 men were employed until July, at which time financial difficulties were encountered and all operations suspended. In November 3 men were employed in development work.

TWIN APEX MINES CO.

Office: 423 Ness Bldg., Salt Lake City. **Officers:** H. S. Brooks, Pres.; G. F. McGonagle, Sec.; A. G. Gutheil, Mgr., all of Salt Lake City. **Inc.:** Sept. 19, 1925. **Capital:** 1,000,000 shares; par value 5c; 730,000 shares issued. **Property:** Twin Apex group; 4 patented, 11 unpatented claims, on Squaw Creek, Bay Horse dist.; Clayton. **Development:** Principally by 2 tunnels: No. 2, 550 ft. long; No. 3, or crosscut, 1450 ft. long. **Plant:** Gas-driven 8x9 Sullivan compressor; complete mining equipment and camp. **Ore:** Lead-silver. **Men employed:** Average, 7. **Remarks:** Active work throughout the greater part of the year in extending No. 3 tunnel.

WHITE KNOB MINING CO.

Office: Newhouse Bldg., Salt Lake City, Utah. **Officers:** D. D. Muir, Jr., Pres.; W. W. Rager, Sec., both of Salt Lake City, Utah. **Inc.:** Aug. 23, 1919. **Capital:** 500,000 shares; par value $1; 127,510 shares issued. **Property:** White Knob group; 3 unpatented claims, Alder Creek dist.; Mackay. **Development:** Principally by 2 tunnels and 1 vertical shaft 250 feet deep. **Plant:** 40-h. p. gas-driven hoist. **Ore:** Lead-silver. **Remarks:** Operated by lessees who made a number of shipments during the year.

YANKEE FORK PLACER CO., LTD.

Office: 605 Eastman Bldg., Boise. **Officers:** James H. Hawley, Pres.; James H. Hawley, Jr., Mgr., both of Boise. **Inc.:** April 7, 1906. **Capital:** 400,000 shares; par value $1; all shares issued. **Property:** Bonanza group; 5 patented placer claims; 320 acres on Yankee Fork Creek, Yankee Fork dist.; Clayton.

ELMORE COUNTY

Elmore is one of the southwestern counties, being bounded on the south by Owyhee, on the west by Ada, on the north by Boise, and on the east by Blaine, Camas, and Gooding counties. A large part of the drainage basin of the Boise River is included within its 2808 square miles, which was accredited with a population of 5087 in the 1920 census. The chief industries are stockraising—principally sheep—farming, and mining.

The southern part of the county is served by the main line of the O. S. L. Railroad and the principal east-west State highway, the Old Oregon Trail; a well built and maintained system of county roads extends into all the various mining districts and sections. Mountain Home is the largest town and county seat.

The principal mineral resources are gold, silver, copper, lead, zinc, arsenic, molybdenum, diatomaceous earth, and potassium nitrate.

In past years this county was a noted producer of high-grade gold-silver ores and placer gold, particularly when the mines in the Atlanta and Rocky Bar districts were being worked. The placer ground which could be hydraulicked has long been exhausted, and the quartz mines have been dormant for years, having been closed down either through litigation, lack of power, or finances. These districts offer many opportunities to development companies and, since power is within easy reach from Featherville, there appears to be no reason why the mines are not receiving more attention.

The South Park Dredging Co. at Featherville continued operations until June, at which time they were temporarily suspended. This enterprise is a big factor in the welfare of the district and is attracting attention to the mineral resources and possibilities of this part of the State.

The Rocky Bar district witnessed no improvement over that of the previous year in the starting of new enterprises, and no work of any importance was performed.

The Atlanta district witnessed a little investigation, but no new enterprises were started. Other than repair work, the Boise-Rochester mine remained idle.

APEX GOLD MINING CO.

Office: Box 165, Nampa. **Officers:** Dr. J. C. Lay, Pres., M. A. Cook, Sec., both of Nampa. **Inc.:** Oct. 15, 1926. **Capital:** 400,000 shares; par value $1; all shares issued. **Property:** West Ophir group; 5 unpatented claims; Rocky Bar. **Development:** By 5 tunnels, totaling about 800 ft. **Ore:** Gold. **Remarks:** Annual labor only.

BLACKSTONE MINING CO., LTD.

Officers: James H. Hawley, Pres.; Charles W. Mack, Sec., both of Boise. **Inc.:** Dec. 26, 1899. **Capital:** 1,000,000 shares; par value 10c; shares issued, unknown. **Property:** 5 patented claims, Blackstone dist.; Hill City.

BLAKE'S GULCH GOLD MINING CO.

Office: Mountain Home. **Officers:** Seth Harris, Pres.-Mgr.; C. B. Clays, Sec., both of Mountain Home. **Inc.:** May 11, 1927. **Capital:** 100,000 shares; par value $1; 63,400 shares issued. **Property:** Commonwealth group; 2 unpatented claims, Bear Creek dist.; Rocky Bar. **Development:** By 2 tunnels: No. 1, 227 ft.; No. 2, 600 ft. **Plant:** Gas-driven compressor. **Ore:** Gold. **Men employed:** Average, 2. **Remarks:** Active work throughout the year.

CONSOLIDATED MINES SYNDICATE

Office: 623 First Nat'l Bank Bldg., Boise. **Officers:** Frank E. Johnesse, Pres.-Mgr.; Wm. MacLeod, Sec., both of Boise. **Inc.:** May 6, 1924. **Capital:** 10,000 shares; no par value. On Aug. 15, 1924, the capitalization was changed to 10,000,000 shares, $2.50 par value; and on May 2, 1925, capitalization was decreased to 10,000,000 shares, par value $1; 2,449,004 shares issued. **Property:** Revenue group; 11 unpatented claims, Volcano dist.; Hill City. **Remarks:** Idle.

DALEY CONSOLIDATED MINES CO.

Office: Mountain Home. **Officers:** Daniel Reber, Pres.-Mgr.; Max Wagener, Sec., both of Mountain Home. **Inc.:** Nov. 1, 1913. Charter forfeited Nov. 30, 1927. **Capital:** 1,500,000 shares; par value $1; 1,200,000 shares issued. **Property:** Daley group; 50 unpatented claims, Dixie, unorganized dist.; Bennett. **Development:** Approximately 4500 ft. of underground workings, the principal of which are: A tunnel 1800 ft. long; a vertical shaft 100 ft. deep; and an inclined shaft 460 ft. long with 5 intermediate levels. **Plant:** Two 40-h. p. boilers; steam-driven hoist and compressor; complete mining equipment and camp. **Ore:** Gold-lead-silver. **Remarks:** Annual labor only.

FRANKLIN CONSOLIDATED GOLD MINES CO.

Office: Box 1262, Boise. **Officers:** John J. Stanford, Pres., Spokane, Wash.; Fred T. Kelly, Sec.-Mgr., Boise. **Inc.:** Dec. 22, 1925. **Capital:** 1,250,000 shares; par value $1; 634,400 shares issued. **Property:** Franklin group; 2 patented, 4 unpatented claims, held under lease and option, Pine Grove dist.; Pine. **Development:** Approximately 3000 ft. of underground workings, the principal of which is No. 3 tunnel, 860 ft. in length. **Plant:** An old 10-stamp mill including cyanide equipment. **Ore:** Gold. **Men employed:** Average, 2. **Remarks:** Owing to litigation, only the necessary annual labor was performed.

GAS DOME OIL CO.

Office: 222 Eastman Bldg., Boise. **Officers:** A. Beverly Howard, Pres.-Mgr., Boise; Freda Maxwell, Sec., Buhl. **Inc.:** June 20, 1927. **Capital:** 500,000 shares, par value $1; 153,125 shares issued. **Property:** Oil and gas leases on patented farm lands near Hammett. **Mineral sought:** Oil and gas.

GEORGE F. ROTH CO.

Office: P. O. Box 147, Rochester, N. Y. **Officers:** Walter J. Duffy, Sec., Rochester, N. Y. **Inc.:** June 17, 1909. **Capital:** 2500 shares; par value $100; 2102 shares issued. **Property:** Homestake group; 7 patented, 3 unpatented claims, Neal dist.; c|o Mayfield Stage, Boise. **Ore:** Gold. **Remarks:** Idle.

IDAHO GOLD CORPORATION

Office: Rocky Bar. **Officers:** George Graham Rice, Pres.; Rose McKernan, Sec., both of New York City; Norman D. McLeod, Mgr., Rocky Bar. **Inc.:** July 10, 1923. Charter forfeited Nov. 30, 1928. **Capital:** 5,000,000 shares; par value 10c; shares issued, unknown. **Property:** 41 unpatented claims, Bear Creek dist.; Rocky Bar. **Development:** By 3 tunnels. **Ore:** Gold.

LA TRINIDAD MINING CO.

Office: Las Vegas, Nev. **Officers:** E. P. Jeanes, Pres., J. F. Hesse, Sec., both of Las Vegas, Nev. **Inc.:** Filed in Idaho Sept. 9, 1926. **Capital:** 2,500,000 shares; par value $1; 1,500,000 shares issued. **Property:** Black Warrior Placers; 12 unpatented claims, held under lease and option; Black Warrior dist.; Atlanta. **Plant:** Saw-mill and complete hydraulic mining equipment. **Ore:** Placer gold. **Men employed:** Average, 4. **Remarks:** Small amount of work in the summer months. During the closing part of the year difficulties were encountered and the company was being reorganized as Black Warrior Mines, Inc.

LITTLE QUEEN GROUP

Owner: E. F. Money, 937 34th St., Seattle, Wash. **Inc.:** Not incorporated. **Property:** 3 unpatented claims, Middle Boise dist.; Atlanta. **Development:** Principally by 1 tunnel 100 ft. long. **Plant:** 7-ton Ellis mill and amalgamation. **Ore:** Gold. **Remarks:** Small amount of work during the year.

MARSH CREEK MINING CO.

Officers: Roy Y. Bogard, Pres.-Mgr., Burns, Ore.; Curtis F. Pike, Sec., 1317 Idaho St., Boise. **Inc.:** July 9, 1921. **Capital:** 1,000,000 shares; par value $1; 39,985 shares issued. **Property:** 2 unpatented claims on Marsh Creek, Bear Creek dist.; Featherville.

NORTHWESTERN DEVELOPMENT CO.

Office: P. O. Box 1035, Boise. **Officers:** William Williams, Pres.-Mgr.; Geo. L. Fleharty, Sec., both of Boise. **Inc.:** April 30, 1927. **Capital:** 1,500,000 shares; par value $1; 900,000 shares issued. **Property:** 5 groups of unpatented placer claims on Boise River; unorganized dist.. **Ore:** Placer gold.

OMO MINES CORPORATION

Office: 326 Lindelle Blk., Spokane, Wash. **Officers:** J. T. Omo, Pres.-Mgr.; Alfred Hage, Sec., both of Spokane. **Inc.:** Jan. 19, 1926, as Omo Mining & Leasing Co., name changed March 3, 1926. **Capital:** 2,000,000 shares; par value 5c; 1,400,000 shares issued. **Property:** Mountain View group; 3 unpatented claims held under lease and option; Pine Grove dist.; Pine. **Ore:** Gold. **Men employed:** Average, 3. **Remarks:** A small amount of work during the summer months, funds being derived from stock assessments.

SOUTH PARK DREDGING CO.

Office: 351 California St., San Francisco, Cal. **Officers:** W. P. Hammon, Pres.; A. L. Dahl, Sec., both of San Francisco, Cal. **Inc.:** Sept. 12, 1921. **Capital:** 50,000 shares; no par value; all shares issued. **Property:** 1100 acres of dredging land on Feather River, Featherville dist.; Featherville. **Plant:** Yuba dredge, 9-cu.-ft. buckets, close connected. The hull is constructed entirely of Oregon fir, 105 ft. long with 44 ft. 7 in. beam, 10 ft. deep, drawing 7 ft. water. The bucket line is composed of 67 buckets connected with pins weighing 150 lbs. each; the buckets weigh approximately 2000 lbs. each. The digging ladder is of the plate girder type, 75 ft. long and weighs approximately 50 tons. The lower tumbler is round and spool shaped; the upper tumbler is hexagonal. The tailing stacker is 124 ft. long and provided with a 36 in. conveyor belt. The entire dredge is electrically driven, 520 h. p. being required, and is operated from the winch room. The pump capacity is 5000 gallons per minute. **Ore:** Placer gold. **Men employed:** Average, 20. **Remarks:** Construction work was started in October, 1921, and the dredge commenced digging on August 21, 1922; a very remarkable record, as the entire dredge had to be transported 43 miles over rough mountain roads. In addition to building the dredge, a power line 43 miles long from Mountain Home to the dredge was built. The entire plant, including power line, involved an expenditure of over half a million dollars before a wheel was turned. In June, 1928, operations were temporarily suspended.

STANLEY-FIVE BARS MINING CO.

Office: P. O. Box 1368, Boise. **Officers:** O. O. Haga, Pres.; H. M. Jeffrey, Sec., both of Boise. **Inc.:** Sept. 8, 1925. **Capital:** 25,000 shares; par value $1; 20,000 shares issued. **Property:** Five Bars group; 4 unpatented placer claims, Middle Boise dist.; Atlanta.

FREMONT COUNTY

Coal, phosphate rock, oil shale, and asbestos occur in different sections of this county. The occurrence of coal in commercial quantities in the northeastern corner of the county has been reported, but these deposits are too far removed from transportation to be available. The other deposits have never been sufficiently developed to prove their extent.

GEM COUNTY

Gem is one of the smallest counties in area in the State, but one of the largest in population per square mile. Its area is 567 square miles, and the 1920 census credited it with a population of 6427, or 11.3 persons per square mile. The chief industries are fruit growing, farming, and livestock. It is particularly noted for its fruit farming, which is confined to the valley of the Payette River, which flows westerly through the southern end of the county.

It is one of the southwestern counties, being bounded by Ada, Canyon, Payette, Washington, Adams, Valley, and Boise counties. The drainage basin of Squaw Creek and twenty-five miles of the Payette River valley make up the larger part of its area. Emmett, the county seat and only settlement of importance, is near the center of the southern part of the county.

The county is served by a good system of locally maintained roads and by the Nampa-McCall and Payette-Emmett branches of the O. S. L. Railroad.

The Pearl district, once a famous gold-producing camp, and a few undeveloped sections where a small amount of prospecting has been done, are the only mineralized areas in the county. The principal minerals occurring in these districts are gold, silver, lead, zinc, copper, and arsenic. Gold predominates, and occurs in a free-milling quartz and combined with the sulphides of lead, zinc, and iron. The deposits containing the complex sulphide ore are of commercial importance and have not been mined, as transportation and the metallurgical methods in use at the time the Pearl district was active prevented profitable operations. The sulphide ores are amenable to modern flotation methods, and, as there is a large tonnage in many of the old mines that are lying dormant, they will again become profitable operations when properly equipped, financed, and managed.

During the year much publicity was given to the possibility of finding petroleum in this county.

The only active mine in this county was the Lincoln Mine Operating Co., which controls the famous old Lincoln mine at Pearl. This company maintained a pay roll of 20 men throughout the year, unwatered and repaired the 600-foot vertical shaft, and performed a small amount of development work.

COOPERATIVE OIL EXPLORATION FUND

Office: Boise. **Officers:** Paul G. Savic, Trustee, Boise. **Inc.:** Trust agreement. **Property:** Oil and gas leases on approximately 5000 acres of patented land near Letha. **Mineral sought:** Oil and gas. **Remarks:** A small amount of exploratory work by diamond drilling was performed under contract.

FELIX MINING CO.

Office: Boise. **Officers:** T. J. Jones, Pres.-Mgr., Boise. **Inc.:** July 25, 1917. **Capital:** 500 shares; par value $10; all shares issued. **Property:** Felix group; 5 patented claims, West View dist.; Pearl.

GRANITE STATE CONSOLIDATED MINES CO.

Office: 242 Water St., Augusta, Maine. **Officers:** G. R. Chadbourne, Augusta, Maine; H. W. Dorman, Sec., Boise. **Inc.:** June 23, 1914. **Capital:** 3,000,000 shares; par value $1; 2,113,664 shares issued. **Property:** Granite State group; 20 patented, 16 unpatented claims, West View dist.; Pearl. **Development:** Principally by 1 tunnel 2300 ft. long. **Remarks:** Annual labor only on unpatented claims.

JOHNSON MINING CO.

Office: 1220 N. 11th St., Boise. **Officers:** J. C. Johnson, Pres., Boise. **Inc.:** Dec. 27, 1905. **Capital:** 300,000 shares; par value $1; all shares issued. **Property:** 1 patented claim, West View dist.; Pearl.

LINCOLN MINE OPERATING CO.

Office: Pearl. **Officers:** Wm. I. Phillips, Pres., Miami, Fla.; M. W. Hallam, Sec.; H. P. Taylor, Mgr., both of Pearl. **Inc.:** May 20, 1926. **Capital:** 1,000,000 shares; par value 25c; all shares issued. **Property:** Lincoln group; 3 patented, 6 unpatented claims, held under lease and option from Alexander Lewis, 115 Broadway, New York. West View dist.; Pearl. **Development:** By 2 vertical shafts, one of which is 540 ft. deep; total development, approximately 8000 ft. **Plant:** MINE: 2 electrically-driven hoists, complete mining equipment. MILL: 100-ton concentrator, including flotation. **Ore:** Gold-silver-lead. **Men employed:** Average, 20. **Remarks:** During the early part of the year the main shaft was unwatered and repaired, after which a large amount of exploratory work was performed on the intermediate levels.

NEW LIBERTY MINING CO.

Office: Box 1368, Boise. **Officers:** E. Sweet, Pres., Sweet. **Inc.:** Jan. 14, 1926. **Capital:** 450,000 shares common, par value $1; 50,000 shares preferred, par value $1; 450,000 shares issued. **Property:** Old Liberty group; 4 patented claims, Squaw Creek dist.; Sweet.

OLD LIBERTY MINING CO.

Office: Box 1368, Boise. **Officers:** E. Sweet, Pres., Sweet. **Inc.:** Sept. 6, 1911. **Capital:** 250,000 shares common, par value $1; 300 shares preferred, par value $100; all shares issued. **Property:** Old Liberty group; 4 patented claims, Squaw Creek dist.; Sweet.

SOUTH LINCOLN GROUP

Owner: J. A. McGowen, Portland, Ore.; H. W. Dorman, Agt., Boise. **Inc.:** Not incorporated. **Property:** South Lincoln group; 3 unpatented claims, West View dist.; Pearl.

YELLOW GOLD PLACER CO.

Office: Mountain Home. **Officers:** Ernest Tacha, Pres.; Hetta M. Tacha, Sec.; Edward N. Crawford, Mgr., all of Mountain Home. **Inc.:** May 16, 1927. **Capital:** 500,000 shares; par value $1; 15,101 shares issued. **Property:** Lease on 320 acres of farm land, West View dist.; Pearl. **Remarks:** Active stockselling campaign throughout the year.

GOODING COUNTY

Placer gold, which is found in the gravel bars and sand along the Snake River, constitutes the only mineral resource of this county. These deposits are worked in a limited manner, and generally return the operator a fair profit on his labor.

NAME OF MINE	MINING DIST.	OWNER	P. O. ADDRESS
Big Body Placer	Snake River	John Criswell	Clear Lake
Black Butte Placer	Snake River	A. S. Madalena	Clear Lake
Boulder Hill Placer	Snake River	Charles N. Ingersoll	Bliss
Brown Placer	Snake River	C. E. Jenkins	Hagerman
.....Pl.	Snake River	H. C. Bryant	Hagerman
....Pl.	Snake River	Hand & Seburn	Hagerman
Zeolite Gr.	Unorganized	Geo. H. Chaffin	Gooding

IDAHO COUNTY

This county occupies a vast region about midway between the northern and southern boundaries of the State, extending from Montana, on the east, to Oregon, on the west. It is bounded on the north by Nez Perce, Lewis, and Clearwater counties, on the east by the State of Montana, on the south by Lemhi, Valley, and Adams counties, and on the west by the State of Oregon. It contains 8539 square miles, or an area which is larger than the combined areas of the States of Rhode Island, Delaware, and Connecticut. The 1920 census accredited it with a population of 11,749, or 1.4 persons to the square mile. The larger part of the population is located on Camas Prairie, a table-land of about 400 square miles. The chief industries are farming, principally wheat, for which Camas Prairie is famous; stockraising, and mining.

The western part of the county is served by the North and South State Highway, which extends from the southern to the northern boundary, and by the Elk City and Lewis & Clark highways, which are partly constructed. Its railroads are the Lewiston-Stites branch of the Northern Pacific Railroad, and the Lewiston-Grangeville branch, which is owned jointly by the Union Pacific and Northern Pacific railroads. Both these railroads serve Camas Prairie, or the northwestern part of the county. Grangeville is the largest town and county seat.

Idaho County is the largest in the State in area, and one of the greatest in diversity of mineral resources and mining opportunities. The principal metals and minerals which occur in sufficient extent to be of commercial importance are gold—placer and lode—silver, copper, lead, zinc, antimony, tungsten, asbestos, molybdenum, talc, and mica.

During the early days of Idaho this county was one of the largest gold-producing districts in the United States, and at the present time it offers more possibilities for profitable gold mining than any other section. Many of the millions produced during those days were won from placer deposits which occur in practically all the 17 mining districts within the county. Excepting the flat land and river bottoms, which are suitable for dredging, and which fully justify investigation, practically all the placer mines are exhausted.

The greatest handicap which the county is compelled to undergo is the lack of transportation, and under present road conditions only the highest grade free-milling ores can be successfully handled. Railroads into the various mining districts are a far removed possibility; however, a good automobile or motor truck road would serve to open many of the districts which are now dormant.

Much of the ore is a free-milling gold, and if not, a high-grade concentrate can be made which will permit a long haul. The latter statement applies particularly to the ores of the Ten Mile, Orogrande, Elk City, Buffalo Hump, and Dixie districts. The highway from Harpster to Elk City up the South Fork of the Clearwater River will make all these districts accessible by a water grade road, and their development will soon follow. This highway is one of the most meritorious projects in the State, and everyone interested in mining in these districts is looking forward to its early completion. In July, 1926, the prospectors and companies holding unpatented claims in the Elk City, Orogrande, Dixie, and Buffalo Hump districts voted to do their annual labor on this road. As a result of their faith in these districts, over six miles of road and a bridge crossing the Red River were constructed on the Elk City end. The lower end of the road was extended a distance of eight miles during 1928.

A gradual return to more normal conditions, under which gold mining is again becoming profitable, affected this county during the year by a small substantial increase in mining operations, investigations, new enterprises and increased production. The most important of these was the resumption of operations by the Unity Gold Mines Co., which remodeled its mill, adding

flotation cells, and performed a large amount of new development work in addition to operating the mill throughout the greater part of the year. An important production from a new mine was that from the Lone Pine group at Golden, Ten-Mile district, which is owned by F. O. Miller and son; they remodeled their 2-stamp mill, constructed new camp buildings, performed a large amount of development work, and marketed a substantial amount of bullion. A new enterprise of importance is the Golden Anchor Mining Co., which purchased the Holte mine in the Marshall Lake district, constructed a small hydroelectric power plant, and commenced driving a long crosscut tunnel which will intersect the Holte vein at a substantial depth below the present workings.

The Buffalo-Idaho Mining Co. at the Mackey group in the Ten-Mile district, the Garner Electric Range Co., developing a talc property near Pollock on the Little Salmon River, and the Moose Creek Placers Co. at Elk City were active throughout the year. The principal development of importance in the Elk City district was that of George Henton, who was actively engaged in churn-drilling extensive placer ground in that vicinity. The results of this work were satisfactory, a company has been organized, and an additional drill will be installed early in 1929, that all of the ground may be prospected at an early date, in anticipation of the construction of a large dredge. The Salmon River Development Co., whose enterprise is based on the recovery of black sand from the bars of the Salmon River, commenced the construction of a large flume to convey the waters of Lake Creek to the ground it proposes to mine.

ABBA CORPORATION

Office: 128 Broadway, New York City. **Officers:** Henry W. Allen, Pres.; Charles H. Suhl, Sec., both of New York City. **Inc.:** Mar. 6, 1926. **Capital:** 50,000 shares; par value $1; 45,750 shares issued. **Property:** 4 patented claims, Warren dist.; Warren. **Ore:** Silver.

ALTA-IDAHO GOLD & COPPER MINING CO.

Officers: M. C. Hetler, Pres., Berwick, Pa.; Mrs. Rachel E. Fine, Sec., Cassadaga, Fla.; Geo. M. Snyder, Mgr., Pardee. **Inc.:** Filed in Idaho June 17, 1903. **Capital:** 1,000,000 shares; par value $1; 756,107 shares issued. **Property:** Empire group; 11 unpatented claims, on South Fork of Clearwater River, Lolo dist.; Pardee. **Development:** Approximately 450 ft. of underground workings, the principal of which is 1 tunnel 250 ft. long. **Ore:** Gold-silver-copper. **Men employed:** 1 watchman.

BADGER MOUNTAIN MINING CO.

Office: Grangeville. **Officers:** Markus Lies, Pres., Cottonwood; Will C. Jones, Sec., Route 3, Seattle, Wash. **Inc.:** Feb. 13, 1925. **Capital:** 10,000,000 shares; par value 1c; 108,800 shares issued. **Property:** 2 patented, 7 unpatented claims, held under lease and option from Homestake Gold Mining Co.; Orogrande dist.; Orogrande. **Development:** By 3 tunnels, the longest of which is 460 ft. **Ore:** Gold.

BLACKTAIL MINING CO.

Office: 1517 E. 9th Ave., Spokane, Wash. **Officers:** R. E. Wakeley, Pres.-Mgr.; N. L. Wakeley, Sec., both of Spokane. **Inc.:** Dec. 3, 1914. **Capital:** 200,000 shares; par value $1; 121,920 shares issued. **Property:** 10 unpatented claims, Harpster dist.; Harpster. **Development:** By 2 tunnels: No. 1, 370 ft. long; No. 2, 70 ft. long. **Ore:** Gold. **Remarks:** Annual labor only.

BLUE RIBBON MINE

Owner: A. W. Boyd, Agent. **Property:** Blue Ribbon group; 5 unpatented claims, Elk City dist.; Elk City. **Development:** 1 tunnel about 400 ft. long; 1 shaft 100 ft. deep. **Ore:** Gold-silver. **Remarks:** One of the principal prospects in the Elk City district in which a large tonnage of ore has been developed.

BUFFALO-IDAHO MINING CO.

Office: 822 Humboldt Parkway, Buffalo, N. Y. **Officers:** Geo. J. Becker, Pres., Buffalo, N. Y.; Ray R. Becker, Sec., Williamsville, N. Y.; Joseph A. Fields, Mgr., Golden. **Inc.:** Nov. 7, 1927. **Capital:** 250,000 shares;

par value $1; 110,000 shares issued. **Property:** Mackey group; 11 unpatented claims held under lease and option, Ten Mile dist.; Golden. **Development:** Principally by 1 tunnel 1100 ft. long, in which is a 40-ft. inclined shaft. **Plant:** Small gas-driven compressor; complete mining equipment and camp. **Ore:** Gold. **Men employed:** Average, 6. **Remarks:** Active development work throughout the year, part of which consisted of road construction.

CENTRAL IDAHO GOLD MINES, INC.

Office: 601 Hutton Bldg., Spokane, Wash. **Officers:** Henry Merritt, Pres., Rosalia, Wash.; Chas. H. Ennis, Sec., Spokane, Wash.; Harold Scheave, Mgr., Grangeville. **Inc.:** July 20, 1928. **Capital:** 100,000 shares; par value $1; 37,100 shares issued. **Property:** New York group; 29 unpatented claims held under lease and option, Ten Mile dist.; Golden. **Development:** By 10 tunnels, the principal one of which is 1200 ft. long. **Plant:** Water-driven 10-stamp mill, constructed in 1916; complete hand-mining equipment and camp. **Remarks:** Annual labor and ordinary repairs.

CLEARWATER MINING CO.

Office: Elk City. **Officers:** Wm. Hogan, Pres.-Mgr., Elk City; Lucy Schafer, Sec., New York City. **Inc.:** May 18, 1925. **Capital:** 10,000 shares; par value $10; all shares issued. **Property:** Clearwater group; 42 unpatented claims, Elk City and Orogrande dist.; Elk City. **Development:** Approximately 7000 ft. of short open cuts and tunnels. **Ore:** Gold. **Men employed:** Average, 6. **Remarks:** Annual labor only.

COMMODORE GOLD MINING CO.

Office: Lewiston. **Officers:** Wm. C. McNutt, Pres.-Mgr.; M. R. Morgan, Sec., both of Lewiston. **Inc.:** Mar. 28, 1921. **Capital:** 1,000,000 shares; par value $1; 261,515 shares issued. **Property:** Commodore group; 38 unpatented claims, at junction of Crooked River and South Fork of Clearwater River, Orogrande dist.; Elk City. **Development:** By 10 short tunnels, totaling approximately 500 ft., and 253 discovery pits. **Ore:** Gold. **Remarks:** Annual labor only.

CONSOLIDATED MINES SYNDICATE (See Camas County)

Property: Blue Jacket group; 7 patented claims, Crooks Corral dist.; Lucile. **Remarks:** Idle.

CROOKS CORRAL MINES, LTD.

Office: Grangeville. **Officers:** Frank McGrane, Pres.; A. F. Parker, Sec., both of Grangeville. **Inc.:** Sept. 13, 1897. **Capital:** 1,000,000 shares; par value $1; 990,000 shares issued. **Property:** 8 patented placer claims, Crooks Corral dist.; Lucile.

EMPIRE METALS CO.

Office: Elk City. **Officers:** Wm. Hogan, Pres.-Mgr.; Carl Vermillion, Sec., both of Elk City. **Inc.:** Jan. 20, 1927. **Capital:** 999,000 shares; par value 50c; all shares issued. **Property:** 37 unpatented claims, Orogrande dist.; Orogrande. **Development:** By 10 open cuts and tunnels. **Ore:** Gold. **Men employed:** Average, 5. **Remarks:** Annual labor only.

ERICKSON RIDGE DEVELOPMENT CO., INC.

Office: Elk City. **Officers:** Wm. Hogan, Pres.-Mgr., Elk City. **Inc.:** Aug. 25, 1926. **Capital:** 200,000 shares; par value $10; all shares issued. **Property:** Erickson Ridge group; 30 unpatented claims, Elk City dist.; Elk City. **Development:** Approximately 1500 ft. of short tunnels and open cuts. **Ore:** Gold. **Men employed:** Average, 3. **Remarks:** Annual labor only.

ESPERANZA GOLD DIKES MINING CORPORATION

Office: 802 Farling Bldg., Portland, Ore. **Officers:** Edward M. Griffith, Pres., Grangeville; C. W. Twining, Sec., Portland, Ore. **Inc.:** Sept. 14, 1925. **Capital:** 1,000,000 shares; par value 25c; all shares issued. **Property:** Champion group; 18 patented claims, Orogrande dist.; Orogrande. **Development:** Approximately 4000 ft. of old workings. **Ore:** Gold. **Remarks:** Idle throughout the year.

GARNER ELECTRIC RANGE CO.

Office: P. O. Box 1166, Kellogg. **Officers:** W. C. Garner, Pres.; W. M. Pope, Sec., both of Kellogg. **Inc.:** An association. **Capital:** 1,000,000 shares; par value $1; 450,530 shares issued. **Property:** 80 acres patented farm land near Pollock, held under lease and option; Riggins. **Development:** One tunnel 100 ft. long. **Mineral sought:** Talc. **Men employed:** Average, 4. **Remarks:** During the year this company actively developed a talc deposit near Riggins, on the Little Salmon River.

GOLDEN ANCHOR MINING CO.

Office: Boise. **Officers:** J. A. Czizek, Pres.-Mgr.; H. F. Koelsch, Sec., both of Boise. **Inc.:** Apr. 14, 1928. **Capital:** 1,000,000 shares; par value $1; 500,000 shares issued. **Property:** Holte group; 22 unpatented claims, Marshall Lake dist.; Burgdorf. **Development:** Approximately 3200 ft. of underground workings, the principal of which are 4 tunnels: No. 1, 400 ft. long; No. 2, 1860 ft. long; No. 3, 600 ft. long; No. 4, 800 ft. long; 1 vertical shaft 150 ft. deep. **Plant:** MINE: Steam-driven compressor, complete mining equipment, sawmill, assay office and complete camp. MILL: 50-ton steam-driven Lane Chilean mill; cyanide plant. **Ore:** Gold. **Men employed:** Average, 6. **Remarks:** During the year a small hydroelectric power plant was constructed, and No. 4 tunnel was extended 400 ft.

GOLDEN EAGLE MINING CO.

Office: Elk City. **Officers:** Geo. R. Noble, Pres.; Robt. A. Koontz, Sec., both of Spokane, Wash.; Geo. E. Hottenstein, Mgr., Elk City. **Inc.:** Jan. 2, 1926. Charter forfeited Nov. 30, 1928. **Capital:** 2,500,00 shares; par value 10c; 1,010,000 shares issued. **Property:** Golden Eagle group; 6 unpatented claims, Elk City dist.; Elk City. **Development:** By 3 tunnels, the principal one of which is 1050 ft. long. **Ore:** Gold. **Men employed:** Average, 2. **Remarks:** Active throughout the year.

GOLDEN MINING & POWER CO.

Office: Golden. **Officers:** A. Marcuson, Pres., Exeter, Calif.; R. B. Harris, Sec., Grangeville. **Inc.:** Nov. 12, 1926. **Capital:** 100,000 shares; par value $1; 52,250 shares issued. **Remarks:** Owns no property.

GOLD ZONE MINING & MILLING CO., LTD.

Office: Grangeville. **Officers:** W. W. Brown, Pres.; Frank van Deventer, Sec., both of Grangeville; J. J. Schoner, Mgr., Elk City. **Inc.:** Sept. 9, 1919. **Capital:** 1,000,000 shares; par value 5c; all shares issued. **Property:** Gold Zone group; 9 unpatented claims, Elk City dist.; Elk City. **Development:** By 1 tunnel 500 ft. long. **Ore:** Gold. **Remarks:** Annual labor only.

GOODENOUGH UNITED MINING & MILLING CO., LTD.

Office: Payette. **Officers:** L. I. Purcell, Pres.-Mgr., Payette. **Inc.:** Nov. 1, 1905. **Capital:** 1,000,000 shares; par value 25c; 625,000 shares issued. Property: Goodenough group; 10 patented claims, Marshall Lake dist.; Burgdorf. **Remarks:** Idle for many years.

HOMESTAKE PLACER MINE

Owner: M. Kleiner, Portland, Ore. **Property:** 8 unpatented placer claims, Ten Mile dist.; Golden. **Ore:** Placer gold. **Remarks:** Under lease and option to Russell Webb of Lapwai, who performed a small amount of work during the summer months, consisting principally of installation of hydraulicking equipment.

IDAHO BUSTER MINING CO., LTD.

Office: 1022 Crocker Bldg., San Francisco, Cal. **Officers:** F. W. Bradley, Pres.; J. S. Wallace, Sec., both of San Francisco, Cal. **Inc.:** Dec. 9, 1908. **Capital:** 300,000 shares; par value $1; all shares issued. **Property:** Idaho Buster group; 4 patented claims, Elk City dist.; Elk City. **Remarks:** Idle since November, 1909.

IDAHO-COMSTOCK

Office: Tacoma, Wash. **Officers:** Thos. H. Minear, Pres.-Mgr., People's Store, Tacoma, Wash. **Inc.:** An association. **Capital:** 2,000,000 shares; no par value; all shares issued. **Property:** Idaho-Comstock group; 12 patented claims, Dixie dist.; Dixie. **Development:** By 3 tunnels: No. 1, 700 ft. long; No. 2, 200 ft. long; No. 3, 200 ft. long; 1 vertical shaft 140 ft. deep. **Ore:** Gold. **Remarks:** Idle.

JUMBO MINING & MILLING CO., LTD.

Office: Lewiston. **Officers:** J. C. Jansen, Pres., Lewiston Orchards; W. E. Howard, Sec., 537 San Francisco St., Pomona, Cal. **Inc.:** Aug. 13, 1902. **Property:** Jumbo group; 5 patented claims, Robins dist.; Orogrande.

LONE PINE GROUP

Owner: F. O. Miller, 735 Riverview Blvd., Clarkston, Wash.; S. O. Miller, Supt., Golden. **Property:** Lone Pine group; 4 patented, 8 unpatented claims, Ten Mile dist.; Golden. **Development:** By 5 tunnels, totaling over 1100 ft. **Plant:** 2-stamp mill, 1250-lb. stamps, water-driven. **Ore:** Gold. **Men employed:** Average, 6. **Remarks:** This property is one of the principal gold-producing mines in Idaho County. During the high-water season a substantial tonnage was produced and milled. During the latter part of the year new camp buildings were constructed and active development work was maintained.

LUCKY FIVE MINING CO.

Office: P. O. Box 1182, Spokane, Wash. **Officers:** M. Clinkenbeard, Pres.; C. Clinkenbeard, Sec.-Mgr., both of Spokane. **Inc.:** Never filed in Idaho; form of organization unknown. **Capital:** 1,499,990 shares; par value 10c; 666,940 shares issued. **Property:** Relief Creek placers; 12 unpatented claims, Orogrande dist.; Orogrande. **Ore:** Placer gold. **Men employed:** Average, 2. **Remarks:** Small amount of ditch and flume repair work done during the year.

McKINLEY GOLD MINING CO.

Office: Kellogg. **Officers:** P. P. Weber, Pres.; A. H. Polson, Sec., both of Kellogg. **Inc.:** Dec. 29, 1899. **Capital:** 1,500,000 shares; par value $1; 932,793 shares issued. **Property:** McKinley group; 4 patented, 4 unpatented claims, Simpson dist.; Lucile. **Development:** 4 tunnels: No. 1, 145 ft. long; No. 2, 1020 ft. long. Total development, approximately 1300 ft. **Ore:** Gold. **Remarks:** Annual labor only.

MAMMOTH MINE CORPORATION

Office: Lewiston. **Officers:** R. S. Erb, Pres.; R. G. Bailey, Sec., both of Lewiston. **Inc.:** Feb. 25, 1925. **Capital:** 500,000 shares; par value $1; 288,082 shares issued. **Property:** Mammoth group; 6 unpatented claims, Dixie dist.; Dixie. **Development:** By 14 open cuts and 2 short tunnels. **Men employed:** Average, 2. **Ore:** Gold. **Remarks:** A small amount of work throughout the year. Press reports during the latter part of the year were to the effect that the property had been optioned to other people.

MONTE CRISTO MINING CO.

Office: Lewiston Bank Bldg., Lewiston. **Officers:** Fred Johnson, Pres.-Mgr., Troy; A. P. Hagglund, Sec., Lewiston. **Inc.:** Oct. 22, 1927. **Capital:** 200,000 shares; par value $1; 80,000 shares issued. **Property:** Monte Cristo group; 2 unpatented claims, Robins dist.; Waverly; 1 patented claim, Florence dist.

MOOSE CREEK PLACERS CO.

Office: Kellogg. **Officers:** D. Williams, Pres.; Max R. Crosby, Sec.-Mgr., both of Kellogg. **Inc.:** Nov. 22, 1927. **Capital:** 2,500,000 shares; par value 10c; 1,000,000 shares issued. **Property:** Moose Creek placers; 2 unpatented claims, 320 acres, Newsome dist.; Newsome. **Ore:** Placer gold. **Men employed:** Average, 8. **Remarks:** During the summer months ditch and flue lines and hydraulicking equipment repaired and rehabilitated.

NORTH HILL MINING CO.

Office: 617 Hutton Bldg., Spokane. **Officers:** J. M. McLean, Pres.; Ralston McCaig, Sec., both of Spokane. **Inc.:** Apr. 18, 1925. **Capital:** 1,500,000 shares; par value 1c: 645,964 shares issued. **Property:** Summit Flat group; 5 unpatented claims, Orogrande dist.; Orogrande. **Development:** Principally by 1 tunnel, 1150 ft. long. **Plant:** Steam-driven Gardner-Ricks compressor and hoist; camp; complete mining equipment. **Ore:** Gold. **Men employed:** Average, 2. **Remarks:** This company is a reorganization of the Summit Flat Mining Co. A small amount of work was done during the summer months.

OROGRANDE GOLD MINING CO.

Office: 218 Columbia Bldg., Spokane, Wash. **Officers:** J. N. Pickrell, Pres., Colfax, Wash.; J. E. Pickrell, Sec., Spokane, Wash. **Inc.:** March 14, 1919. **Capital:** 3,500,000 shares; par value $1; 1,800,000 shares issued. **Property:** Orogrande group; 5 patented, 29 unpatented claims, Orogrande dist.; Orogrande. **Development:** Approximately 6000 ft. of underground workings and 4000 ft. of surface cuts on all claims. **Plant:** Stamp mill with partly completed cyanide plant; water-driven. **Ore:** Gold. **Men employed:** 1 watchman. **Remarks:** Idle.

REVENUE MINING & MILLING CO.

Office: 511 Kuhn Blk., Spokane, Wash. **Officers:** J. E. McCormack, Pres.; Walter Guthridge, Sec.-Treas., both of 511 Kuhn Blk., Spokane, Wash. **Inc.:** April 10, 1912. **Capital:** 500,000 shares; par value $1; 391,693 shares issued. **Property:** Revenue group; 8 patented claims, Elk City dist.; Elk City. **Development:** 2 tunnels: No. 1, 700 ft. long; No. 2, 100 ft. long. **Remarks:** Idle.

RICE MINING & MILLING CO.

Officers: Geo. F. Carson, Pres.; E. P. Adkison, Sec., both of Lewiston. **Inc.:** Apr. 8, 1920. Charter forfeited Nov. 30, 1928. **Capital:** 1,000,000 shares; par value $1; 530,978 shares issued. **Property:** Mother Lode group; 9 unpatented claims, Orogrande dist.; Orogrande. **Development:** Approximately 1700 ft. of underground workings. **Remarks:** Annual labor only.

SALMON RIVER DEVELOPMENT CO.

Office: Whitebird. **Officers:** J. L. Osterhout, Pres., Colfax, Wash.; L. L. Bassett, Sec., Washtucna, Wash.; J. M. Worton, Mgr., Whitebird. **Inc.:** Sept. 10, 1927. **Capital:** 500,000 shares; par value $1; 9,700 shares issued. **Property:** 15 unpatented placer claims, 325 acres, held under royalty and option, Simpson dist.; Whitebird. **Ore:** Placer gold. **Men employed:** Average, 8. **Remarks:** During the year construction work was started on a 12,000-ft. ditch and flume; a large part of the flume, which involved heavy construction, was completed.

SALMON RIVER MINERS, INC.

Office: Empire Bank Bldg., Lewiston. **Officers:** C. C. Byers, Pres.-Mgr.; C. D. Cole, Sec., both of Lewiston. **Inc.:** Mar. 26, 1928. **Capital:** 100 shares; par value $100; 60 shares issued. **Property:** 1 unpatented placer claim, Simpson dist.; Whitebird. **Ore:** Placer gold. **Remarks:** Small amount of work performed during the summer months by the officers of the company.

SEATTLE AMERICAN EAGLE MINES, INC.

Office: 407 American Bank, Seattle, Wash. **Officers:** Miss A. M. Hoffstater, Pres.; H. H. Hoffstater, Sec., both of Seattle, Wash. **Inc.:** Jan. 30, 1928. **Capital:** 195,000 shares; par value $1; 100,000 shares issued. **Property:** American Eagle group; 26 patented, 6 unpatented claims, Elk City dist.; Elk City. Held under lease and option from Homestake Gold Mining Co. **Development:** By 4 tunnels: No. 1, 345 ft.; No. 2, 1500 ft.; No. 3, 307 ft.; No. 4, 1157 ft.; and a vertical shaft 200 ft. deep. **Plant:** MINE: Steam-and-water-driven compressor; complete mining equipment and camp. MILL: Steam-driven 10-stamp mill with concentrating tables. **Ore:** Gold. **Men employed:** Average, 3. **Remarks:** Small amount of mine repair work during summer months.

SEELRIDGE GOLD MINING CO.
Office: Kellogg. **Officers:** P. E. Seelye, Pres., Kellogg; Edwin Smetheran, Sec.; H. Selfridge, Mgr., both of Spokane, Wash. **Inc.:** Jan. 18, 1928. **Capital:** 100,000 shares; par value $1; 62,000 shares issued. **Property:** Placer claims held under lease and option, near Freedom, Simpson dist.; Whitebird. **Ore:** Placer gold. **Remarks:** Experimental work on recovery of fine gold was conducted throughout the year. During the closing months of the year fabrication of concentrating plant was started.

SLATE CREEK GOLD MINING CO.
Office: Whitebird. **Officers:** G. A. Thomson, Pres.; W. W. White, Sec., both of Whitebird. **Inc.:** Sept. 21, 1925. **Capital:** 600,000 shares; par value 50c; 30,250 shares issued. **Property:** Lease and option on 480 acres patented farm land, Simpson dist.; Lucile. **Development:** By 3 tunnels, with a total of approximately 600 ft. **Ore:** Gold. **Remarks:** Idle.

SPHINX GOLD MINING CO.
Office: 832 Old National Bank Bldg., Spokane, Wash. **Officers:** Sam A. McCoy, Pres.-Mgr.; E. J. Johnson, Sec., both of Spokane, Wash. **Inc.:** May 3, 1923. **Capital:** 500,000 shares; par value $1; 425,000 shares issued. **Property:** Sphinx group; 5 unpatented claims, Ten Mile dist.; Newsome. **Ore:** Gold. **Remarks:** Annual labor only.

SPRING BARR PLACER CO.
Office: 210 Eiler Bldg., Spokane, Wash. **Officers:** N. L. Wakeley, Pres.; Geo. W. McCallum, Sec.; W. L. Wakeley, Mgr., all of Spokane, Wash. **Inc.:** May 14, 1927. **Capital:** 25,000 shares; par value $1; 4,300 shares issued. **Property:** Spring Barr group; 3 unpatented placer claims, Simpson dist.; Lucile. **Ore:** Placer gold.

STOWELL GOLD MINING CO.
Office: 421 Sprague Ave., Spokane, Wash. **Officers:** Wm. H. Stowell, Pres.; Robert A. Koontz, Sec., both of Spokane. **Inc.:** Dec. 4, 1926. **Capital:** 5,000,000 shares; par value 15c; 2,560,824 shares issued. **Property:** South Fork group; 5 patented, 6 unpatented claims, Elk City dist.; Elk City. **Development:** Approximately 3500 ft. of underground workings, the principal of which are: No. 1 tunnel, 1200 ft. long; No. 2, 1050 ft. long; No. 3, 1000 ft. long. **Plant:** 5-stamp mill. **Ore:** Gold. **Remarks:** Annual labor only.

SYLVANITE GOLD-COPPER CO.
Office: 408 E. Bridgeport Ave., Spokane, Wash. **Officers:** Wesley L. Wakeley, Pres.-Mgr., Harpster. **Inc.:** Aug. 20, 1919. **Capital:** 100 shares; par value $100; all shares issued. **Property:** Maud Randall group; 5 unpatented claims, 2 of which are held under lease and bond from Joseph Himmelspack of Grangeville; Harpster dist.; Harpster. **Development:** By 2 tunnels: No. 1, 825 ft. long; No. 2, 80 ft. long. **Plant:** Gas-driven Gardner-Ricks 6x6 compressor; complete mining equipment. **Ore:** Copper. **Remarks:** Annual labor only.

TRI METALLIC MINING CO., LTD.
Office: Pardee, Idaho. **Officers:** Frieda M. Bethmann, Pres.; Miner Bethmann, Mgr., both of Pardee. **Inc.:** Sept. 26, 1917. **Capital:** 250,000 shares; par value $1; 145,577 shares issued. **Property:** Tri Metallic group; 4 unpatented claims, Lolo dist.; Pardee. **Development:** By 3 tunnels: No. 1, 520 ft.; No. 2, 185 ft.; No. 3, 950 ft. **Ore:** Gold-silver-copper. **Remarks:** Annual labor only.

UNA MINE CO.
Office: 617 Hutton Bldg., Spokane, Wash. **Officers:** J. M. McLean, Pres.; Ralston McCaig, Sec.-Mgr., both of Spokane. **Inc.:** Feb. 6, 1925. **Capital:** 1,250,000 shares; par value 1c; 958,100 shares issued. **Property:** Una group; 4 unpatented claims, Orogrande dist.; Orogrande. **Development:** By 1 tunnel, 1100 ft. long. **Ore:** Gold. **Men employed:** Average, 2. **Remarks:** Active work during the summer months in extending the principal tunnel.

UNITY GOLD MINES CO.

Office: 120 Broadway, New York City. **Officers:** Lorren M. Hart, Pres.; J. B. Neumuller, Sec., both of New York City; Granville T. Eyman, Mgr., Warren. **Inc.:** May 25, 1916. **Capital:** 500,000 shares; par value $5; all shares issued. **Property:** Little Giant and Rescue groups; 8 patented 10 unpatented claims, Warren dist.; Warren. **Development:** Over 10,000 ft. of underground workings, the principal of which is the Unity or main crosscut tunnel, which is 5400 ft. in length. **Plant:** MINE: Storage-battery locomotive haulage; one 300-cu.-ft. and one 700-cu.-ft. electrically driven compressor; complete mining equipment. MILL: 10-stamp mill, 1000-lb. stamps, simple amalgamation. POWER PLANTS: A 50-h. p. hydroelectric plant on Warren Creek and a 600-h. p. hydroelectric plant on Elk Creek, the latter consisting of 2 units driven by Pelton impulse water wheel operating under a vertical head of 415 ft.; 9½-mile transmission line connecting power plant and mine. **Ore:** Gold. **Men employed:** 23. **Remarks:** In addition to adding flotation equipment to the mill, the company maintained active development work and production throughout the year.

KOOTENAI COUNTY

Kootenai is one of the northern counties and constitutes an important part of the Idaho Panhandle. It is bounded on the west by the State of Washington, on the north by Bonner County, on the east by Shoshone County, and on the south by Benewah County. It contains an area of 1253 square miles and was accredited with a population of 17,878 in the 1920 census. The principal industries are lumbering, dairying, and farming. Its lumbering industry is the most important and the largest in the State.

The county is exceptionally fortunate with respect to transportation facilities. It is served by three State highways, one of which is completed, and the other two partly so; by six railroads, which include main lines or their branches; and by lake boats on Lakes Pend d'Oreille and Coeur d'Alene. Coeur d'Alene is the largest town and county seat.

The principal mining districts are the Little North Fork of the Coeur d'Alene River, Hayden Lake, and isolated sections bordering on Lake Coeur d'Alene, throughout which zinc, lead, silver, copper, gold, arsenic, and high-grade clays occur. A limited amount of development work has been done on some of the veins, with encouraging results, and many others are worthy of further attention.

This county witnessed more development and prospecting in the vicinity of Coeur d'Alene Lake than at any time during the past few years. The principal companies developing prospects in this vicinity are: Silvertip Mining Association, Caribou Mining Co., Ltd., Bluebird Mining Co., Royal Mining Co., Gray Wolf Mining Co., and Wolf Lodge Mining Co.

BLUE BIRD MINING CO.

Office: Coeur d'Alene. **Officers:** Harry Phillips, Pres.-Mgr.; Wm. McFarland, Sec., both of Coeur d'Alene. **Inc.:** Sept. 2, 1924. **Capital:** 1,000,000 shares; par value 10c; 356,500 shares issued. **Property:** Blue Bird group; 9 unpatented claims, Beauty Bay and Wolf Lodge districts; Coeur d'Alene. **Development:** About 300 ft. of workings. **Ore:** Arsenic, copper, gold. **Men employed:** Average, 4. **Remarks:** Actively developed during the summer months.

BURNT CABIN MINING CO.

Office: Coeur d'Alene. **Officers:** Wm. James, Pres.; C. O. Jennings, Sec., both of Coeur d'Alene. **Inc.:** Apr. 28, 1926. **Capital:** 1,500,000 shares; par value 10c; 414,505 shares issued. **Property:** Burnt Cabin group; 15 unpatented claims, Hayden Lake dist.; Hayden Lake. **Development:** By 2 tunnels: No. 1, 150 ft. long; No. 2, 547 ft. long. **Ore:** Lead-silver. **Men employed:** Average, 5. **Remarks:** During the year a steam-driven compressor was installed and work started in sinking a 200-ft. shaft. A stock assessment of 5 mills was levied on May 21.

CARIBOU MINING CO., LTD.

Office: Coeur d'Alene. **Officers:** G. R. Scott, Pres.; C. O. Sowder, Sec., both of Coeur d'Alene. **Inc.:** July 15, 1918. **Capital:** 1,500,000 shares; par value 10c; 1,416,069 shares issued. **Property:** Caribou group; 10 unpatented claims, Wolf Lodge dist.; Coeur d'Alene. **Development:** Total development approximately 1350 ft.; consisting principally of No. 2 tunnel, 440 ft. long, and No. 3 tunnel, 755 ft. long. **Plant:** MINE: Gas-driven Gardner-Rix compressor; complete mining equipment. MILL: 75-ton concentrator, gas driven. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** Active development work throughout the year, and uncovering of some high-grade ore was reported. A stock assessment of 3 mills was levied on July 2.

COEUR D'ALENE CLAY CO., LTD.

Office: 216 Sherman Ave., Coeur d'Alene. **Officers:** Oscar Nelson, Pres.; H. H. Barton, Sec.-Treas., both of Coeur d'Alene. **Inc.:** Apr. 6, 1912. **Capital:** 100,000 shares; par value $1; 18,882 shares issued. **Property:** 40 acres patented land near Coeur d'Alene. **Plant:** 1 incomplete brick-making machine, 20,000-brick capacity.

COEUR D'ALENE OIL & DEVELOPMENT CO.
Office: Coeur d'Alene. **Officers:** L. S. Severson, Pres., Coeur d'Alene; Alex Barclay, Sec.-Mgr., Hayden Lake. **Inc.:** Nov. 19, 1927. **Capital:** 100,000 shares; par value $1; 75,828 shares issued. **Property:** 6000 acres patented farm land in the vicinity of Hayden Lake; held under oil and gas leases. **Development:** 1200-ft. well. **Plant:** Armstrong gas-driven rig and drilling equipment. **Men employed:** Average, 3. **Remarks:** Small amount of drilling by contract during the year.

COEUR D'ALENE ROBISH MOUNTAIN MINING CO., LTD.
Office: Coeur d'Alene. **Officers:** Andrew J. Rasor, Pres.; Lawrence L. Lewis, Sec., both of Coeur d'Alene; Wm. M. Hill, Mgr., Spokane. **Inc.:** Oct. 9, 1909. **Capital:** 2,750,000 shares; par value $1; 1,530,800 shares issued. **Property:** 505 acres patented land and 4 unpatented claims; Little North Fork dist.; Linfor. **Development:** Approximately 600 ft. of underground workings. **Remarks:** Annual labor only on unpatented claims.

COEUR D'ALENE-SPOKANE MINING CO.
Officers: Roy L. Black, Sec., Pocatello. **Inc.:** Sept. 6, 1918. **Capital:** 1,000,000 shares; par value $1; 500,000 shares issued. **Property:** Strobel group; 3 unpatented claims, unorganized dist.; Lane. **Ore:** Lead-silver. **Remarks:** Annual labor only.

COMMONWEALTH METALS CO.
Office: Coeur d'Alene. **Officers:** G. R. Scott, Pres.; F. W. Reed, Sec., both of Coeur d'Alene. **Inc.:** Mar. 19, 1924. **Capital:** 2,500,000 shares; par value $1; 323,991 shares issued. **Property:** Commonwealth group; 7 unpatented claims, Hayden Lake dist.; Hayden Lake. **Development:** By 3 tunnels: No. 1, 600 ft.; No. 2, 40 ft.; No. 3, 100 ft.; a vertical shaft 325 ft. deep; and 2 inclined shafts, 150 and 225 ft. deep. **Plant:** Steam-driven I-R compressor; gas-driven hoist; complete mining equipment and camp. **Ore:** Lead-silver-copper. **Remarks:** Annual labor only.

CONNIE MINING & MILLING CO.
Office: 307 Ziegler Bldg., Spokane, Wash. **Officers:** C. Wm. Gralappe, Pres.; Conrad T. Hartung, Sec., both of Spokane. **Inc.:** July 11, 1927. **Capital:** 4,000,000 shares; par value 10c; all shares issued. **Property:** Chilco group; 11 unpatented claims, Hayden Lake dist.; Hayden Lake. **Development:** By 1 tunnel, 670 ft. long. **Ore:** Lead-silver. **Remarks:** Annual labor only. This company is a reorganization of the Chilco Mining & Milling Co.

ESTELLA METALLURGICAL CO.
Office: Route 5, Coeur d'Alene. **Officers:** W. C. Brower, Pres.-Mgr., Coeur d'Alene. **Inc.:** Feb. 13, 1923. **Capital:** 5,000,000 shares; par value unknown; 3,000,000 shares issued. **Property:** 15 unpatented claims, Wolf Lodge dist.; Coeur d'Alene. **Development:** By 600 ft. of tunnels. **Ore:** Gold-silver-copper. **Remarks:** Annual labor only.

HAMBURG-AMERICAN COPPER MINING & MILLING CO.
Office: Kellogg. **Officers:** W. Schaefer, Pres.; Mrs. Augusta Loch, Sec., both of Kellogg. **Inc.:** Nov. 30, 1908. **Capital:** 1,500,000 shares; par value $1; 1,000,000 shares issued. **Property:** 3 patented, 4 unpatented claims, Little North Fork dist.; Linfor. **Development:** Principally by 2 tunnels, the longest of which is 950 ft. **Ore:** Copper, lead-silver.

HAYDEN LAKE MINING & MILLING CO.
Office: Rathdrum. **Officers:** Fred H. Bradbury, Pres.; Chas. E. Gillespie, Sec., both of Rathdrum. **Inc.:** May 8, 1917. **Capital:** 1,000,000 shares; par value 5c; 585,372 shares issued. **Property:** Bradbury group; 14 unpatented claims, Hayden Lake dist.; Garwood. **Development:** By 2 tunnels: No. 1, 200 ft.; No. 2, 800 ft. **Plant:** Small gas-driven compressor; complete mining equipment. **Ore:** Lead-silver, copper. **Remarks:** Annual labor only.

LITTLE NORTH FORK COPPER MINING & MILLING CO., LTD.

Officers: T. R. Mason, Pres., Kellogg. **Inc.:** Sept. 29, 1903. **Capital:** 1,500,000 shares; par value $1; 1,100,000 shares issued. **Property:** Hand Spike group; 3 patented claims, Little North Fork dist.; Linfor. **Development:** 2 tunnels: No. 1, 1600 ft. long; No. 2, 500 ft. long. **Ore:** Copper.

PALISADE MINING & MILLING CO.

Office: Coeur d'Alene. **Officers:** T. W. Schmidt, Pres.-Mgr., Coeur d'Alene; A. K. Rogers, Sec., E. 1301 Providence Ave., Spokane, Wash. **Inc.:** Jan. 31, 1912. **Capital:** 1,500,000 shares; par value $1; all shares issued. **Property:** Palisade group; 16 unpatented claims, unorganized dist.; Kellogg. **Development:** Approximately 1250 ft. of tunnels, the principal of which is No. 2, 1130 ft. long. **Ore:** Silver-lead. **Men employed:** Average, 3. **Remarks:** In addition to extending the principal tunnel 40 ft. during the year, a large amount of road construction was performed. Funds for this work were derived from stock assessments.

RADIO MINING CO.

Office: 121 Second St., Coeur d'Alene. **Officers:** W. P. Brennan, Pres.-Mgr.; G. M. Palmerton, Sec., both of Coeur d'Alene. **Inc.:** Dec. 13, 1928. **Capital:** 1,500,000 shares; par value 10c; no shares issued. **Property:** 3 unpatented claims, Wolf Lodge dist.; Coeur d'Alene. **Development:** By 3 short tunnels. **Ore:** Lead-silver.

RED HORSE MINING CO.

Office: Harrison. **Officers:** M. W. Frost, Pres.; J. B. Manifold, Sec., both of Harrison. **Inc.:** July 14, 1904. **Capital:** 1,500,000 shares; par value $1; 250,000 shares issued. **Property:** Red Horse group; 18 unpatented claims, Lake Front dist.; Springston. **Development:** Approximately 2720 ft. of underground workings. **Plant:** MINE: 40-h. p. F-M gas engine driving a 2-drill Sullivan compressor; complete mining equipment and camp. MILL: 5-ton gas-driven concentrator. **Ore:** Copper. **Remarks:** Annual labor only, performed by contract.

RIVERSIDE COPPER MINING CO., LTD.

Office: Kellogg. **Officers:** T. R. Mason, Pres., Kellogg; S. S. Bonham, Sec., Spokane. **Inc.:** Sept. 17, 1906. **Capital:** 1,000,000 shares; par value $1; 900,000 shares issued. **Property:** 5 patented claims, Little North Fork dist.; Linfor. **Development:** 1 tunnel, 530 ft. long. **Ore:** Lead-silver.

ROYAL MINING CO.

Office: Coeur d'Alene. **Officers:** A. H. Moe, Pres.-Mgr.; Soren Simonson, Sec., both of Coeur d'Alene. **Inc.:** Dec. 24, 1910. **Capital:** 1,500,000 shares; par value $1; 706,653 shares issued. **Property:** 6 unpatented claims, Wolf Lodge dist.; Coeur d'Alene. **Remarks:** Small amount of prospecting work during the summer months, funds for which were derived from stock assessments.

SILVERTIP MINING ASSOCIATION

Office: Coeur d'Alene. **Officers:** B. A. Loveless, Pres.; F. W. Reed, Sec., both of Coeur d'Alene. **Inc.:** An association. **Property:** Silvertip group; 16 unpatented claims, Wolf Lodge dist.; Coeur d'Alene. **Development:** By 1 tunnel, 600 ft. long. **Ore:** Lead-silver. **Men employed:** Average, 3. **Remarks:** Active throughout the year in extending its No. 1 tunnel, in which the disclosure of some high-grade lead-silver ore was reported. Funds for work were derived from stock assessments.

TWIN GULCH MINING CO.

Office: 721 Harrison Ave., Coeur d'Alene. **Officers:** J. O. Holman, Pres.-Mgr.; G. W. Sonnichsen, Sec., both of Coeur d'Alene. **Inc.:** Feb. 2, 1924. **Capital:** 1,000,000 shares; par value 10c; 352,000 shares issued. **Property:** Twin Gulch group; unorganized dist.; Coeur d'Alene. **Development:** By 2 short tunnels. **Ore:** Lead-silver.

WOLF LODGE MINING CO.

Office: 108 N. 4th St., Coeur d'Alene. **Officers:** S. J. Nesdrom, Pres., Seattle, Wash.; Oscar W. Nelson, Sec.; F. N. Kilborn, Mgr., both of Coeur d'Alene. **Inc.:** Nov. 7, 1925. **Capital:** 2,000,000 shares; par value 25c; 800,000 shares issued. **Remarks:** This company is a reorganization of the Home Builder Mining & Development Co. The reorganization was perfected in 1925, since which time the officers of the company have refused to file their necessary reports, yet throughout the greater part of this period a large number of stock assessments have been levied.

LATAH COUNTY

Latah County is bounded on the north by Benewah, on the south by Nez Perce, on the west by the State of Washington, and on the east by Shoshone and Clearwater counties. It has an area of 1071 square miles, and was accredited with a population of 18,092 in the 1920 census. Moscow is the largest town and county seat, as well as the location of the University of Idaho and the Idaho Bureau of Mines and Geology. The county is recognized primarily as an agricultural community, particularly for wheat raising.

The principal mineral resources are copper, gold, silver, opals, mica, feldspar, and high-grade fire clay. The clay occurs near the town of Troy and two companies are engaged in manufacturing it into brick, which is used by

different smelters in the northwestern states. The copper, gold, silver, and mica occur in the northern part of the county, north of the towns of Harvard and Vassar, in the Gold Hill, or Blackfoot, Hoodoo, and Avon districts. These districts are served by the Washington, Idaho and Montana Railroad, which connects with the Northern Pacific and the Spokane and Eastern railroads at Palouse, Washington, and the St. Maries-Elk River branch of the Chicago, Milwaukee and St. Paul Railroad at Bovill.

The mica mines have produced a large tonnage of high-grade mica. The resources of the old ones have not been exhausted, many of the prospects justify further development, and there are still many possibilities for the discovery of new veins. As there are many chances for the development of profitable enterprises, these deposits are worthy of more attention than they have been receiving in the past few years.

The development of the mica deposits in this county was resumed during the year. The principal one of these was the Muscovite Mica Co., which reported that it had driven a 300-ft. tunnel to intersect the vein at greater depth.

ACE MINING CO.

Office: Orchard Ave., Spokane, Wash. **Officers:** Chas. G. Taylor, Pres.-Mgr.; W. F. Clausen, Sec., both of Spokane, Wash. **Inc.:** Oct. 29, 1926. **Capital:** 1,500,000 shares; par value 10c; 607,010 shares issued. **Property:** 4 patented, 2 unpatented claims, Hoodoo dist.; Harvard. **Development:** By 2 tunnels: No. 1, 300 ft. long; No. 2, 90 ft. long. **Ore:** Gold. **Remarks:** Idle.

CASSIDY GOLD MINING & MILLING CO., LTD.

Officers: N. J. Stockbridge, Sec., Wallace. **Inc.:** Mar. 12, 1899. **Capital:** 600,000 shares; par value 5c; 437,000 shares issued. **Property:** Cassidy; 1 patented claim, Blackfoot dist. **Ore:** Gold.

COPPER CHIEF MINING & MILLING CO., LTD.

Office: Troy. **Officers:** Robert Olson, Pres.; Alex Johanson, Sec., both of Troy. **Inc.:** July 27, 1914. **Capital:** 1,000,000 shares; par value $1; 485,129 shares issued. **Property:** Copper Chief group; 2 unpatented claims and 10 acres of deeded land, unorganized dist.; Troy. **Development:** By 3 tunnels: No. 1, 300 ft. long; No. 2, 500 ft. long; No. 3, 550 ft. long. **Ore:** Copper. **Remarks:** Annual labor only.

COPPER MOUNTAIN MINING CO.

Office: Palouse, Wash. **Officers:** R. A. Belvail, Pres.; J. C. Northrup, Sec., both of Palouse. **Inc.:** Oct. 29, 1925. **Capital:** 3,750,000 shares; par value 1c; 1,296,765 shares issued. **Property:** Mizpah group; 20 unpatented claims, Hoodoo dist.; Harvard. **Development:** Total development approximately 2600 ft. **Plant:** A 12x14 gas-driven compressor; complete mining equipment, and camp. **Ore:** Copper. **Remarks:** A reorganization of the Merger Mining Co., Ltd. Annual labor only.

GOLD HILL MINING & MILLING CO.

Office: Harvard. **Officers:** K. F. Pinnell, Pres.-Mgr.; May Pinnell, Sec., both of Harvard. **Inc.:** Nov. 6, 1922. **Capital:** 1,000,000 shares; par value 25c; 612,959 shares issued. **Property:** Gold Bug group; 4 patented claims, 65 acres; held under lease and bond from the Garfield Mining & Milling Co., of Garfield, Wash.; Blackfoot dist.; Harvard. **Development:** Approximately 1200 ft. of tunnels and drifts, and 1 vertical shaft 300 ft. deep. **Plant:** Steam-driven hoist and compressor. **Ore:** Gold, silver, copper.

IDAHO CERAMIC MATERIALS CO.

Office: W. 326 First Ave., Spokane, Wash. **Officers:** Carl R. Suksdorf, Pres.-Mgr., Troy; L. P. Mills, Sec., Spokane, Wash. **Inc.:** Sept. 17, 1927. **Capital:** 275,000 shares; par value $1; 100,000 shares issued. **Property:** 288 acres of patented farm land near Troy; held under lease and option. **Mineral sought:** Koalin, silica, mica. **Remarks:** A small amount of development work.

MUSCOVITE MICA CO.

Office: Box 166, Lewiston. **Officers:** Jack Wills, Pres., Kooskia; W. E. Parry, Sec., Lewiston. **Inc.:** Feb. 7, 1927. **Capital:** 5000 shares; par value $100; 3000 shares issued. **Property:** Muscovite Mica group; 2 unpatented claims and 35 acres held under State lease. **Mineral sought:** Mica. **Men employed:** Average, 3. **Remarks:** During the year the road was reconstructed, and a projected 500-ft. tunnel was driven 300 ft.

TROY GOLD & COPPER MINING CO., LTD.

Office: Troy. **Officers:** E. J. Gemmill, Pres.-Mgr., Moscow; T. H. Christie, Sec., Troy. **Inc.:** May 26, 1909. **Capital:** 1,000,000 shares; par value $1; 510,100 shares issued. **Property:** 20 acres patented farm land, unorganized dist.; Troy. **Ore:** Copper. **Remarks:** Idle.

LEMHI COUNTY

Lemhi County is situated in central-eastern Idaho, bounded on the north and east by the State of Montana, on the west by Idaho and Valley counties, and on the south by Custer, Butte, and Clark counties. It has an area of 4597 square miles, which is about equal to the State of Connecticut, and was accredited with a population of 5164 in the 1920 census, or 1.1 persons to the square mile. A provisional county government was organized in July, 1867, and in January, 1869, the Territorial Legislature permanently established the county with Salmon City as the county seat, an honor which it has always retained. The larger part of the population is located in the Lemhi River and Pahsimeroi River valleys, and is engaged in the pursuits of agriculture and stockraising.

It is one of the principal mining counties of the State, and always ranks as one of the largest producers. The extensive and varied mineral resources; the many veins that have been discovered, yet not developed; the many undiscovered veins; the excellent mining conditions; the many producing mines and prospects; and its location, both geographically and geologically, place this county within the area known as Central Idaho's Mineral Empire.

The county is served by the Pittsburg & Gilmore Railroad, which plies between Armstead, Montana, and Salmon, with a branch line from Leadore to Gilmore; by the Sawtooth Park State highway from Challis to Salmon, which follows the Salmon River and which is fully completed; and by a system of county roads which lead into all the outlying settlements and mining districts.

The principal mineral resources are lead, copper, silver, gold, zinc, tungsten, manganese, molybdenum, nickel, cobalt, gypsum, tin, and lignite. The formations in which the various mineral deposits occur range from early sedimentary rocks to late igneous rocks and include all those which are favorable to the deposition of ore in commercial quantities. The deposits are widely distributed throughout the vast mountainous areas which comprise a large part of the county. The wide distribution of the deposits, the diversity of mineralization, the favorable geological conditions, and the many opportunities for the development of profitable enterprises, make this county an exceptionally favorable field for prospectors and development companies.

In point of production and number of men employed, Gilmore continues to be the most active mining camp in Idaho outside of the Coeur d'Alene district. The Pittsburgh-Idaho mine of the United Idaho Mining Co., a subsidiary of the U. S. Smelting, Refining & Mining Co., is the largest lead-producing mine and maintains the second largest pay roll in southern Idaho. During the year this company extended its shaft from the 800-foot level to the 1000-foot level, where the ore bodies proved to be of greater extent than on the 800-foot level. In addition to sinking the shaft, this company performed a large amount of development work and produced and marketed a large tonnage of high-grade, direct-shipping ore, some of which was obtained by lessees. During the year the United States Smelting, Refining & Mining Co. obtained a lease and option on the Allie mine and commenced developing it through what is known as the Transportation tunnel. This tunnel is about 600 feet under the upper workings, which were operated throughout the year by lessees who produced a substantial tonnage of direct-shipping ore. Two small organizations developing prospects in the Gilmore district were also active during the year. The Spring Mountain and Nicholia districts witnessed a little increase in activity over the previous year, and one small organization shipped two carloads of hand-sorted ore.

The only work done in the Leadore district during the year was necessary annual labor. In the vicinity of Salmon there was a marked improvement in mining conditions which was principally brought about by the operations at the Pope-Shenon mine by the lessee, the Winder-Stillman Copper Co., which rebuilt the mill, added flotation cells, performed a large amount of development work in the mine, and produced and marketed a

substantial tonnage of high-grade copper concentrate. The Tendoy-Copper Queen Mining Co., operating the Copper Queen mine, rebuilt the mill, constructed new mine camp buildings, and placed the mine in condition for operation. The Harmony Mines Co. performed a small amount of development work and operated its mill for a short period, although the company's principal activity appeared to be that of raising more funds.

In the Leesburg district the principal new activities were based on the revival of hydraulic placer mining. Four enterprises constructed ditches, dams, and flumes, completed the installation of hydraulic mining equipment and performed a small amount of hydraulicking. These were: Bonanza Placer, Inc.; H. F. Byram at the McNutt Placers on Moose Creek; Montana Mining & Livestock Co.; and Leesburg Placer Mine Co. The Patterson Mines Corporation, which is operating the Ima mine on Patterson Creek in the Pahsimeroi district, completed the rehabilitation of the power plant and mill and commenced active mine development work. The Clipper Bullion mine in the Shoup district was acquired by H. W. Ingalls and associates of Mullan, and development work started in October. The Buckhorn Mining Co., a new organization on the Sellers Bros. property on Little Eight-Mile, installed a compressor, complete mining equipment, and began the active development of the property.

ALLIE MINE

Office: Gilmore. **Officers:** Edgar C. Ross, Lessee; Ervin Jewett, Mgr. both of Gilmore. **Property:** Allie group; 12 patented claims, Texas dist. Gilmore; operated under lease from the Gilmore Mercantile Co. **Development:** Principally by 1 tunnel, 6000 ft. long, in which are 2 inclined shafts with 6 intermediate levels, opening the vein 290 ft. below the tunnel. **Plant:** 40-kw. electric generator, driven by Fairbanks-Morse semi-Diesel engine; 2 electrically-driven hoists; 1200-ft. aerial tramway; mine buildings. **Ore:** Lead-silver. **Men employed:** Average, 16. **Remarks:** A large amount of development work was performed and a substantial tonnage of ore was produced and marketed. During the year the property was optioned to the United States Smelting, Refining & Mining Co. who commenced developing it through what is known as the Transportation tunnel. This tunnel is about 600 ft. under the upper workings.

BEAVERHEAD LEAD MINES CO.

Office: Cheney Bldg., Reno, Nev. **Officers:** John Salsberry, Pres., Mill Bldg., San Francisco; J. E. Sullivan, Sec., Cheney Bldg., Reno, Nev. **Inc.:** Filed in Idaho, May 12, 1927. **Capital:** 3,000,000 shares; par value 10c; 2,000,000 shares issued. **Property:** Viola group; 1 patented, 1 unpatented claim, Nicholia dist.; Gilmore. **Ore:** Lead-silver. **Remarks:** Operated throughout the year by 2 lessees, who produced and shipped a small tonnage of ore.

BONANZA PLACER, INC.

Office: Leesburg. **Officers:** Carl A. Poulsen, Pres.-Mgr.; G. C. Hodson Sec., both of Leesburg . **Inc.:** Filed in Idaho, Dec. 6, 1926. **Capital:** 2,500,000 shares; par value 10c; 1,900,000 shares issued. **Property:** 1 unpatented placer claims, Mackinaw dist.; Leesburg. **Ore:** Placer gold. **Men employed:** Average 10. **Remarks:** Construction of ditches, dams and flumes completed, hydraulic equipment installed, and a small amount of mining done prior to freezing weather.

CONTINENTAL STANDARD MINING CO.

Office: Pocatello. **Officers:** C. M. Sonoda, Pres., Pocatello; M. F. Barrett, Sec.; C. N. Friday, Mgr., both of Leadore. **Inc.:** Jan. 2, 1926. Charter forfeited Nov. 30, 1928. **Capital:** 100,000 shares preferred, 1,000,000 shares common; par value $1; 782,350 shares issued. **Property:** Grizzly Hill group; 33 unpatented claims, Junction dist.; Leadore. **Development:** By 5 tunnels, totaling approximately 1000 ft. **Ore:** Lead-silver. **Men employed:** Average, 6. **Remarks:** Small amount of development during the summer months.

GOLD FLOTATION DEVELOPMENT CO.

Office: 402 Empire State Bldg., Spokane, Wash. **Officers:** Harold Williams, Pres., Masonia; H. G. Loop, Sec., Spokane, Wash. **Inc.:** May 9, 1927. **Capital:** 1,500,000 shares; par value 10c; 861,050 shares issued. **Property:** Singiser group; 6 patented claims, Gravel Range dist.; Forney. **Ore:** Gold.

PLACER MINING IN LEMHI COUNTY

GOLDSTONE MINES CORPORATION

Office: 409 Empire State Bldg., Spokane, Wash. **Officers:** Geo. H. Walters, Pres.; O. C. Lapp, Sec., both of Spokane; Andrew Prader, Mgr., Baker. **Inc.:** Apr. 9, 1928. Charter forfeited Nov. 30, 1928. **Capital:** 2,000,000 shares; par value 25c; 107,000 shares issued. **Property:** Goldstone group; 11 unpatented claims held under lease and option. **Development:** Principally by one tunnel 1000 ft. long. **Plant:** MINE: Steam-driven compressor; complete mining equipment and camp. MILL: 10-stamp mill. **Ore:** Gold. **Remarks:** Small amount of development work and a short mill-run during the year.

HAYNES-STELLITE CO.

Office: 30 E. 42d St., New York City. **Officers:** B. O'Shea, Pres.; A. G. Cornell, Sec., both of New York City; F. P. Gormely, Mgr., Kokomo, Ind. **Inc.:** Feb. 8, 1917. **Capital:** 7500 shares; par value $100; 2250 shares issued. **Property:** Cobalt group; 10 patented, 24 unpatented claims, Blackbird dist.; Leesburg. **Development:** 2 tunnels: No. 1, 440 ft. long; No. 2, 550 ft. long; and numerous crosscuts and raises totaling approximately 3600 ft. **Plant:** MINE: 200-cu.-ft. gas-driven compressor; gravity tramway. MILL: Small steam-driven concentrator. **Ore:** Cobalt. **Remarks:** Idle.

HORSE CREEK MINING CO.

Office: Salmon. **Officers:** P. H. Martin, Pres.-Mgr., Alta, Mont.; H. C. Packer, Sec., Hamilton, Mont. **Inc.:** May 1, 1923. **Capital:** 100,000 shares; par value $1; 56,872 shares issued. **Property:** Horse Creek group; 7 unpatented claims, 140 acres; Mineral Hill dist.; Alta, Mont. **Development:** About 500 ft. of tunnels. **Ore:** Lead-silver. **Remarks:** In addition to annual labor, a small amount of road building was done during the year.

IDAHO MINERALS CO.

Office: Idaho Falls. **Officers:** Simon Martin, Pres.-Mgr.; Louis Saar, Sec., both of Idaho Falls. **Inc.:** Aug. 13, 1919. **Capital:** 500 shares; par value $100; 325 shares issued. **Property:** Red Warrior group; 3 unpatented claims, Spring Mountain dist.; Gilmore. **Development:** By 2 tunnels: No. 1, 180 ft. long; No. 2, 275 ft. long. **Plant:** 50-ton steam-driven concentrator, built in 1921. **Ore:** Lead-silver. **Remarks:** Annual labor only.

IDAHO PREMIER MINES CORPORATION

Office: Kellogg. **Officers:** A. C. Beal, Pres.-Mgr.; Lester S. Harrison, Sec., both of Kellogg. **Inc.:** Mar. 28, 1927. **Capital:** 1,200,000 shares; par value $1; shares issued, unknown. **Property:** Leadore group; 36 unpatented claims, Junction dist.; Leadore. **Development:** By 2 tunnels: No. 1, 500 ft. long; No. 2, 876 ft. long. **Plant:** MINE: Small gas-driven compressor. MILL: Small gas-driven concentrator. **Ore:** Lead-silver. **Remarks:** Annual labor only.

IMA CONSOLIDATED MINING & MILLING CO.

Office: 608 Deseret Bank Bldg., Salt Lake City, Utah. **Officers:** Oscar W. Moyle, Pres.; Harry W. Rudine, Sec., both of Salt Lake City, Utah. **Inc.:** Dec. 16, 1902. **Capital:** 200,000 shares; par value 1c; all shares issued. **Property:** Ima group; 21 patented, 4 unpatented claims, Blue Wing dist.; May. **Development:** By 2 tunnels: No. 1, 1250 ft. long; No. 2, 1000 ft. long. **Plant:** MINE: Water-driven compressor; complete mining equipment and camp. MILL: 100-ton water-driven concentrator, constructed in 1915. **Ore:** Silver, copper, tungsten. **Remarks:** Property under lease to Patterson Mines Corporation.

LATEST OUT MINING & SMELTING CO., LTD.

Office: Salmon. **Officers:** D. L. Nichols, Sec.-Mgr., Salmon. **Inc.:** May 23, 1910. **Capital:** 500,000 shares; par value $1; all shares issued. **Property:** Latest Out; 1 patented claim, Texas dist.; Gilmore. **Development:** 1 tunnel, 365 ft. long; 2 inclined shafts, totaling 1100 ft., giving a vertical depth on the vein of 700 ft. Total development approximately 32,000 ft. **Plant:** F-M 40-h. p. gas-driven hoist; 145-cu.-ft. I-R gas-driven compressor; gravity tram; complete mining equipment and camp. **Ore:** Lead-silver. **Remarks:** Idle on account of litigation.

LEADORE-LEMHI COPPER MINING CO.

Office: Leadore. **Officers:** J. D. Pritchett, Pres.-Mgr.; Roland Davidson, Sec., both of Leadore. **Inc.:** Aug. 22, 1927. **Capital:** 500,000 shares; par value 10c; 150,000 shares issued. **Property:** Baltimore group; 3 unpatented claims, McDevitt dist.; Leadore. **Development:** By 2 short tunnels. **Ore:** Copper-silver. **Men employed:** Average, 1. **Remarks:** Active during the summer months.

LEMHI MINING CO.

Office: Winchester, Ind. **Officers:** R. W. Knowlton, Pres., Ashtabula, Ohio; A. L. Nichols, Sec., Winchester, Ind.; R. E. Lee Ramey, Mgr., Salmon. **Inc.:** Jan. 16, 1924. **Capital:** 5000 shares; no par value; 4942 shares issued. **Property:** Rabbit Foot group; 8 unpatented claims, Gravel Range dist.; Forney. **Development:** By 3 tunnels, the principal one of which is 1700 ft. long. **Plant:** MINE: Steam-driven hoist. MILL: 10-stamp amalgamation. **Ore:** Gold. **Remarks:** Annual labor only.

McNUTT PLACER

Lessee: H. F. Byram, Route 8, Portland, Ore. **Property:** McNutt placer; 2 patented, 3 unpatented claims, Leesburg dist.; Leesburg; held under lease from John E. Mullen, Salmon. **Plant:** Hydraulic equipment. **Ore:** Placer gold. **Men employed:** Average, 7. **Remarks:** Ditches, dams, and flumes were constructed; mining equipment was installed; and a small amount of hydraulicking was performed during the year.

MONTANA MINING & LIVESTOCK CO.

Office: 1027 S. Flower St., Los Angeles, Calif. **Officers:** C. A. Devlan, Pres.-Mgr., Leesburg; E. H. Devlan, Sec., Los Angeles, Calif. **Inc.:** Mar. 8, 1919. **Capital:** 5,000,000 shares, par value 10c, 961,493 shares issued. **Property:** Leesburg group: 11 unpatented placer claims, Meadow dist., Leesburg. **Plant:** Steam-driven hoist and 100-cu.-ft. I-R compressor; complete mining and logging equipment; saw mill; complete camp and buildings. **Ore:** Placer gold. **Remarks:** Small amount of work during the summer months.

NORTHWESTERN DEVELOPMENT CO., LTD.

Office: Ashland, Ky. **Officers:** C. E. Williams, Pres.; Thomas Boggess, Sec., both of Ashland, Ky. **Inc.:** Aug. 24, 1916. **Capital:** 500,000 shares, par value $1; 233,846 shares issued. **Property:** Primrose group: 4 patented claims, Eldorado dist.; Salmon. **Plant:** Gas-driven compressor; complete mining equipment and mine camp. **Ore:** Gold-silver-copper. **Remarks:** Idle.

PATTERSON MINES CORPORATION

Office: First National Bank Bldg., Pocatello. **Officers:** Finis Bentley, Pres.; W. R. Howard, Sec., both of Pocatello; W. P. Barton, Mgr., May. **Inc.:** Apr. 3, 1927. **Capital:** 1,000,000 shares, par value $1; 121,107 shares issued. **Property:** Lease and option on property of Ima Consolidated Mining & Milling Co. **Men employed:** Average, 12. **Remarks:** In addition to a small amount of development work being performed, mill and power plant were further repaired during the year.

POCATELLO-LEMHI MINING & EXPLORATION CO.

Office: 231 N. Main St., Pocatello. **Officers:** W. E. Magnuson, Pres.; Al. Hawkins, Sec., both of Pocatello; M. F. Barrett, Mgr., Leadore. **Inc.:** Oct. 22, 1925. **Property:** Jamieson group, 18 unpatented claims, Junction dist.; Leadore. **Development:** By 4 tunnels. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** Small amount of development work during the summer months. A short assessment of 3 miles was levied on February 27.

PORTLAND MINING CO.

Office: Butte, Mont. **Officers:** E. J. Carleton, Pres., N. Y. Life Bldg., Minneapolis, Minn.; W. S. Shaw, Sec., Butte, Mont. **Inc.:** Aug. 11, 1916. **Capital:** 500,000 shares, par value $1; all shares issued. **Property:** Portland group: 3 patented, 11 unpatented claims, Texas dist., Gilmore. **Remarks:** Small amount of development work by lessees.

RESCUE GOLD MINES CO.

Office: P. O. 824, Pasadena, Calif. **Officers:** Chas. Muehrcke, Pres.; Willis H. Brown, Sec., both of Pasadena, Calif. **Inc.:** Apr. 27, 1916. Charter forfeited Nov. 30, 1924. **Capital:** 50,000 shares, par value $1; 18,891 shares issued. **Property:** Rescue group: 21 patented claims, Patterson dist.; Gibbonsville. **Ore:** Gold. **Remarks:** Idle.

SPRING MOUNTAIN MINING CO., INC.

Office: Gilmore. **Officers:** E. G. Carlson, Pres.; A. S. Weiss, Sec., both of Gilmore. **Inc.:** Filed in Idaho, Dec. 14, 1927. **Capital:** 1,000 shares, par value $100; all shares issued. **Property:** Big Windy group, 1 unpatented claims, Spring Mountain dist.; Gilmore; held under lease and option. **Development:** By 3 tunnels: No. 1, 275 ft.; No. 2, 875 ft.; No. 3, 200 ft. **Ore:** Lead-silver. **Men employed:** Average, 6. **Remarks:** Mine buildings repaired; small amount of development work performed; small tonnage of ore produced and marketed.

TENDOY COPPER QUEEN MINING CO.

Office: Salmon. **Officers:** C. B. Bash, Pres.-Mgr., Salmon; H. T. Rosecrans, Sec., Toledo, Ohio. **Inc.:** Feb. 14, 1924. **Capital:** 100,000 shares common, par value $1; 2000 shares preferred, par value $10; 10,000 shares common, 375 shares preferred issued. **Property:** Copper Queen group; 3 patented, 6 unpatented claims, held under lease and option, McDevitt dist.; Tendoy. **Development:** By 3 tunnels and a 300-ft. shaft. **Plant:** MINE: Gas-driven compressor; complete mining equipment and

camp. MILL: 50-ton gas-driven concentrator. **Ore:** Copper-gold. **Men employed:** Average, 12. **Remarks:** During the year camp buildings were reconstructed, mill was rehabilitated, a small amount of development work performed, and small tonnage of crude ore marketed.

UNCLE SAM MINING & DEVELOPMENT CO., LTD.
Office: Salmon. **Officers:** Owen Swift, Pres.-Mgr.; L. E. Glennon, Sec., both of Salmon. **Inc.:** May 20, 1926. **Capital:** 250,000 shares; par value 10c; 125,000 shares issued. **Property:** Uncle Sam group; 4 unpatented claims, Eldorado dist.; Tendoy. **Development:** By 1 tunnel 250 ft. long. **Men employed:** Average, 2. **Ore:** Copper. **Remarks:** This property is owned and financed by local people, who actively prosecuted the driving of the tunnel throughout the year.

UNITED IDAHO MINING CO.
Office: No. 1, State St., c|o U. S. Smelting, Refining & Mining Co., Boston. **Officers:** C. A. Hight, Pres.; F. W. Batchelder, Sec., both of Boston; D. D. Muir, Jr., Mgr., Newhouse Bldg., Salt Lake City. **Inc.:** Oct. 18, 1924. **Capital:** 10,000 shares common, no par value; 10,000 shares preferred, par value $10; 7053 shares common issued. **Property:** Pittsburg-Idaho group; 5 patented claims, Texas dist.; Gilmore. **Development:** 4 tunnels: No. 1, 600 ft. long; No. 2, 950 ft. long; No. 3, 1600 ft. long; No. 4, 1300 ft. long, in which is an inclined shaft 1200 ft. long, which gives a vertical depth of 950 ft. on the vein. **Plant:** MINE: 2 200-kw. Allis-Chalmers Diesel engines with generator, 1 I-R electrically-driven 9x8, and 1 C-P gas-driven compressor; 100-h.p. electrically-driven double-drum hoist; complete mining equipment, camp, and buildings. MILL: 50-ton gas-driven concentrator. **Ore:** Lead-silver. **Men employed:** Average, 94. **Remarks:** This mine is the largest lead-silver mine in southern Idaho and maintains the second largest payroll. A large tonnage was produced and marketed, part of which was extracted by lessees; and active mine development work was maintained throughout the year, consisting principally of sinking the shaft from the 850 to the 950-ft. level. One new 200-kw. Allis-Chalmers Diesel engine with generator was installed during the year.

UTANA MINING CORPORATION
Office: 205 Felt Bldg., Salt Lake City, Utah. **Officers:** W. H. Penner, Pres.-Mgr.; Web Greene, Sec., both of Salt Lake City. **Inc.:** Aug. 4, 1921. **Capital:** 1,000,000 common, par value 10c; 100,000 preferred, par value $1; 119,000 shares issued. **Property:** Big Dyke group; 22 unpatented claims, Freeman dist.; Salmon. **Development:** Approximately 1600 ft. of underground workings. **Plant:** Steam-driven compressor; complete mining equipment and camp; complete machinery and equipment for a cyanide plant. **Ore:** Lead, silver, copper, zinc. **Remarks:** Annual labor only.

VIRGINIA GOLD MINING & MILLING CO.
Office: 1462 S. 9th E., Salt Lake City, Utah. **Officers:** W. A. Shaw, Pres.; L. M. Byers, Sec., both of Salt Lake City. **Inc.:** Aug. 21, 1925. **Capital:** 2,500,000 shares; par value 1c; 2,000,000 shares issued. **Property:** Virginia group; 9 patented, 13 unpatented claims, Eureka dist.; Baker.

WINDER-STILLMAN COPPER CO.
Office: Salmon. **Officers:** R. H. Winder, Pres., Salt Lake City; J. W. Jones, Sec.-Mgr., Salmon. **Inc.:** Unknown. **Capital:** 1,000,000 shares; par value 1c; 330,275 shares issued. **Property:** Pope-Shenon group; 12 patented claims, Eureka dist.; Salmon. **Development:** 6 tunnels: No. 1, 70 ft. long; No. 2, 80 ft. long; No. 3, 400 ft. long; No. 4, 130 ft. long; No. 5, 800 ft. long; No. 6, 1000 ft. long. Total development approximately 3000 ft. of underground workings. **Plant:** MINE: 12x10 I-R electrically-driven compressor; Sullivan steel sharpener; complete mining equipment and camp. MILL: 60-ton electrically-driven concentrator, including fine grinding and flotation. **Ore:** Copper. **Men employed:** Average, 33. **Remarks:** Active throughout the year, and a substantial tonnage of concentrate marketed.

LEWIS COUNTY

Lewis is one of the northern counties, being bounded on the north and west by Nez Perce, on the northeast by Clearwater, and on the east and south by Idaho County. Containing an area of but 470 square miles, and a population of 12.4 persons to the square mile, it is one of the smallest counties in the State in area and one of the largest in density of population. Excepting the small area occupied by Craig Mountains, practically all the county is tillable, and the principal industries are wheat raising and lumbering.

The county is served by the North and South State highway, by the Lewiston-Stites branch of the Northern Pacific Railroad, by the Lewiston-Grangeville branch, which is owned jointly by the Union Pacific and Northern Pacific railroads, by the Nez Perce & Idaho Railroad from Craigmont to Nez Perce, the county seat, and by the Craig Mountain Railroad from Reubens to Winchester.

The principal mineral resources are copper, gold, silver, marble, and limestone. Veins containing copper, gold, and silver have been discovered and developed in the Craig Mountains, principally along Deer Creek. At one time this section received considerable attention, and a small mill was constructed at one of the mines. The marble and limestone occur on Mission Creek near the Nez Perce County line. The marble occurs in all shades, colors, and diagrams familiar to the marble industry; it is exceptionally adaptable to commercial use and one enterprise has been started to utilize and manufacture the marble and limestone into marketable products.

The Winchester Copper Mining & Smelting Co., which acquired the Forest group of copper claims on Deer Creek in 1926, was active throughout the year.

CRAIG MOUNTAIN MINING & MILLING CO.

Office: Lewiston. **Officers:** Ben L. Schultz, Pres.-Mgr., Lewiston; W. W. Burr, Sec., Genesee. **Inc.:** Nov. 30, 1925. **Capital:** 600,000 shares; par value $1; 475,000 shares issued. **Property:** Craig Mountain group; 26 unpatented claims, Deer Creek dist.; Winchester. **Development:** Total development, approximately 5000 ft. **Plant:** Old mining and milling plant and equipment, installed in 1915. **Ore:** Copper. **Remarks:** Annual labor only.

WINCHESTER COPPER MINING & SMELTING CO.

Office: Winchester. **Officers:** D. Nicholson, Pres.; W. M. Nicholson, Sec., both of Winchester. **Inc.:** Aug. 7, 1926. **Capital:** 1,500,000 shares; par value 10c; 1,218,890 shares issued. **Property:** Forest group; 11 unpatented claims, Deer Creek dist.; Winchester. **Development:** By 3 tunnels: No. 1, 600 ft. long; No. 2, 600 ft. long; No. 3, 1000 ft. long. **Plant:** Gas-driven Sullivan compressor; complete mining equipment and camp. **Ore:** Copper-silver. **Men employed:** Average, 7. **Remarks:** Active throughout the year in extending No. 3 tunnel.

NEZ PERCE COUNTY

Nez Perce is one of the principal northern counties, bounded on the south and east by Idaho and Lewis counties, on the north and east by Clearwater and Latah counties, and on the west by the States of Washington and Oregon. It has an area of 851 square miles and was accredited with a population of 15,253 in the 1920 census. It is primarily an agricultural county, and Lewiston, the largest town and civic center of north-central Idaho, is the county seat. The county was originally organized under an act of the Legislature of Washington Territory before the Territory of Idaho was organized, and Lewiston was first settled in 1861, consequent to the discovery of, and as a supply point for, the placer mines in Clearwater and Idaho counties.

Lewiston is at the junction of the Snake and Clearwater rivers; steamboats can reach it from Portland, Oregon, although they are not used as a means of transportation from that point, and both rivers are navigable for boats of light draft. In addition to river boats, the county is served by the Union Pacific and Northern Pacific railroads, and by the North and South, and Lewis and Clark State highways.

The principal mineral resources are copper, silver, gold, marble, and limestone. The metals occur in isolated sections of the county and have never received much attention. The limestone, which is adaptable to Portland cement, occurs on the Snake River north of Lewiston, but the deposits have never been developed. The marble, which is of excellent grade and quality, occurs on the Clearwater River near Agatha. A little attempt has been made to exploit the marble deposits.

BONANZA GOLD MINING & MILLING CO.

Office: Lewiston. **Officers:** Geo. C. Ettershank, Pres.; Earl Parks, Sec., both of Lewiston. **Inc.:** Apr. 21, 1928. **Capital:** 250,000 shares; par value $1; 50,000 shares issued. **Property:** Bonanza group; 3 unpatented claims, unorganized dist.; Cove Gulch; Lewiston. **Development:** By 2 tunnels: No. 1, 250 ft. long; No. 2, 105 ft. long. **Ore:** Copper-silver-gold. **Men employed:** Average, 2. **Remarks:** Small amount of work during the summer months.

INDEPENDENT MARBLE & LIME CO.

Office: Lewiston. **Officers:** F. S. Johnson, Pres., Nez Perce; P. R. Bevis, Sec., Lewiston. **Inc.:** Jan. 25, 1926. **Capital:** 1,000,000 shares; par value $1; 250,000 shares issued. **Property:** 220 acres held under lease and option; on Mission Creek. **Mineral sought:** Limestone.

OWYHEE COUNTY

Owyhee is one of the historic counties of Idaho. It is situated in the southwestern portion of the State, and is bounded on the north by Canyon, Ada and Elmore counties, on the east by Twin Falls County, on the south by the State of Nevada, and on the west by the State of Oregon. Its area is 7956 square miles, being larger than the State of New Jersey, and its population according to the 1920 census was only 4694, or 0.6 persons to the square mile. The principal industries are farming, stockraising, and mining. Silver City, one of the oldest towns in the State, is the county seat.

The history of this county dates back to the discovery of placer gold and the rich veins of War Eagle Mountain in 1863. The first quartz mill was constructed in 1864, and for many years thereafter Owyhee was the principal mining county. The ores which occur in this county are the richest gold-silver ores ever discovered in the State, and many tons which were either milled or sent directly to smelter had a phenomenal value. Early statistics are not very reliable, but from the best sources available, an estimated production of over $40,000,000 is conservative.

The principal mineral resources of the county are silver, gold, copper, lead, zinc, antimony, diatomaceous earth, opals, manganese, and nitrates. The diversity of mineralization, the favorable geological conditions, and the wide distribution of the deposits throughout the county make it an exceptionally favorable field for prospectors and development companies, particularly because all the high-grade ore in the old mines has not been exhausted, nor have all the veins been discovered.

The new dredge of the American Gold Dredging Corporation, being of the flume type, was completed and placed in operation in January, 1928, and continued without much interruption throughout the year. During the year three new development enterprises were started, and a large number of investigations by those seeking gold-silver mines were conducted.

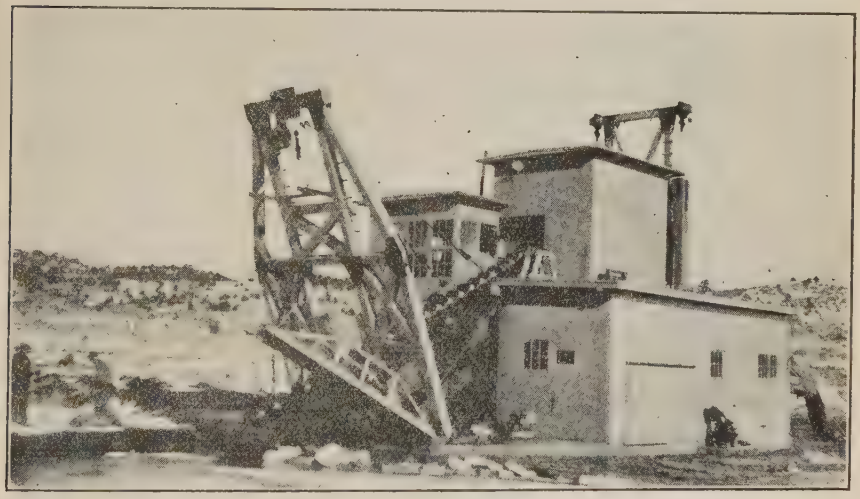
AFTERTHOUGHT MINING CO.

Office: 434 First Nat'l Bank Bldg., Boise. **Officers:** James Munro, Vice.-Pres.; S. L. Tipton, Sec., both of Boise. **Inc.:** Feb. 15, 1927. **Capital:** 400,000 shares common, 100,000 shares preferred; par value $1; 165,030 shares common, 3300 shares preferred issued. **Property:** Afterthought group; 1 patented, 4 unpatented claims, French dist.; Silver City; held under lease and option from E. V. Orford, Boise. **Development:** Principally by a vertical shaft 470 ft. deep, in which there are 5 intermediate levels. **Ore:** Silver-gold. **Remarks:** Idle throughout the year.

AMERICAN GOLD DREDGING CORPORATION

Office: 1920 Dime Bank Bldg., Detroit, Mich. **Officers:** Walter J. Long, Pres.-Mgr., 8th St. & Garden Ave., Boise; Louis B. Hyde, Sec., Detroit, Mich. **Inc.:** Filed in Idaho, Jan. 2, 1926. **Capital:** 300,000 shares common, 200,000 shares preferred; par value $1; 155,000 shares common, 164,000 shares preferred issued. **Property:** Meadow Creek group; 18 unpatented placer claims, containing 360 acres, part of which are held under lease and option; Steele dist.; Triangle. **Plant:** Electrically-driven flume-type Yuba dredge with 2½-cu.-ft. buckets close connected. **Ore:** Placer gold. **Men employed:** Average, 15. **Remarks:** During 1927 this company constructed its dredge, new mine camp, and 4-mile electric transmission line. Dredging operations were commenced in January, 1928, and continued until freezing weather interrupted. During part of the year the manager was displaced for a few months and operations were conducted from the Detroit office; this handicapped the company and its affairs.

BANNER MINING & MILLING CO.



Office: 1122 State St., Boise. **Officers:** Peter Steele, Pres.-Mgr., Silver City; F. S. Heer, Sec., Boise. **Inc.:** June 15, 1905. **Capital:** 1,500,000 shares; par value $1; 1,200,000 shares issued. **Property:** Banner group; 10 patented, 12 unpatented claims, Carson dist.; Silver City. **Development:** Over 11,000 ft. of underground workings. **Remarks:** Idle since 1923.

BIG FOUR DEVELOPMENT CO.

Office: Box 1061, Boise. **Officers:** C. C. Zumwalt, Pres.-Mgr., Boise; M. H. Eustace, Sec., Caldwell. **Inc.:** Apr. 2, 1924. **Capital:** 500,000 shares; par value $1; 260,000 shares issued. **Property:** Cumberland group; 3 patented claims, War Eagle Mountain, French dist.; Silver City; held under lease and option.

CASTLE CREEK MINING & MILLING CO.

Office: 319 Yates Bldg., Boise. **Officers:** C. E. Beymer, Pres.-Mgr.; W. P. Nelson, Sec., both of Boise. **Inc.:** An association. **Capital:** 500,000 shares; par value $1; 495,000 shares issued. **Property:** 8 patented, 2 unpatented claims in Pixley Basin, unorganized dist.; Grandview. **Development:** Principally by 3 tunnels: No. 1, 150 ft. long; No. 2, 350 ft. long; No. 3, 1100 ft. long; an inclined shaft 220 ft. long. **Plant:** MINE: 10x10 gas-driven compressor; complete mining equipment and camp. MILL: 30-ton gas-driven concentrator including flotation. **Ore:** Silver. **Men employed:** Average, 2. **Remarks:** No. 3 tunnel extended during the year.

AMERICAN GOLD DREDGING CORPORATION'S DREDGE

COSMOPOLITAN MINING CO., LTD.

Office: Murphy. **Officers:** Fred L. Barlow, Pres., Nampa; Oscar Brunzell, Sec., Murphy. **Inc.:** Nov. 17, 1923. **Capital:** 500,000 shares; par value $1; 127,327 shares issued. **Property:** Hammond group; 5 unpatented claims, Carson dist.; Silver City. **Development:** By 2 tunnels: No. 1, 420 ft. long; No. 2, 344 ft. long. **Ore:** Antimony-silver. **Remarks:** A small amount of work during the year.

EMPIRE MINES CO.

Office: 1122 State St., Boise. **Officers:** Peter Steele, Pres.-Mgr., Silver City; F. S. Heer, Sec., Boise. **Inc.:** Sept. 15, 1923. **Capital:** 2,500,000 shares; par value $1; 2300 shares issued. **Property:** Trade Dollar group; 37 patented, 6 unpatented claims, Carson dist.; Silver City. **Remarks:** Part of mine under lease to the Hoosier Leasing Co.

GOLCONDA GROUP MINING CO.

Office: N. 610 Washington St., Spokane, Wash. **Officers:** G. A. Sonneman, Pres.-Mgr.; E. W. Sonneman, Sec., both of Spokane, Wash. **Inc.:** Jan. 11, 1908. **Capital:** 1,500,000 shares; par value 1c; all shares issued. **Property:** South Mountain group; 15 patented claims, South Mountain dist.; Jordan Valley, Ore. **Plant:** Small gas-driven compressor. **Ore:** Lead-zinc-silver. **Remarks:** Idle.

GREAT WESTERN MINES CO.

Office: Room 169, Republican House, Milwaukee, Wis. **Officers:** A. J. Kraemer, Pres., Menomonee Falls, Wis.; F. H. Mayhew, Sec., Milwaukee, Wis.; T. W. Galigher, Agent, 915 N. 21st St., Boise. **Inc.:** Nov. 29, 1920. **Capital:** 1,500,000 shares; par value 1c; 1,308,406 shares issued **Property:** Quaker group; 3 unpatented claims, French dist.; Silver City. **Development:** By 2 tunnels: No. 1, 2600 ft. long; No. 2, 2800 ft. long. **Plant:** Electrically-driven 10x10 compressor; complete mining equipment and camp. **Ore:** Gold. **Men employed:** Average, 3. **Remarks:** Active development work throughout a large part of the year.

HOOSIER LEASING CO.

Office: Silver City. **Officers:** Charles A. Hackney, Pres.; Peter Steele, Mgr., both of Silver City; Victor Shawe, Sec., Boise. **Inc.:** Nov. 16, 1926. **Capital:** 100,000 shares; par value $1; 35,793 shares issued. **Property:** Lease on Alpine vein from Empire Mines Co.; Carson dist.; Silver City. **Development:** Operations conducted through Blaine tunnel. **Ore:** Gold-silver. **Men employed:** Average, 4. **Remarks:** A small amount of high-grade ore was produced and marketed during the early part of the year.

IDAHO GOLD & PLATINUM MERGER MINES CO.

Office: Box 88, Bruneau. **Officers:** J. R. Prentice, Pres., Mountain Home; E. A. Thom, Sec.; Phil Thom, Mgr., both of Bruneau. **Inc.:** Filed in Idaho, Oct. 30, 1928. **Capital:** 5,000,000 shares; par value 10c; 3,197,-909 shares issued. **Property:** 2 unpatented claims, 160 acres, unorganized dist.; Little Valley; Bruneau. **Ore:** Platinum. **Remarks:** This company's enterprise is based on the presence of platinum in a volcanic glass sand lying at a depth of about 250 ft. in an artesian basin. During the early part of the year, an attempt toward sinking a shaft was made, and a few test holes were driven by churn drills. This company is a reorganization of the Idaho Gold & Platinum Mining Co.

IMPERIAL MINING & MILLING CO., LTD.

Office: 816-819 Foster Bldg., Denver, Colo. **Officers:** B. M. Webster, Sec., Denver, Colo. **Inc.:** Mar. 13, 1903. **Capital:** 500,000 shares; par value $1; all shares issued. **Property:** Imperial Lode; 1 patented claim, French dist.; Silver City.

NEVER SWEAT MINING CO.

Office: Nampa. **Officers:** Windsor J. Lloyd, Pres.; D. L. Rhodes, Sec., both of Nampa. **Inc.:** July 6, 1922. **Capital:** 50,000 shares; par value $10; 27,000 shares issued. **Property:** Never-Sweat group; 12 unpatented claims, French dist.; Silver City. **Development:** By 2 tunnels: No. 1, 2200 ft. long; No. 2, 1100 ft. long, in which is a vertical shaft 50 ft. deep. **Plant:** MINE: Electrically-driven compressor and complete mining equipment. MILL: 50-ton mill; fine grinding, amalgamation plates, and concentrating tables. Complete mine camp. **Ore:** Silver-gold. **Remarks:** Mill operated for a few days on ore which was extracted by 2 lessees.

OWYHEE GOLD MINING CO.

Office: Nampa. **Officers:** M. D. Polk, Pres.; V. C. Belknap, Sec., both of Nampa; John B. Platts, Mgr., Wallace. **Inc.:** Sept. 3, 1925. **Capital:** 500,-000 shares; par value $1; 323,200 shares issued. **Property:** Mountain Chief group; 3 unpatented claims, French dist.; Silver City. **Development:** Principally by 3 tunnels: No. 1, 200 ft.; No. 2, 175 ft.; No. 3, 850 ft. Total development, approximately 1750 ft., which opens the vein to a total depth of 400 ft. **Plant:** 50-ton amalgamation mill. **Men employed:** Average, 8. **Ore:** Gold. **Remarks:** During 1927 a complete new mine camp was constructed, mill building erected, and during the early part of 1928 milling machinery was installed and the mine operated for a short period, after which operations were suspended.

OWYHEE SILVER MINES CO.

Office: Mountain Home. **Officers:** W. C. Dodge, Pres.; Frank Dodge, Sec.; Charles Sayko, Mgr., all of Mountain Home. **Inc.:** June 2, 1928. **Capital:** 2,500,000 shares; par value 10c; all shares issued. **Property:** Lucky Dog group; 7 unpatented claims, Rough Mountain dist.; Grand-

view. **Development:** By 1 tunnel 300 ft. long. **Ore:** Silver. **Men employed:** Average, 3. **Remarks:** Small amount of work during the summer months.

TRADE DOLLAR LEASING CO.

Office: Robert Noble Bldg., Boise. **Officers:** M. M. Hanson, Pres.-Mgr., Silver City; F. S. Heer, Sec., Boise. **Inc.:** Sept. 11, 1928. **Capital:** 40,000 shares; par value $1; all shares issued. **Property:** Lease on part of Trade Dollar group from Empire Mines Co. **Remarks:** Active development work was started after the date of incorporation.

WAR EAGLE CONSOLIDATED MINING CO.

Office: 919 Real Estate Trust Bldg., Philadelphia, Pa. **Officers:** Frank S. Lewis, Pres.; Edwin H. Lewis, Asst. Sec., both of Philadelphia. **Inc.:** Apr. 22, 1907. Charter forfeited Dec. 1, 1912. **Capital:** 60,000 shares preferred, 240,000 shares common; par value $50; all shares issued. **Property:** South Oro Fino and Mahogany groups; 8 patented, 2 unpatented claims, French dist.; Silver City. **Remarks:** Company operations suspended in 1923, since which time occasional lessees have performed a little work.

PAYETTE COUNTY

The only known mineral resources of this county are diatomaceous earth; various clays of excellent quality; and gas, which has been developed at Payette.

Late in 1926 the Idaho Petroleum Co. at Payette acquired the property and equipment owned by the Idaho Oil & Gas Co., whose well was 1100 feet deep. Work was then started sinking the well to a further depth and was carried on intermittently throughout 1927, until a total depth of 1800 feet was gained. The encountering of gas was reported at the depths of 1485 and 1550 feet. During 1928 this company started drilling an additional well.

IDAHO-OREGON OIL & GAS CO.

Office: Payette. **Officers:** L. Haarmann, Pres.-Mgr., Payette; J. H. Forbes, Sec., Caldwell. **Inc.:** May 12, 1923. Charter forfeited Nov. 30, 1928. **Capital:** 10,000 shares; par value $10; 5574 shares issued. **Property:** Oil and gas leases on patented farm land, Little Willow Creek; Payette. **Plant:** Complete small well-drilling equipment. **Mineral sought:** Oil and gas.

IDAHO-OREGON PETROLEUM CORPORATION

Office: Payette. **Officers:** L. V. Patch, Pres.-Mgr.; C. A. Smith, Sec., both of Payette. **Inc.:** Dec. 1, 1927. **Capital:** 5000 shares; no par value; 122 shares issued.

IDAHO PETROLEUM CO.

Office: Payette. **Officers:** L. W. Spaulding, Pres.; A. S. Hincks, Sec., both of Payette. **Inc.:** June 9, 1926. **Capital:** 200 shares; par value $100; 140 shares issued. **Development:** 1800-ft. well. **Plant:** Complete well-drilling equipment, steam-driven. **Mineral sought:** Oil and gas. **Men employed:** Average, 4. **Remarks:** The drilling of a new well was started during the year.

POWER COUNTY

The most active development work done in this county during the year was that of the Independent Mining Co. at its lead-silver prospect near Rockland. The mine is equipped with small machinery and nine men were employed in sinking a shaft.

A few placer mines along the Snake River produced and marketed a small amount of placer gold.

ARBON VALLEY OIL CO.

Office: Pocatello. **Officers:** D. C. Ray, Pres.; L. B. Evans, Sec., both of Pocatello. **Inc.:** Feb. 20, 1923. **Capital:** 250,000 shares; par value $1; 122,500 shares issued. **Property:** Oil leases on patented farm land which have been assigned to Gem State Petroleum Co.

GEM STATE PETROLEUM CO.

Office: Pocatello. **Officers:** H. C. Harris, Pres.-Mgr.; S. G. Baker, Sec., both of Pocatello. **Inc.:** Oct. 2, 1923. **Capital:** 300,000 shares; par value $1; 299,851 shares issued. **Property:** Oil and gas leases on 15,000 acres of farm land in Arbon Valley. **Development:** 10-inch well, 2810 ft. deep. **Mineral sought:** Oil and gas. **Remarks:** "Depth of well May 31, 1927: 2550 ft. Depth of well May 31, 1928: 2810 ft."

IDAHO RESEARCH AND DEVELOPMENT CO.

Office: 810 S. 4th Ave., Pocatello. **Officers:** Geo. Williams, Pres., Pocatello; Geo. Stoll, Sr., Sec.-Mgr., 3152 Fuhrman Ave., Seattle, Wash. **Inc.:** Aug. 2, 1920. **Capital:** 200,000 shares; par value $5; 123,504 shares issued. **Property:** Oil and gas leases on 8000 acres in Arbon Valley. **Plant:** 15-h. p. steam-driven well-drilling rig and equipment. **Mineral sought:** Oil and gas. **Remarks:** Idle throughout the year. Leases assigned to Gem State Petroleum Co.

INDEPENDENT MINING CO.

Office: Rockland. **Officers:** G. B. Giswaldi, Pres.-Mgr.; E. J. Peterson, Sec., both of Rockland. **Inc.:** Oct. 24, 1925. **Capital:** 2,000,000 shares; par value 25c; 1,061,543 shares issued. **Property:** Independent group; 16 unpatented claims, unorganized dist.; Rockland. **Development:** By 1 shaft 230 ft. deep. **Plant:** Gas-driven 8x10 Sullivan compressor; small air-driven hoist; complete mining equipment. **Ore:** Lead-silver. **Men employed:** Average, 9. **Remarks:** Active for 3 months, sinking shaft additional 60 ft.

SHOSHONE COUNTY

Shoshone County lies in the northern part of the State, and is bounded on the east by the State of Montana, on the south by Clearwater County, on the west by Latah, Benewah, and Kootenai counties, and on the north by Bonner County. In area it is one of the largest counties in the State covering 2597 square miles. Lying approximately in the geographical center of the county is the famous Coeur d'Alene mining district, which contains an area of approximately 400 square miles, and which is known throughout the world as one of the largest lead-silver producing regions of the United States.

The entire county is mountainous, containing but a very small area of agricultural land, and is entirely dependent upon the mining and timber industries, particularly mining. These industries are well established, and it is to them that credit must be given for making this county one of the wealthiest in the State, as well as the county having the smallest public debt, one of the lowest tax levies, and the greatest per capita wealth.

It is the largest and most important mining county in the State, and for many years has produced 90 per cent of the lead and 85 per cent of the silver that has been derived from Idaho mines. Its importance can be better judged from the fact that Idaho ranks second in the United States in the production of lead and third in the production of silver. In addition to its production of lead and silver, Shoshone is the principal zinc producing county in the State, and one of the most important gold producers. The other metals which occur in commercial quantities are copper, antimony, and tungsten. At one time copper was one of the principal metal products and the largest copper mines ever developed in the State were those near Mullan.

The county is served by the O.-W. R. & N. and Northern Pacific railroads, by the Coeur d'Alene-Yellowstone State highway, which is paved between Mullan, Wallace, and Kellogg, and by well-maintained county roads, which reach the principal mines. Wallace is the largest town, the county seat, and the civic and business center.

During 1928 this county witnessed more new development, the starting of more new enterprises, more new profitably operating mines, a larger pay roll, and a greater production than at any time since the peak of wartime activities. At least three new producers reached the stage that places them in the list of mines with an assured future, and two others rapidly approached that position. All the large mines conducted active development work throughout the year which proved the extent of their ore bodies at increased depth and laterally. The increased ore reserves and the improvements added to mine, mill, and smelter plants, together with the new Sullivan zinc plant, have greatly enhanced the physical condition and future life of the mines, as well as assuring a long period of prosperity for the Coeur d'Alene district. The thought and attention that all of the large operators are giving to safety conditions and safety supervision were reflected in the smallest number of fatal accidents that have ever happened throughout the district in any one year.

The principal producing mines in which the ore reserves were increased by new development work during the year were: The Bunker Hill mine of the Bunker Hill & Sullivan M. & C. Co., whose ore deposits were opened on the 1900-foot level; the Hecla mine of the Hecla Mining Co., where the shaft was extended and ore opened to the 2800-foot level from the 2000-foot level; the Morning mine of the Federal M. & S. Co., opened to the 3450-foot level, and the Page mine of the same company to the 900-foot level; the Sunshine mine of the Sunshine Mining Co., to the 900-foot level; the Dayrock Mining Co., formerly the Strattons Mines Co.; Sidney Leasing Co.; Jack Waite Consolidated Mining Co.; Sherman Lead Co.; Douglas Mining Co.; Galena mine of the Callahan Zinc-Lead Co.

The most important new construction work completed during the year was the electrolytic zinc plant at Kellogg which was built by the Sullivan Mining Co. to treat the zinc ores of the Coeur d'Alene district. The Sullivan Mining Co. is owned jointly by the Bunker Hill & Sullivan M. & C. Co. and

HERCULES MINING CO.'S MILL AT WALLACE

the Hecla Mining Co. The Hercules mill at Wallace, owned by the Hercules Mining Co., was rebuilt, a zinc flotation unit added, and converted into a custom mill which now offers milling facilities for practically all the mines operating in the vicinity of Wallace. During the year this mill treated ores from the following mines: Tamarack & Custer Consolidated Mining Co.; the Humming Bird Mining Co.; the Sherman Lead Co.; and the Dayrock Mining Co., as well as from a few small producers.

Other new construction work was: New flotation concentrator of the Dickens Consolidated Mines Co.; new flotation concentrator of the Golconda Lead Mines; the rehabilitation of the Amy Matchless mill by the Lookout Mountain Mining & Milling Co.; and completion of the new flotation concentrator of the Cedar Creek Mining & Development Co.

Working conditions throughout the Coeur d'Alene district are exceptionally favorable. All the mines are well ventilated, and the operators devote much time and thought to making the mines safe and keeping them in such condition that the men can do a full day's work without expending the energy that is necessary in poorly ventilated mines. Both attention and money have been devoted to this phase of the operations, and it can safely be said that these are the best ventilated mines in the country. Serious attention is given not only to ventilation, but to safety, recreation, and general welfare. The value of the welfare work to company employees and to the communities has been demonstrated through the Morning Club at Mullan and the new club house built at the Page mine in 1928, both erected by the Federal M. & S. Co.; the Y. M. C. A. Building at Kellogg, donated by the Bunker Hill & Sullivan M. & C. Co.; and the Hercules Hall at Burke, erected by the Hercules Mining Co. Another outstanding contribution to this work is the baseball field—located a short distance above the town of Burke and named Hearn Field in honor of W. F. Hearn of that town—which the Hecla Mining Co. constructed and donated to the community during 1927. The building of the field involved engineering and construction difficulties, as level land in this vicinity is unknown; it was done in the interests of inter-mine baseball teams, which are sponsored by all the large mines and between which there is keen rivalry.

The outstanding new developments, new construction and new enterprises can best be reviewed through an outline by companies.

The extensive development work which was done during 1927 in the Bunker Hill mine greatly increased its resources. The completion of the shaft to the 1900-foot level and the opening of the ore bodies at that depth, where the ore and geological conditions were found to be normal, added much to the life of the mine which is estimated in decades instead of in years. The Bunker Hill & Sullivan M. & C. Co., because of the magnitude of the Bunker Hill mine, has become more of a manufacturing than a mining operation, and with its smelter, mills, experimental plants, and organization, is one of the largest of its kind in the world. This company maintained its usual production record throughout the year, and the many plant betterments which were added greatly increased the efficiency of the enterprise. The principal betterments were the remodeling of the Sweeny mill and enlargements and improvements at the smelter and the surface plant of the mine. The Tainton electrochemical experimental lead-leaching plant was modified and improved, and many details perfected which add greatly to the importance of the process. In addition to extensive development work in the Bunker Hill mine, this company was actively engaged in prospecting and developing other properties throughout the Coeur d'Alene district, in Valley County, and in Nevada, Alaska, and Canada. A projected tunnel one mile in length, to intersect the Crescent vein at a greater depth, was started on the property formerly owned by the Big Creek Mining Co., the portal of this tunnel being located adjacent to the Crescent mill, which was constructed in 1927.

The Hecla Mining Co., which is recognized as one of the principal lead-silver producing companies of the United States, greatly increased its ore reserves and resources in the Hecla mine. The vein was further ex-

plored on the 2800-foot level and work was completed in sinking the main shaft to this level. The mine and mill plants were enlarged and improved, and the mine maintained in first-class condition. In addition to this, the contract was let for and construction was started on the installation of a powerful new electrically operated hoist; when installed, this hoist will be the largest and most complete in the Coeur d'Alene district. At the old Tiger-Poorman mine, which was purchased in 1920, machinery and equipment were installed in 1927 and work was started on unwatering it to the 600-foot level. During 1928 this work was completed, and a large amount of exploration work was done on the 300-foot and 600-foot levels.

The Morning mine of the Federal Mining & Smelting Co., which is one of the oldest in the Coeur d'Alene district in point of continuous production, as well as one of the largest lead-silver-zinc mines in the United States, was maintained at capacity production throughout the year. The number of years that this record will continue is unknown, as development work on the 3250 and 3450-foot levels has proved the ore bodies to be larger and more extensive than on any of the upper levels. During the year the 3050-foot level was opened to the full length of the ore, and the shaft completed from the 3050 to the 3450-foot level. The mine and mill plants were greatly enlarged and improved. The principal improvement was the installation of a modern electrically operated hoist, which required the cutting of a new station for its accommodation. The change in the milling methods from jigs and tables to fine grinding and flotation resulted in a reduction of milling costs and an increase in recoveries. In addition to the ore mined under company operation, a large tonnage was extracted from the upper levels by a number of lessees; the most important of these is the Sheridan Lease, which employs over 100 men.

The Page mine of the Federal Mining & Smelting Co., in Government Gulch near Kellogg, was reopened in 1926, equipped with mine and milling plants, and placed on a producing basis. It was operated throughout 1928 on a profitable producing basis. During the year the ore bodies were fully opened on the 900-foot level, at which point they proved to be of greater extent and higher grade than on any of the upper levels. The success of this operation can be accredited entirely to flotation, because with the old milling methods it was impossible to mine and mill such low-grade ore at a profit. One of the valuable improvements added to this mine during the year by the company was the construction of a club house and recreation hall for the benefit of the employees.

The Sullivan Mining Co. suspended production in 1927 at its Star mine, pending completion of its new electrolytic zinc plant at Kellogg, and devoted all its energies to this construction and to underground development work. The 4000-foot level of the Star mine is connected with the 2000-foot level of the Hecla mine by the Star crosscut, which is 8900 feet long. This crosscut made a blind connection with the Star vein at a point 2800 feet below the Star tunnel, and a vertical operating raise, which was driven to connect the crosscut and Star tunnels, was completed during the year. In addition to this work, the mine was further placed in a position to permit production, which is anticipated early in 1929. The zinc plant, which was fully described, with flow sheet and illustrations, in the 1927 report of the mining industry of Idaho, was completed and formally placed in operation on June 24, and the first metallic zinc was produced on August 3. The metal produced by this plant is of exceptionally high grade and is finding a ready market at an increase in price over that of any other zinc metal. This part of the Sullivan Mining Co. now constitutes one of the largest and most important enterprises in the Pacific Northwest, and one which assures the perpetuation of the mining industry in Shoshone County.

The Tamarack & Custer Consolidated Mining Co., which operates one of the substantial producing mines of the Coeur d'Alene district, maintained a steady output and an extensive mine development campaign

throughout the year. During the year a sorting plant was installed at the portal of No. 7 tunnel; the mill and tramway were abandoned, and No. 7 tunnel was converted into the outlet for the ore, whence it was transported to railroad cars and then to the Hercules Mining Co.'s mill at Wallace, which began to treat the entire output from this mine.

At the Galena mine of the Callahan Zinc-Lead Co. capacity output, together with an extensive development campaign, was maintained until July, at which time the mill was placed on a one-shift basis, the men being taken from production work in order to increase development. At the same time an extensive diamond-drilling campaign was started. The diamond drilling was successful in encountering a heretofore unknown vein, and at the close of the year work had started on driving a crosscut to it. As this mine is located in the so-called "dry belt," or south side of the district, the success it is attaining has been an important factor in stimulating development throughout this area.

The Sunshine Mining Co. improved its mine and mill plants, and installed a new electrically driven hoist at the winze on the 500-foot level. The extension of the winze from the 700 to the 900-foot level was completed and the ore opened on both of these levels, at which points it proved to be of greater extent and value than at any of the upper levels. In addition to the foregoing, a large amount of lateral development on the various levels was performed. This work greatly increased the ore reserves. The payment of dividends, which was started in 1927, was continued throughout the year.

The Sidney, operated by the Sidney Leasing Co., suffered a severe handicap through the destruction by fire of the upper terminal of its tramway. This retarded production, as well as decreasing the dividend payments from those made during previous years. The terminal was reconstructed, the shaft sunk an additional 200 feet in depth, and a large amount of lateral development work performed. This work greatly increased the ore reserves. The fact that this mine, located on Pine Creek, is being operated at a substantial profit, is significant in proving that this section of the Coeur d'Alene district is not without merit.

One of the large and most active development campaigns conducted during the year, including mine improvement, was that of the Dayrock Mining Co., formerly Strattons Mines Co., at the Stratton mine. During the year the shaft was extended to the 400-foot level and a large amount of development work performed on the 300-foot level. This work greatly increased the known ore reserves. In addition to the foregoing, production was maintained throughout the year and the enterprise was placed on a profitably operating basis. This mine is fast developing into one of the important producers of the Coeur d'Alene district.

The Gold Hunter Mines, Inc., at Mullan, one of the oldest mines in Shoshone County in point of continuous production, maintained capacity output and an extensive development campaign during the year. The principal new work was drifting on the 1500 and 1600-foot levels, which resulted in exposing new ore. By proving the continuation of its ore at this depth, the company greatly increased its resources and future life. In addition to the foregoing work, the mill was enlarged and improved by the addition of more modern equipment.

In January the Jack Waite Mining Co., Ltd., which owned the Jack Waite mine on the Idaho side of the State line, and the Silver King Mining Co., a Montana corporation which owned the Jack Waite Extension on the Montana side of the line, were merged as the Jack Waite Consolidated Mining Co., after which the mine was entirely rehabilitated, electric-trolley haulage installed, the mill modernized and its capacity increased to 400 tons per day, a large amount of lateral development work performed, and a winze sunk on the ore body to a depth of 200 feet. The new improvements and the additional ore exposed added greatly to the importance of this enterprise.

The Constitution Mining & Milling Co., whose mine is on Pine Creek, was idle throughout the greater part of the year, because of fire destroying the entire surface mine plant. The plant was reconstructed, new equipment installed (including a new electrically driven hoist), and the shaft from the tunnel level to the 400-foot level was completed.

GOLCONDA LEAD MINES: MILL

The Douglas Mining Co., Ltd., whose property is located on Pine Creek near the Constitution, maintained an active development campaign until February, at which time the entire surface plant was destroyed by fire. As rapidly thereafter as possible, complete new buildings were constructed, new equipment installed (including electrically driven hoist), and operations were resumed. The development work consisted principally of extending the No. 2 and No. 3 tunnels; in December work was started extending the shaft from the 180 to the 300-foot level. This work resulted in greatly increasing the known ore reserves.

One of the largest new mills to be constructed in Shoshone County during the year was that of the Dickens Consolidated Mines Co., whose property is on Moon Creek. In addition to constructing the mill, the company maintained an active development campaign throughout the year. This work consisted principally of sinking the shaft from the No. 5 to the No. 7 level and lateral development work on both of these levels.

One of the principal new mines which started production during the year was that of the Sherman Lead Co., whose property is on Canyon Creek east of the Tamarack & Custer. Its mine is connected with the No. 5 tunnel of the Hercules mine through the Humming Bird workings, and the ore was taken to the Hercules Mining Co.'s mill at Wallace for reduction. In addition to maintaining production throughout the greater part of the year, a large amount of development work was performed. This company absorbed the Oreano Mining Co., Ltd., through an exchange of stock, thus adding five important mining claims to its holdings.

The Humming Bird Mining Co. conducted an active development campaign throughout the year and produced a substantial tonnage of ore, which was sent to the Hercules Mining Co.'s mill at Wallace for treatment.

One of the largest development campaigns on Pine Creek during the year was that of the Lookout Mountain Mining & Milling Co., which also performed some new construction and installed new equipment. In March its No. 3 tunnel encountered an excellent showing of ore, after which ore-

bins were constructed, an aerial tramway 1600 feet in length installed, new camp buildings erected, and the Amy Matchless mill acquired under lease and rehabilitated. After this work was completed, the ore was transported from the terminal of the tramway to the mill by truck and a small tonnage of concentrate was produced. The vein was opened to a depth of 150 feet below No. 3 tunnel by a shaft.

One of the principal new mills constructed during the year was the 200-ton flotation concentrator of the Golconda Lead Mines. The mill building was erected, machinery and equipment installed, and operations started on August 1, after which capacity production was maintained on a 24-hour operating basis for the remainder of the year. During construction of the mill, the mine was actively developed and placed in position for production. This work consisted principally of completing the 800-foot raise from the Mayflower tunnel to the surface and extending the vertical shaft from the 1200 to the 1400-foot level. In November this company purchased the property owned by the Mayflower Mining & Development Co., thus acquiring title to its principal operating tunnel and greatly adding to the extent of its holdings.

On Nine Mile Creek near the old Success mine, the Bell of the West Mining Co. constructed two large boarding and bunk houses, office building, blacksmith shop, and compressor building and installed an electrically driven hoist and complete mining equipment preparatory to starting an active development campaign.

At the King of Pine Creek mine the New Jersey Consolidated Mines Co. constructed a new blacksmith shop and a compressor building, installed an electrically driven compressor and an air-driven hoist, erected a headframe, and commenced sinking a 200-foot vertical shaft.

Companies which installed new equipment and conducted active development work during all or part of the year were as follows:

The Cedar Creek Mining & Development Co., Ltd., installed a large electrically driven compressor, completed adjustments on its new mill, which was built in 1927, and commenced milling operations in April. After running the mill a short period it was found necessary to suspend operations pending installation of the new compressor.

The Delaware Mines Corporation installed a new electrically driven compressor and complete mining equipment at the Red Monarch tunnel and commenced the extension of this tunnel under contract.

The Lansing Silver-Lead Mining Co. installed a small gas-driven compressor and complete mining equipment, and conducted an active development campaign throughout the greater part of the year.

The Mutual Mines Development Co. erected a new building and installed a new electrically driven compressor to replace its former equipment which was destroyed by fire in February. Excepting the time lost on account of the fire, this company maintained an active development campaign throughout the entire year.

The Blue Eagle Mining Co., whose property is on Pine Creek, installed a new electrically driven compressor and complete mining equipment, and performed a small amount of development work under contract.

The Commercial Traveler Mining Co. installed an electrically driven compressor and complete mining equipment, and drove a 500-foot crosscut tunnel under contract.

The Decker Development Co., which controls the old Stewart mine at Kellogg, installed a 4-drill electrically driven compressor and reopened the main haulage tunnel.

Companies which employed more than five men and which conducted development work throughout the year were as follows:

The Alameda Mining Co., whose property adjoins the Success mine on Nine Mile Creek, further explored the vein by drifts and raises.

The Ajax Mining Co. extended its shaft from the 200-foot to the 400-foot level, and performed a large amount of development work at the lower levels.

In April the Atlas Mining Co. commenced work on a projected 3000-foot drift on the Carbonate Hill vein. The Evolution Mining Co. performed a small amount of development work on the 300-foot level and commenced extending the shaft an additional 200 feet. The Hecla Extension Mining Co. unwatered the Anchor shaft to the 600-foot level, after which a large amount of development work was performed on that level. Part of this work consisted of diamond drilling. The Hypotheek Mining & Milling Co. performed a large amount of drifting and crosscutting on the 900-foot level of its mine.

The Independence Lead Mines, Ltd., maintained an active development campaign throughout the year. This work consisted principally of extending the No. 4 tunnel, which is the lowest level in the mine. The Little Sunshine Mining Co. completed its crosscut to a total length of 2700 feet. The Nabob Silver-Lead Mining Co. unwatered its 300-foot shaft and performed 1200 feet of development work by contract.

The Olympic Mines Co., whose property is on Pine Creek, was active throughout the year. At the property of the Silver Summit Mining Co. mine buildings were erected and work was started on a projected 4000-foot crosscut. The Wolverine Mining Co., Ltd., extended its shaft from the 150-foot level to the 450-foot level and commenced drifting at the lower level.

AETNA MINES CORPORATION

Office: Empire State Bldg., Spokane, Wash. **Officers:** Peter Reid, Pres.; Geo. H. Walters, Sec., both of Spokane, Wash. **Inc.:** Apr. 22, 1927. **Capital:** 1,000,000 shares; par value 25c; 750,000 shares issued. **Property:** Lucky Stone group; 2 patented, 22 unpatented claims, Evolution dist.; Wallace. **Development:** By numerous crosscuts and tunnels, the longest of which is No. 4 tunnel, 1000 ft. in length. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** This company is a reorganization of the Lucky Stone Mining Co.; 200 ft. of tunnel driven under contract during the year. Stock assessments were levied during the year as follows: Jan. 11, 5 mills; Aug. 13, 5 mills.

AETNA MINING & MILLING CO., LTD.

Office: Wallace. **Officers:** P. J. Maggy, Pres.; W. A. Devan, Sec., both of Wallace. **Inc.:** March 9, 1915. **Capital:** 1,500,000 shares; par value 10c; all shares issued. **Property:** 4 unpatented claims, Lelande dist.; Burke. **Development:** By 2 tunnels: No. 1, 250 ft. long; No. 2, 762 ft. long. **Remarks:** Annual labor only. A stock assessment of 1 mill levied on July 1.

AJAX MINING CO.

Office: 714 W. 14th Ave., Spokane. **Officers:** F. Moriarity, Pres.; J. A. Havighorst, Sec., both of Spokane, Wash.; A. G. Anderson, Mgr., Burke. **Inc.:** Oct. 20, 1902. **Capital:** The capital stock was increased to 2,000,000 shares on July 6, 1925; par value $1; 1,613,022 shares issued. **Property:** 15 patented claims, Lelande dist.; Burke. **Development:** Principally by 3 tunnels and 3 shafts. Total development approximately 27,000 ft. Main or Bixby tunnel is located in Gorge Gulch a short distance above the town of Burke. This tunnel intersects the Ajax vein at a distance of 6000 ft., at which point is a 400-ft. vertical shaft with 1000 ft. of drifting at the 200-ft. level. **Plant:** MINE: Type-10 I-R 550-cu.-ft. electrically driven air compressor; I-R No. 50 steel sharpener; Hoar shovel. **Ore:** Lead-silver. **Men employed:** Average, 13. **Remarks:** During the year the 200-ft. shaft in Bixby tunnel was sunk to the 400-ft. level and a large amount of drifting was performed on the latter level. Stock assessments were levied during 1928 as follows: March 6, 1c; July 5, 1c; October 8, 1c.

ALAMEDA MINING CO.

Office: Wallace. **Officers:** O. W. Lewis, Pres.; James A. Wayne, Sec.-Mgr., both of Wallace. **Inc.:** Feb. 14, 1910. **Capital:** 1,500,000 shares; par value $1; all shares issued. **Property:** Alameda group; 4 patented, 11 unpatented claims, Lelande dist.; Wallace. **Development:** By 2 tunnels: No. 1, 500 ft. long; No. 2, 3600 ft. long. **Plant:** Electrically-driven I-R compressor and complete mining equipment. **Ore:** Lead-zinc-silver. **Men em-**

ployed: Average, 5. **Remarks:** This company's property adjoins the famous old Success mine on Nine Mile Creek and had been idle for a long period of years. During 1927 the mine plant was rehabilitated and work started at a distance of about 2000 ft. from the portal of No. 2 tunnel, at which point a raise was started on the vein. In 1928 the raise was completed and a large amount of lateral work extended from it. Stock assessments were levied during the year as follows: Feb. 14, 5 mills; June 14, 5 mills; October 15, 5 mills.

ALHAMBRA MINING CO., LTD.

Office: 504 Empire State Bldg., Spokane, Wash. **Officers:** W. J. C. Wakefield, Pres., Peyton Bldg., Spokane, Wash.; William A. Corey, Sec., Spokane, Wash. **Inc.:** Dec. 26, 1898. **Capital:** 1,000,000 shares; par value $1; 987,399 shares issued. **Property:** Alhambra group; 23 patented claims, Yreka dist.; Kellogg. **Development:** Approximately 13,200 ft. **Ore:** Lead-silver. **Plant:** MINE: 12x12 Laidlaw-Dunn Gordon electrically-driven compressor, complete mining equipment. **Remarks:** Property operated under lease by the Bunker Hill & Sullivan M. & C. Co. The 75-ton flotation concentrator which was on this property was destroyed by fire early in 1927. The lessee then rebuilt the mill formerly owned by the Big Creek Mining Co., Ltd., now known as the Crescent mill, for the treatment of ore from the Alhambra and Crescent mines. During the latter part of 1928 equipment was installed and contract let for a tunnel 1 mile in length which will open the property at a greater depth.

ALICE MINING CO.

Office: Wallace. **Officers:** James F. McCarthy, Pres.; Leo J. Hoban, Sec., both of Wallace. **Inc.:** July 30, 1902. **Capital:** 1,000,000 shares; par value $1; all shares issued. **Property:** 21 patented, 2 unpatented claims, Hunter dist.; 3½ miles east of Wallace. **Development:** 10,000 ft. of underground workings. **Plant:** MINE: Complete mine camp and buildings. MILL: Partly dismantled 125-ton concentrator. **Ore:** Lead-silver. **Remarks:** Idle.

ALMA RAY MINING CO.

Office: Kellogg. **Officers:** Elmer E. Brown, Pres.-Mgr.; C. B. Forbes, Sec., both of Kellogg. **Inc.:** April 21, 1917. **Capital:** 1,500,000 shares; par value 25c; 586,324 shares issued. **Property:** Alma Ray group; 5 unpatented claims, Yreka dist.; Kellogg. **Development:** Principally by 2 tunnels: No. 1, 300 ft. long; No. 2, 480 ft. long. **Ore:** Lead-silver, copper. **Men employed:** Average, 2. **Remarks:** Small amount of work by contract during the year. A stock assessment of 1 mill was levied on May 10, 1928.

ALPENA COPPER MINING CO., LTD.

Office: Wallace. **Officers:** C. W. Beale, Pres.; A. H. Featherstone, Sec.; J. C. Purcell, Mgr., all of Wallace. **Inc.:** Aug. 9, 1900. **Capital:** 1,000,000 shares; par value 10c; all shares issued. **Property:** Alpena group; 6 unpatented claims, St. Joe dist.; Adair. **Ore:** Copper-gold. **Remarks:** Annual labor only.

AMAZON MANHATTAN MINING CO.

Office: Wallace. **Officers:** P. J. Maggy, Clerk, Wallace. **Inc.:** A partnership. **Property:** Amazon Manhattan group; 9 patented claims, Beaver dist.; Carbonite. **Development:** By 3 tunnels: No. 1, 510 ft.; No. 2, 1180 ft.; No. 3, 3856 ft. **Ore:** Lead-zinc-silver. **Remarks:** Idle.

AMBERGRIS MINES CO.

Office: Wallace. **Officers:** Harry L. Day, Pres.; W. B. Heitfeld, Sec., both of Wallace. **Inc.:** June 16, 1916. **Capital:** 1,000,000 shares; par value $1; 978,452 shares issued. **Property:** Ambergris group; 8 patented claims, Lelande & Placer Center dists.; Burke. **Development:** Mine opened and operated through No. 5 Hercules tunnel, in addition to which there are 3 intermediate tunnels and 3 shafts; total development, approximately 13,000 ft. **Ore:** Lead-silver. **Remarks:** Press reports at the close of the year were to the effect that this company had been merged with the Ambergris Consolidated Mining Co.

PARTIAL VIEW, MINE AND MILL PLANTS, BUNKER HILL & SULLIVAN M. & C. CO.

AMERICAN-COMMANDER MINING & MILLING CO., LTD.
Office: Wallace. **Officers:** J. A. Glowe, Pres., Mullan; Herman Marquardt, Sec., Wallace. **Inc.:** Oct. 24, 1901. **Capital:** 2,000,000 shares; par value $1; 1,553,988 shares issued. **Property:** American-Commander group; 2 patented claims, Hunter dist.; Mullan. **Development:** By 4 tunnels: No. 1, 190 ft. long; No. 2, 1160 ft. long; No. 3, 1300 ft. long; No. 4, 2500 ft. long. **Plant:** Electrically-driven 9x12 Sullivan compressor; complete mining equipment. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** Active development work in No. 2 tunnel was maintained for a period of 5 months.

AMERICAN LEAD MINES, LTD.
Office: 323 Lindelle Block, Spokane. **Officers:** R. L. Brainard, Pres., Kellogg; Matt Baumgartner, Sec.-Mgr., Spokane. **Inc.:** Feb. 2, 1925. **Capital:** 1,000,000 shares; par value 10c; 670,000 shares issued. **Property:** Crescent group; 10 unpatented claims on the West Fork of Big Creek, Yreka dist.; Kellogg. **Development:** By 1 tunnel 550 ft. long. **Ore:** Lead-silver. **Men employed:** Average, 1. **Remarks:** Small amount of work by a lessee.

AMERICAN MINING CO., LTD.
Office: Wallace. **Officers:** Max Smith, Pres.; W. E. Stache, Sec., both of Wallace. **Inc.:** Nov. 1, 1899. **Capital:** 1,000,000 shares; par value 10c; 405,625 shares issued. **Property:** American group; 2 unpatented claims, Placer Center dist.; Wallace. **Development:** 3 tunnels: No. 1, 65 ft. long; No. 2, 80 ft. long; No. 3, 314 ft. long. **Ore:** Lead-silver. **Remarks:** Annual labor only.

AMY MATCHLESS MINING & MILLING CO.
Office: Mankato, Minn. **Officers:** George Weidenman, Pres.; W. A. Beach, Sec., both of Mankato, Minn.; J. G. Schrodt, Mgr., Kellogg. **Inc.:** Nov. 24, 1913. **Capital:** 1,250,000 shares; par value $1; 805,544 shares issued. **Property:** Amy group; 5 patented, 18 unpatented claims, Yreka dist.; Pine Creek, Kellogg. **Development:** Principally by an inclined shaft, 200 ft. deep. Total development, approximately 8500 ft. **Plant:** MINE: Hoist and 2 compressors, both electrically driven; sawmill and camp. MILL: 75-ton concentrator, consisting of jigs, tables, and flotation. **Ore:** Lead-silver-zinc. **Men employed:** Average, 6. **Remarks:** Small amount of development work during the early part of the year.

ANACONDA COPPER MINING CO.
Office: 25 Broadway, New York City. **Officers:** C. F. Kelley, Pres.; A. H. Melin, Sec., both of New York City. **Inc.:** Filed in Idaho, Apr. 10, 1916. **Capital:** 6,000,000 shares; par value $50; 3,000,000 shares issued. **Property:** Sunset group; 3 patented claims, Beaver dist.; Wallace. **Development:** By 1 tunnel 3600 ft. long and a vertical shaft 800 ft. deep with 4 intermediate levels. Total development, approximately 10,000 ft. **Ore:** Lead-silver-zinc. **Remarks:** Property purchased from Clark-Montana Realty Co. in September, 1928.

ANCHOR MINING CO.
Office: 825 Seventh Ave., Spokane, Wash. **Officers:** G. B. Chamberlin, Pres.; J. L. Prickett, Sec., both of Spokane, Wash. **Inc.:** Nov. 18, 1897. **Capital:** 1,500,000 shares; par value $1; all shares issued. **Property:** Anchor group; 8 patented claims, Lelande dist.; Burke. **Development:** Principally by one tunnel 6000 ft. long and one vertical shaft 210 ft. deep. **Plant:** 20-h. p. hoist and 3-drill I-R compressor, both electrically driven. **Ore:** Lead-silver. **Remarks:** Property under option to Hecla Extension Mining Co.

ARCTIC MINING & MILLING CO., LTD.
Office: Kellogg. **Officers:** Henry Lalonde, Pres., Wallace; Geo. H. Heller, Sec., Kellogg. **Inc.:** July 5, 1907. **Capital:** 1,500,000 shares; par value $1; 900,000 shares issued. **Property:** Arctic group; 5 unpatented claims, Placer Center dist.; Wallace. **Development:** By 1 tunnel 865 ft. long. **Ore:** Lead-silver. **Remarks:** Annual labor only.

ARGENTA MINING CO., LTD.

Office: Wallace. **Officers:** W. C. Richardson, Pres.-Mgr., Mullan; C. D. Brock, Sec., Wallace. **Inc.:** Dec. 10, 1906. **Capital:** 1,500,000 shares; par value $1; 1,108,000 shares issued. **Property:** Argenta group; 3 patented claims, Hunter dist.; Mullan. **Development:** 2 tunnels: No. 1, 900 ft. long; No. 2, 250 ft. long. **Ore:** Lead-silver. **Remarks:** Idle throughout the year.

ATLANTIC MINING CO.

Office: Wallace. **Officers:** Herman J. Rossi, Pres.; Otto A. Olsson, Sec.-Mgr., both of Wallace. **Inc.:** June 11, 1897. **Capital:** 1,000,000 shares; par value $1; all shares issued. **Property:** Atlantic group; 7 unpatented claims, Beaver dist.; Prichard. **Development:** Principally by 1 tunnel 340 ft. long. **Ore:** Lead-silver. **Remarks:** Annual labor only.

ATLAS MINING CO.

Office: Mullan. **Officers:** Thomas F. Keeley, Pres., 516 E. 28th St., Chicago; Charles K. Cartwright, Sec.; W. Earl Greenough, Mgr., both of Mullan. **Inc.:** Mar. 4, 1924. **Capital:** 2,000,000 shares; par value $1; all shares issued. **Property:** Atlas group; 19 patented, 19 unpatented claims, Hunter dist.; Mullan. **Development:** 7 tunnels and 2 inclined shafts; the principal of which is the Horseshoe tunnel 7030 ft. long. **Plant:** Electrically-driven compressor, and complete mining equipment. **Ore:** Lead-silver. **Men employed:** Average, 9. **Remarks:** The property of the Atlas Mining Co. is a consolidation of three properties, the Carbonate Hill, Idaho Giant, and Boulder Creek, on which has been done approximately 10,500 ft. of tunneling, drifting, crosscutting, and sinking. The Horseshoe tunnel was advanced to a length of 7030 ft. when operations were suspended in April, 1927. In April, 1928, work was resumed in driving a projected 3000-ft. drift on the Carbonate Hill vein. Stock assessments were levied during the year as follows: June 7, 2c; Nov. 21, 1c.

AULBACH GROUP

Owner: Adam Aulbach, Murray. **Property:** Aulbach group; 5 patented claims, Coeur d'Alene dist.; Murray. **Development:** By 3 tunnels, the longest of which is No. 2, 450 ft. long. **Ore:** Lead-silver. **Remarks:** This property is one of the oldest locations in the Coeur d'Alene district and has been held almost continuously by the present owner.

BASIN MINING CO.

Office: Wallace. **Officers:** Jerome J. Day, Pres.; P. J. Maggy, Sec., both of Wallace. **Inc.:** June 22, 1915. **Capital:** 1,500,000 shares; par value 5c; 1,000,000 shares issued. **Property:** Basin group; 5 patented claims, Lelande dist.; Burke.

BEAR PLACER MINING CO.

Office: 608 Empire State Bldg., Spokane, Wash. **Officers:** F. R. Clark, Pres.; G. M. Johnson, Sec., both of Spokane. **Inc.:** Aug. 5, 1924. **Capital:** 10,000 shares; par value $10; 5817 shares issued. **Property:** Bear Placer group: 2 unpatented placer claims, unorganized dist.; on St. Joe River; Superior, Mont. **Ore:** Placer gold. **Men employed:** Average, 5. **Remarks:** Small amount of hydraulic equipment was installed and development work performed during a period of 5 months.

BELL MINING CO.

Office: 504 Empire State Bldg., Spokane, Wash. **Officers:** Robert C. Moffitt, Pres., Seattle; Charles Hussey, Sec., Spokane, Wash. **Inc.:** Oct. 17, 1898. **Capital:** 500,000 shares; par value 25c; 495,500 shares issued. **Property:** 9 patented claims, Lelande dist.; Wallace. **Remarks:** Under development by the United Metals Co.

BELL OF THE WEST MINING CO.

Office: Wallace. **Officers:** George R. Trask, Pres.-Mgr.; M. E. Trask, Sec., both of Wallace. **Inc.:** Oct. 23, 1899. **Capital:** 1,500,000 shares; par value 5c; all shares issued. **Property:** Bell of the West group; 2 patented, 2 unpatented claims, Placer Center dist.; Wallace. **Development:** 2 tunnels: No. 1, 250 ft. long; No. 2, 1000 ft. long with 300 ft. of crosscuts. **Ore:** Lead-silver. **Remarks:** Under option to Western Mines, Ltd.

BELMONT MINING CO., LTD.
Office: Wallace. **Officers:** James H. Taylor, Pres.-Mgr.; Frank P. Hess, Sec., both of Wallace. **Inc.:** Mar. 26, 1900. **Capital:** 1,000,000 shares; par value $1; 271,175 shares issued. **Property:** Belmont group; 14 unpatented claims, Evolution dist.; Osburn. **Development:** Principally by 1 tunnel 900 ft. long. **Ore:** Lead-silver. **Remarks:** Annual labor performed under contract. A stock assessment of 3 mills was levied on June 13, 1928.

BENTON MINING CO., LTD.
Office: Wallace. **Officers:** Mary Callahan, Pres., Spokane, Wash.; E. G. Gnaedinger, Sec.-Mgr., Wallace. **Inc.:** Feb. 14, 1903. **Capital:** 1,500,000 shares; par value $1; 1,250,000 shares issued. **Property:** Benton group; 5 patented claims, Lelande dist.; Burke. **Development:** By 6 tunnels, the principal one of which is 2500 ft. long, and one vertical shaft 200 ft. deep. **Ore:** Lead-silver. **Men employed:** Average, 1. **Remarks:** Work in extending principal tunnel was conducted for 6 months. A stock assessment of 3 mills was levied on April 30, 1928.

BIG DIVIDE MINING CO., LTD.
Office: Sanger, Calif. **Officers:** Frank P. Markwell, Pres., Los Angeles, Calif.; J. F. Markwell, Sec., Sanger, Calif. **Inc.:** Aug. 23, 1904. Charter forfeited Nov. 30, 1928. **Capital:** 1,500,000 shares; par value $1; all shares issued. **Property:** Big Divide group; 10 patented, 5 unpatented claims, Lelande dist.; Wallace. **Plant:** Large air compressor driven by 150-h. p. electric motor. **Ore:** Lead-silver.

BIG ELK MINING CO., LTD.
Office: Wallace. **Officers:** Peter Peterson, Pres.-Mgr., Saltese, Mont.; A. H. Featherstone, Sec., Wallace. **Inc.:** April 26, 1909. **Capital:** 2,000,000 shares; par value $1; all shares issued. **Property:** Big Elk group; 17 unpatented claims, St. Joe dist.; Delage. **Ore:** Copper-gold. **Remarks:** Annual labor only.

BIG IT MINING & MILLING CO.
Office: Kellogg. **Officers:** H. S. Davenport, Pres., Enaville; M. L. Pratt, Sec.-Mgr., Kellogg. **Inc.:** Dec. 5, 1916. Charter forfeited Dec. 1, 1920. **Capital:** 1,500,000 shares; par value 10c; 1,138,000 shares issued. **Property:** Big It group; 12 unpatented claims, Yreka dist.; Masonia. **Development:** By 2 tunnels: No. 1, 270 ft.; No. 2, 850 ft. **Ore:** Lead-zinc-silver. **Men employed:** Average, 2. **Remarks:** Small amount of development work by a lessee during the early part of the year.

BISMARCK MINING CO.
Office: Wallace. **Officers:** E. V. Lange, Pres., Amsterdam, Holland; W. H. Herrick, Mgr., Wallace. **Inc.:** Jan. 18, 1924. **Capital:** 1,250,000 shares; par value 10c; all shares issued. **Property:** Bismarck group; 3 unpatented claims, Big Creek, Yreka dist.; Kellogg. **Development:** By 1 tunnel 1400 ft. long. **Plant:** Gas-driven compressor; complete mining equipment. **Ore:** Lead-silver. **Men employed:** Average, 4. **Remarks:** Principal tunnel extended 500 ft. during the year.

BITTER ROOT MOUNTAIN MINING CO.
Office: 939 S. Cowley St., Spokane, Wash. **Officers:** W. P. Flood, Pres.; Mrs. F. A. Noteware, Sec., both of Spokane, Wash. **Inc.:** May 6, 1901. **Capital:** 1,500,000 shares; par value 5c; all shares issued. **Property:** Lookout group; 3 patented claims, Hunter dist.; Mullan. **Development:** Principally by 1 tunnel 1000 ft. long. **Ore:** Lead-silver. **Remarks:** Inactive since 1900.

BLACK BEAR MINES CO.
Office: Wallace. **Officers:** C. A. Hagan, Pres., Moscow; A. G. Kennedy, Sec., Wallace. **Inc.:** Feb. 24, 1917. **Capital:** 2,000,000 shares; par value 20c; 1,388,051 shares issued. **Property:** Black Bear group; 5 patented, 2 unpatented claims, Lelande dist.; Wallace. **Development:** Principally

by 1 tunnel 4100 ft. long. **Plant:** 750 cu. ft. electrically-driven compressor; complete mining equipment. **Ore:** Lead-zinc-silver. **Remarks:** Under option to the United Metals Co.

BLACK HAWK MINING & DEVELOPMENT CO., LTD.

Office: Wallace. **Officers:** Frederick Burbidge, Pres.-Mgr.; A. W. Hoover, Sec., both of Wallace. **Inc.:** Aug. 19, 1901. **Capital:** 1,500,000 shares; par value 10c; 1,332,352 shares issued. **Property:** Black Hawk group; 13 patented claims, Yreka dist.; Kellogg. **Development:** By 2 tunnels: Black Hawk, 2920 ft. long; Page, 2600 ft. long. **Ore:** Silver-lead-zinc. **Remarks:** Property under lease to the Federal M. & S. Co., which operated it throughout the year in conjunction with the Page mine, which see.

BLAINE & EMMETT MINING CO., LTD.

Office: Kellogg. **Officers:** Merrill Heblethwaite, Pres.-Mgr., Prichard; R. W. Skeman, Sec., Kellogg. **Inc.:** Dec. 20, 1909. **Capital:** 1,000,000 shares; par value $1; 480,812 shares issued. **Property:** Blaine & Emmett group; 6 unpatented claims, Eagle dist.; Prichard. **Development:** 2 tunnels: No. 1, 300 ft. long; No. 2, 650 ft. long. **Ore:** Lead-zinc-silver. **Remarks:** Annual labor only.

BLUE EAGLE MINING CO.

Office: Kellogg. **Officers:** Ed McCarty, Pres.; C. B. Forbes, Sec., both of Kellogg. **Inc.:** April 18, 1925. **Capital:** 1,500,000 shares; par value 1c; 1,252,380 shares issued. Increased Dec. 8, 1928, to 3,000,000 shares; par value 10c. **Property:** Blue Eagle group; 15 unpatented claims, Pine Creek, Yreka dist.; Kellogg. **Development:** By 2 tunnels: No. 2, 185 ft. long; No. 3, 500 ft. long. **Plant:** Electrically-driven 8x9 I-R compressor; complete mining equipment. **Ore:** Lead-zinc-silver. **Men employed:** Average, 2. **Remarks:** Active work throughout the year in extending No. 3 tunnel. Stock assessments were levied during 1928 as follows: Jan. 14, 1 mill; July 7, 1 mill.

BLUE RIBBON MINING CO.

Office: 601 N. Monroe St., Spokane, Wash. **Officers:** Al Harris, Sec., Spokane, Wash. **Inc.:** Oct. 22, 1914. **Capital:** 1,500,000 shares; par value 10c; 325,000 shares issued. **Property:** Blue Ribbon group; 9 unpatented claims, Hunter and Lelande dists.; Burke. **Development:** Principally by 1 tunnel 2400 ft. long. **Remarks:** Small amount of work during the summer months, funds for which were derived from stock assessments.

BLUE WING MINING CO., LTD.

Office: Wallace. **Officers:** Herman J. Rossi, Sec., Wallace. **Inc.:** July 8, 1901. **Capital:** 1,000,000 shares; par value 10c; 774,775 shares issued. **Property:** Blue Wing group; 5 unpatented claims, Placer Center dist.; Wallace. **Ore:** Lead-silver. **Remarks:** Annual labor only.

BOBBY ANDERSON GROUP MINING CO.

Office: Kellogg. **Officers:** T. R. Mason, Sec., Kellogg. **Inc.:** June 16, 1906. **Capital:** 1,500,000 shares; par value $1; 866,866 shares issued. **Property:** Bobby Anderson group; 6 unpatented claims, Yreka dist.; Kellogg. **Development:** 3 tunnels and 1 shaft. **Plant:** Electrically-driven compressor and hoist; complete mining equipment and camp. **Ore:** Lead-zinc-silver. **Men employed:** Average, 6. **Remarks:** During the year 600 ft. of tunnel was driven and a shaft 123 ft. deep was sunk. A stock assessment of 5 mills was levied on Nov. 26, 1928.

BONANZA MINES CORPORATION

Office: Wallace. **Officers:** W. Howard Moore, Pres.-Mgr.; Therrett Towles, Sec., both of Wallace. **Inc.:** July 12, 1927. **Capital:** 1,500,000 shares; par value 25c; 613,503 shares issued. **Property:** Bonanza group; 24 unpatented claims, Eagle dist.; Prichard; held under lease and option. **Development:** By 3 tunnels: No. 1, 350 ft.; No. 2, 572 ft.; No. 3, 50 ft. **Plant:** Complete mining equipment, operated by compressed air from Jack Waite Consolidated Mining Co. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** Active throughout the year.

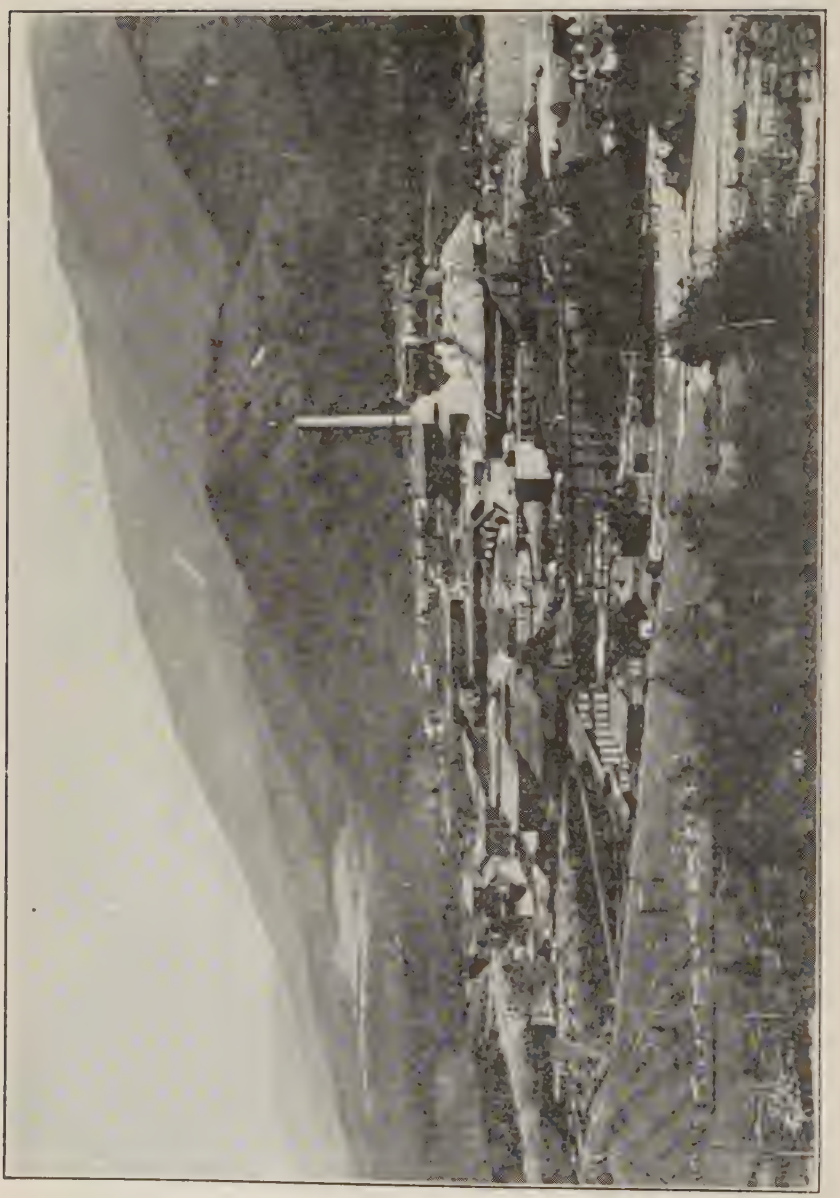
BULLION MINING CO., LTD.

Office: Wallace. **Officers:** William Squance, Pres.; James H. Taylor, Sec.-Mgr., both of Wallace. **Inc.:** Dec. 5, 1902. **Capital:** 1,500,000 shares; par value $1; all shares issued. **Property:** Bullion group; 16 patented, 1 unpatented claim, St. Joe dist.; Mullan. **Development:** 3 tunnels: No. 1, 500 ft. long; No. 2, 2000 ft. long; No. 3, 4800 ft. long; 1 vertical shaft 100 ft. deep. **Plant:** Pelton water wheel driving an I-R compressor. **Ore:** Copper-gold. **Men employed:** Average, 3. **Remarks:** Active throughout the summer months in driving a raise to connect No. 3 and No. 2 tunnels. A stock assessment of 5 mills was levied on May 10, 1928.

BUNKER CHANCE MINING CO.

Office: Wardner. **Officers:** Nick Petrinovich, Pres.-Mgr.; R. L. Brainard, Sec., both of Wardner. **Inc.:** May 8, 1922. **Capital:** 1,500,000 shares; par value 25c; 1,200,000 shares issued. **Property:** Bunker Chance group; 1 patented, 6 unpatented claims, Yreka dist.; Wardner. **Development:** By 4 tunnels, the principal one of which is 680 ft. long. **Plant:** Complete mining equipment; compressed air received from North Bunker Hill Mining Co., Ltd. **Ore:** Lead-silver. **Men employed:** Average, 3. **Remarks:** Active for 3 months in extending principal tunnel.

BUNKER HILL & SULLIVAN MINING & CONCENTRATING CO.



Office: Kellogg. **Officers:** F. W. Bradley, Pres.; J. W. Crosby, Sec., both of 1022 Crocker Bldg., San Francisco, Calif.; Stanly A. Easton, Mgr., Kellogg. **Inc.:** Originally incorporated in Oregon and filed in Idaho, Aug. 20, 1903; changed to a Delaware corporation and filed in Idaho, April 16, 1924. **Capital:** 327,000 shares common; par value $10; 20,000 shares preferred; par value $100; all common shares issued. **Property:** Bunker Hill; 353 patented, 32 unpatented claims, Yreka dist.; Kellogg. **Development:** The principal adit is the Kellogg tunnel, which is 24,000 ft. long, in which are the two principal inclined shafts, one of which is known as the White Raise, and the other the main shaft, which is approximately 2785 ft. long, giving a vertical depth of 2000 ft. below the Kellogg tunnel level. In the main shaft are 13 intermediate levels. Total development, approximately 58 miles. **Plant:** MINE: Two electrically-driven hoists, two electrically-driven I-R compressors, one steam-driven Nordberg compressor. Trolley locomotive haulage in Kellogg tunnel; storage battery locomotive haulage in intermediate levels. Complete and modern machine shop, blacksmith shop and change house. MILL: Three complete and modern concentrators, including flotation. Daily capacity, approximately 2100 tons. **Ore:** Lead-silver. **Men employed:** In mine, mill and smelter, average, 950.

BUNKER HILL SMELTER

Officers: Frank M. Smith, Director, 1117 Paulsen Bldg., Spokane, Wash.; A. F. Beasley, Supt., Kellogg. **Remarks:** This smelter was erected during 1917, since which time it has been continually enlarged and improved and is now one of the most modern, complete and up-to-date plants in the United States. The smelting plant covers an area of about 30 acres and consists of complete buildings and equipment for sampling, roasting, sintering, smelting and refining lead, silver, and gold ores. In addition to refined lead, silver, and gold, antimonial lead and copper sulphate are also produced. The principal supply of ore is from the company's own mine and the mines of the Coeur d'Alene district. The company is doing a general custom business and is drawing ore from all of the northwestern states as well as from British Columbia and Alaska, and is becoming a strong competitor in the smelting business. This smelter and its operations are fully described and illustrated in many of the articles listed under the bibliography of Shoshone County.

REMARKS

This company is the largest dividend payer and maintains the largest pay roll of any mine in Idaho; it is also the largest producer of lead-silver ore in the State, if not in the world; and is one of the few companies in the United States that mine, mill, smelt, refine, manufacture,

BUNKER HILL SMELTER

and sell lead ore and lead products. The enterprise, particularly the mine and mill, has been established for such a long period and all operations have become so well founded that it has practically expanded into a manufacturing operation. The mine is opened by over 58 miles of underground workings and has a sufficient tonnage of ore reserves to assure many years of continued operations.

During the past few years this organization has been actively engaged in prospecting and developing mining properties throughout the State, and during 1924 acquired the mines owned by the Hall-Interstate Mining Co. and the Lost Pilgrim Mining Co., situated near the head of the Deadwood River in Valley County. The interest shown in developing lead mines outside of the Coeur d'Alene district is having a tremendous influence in attracting attention to the State's undeveloped resources.

The management is progressive and intelligent and an unusual amount of initiative is shown in the conduct of the affairs of the company and civic activities. An excellent spirit of cooperation has been created and maintained in the employees, and everything possible is done to promote their welfare. An example of this attitude was the announcement by the company that it had arranged to give the employees an opportunity to purchase a part of the new issue of preferred stock. Three thousand shares of this stock were set aside for the employees, to be purchased for cash or upon the installment plan. This stock has a par value of $100 per share, and bears 6 per cent interest. It is also subject to a bonus of 50 cents per share per quarter, making an assured interest rate of 8 per cent, while the holder is an employee of the company, and an additional bonus of as much more per quarter as the common stock received in dividends in excess of $1.50 per share during the previous quarter. This preferred stock is redeemable at $110 a share. The common stock was listed on the New York Curb Exchange during the latter part of 1926; in January, 1927, it sold at a low of $67.50 per share; in January, 1928, it had risen to a high of $160 per share and in October dropped to a low of $128 per share, these being the highest and lowest points at which it sold during the year.

This company owns a 50 per cent interest with the Hecla Mining Co. in the Sullivan Mining Co., the owner of the Star mine in the Coeur d'Alene district; and a 50 per cent interest in the Alaska-Treadwell Gold Mining Co. and the Treadwell Yukon Co., Ltd., both of Alaska. Ore from the latter property was shipped to the smelter at Kellogg. In addition to the foregoing, the company is actively interested in developing properties in Nevada and at Sudbury, Ontario, Canada.

The extensive development work done in the Bunker Hill mine during the year greatly increased the known ore reserves. This work consisted principally of opening the 1900-ft. level, where ore and geological conditions were found to be normal. The mine, mill, and smelting plants were enlarged and improved. The Sweeny mill was further altered to accommodate custom ores, particularly those from Pine Creek.

The Tainton electrochemical experimental lead-leaching plant was modified and improved. Many details were perfected which add greatly to the improvement of the process.

Machinery and equipment were installed, and a projected tunnel one mile in length, to intersect the Crescent vein at a greater depth, was started on the property formerly owned by the Big Creek Mining Co., the portal of this tunnel being located adjacent to the Crescent mill, which was constructed in 1927.

BURKE MINING CO., LTD.

Office: Wallace. **Officers:** Wm. Bailey, Pres.-Mgr.; John C. Glahe, Sec., both of Wallace. **Inc.:** May 31, 1902. **Capital:** 1,000,000 shares; par value $1; 770,000 shares issued. **Property:** 12 patented claims, Lelande dist.; Burke. **Development:** 2 tunnels: No. 1, 125 ft. long; No. 2, 1000 ft. long. **Ore:** Lead-silver. **Remarks:** A stock assessment of 2 mills was levied on April 27, 1928.

BUTTE & COEUR D'ALENE DEVELOPMENT CO.

Office: Wallace. **Officers:** T. B. Cosgrove, Pres.-Mgr., Mullan; Elmer E. Johnston, Sec., Kellogg. **Inc.:** Sept. 17, 1927. **Capital:** 2,500,000 shares; par value $1; 902,133 shares issued. **Property:** Butte & Coeur d'Alene group; 8 patented claims; Hunter dist.; Mullan; held under lease and option from Butte & Coeur d'Alene Mining Co. **Development:** By 1 tunnel 1500 ft. long, in which is a vertical shaft 400 ft. deep. **Plant:** Electrically-driven compressor; air-driven hoist; complete mining equipment and camp. **Ore:** Lead-silver. **Men employed:** Average, 5. **Remarks:** During the early part of the year the shaft was unwatered to the 400-ft. level, on which a large amount of development work was performed. During the latter part of the year the company forfeited its option and operations at this property were suspended.

CALEDONIA MINING CO.

Office: Kellogg. **Officers:** Stanly A. Easton, Pres.-Mgr.; Lee Prather, Sec., both of Kellogg. **Inc.:** July 1, 1907. **Capital:** 2,605,000 shares; par value $1; all shares issued. **Property:** Caledonia; 3 patented claims, Yreka dist.; Kellogg. **Development:** Approximately 19,250 ft. of underground workings. **Plant:** Equipment rented from Bunker Hill & Sullivan M. & C. Co. **Ore:** Silver-lead. **Remarks:** Small amount of work by lessees throughout the year.

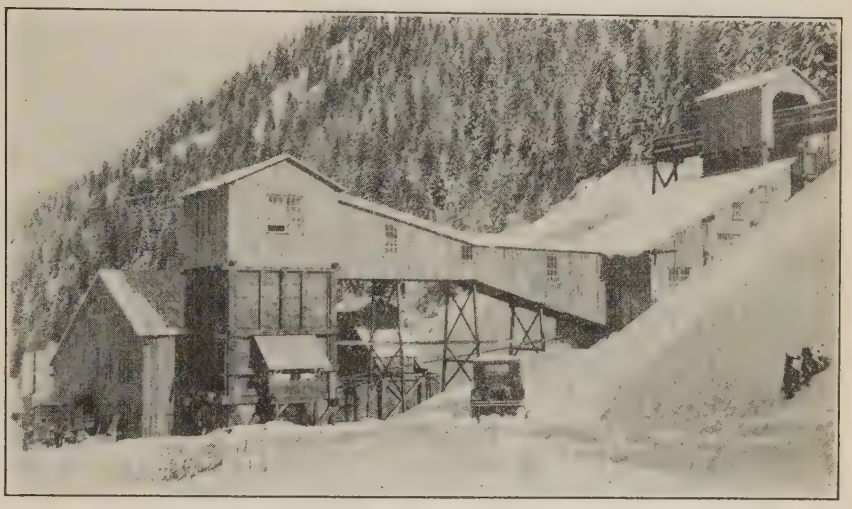
CALIFORNIA GULCH PLACER MINING CO.

Office: Sharon, Wash. **Officers:** A. O. Rickert, Pres.; Flora Rickert, Sec.; Julia B. Hammond, Mgr., all of Sharon, Wash. **Inc.:** Apr. 26, 1920. **Capital:** 200,000 shares; par value 25c; shares issued, unknown. **Property:** 8 unpatented placer claims, unorganized dist., on St. Joe River; nearest P .O., Superior, Mont.

CALLAHAN ZINC-LEAD CO.

Office: Wallace. **Officers:** D. A. Callahan, Pres.; C. W. Newton, Sec.-Mgr., both of Wallace. **Inc.:** July 18, 1912, as Consolidated Interstate Mining Co.; name changed March 25, 1921. **Capital:** 1,000,000 shares; par value $10; 716,592 shares issued.

CALLAHAN MINE



Property: Interstate-Callahan group; 81 patented, 2 unpatented claims, Beaver dist.; Interstate. **Development:** Principal development is main transportation tunnel which is 5500 ft. long and a three-compartment vertical shaft 2000 ft. deep. Total development, approximately 10 miles. **Plant:** MINE: Two single drum air-driven hoists and one 250-h. p. electrically-driven double drum hoist; three large I-R electrically-driven compressors; trolley locomotive haulage in main tunnel. Complete and modern blacksmith shop, machine shop, sawmill, mine equipment, camp and company buildings. MILL: 600-ton concentrator, including flotation. **Ore:** Zinc-lead-silver. **Men employed:** Average, 2. **Remarks:** At one time this property was one of the largest zinc mines in the United States. No ore has been mined since October, 1923.

GALENA MINE

Property: Chicago-Boston, Killbuck, Vulcan, Argentine, Wallace, and Silver Range groups; 31 patented, 66 unpatented claims, Lake Gulch, Placer Center dist.; Wallace. **Development:** By 33 tunnels and two vertical shafts. Total development, approximately 32,000 ft. **Plant:** MINE: One 150-h. p. Lidgerwood, one 200-h. p. Coeur d'Alene Hdw. electrically-driven hoist; 3 I-R electrically-driven compressors, total capacity 1500 cu. ft.; complete equipment and mine camp. MILL: 150-ton flotation. **Ore:** Lead-silver. **Men employed:** Average, 90. **Remarks:** Capacity output, together with an extensive development campaign, was maintained until July, at which time the mill was placed on a one-shift basis, the men being taken from production work in order to increase development. At the same time an extensive diamond-drilling campaign was started. The diamond drilling was successful in encountering a heretofore unknown vein, and at the close of the year work had started on

driving a crosscut to it. As this mine is located in the so-called "dry belt", or south side of the district, the success it is attaining has been an important factor in stimulating development throughout this area.

This company is well financed and intelligently directed. Its Galena mine was operated at a profit throughout the year, and as the development work greatly increased the known ore reserves, there is a strong probability that the company will again enter the list of dividend payers, a position it held when the Callahan mine was under operation.

GALENA MILL: CALLAHAN ZINC-LEAD CO.

CANYON CREEK MILLING CO.

Office: Wallace. **Officers:** C. R. Nordquist, Pres.-Mgr.; A. D. Gamble, Sec., both of Wallace. **Inc.:** May 28, 1926. **Capital:** 25,000 shares; par value $1; 21,256 shares issued. **Property:** Lease on tailings in Canyon Creek. **Plant:** 35-ton electrically-driven concentrator, including tables and flotation. **Ore:** Lead-silver.

CARBONATE MINING & MILLING CO.

Office: Wardner. **Officers:** C. Wiese, Pres.-Mgr., Wardner. **Inc.:** Oct. 7, 1899. **Capital:** 1,000,000 shares; par value 25c; 411,465 shares issued. **Property:** Carbonate group; 4 unpatented claims, Pine Creek, Yreka dist.; Beeler. **Development:** By 2 tunnels: No. 1, 600 ft.; No. 2, 300 ft. **Ore:** Lead-zinc-silver. **Remarks:** Annual labor only. A stock assessment of 2 mills was levied on March 31, 1928.

CEDAR CREEK MINING & DEVELOPMENT CO., LTD.

Office: Wallace. **Officers:** Chas. Hyle, Pres., Portland, Ore.; William Becker, Sec., Wallace. **Inc.:** June 28, 1905. **Capital:** 1,000,000 shares; par value $1; all shares issued. **Property:** Cedar Creek group; 5 patented, 24 unpatented claims, Summit dist.; Murray. **Development:** 3 tunnels: No. 1, 800 ft. long; No. 2, 1050 ft. long; No. 3, 2550 ft. long; 1 inclined shaft 343 ft. long. Total development, approximately 8760 ft. **Plant:** MINE: 12x12 electrically-driven compressor and air-driven hoist; complete mining equipment and camp. MILL: 100-ton flotation concentrator. **Ore:** Lead-zinc-silver. **Men employed:** Average, 41. **Remarks:** During the early part of the year adjustments were completed on the mill, which was constructed in 1927, and milling operations started in April. After running for a short period it was found necessary to suspend operations on account of lack of compressed-air power. During

the latter part of the year a large electrically-driven compressor was installed and operations were resumed. A small tonnage of lead concentrate was shipped. Stock assessments were levied during the year as follows: June 23, 1c; August 23, 1c.

CENTRAL MINING CO.

Office: Burke. **Officers:** M. V. McNamee, Pres.; F. H. Richardson, Sec.; F. C. Richardson, Mgr., all of Burke. **Inc.:** Oct. 28, 1911. **Capital:** 1,500,000 shares; par value $1; all shares issued. **Property:** Central group; 5 patented claims, lying between Hercules and Oom Paul; Lelande dist.; Burke. **Development:** Approximately 1200 ft., principally tunnels. **Ore:** Lead-silver.

CHESTER CONSOLIDATED MINING CO.

Office: Wallace. **Officers:** Arthur Schanck, Pres., Metamora, Mich.; Morgan E. Siple, Sec., Pontiac, Mich. **Inc.:** Dec. 6, 1924. **Capital:** 50,000 shares common, no par value; 50,000 shares preferred, par value $5; all shares issued. **Property:** Terrible Edith group; 21 unpatented claims, Eagle dist.; Murray. **Development:** By 4 tunnels: No. 2, 390 ft.; No. 3, 1070 ft.; No. 4, 1860 ft. **Plant:** Electrically-driven I-R compressor; complete mining equipment and camp. **Ore:** Lead-zinc-silver. **Remarks:** Under lease to Pontiac Land & Mineral Co.

CHESTER MINING CO., LTD.

Office: Kellogg. **Officers:** P. P. Weber, Pres.; C. W. Simmons, Sec., both of Kellogg. **Inc.:** July 31, 1900. **Capital:** 1,000,000 shares; par value $1; 923,945 shares issued. **Property:** Chester group; 6 patented claims, Yreka dist.; Osburn.

CLEAR GRIT MINING CO., LTD.

Office: Wallace. **Officers:** F. C. Rood, Pres., Longview, Wash.; E. G. Gnaedinger, Sec.-Mgr., Wallace. **Inc.:** May 9, 1906. **Capital:** 1,000,000 shares; par value $1; all shares issued. **Property:** 5 unpatented claims, Beaver dist.; Prichard. **Development:** By 1 tunnel approximately 1600 ft. long. **Ore:** Lead-silver. **Remarks:** Annual labor only. A stock assessment of 2½ mills was levied March 1, 1928.

CLIMAX SILVER-LEAD MINING CO.

Officers: James A. Wayne, Pres.; H. V. Edwards, Sec.-Mgr., both of Wallace. **Inc.:** April 22, 1914. **Capital:** 1,500,000 shares; par value 25c; 1,300,000 shares issued. **Property:** Climax group; 2 patented, 1 unpatented claim, Evolution dist.; Wallace. **Development:** By 3 tunnels, the principal one of which is 2800 ft. long. **Plant:** 10x10 electrically-driven compressor and complete mining equipment. **Ore:** Lead-silver. **Remarks:** Annual labor only. A stock assessment of 3 mills was levied on June 11, 1928.

COEUR D'ALENE BIG CREEK MINING CO.

Office: 916 Alaska Bldg., Seattle, Wash. **Officers:** E. J. Brown, Pres.; C. F. Uhden, Sec., both of Seattle. **Inc.:** Jan. 31, 1925. **Capital:** 1,500,000 shares; par value 10c; all shares issued. **Property:** 4 unpatented claims, Yreka dist.; Big Creek; Kellogg. **Development:** Principally by 1 tunnel 1407 ft. long. **Plant:** 12x10 C-P compressor, electrically driven; drill sharpener; complete mining equipment and camp. **Ore:** Lead-silver. **Men employed:** Average, 4. **Remarks:** Tunnel extended 30 ft. during the year.

COEUR D'ALENE CRESCENT MINING CO.

Office: 404 Jamieson Bldg., Spokane, Wash. **Officers:** J. B. Millspaugh, Pres.; F. W. Mauser, Sec., both of Spokane, Wash. **Inc.:** Dec. 12, 1913. **Capital:** 1,250,000 shares; par value $1; 650,000 shares issued. **Property:** Evolution group; 6 unpatented claims, Evolution dist.; Osburn. **Ore:** Lead-silver. **Remarks:** Under option to Evolution Mining Co.

COEUR D'ALENE EAGLE LEAD-SILVER MINING CO., LTD.

Office: Wallace. **Officers:** D. E. Thiebes, Pres.; Sarepta Jonas, Sec., both of 2808 W. Broadway, Spokane, Wash.; R. A. Jonas, Mgr., Kellogg. **Inc.:** Apr. 2, 1928. **Capital:** 2,000,000 shares; par value 25c; 325,000 shares issued. **Property:** 22 unpatented claims, Yreka dist.; Pine Creek. **Development:** By 2 tunnels: No. 1, 240 ft. long; No. 2, 100 ft. long. **Ore:** Lead-zinc-silver.

COEUR D'ALENES LEAD CO.
Office: 303 Hyde Blk., Spokane, Wash. **Officers:** Walter H. Hanson, Pres., Wallace; John E. Hoppe, Sec., Spokane, Wash. **Inc.:** Apr. 28, 1927. **Capital:** 4,000,000 shares; par value $1; 3,606,408 shares issued. **Remarks:** "The only assets of this company are 500,000 shares of the capital stock of the Atlas Mining Co." A stock assessment of 5 mills was levied on December 12, 1928.

COEUR D'ALENE METALS CO.
Office: Eagle Blk., Wallace. **Officers:** M. W. Neary, Pres., San Francisco, Calif.; A. G. Kennedy, Sec., Wallace. **Inc.:** Jan. 18, 1926. **Capital:** 10,000 shares; par value $100; 151 shares issued. **Property:** Lease and option on property of Great Eastern Mining Co., Ltd. **Remarks:** Company performed a small amount of repair work.

COEUR D'ALENE MINING CO.
Office: Ames Bldg., Boston, Mass. **Officers:** Burton E. Eames, Pres.; John P. Wright, Sec., both of Boston, Mass. **Inc.:** July 20, 1900. **Capital:** 125,000 shares; par value $10; 118,586 shares issued. **Property:** Placer claims, which were exhausted by Yukon Gold Co.

COEUR D'ALENE MINING & SMELTING CO.
Office: Wallace. **Officers:** A. D. Wallace, Pres.-Mgr.; F. F. Brewer, Sec., both of Wallace. **Inc.:** July 18, 1904. **Capital:** 1,000,000 shares; par value $1; 923,800 shares issued. **Property:** 9 unpatented claims, Placer Center dist.; Wallace. **Development:** By 2 tunnels: No. 1, 300 ft.; No. 2, 1400 ft. long. **Ore:** Lead-silver. **Men employed:** Average, 3. **Remarks:** Active development work throughout the year. Stock assessments were levied during 1928 as follows: April 22, 2 mills; July 31, 3 mills.

COEUR D'ALENE SILVER-LEAD MINING CO.
Office: 1004 E. 8th Ave., Spokane, Wash. **Officers:** Charles J. Heidenreich, Pres., Spokane, Wash. **Inc.:** June 16, 1916; charter forfeited Dec. 1, 1922. **Capital:** 1,200,000 shares; par value $1; 752,800 shares issued. **Property:** 6 patented claims, Hunter dist.; Mullan. **Development:** By 2 tunnels: No. 1, 1200 ft. long; No. 2, 300 ft. long. **Ore:** Lead-silver. **Remarks:** Idle for 10 years.

COEUR D'ALENE SYNDICATE MINING CO.
Office: Wallace. **Officers:** Philip Wiseman, Vice-Pres.; P. Kenneth Wiseman, Sec., both of 1206 Pacific Mutual Bldg., Los Angeles, Calif. **Inc.:** Sept. 16, 1922. **Capital:** 900,000 shares; 200,000 preferred, par value $5; 700,000 common, par value $1; 85,933 common shares issued. **Property:** Flynn and Senator groups held under lease and bond; 42 patented, 4 unpatented claims, Lelande and Hunter dists.; Gem. **Development:** 11,000 ft. of underground workings. **Plant:** Electrically-driven 900-cu. ft. I-R compressor; drill sharpener and complete mining equipment; Hoar shovel. **Ore:** Lead-silver. **Remarks:** Idle.

COLUMBIA COPPER CO., LTD.
Office: Wallace. **Officers:** Joseph Huber, Pres.-Mgr., Mullan; C. W. Betts, Sec., Wallace. **Inc.:** April 24, 1914. **Capital:** 2,500,000 shares; par value $1; 1,303,635 shares issued. **Property:** Columbia group; 22 unpatented claims, Hunter dist.; Mullan. **Development:** By 11 tunnels, totaling approximately 2500 ft. **Ore:** Lead-silver, copper. **Remarks:** Annual labor only.

COMMERCIAL TRAVELER MINING CO.
Office: W. 426 Sprague Ave., Spokane, Wash. **Officers:** H. N. Deas, Pres.; E. E. Jordan, Sec., both of Spokane; Fred McHugh, Mgr., Masonia. **Inc.:** May 6, 1926. **Capital:** 2,000,000 shares; par value 5c; 1,208,700 shares issued. **Property:** 10 unpatented claims, Pine Creek, Yreka dist.; Kellogg; held under lease and option from Shrine Mining Co. **Development:** By 4 tunnels, the principal one of which is 500 ft. long. **Plant:** Electrically-driven D-G compressor; complete mining equipment and camp. **Ore:** Lead-zinc-silver. **Men employed:** Average, 4. **Remarks:** Mining equipment installed, after which principal tunnel was extended under contract without interruption during the year.

COMSTOCK COPPER MINING CO.

Office: Wallace. **Officers:** Therrett Towles, Pres.; Otto A. Olsson, Sec., both of Wallace. **Inc.:** Nov. 23, 1906. **Capital:** 1,000,000 shares; par value $1; all shares issued. **Property:** Fannie group; 4 unpatented claims, Beaver dist.; Prichard. **Development:** By 3 tunnels: No. 1, 350 ft.; No. 2, 500 ft.; No. 3, 75 ft. **Ore:** Copper-gold. **Remarks:** Annual labor only.

CONSOLIDATED INDEPENDENT CALUMET MINING CO.

Office: Wallace. **Officers:** John H. Nordquist, Pres.-Mgr.; Otto A. Olsson, Sec., both of Wallace. **Inc.:** Oct. 9, 1906, as Lucky Calumet Copper Mining Co., Ltd. Name changed Nov. 24, 1928. **Capital:** 1,500,000 shares; par value $1; all shares issued. **Property:** Lucky Calumet group; 9 patented claims, Hunter dist.; Mullan. **Development:** Principally by 2 tunnels: No. 1, 600 ft. long; No. 2, 1100 ft. long. Total development, approximately 5000 ft. **Plant:** Electrically-driven 5-drill I-R two-stage compressor; complete mining equipment and camp. **Ore:** Lead-silver. **Men employed:** Average, 4. **Remarks:** Active development work for 6 months. This company is developing its property through the lower tunnel of the National Copper Mining Co., Ltd. A stock assessment of 5 mills was levied on Nov. 26, 1928.

CONSTITUTION MINING & MILLING CO.

Office: Masonia. **Officers:** J. P. Graves, Pres.; B. H. Kizer, Sec., both of Spokane, Wash.; Wm. P. White, Mgr., Masonia. **Inc.:** Sept. 17, 1902. **Capital:** 1,750,000 shares; par value $1; 1,741,250 shares issued. **Property:** Constitution group; 12 patented, 27 unpatented claims, Pine Creek, Yreka dist.; Kellogg. **Development:** By 3 tunnels: No. 1, 205 ft.; No. 2, 2508 ft.; No. 3, 2359 ft.; and an inclined shaft from the surface 240 ft. deep, extending to the 200-ft. level, in which is a 200-ft. vertical shaft. Total development, approximately 8600 ft. **Plant:** MINE: Double-drum 150-h. p. hoist and 1575-cu.-ft. I-R compressor, both electrically driven; drill sharpeners; storage-battery locomotive haulage; complete mining equipment and camp. MILL: 200-ton concentrator, fine grinding and flotation. **Ore:** Lead-zinc-silver. **Men employed:** Average, 30. **Remarks:** In June fire destroyed the entire surface mine plant which caused production to be suspended. New buildings were then erected and entire new mine plant installed, in addition to which the 400-ft. vertical shaft was completed by raising from the No. 2 shaft level to the No. 3 tunnel level, at which point the new electrically-driven hoist was installed.

COPPER CHIEF MINING CO.

Office: Wallace. **Officers:** D. E. Wickward, Pres.; James H. Taylor, Sec.-Mgr., both of Wallace. **Inc.:** Sept. 25, 1907. **Capital:** 1,000,000 shares; par value $1; all shares issued. **Property:** Copper Chief group; 7 patented, 4 unpatented claims, St. Joe dist.; Adair. **Ore:** Copper-gold.

COPPER KING MINING & SMELTING CO.

Office: Mullan. **Officers:** F. H. Davison, Pres., Spokane, Wash.; H. W. Ingalls, Sec.-Mgr., Mullan. **Inc.:** Aug. 13, 1901. **Capital:** 1,500,000 shares; par value $1; 1,478,000 shares issued. **Property:** Copper King group; 18 unpatented claims, Lelande and Hunter dists.; Mullan. **Development:** Principally by 3 tunnels: No. 1, 200 ft. long; No. 2, 2000 ft. long; No. 3, 5000 ft. long. Total development, approximately 10,000 ft. **Plant:** Electrically-driven compressor and complete mining equipment and camp. **Ore:** Lead-silver. **Remarks:** Annual labor only.

C. & R. MINING CO.

Office: 312 Old Nat'l Bank Bldg., Spokane, Wash. **Officers:** E. R. Week, Pres.; Ben L. Collins, Sec.; Russell F. Collins, Mgr., all of Spokane, Wash. **Inc.:** June 16, 1904. **Capital:** 1,250,000 shares; par value $1; all shares issued. **Property:** C. & R. group; 10 patented claims, on Sunset Peak, Lelande dist.; Burke. **Development:** By 3 tunnels: No. 1, 400 ft.; No. 2, 1200 ft.; No. 3, 6000 ft. **Plant:** Electrically-driven I-R compressor; complete mining equipment. **Ore:** Lead-silver. **Remarks:** Small amount of development work during the latter part of the year. A stock assessment of 1c was levied on July 21, 1928.

CUBA MINING CO.

Office: Wallace. **Officers:** W. H. Hanson, Pres.; Herman Marquardt, Sec., both of Wallace. **Inc.:** Nov. 18, 1899. **Capital:** 1,000,000 shares; par value $1; all shares issued. **Property:** Cuba group; 2 patented claims, Placer Center dist.; Wallace. **Development:** 2 tunnels: No. 1, 500 ft. long; No. 2, 1100 ft. long. **Plant:** Electrically-driven I-R compressor; complete mining equipment. **Ore:** Lead-silver. **Remarks:** This company is controlled by the Plymouth Lead Mines Co.

DAYROCK MINES CO.

Office: Wallace. **Officers:** F. M. Rothrock, Pres., Spokane; John E. Ryan, Sec., Wallace. **Inc.:** Nov. 30, 1923, as Strattons Mines Co.; name changed Nov. 19, 1928. **Capital:** 2,000,000 shares; par value 10c; 1,710,300 shares issued. **Property:** McPhillips, Panhandle, and Monarch-Bonanza groups; 17 patented, 28 unpatented claims, Placer Center dist.; Wallace. **Development:** McPhillips group: Principally by 1 tunnel 1450 ft. long, in which is an inclined shaft 460 ft. long, with 4 intermediate levels, which opens the vein to a vertical depth of 400 ft. Panhandle group: Principally by 1 tunnel 1562 ft. long, and an inclined shaft 360 ft. long, with 3 intermediate levels, which opens the vein to a vertical depth of 253 ft. Total development in both groups, over 13,000 ft. **Plant:** McPhillips group: Electrically-driven hoist and complete mining equipment, compressed air being transmitted from Panhandle compressor. Panhandle group: Electrically-driven hoist and compressor; complete mining equipment. **Ore:** Lead-silver. **Men employed:** Average, 50. **Remarks:** An extensive development campaign was conducted on the McPhillips group throughout the year, consisting principally of extending the shaft from the 300 to the 400-ft. level, a large amount of drifting on the 300-ft. level, and a large amount of crosscutting and drifting on the 100-ft. level. This work greatly increased the known ore reserves. In addition to the foregoing, production was maintained throughout the year and the enterprise was placed on a profitably operating basis. This mine is fast developing into one of the important producers of the Coeur d'Alene district.

DECKER DEVELOPMENT CO.

Office: Kellogg. **Officers:** George Decker, Pres.-Mgr.; Mrs. M. E. Morgan, Sec., both of Kellogg. **Inc.:** Oct. 1, 1927. **Capital:** 500,000 shares; par value 10c; 235,320 shares issued. **Property:** Stewart group; 6 patented, 7 unpatented claims, held under lease; Yreka dist.; Kellogg. **Development:** By Fir tunnel, 2400 ft. long. **Plant:** 4-drill electrically-driven compressor; complete mining equipment. **Ore:** Lead-silver. **Men employed:** Average, 4. **Remarks:** During the year the Fir tunnel was reopened to a total length of 2400 ft., compressor and equipment were installed, and a small tonnage of ore was produced.

DEEP WONDER MINE

Office: 408 Ziegler Bldg., Spokane, Wash. **Officers:** Charles J. Kapps. Trustee, Spokane, Wash. **Property:** Deep Wonder group; 12 patented claims, Hunter dist.; Mullan. **Ore:** Lead-silver. **Remarks:** Property under lease and option to Mutual Mines Development Co.

DEER CREEK MINING CO.

Office: Wallace. **Officers:** C. E. Biggs, Pres.-Mgr., Spokane, Wash.; N. S. Jacobs, Sec., Lewiston. **Inc.:** May 23, 1925. **Capital:** 2,000,000 shares; par value 1c; 1,200,000 shares issued. **Property:** Deer Creek group; 23 unpatented claims, Beaver dist.; Wallace. **Development:** By 3 tunnels: No. 1, 200 ft. long; No. 2, 800 ft. long; No. 3, 200 ft. long; and an inclined shaft 100 ft. long. **Plant:** Gas-driven Sullivan compressor, complete mining equipment and camp. **Ore:** Lead-silver. **Remarks:** Annual labor only, on account of litigation.

DELAWARE MINES CORPORATION

Office: 323 Lindelle Bldg., Spokane, Wash. **Officers:** Matt Baumgartner, Pres.; A. L. Hooper, Sec., both of Spokane; F. C. Bailey, Mgr., Wallace. **Inc.:** March 10, 1926. **Capital:** 5,000,000 shares; par value 10c; 3,266,857 shares issued. **Property:** Rex and Red Monarch groups; 6 patented, 51 unpatented claims, Placer Center and Beaver dists.; Wallace. **Development:** By 4 tunnels, the principal of which are No. 4 or Rex tunnel, approximately 4000 ft. long, in which is a vertical shaft 700 ft. deep; and Red Monarch tunnel, 4400 ft. long. **Plant:** 2 electrically-driven compressors; complete mining equipment and 2 mine camps. **Ore:** Lead-zinc-silver. **Men employed:** Average, 4. **Remarks:** During the year a new electrically-driven compressor and complete mining equipment were installed at the Red Monarch tunnel and extension of this tunnel commenced under contract. A small tonnage of ore was produced and marketed by lessees.

DICKENS CONSOLIDATED MINES CO.

Office: Mohawk Bldg., Spokane, Wash. **Officers:** Samuel B. Holbert, Pres.; C. F. Kratzer, Sec., both of Spokane. **Inc.:** Mar. 18, 1925. **Capital:** 2,500,000 shares; par value 10c; all shares issued. **Property:** Dickens group; 22 unpatented claims, Moon Creek, Evolution and Yreka dists.; Kellogg. **Development:** Principally by a vertical shaft 700 ft. deep. Total development, approximately 7000 ft. **Plant:** MINE: 900-cu.-ft. Sullivan compressor and hoist, both electrically driven; complete mining equipment and camp. MILL: 150-ton flotation concentrator. **Ore:** Lead-zinc-silver. **Men employed:** Average, 30. **Remarks:** During the year this company constructed its mill, maintained an active development campaign which consisted principally of sinking the shaft from the No. 5 to the No. 7 level, and performed a large amount of lateral development work on both these levels. A small tonnage of concentrates was produced and marketed. The year also witnessed a complete change in officers and directors. Stock assessments were levied during 1928 as follows: March 27, 10 mills; May 26, 10 mills; July 25, 10 mills; Sept. 26, 10 mills.

DICKENS-EAST MINING CO.

Office: 519 Waverly Place, Spokane, Wash. **Officers:** W. Y. Clark, Pres.-Mgr.; C. Fred Kratzer, Sec., both of Spokane, Wash. **Inc.:** Aug. 18, 1926. **Capital:** 2,500,000 shares; par value 10c; 1,500,000 shares issued. **Property:** 10 unpatented claims, Moon Creek, Yreka dist.; Kellogg. **Development:** By 2 tunnels: No. 1, 120 ft.; No. 2, 80 ft. **Ore:** Lead-zinc-silver.

DOBSON PASS MINING CO.

Office: Wallace. **Officers:** J. P. Rogers, Pres.-Mgr.; S. M. Rogers, Sec., both of Wallace. **Inc.:** July 14, 1900. Charter forfeited Nov. 30, 1927. **Capital:** 1,000,000 shares; par value 10c; all shares issued. **Property:** Dobson Pass group; 5 unpatented claims, Placer Center dist.; Wallace. **Remarks:** Annual labor only.

DOUGLAS MINING CO., LTD.

Office: Wallace. **Officers:** Frank F. Johnson, Pres., Boise; H. C. Adami, Sec.; H. J. Rossi, Mgr., both of Wallace. **Inc.:** Oct. 24, 1903. **Capital:** 1,200,000 shares; par value $1; all shares issued. **Property:** Douglas group; 10 patented, 4 unpatented claims, Pine Creek, Yreka dist.; Kellogg. **Development:** By 4 tunnels: No. 1, 930 ft.; No. 2, 1350 ft.; No. 3, 1900 ft.; No. 4, 650 ft.; and an inclined shaft 170 ft. long. **Plant:** Electrically-driven compressor and hoist; complete mining equipment and camp. **Ore:** Zinc-lead-silver. **Men employed:** Average, 14. **Remarks:** Active development campaign maintained until February, at which time the entire surface plant was destroyed by fire. As rapidly thereafter as possible, complete new buildings were constructed, new equipment was installed (including electrically-driven hoist), and operations were resumed. The development work consisted principally of extending the No. 2 and No. 3 tunnels; in December work was started extending the shaft from the 170 to the 300-ft. level. This work resulted in greatly increasing the known ore reserves.

DU BOIS MINING CO.

Office: Kellogg. **Officers:** H. E. Ginter, Pres., Du Bois, Pa.; J. B. Eberhart, Sec.-Treas., Punxsutawney, Pa. **Inc.:** Aug. 9, 1914. **Capital:** 1,000,000 shares; par value $1; 300,000 shares issued. **Property:** 7 patented, 1 unpatented claim, Yreka dist.; Kellogg. **Development:** Principally by 1 tunnel 1250 ft. long. **Ore:** Lead-silver. **Remarks:** Idle for many years.

DULUTH MINING CO.

Office: Wallace. **Officers:** W. B. Heitfeld, Pres.; John E. Ryan, Sec., both of Wallace. **Inc.:** June 10, 1909. **Capital:** 1,500,000 shares; par value 25c; 522,710 shares issued. **Property:** Duluth group; 8 unpatented claims, Lelande dist.; Burke. **Development:** By 5 tunnels, with a total development of approximately 1000 ft. **Ore:** Lead-silver. **Remarks:** Annual labor only. A stock assessment of 7 mills was levied on Apr. 4, 1928.

EAST ALAMEDA MINING CO., LTD.

Office: 689 Catalina St., Los Angeles, Calif. **Officers:** Frank P. Markwell, Pres.; Everett H. Pattison, Sec., both of Los Angeles, Calif. **Inc.:** July 25, 1907. **Capital:** 1,000,000 shares; par value $1; all shares issued. **Property:** East Alameda group; 1 patented, 1 unpatented claim, Lelande dist.; Black Bear. **Ore:** Lead-silver.

EAST CALEDONIA MINES CO.

Office: Wallace. **Officers:** H. J. Rossi, Pres.; Franklin Pfirman, Sec., both of Wallace. **Inc.:** Mar. 6, 1915. **Capital:** 1,000,000 shares; par value 25c; 156,730 shares issued. **Property:** East Caledonia group; 2 patented, 5 unpatented claims, Yreka dist.; Kellogg. **Plant:** Electrically-driven I-R compressor, electrically-driven hoist, complete mining equipment. **Ore:** Lead-silver. **Remarks:** Annual labor only.

EAST HECLA MINING CO., LTD.

Office: Wallace. **Officers:** John P. Gray, Pres., Coeur d'Alene; A. H. Featherstone, Sec., Wallace. **Inc.:** Nov. 24, 1906. **Capital:** 1,500,000 shares; par value $1; all shares issued. **Property:** East Hecla group; 4 patented claims, Hunter dist.; Mullan. **Remarks:** Idle for a number of years.

EASTERN STAR MINING CO., LTD.

Office: Wallace. **Officers:** Jack Johnston, Pres.-Mgr., Burke; John C. Glahe, Sec., Wallace. **Inc.:** Aug. 29, 1906. **Capital:** 1,000,000 shares; par value $1; 600,000 shares issued. **Property:** Eastern Star group; 18 unpatented claims, Lelande dist.; Burke. **Development:** 2 tunnels: No. 1, 150 ft. long; No. 2, 900 ft. long. **Ore:** Lead-silver. **Remarks:** Annual labor only.

ELDORADO MINING & SMELTING CO., LTD.

Office: Wallace. **Officers:** J. C. Waddell, Pres., Rose Lake; G. W. Dougherty, Sec., Wallace. **Inc.:** July 5, 1907. **Capital:** 1,250,000 shares; par value 10c; 1,204,820 shares issued. **Property:** 1 patented, 3 unpatented claims, Yreka dist.; Kellogg. **Development:** By 1 tunnel, approximately 750 ft. long. **Plant:** Gas-driven compressor. **Ore:** Lead-silver. **Remarks:** Annual labor only. A stock assessment of 1½ mills was levied on October 27, 1928.

ELGIN & OGDEN MINING CO.

Office: Kellogg. **Officers:** Wesley J. Herring, Pres.-Mgr.; H. L. Goodwin, Sec., both of Kellogg. **Inc.:** July 11, 1921. **Capital:** 1,000,000 shares; par value 5c; 615,879 shares issued. **Property:** 5 unpatented claims, Big Creek, Yreka dist.; Kellogg. **Development:** By 2 tunnels: No. 1, 500 ft.; No. 2, 450 ft. **Ore:** Lead-silver. **Remarks:** Annual labor only.

ENTERPRISE MINING CO.

Office: Kellogg. **Officers:** Fred F. Donaldson, Pres.-Mgr.; W. A. Tuson, Sec., both of Kellogg. **Inc.:** June 4, 1910. **Capital:** 1,000,000 shares; par value $1; 664,500 shares issued. **Property:** Enterprise group; 8 unpatented claims; Kellogg. **Development:** By 3 tunnels: No. 1, 150 ft. long; No. 2, 180 ft. long; No. 3, 1400 ft. long. **Ore:** Lead-silver. **Remarks:** Lower tunnel advanced 100 ft. during the year. Stock assessments were levied during 1928 as follows: Mar. 28, 3 mills; July 28, 3 mills.

EQUITABLE MINING & MILLING CO.

Office: 317 Sherman Ave., Coeur d'Alene. **Officers:** C. L. Dittimore, Pres.; H. W. Fintzel, Sec., both of Coeur d'Alene. **Inc.:** April 3, 1916. **Capital:** 1,250,000 shares; par value 1c; 599,926 shares issued. **Property:** 7 unpatented claims; Pine Creek, Yreka dist.; Kellogg. **Development:** Principally by 1 tunnel 1100 ft. long. **Ore:** Lead-zinc-silver. **Remarks:** Tunnel advanced 250 ft. during the year. A stock assessment of 1½ mills was levied on May 2, 1928.

EVOLUTION MINING CO.

Office: Wallace. **Officers:** Montgomery Waddell, Pres., New York City; Julius P. Hall, Mgr., Wallace. **Inc.:** July 25, 1927. **Capital:** 1,000,000 shares; par value $1; 600,000 shares issued. **Property:** Evolution group; 9 unpatented claims, Evolution dist.; Osburn; held under lease and option from the Coeur d'Alene Crescent Mining Co. **Development:** By 1 tunnel 600 ft. long; a vertical shaft 300 ft. deep; and an inclined shaft 350 ft. long. **Plant:** Electrically-driven compressor and hoist; complete mining equipment. **Ore:** Lead-silver. **Men employed:** Average, 8. **Remarks:** Inclined shaft was extended 150 ft. and a large amount of drifting on bottom level performed during the year.

FANNIE GREMM MINING CO.

Office: Wallace. **Officers:** P. P. Weber, Pres., Kellogg; Alfred J. Dunn, Sec., Wallace. **Inc.:** Dec. 6, 1900. **Capital:** 1,000,000 shares; par value $1; all shares issued. **Property:** 2 patented claims adjoining the Morning mine on the east, Hunter dist.; Mullan. **Development:** Approximately 16,000 ft. of underground workings. **Ore:** Lead-silver. **Remarks:** Idle.

FEDERAL MINING & SMELTING CO.

Office: 120 Broadway, New York City. **Officers:** F. H. Brownell, Pres.; J. L. Martin, Sec., both of New York City; Frederick Burbidge, Mgr., Wallace. **Inc.:** Sept. 24, 1903. **Capital:** 200,000 shares preferred, 100,000 shares common; par value of each, $100; 120,000 shares preferred, 60,000 shares common issued.

MORNING GROUP

Property: 40 patented, 1 unpatented claim, Hunter dist.; Mullan. **Development:** The two principal tunnels are No. 5, 1600 ft. long, and No. 6, the main transportation tunnel, 9500 ft. long. The principal shaft, which is located in No. 6 tunnel, is a vertical, 4-compartment shaft, 2650 ft. deep, with 13 intermediate levels below No. 6 tunnel, which opens the vein to a depth of approximately 5000 ft. Total development, approximately **37 miles. Plant:** MINE: Fraser-Chalmers double-drum duplex Corliss hoist, size 20x60-inch stroke, air-driven; one 600-h. p. electrically-driven double-drum Nordberg hoist; one Nordberg single-drum geared hoist, driven by 300-h. p. electric motor; one water-driven 5200-cu.-ft. Ricks compressor; one Laidlaw-Dunn-Gordon 3200-cu.-ft. compressor, two Ingersoll-Rand 2500-cu.-ft. compressors, and one Prescott pump, 400 gal. capacity, on 2450 level, all electrically driven; complete mining equipment, machine shops, sawmill, company buildings and hotel. HAULAGE: 500-volt electric in main, or No. 6, tunnel; 250-volt electric and 9 storage-battery locomotives in intermediate levels. MILL: 1200-ton concentrator, including flotation. Two ore-sorting plants and complete modern change house. **Ore:** Lead-silver-zinc. **Men employed:** Average, 625, exclusive of lessees. **Remarks:** Capacity production maintained throughout the year. The number of years that this record will continue is unknown, as development work on the 3250 and 3450-ft. levels has proved the ore bodies to be larger and more extensive than on any of the upper levels. During the year the 3050-ft. level was opened to the full length of the ore, and the shaft completed from the 3050 to the 3450-ft. level. The mine and mill plants were greatly enlarged and improved. The principal improvement was the installation of a modern electrically-operated hoist, which required the cutting of a new station for its accommodation. The change in the milling methods from jigs and tables to fine grinding and flotation resulted in a reduction of milling costs and an increase in recoveries. In addition to the ore mined under company operations, a large tonnage was extracted from the upper levels by a number of lessees; the most important of these is the Sheridan Lease, which employs over 100 men.

PAGE GROUP

Property: 86 patented claims, Yreka dist.; Kellogg. **Development:** By 9 tunnels, the principal one of which is the Curlew, 650 ft. long; and an inclined shaft 900 ft. long, giving a vertical depth of 700 ft. Total development, approximately 17,000 ft. **Plant:** MINE: A 100-h. p. hoist and a 75-h. p. double-drum hoist, both electrically driven; a 400-cu.-ft. and an 800-cu.-ft. electrically-driven compressor; 1 trolley locomotive and 2 storage-battery locomotives; complete and modern mine camp, equipment and buildings. MILL: 300-ton flotation concentrator. **Ore:** Lead-zinc-silver. **Men employed:** Average, 160. **Remarks:** During the year a new hoist was added to the mine plant; the mill was enlarged and improved; and the ore bodies were fully opened on the 900-ft. level, at which point they proved to be of greater extent and higher grade than on any of the upper levels. The success of this operation can be accredited entirely to flotation, because with the old milling methods it was impossible to mine and mill such low-grade ore at a profit. One of the valuable improvements added to this mine during the year by the company was the construction of a club house and recreation hall for the benefit of the employees.

PAGE MINE: FEDERAL M. & S. CO.

MACE GROUP

Property: 35 patented claims, Lelande dist.; Mace. **Development:** Principal development consists of No. 6 tunnel, 3600 ft. long; No. 2, Campbell, 3000 ft. long; and a 3-compartment vertical shaft 2400 ft. deep, with 22 intermediate levels. Total development: Approximately 4 miles. **Plant:** MILL: Two 500-ton concentrators, including flotation. **Ore:** Lead-silver. **Remarks:** Except for the operation of a few lessees, who produced a small tonnage of ore, this property was idle. No. 6 tunnel is now known as No. 7 of the Tamarack & Custer Consolidated Mining Co.

BURKE GROUP

Property: One millsite, Lelande dist.; Burke. **Plant:** A small hydroelectric power plant.

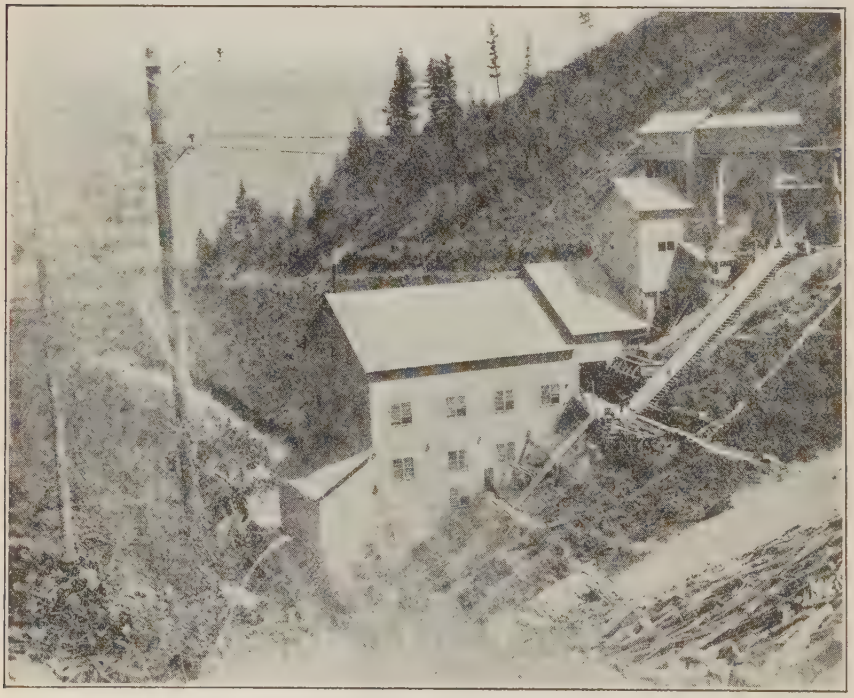
FRISCO GROUP

Property: 15 patented claims, Lelande dist.; Gem. **Development:** Principally by 4 tunnels: No. 1, 1000 ft. long; No. 2, 1500 ft. long; No. 3, 550 ft. long; No. 4, 1000 ft. long; and a vertical 4-compartment shaft 1650 ft. deep. Total development, approximately 6 miles. **Ore:** Lead-zinc-silver. **Remarks:** A substantial tonnage of ore was produced by lessees during the year.

BIG CREEK GROUP

Property: 3 patented claims, Evolution dist.; Kellogg. **Development:** By 1 tunnel, 75 ft. long. **Ore:** Lead-zinc-silver.

GOVERNMENT GULCH GROUP



Property: Five-sixteenths interest in 1 patented claim, Yreka dist.; Kellogg. **Development:** Principally by 1 tunnel, which is 500 ft. long. Total development, approximately 1700 ft. **Ore:** Lead-silver.

CON. BIEDERMAN GROUP

Property: One-half interest in 2 patented claims and one-third interest in 2 patented claims, Yreka dist.; Kellogg. **Development:** By 2 tunnels: No. 1, 320 ft. long; No. 2, 125 ft. long. **Ore:** Lead-zinc-silver.

REMARKS

This company is one of the largest operators in Shoshone County both in property owned and in production.

PAGE MILL: FEDERAL M. & S. CO.

FIDELITY COMPANY, LTD.

Office: Wallace. **Officers:** Oscar B. Bergstrom, Pres., 149 Broadway, New York City; Allan G. Kennedy, Sec.-Mgr., Wallace. **Inc.:** Nov. 5, 1915. **Capital:** 2,500,000 shares; par value 20c; 1,675,309 shares issued. **Property:** Monarch group; 7 patented, 29 unpatented claims, Summit dist.; Murray. **Development:** By 3 tunnels, the principal of which is No. 3, or main crosscut tunnel, which is 3120 ft. long; and an inclined shaft 300 ft. deep; total development, approximately 13,500 ft. **Plant:** MINE: Ottumwa air-driven hoist, 10-drill water-driven compressor, complete mining equipment and camp. MILL: 150-ton concentrator, jigs and tables. **Ore:** Lead-zinc-silver. **Men employed:** 1 watchman. **Remarks:** Annual labor only.

FIRST NATIONAL SILVER MINES, LTD.

Office: 323 Lindelle Blk., Spokane, Wash. **Officers:** Dan Krehbiel, Pres., Lind, Wash.; Matt Baumgartner, Sec.-Mgr., Spokane, Wash. **Inc.:** April 7, 1920. **Capital:** 3,000,000 shares; par value 5c; 2,088,374 shares issued. **Property:** Liston group; 7 patented, 26 unpatented claims, Big Creek, Evolution dist.; Kellogg. **Development:** By 3 tunnels: No. 1, 1000 ft. long; No. 2, 2500 ft. long; No. 3, 3600 ft. long. **Plant:** Steam-driven compressor, and complete mining equipment. **Ore:** Lead-silver. **Remarks:** Annual labor only.

FLAGSTAFF MINING CO.

Office: Wallace. **Officers:** Emery Guay, Pres.; Evelyn Vowels, Sec., both of Spokane, Wash.; E. L. Vowels, Mgr., Prichard. **Inc.:** Oct. 29, 1927. **Capital:** 1,000,000 shares; par value 10c; 6,250 shares issued. **Property:** Jippo group; 5 unpatented claims, Eagle dist.; Prichard. **Remarks:** Annual labor only.

FLORENCE MINING & MILLING CO., LTD.

Office: Kellogg. **Officers:** Frank Yuse, Pres.; E. C. Franks, Sec.; L. E. Franks, Mgr., all of Spokane, Wash.. **Inc.:** Aug. 15, 1908. **Capital:** 1,000,000 shares; par value $1; 367,230 shares issued. **Property:** Dallaire group; 10 unpatented claims, Big Creek, Yreka dist.; Kellogg. **Development:** 5 tunnels: No. 1, 100 ft. long; No. 2, 150 ft. long; No. 3, 80 ft. long; No. 4, 180 ft. long; No. 5, 310 ft. long. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** Active throughout the year.

FLYNN GROUP MINING CO.

Office: Wallace. **Officers:** J. J. Cronin, Pres.; J. F. Whelan, Sec., both of Wallace. **Inc.:** Aug. 21, 1905. **Capital:** 2,500,000 shares; par value 25c; 1,605,000 shares issued. **Property:** Flynn group; 21 patented claims, Lelande dist.; Black Bear. **Development:** Total development, 6600 ft. **Remarks:** Under option to Coeur d'Alene Syndicate Mining Co.

FORMOSA LEAD MINING CO., LTD.

Office: 504 Empire State Bldg., Spokane, Wash. **Officers:** Charles Hussey, Sec., Spokane, Wash. **Inc.:** Jan. 19, 1907. **Capital:** 1,500,000 shares; par value $1; all shares issued. **Property:** 3 patented claims, Lelande dist.; Wallace. **Remarks:** Under development by Mutual Mines Development Co., which see.

FORT WAYNE MINING CO.

Office: 213 Shannon, Spokane, Wash. **Officers:** E. W. Conrad, Pres.-Mgr.; J. M. Henneck, Sec., both of Spokane. **Inc.:** Sept. 22, 1924. **Capital:** 1,500,000 shares; par value 33 1-3c; 1,089,153 shares issued. **Property:** Eclipse group; 19 unpatented claims, Evolution dist.; Osburn. **Development:** Principally by 1 tunnel, which is 1900 ft. long. **Plant:** Gas-driven compressor. **Ore:** Lead-silver. **Remarks:** Annual labor only.

GEM STATE MINING CO.

Office: 720 Peyton Bldg., Spokane, Wash. **Officers:** J. M. Porter, Pres.-Mgr.; W. E. Horstkotte, Sec., both of Spokane, Wash. **Inc.:** Aug. 25, 1924. **Capital:** 2,200,000 shares; no par value; 1,100,000 shares issued. **Property:** 8 patented, 12 unpatented claims, Hunter dist.; Wallace. **Development:** By 6 tunnels, the longest of which is No. 4, 1878 ft. in length. **Ore:** Lead-silver-zinc. **Remarks:** Annual labor only. A stock assessment of 1 mill was levied on Aug. 20, 1928.

GENERAL MINES CORPORATION

Office: 402 Empire State Bldg., Spokane, Wash. **Officers:** C. Roholt, Pres., Worley; H. G. Loop, Sec., Spokane, Wash. **Inc.:** Nov. 23, 1925. **Capital:** 2,000,000 shares; par value 5c; 762,000 shares issued. **Property:** Big Eight group; 10 unpatented claims, Yreka dist.; Kellogg. **Development:** Principally by one tunnel 2300 ft. long. **Ore:** Lead-silver. **Men employed:** Average, 3. **Remarks:** Press reports were to the effect that principal tunnel was cleaned out and repaired, new buildings constructed, equipment installed, and development work started during the year.

GIANT MINING & DEVELOPMENT CO.

Office: Wallace. **Officers:** Paul Liver, Pres.-Mgr.; E. R. Turk, Sec., both of Wallace. **Inc.:** Sept. 22, 1899. **Capital:** 1,000,000 shares; par value 10c; 650,500 shares issued. **Property:** 8 unpatented claims, Beaver dist.; Wallace. **Development:** Principally by 1 tunnel, which is 4500 ft. long. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** The company was active throughout the year. A stock assessment of 2 mills was levied on Feb. 2, 1928.

GOLCONDA LEAD MINES

Office: Wallace. **Officers:** A. H. Featherstone, Pres.; J. F. Ferguson, Sec.; Wm. A. Beaudry, Mgr., all of Wallace. **Inc.:** Jan. 18, 1927. **Capital:** 2,000,000 shares; par value $1; all shares issued. **Property:** Hector group; 14 patented, 6 unpatented claims, Hunter dist.; Wallace; Mayflower group; 14 unpatented claims, Lelande and Hunter dists.; Wallace. **Development:** Mine opened by the Mayflower tunnel, 5000 ft. in length, an inclined raise 800 ft. long, and a vertical shaft 400 ft. deep, both from Mayflower tunnel. **Plant:** MINE: Electrically-driven 750-cu.-ft. Sullivan compressor; 2 air-driven hoists; storage-battery locomotive haulage; complete mining equipment. MILL: 200-ton concentrator, fine grinding and flotation. **Ore:** Lead-zinc-silver. **Men employed:** Average, 45. **Remarks:** The mill building was erected, machinery and equipment installed, and operations started on August 1, after which capacity production was maintained on a 24-hour operating basis for the remainder of the year. During construction of the mill, the mine was actively developed and placed in position for production. This work consisted principally of completing the 800-ft. raise from the Mayflower tunnel to the surface and extending the vertical shaft from the 1200 to the 1400-ft. level. In November this company purchased the property owned by the Mayflower Mining & Development Co., thus acquiring title to its principal operating tunnel and adding greatly to the extent of its holdings.

GOLD HUNTER MINES, INC.

Office: 516 E. 28th St., Chicago, Ill. **Officers:** Edwin C. Hennessy, Pres.; Thomas F. Keeley, Sec., both of Chicago, Ill.; C. K. Cartwright, Mgr., Mullan. **Inc.:** April 24, 1925; formerly Gold Hunter Mining & Smelting Co. **Capital:** 20,000 shares; par value $10; all shares issued. **Property:** Gold Hunter; 12 patented claims, Hunter dist.; Mullan. **Development:** Principal main haulage tunnel 7600 ft. long, from which level is a shaft 1500 ft. deep to the 1200-ft. level, in which there is another shaft 600 ft. deep. **Plant:** MINE: Complete and modern; electric hoist; two 3000-cu-ft. electrically-driven compressors; pumps; machine and blacksmith shop; electric haulage. MILL: 500-ton concentrator, including flotation. **Ore:** Lead-silver. **Men employed:** Average, 140. **Remarks:** This company is one of the old and substantial producers of the Coeur d'Alene district. Capacity production was maintained; a large amount of development work was done in the mine; the new shaft, on the vein in the 1200-ft. level, was extended from the 1600 to the 1700-ft. level; and the mill was remodeled and repaired. The development work encountered one of th principal showings of new ore disclosed in the Coeur d'Alene district during the year. Capacity production was maintained without interruption. By proving the continuation of its ore at a greater depth, this company greatly increased its resources and future life.

GOODENOUGH MINING CO.

Office: Sanger, Calif. **Officers:** F. P. Markwell, Pres., Los Angeles, Calif.; J. Fred Markwell, Sec., Sanger, Calif. **Inc.:** Apr. 6, 1922. **Capital:** 2,500,000 shares; par value 1c; all shares issued. **Property:** Goodenough group; 13 patented, 5 unpatented claims, Lelande and Hunter dists.; Gem. **Remarks:** Property under option to United Metals Co.

GOVERNMENT GULCH MINING CO.

Office: Wallace. **Officers:** Frederick Burbidge, Pres.-Mgr.; A. W. Hoover, Sec., both of Wallace. **Inc.:** July 15, 1918. **Capital:** 1,500,000 shares; par value 10c; 1,350,567 shares issued. **Property:** Government Gulch group; 6 patented claims, Yreka dist.; Kellogg. **Development:** Principally by 1 tunnel 500 ft. long and a vertical shaft 100 ft. deep. Total development, approximately 1800 ft. **Ore:** Lead-zinc-silver. **Remarks:** Idle.

GREAT DUNKER MINING & MILLING CO.

Office: 316 Lindelle Bldg., Spokane, Wash. **Officers:** J. G. Johnson, Pres., Spokane, Wash.; Carl A. Pearson, Sec.-Mgr., Star Route, Kellogg. **Inc.:** Jan. 11, 1924. **Capital:** 1,000,000 shares; par value 10c; 315,980 shares issued. **Property:** Great Dunker group; 3 patented, 2 unpatented claims, Pine Creek, Yreka dist.; Kellogg. **Development:** By 7 short tunnels. **Ore:** Lead-zinc-silver, antimony. **Men employed:** Average, 2. **Remarks:** A small amount of work during the year.

GREAT EASTERN MINING CO., LTD.

Office: Wallace. **Officers:** John Carlson, Pres., Gem; John C. Furst, Sec., Wallace. **Inc.:** Oct. 22, 1900. **Capital:** 1,000,000 shares; par value $1; 750,000 shares issued. **Property:** Great Eastern group; 13 patented claims, Lelande dist.; Gem. **Development:** Total development, approximately 4000 ft.; the principal tunnel is 600 ft. long. **Ore:** Lead-silver-zinc.

GREEN HILL CLEVELAND MINING CO.

Office: Wallace. **Officers:** F. H. Brownell, Pres., 120 Broadway, New York City; John H. Wourms, Sec.; Frederick Burbidge, Mgr., both of Wallace. **Inc.:** Oct. 7, 1912. **Capital:** 320,000 shares; par value $1; all shares issued. **Property:** Green Hill group; 3 patented claims, Lelande dist.; Mace. **Ore:** Silver-lead-zinc. **Remarks:** Idle since 1917.

GUELPH MINING & MILLING CO., LTD.

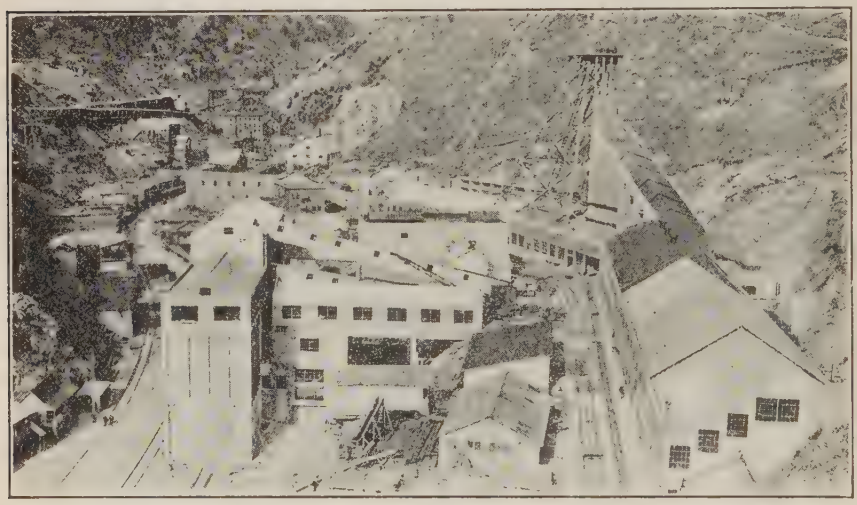
Office: Kellogg. **Officers:** Alfred Coneybeare, Pres.; F. Wm. Voigtlander, Sec., both of Kellogg. **Inc.:** Mar. 27, 1906. **Capital:** 1,500,000 shares; par value $1; 1,380,967 shares issued. **Property:** Guelph group; 5 patented claims, Beaver dist.; Wallace. **Development:** Principally by 3 tunnels: No. 1, 150 ft. long; No. 2, 850 ft. long; No. 3, 1600 ft. long; and a vertical shaft 250 ft. deep. **Plant:** 5-drill, 2-stage Sullivan compressor driven by a 75-h. p. electric motor; air-driven hoist; complete mining equipment and camp. **Ore:** Lead-silver. **Remarks:** Press reports during the latter part of the year were to the effect that this company was merged with the Ambergris Consolidated Mining Co.

HAPPY DAY MINING CO., LTD.

Office: Day Bldg., Wallace. **Officers:** Daniel Morgan, Pres., Spokane, Wash.; John E. Ryan, Sec., Wallace. **Inc.:** Sept. 30, 1899. **Capital:** 1,000,000 shares; par value 10c; 791,737 shares issued. **Property:** Happy Day group; 6 patented claims, Lelande dist.; Burke. **Development:** Principally by 1 tunnel 1500 ft. long. **Ore:** Lead-silver.

HAPPY JACK MINING CO.

Office: Wallace. **Officers:** Jesse Freeman, Pres.; R. V. McLeod, Sec., both of Wallace. **Inc.:** June 9, 1924. **Capital:** 1,500,000 shares; par value 10c; 600,000 shares issued. **Property:** 4 unpatented claims, held under lease and option from the Climax Silver-Lead Mining Co., Placer Center dist.; Wallace. **Development:** By 1 tunnel 1200 ft. long. **Ore:** Lead-silver. **Remarks:** Annual labor only. A stock assessment of 1 mill was levied on May 31, 1928.



HAYES CO.

Office: Kellogg. **Officers:** Arthur Hays, Pres.; R. S. Handy, Sec.; Stanly A. Easton, Mgr., all of Kellogg. **Inc.:** May 11, 1916. **Capital:** 25,-

000 shares; par value $1; 12,500 shares issued. **Property:** 1200 acres river bottom land held under lease; Yreka dist.; Kellogg. **Plant:** MILL: 100-ton flotation concentrator; Orange-peel dredge and sand pumps. **Ore:** Lead-silver from river tailings. **Men employed:** Average, 12. **Remarks:** Profitably operated throughout the year.

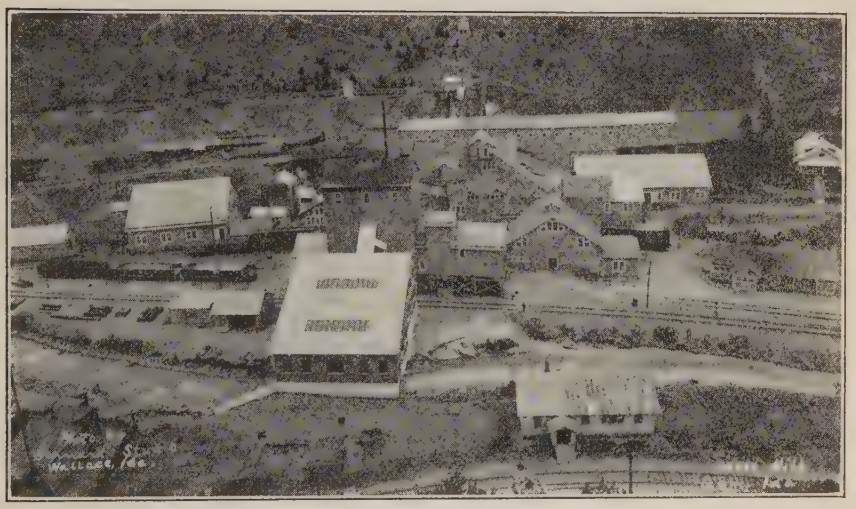
HECLA EXTENSION MINING CO.

Office: Wallace. **Officers:** Chas. Oster, Pres., 1 Wall St., New York; George C. Hollister, Sec., 60 Broadway, New York. **Inc.:** Oct. 21, 1926. **Capital:** 1,500,000 shares; par value 25c; all shares issued. **Property:** Anchor group; 8 patented claims, held under lease and option from the Anchor Mining Co., and 7 unpatented claims; Lelande dist.; Burke. **Development:** By 2 tunnels: No. 1, 700 ft. long; No. 2, 2800 ft. long; and a 600-ft. vertical shaft. **Plant:** Electrically-driven I-R compressor; electrically-driven hoist; and complete mining equipment. **Ore:** Lead-silver. **Men employed:** Average, 16. **Remarks:** Buildings erected, mine plant installed, 600-ft. shaft unwatered, and a large amount of development work on the lower level performed during the year.

HECLA MINING CO.'S MINE BUILDINGS AND TOWN OF BURKE

HECLA MINING CO.

Office: Wallace. **Officers:** James F. McCarthy, Pres.-Mgr.; L. E. Hanley, Sec., both of Wallace. **Inc.:** Sept. 26, 1898. **Capital:** 1,000,000 shares; par value 25c; all shares issued. **Property:** 47 patented, 1 unpatented claim, Lelande dist.; Burke. **Development:** Principally by a 4-compartment vertical shaft, which is 2800 ft. deep, and a 3-compartment vertical shaft from the 2000-ft. level, which is 800 ft. deep. Total development, approximately 9 miles. **Plant:** MINE: One of the most complete and modern in the State. MILL: 700-ton concentrator, including flotation. **Ore:** Lead-silver. **Men employed:** Average, 485.



REMARKS

This company, which is recognized as one of the principal lead-silver producing companies of the United States, greatly increased its ore reserves and resources in the Hecla mine. The vein was further explored on the 2800-ft. level and work was completed in sinking the main shaft to this level. The mine and mill plants were enlarged and improved, and the mine was maintained in first-class condition. In addition to this, the contract was let for and construction was started on the installation of a

powerful new electrically-driven hoist; when installed, this hoist will be the largest and most complete in the Coeur d'Alene district.

At the old Tiger-Poorman mine, which was purchased in 1920, machinery and equipment were installed in 1927 and work was started on unwatering it to the 600-ft. level. During 1928 this work was completed, and a large amount of exploration work was done on the 300-ft. and 600-ft. levels.

The Hecla management are progressive and intelligent; they have engendered an excellent spirit of cooperation among the employees and are giving the utmost consideration to safety and welfare provisions. Under such conditions, and with the life of the mine assured for many years, the outlook for the company is exceedingly favorable.

HECLA MINING CO.'S MILL

HERCULES MINING CO.

Office: Wallace. **Officers:** Harry L. Day, Pres.-Mgr.; A. P. Ramstedt, Sec., both of Wallace. **Inc.:** Dec. 31, 1923. **Capital:** 500,000 shares; par value $10; 430,180 shares issued.

HERCULES GROUP

Property: Hercules group, 38 patented claims; Columbia lode, 1 patented claim; Lelande and Placer Center dists.; Burke. **Development:** Principally by 5 tunnels: No. 1, 280 ft.; No. 2, 3350 ft.; No. 3, 3900 ft.; No. 4, 5900 ft.; No. 5, 8550 ft.; and a 4-compartment vertical shaft 1300 ft. deep, with 8 intermediate levels. Total development, approximately 18 miles. **Plant:** MINE: Special first motion, double-reel, Nordberg electric hoist, direct connected to 700-h. p. motor. One 22x16 I-R and 1 29x21 I-R compressor, both electrically driven. Electric trolley locomotive in main transportation tunnel and storage-battery locomotives in intermediate levels. Complete and modern mine equipment and shops. MILL: 600-ton concentrator, including flotation. **Ore:** Lead-silver. **Men employed:** Average, 90.

MAHER-HEARN GROUP

Property: 38 patented claims; Lelande dist.; Burke. **Development:** Through 4500-ft. tunnel of Gertie Mining Co., at the end of which is over 4000 ft. of tunnel and a 400-ft. vertical shaft. **Plant:** Electrically-driven 1000-cu.-ft. I-R compressor; air-driven hoist; trolley electric locomotive haulage; complete and modern equipment. **Ore:** Lead-silver.

REMARKS

During the year the Hercules mine surface plant and tunnel No. 5 were used in the operation of the Sherman Lead Co. and the Humming Bird Mining Co., both of which performed a large amount of development work and produced a substantial tonnage of ore; this ore was transported to Wallace and treated in the Hercules Mining Co.'s mill, which also treated the ores from the Tamarack & Custer Consolidated Mining Co. and the Dayrock Mines Co. During the year this mill was rebuilt, a zinc flotation unit being added, and was converted into a custom mill which now offers milling facilities for practically all the mines operating in the vicinity of Wallace.

The principal mines and companies which this company owns or controls are: Hercules and Maher-Hearn mines; Dayrock Mines Co.; Ambergris Mines Co.; Sherman Lead Co.; Honolulu Mining Co.; Humming Bird Mining Co.; Roanoke Mining Co.; Stanley Mining Co.; Happy Day Mining Co.; Western Union Mining Co.; Success Mining Co., Ltd. The following of these produced a substantial tonnage during the year: Humming Bird Mining Co.; Dayrock Mines Co.; Sherman Iead Co. Lessees at the Success and Western Union mines produced a small amount of ore.

HIDDEN TREASURE MINING CO.

Office: Wallace. **Officers:** Frederick Burbidge, Pres.-Mgr.; A. W. Hoover, Sec., both of Wallace. **Inc.:** May 18, 1908. **Capital:** 500,000 shares; par value $10; all shares issued. **Property:** Hidden Treasure group; 4 patented claims, Lelande dist.; Burke. **Development:** Principally by 1 tunnel 2540 ft. long. **Ore:** Silver-lead-zinc.

HIGH CROPPING SILVER-LEAD MINING CO.

Office: Burke. **Officers:** Hugh Gibson, Pres.-Mgr.; J. F. Hurtubise, Sec., both of Burke. **Inc.:** Sept. 18, 1924. **Capital:** 1,500,000 shares; par value 25c; 255,500 shares issued. **Property:** High Cropping group; 6 unpatented claims, Lelande dist.; Burke. **Development:** 1 tunnel, 310 ft. long.

HIGHLAND-SURPRISE CONSOLIDATED MINING CO.

Office: Kellogg. **Officers:** Dr. Charles R. Mowery, Pres., Wallace; George D. Lamielle, Sec., Kellogg. **Inc.:** Aug. 27, 1912. **Capital:** 1,200,000 shares; par value $1; 1,191,993 shares issued. **Property:** 3 patented, 36 unpatented claims, Pine Creek, Yreka dist.; Kellogg. **Development:** Approximately 2 miles of underground workings. **Plant:** MINE: A 7-drill I-R compressor, electrically driven; complete mining equipment and camp. MILL: 150-ton concentrator. **Ore:** Lead-zinc-silver. **Men employed:** Average, 10. **Remarks:** During the year the inclined shaft was extended to the 200-ft. level, where a small amount of drifting was done. Press reports were to the effect that this work increased the known ore reserves. A stock assessment of 10 mills was levied on May 28, 1928.

HILARITY LEAD-SILVER MINING CO.

Office: Mullan. **Officers:** J. A. Glowe, Pres.; H. W. Ingalls, Sec.-Mgr., both of Mullan. **Inc.:** Apr. 24, 1916, as Pine Creek Mining & Milling Co.; name changed May 7, 1923. **Capital:** 2,000,000 shares; par value 10c; 1,500,000 shares issued. **Property:** 12 unpatented claims, Pine Creek, Yreka dist.; Kellogg. **Development:** Principally by 1 tunnel 500 ft. long, and a 200-ft. vertical shaft. **Plant:** Electrically-driven compressor; complete mining equipment and camp. **Ore:** Lead-zinc-silver. **Remarks:** Annual labor only. Stock assessments were levied during the year as follows: March 24, 5 mills; Nov. 17, 5 mills.

HILL MINING & MILLING CO.

Office: First State Bank Bldg., Kellogg. **Officers:** Elmer Brown, Pres.-Mgr.; F. Wm. Voightlander, Sec., both of Kellogg. **Inc.:** May 10, 1916. **Capital:** 1,000,000 shares; par value 2c; 431,193 shares issued. **Property:** Hill group; 4 unpatented claims, Yreka dist.; Kellogg. **Development:** By 1 tunnel 800 ft. long. **Ore:** Lead-silver. **Remarks:** Annual labor only. A stock assessment of 1 mill was levied on May 10, 1928.

HONOLULU MINING CO., LTD.
Office: Wallace. **Officers:** J. W. Tabor, Pres., Wallace; John P. Mahoney, Sec., Spokane; Geo. W. Tabor, Asst. Sec., Wallace. **Inc.:** Apr. 4, 1906. **Capital:** 1,000,000 shares; par value $1; all shares issued. **Property:** 4 unpatented claims adjoining Hercules mine, Lelande dist.; Burke. **Development:** Principally by a 2400-ft. crosscut from the No. 4 Hercules tunnel. **Ore:** Lead-silver. **Remarks:** Press reports during the latter part of the year were to the effect that this company was merged with the Ambergris Consolidated Mining Co.

HORNSILVER MINING & MILLING CO.
Office: Wallace. **Officers:** Ben L. Collins, Pres., 312 Old National Bank Bldg., Spokane, Wash.; Russell F. Collins, Sec.-Mgr., Wallace. **Inc.:** May 31, 1901. **Capital:** 1,000,000 shares; par value 10c; 694,505 shares issued. **Property:** 5 unpatented claims, Placer Center dist.; Wallace. **Development:** 1 tunnel, 1000 ft. long. **Ore:** Lead-silver-gold. **Remarks:** Annual labor only.

HORSESHOE MINING CO.
Office: Mullan. **Officers:** Jas. B. Scoles, Pres.-Mgr., Mullan. **Inc.:** July 16, 1908. **Capital:** 1,500,000 shares; par value $1; 900,000 shares issued. **Property:** Horseshoe group; 9 unpatented claims, Hunter dist.; Mullan. **Development:** 2 tunnels: No. 1, 400 ft. long; No. 2, 3000 ft. long. **Ore:** Lead-silver. **Remarks:** Tunnel controlled by Atlas Mining Co.

HUMBOLT MINING CO.
Office: Wallace. **Officers:** James Dunne, Mgr., Burke. **Inc.:** An association. **Capital:** Sale of units. **Property:** 8 unpatented claims, Lelande dist.; Burke. **Development:** By 2 tunnels: No. 1, 80 ft. long; No. 2, 50 ft. long. **Ore:** Lead-silver. **Men employed:** Average, 1. **Remarks:** A small amount of work during the year.

HUMMING BIRD MINING CO.
Office: Burke. **Officers:** Harry L. Day, Pres.-Mgr., Wallace; W. H. Hoover, Sec., Burke. **Inc.:** June 27, 1898. **Capital:** 1,500,000 shares; par value $1; 1,411,075 shares issued. **Property:** Humming Bird group; 18 patented claims, Lelande dist.; Burke. **Development:** Total development, approximately 12,400 ft. of tunnels, the principal of which are No. 4, 1253 ft. long, and No. 5, Hercules, 12,086 ft. long. **Plant:** All equipment used in operation furnished by Hercules Mining Co. **Ore:** Lead-silver. **Men employed:** Average, 21. **Remarks:** In addition to performing a large amount of development work, the company produced a substantial tonnage of ore, which was milled at the Hercules mill.

HYPOTHEEK MINING & MILLING CO.
Office: Wallace. **Officers:** E. G. Gnaedinger, Pres.; Otto A. Olsson, Sec.-Mgr., both of Wallace. **Inc.:** Feb. 13, 1901. Office: Eagle Blk., Wallace. **Officers:** J. H. Nordquist, Pres.-Mgr.; A. G. Kennedy, Sec., both of Wallace. **Inc.:** Mar. 4, 1905. **Capital:** 1,250,000 shares; par value $1; 986,526 shares issued. **Property:** Independent group; 4 patented claims, Hunter dist.; Mullan.

INLAND EMPIRE MINING & MILLING CO.
Office: 310 Ziegler Bldg., Spokane, Wash. **Officers:** A. C. Schirmer, Pres.-Mgr., Hibbing, Minn.; John H. Roche, Sec., Spokane, Wash. **Inc.:** June 18, 1910. **Capital:** 1,000,000 shares; par value $1; all shares issued. **Property:** Never Sweat; 1 patented claim, Lelande dist.; Burke. **Development:** By 2 tunnels: No. 1, 350 ft. long; No. 2, 400 ft. long; and an inclined shaft 300 ft. deep. **Plant:** Electrically-driven compressor and complete mining equipment. **Ore:** Lead-silver.

INTERNATIONAL MINES, LTD.
Office: Wallace. **Officers:** James White, Pres.; A. H. Featherstone, Sec., both of Wallace. **Inc.:** July 2, 1903. **Capital:** 1,500,000 shares; par value $1; all shares issued. **Property:** 13 patented claims, Lelande dist.; Burke. **Ore:** Lead-silver. **Remarks:** Idle for many years.

IONE MINING CO.
Office: Wallace. **Officers:** O. M. Nordquist, Pres.-Mgr.; L. L. Brainard, Sec., both of Wallace. **Inc.:** Dec. 19, 1922. **Capital:** 1,500,000 shares; par value 10c; 300,000 shares issued. **Property:** Ione group; 3 unpatented claims, Summit dist.; Murray. **Ore:** Lead-silver. **Remarks:** Annual labor only.

IRON KING MINING CO., LTD.
Office: Wallace. **Officers:** Herman J. Rossi, Pres.; Otto A. Olsson, Sec., both of Wallace. **Inc.:** Jan. 8, 1904. **Capital:** 1,000,000 shares; par value $1; all shares issued. **Property:** Iron King group; 4 unpatented claims, Evolution dist.; Wallace. **Development:** Principally by 2 tunnels: No. 1, 2000 ft. long; No. 2, 150 ft. long. **Ore:** Lead-silver. **Remarks:** Annual labor only.

IVANHOE MINING CO., LTD.
Office: Mullan. **Officers:** J. A. Bean, Pres., Sumdor, Ariz.; C. D. Miller, Sec., Mullan. **Inc.:** Oct. 18, 1906. **Capital:** 1,500,000 shares; par value $1; 1,494,950 shares issued. **Property:** 2 patented claims, Hunter dist.; Mullan. **Ore:** Lead-silver. **Remarks:** Idle for many years.

JACK WAITE CONSOLIDATED MINING CO.
Office: Wallace. **Officers:** Herman J. Rossi, Pres.; R. C. Russell, Sec., both of Wallace; M. L. Savage, Mgr., Kellogg. **Inc.:** Jan. 30, 1928. **Capital:** 5,000,000 shares; par value $1; 4,965,000 shares issued. **Property:** Jack Waite group; 4 patented, 17 unpatented claims in Idaho; Silver

King group: 30 unpatented claims in Montana; Eagle dist.; Prichard. **Development:** Jack Waite group: Principally by 2 tunnels: No. 1, 2500 ft. long; No. 2, 1400 ft. long, in which is an inclined shaft 200 ft. deep. **Plant:** MINE: One air-driven and one electrically-driven hoist; 3 I-R electrically-driven compressors; trolley locomotive haulage; complete mining equipment and camp. MILL: 400-ton flotation concentrator. **Ore:** Lead-zinc-silver. **Men employed:** Average, 48. **Remarks:** This company is a consolidation of the Jack Waite Mining Co., Ltd., and the Silver King Mining Co., the two properties being adjoining groups situated on the Idaho-Montana state line. During the year the mine was entirely rehabilitated, electric-trolley haulage installed, the mill modernized and its capacity increased to 400 tons per day, a large amount of lateral development work performed, a winze sunk on the ore body to a depth of 200 ft., and work started in extending No. 2 tunnel toward the Silver King group. The new improvements and the additional ore exposed added greatly to the importance of this enterprise.

JIM BLAINE SILVER SYNDICATE, LTD.

Office: 323 Lindelle Blk., Spokane, Wash. **Officers:** Dan Krehbiel, Pres., Lind, Wash.; Matt Baumgartner, Sec.-Mgr., Spokane, Wash. **Inc.:** Apr. 12, 1920. **Capital:** 2,000,000 shares; par value 5c; 1,600,500 shares issued. **Property:** Jim Blaine group; 25 unpatented claims, Pine Creek, Yreka dist.; Kellogg. **Development:** By 3 tunnels: No. 1, 500 ft. long; No. 2, 1000 ft. long; No. 3, 1290 ft. long. **Ore:** Lead-zinc-silver. **Remarks:** Annual labor only.

KELLOGG GALENA MINING CO.

Office: 832 Old National Bank Bldg., Spokane, Wash. **Officers:** Samuel A. McCoy, Pres.-Mgr.; Geo. W. Sommer, Sec., both of Spokane, Wash. **Inc.:** Sept. 30, 1915. **Capital:** 1,500,000 shares; par value 10c; all shares issued. **Property:** 7 unpatented claims, Yreka dist.; Kellogg. **Development:** About 1400 ft. of workings. **Ore:** Lead-silver. **Remarks:** Annual labor only.

PONTIAC LAND & MINERAL CO.
Office: 318 Nat'l Bank Bldg., Pontiac, Mich. **Officers:** Arthur J. Schanck, Pres., Metamora, Mich.; M. E. Siple, Sec., Pontiac, Mich.; H. C. Stapleton, Mgr., Murray. **Inc.:** Feb. 7, 1928. **Capital:** 25,000 shares preferred, par value $10; 25,000 shares common, par value $10; 25,000 shares of no par value; 35,000 shares issued, kind unknown. **Property:** Lease on property of Chester Consolidated Mining Co. **Men employed:** Average, 5. **Remarks:** Small amount of development work during the latter part of the year.

PROGRESS GOLD MINING CO.
Office: Prichard. **Officers:** Harry Clark, Pres.; Harry Miller, Sec., both of Sprague, Wash.; D. M. Stairs, Mgr., Prichard. **Inc.:** Aug. 17, 1920. **Capital:** 1,000,000 shares; par value 10c; 414,692 shares issued. **Property:** Progress group; 17 unpatented claims, Summit dist.; Prichard. **Development:** By 6 short tunnels. **Ore:** Lead-silver. **Remarks:** Small amount of labor by lessees during the year.

PURITAN MINING CO., LTD.
Office: Wallace. **Officers:** Theodore Anderson, Pres., Lindsay, Calif.; C. A. Salberg, Sec.-Treas., Wallace. **Inc.:** Sept. 30, 1905. **Capital:** 1,500,000 shares; par value $1; 1,335,000 shares issued. **Property:** Puritan group; 5 patented claims, Placer Center dist.; Wallace. **Development:** Approximately 5000 ft. of crosscuts and drifts. **Remarks:** Idle throughout the year.

RAINBOW MINING & MILLING CO., LTD.
Office: 303 Mohawk Bldg., Spokane, Wash. **Officers:** Geo. Austin, Pres.-Mgr., Spokane; John F. Gearon, Sec., Wallace. **Inc.:** June 20, 1907. **Capital:** 2,000,000 shares; par value 25c; 1,418,426 shares issued. **Property:** 4 patented, 17 unpatented claims, Little North Fork dist., Kootenai County; and Evolution dist.; Osburn. **Development:** 1350-ft. crosscut on property in Shoshone County. **Plant:** Gas-driven I-R compressor, and complete mining equipment. **Ore:** Lead-silver. **Men employed:** Average, 3. **Remarks:** Annual labor only on Kootenai County property. A small amount of development work on Shoshone County property. Stock assessments were levied during 1928 as follows: Mar. 14, 4 mills; Aug. 23, 4 mills; Nov. 11, 4 mills.

RAMONA MINING CO.
Office: Kellogg. **Officers:** R. A. Brockman, Pres.-Mgr.; R. J. Coats, Sec., both of Kellogg. **Inc.:** Nov. 24, 1924. **Capital:** 1,000,000 shares; par value 25c; 783,216 shares issued. **Property:** Ramona group; 12 unpatented claims, Evolution dist.; Osburn. **Ore:** Lead-silver. **Remarks:** Idle.

RAVEN MINING CO., LTD.
Office: Wallace. **Officers:** W. T. McLachlin, Pres., Wardner; Franklin Pfirman, Sec., Wallace. **Inc.:** Nov. 13, 1907. **Capital:** 1,500,000 shares; par value $1; all shares issued. **Property:** 5 unpatented claims, Summit dist.; Murray. **Development:** Principally by 1 tunnel 1230 ft. long. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** Small amount of work during the year.

RAY JEFFERSON MINING CO.
Office: Wallace. **Officers:** D. C. Smith, Pres., Missoula, Mont.; P. J. Maggy, Sec., Wallace. **Inc.:** Mar. 31, 1910. **Capital:** 2,000,000 shares; par value 25c; all shares issued. **Property:** Ray Jefferson group; 32 patented, 9 unpatented claims, Beaver dist.; Wallace. **Developments:** Total development, 13,000 ft., consisting principally of a 3100-ft. crosscut. **Ore:** Lead-zinc-silver. **Men employed:** 1 watchman. **Remarks:** Annual labor only on unpatented claims. A stock assessment of 3½ mills was levied on May 21, 1928.

RED CLOUD MINING CO.
Office: Wallace. **Officers:** A. L. Honeker, Pres.; H. J. Rossi, Sec., both of Wallace. **Inc.:** Sept. 1, 1896. **Capital:** 500,000 shares; par value $1; 263,396 shares issued. **Property:** 1 patented claim, Yreka dist.; Kellogg.

REINDEER-QUEEN MINING CO.
Office: Wallace. **Officers:** J. F. Gearon, Pres.-Mgr.; G. A. Halvorson, Sec., both of Wallace. **Inc.:** Sept. 27, 1913. **Capital:** 2,000,000 shares; par value 10c; 466,401 shares issued. **Property:** Reindeer-Queen group; 3 patented, 12 unpatented claims, Hunter dist.; Mullan. **Development:** Principally by 5 tunnels: No. 1, 3100 ft. long; No. 5, 7700 ft. long. **Plant:** Water-driven compressor and complete mining equipment. **Ore:** Copper-lead-silver. **Remarks:** Annual labor only. A stock assessment of 10 mills was levied on Apr. 10, 1928.

RHODE ISLAND MINING CO., LTD.
Office: Wallace. **Officers:** A. G. Webb, Pres.; C. E. Clarke, Sec., both of Wallace. **Inc.:** July 13, 1900. **Capital:** 1,000,000 shares; par value 5c; all shares issued. **Property:** Rhode Island group; 4 unpatented claims, Evolution dist.; Wallace. **Development:** Approximately 900 ft. of workings. **Ore:** Lead-zinc-silver. **Remarks:** Annual labor only. A stock assessment of 1 mill was levied on May 18, 1928.

RICHMOND CONSOLIDATED MINING CO.
Office: 824 Old National Bank Bldg., Spokane. **Officers:** John B. White, Pres.; Fred J. Cunningham, Sec., both of Spokane. **Inc.:** June 29, 1923. **Capital:** 2,500,000 shares; par value 10c; all shares issued. **Property:** Richmond group; 7 patented claims, St. Joe dist.; Adair. **Development:** Approximately 8000 ft. of underground workings. **Ore:** Copper-gold. **Remarks:** During 1926, mine plant was dismantled and all operations were suspended.

ROANOKE MINING CO., LTD.

Office: Wallace. **Officers:** Henry L. Day, Pres.; John E. Ryan, Sec., both of Wallace. **Inc.:** Jan. 2, 1907. **Capital:** 1,500,000 shares; par value $1; 1,125,750 shares issued. **Property:** Roanoke group; 7 patented claims, Big Creek, Yreka dist.; Kellogg. **Development:** By 3 tunnels: No. 3, 650 ft. long; and an inclined shaft 340 ft. long, in which are 3 intermediate levels. **Plant:** Electrically-driven hoist. **Ore:** Lead-silver. **Men employed:** Average, 6. **Remarks:** Small amount of work performed during the year by a lessee. Stock assessments were levied during 1928 as follows: Jan. 31, 2½ mills; Oct. 17, 1 mill.

ROBERTS COEUR D'ALENE M. & M. CO.

Office: Mullan. **Officers:** T. W. Roberts, Pres.-Mgr., Mullan; Dorothy Roberts, Sec., Spokane, Wash. **Inc.:** Nov. 16, 1927. Charter forfeited Nov. 30, 1928. **Capital:** 100,000 shares; par value $1; 54,589 shares issued. **Property:** Sublease on property of Snow Storm Silver-Lead Co.

ROB ROY MINING CO.

Office: Wallace. **Officers:** John A. McLeod, Pres., Mullan; G. W. Dougherty, Sec., Wallace. **Inc.:** Feb. 16, 1907. **Capital:** 1,500,000 shares; par value $1; all shares issued. **Property:** 11 unpatented claims, Beaver dist.; Sunset. **Development:** By 1 tunnel 900 ft. long. **Ore:** Lead-silver. **Remarks:** Annual labor only. Stock assessments were levied during 1928 as follows: May 28, 1 mill; Sept. 10, 1 mill; Nov. 13, 1 mill.

RUTH CONSOLIDATED MINING & MILLING CO.

Office: 727 Old National Bank Bldg., Spokane, Wash. **Officers:** C. M. Crego, Pres.; G. D. Crego, Sec., both of Spokane, Wash. **Inc.:** Sept. 15, 1906. **Capital:** 1,500,000 shares; par value $1; all shares issued. **Property:** Ruth group; 7 patented claims, Placer Center dist.; Wallace. **Development:** By 2 tunnels: No. 1, 800 ft. long; No. 2, 3030 ft. long. **Plant:** Electrically-driven Laidlaw-Dunn-Gordon compressor; complete mining equipment. **Ore:** Lead-silver. **Remarks:** A small amount of development work during a period of 30 days.

SAINT LOUIS & IDAHO MINING & MILLING CO.

Office: Wallace. **Officers:** Russell F. Collins, Pres.-Mgr.; S. B. Collins, Sec., both of Wallace. **Inc.:** June 24, 1903. **Capital:** 1,000,000 shares; par value $1; 840,251 shares issued. **Property:** Saint Louis & Idaho group; 3 unpatented claims, Lelande dist.; Burke. **Development:** By 2 tunnels: No. 1, 1000 ft. long; No. 2, 2000 ft. long. **Ore:** Lead-silver.

SAMSON MINING & DEVELOPMENT CO., LTD.

Office: Wardner. **Officers:** D. W. Raines, Pres., Spokane; R. L. Brainard, Sec., Wardner. **Inc.:** Aug. 15, 1904. **Capital:** 1,000,000 shares; par value $1; 900,000 shares issued. **Property:** Samson group; 8 unpatented claims, Eagle dist.; Prichard. **Development:** Principally by 1 tunnel 1000 ft. long. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** Small amount of work during the year. A stock assessment of 2 mills was levied on July 10, 1928.

SENATOR MINING CO.

Office: Wallace. **Officers:** Rush J. White, Pres.-Mgr.; John J. Ferguson, Sec., both of Wallace. **Inc.:** May 3, 1920. **Capital:** 2,500,000 shares; par value 25c; 1,915,024 shares issued. **Property:** Senator group; 18 patented claims, Lelande dist.; Gem. **Remarks:** Under lease and bond to Coeur d'Alene Syndicate Mining Co., which see.

SHERMAN LEAD CO.

Office: Wallace. **Officers:** Jerome J. Day, Pres.; P. J. Maggy, Sec., both of Wallace. **Inc.:** Nov. 4, 1918. **Capital:** 3,500,000 shares; par value 25c. Increased Aug. 27, 1928, to 3,675,000 shares; par value 25c; all shares issued. **Property:** Sherman and Oreano groups; 9 patented claims, Lelande dist.; Burke. **Development:** Total development, over 20,000 ft., consisting principally of Sherman No. 5 tunnel, 5660 ft. long; Sherman No. 6 tunnel, 2000 ft. long; Oreano No. 2 tunnel, 5000 ft. long; and a 1000-ft. inclined raise connecting Sherman No. 6 tunnel and Oreano No. 2 tunnels. **Plant:** 2 electrically-driven hoists; trolley locomotive haul-

age and all mining equipment, furnished by Hercules Mining Co. **Ore:** Lead-silver. **Men employed:** Average, 55. **Remarks:** This company is one of the principal new mines to start production during the year. Its mine is connected with the No. 5 tunnel of the Hercules mine through the Humming Bird workings, and the ore was taken to the Hercules Mining Co.'s mill at Wallace for reduction. In addition to maintaining continuous output throughout the greater part of the year, a large amount of development work was performed.

SHRINE MINING CO.

Office: Kellogg. **Officers:** A. C. Beal, Pres.; Lester S. Harrison, Sec., both of Kellogg. **Inc.:** May 29, 1926. **Capital:** 2,000,000 shares; par value 5c; 1,000,000 shares issued. **Property:** 7 unpatented claims on Pine Creek, Yreka dist.; Masonia. **Development:** Principally by 1 tunnel 1400 ft. long. **Ore:** Lead-silver, antimony. **Men employed:** Average, 3. **Remarks:** Active throughout the year.

SIDNEY LEASING CO.

Office: Kellogg. **Officers:** J. B. Cox, Pres.; W. T. Simons, Sec., both of Kellogg. **Inc.:** Feb. 27, 1925. **Capital:** 25,000 shares; par value $1; 10,000 shares issued. **Property:** Lease on property of the Sidney Mining Co. **Plant:** 4½-mile aerial tramway; 538-cu.-ft. I-R electrically-driven compressor; electrically driven hoist; Waugh drill sharpener; complete mining equipment and camp. **Ore:** Lead-zinc-silver. **Men employed:** Average, 56. **Remarks:** The company suffered a severe handicap through the destruction by fire of the upper terminal of its tramway. This retarded production, as well as decreasing the dividend payments from those made during previous years. The terminal was reconstructed, the shaft sunk an additional 200 ft. in depth, and a large amount of lateral development work performed, which greatly increased the ore reserves. The fact that this mine, located on Pine Creek, is being operated at a substantial profit, is significant in proving that the Pine Creek section of the Coeur d'Alene district is not without merit.

SIDNEY MINING CO.

Office: Kellogg. **Officers:** H. M. Ross, Pres., Seattle, Wash.; W. T. Simons, Sec., Kellogg. **Inc.:** June 20, 1910. **Capital:** 1,500,000 shares; par value $1; all shares issued. **Property:** Sidney group; 8 patented, 10 unpatented claims, Pine Creek, Yreka dist.; Kellogg. **Development:** By 6 tunnels: No. 1, 400 ft.; No. 3, 700 ft.; No. 5, 825 ft.; No. 6, 850 ft.; and an inclined shaft 350 ft. deep. **Ore:** Lead-zinc-silver. **Remarks:** Under lease to Sidney Leasing Co., which see.

SIERRA NEVADA CONSOLIDATED MINING CO.

Office: Kellogg. **Officers:** Stanly A. Easton, Pres.-Mgr.; C. W. Simmons, Sec., both of Kellogg. **Inc.:** May 21, 1887. **Capital:** 1,000,000 shares; par value $1; all shares issued. **Property:** Sierra Nevada group; 5 patented claims, Yreka dist.; Kellogg. **Development:** Principally by 4 tunnels: No. 1, 4550 ft. long; No. 2, 275 ft. long; No. 3, 700 ft. long; No. 4, 625 ft. long. Total development, approximately 10,000 ft. **Ore:** Lead-silver. **Remarks:** Property under operation throughout the year by lessees, who produced and marketed a small tonnage of ore.

SILVER CLIFF GOLD & COPPER MINING CO., LTD.

Office: Wallace. **Officers:** Sidney L. Shonts, Pres.; Ed. C. Young, Sec.-Mgr., both of Wallace. **Inc.:** Oct. 6, 1900. **Capital:** 1,500,000 shares; par value $1; 1,416,000 shares issued. **Property:** Silver Cliff group; 19 unpatented claims, Hunter dist.; Mullan. **Development:** Over 2 miles of underground workings. **Plant:** An old water-driven compressor. **Ore:** Copper-silver. **Men employed:** Average, 2. **Remarks:** Annual labor only.

SILVER CRESCENT MINING CO.

Office: Wallace. **Officers:** James Mohr, Pres.-Mgr.; D. M. Faires, Sec., both of Wallace. **Inc.:** Oct. 19, 1911, as Placer Creek Silver-Lead Mining & Milling Co.; name changed Aug. 31, 1922. **Capital:** 1,000,000 shares; par value $1; 500,000 shares issued. **Property:** Silver Crescent group; 9 unpatented claims, on Moon Creek, Yreka dist.; Kellogg.

SILVER EAGLE MINING CO., LTD.

Office: Wallace. **Officers:** John J. Hogus, Pres.; C. W. Betts, Sec., both of Wallace. **Inc.:** Nov. 12, 1906. **Capital:** 1,000,000 shares; par value $1; 656,110 shares issued. **Property:** Silver Eagle group; 11 patented claims, Placer Center dist.; Wallace. **Development:** 4 tunnels: No. 1, 900 ft. long; No. 2, 400 ft. long; No. 3, 400 ft. long; No. 4, 300 ft. long. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** Principal tunnel extended 100 ft. during the year.

SILVER MOON MINING CO., LTD.

Office: Palmerston Hotel, Spokane, Wash. **Officers:** H. C. Lambach, Pres.; Gus Ehrenberg, Sec., both of Spokane, Wash. **Inc.:** Aug. 31, 1906. **Capital:** 1,500,000 shares; par value $1; 708,394 shares issued. **Property:** Silver Moon group; 9 unpatented claims, Leland dist.; Gem. **Development:** Principally by 1 tunnel 2850 ft. long. **Plant:** Electrically-driven 200-cu.-ft. compressor; complete mining equipment. **Ore:** Lead-silver. **Remarks:** Annual labor only. Under lease and option to North American Mining & Smelting Corporation.

SILVER STANDARD MINING CO.

Office: E. 604 Heroy Ave., Spokane, Wash. **Officers:** S. L. Shaw, Pres.; Mrs. C. M. Shaw, Sec., both of Spokane. **Inc.:** Unknown; never filed in Idaho. **Capital:** 2,000,000 shares; par value 25c; 262,240 shares issued. **Property:** 11 unpatented claims, Evolution dist.; Osburn. **Development:** By 2 tunnels: No. 1, 411 ft. long; No. 2, 560 ft. long. **Plant:** Water-driven Sullivan compressor. **Ore:** Lead-silver. **Remarks:** Annual labor only.

SILVER SUMMIT MINING CO.

Office: Wallace. **Officers:** Harry P. Pearson, Pres.-Mgr., Wallace. **Inc.:** Mar. 7, 1927. **Capital:** 1,500,000 shares; par value $1; shares issued, unknown. **Property:** Coeur d'Alene-Jumbo group; 21 unpatented claims, Evolution dist.; Osburn. **Development:** Over 1500 ft. of underground workings. **Ore:** Lead-silver. **Men employed:** Average, 8. **Remarks:** During the year work was started on a 4000-ft. crosscut which will intersect the vein 1600 ft. below the upper workings; it was advanced 400 ft. Property under option to and being financed by Stratton & Stratton through the sale of options.

SISTER MINING & MILLING CO., LTD.

Office: 1160 Winston Ave., San Marino, Calif. **Officers:** Frank P. Markwell, Pres., Los Angeles, Calif.; Everett H. Pattison, Sec., San Marino, Calif. **Inc.:** Dec. 12, 1899. **Capital:** 1,500,000 shares; par value 10c; all shares issued. **Property:** Sister group; 7 patented claims, Placer Center dist.; Wallace. **Development:** By 4 tunnels: No. 1, 108 ft.; No. 2, 1069 ft.; No. 3, 2500 ft.; No. 4, 209 ft.; a 210-ft. raise, and a 264-ft. vertical shaft. **Ore:** Lead-zinc-silver. **Remarks:** Idle.

SLAVONIAN MINING CO.

Office: Wallace. **Officers:** Risto V. Kojovich, Pres.-Mgr., Wardner; G. W. Dougherty, Sec., Wallace. **Inc.:** Nov. 26, 1910. **Capital:** 1,500,000 shares; par value $1; all shares issued. **Property:** 4 unpatented claims, Yreka dist.; Wardner. **Development:** Principally by 1 tunnel 1200 ft. long. **Ore:** Lead-silver. **Remarks:** A small amount of development work during the year with a power connection from the Last Chance compressor of the Bunker Hill & Sullivan M. & C. Co. A stock assessment of ½ mill was levied on June 15, 1928.

SMUGGLER CONSOLIDATED MINING CO.

Office: 8 Germond Bldg., Spokane, Wash. **Officers:** D. Holman, Pres.; J. A. Reubens, Sec., both of Spokane. **Inc.:** June 29, 1927. **Capital:** 1,000,000 shares; par value 10c; 338,500 shares issued. **Property:** Smuggler group; 4 patented claims, Lelande dist.; Burke. **Ore:** Lead-silver. **Remarks:** Idle.

SNOWSHOE MINING CO.
Office: Wallace. **Officers:** Walter H. Hanson, Pres.; Herman Marquardt, Sec., both of Wallace. **Inc.:** Sept. 30, 1903. **Capital:** 2,000,000 shares; par value $1; 260,000 shares issued. **Property:** Snowshoe; 8 patented claims, Hunter dist.; Mullan. **Development:** Approximately 4000 ft. of workings, the principal of which are No. 2 tunnel, 3000 ft. long, and No. 1 tunnel, 900 ft. long. **Plant:** Electrically-driven 3-drill compressor. **Ore:** Copper-silver. **Remarks:** Idle.

SNOW STORM LEASING CO.
Office: Wallace. **Officers:** Wm. Ziegler, Pres., Mullan; W. J. Stratton, Sec., Wallace. **Inc.:** Feb. 19, 1925; charter forfeited Dec. 1, 1925. **Capital:** 50,000 shares; par value $1; all shares issued. **Property:** Lease on property of Snow Storm Silver Lead Co. **Remarks:** Sub-leased to Roberts Coeur d'Alene Mining & Milling Co.

SONORA MINING & MILLING CO.
Office: Wallace. **Officers:** Otto Dubach, Pres., Gem; G. L. Richardson, Sec.-Mgr., Wallace. **Inc.:** Nov. 5, 1897. **Capital:** 1,000,000 shares; par value $1; 743,339 shares issued. **Property:** Sonora group; 11 patented, 4 unpatented claims, Lelande dist.; Burke. **Development:** Principally by 1 tunnel 5000 ft. long. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** Small amount of work during the year. Stock assessments were levied during 1928 as follows: June 6, 2 mills; Aug. 24, 2 mills.

SPOKANE TUNNEL MINING CO.
Office: Wallace. **Officers:** John I. Johnson, Pres.-Mgr.; Otto A. Olsson, Sec., both of Wallace. **Inc.:** Oct. 29, 1906. **Capital:** 1,500,000 shares; par value $1; all shares issued. **Property:** 3 unpatented claims, Placer Center dist.; Wallace. **Development:** Approximately 1200 ft. of workings. **Ore:** Lead-silver. **Remarks:** Annual labor only.

SQUARE DEAL MINING & MILLING CO., LTD.
Office: Wallace. **Officers:** A. J. Dunn, Pres.-Mgr.; M. K. Howes, Sec., both of Wallace. **Inc.:** Oct. 29, 1906. **Capital:** 1,000,000 shares; par value $1; all shares issued. **Property:** Square Deal group; 10 unpatented claims, Hunter dist.; Wallace. **Development:** By 3 tunnels: No. 1, 150 ft.; No. 2, 600 ft.; No. 3, 800 ft. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** A small amount of work during the year. A stock assessment of ¾ mill was levied on May 26, 1928.

STANLEY MINING CO.
Office: Wallace. **Officers:** John H. Wourms, Pres., Wallace. **Inc.:** Apr. 16, 1926. **Capital:** 1,500,000 shares; par value 10c; all shares issued. **Property:** Stanley group; 13 patented, 2 unpatented claims, Lelande dist.; Burke. **Development:** By 3 tunnels: No. 1, 290 ft. long; No. 2, 950 ft. long; No. 3, 1630 ft. long. **Ore:** Antimony-gold. **Remarks:** A reorganization of the Stanley Consolidated Mining & Milling Co. Annual labor on unpatented claims.

STAR MINING CO.
Office: 504 Empire State Bldg., Spokane, Wash. **Officers:** W. J. C. Wakefield, Pres.; Charles Hussey, Sec., both of Spokane, Wash.; James F. McCarthy, Mgr., Wallace. **Inc.:** Sept. 17, 1900. **Capital:** 1,000,000 shares; par value $1; all shares issued. **Property:** Star; 15 patented claims, Hunter dist.; Mullan. **Ore:** Silver-lead-zinc. **Remarks:** Property sold to Sullivan Mining Co. This company is being held together for the purpose of distributing the funds received from the sale.

STERLING MINING CO., LTD.
Office: Wallace. **Officers:** Mrs. Winnefred Presley, Pres.; J. Clarence Presley, Sec.-Mgr., both of Wallace. **Inc.:** Feb. 21, 1903. **Capital:** 1,500,000 shares; par value $1; 970,000 shares issued. **Property:** 13 unpatented claims, Evolution dist.; Wallace. **Development:** 1 tunnel, 600 ft. long. **Ore:** Lead-silver. **Remarks:** Annual labor only.

STERLING SILVER MOUNTAIN MINING CO., LTD.

Office: 323 Lindelle Blk., Spokane, Wash. **Officers:** R. L. Brainard, Pres., Wardner; Matt Baumgartner, Sec.-Mgr., Spokane, Wash. **Inc.:** Oct. 22, 1919. **Capital:** 2,000,000 shares; par value 5c; 1,537,500 shares issued. **Property:** 17 unpatented claims, Big Creek, Evolution dist.; Kellogg. **Development:** Principally by 1 tunnel, 1500 ft. long. **Plant:** 5x5 I-R gas-driven compressor. **Ore:** Lead-silver. **Remarks:** Annual labor only.

SUCCESS MINING CO., LTD.

Office: Wallace. **Officers:** Dan P. Mahoney, Pres., Perma, Mont.; H. H. Miller, Sec., Wallace. **Inc.:** April 7, 1905. **Capital:** 1,500,000 shares; par value $1; all shares issued. **Property:** Success group; 8 patented claims, Placer Center dist.; Wallace. **Development:** Principally by 3 tunnels: No. 1, 1320 ft. long; No. 2, 4585 ft. long; No. 3, 3360 ft. long; and a vertical shaft 1070 ft. deep, with 8 intermediate levels; total development, approximately 25,700 ft. **Plant:** MINE: Electrically-driven double-drum hoist; 2 electrically-driven compressors; complete mining equipment. MILL: 300-ton concentrator, including flotation and magnetic separation. **Ore:** Lead-zinc-silver. **Remarks:** In July, 1926, all operations were suspended, underground equipment was removed, and part of the mining and milling equipment was disposed of.

SULLIVAN MINING CO.

Office: Kellogg. **Officers:** Stanly A. Easton, Pres.; C. W. Simmons, Sec., both of Kellogg. **Inc.:** May 22, 1917. **Capital:** 500,000 shares; par value $3; 37,448 shares issued. **Property:** Star group; 23 patented claims, Hunter and Lelande dists.; Burke. **Development:** By a crosscut tunnel known as "Star crosscut," over 4000 ft. of drifting on vein, and a 1500-ft. vertical raise. The Star crosscut is on the 2000-ft. level of the Hecla mine and it is 8900 ft. long. **Plant:** MINE: All mine equipment furnished by Hecla Mining Co. MILL: All ore is milled by Bunker Hill & Sullivan M. & C. Co. in its South mill at Kellogg. ELECTROLYTIC ZINC PLANT: See Twenty-ninth Ann. Rept. of Mining Industry of Idaho and Dec. 1, 1928, issue of Engineering & Mining Journal for complete illustrated description. **Ore:** Lead-zinc-silver. **Men employed:** Average, 30 at mine and 250 at zinc plant.

REMARKS

In 1916 the Bunker Hill & Sullivan M. & C. Co. secured an option on the Star mine from the Star Mining Co.; as the most feasible method of opening this mine was through the Hecla mine, the Hecla Mining Co. was offered and accepted a 50 per cent interest in the option.

The Sullivan Mining Co. was then formed to take over the Star option and to operate the mine. After litigation to perfect title to the Star vein system was settled in favor of the Star Mining Co., the Star crosscut was started and continued without interruption, excepting the time lost from July 13, 1923, to March 1, 1924, as a result of the Burke fire.

On November 13, 1925, the Star ore body was encountered at a point 1650 ft. west of the east end-line, and at a depth of 4000 ft. below the apex of the vein. After encountering the ore body development work continued, and during 1925 it was opened the entire distance of 1650 ft. and a connection was made with the 2250 level of the Morning mine of the Federal Mining & Smelting Co. On account of the great depth of the Star crosscut, the development work necessary to open the mine for the extraction of ore involved a large amount of drifting and raising. This work progressed throughout 1928 and the principal raise was extended to the Star tunnel. The Star crosscut is 4000 ft. below the apex and about 70 ft. below the 2250-ft. level of the Morning mine; the Morning vein has been proved to the 3450-ft. level, and as the Morning and Star veins are conceded to be the same, it is evident that the Star mine contains an ore body of tremendous size. An authorized statement made during 1926 was to the effect that: "At the present capacity (475 tons per day) there is sufficient proven ore in the Star mine to assure it a life of 50 years."

No ore was produced during 1928. The zinc plant was completed and formally placed in operation on June 24, and the first metallic zinc was produced on August 3. The metal produced by this plant is of exceptionally high grade and is finding a ready market at an increase in price over that of any other zinc metal. This part of the Sullivan Mining Co. now constitutes one of the largest and most important enterprises in the Pacific Northwest, and one which assures the perpetuation of the mining industry in Shoshone County.

SUNRISE MINES CO.

Office: 215 Waverly Place, Spokane, Wash. **Officers:** Josephine Kratzer, Pres.; C. Fred Kratzer, Sec.-Mgr., both of Spokane, Wash. **Inc.:** Sept. 17, 1928. **Capital:** 1,500,000 shares; par value 10c; all shares issued. **Property:** 2 patented, 11 unpatented claims, Beaver dist.; Wallace. **Development:** By 6 tunnels, the principal one of which is 1500 ft. long. **Ore:** Lead-zinc-silver.

SUNSET MINING CO.

Office: 781 Corbett St., Portland, Ore. **Officers:** A. H. Ruedy, Pres., Oakland, Calif.; E. G. Ruedy, Sec., Portland, Ore. **Inc.:** Mar. 3, 1926. **Capital:** 500,000 shares; par value $1; 352,403 shares issued. **Property:** 9 patented, 2 unpatented claims, Placer Center and Beaver dists.; Wallace. **Development:** By 2 tunnels: No. 1, 810 ft. long; No. 2, 220 ft. long. **Plant:** 10x10 electrically-driven compressor. **Ore:** Lead-zinc-silver. **Remarks:** Annual labor only.

SUNSHINE MINING CO.

Office: Yakima, Wash. **Officers:** John Sawbridge, Pres.; F. H. Church, Sec., both of Yakima, Wash.; C. C. Samuels, Mgr., Kellogg. **Inc.:** Jan. 3, 1921. **Capital:** 1,500,000 shares; par value 10c; 1,488,792 shares issued. **Property:** Yankee group; 5 patented, 15 unpatented claims, Yreka dist.; Kellogg. **Development:** Principal development by 5 tunnels: No. 1, 100 ft. long; No. 2, 170 ft. long; No. 3, 800 ft. long; No. 4, 1000 ft. long; No. 5, 3000 ft. long; 1 vertical shaft 500 ft. deep, located in No. 5 tunnel; and 1 inclined shaft 450 ft. long, in No. 5 shaft-level. **Plant:** MINE: 2 I-R compressors, 1 Burry compressor, 2 hoists, all electrically driven; complete mining equipment, buildings, and camp. MILL: 100-ton concentrator, including fine grinding and flotation. **Ore:** Lead-silver. **Men employed:** Average, 113.

REMARKS

This company improved its mine and mill plants, installed a new electrically-driven hoist at the winze on the 500-ft. level, and constructed a new boarding house. The extension of the winze from the 700 to the 900-ft. level was completed and the ore opened on both of these levels, at which points it proved to be of greater extent and value than at any of the upper levels. In addition to the foregoing, a large amount of lateral development on the various levels was performed. This work greatly increased the ore reserves. The payment of dividends, which was startd in 1927, was continued throughout the year.

The developing of the Sunshine into a dividend-paying mine is of vast importance to the "south side" section of the Coeur d'Alene district in which it is located. This section has always been frowned upon and considered as unlikely for ore bodies of commercial importance, but this mine has upset all of the theories, and as a result much new development work in this section was started and carried on with much vigor throughout the year.

SUNSHINE MINING CO., LTD.

Office: Wallace. **Officers:** D. C. Smith, Pres., Missoula, Mont.; H. J. Hull, Sec., Wallace. **Inc.:** Jan. 5, 1907. **Capital:** 2,700,000 shares; par value $1; 1,395,129 shares issued. **Property:** Sunshine group; 4 patented, 14 unpatented claims, Beaver dist.; Wallace. **Development:** Over 6000 ft. of underground workings. **Plant:** Electrically-driven I-R 5-drill compressor; complete mining equipment and camp. **Ore:** Lead-zinc-silver. **Remarks:** Annual labor only.

SYNDICATE MINING & EXPLORATION CO., LTD.

Office: Kellogg. **Officers:** Ed. Lagerstrom, Pres.; J. L. Moore, Sec., both of Kellogg. **Inc.:** June 24, 1907. **Capital:** 1,500,000 shares; par value 25c; 742,526 shares issued. **Property:** 7 unpatented claims, Yreka dist.; Kellogg. **Development:** Principally by 1 tunnel, 1460 ft. long. **Ore:** Lead-silver. **Remarks:** Principal tunnel was extended a short distance during the year. Stock assessments were levied during 1928 as follows: Jan. 3, 1 mill; Mar. 1, 1 mill; May 28, 1 mill; Aug. 27, 1 mill.

TAMARACK & CUSTER CONSOLIDATED MINING CO.

Office: Wallace. **Officers:** Jerome J. Day, Pres.-Mgr.; Harry L. Day, Sec., both of Wallace. **Inc.:** Aug. 6, 1912. **Capital:** 5,000,000 shares; par value $1; all shares issued. **Property:** Tamarack & Custer; 56 patented, 2 unpatented claims, Lelande and Placer Center dists.; Gem. **Development:** The three principal tunnels are: No. 5, 12,300 ft. long; No. 6 (400-ft. level), 7900 ft. long; and No. 7 (1200-ft. level), 10,000 ft. long. The principal shaft is a 3-compartment, vertical shaft, 600 ft. deep; and a 3-compartment raise 800 ft. long connecting No. 6 and No. 7 tunnels. Total development, approximately 14 miles. **Plant:** MINE: 100-h. p. electrically-driven hoist; 3 1300-cu.-ft. electrically-driven compressors; storage battery haulage on intermediate levels and trolley locomotive haulage on main levels. Complete mining equipment. Modern and complete machine shop. Modern hotel, change houses, and camp. MILL: 500-ton concentrator, including flotation. During the year milling was discontinued and the mill partly dismantled. **Ore:** Lead-silver-zinc. **Men employed:** Average, 225. **Remarks:** This company is one of the substantial producing mines of the Coeur d'Alene district; it maintained a steady output and an extensive mine development campaign throughout the year. During the year a sorting plant was installed at the portal of No. 7 tunnel; the mill and tramway were abandoned, and No. 7 tunnel was converted into the outlet for the ore, whence it was transported to railroad cars and then to the Hercules Mining Co.'s mill at Wallace, which began to treat the entire output from this mine.

TEDDY MINING & MILLING CO., LTD.

Office: Kellogg. **Officers:** T. R. Mason, Pres.; S. M. Marchesi, Sec., both of Kellogg. **Inc.:** Dec. 1, 1904. **Capital:** 1,000,000 shares; par value $1; 770,000 shares issued. **Property:** Teddy group; 9 unpatented claims, Yreka dist.; Kellogg. **Development:** Over 1800 ft. of tunnels, the principal one of which is approximately 800 ft. long. **Ore:** Lead-zinc-silver. **Remarks:** Small amount of work throughout the year. A stock assessment of 3 mills was levied on July 16, 1928.

TIBERIUS MINING CO.

Office: Moscow. **Officers:** S. H. Knepper, Pres.; Samuel Owings, Treas., both of Moscow. **Inc.:** Mar. 9, 1916. **Capital:** 1,000,000 shares; par value 10c; 611,450 shares issued. **Property:** 40 acres of patented land on Pine Creek, Yreka dist.; Kellogg. **Ore:** Lead-zinc-silver.

TRADE DOLLAR MINING CO., LTD.

Office: 1160 Winston Ave., San Marino, Calif. **Officers:** Morton Webster, Pres., Wallace; Everett H. Pattison, Sec., San Marino, Calif. **Inc.:** Oct. 18, 1901. **Capital:** 1,000,000 shares; par value 10c; all shares issued. **Property:** Trade Dollar group; 6 patented claims, Lelande dist.; Burke.

TRAPPER MINING & SMELTING CO., LTD.

Office: Insurance Bldg., Wallace. **Officers:** Herman J. Rossi, Pres.-Mgr.; R. C. Russell, Sec., both of Wallace. **Inc.:** Dec. 14, 1906. **Capital:** 1,500,000 shares; par value $1; 861,047 shares issued. **Property:** 8 patented claims, Pine Creek, Yreka dist.; Kellogg. **Development:** By 1 tunnel 700 ft. long. **Ore:** Lead-zinc-silver.

TREASURE VAULT MINING CO., LTD.

Office: Wallace. **Officers:** P. J. Maggy, Pres.; W. A. Devan, Sec., both of Wallace. **Inc.:** Oct. 29, 1906. **Capital:** 1,000,000 shares; par value $1; all shares issued. **Property:** Treasure Vault group; 4 patented claims, Placer Center dist.; Sunset. **Ore:** Lead-silver. **Remarks:** Idle.

TUCKER MINING & MILLING CO.

Office: Wallace. **Officers:** Peter Bahn, Pres.-Mgr.; W. R. Turner, Sec., both of Wallace. **Inc.:** Mar. 30, 1907. **Capital:** 1,000,000 shares; par value $1; all shares issued. **Property:** Tucker group; 6 unpatented claims, Hunter dist.; Mullan. **Development:** Principally by 1 tunnel which is 1300 ft. long. **Ore:** Lead-silver. **Remarks:** Annual labor only.

UNITED METALS CO.

Office: Wallace. **Officers:** M. W. Neary, Pres.-Mgr., San Francisco, Calif.; A. G. Kennedy, Sec., Wallace. **Inc.:** Sept. 2, 1924. **Capital:** 2,000,000 shares; par value 50c; 746,950 shares issued. **Property:** 61% of stock of Black Bear Mines Co.; property of Western Pacific Mining Co., Goodenough Mining Co., and Bell Mining Co. held under 50-yr. lease. 36 patented, 14 unpatented claims, Lelande and Hunter dists.; Wallace. **Development:** Principally by 2 tunnels: No. 1, 800 ft. long; No. 2, or Black Bear, 4000 ft. long. **Plant:** Electrically-driven 3-drill compressor; complete mining equipment. **Ore:** Lead-zinc-silver. **Men employed:** Average, 6. **Remarks:** Active for 4 months.

VENDETTA CHIEF MINING CO.

Office: Wallace. **Officers:** John Lillie, Pres., Murray; Helen C. McPhee, Sec., Wallace. **Inc.:** Mar. 13, 1924. **Capital:** 1,000,000 shares; par value 10c; 300,000 shares issued. **Property:** 3 unpatented claims, Summit dist.; Murray. **Development:** 2 tunnels: No. 1, 300 ft. long; No. 2, 275 ft. long. **Ore:** Lead-silver-gold. **Remarks:** Annual labor only.

VIENNA-INTERNATIONAL MINING & MILLING CO., LTD.

Office: Wallace. **Officers:** A. H. Featherstone, Pres.; R. A. Marshall, Sec., both of Wallace. **Inc.:** Sept. 10, 1906. **Capital:** 1,500,000 shares; par value $1; all shares issued. **Property:** Vienna International; 4 patented claims, Placer Center dist.; Wallace. **Development:** Approximately 1300 ft. of tunnels. **Ore:** Lead-silver. **Remarks:** Idle for several years.

VINDICATOR MINING CO.

Office: 2122 Dwight Way, Berkeley, Calif. **Officers:** Kathryn Powers, Pres.; Grace Powers, Sec., both of Berkeley, Calif. **Inc.:** June 9, 1902. **Capital:** 1,000,000 shares; par value 10c; 323,462 shares issued. **Property:** 5 unpatented claims, Hunter dist.; Mullan. **Development:** By 1 tunnel 1100 ft. long. **Remarks:** A small amount of development by 2 lessees.

WALL STREET MINING CO.

Office: Wallace. **Officers:** C. A. Pooley, Pres.-Mgr.; C. Fred Kratzer, Sec., both of Spokane, Wash. **Inc.:** Apr. 20, 1907. **Capital:** 1,250,000 shares; par value $1; all shares issued. **Property:** 17 unpatented claims, Hunter dist.; Mullan. **Development:** Principally by 3 tunnels, the longest of which is 1400 ft. **Plant:** Electrically-driven compressor; complete mining equipment. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** Small amount of work during the year. A stock assessment of 7 mills was levied on May 7, 1928.

WASHINGTON-IDAHO MINING CO.

Office: 29 E. 17th Ave., Spokane, Wash. **Officers:** Dr. James Murray, Pres., Hayden Lake; A. B. Thomson, Sec.; Thos. Murray, Mgr., both of Spokane, Wash. **Inc.:** Oct. 21, 1927. **Capital:** 2,500,000 shares; par value 10c; 1,004,248 shares issued. **Property:** Crescent group; 21 unpatented claims, held under lease and option from the Crescent Mining & Milling Co.; Moon Creek, Yreka dist.; Kellogg. **Ore:** Lead-zinc-silver.

WEST BELL MINING CO., LTD.

Office: Wallace. **Officers:** Oscar J. Nordquist, Pres.; Otto A. Olsson, Sec., both of Wallace. **Inc.:** May 8, 1899. **Capital:** 1,000,000 shares; par value 5c; all shares issued. **Property:** West Bell group; 5 patented claims, Lelande dist.; Black Bear. **Development:** 1 tunnel, 2300 ft. long. **Ore:** Lead-silver. **Men employed:** Average, 1. **Remarks:** Small amount of development work during the year. A stock assessment of 2½ mills was levied on Jan. 11, 1928.

WEST FEDERAL MINING CO.
Officers: Ray Morrison, Sec., Kellogg. **Inc.:** Mar. 9, 1928. **Capital:** 1,000,000 shares; par value 50c; 750,000 shares issued. **Property:** 12 unpatented claims, Hunter dist.; Wallace.

WEST GEM MINING CO.
Office: 1160 Winston Ave., San Marino, Calif. **Officers:** J. Fred Markwell, Pres., Sanger, Calif.; E. H. Pattison, Sec., San Marino, Calif. **Inc.:** Feb. 1, 1912. Charter forfeited Nov. 30, 1927. **Capital:** 1,000,000 shares; par value $1; all shares issued. **Property:** 1 patented claim, Lelande dist.; Wallace.

WEST HECLA MINING CO.
Office: Spokane, Wash., Box 1620. **Officers:** Dr. T. A. Russell, Pres.; J. V. Pohlman, Sec., both of Spokane, Wash. **Inc.:** Feb. 18, 1907. **Capital:** 1,500,000 shares; par value $1; 1,450,000 shares issued. **Property:** 3 patented claims, Lelande dist.; Burke. **Development:** Principally by 1 tunnel 1650 ft. long. **Ore:** Lead-silver.

WEST HUNTER MINING CO., LTD.
Office: Wallace. **Officers:** T. B. Cosgrove, Pres.-Mgr., Mullan; Carlyle Babbitt, Sec., Wallace. **Inc.:** July 29, 1915. **Capital:** 1,500,000 shares; par value 10c; all shares issued. **Property:** 1 patented, 9 unpatented claims, Hunter dist.; Mullan. **Development:** About 2700 ft. of tunnels. **Ore:** Lead-silver. **Men employed:** Average, 2. **Remarks:** Annual labor only. Involved in litigation. A stock assessment of 5 mills was levied on Mar. 24, 1928.

WEST MAMMOTH MINING CO.
Office: 2404 W. 2d Ave., Spokane, Wash. **Officers:** H. C. Lambach, Pres., Seattle, Wash.; A. A. Booth, Sec., Spokane. **Inc.:** July 30, 1926. **Capital:** 1,500,000 shares; par value 25c; 1,132,000 shares issued. **Property:** Lease and option on property owned by Headlight Mining Co., Ltd., and Big Divide Mining Co., Ltd. **Development:** By 2 tunnels: Headlight, 1300 ft long; Silvermoon, 2190 ft. long. **Plant:** Electrically-driven compressor; complete mining equipment. **Ore:** Lead-silver. **Men employed:** Average, 6. **Remarks:** Property under lease and option to North American Mining & Smelting Corporation.

WESTERN MINES, LTD.
Office: 602 Sherwood Bldg., Spokane, Wash. **Officers:** J. B. Ellis, Pres.-Mgr., Spokane, Wash.; C. E. Collier, Sec., Wallace. **Inc.:** Mar. 16, 1928. **Capital:** 5,000,000 shares; par value $1; 2,000,000 shares issued. **Property:** Lease and option on property of Bell of the West Mining Co. **Remarks:** During the year 2 large boarding and bunk houses, office buildings, blacksmith shop, and compressor building were constructed, electrically-driven hoist and compressor installed, and complete mining equipment installed preparatory to starting an active development compaign.

WESTERN PACIFIC MINING CO.
Office: Wallace. **Officers:** J. Fred Markwell, Sec., Sanger, Calif. **Inc.:** Apr. 6, 1922. **Capital:** 2,500,000 shares; par value 10c; all shares issued. **Property:** 10 patented, 2 unpatented claims, Lelande dist.; Burke. Under option to United Metals Co.

WESTERN UNION MINING CO.
Office: Wallace. **Officers:** Harry L. Day, Pres.-Mgr.; W. B. Heitfield, Sec., both of Wallace. **Inc.:** Jan. 27, 1916. **Capital:** 2,000,000 shares; par value 10c; 1,997,656 shares issued. **Property:** Western Union group; 11 patented, 19 unpatented claims, Evolution dist.; Wallace. **Development:** Principally by 4 tunnels: No. 3, 3000 ft. long, and No. 4, 7000 ft. long; and a vertical shaft 477 ft. deep, with 4 intermediate levels. Total development, approximately 18,000 ft. **Plant:** I-R and Gardner-Ricks electrically-driven compressors; air-driven hoist; complete mining equipment and camp. **Ore:** Lead-silver. **Remarks:** Mine operated throughout the year by lessees, who produced a small tonnage of ore. Press reports indicated that an important disclosure of new ore was made during the year.

WHITE & WHITE OPTION MINING CO.

Office: Osburn. **Officers:** A. H. Sweeny, Pres.-Sec., Osburn; G. S. Weigle, Mgr., Pasco, Wash. **Inc.:** Sept. 4, 1928. **Capital:** 1,750,000 shares; par value 1c; 1,540,000 shares issued. **Property:** 8 unpatented claims, Yreka dist.; Kellogg; **Development:** By 4 short tunnels. **Ore:** Lead-zinc-copper.

WILBUR MINING CO., LTD.

Office: Wallace. **Officers:** A. T. Jenkins, Pres.; H. H. Miller, Sec., both of Wallace. **Inc.:** Nov. 24, 1906. **Capital:** 2,000,000 shares; par value 25c; 1,300,000 shares issued. **Property:** Wilbur group; 19 unpatented claims, Evolution dist.; Wallace. **Development:** Developed through No. 4 Western Union tunnel. **Ore:** Lead-silver. **Remarks:** Control of this company is held by the Western Union Mining Co. Annual labor only.

WILLOW CREEK MINING CO.

Office: 303 Hyde Blk., Spokane, Wash. **Officers:** Andrew Hedin, Pres.-Mgr.; John E. Hoppe, Sec., both of Spokane, Wash. **Inc.:** Jan. 25, 1924. **Capital:** 1,500,000 shares; par value 5c; 962,500 shares issued. **Property:** 23 unpatented claims, Hunter dist.; Mullan. **Development:** Principal tunnel 1800 ft. long. **Plant:** A gas-driven compressor and complete mining equipment. **Ore:** Silver-lead. **Men employed:** Average, 2. **Remarks:** A small amount of work during the year, the money for which was derived from stock assessments.

WISCONSIN MINING CO.

Office: Kellogg. **Officers:** Louis Bolduc, Pres.-Mgr.; S. A. Germo, Sec., both of Kellogg. **Inc.:** Mar. 13, 1913. **Capital:** 1,500,000 shares; par value $1; 450,000 shares issued. **Property:** Wisconsin group; 5 unpatented claims Yreka dist.; Kellogg. **Development:** 1 tunnel 700 ft. long and a vertical shaft 100 ft. deep. **Plant:** Water-driven compressor; hoist; and complete mining equipment. **Ore:** Lead-silver. **Remarks:** Small amount of work by 2 lessees. A stock assessment of 3 mills was levied on May 26, 1928.

WOLVERINE MINING CO., LTD.

Office: McConnell Hotel, Kellogg. **Officers:** P. C. Harrington, Pres.-Mgr.; Harold S. Wren, Sec., both of 304 Lindelle Bldg., Spokane, Wash. **Inc.:** Aug. 4, 1909. **Capital:** 1,250,000 shares; par value $1; 1,110,000 shares issued. **Property:** Wolverine group; 6 unpatented claims, Big Creek, Yreka dist.; Kellogg. **Development:** By 3 tunnels: No. 1, 450 ft. long; No. 2, 315 ft. long; No. 3, 87 ft. long; and a vertical shaft 250 ft. deep. **Plant:** Electrically-driven Sullivan compressor; hoist, and complete mining equipment. **Ore:** Lead-silver. **Men employed:** Average, 8. **Remarks:** Under option to Wilbur Greenough and Charles Heidenreich of Spokane, who extended the shaft 100 ft. and performed a large amount of development work during the year.

WONDERFUL MINING CO., LTD.

Office: Wallace. **Officers:** H. E. Howes, Vice-Pres.; A. H. Featherstone, Sec., both of Wallace. **Inc.:** Oct. 15, 1906. **Capital:** 1,500,000 shares; par value $1; all shares issued. **Property:** Wonderful group; 4 patented claims, St. Joe dist.; Mullan. **Remarks:** Idle for a number of years.

WYOMING MINING & MILLING CO., LTD.

Office: Wallace. **Officers:** Alfred Page, Pres., Spokane, Wash.; A. W. Hoover, Sec.; Frederick Burbidge, Mgr., both of Wallace. **Inc.:** May 3, 1901. **Capital:** 1,000,000 shares; par value 10c; 935,554 shares issued. **Property:** Wyoming group; 11 patented claims, Yreka dist.; Kellogg. **Development:** Principally by 2 tunnels: Ranger, 2150 ft. long; Wyoming, 500 ft. long. Total development, approximately 5400 ft. **Ore:** Lead-zinc-silver. **Remarks:** A small tonnage of ore was produced during the year by lessees.

YOLANDA MINING CO.

Office: 301 Eilers Bldg., Spokane, Wash. **Officers:** J. E. Riley, Pres.-Mgr., Tekoa, Wash.; E. D. Wilcox, Sec., Spokane, Wash. **Inc.:** Unknown; never filed in Idaho. **Capital:** 15,000 shares preferred, par value $1; 2,420,000 shares common, par value 20c; 1750 shares preferred, 44,000 shares common issued. **Property:** Lease and option on property of Idora Mining Co., Ltd. **Men employed:** Average, 3. **Remarks:** Small amount of repair and road work during the year.

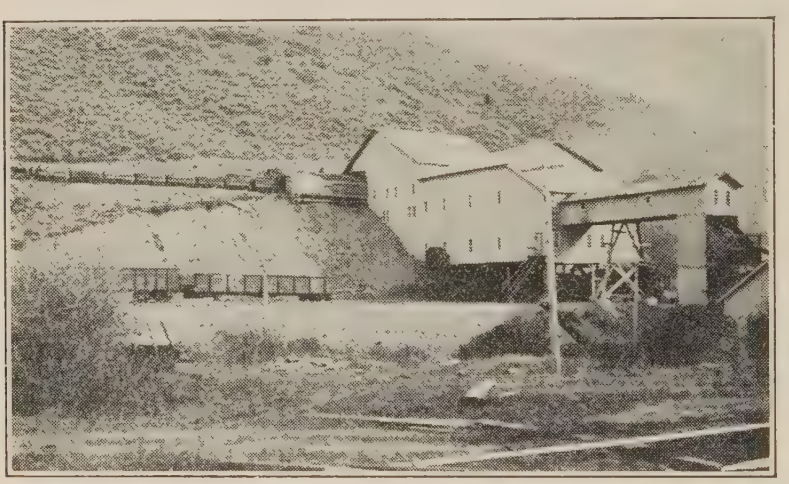
TETON COUNTY

Teton is one of the southeastern counties, being bounded on the east by the State of Wyoming, on the south by Bonneville County, on the west by Madison County, and on the north by Fremont County. Containing an area of but 463 square miles, it is the second smallest county in the State. The 1920 census accredited it with a population of 3921, or 8.5 persons to the square mile, the larger part of which is located in the Teton River valley. Practically all the county is farming land, and the principal industries are wheat, potato and stockraising.



The county is served by the Teton State highway, good county roads, and the Ashton-Victor branch of the O. S. L. Railroad. Driggs is the largest town and county seat.

The principal mineral resources of Teton County are coal, phosphate rock, natural gas, limestone, and asbestos; and there are excellent possibilities for the discovery of petroleum. This county is one of the few in the State in which coal occurs in commercial quantity. Compared with the coal produced at Rock Springs, Wyoming, it is equal in quality and similar in appearance. As well as being of excellent quality for domestic and industrial purposes, it is especially adaptable for powdered coal.

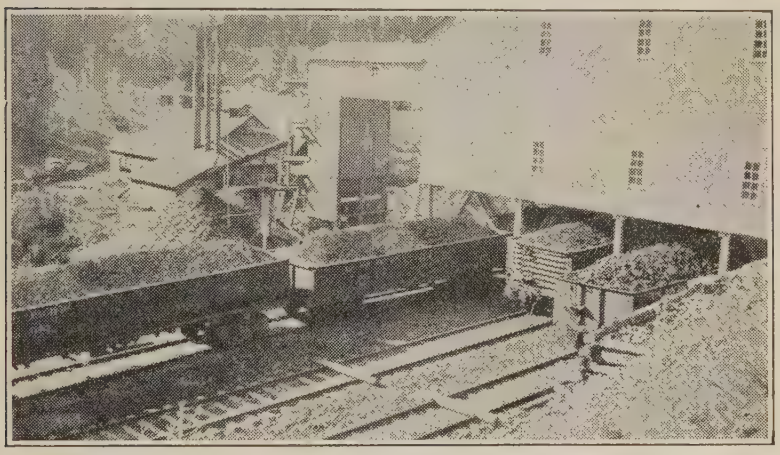
The principal coal-bearing area is the Horseshoe district, seven miles west of Driggs. This district has never been sufficiently developed to prove the number or extent of the coal beds. Those which have been proved vary from one to eleven feet in thickness and repose at an angle of approximately 45 degrees. The Horseshoe district has been examined by the U. S. Geological Survey and by the U. S. Bureau of Mines in cooperation with the Idaho Bureau of Mines and Geology. The reports issued by these organizations are listed in the bibliographies, to which the reader is referred for complete descriptions, analyses, and tonnage estimates.

During the greater part of the year the Teton Coal Co. produced and marketed a substantial tonnage of coal. The Superior Coal Mining Co. and the Idaho Coal Mining Co. both conducted active development work throughout a large part of the year.

Press reports were to the effect that equipment had been installed and drilling commenced by a new organization in a search for oil.

TIPPLE: TETON COAL CO.

IDAHO COAL MINING CO.



Office: Driggs. **Officers:** Peter Mickelsen, Pres., Rexburg; J. F. Miller, Sec., Rigby; John R. Cluff, Mgr., Driggs. **Inc.:** Aug. 13, 1926. **Capital:** 100,000 shares; par value $1; 90,000 shares issued. **Property:** Government prospecting permit on 2160 acres, Horseshoe dist.; Sam. **Development:** By 4 tunnels: No. 1, 338 ft.; No. 2, 172 ft.; No. 3, 412 ft.; No. 4, 490 ft. **Plant:** Small gas-driven compressor. **Mineral sought:** Coal. **Men employed:** Average, 3. **Remarks:** Compressor and mining equipment installed, and active development work conducted throughout the year.

SUPERIOR COAL MINING CO.

Office: Pocatello. **Officers:** Roy L. Black, Pres.; S. Hansen, Sec., both of Pocatello. **Inc.:** Dec. 24, 1924. **Capital:** 1,000,000 shares; par value $1; 250,000 shares issued. **Property:** Assignment of prospecting permits and applications for lease on 2400 acres; Horseshoe dist.; Sam. **Development:** By 8 short tunnels, the longest being 425 ft., all of which are drifts on coal veins; and an inclined shaft 158 ft. long. **Plant:** Steam-driven hoist. **Mineral sought:** Coal. **Men employed:** Average, 3. **Remarks:** This company's property adjoins that of the Teton Coal Co. Active development work, which consisted principally in driving a tunnel to intersect the Brown Bear and one other coal bed, was conducted throughout the greater part of the year.

TETON COAL CO.

Office: Sam. **Officers:** H. F. Samuels, Pres., Sam; Don H. Eagleson, Sec., Boise. **Inc.:** Oct. 3, 1923. Charter forfeited Nov. 30, 1928. **Capital:** 1,000,000 shares; no par value; 875,000 shares issued. **Property:** Brown Bear group; 1080 acres patented land, Horseshoe dist.; Sam. **Development:** By an inclined shaft 650 ft. long and a 5400-ft. crosscut tunnel. Total development, approximately 16,000 ft. **Plant:** Steam-driven hoist and 2 steam-driven compressors; tipple capable of handling 1000 tons in 24 hrs.; complete mining equipment and camp. **Mineral sought:** Coal. **Men employed:** Average, 25. **Remarks:** Active throughout the greater part of the year. A large tonnage of coal was produced and marketed.

LOADING TRACKS, TETON COAL CO.'S TIPPLE

TIETON VALLEY LAND & LEASING CO.

Office: Astoria, Ore. **Officers:** S. W. Lovell, Pres.; Charles Anet, Sec., both of Astoria, Ore.; F. J. Johnston, Mgr., Driggs. **Inc.:** Aug. 11, 1923. **Capital:** 100,000 shares; par value $1; 93,000 shares issued. **Property:** Oil and gas lease on 6000 acres of patented land lying west of Driggs. **Development:** 1325-ft. well. **Plant:** No. 26 Star drilling rig and complete drilling equipment. **Mineral sought:** Oil and gas. **Remarks:** Idle.

VALLEY COUNTY

Valley County occupies the geographical center of the State. It is bounded on the north by Idaho, on the east by Lemhi and Custer, on the south by Boise, and on the west by Gem and Adams counties. It contains an area of 3779 square miles, and was accredited with a population of 2524 in the 1920 census, or 0.7 persons to the square mile. The principal industries are farming, stockraising, lumbering and mining. Cascade is the county seat.

The State highway, Payette, extending from Boise to Cascade, McCall, and New Meadows, is the principal highway; the Forest Service highways from Cascade to Knox and Yellow Pine, and from Knox into Deadwood Basin and Bear Valley, connecting with the Sawtooth Park and Payette highways, are practically completed and opened to travel. The Nampa-McCall branch of the O. S. L. Railroad is the only railroad in the county.

Isolation and lack of transportation have prevented mineral development and compelled many valuable properties to lie idle, but the system of forest roads which has been designated and partly constructed, is making many of the various sections accessible to travel, and is stimulating mining. When these roads are completed the largest undeveloped mineralized area in the State will become available to profitable development and exploitation.

The principal mineral resources of Valley County are gold (placer and lode), lead, silver, zinc, antimony, mercury, copper, tungsten, molybdenum, and monazite. Many mines containing these minerals are undeveloped but justify the finances to prove their possibilities, and many others warrant investigation. These properties and the possibilities in undiscovered veins present many opportunities to the investor, prospector, and development company.

Throughout the year the Bunker Hill & Sullivan M. & C. Co., at the Hall Interstate and Lost Pilgrim mines, continued to be one of the most outstanding development and new construction enterprises in central Idaho. Construction on its new mill, which was started in 1927, was fully completed. The ore-bins, crushing machinery, and building are sufficient for a daily capacity of 300 tons, although initial flotation equipment was installed for a daily capacity of 100 tons only. In addition to completing the mill, a sawmill was installed, a large new office and residence erected, a 700-ft. raise connecting the Independence tunnel and the Anderson tunnel completed, and a large amount of lateral development work performed. The development work greatly increased the known ore reserves and proved the ore to a vertical depth of approximately 1000 ft. in the Lost Pilgrim Mining Co.'s property. As the Hall Interstate vein occurs in granite or allied rocks, this enterprise is of value to the State, as it is stimulating prospecting and encouraging the investment of capital for the development of the many similar occurrences which are found throughout the granite area of central Idaho. In past years, this area has been looked upon with disfavor, but this demonstration proves the potentialities of these veins.

One of the largest and most important enterprises bearing on the future of south-central Idaho is the mine plant installed, buildings erected, and road construction performed during 1928 by Fred W. Bradley, president of the Bunker Hill & Sullivan M. & C. Co., operating as the Yellow Pine Co. near Yellow Pine. During the year construction on a 12-mile highway from Yellow Pine to Meadow Creek was started; a steam-driven sawmill, compressor, and complete mining equipment were installed on the Meadow Creek group at a large expenditure, as the equipment had to be drawn over the old Thunder Mountain road; and a large modern boarding and bunk house and 4 cottages were constructed. At the Cinnabar group mine development work was maintained throughout the year without interruption. The road work, new plant installation, new construction and mine developments conducted by this company were instrumental in attracting a large amount of attention to this part of the State.

The beginning of construction by the U. S. Forest Reserve on its projected highway from Yellow Pine over Profile Gap into the Edwardsburg and Big Creek districts, of which approximately 4 miles were constructed during the year, was one of the principal new road projects to be started. This road and the road into Meadow Creek, which is being constructed by the Yellow Pine Co., will open up one of the largest virgin mineral districts in the State—the Big Creek and Edwardsburg districts. During the year these districts received more attention from prospectors and large organizations seeking gold-mining enterprises than at any time since the Thunder Mountain boom, and at the close of the year three new organizations were actively engaged in raising funds with which to commence work in 1929.

In the Thunder Mountain district, McRae and Davis maintained active work at the Sunnyside mine throughout the year, and produced and milled a small tonnage of gold ore. In addition to the foregoing, this district received more investigation from those seeking new gold-mining enterprises than at any time during the past twenty-five years.

BIG CREEK GOLD MINES, INC.

Office: 618 Idaho Bldg., Boise. **Officers:** C. B. Faraday, Pres., Mountain Home; C. E. Winstead, Sec.; B. F. Goldman, Mgr., both of Boise. **Inc.:** June 9, 1928. **Capital:** 3,000,000 shares; no par value; 2,000,000 shares issued. **Property:** 17 unpatented lode claims and 480 acres unpatented placer claims, part of which are held under lease and option, Edwardsburg dist.; Edwardsburg. **Ore:** Gold.

BUNKER HILL & SULLIVAN MINING & CONCENTRATING CO.

(See Shoshone County.)

Officers: F. W. Bradley, Pres., 1022 Crocker Bldg., San Francisco, Calif.; Stanly A. Easton, Mgr., Kellogg; James W. Gwinn, Local Mgr., Cascade. **Property:** Lease and bond on mines owned by Hall Interstate Mining Co., and Lost Pilgrim Mining Co., Deadwood dist.; Cascade, 52 miles; Bernard. **Development:** Approximately 9000 ft. on both groups. **Plant:** 150-kw. hydroelectric power plant operating under a 510-ft. head; 385-cu-ft. I-R compressor; complete mining equipment and camp. **Ore:** Lead-silver. **Men employed:** Average, 35.

REMARKS

The properties controlled by this company were acquired in May, 1924, after many months of negotiation; immediately thereafter arrangements were completed for the construction of the necessary buildings and the installation of the equipment.

A large two-story boarding-house, a power-house, shop, barn, and outbuildings were built. The power plant was constructed, and the compressor and mining equipment were installed; mining operations were commenced on Oct. 24, 1924, and conducted without interruption throughout 1928.

The development campaign outlined consisted of extending the Independence tunnel, of the Hall group, a distance of 1500 ft., where it intersected the Hall vein at a vertical depth of approximately 600 ft. below the apex. In 1927 this ore was sufficiently explored to warrant building a mill, on which construction work was completed in 1928. The ore-bins, crushing machinery, and building are sufficient for a daily capacity of 300 tons, although initial flotation equipment was installed for a daily capacity of 100 tons only. In addition to completing the mill, a sawmill was installed, a large new office and residence erected, a 700-ft. raise connecting the Independence tunnel and the Anderson tunnel completed, and a large amount of lateral development work performed. The development work greatly increased the known ore reserves and proved the ore to a vertical depth of approximately 1000 ft. in the Lost Pilgrim Mining Co.'s property. This enterprise is one of the largest and most important in south-central Idaho and is of particular interest because the ore bodies occur in old gneissic and granitic rocks.

CASCADE VALLEY CORPORATION

Office: Fulton Nat'l Bank Bldg., Atlanta, Ga. **Officers:** N. S. Turner, Pres., Covington, Ga.; Ronald Ransom, Sec., Atlanta, Ga. **Inc.:** Apr. 27, 1925. **Capital:** 600 shares; par value $100; all shares issued. **Property:** Sunday group; 7 patented claims, Edwardsburg dist.; Edwardsburg.

COPPER CAMP MINING CO.

Office: Edwardsburg. **Officers:** W. H. Brittain, Pres., Atlanta, Ga.; Wm. A. Edwards, Sec.-Mgr., Edwardsburg. **Inc.:** Oct. 19, 1928. **Capital:** 2,500,000 shares; par value $1; 1,347,000 shares issued. **Property:** Copper Camp and Dixie groups; 29 unpatented claims, Edwardsburg dist.; Edwardsburg. **Ore:** Gold, silver, copper, lead.

DEADWOOD MINING CO., LTD.

Office: Boise. **Officers:** Jas. H. Hawley, Pres.; C. B. Steunenberg, Sec., both of Boise. **Inc.:** June 10, 1921. **Capital:** 1,000,000 shares; par value 10c; 307,504 shares issued. **Property:** Deadwood group; 8 unpatented claims, Deadwood dist.; Knox. **Development:** Principally by 1 tunnel, 600 ft. long. **Ore:** Lead-silver. **Remarks:** A small amount of development work during the year.

MILL AND OFFICE: BUNKER HILL & SULLIVAN M. & C. CO, AT HALL-INTERSTATE MINE

FERN QUICKSILVER MINING CO.

Office: Twin Falls. **Officers:** V. E. Morgan, Pres.; D. R. Edwards, Sec., both of Twin Falls. **Inc.:** Nov. 21, 1917. **Capital:** 1,500,000 shares; par value $1; 1,001,587 shares issued. **Property:** Fern group; 6 patented claims, Yellow Pine dist.; Yellow Pine. **Ore:** Mercury. **Remarks:** Idle.

GOLD FORK MINING CO.

Office: 218 N. Eighth St., Boise. **Officers:** W. E. Pierce, Pres.; W. Clyde Cox, Sec., both of Boise. **Inc.:** Jan. 18, 1916. **Capital:** 2000 shares; par value $100; all shares issued. **Property:** 1520 acres patented placer ground, Gold Fork dist.; Roseberry. **Ore:** Placer gold. **Remarks:** Idle throughout the year.

GREAT NORTHERN MINES CO.

Officers: Albert Hennessy, Pres., Yellow Pine. **Inc.:** Feb. 7, 1924. Charter forfeited Nov. 30, 1928. **Capital:** 100,000 shares; par value $1; all shares issued. **Property:** 11 unpatented claims, Yellow Pine dist.; Yellow Pine. **Development:** By 2 short tunnels. **Ore:** Gold. **Remarks:** Small amount of work throughout the year.

HALL INTERSTATE MINING CO.
Office: Boise. **Officers:** Jas. H. Hawley, Pres.; Chas. W. Mack, Sec., both of Boise. **Inc.:** Oct. 30, 1915. **Capital:** 1,000,000 shares; par value 25c; 155,500 shares issued. **Property:** Hall group; 5 unpatented claims, Deadwood dist.; Knox. **Development:** By 2 tunnels: Independence, 6000 ft. long; Anderson, 300 ft. long. **Ore:** Lead-silver. **Remarks:** Under lease and option to Bunker Hill & Sullivan M. & C. Co.

HOLCOMB CO., LTD.
Office: Boise. **Officers:** Ario Pardee, Sec., 1600 Walnut St., Philadelphia; Chas. W. Mack, Mgr., Boise. **Inc.:** Apr. 20, 1908. **Capital:** 500,000 shares; par value $1; 169,280 shares issued. **Property:** 16 patented claims, Thunder Mountain dist.; Yellow Pine. **Ore:** Gold.

HURLEY CREEK MINING & MILLING CO.
Office: Cascade. **Officers:** Chas. C. Smith, Pres., Smiths Ferry; Forest E. Robb, Sec., Cascade. **Inc.:** Aug. 21, 1923. **Capital:** 1,000,000 shares; par value 10c; 683,426 shares issued. **Property:** Maloney group; 10 unpatented claims, unorganized dist.; Cabarton. **Development:** By 3 tunnels: No. 1, 450 ft. long; No. 2, 200 ft. long; No. 3, 1100 ft. long. **Ore:** Silver-gold-copper. **Men employed:** Average, 2. **Remarks:** This company is operating the Maloney group and actively developed the property during the greater part of the year.

IDAHO CENTRAL MINES CO.
Office: Mabton, Wash. **Officers:** A. L. Livingston, Pres.; H. S. Whiting, Sec., both of Mabton, Wash.; J. R. Butler, Mgr., Cascade. **Inc.:** May 12, 1927. **Capital:** 3,000,000 shares; par value $1; 1,563,010 shares issued. **Property:** Idaho Central group; 5 unpatented claims, Thunder Mountain dist.; Clover. **Development:** By 2 short tunnels. **Ore:** Copper-gold. **Remarks:** Small amount of work during the summer months.

INDEPENDENCE MINES & POWER CO.
Office: Topeka, Kan. **Officers:** W. H. Davis, Pres.; L. Biscoe, Sec., both of Topeka, Kan. **Inc.:** Apr. 27, 1906. **Capital:** 500,000 shares; par value 5c; 400,000 shares issued. **Property:** 10 patented claims, Big Creek dist.; Yellow Pine. **Development:** By 1 tunnel 500 ft. long. **Ore:** Copper-silver-gold. **Remarks:** Idle for many years.

LOST PILGRIM MINING CO.
Office: Boise. **Officers:** Jas. H. Hawley, Pres.; Chas. W. Mack, Sec., both of Boise. **Inc.:** Nov. 22, 1921. **Capital:** 600,000 shares; par value $1; 355,144 shares issued. **Property:** Lost Pilgrim group; 8 unpatented claims, Deadwood dist.; Knox. **Development:** By 2 tunnels: No. 1, 400 ft. long; No. 2, 300 ft. long; and 1 vertical shaft 40 ft. deep, at the bottom of which is a 70-ft. drift; also by Independence tunnel. Total development, approximately 2500 ft. **Ore:** Silver-lead-zinc. **Remarks:** Under lease and option to Bunker Hill & Sullivan M. & C. Co.

PROFILE-TAMARACK MINES CO.
Office: Yellow Pine. **Officers:** Geo. Webber, Pres.; Emil P. Slovarp, Sec., both of Henry Bldg., Portland, Ore.; H. T. Abstein, Mgr., Yellow Pine. **Inc.:** June 18, 1926. **Capital:** 20,000 shares; no par value; 9700 shares issued. **Property:** 27 unpatented claims, Missouri and Profile creeks, Yellow Pine dist.; Yellow Pine. **Development:** Approximately 1000 ft. of workings on both groups. **Ore:** Lead-silver, copper-gold. **Men employed:** Average, 3. **Remarks:** Active development work throughout the summer months.

PROSPECTORS MINING & DEVELOPING CO., LTD.
Office: Kuna. **Officers:** John R. Clark, Pres., Escalon, Calif.; Homer I. Clark, Sec.-Mgr., Kuna. **Inc.:** April 12, 1906. **Capital:** 50,000 shares; par value $1; 26,725 shares issued. **Property:** Golden Ibex group; on Wilson Creek, Thunder Mountain dist.; Meyers Cove. **Development:** Approximately 525 ft. of workings, the principal one of which is a tunnel 125 ft. long. **Ore:** Gold. **Men employed:** Average, 1. **Remarks:** Annual labor only.

RETALLAC MINING CO.

Office: 695 Multnomah St., Portland, Ore. **Officers:** Fenton Merrill, Pres., P. O. Box 1221, Seattle, Wash.; Paul DeHaas, Sec., Portland, Ore. **Inc.:** Unknown. **Capital:** 5000 shares; par value $1; all shares issued. **Property:** 2 unpatented claims, Yellow Pine dist.; Yellow Pine. **Ore:** Gold. **Remarks:** Annual labor only.

SMITH CREEK HYDRAULIC MINING CO., INC.

Office: 308 McCarty Bldg., Boise. **Officers:** A. C. Bunger, Pres.; H. M. Nelson, Sec.; J. K. Burns, Mgr., all of Boise. **Inc.:** Sept. 11, 1928. A reorganization of the Smith Creek Hydraulic Mining Co. **Capital:** 750,000 shares; no par value; 402,611 shares issued. **Property:** Smith Creek group; 20 unpatented placer claims, Edwardsburg dist.; Edwardsburg. **Ore:** Placer gold. **Men employed:** Average, 10. **Remarks:** Hydraulic equipment installed and a small amount of work during a period of 5 months, which consisted principally of ditch and road construction.

PARTIAL VIEW OF MEADOW CREEK CAMP AND AIRPORT, YELLOW PINE CO.

UNITED MERCURY MINES CO.

Office: 605 Eastman Bldg., Boise. **Officers:** J. J. Oberbillig, Pres.-Mgr.; J. F. Koelsch, Sec., both of Boise. **Inc.:** Jan. 20, 1921. **Capital:** 5,000,000 shares; par value 10c; 4,340,491 shares issued. **Property:** 11 patented, 193 unpatented claims, consisting of 3 groups: Hermes, principal ore, cinnabar; Meadow Creek, principal ore, gold; Babbitt Metal, principal ore, antimony; Yellow Pine dist.; Yellow Pine. **Development:** Total development, approximately 10,000 ft. on all groups, consisting principally of No. 1 tunnel, 900 ft. long; No. 2 tunnel, 2700 ft. long, on Cinnabar group, and 1 tunnel 1700 ft. long on Meadow Creek group. **Plant:** A 6-cylindrical tube retort. **Ore:** Mercury, gold, silver, lead, and antimony. **Remarks:** Cinnabar and Meadow Creek groups under option to Yellow Pine Co., which see. Annual labor only on Babbitt Metal group.

VENABLE GROUP

Owner: J. M. Venable, Boise. **Property:** Venable group; 3 unpatented claims adjoining the Sunnyside mine, Thunder Mountain dist.; Cascade. **Development:** Principally by a crosscut tunnel 840 ft. long, in which is a 150-ft. drift on the vein. **Ore:** Gold. **Remarks:** Annual labor only. The owner reports a good showing of low-grade gold ore.

WEST MOUNTAIN MINING CO.

Office: 314 Yates Bldg., Boise. **Officers:** John Alden, Pres.; H. A. Alden, Sec., both of Boise. **Inc.:** Maf. 8, 1922. **Capital:** 1,000,000 shares; par value 1c; 764,619 shares issued. **Property:** Silver Bell group; 13 unpatented claims, West Mountain dist.; Cascade. **Development:** By 2 tunnels: No. 1, 40 ft. long; No. 2, 700 ft. long. **Ore:** Lead-silver-gold-zinc. **Remarks:** Annual labor only.

YELLOW PINE CO.

Office: 1022 Crocker Bldg., San Francisco, Calif. **Officers:** Fred W. Bradley, Pres.; E. A. Griffin, Sec., both of San Francisco; Geo. Hampton, Supt., Yellow Pine. **Inc.:** Filed in Idaho May 25, 1928. **Capital:** 200,000 shares; par value $1; 62,605 shares issued. **Property:** Lease and option on Cinnabar group; 116 claims, and Meadow Creek group, 84 claims, owned by United Mercury Mines Co. **Ore:** Mercury, gold-silver. **Men employed:** Average, 80. **Remarks:** During the year construction on a 12-mile highway from Yellow Pine to Meadow Creek was started; a steam-driven sawmill, compressor, and complete mining equipment were installed on the Meadow Creek group at a large expenditure, as the equipment had to be drawn over the old Thunder Mountain road; and a large modern boarding and bunk house and 4 cottages were constructed. At the Cinnabar group mine development work was maintained throughout the year without interruption.

The road work, new plant installation, new construction and mine developments conducted by this company make it one of the largest and most important enterprises in south-central Idaho and one which is instrumental in attracting a large amount of attention to this part of the State.

WASHINGTON COUNTY

Washington is one of the southwestern counties, adjoining and lying north of Payette and Gem counties, east of Gem, and east and south of Adams County. The Snake River, which flows north, forms the entire western boundary. The county contains an area of 1479 square miles, and was accredited with a population of 9424 in the 1920 census. It is primarily an agricultural and stockraising community; that part which occupies the Snake River Valley is intensively cultivated, and is the location of the larger part of the population. Weiser is the county seat.

The North and South highway extends from the southern to the northern boundary and is situated about in the geographical center. Branch roads leading to all the settlements are maintained by the county; these are kept in good repair and open to travel the larger part of the year. The county is served by three railroads, the Pacific and Idaho Northern, which extends from Weiser to New Meadows; the main line of the O. S. L. Railroad, and the Huntington-Homestead, Oregon, branch of the same road.

The principal mineral resources are silver, copper, gold, lead, zinc, manganese, diatomaceous earth, pyrites, gypsum, clay, and garnet, practically all of which occur in the three mining districts—Washington, Cuddy Mountain, and Heath—the principal of which is the Washington, or Mineral, district. At one time the Mineral district was a large producer of silver; two blast furnaces were in operation, and the camp of Mineral was a good-sized town; but it has been deserted for many years, the smelters have been dismantled, and the district has almost reverted to its primitive condition. Nearly all the deposits are high-grade silver-copper ores, rather complex, and in some mines partly oxidized, but amenable to modern flotation methods. Many of the deposits in this district are extensive, a large tonnage of ore is available, and there appears to be no reason why the district should not be receiving more attention than it has during the past few years, as there are many properties that are worthy of investigation and development. Large deposits of pyrites and disseminated copper ore also occur in this district.

During 1928 Washington County witnessed but little improvement in mining activities over the previous year. The Cuddy Mountain Gold Mining Co., which is operating in the Cuddy Mountain district, performed a small amount of work; an organization operating at Mineral worked a few men during part of the year; and the Heath district witnessed an increase in investigations. One operator on Cuddy Mountain marketed a small shipment of lead-silver ore.

CUDDY MOUNTAIN GOLD MINING CO.

Office: 103 Park Ave., New York City. **Officers:** J. N. Bishop, Pres.; W. S. Gordon, Sec., both of New York City; W. E. Freehafer, Mgr., Council. **Inc.:** Mar. 27, 1926. **Capital:** 300,000 shares; par value $1; shares issued, unknown. **Property:** Cuddy Mountain group; 20 unpatented claims, Cuddy Mountain dist.; Council. **Development:** By 2 tunnels: No. 1, 300 ft. long; No. 2, 250 ft. long. **Plant:** Sawmill; small steam-driven amalgamation mill; complete mining equipment and camp. **Ore:** Gold. **Men employed:** Average, 10. **Remarks:** Active development work throughout the summer months.

EDNA MAY MINES CO., INC.

Office: Council. **Officers:** Geo. Larsen, Pres., Mullan; Roy O. Howland, Vice-Pres., Heath; J. A. Boone, Sec., Cambridge. **Inc.:** Aug. 13, 1926. Charter forfeited Nov. 30, 1928. **Capital:** 1,200,000 shares; par value 25c; 606,383 shares issued. **Property:** 21 unpatented claims, Heath dist.; Council. **Development:** Principally by 1 tunnel 400 ft. long. **Ore:** Lead-copper. **Men employed:** Average, 3. **Remarks:** Small amount of work during the summer months.

IDAHO-OREGON COAL MINING CO.

Office: 1014 N. 8th St., Boise. **Officers:** A. E. Price, Pres.-Mgr.; A. Affleck, Sec., both of Boise. **Inc.:** Nov. 5, 1920. **Capital:** 100,000 shares; par value $1; 69,000 shares issued. **Property:** Government prospecting permit on 1282 acres near Cobb Siding; Weiser. **Development:** By 1 tunnel 500 ft. long. **Mineral sought:** Coal.

SILVER STILL MINING CO.

Office: Weiser. **Officers:** John G. Still, Pres., Huntington, Ore.; E. R. Coulter, Sec., Weiser. **Inc.:** Aug. 21, 1924. Charter forfeited Nov. 30, 1928. **Capital:** 10,000 shares; par value $1; all shares issued. **Property:** 10 unpatented claims, Mineral dist.; Home, Ore. **Development:** 6 short tunnels, 1 shaft. **Ore:** Silver-copper. **Remarks:** A small amount of work during the year.

DELINQUENT MINING COMPANIES

The Idaho mining law, section 5474, Idaho Compiled Statutes, was enacted with the intent to assist the inspector of mines in properly discharging his official duties. The Blue Sky law, as applicable to mining companies, section 5320, Idaho Compiled Statutes, was enacted on the assumption that if a mining company publicly files the facts relative to its mine and organization, this information should be sufficient to indicate the character and extent of the company and its undertaking.

The forms on which the reports are to be made to the inspector are mailed out in May of each year. These forms are so arranged that the required facts can be given with little effort, and as ignorance of the law is no excuse, there must be other reasons why many reports are not filed and why many that are filed are not complete. Possibly there might be some excuse for an inactive company neglecting to comply with the law, but none can be offered for a company that is operating, and most particularly when the stock is being actively marketed or when stock assessments are being levied.

Every effort possible has been put forth during the year to get a report from all mining companies operating in Idaho whose charters are in good standing. This effort has not been entirely successful, and, believing that the list of "Delinquent Mining Companies" as published in previous annual reports has been informative, a similar list for 1928 is included.

Corporations that have forfeited their charters, and that have failed to file their reports as required by law, have been considered as legally dead; therefore no mention is made of them.

Companies whose corporate charters are in good standing, but who have failed to file annual reports with inspector of mines, as provided in sections 5320 and 5474 of Idaho Compiled Statutes:

COMPANY NAME	OFFICER	P. O. ADDRESS
Atlas X Co.	W. Earl Greenough	Mullan
Bear Top Lead Mines	Marguerite Schick	Wallace
Big Ben Gold Mining Co.	C. H. Seagrave	Gooding
Binarch Creek Mining Co.	Arthur L. Hooper	501 City Hall, Spokane, Wash.
Blue Grouse Mining Co., Ltd.	D. A. Callahan	Wallace
Boise Mng., Mill. & Smelt. Co.	M. J. Minton	Boise
Bonner Mining Co.	J. A. Henderson	Oakesdale, Wash.
Boundary Cons. Mng. Co.	E. C. Outlaw	748 Peyton Bldg., Spokane, Wash.
Caledonia Silver-Lead Mng. Co.	A. C. Beal	Kellogg
Chloride Eureka Co.	Harriet E. Bowler	Salmon
Cincinnati Mining Co.	W. H. Herrick	Wallace
Coeur d'Alene Champion Mng. Co.	James Keeth	E. 1827 Sprague Ave., Spokane, Wash.
Coeur d'Alene Mines Corp.	Geo. Turner	Columbia Bldg., Spokane, Wash.
Come-Back Mining Co.	C. C. Fairchild	Idaho City
Consolidated Metals Inc.	Geo. T. Walker	Wallace
Discovery Gulch Mng. Co.	E. H. Miley	530 N. Harrison St., Pocatello
Eagle Creek Gold Mng. Co.	W. H. Hanson	Wallace
East Standard Mining Co.	J. E. Gyde	Wallace
Echo Mining Co., Ltd.	W. H. Hanson	Wallace
E & M Mining Co.	Kenneth G. Felt	Ketchum
Enchanted Hill Mining Co.	A. C. Beal	Kellogg
Eureka M. & M. Co., Ltd.	W. M. Crowell	Wenatchee, Wash.
Falls Creek Mining Co.	Wm. Hollenbaek	Sandpoint

COMPANY NAME	OFFICER	P. O. ADDRESS
Gaiety Mt. Gold Mines Co.	Geo. H. Cochran	279 Forest Ave., Englewood, N. J.
Giant Ledge Syndicate, Inc.	G. F. Walker	Kendrick
Gilmore-Mountain Boy Mng. Co.	Enoch Stewart	Gilmore
Gold Ore Mines of Idaho, Inc.	Fremont Wood	Boise
Grand Teton Oil Co.	Geo. W. Edgington	Idaho Falls
Gray Wolf Mining Co.	J. E. Crawford	Coeur d'Alene
Grey Eagle M. & M. Co.	W. H. Hanson	Wallace
Harmony Mines Co.	E. F. Neiman	Salmon
Hennessy-Burns Mining Co.	J. F. Whelan	Wallace
Hercules Exploration Co.	W. B. Heitfeld	Wallace
High Grade Mining Co.	L. L. Ruthruff	Kellogg
Hollinger Gold Mines Co., Ltd.	Geo. P. Myers	Bonners Ferry
Homestake Gold Mining Co.	A. W. Boyd	Elk City
Hunter Creek Mines Corp.	Fred W. Julian	Spokane, Wash.
Idaho Lakeview Mines Co.	D. M. Drumheller	Spokane, Wash.
Idaho Manganese Mining Co.	Geo. L. Smith	Cleveland
Idaho Mines Corporation	W.H. Hanson	Wallace
Idaho & Nevada Mining Co.	N. W. Nute	Portland, Ore.
Idaho Silver Magnet Mines Co.	Thos. Fahey	Spokane, Wash.
Irbis Placer Association	G. S. DeWolf	Grangeville
Jupiter Mining Co.	Theodore Wellman	Wallace
Knickerbocker Mines Co.	C. J. Shoemaker	Sandpoint
Lead Bell Mining Co.	Drusilla Godfrey	Lava Hot Springs
Lemhi-Union Co.	W. H. Gilliam	Rexburg
Liberal King Mining Co.	J. B. Cox	Kellogg
Lime Peak Copper Co.	L. B. Reeder	214 Couch Bldg., Portland, Ore.
Little Mint Mining Co.	J. F. Whelan	Wallace
Loney Leasing Co.	R. E. Weniger	Wallace
M & B Exploration Co.	Harry Barton	Boise
Meadow Creek Oil Co.	Frank D. Turner	Rexburg
Merry Widow Mining Co.	A. L. Strope	Wallace
Metals Mining Co.	G. A. Cunningham	E. 327 Boone Ave., Spokane, Wash.
Metals Mining Co.	S. A. Anderson	Bonners Ferry
Minerva M. & M. Co., Ltd.	Henry A. Jones	730 Bakewell Bldg., Pittsburgh, Pa.
Missoula Copper Mining Co.	J. R. Bean	Wallace
Mountain Queen Mng. Co., Ltd.	Walter Keister	Murray
Mt. Sullivan Mining Co.	Joseph Munn	Pocatello
Mule Shoe Mining Co.	R. W. Johnson	580 Hamilton Court, Salt Lake City, Utah
National Copper Mines Co.	R. Fennell	606 Lewis Bldg., Portland, Ore.
Neva Copper Co.	Roberta Ripple	400 Hutton Bldg., Spokane, Wash.
Nevada Mines	Arthur L. Hooper	501 City Hall, Spokane, Wash.
Pacific Silver-Lead Co.	Geo. T. Walker	Wallace
Papurel & Graham Mt. Mng. Co.	J. F. Whelan	Wallace
Patrick Placer Mines	P. Chappell Browne	Fairmont Hotel, Spokane, Wash.
Patuxent Mining Co.	D. A. Callahan	Wallace
Pittsbgh. & Ida. M. & M. Co., Ltd.	Daniel Laverty	Pardee
Priest Lake Mining Co.	Joe Saccomanno	Priest River
Rapid Creek Mining Co., Ltd.	F. M. Kerby	Cascade
Rapid River M. & M. Co., Ltd.	J. G. Meyer	Genesee
Revett Mining Co.	J. F. Arnold	E. 604 Eighth Ave., Spokane, Wash.

COMPANY NAME	OFFICER	P. O. ADDRESS
Rockland Valley Oil Co.	Ed. M. Norris	Rockland
Rocky Bar Mining Co.	M. G. Martindale	1001 Paulsen Bldg., Spokane, Wash.
Roundtop Mining Co.	W. F. Sargent	St. Maries
Ruby Mining Co.	John Ball	83 Cowley Road, Chicago, Ill.
Sabina Mines Co.	James A. Wayne	Wallace
St. Joe Lead & Silver Mines Co.	Patrick Brady	Burke
S. E. Mining Co.	Geo. T. Ellison	Glenns Ferry
Silver Cable Syndicate	G. W. Ringel	Wallace
Syndicate Mining Co., Ltd.	Geo. L. Dougherty	Wallace
Tammany Oil Co.	V. F. Lorang	Lewiston
Torino Mining Co.	J. F. Whelan	Wallace
Troy Mica Co.	A. N. Conger	Lewiston
Tuscumbia Mining Co., Ltd.	Morton Webster	Wallace
U. S. Silver-Lead Mines Co.	Jos. McCarthy	Paulsen Bldg., Spokane, Wash.
Verde-May Mining Co., Ltd.	W. H. Hanson	Wallace
Wallace Silver-Lead Mines Co.	W. H. Hanson	Wallace
War Eagle M. & M. Co.	Lafayette Boone	Boise
Weiser Gas & Petroleum Co.	Ed. R. Coulter	Weiser
Wilcox Leasing Co.	R. B. Lundy	Wallace
Wione Mining Co.	V. H. Stone	Lander, Wyo.
Yakima-Shoshone Mining Co.	E. S. Crane	1004 E. Mission Ave., Spokane, Wash.
Yankee-Polaris L. & D. Co.	E. C. Allen	Wallace
Ymir-Coeur d'Alene Mining Co.	W. C. Weber	Spirit Lake

Companies whose corporate charters are in good standing, but who have failed to file annual reports with the inspector of mines, as provided in sections 5320 and 5474 of Idaho Compiled Statutes, and who levied one or more stock assessments during 1928:

COMPANY NAME	OFFICER	P. O. ADDRESS
Blue Star M. & M. Co., Ltd.	A. C. Morbeck	Kingston
Mayflower Mining Co.	W. W. Smith	Wallace
Silver Dale & Big Hill Mng. Co.	D. W. Knudson	Kellogg
Silver Lode M. & M. Co.	D. Williams	Kellogg
Washington Mining Co.	R. W. Campbell	Burke

Companies whose forms of organization are unknown, who have never complied with sections 5320 and 5474 of Idaho Compiled Statutes, and who have been levying stock assessments during 1928:

COMPANY NAME	OFFICER	P. O. ADDRESS
Idaho Group Units	Geo. H. McKinnis	Kellogg

Companies whose names were gleaned from the press, whose forms of organization are unknown, and who have failed to file annual reports with the inspector of mines, as provided in sections 5320 and 5474 of Idaho Compiled Statutes:

COMPANY NAME	OFFICER	P. O. ADDRESS
Black Tail Mtn. Mng. Co.	Ernest E. Ward	Sandpoint
Boyer Bros. Mining Co.	Bruce Turnbull	Sandpoint
Buckhorn Mining Co.	J. F. Inglis	Salmon
Clipper Bullion Mining Co.	H. W. Ingalls	Mullan
Helena Mining Units	Milo B. Runyan	Rathdrum
Idaho Gold Associates	J. B. Mason	Mutual Life Bldg., Seattle, Wash.
Niagara Mining Co.	Herman J. Rossi	Wallace
Rush Gold & Silver Mining Co.	O. P. Barber	Pocatello

GENERAL BIBLIOGRAPHY

1928 METAL PRODUCTION

The total value of the gold, silver, lead, zinc, and copper produced in Idaho in 1928 was $29,601,025.44, a decrease of $1,193,888.20 in value under the production of 1927, which was $30,794,913.64. The decrease in value in 1928 as compared with 1927 was caused by a decrease in the output and price of lead. Gold, zinc, and copper registered a substantial increase, and there was a slight increase in silver. In past years the output of silver varied in accordance with that of lead, but in 1928 the large increase in production from mines in which silver is the principal metal upset this precedent and the production exceeded that of the former year both in amount and in value. Blaine, Owyhee, and Idaho counties recorded an increase of about three times that of the previous year, the Boise County production was nearly doubled, Custer and Elmore counties were approximately the same, while Shoshone, Lemhi, Bonner, and Gem witnessed a decrease. The combined total production of all counties, excepting Shoshone, shows a marked increase over that of the previous year, thus indicating an expansion in the mining industry. This is further shown by an increase of 23 in the number of producers in 1928 over that of 1927.

Shoshone County continued to maintain its position as the principal mining county in the State and, with the exception of lead, recorded an increase in the production of the five chief metals, particularly zinc. Its rank in percentage as compared with the rest of the State was practically the same, being 92.82 per cent in 1928 and 92.79 per cent in 1927. Its total production in 1928 was $27,474,740.39 as against $28,574,891.88 in 1927, thus accounting for a large part of the total State decrease between the two years. This county was first in the production of lead, silver, zinc, and copper; Boise County was first in the production of gold; and Custer County was first in the production of copper from copper-producing mines, the Shoshone County copper being derived as a by-product from lead-silver ores.

The respective rank of the principal mining counties in point of total production was: Shoshone, Blaine, Custer, Lemhi, Boise, Butte, Bonner, Elmore, Boundary, Idaho, and Owyhee.

Gold

The 1928 output of gold was 20,739.95 ounces, valued at $428,694.77, an increase of 5,147.94 ounces and $106,407.91 as compared with that of 1927, which was 15,592.01 ounces valued at $322,286.86. This increase is significant in indicating that interest is again being taken in gold mining, and that this resource still offers many possibilities.

The respective rank of the leading mining counties in point of total gold produced was: Boise, Elmore, Owyhee, Custer, Lemhi, Shoshone, and Blaine. The principal gold-producing companies and their respective ranks were: Idawa Gold Mining Co., Boise County; South Park Dredging Co., Elmore County; Idaho Gold Dredging Co., Boise County; American Gold Dredging Corporation, Owyhee County; Unity Gold Mines Co., Idaho County; Boise Placer Co., Boise County; S. O. Miiller, Idaho County; and Mackay Metals, Custer County.

Silver

The output of silver increased from 8,896,293.80 ounces with a value of $5,014,840.42 in 1927 to 8,987,484.00 ounces with a value of $5,228,558.70 in 1928, an increase of 91,191.00 in ounces and of $213,718.28 in value. The small increase in ounces produced is quite significant, as it indicates a substantial increase over the production in 1927 because the total output of silver in 1928 did not decrease in proportion to that of lead. The substantial increase in value was due to an increase in price from $0.5637 per ounce in 1927 to $0.58176 per ounce in 1928. Shoshone and Blaine counties each showed a marked increase in production, but the decrease in other counties reduced the State total.

The 1928 silver production in Shoshone County was 8,472,560.00 ounces valued at $4,928,996.51, as compared with 8,236,341.70 ounces valued at $4,642,825.82 for 1927, and that of Blaine County for the respective years was 181,507.00 ounces valued at $105,593.51, and 96,168.00 ounces valued at $54,-

209.90. This record production for Shoshone County, 94.27 per cent of the total for the State, indicates the importance of mining in the Coeur d'Alene district, particularly as Idaho produces one-third of all the silver of the United States. The order of prominence of the principal silver-producing counties was: Shoshone, Blaine, Custer, Lemhi, Boundary, Bonner, Butte, and Boise. The largest producers in Shoshone County were: Federal M. & S. Co., Bunker Hill & Sullivan M. & C. Co., Hecla Mining Co., Sunshine Mining Co., Tamarack & Custer Consolidated Mining Co., Gold Hunter Mines, Inc., Callahan Zinc-Lead Co., Sherman Lead Co., Dayrock Mines Co., Golconda Lead Mines, Sidney Leasing Co., and Hayes Co. In other counties the most important producers were: United Idaho Mining Co. and the Allie mine, in Lemhi County; Livingston Mines Corporation, Ramshorn mine, and Mackay Metals, in Custer County; Whitedelf Mining & Development Co. and Hope Mining Co., in Bonner County; Triumph Development Co. and Independence mine of the Federal M. & S. Co., in Blaine County; Wilbert Mining Co., Ltd., in Butte County; and the Continental mine, in Boundary County.

Lead

The production of lead decreased from 312,770,885 pounds valued at $21,127,673.28 in 1927 to 302,590,871 pounds valued at $19,078,354.41 in 1928, a decrease of 10,180,014 pounds and a loss of $2,049,318.87 in value, in part due to a decrease in price. The average price of lead in 1928 was 6.305 cents per pound, while in 1927 it was 6.755 cents per pound.

Shoshone County furnished 95.69 per cent of the State total with a production of 289,539,236 pounds, a decrease of 4,189,154 pounds under that of the previous year. The decrease in lead production by the mines in Lemhi, Custer, and Bonner counties was responsible for the balance of the total State decrease, which was slightly offset by the increase in Blaine County.

The importance of Idaho as a lead-producing State, and particularly of Shoshone County, is apparent from the fact that the State ranks second in the United States and produces approximately one-fourth of the entire output of the nation.

The order of prominence of the principal lead-producing counties was: Shoshone, Blaine, Lemhi, Butte, Custer, Bonner, and Boundary.

The Bunker Hill & Sullivan M. & C. Co. maintained its record as the largest lead-producing company in the State, if not in the United States; the Federal M. & S. Co. was second; and the Hecla Mining Co. was third. The other large lead-producing companies in Shoshone County, in their order of prominence, were: Tamarack & Custer Consolidated Mining Co., Gold Hunter Mines, Inc., Dayrock Mines Co., Sherman Lead Co., Sidney Leasing Co., Callahan Zinc-Lead Co., Golconda Lead Mines, Jack Waite Consolidated Mining Co., Sunshine Mining Co., Hayes Co., and Humming Bird Mining Co. Important lead producers in other counties were: United Idaho Mining Co. and Allie mine, in Lemhi County; Livingston Mines Corporation and Ramshorn mine, in Custer County; Whitedelf Mining & Development Co. and Hope Mining Co., in Bonner County; Wilbert Mining Co., Ltd., in Butte County; Triumph Development Co. and the Independence mine of the Federal M. & S. Co., in Blaine County; and the Continental mine, in Boundary County.

Zinc

The 1928 production of recoverable zinc was greater than that of any year since 1917, exceeding the 1927 production by 9,854,710 pounds and $455,311.72 in value. The total production was 74,334,543 pounds valued at $4,480,142.90, as compared with 64,479,833 pounds valued at $4,024,831.18 in 1927.

The satisfactory price level which zinc maintained throughout the year was a dominant factor in stimulating production, and improvements in milling practice, particularly in flotation, were responsible for an increase in recoveries and grade of concentrate produced. In 1928 the price of zinc averaged 6.027 cents a pound, as compared with a price of 6.242 cents a pound in 1927.

The Anaconda Copper Mining Co. of Anaconda, Montana, and the Sullivan Mining Co. were the principal buyers of zinc concentrates; however, the Bunker Hill & Sullivan M. & C. Co. purchased and stock-piled a large tonnage.

The most important event of the year relating to the mining and marketing of zinc ores was the completion of construction and the commencement of operations of the electrolytic zinc plant by the Sullivan Mining Co. The metal produced by this company is the highest grade zinc ever obtained; new methods had to be devised for its analysis, and it is selling at a premium in price over any other zinc metal. The construction of this plant will tend to perpetuate the mining industry in Shoshone County and greatly stimulate the production of zinc ores.

Shoshone, Blaine, Custer, and Bonner were the only counties that produced a marketable zinc product. The output of the latter was unimportant, but the production of Blaine and Custer counties, obtained principally from the Triumph mine of the Triumph Development Co. and the Livingston mine of the Livingston Mines Corporation, was quite significant. The principal zinc-producing companies in Shoshone County were: Federal M. & S. Co., Sidney Leasing Co., Tamarack & Custer Consolidated Mining Co., Golconda Lead Mines, Sherman Lead Co., Bunker Hill & Sullivan M. & C. Co., and Sullivan Mining Co.

Copper

The output of copper in 1928 was 2,644,301 pounds valued at $385,274.66, an increase of 281,438 pounds and $79,992.76 in value over that of 1927, which was 2,362,863 pounds valued at $305,281.90. The price of copper averaged 14.57 cents a pound in 1928, and 12.92 cents a pound in 1927. The increase in production was due to the reopening of the Empire copper mine in Custer County by the Mackay Metals, which was active throughout a large part of the year, and to productive operations throughout the year by the Winder-Stillman Copper Co. in Lemhi County.

The order of prominence of the principal copper-producing counties was: Shoshone, Custer, and Lemhi. The principal copper-producing companies or mines were: The Mackay Metals, in Custer County; and the Winder-Stillman Copper Co., in Lemhi County. Excepting the copper produced by these companies and a few isolated small shipments, the remainder of the copper produced in the State was associated with lead-silver ores and was recovered by the smelters as a by-product.

STATISTICS

The production statistics are based upon the gross metal content of all ores or bullion produced and sold from Idaho mines during 1928. The tabulation constitutes the production as reported to the inspector's office; reports have been verified in every possible manner; and no estimates have been used in the compilation. If any error exists in the totals, it is due to unreported production, and as production statements were furnished by all the large producers, the margin of error is very small. Any unreported production would cause these figures to be larger than the amounts set forth, so this compilation represents, as nearly as possible, the correct minimum production.

The values have been figured from the average price of metals for the year, based on New York and St. Louis quotations, as published in the Engineering & Mining Journal.

1928 METAL PRODUCTION BY COUNTIES

Number of Producers	BLAINE COUNTY			Value
16	Gold	222.69	oz.	$ 4,603.00
	Silver	181,507.00	oz.	105,593.51

STEWART CAMPBELL
INSPECTOR OF MINES

ALICE DARRAH
SECRETARY

LETTER OF TRANSMITTAL

To His Excellency,
THE HONORABLE H. C. BALDRIDGE,
Governor of Idaho.

SIR:

In compliance with the provisions of section 5480, Idaho Compiled Statutes, I have the honor to transmit herewith the annual report of the inspector of mines for the year ended December 31, 1929.

Respectfully submitted,
STEWART CAMPBELL,
Inspector of Mines.

FOREWORD

PUBLIC LANDS

The subject most widely discussed and commanding the most attention from the mining industry of Idaho during the year was President Hoover's suggestion, delivered through Dr. Ray Lyman Wilbur, Secretary of the Interior, at Boise, Idaho, on July 9, 1929, of ceding the surface rights of the public lands **"not included in national parks or monuments or in the national forests"** to the various states in which they are located, and reserving the mineral or subsoil rights to the Federal Government **"subject to some form of proper Federal prospecting law with development on a royalty basis of discoveries."**

This suggestion was also presented to a conference of the governors of the public land states at Salt Lake City, Utah, on August 26 and 27, by Joseph M. Dixon, Assistant Secretary of the Interior, who read a letter which was dictated by President Hoover on August 21, 1929. The President's letter indicated that his thoughts were on the minerals which are now reserved to the Federal Government, particularly oil, as he made no reference to the metalliferous minerals; by so doing he entirely overlooked the phase of this subject which is of vital importance to everybody who is interested in the development of the latent metalliferous mineral resources of Idaho. Secretary Wilbur's remarks also indicated that he was in accord with the President in thinking only of oil, because it is a well-known fact that, if the discovery and exploitation of a metalliferous mineral deposit is dependent on a royalty basis of discovery, such a basis for obtaining title to a deposit of this kind would kill all initiative for prospecting and development. As the President's suggestion was construed to include metalliferous deposits, the idea was looked upon with considerable apprehension. This was first evidenced at the Western Governors' Conference through their resolution offering to assist the President in his selection of a commission to investigate and analyze his proposals, and pledging their cooperation in the work of such commission only. A similar attitude was taken at the annual meeting of the Western Division of the American Mining Congress at Spokane, Washington, on October 1, when the following resolution was adopted:

> **"Resolved,** that we welcome this interest of the President in the problem of our public lands and the conservation of our natural resources and we applaud his expressed desire to assist in checking bureaucracy and aiding in more efficient local government. We endorse the proposal of the appointment of a commission to study these problems and we urge that the personnel of such a commission include one or more persons interested in and acquainted with the problems confronting the mining industry of the West. We await the decision of those vitally interested in agriculture and animal husbandry as to the advisability of turning over to the states the grazing lands referred to by the President, but we express apprehension of any policy which shall separate the surface from the subsurface rights of our public lands."

Shortly after the two meetings referred to above, the President appointed a commission, known as the Commission on Conservation and Administration of the Public Domain, to investigate this subject and report its findings. The commission met in Washington, D. C., on November 23-25, 1929, organized, and commenced its investigations, part of which took the form of submitting a questionnaire which sought the reaction of the mining industry to the President's suggestion, so far as it pertained to the subsoil rights. This questionnaire was sent out to all parts of the State to the people most prominently interested in mining and the development of Idaho's mineral resources.

The questionnaire appeared to be based on the assumption that the surface rights ARE to be ceded, and sought only to ascertain if the subsoil rights should be granted to the states or reserved to the United States, and if so, under what conditions or changes in the present laws and regulations. It did not contain the question: "Shall the public lands be ceded to the various states?" but those replying answered it. Practically all were opposed to ceding these lands, and all unanimously took the position that, if they were to be ceded, the mineral rights should be granted along with the surface rights; otherwise, the states would be receiving something of no particular value, and mining development would be severely hampered because the mineral claimant would be prevented from obtaining free and unencumbered title to the mineral and surface rights. Noteworthy stress was laid on the fact that surface and subsoil rights of metalliferous mineral deposits are inseparable, and that a mineral claimant should not be compelled to seek title from two different sources.

The opposition of those interested in the mining industry of Idaho to ceding the public lands to the states and to separating the surface and subsurface rights was forcibly expressed by many in replying to the questionnaire. Some of the reasons and arguments were as follows:

> "Much of the public land in the mountain states is practically worthless. Aside from the minerals, the other principal value of the land is for the timber. The preservation of the timber from fire and other destructive agencies involves great expense, and it is very doubtful whether the sales of mature timber would produce sufficient revenue to cover that expense. Furthermore, the preservation of the timber as protection of watersheds, as a means of restricting damage by flood waters, is of much greater importance to the states subject to floods than to the states in which the water originates. Such flood control is properly a task for the Federal Government; and it can exercise that control only so long as it owns the land. It is not incumbent on any state to expend large sums of money for the benefit of other states."
>
> "The chief use of the public domain is for watershed purposes in which are interested most of all the people of reclamation projects and the people in rainfall belts, also residents in states that are subject to floods from waters that have their origin in public land states. * * Timbered areas and the control of grazing of all lands suitable for grazing purposes should be under the control of the Federal Government."

"If the mineral rights were reserved to the United States it would be keeping the kernel and giving the State the shell. It seems to me that if the states accept conveyancé to them of the public lands without the mineral rights they will be accepting something that will cost more than it is worth. If the mineral rights are included, no doubt the states can derive considerable revenue from mines, but the mining industry probably will be worse off than at present."

"My principal objection to even considering any change is the fact that the western states in general, and Idaho in particular, are in no position to administer these public lands properly, and it would take many years, if ever, to build up a state organization competent to do so."

"I am opposed to the transfer of these lands to the states, either with or without reservation of subsurface rights. The mining industry will be best served by the retention of the public domain by the Federal Government. It could not be accomplished without changing the mining laws now so well understood, practically every phase of which has been construed by the courts."

"The Federal Government has ever dealt wisely and fairly with the mining man. It gave him freedom of the public range, with right unquestioned to dig wherever he pleased, stake off his claims in any way he chose and develop the ground according to his own manner. Under these rights the prospector made good. Unhampered, he found Butte, Bisbee, Leadville, Tintic, northern Idaho, and hundreds of other camps. And by the Federal regulations, or lack of regulations, the prospector has made good. The direct consequence of this nationally liberal attitude toward mining has been peculiarly beneficent. With simple, fair and equitable laws, the prospector has flourished and his efforts have redounded to the peopling of the intermountain west. There is still much undiscovered mineral wealth in these states, affording ample exercise for talents peculiar to the prospector. Given a chance to solve these problems in his own way, he will do it. But hampered and hindered in his work, he will quit, and there will be none to take his place. Your hired man can not fill it; nor can anybody else. The business of discovering new mines will fail, and the West will languish. Uncle Sam can not now afford to turn his back on the prospector; nor set up any obstacles to his work. And surely the complexity of state and forest control of surface rights would tend to discourage initial endeavor."

"It is my opinion, and seems to be the opinion of most of those to whom I have talked, that surface rights to the public lands remaining in Idaho are of practically no value. The value of such lands probably lies chiefly in their mineral deposits. I see no reason why Idaho, which has plenty of expensive problems to handle now, should assume the ownership and administration of a great area of non-productive, valueless land, while the United States retains the ownership of anything that might be profitable. If we do the work certainly we should receive the benefit."

"The mining laws as they stand have become so firmly fixed and defined in our legal jurisdiction until we now know where we are with respect to legal rights and it would be dangerous to make changes."

"The present laws which give absolute title both to surface and mineral rights are eminently satisfactory, and offer a stronger incentive for the development of contained minerals than any system of leasing can possibly do. The discovery and development of minerals is becoming increasingly difficult and expensive. Anything that tends to cut down the profit or to complicate the process of obtaining title tends to retard development and is undesirable."

"The severance of the surface and subsurface rights is, in the highest degree, inexpedient. * * * We would have as many types of mining regulations as there are public land states."

"There has been practically no demand on the part of the states to have public domain within their boundaries turned over to them."

"The states can not afford to administer such vast areas that are suitable only for grazing and for watersheds."

"I feel that under Federal supervision conservation measures having to do with nation-wide problems can best be administered."

"We are entirely satisfied with the present Government Administration and matters covered by present leasing laws."

"We believe in adhering faithfully to the principles embodied in the original National Forest Reservation Act, in the administration of all public lands whether in National Forests or outside thereof."

"It is obvious that the phrase 'lands belonging to the United States * * * are free and open to exploration and purchase' becomes meaningless if these lands no longer belong to the United States but to the several states in which they lie."

"The interests of the mining industry will be best served by making no change."

"We favor retention by the Government of the United States of surface and mineral rights on the public domain without change."

"Under the Federal Government, the problem of waste from overproduction can be better handled than if the remaining resources are turned over to the states."

"The surface rights and the subsurface rights should remain together, regardless of whether the lands are under state or national supervision. A mineral right is of questionable value unless it carries with it control of the surface which must be used to extract the mineral from the ground."

"From the information at hand I can not see any benefit to the mining industry through transfer of title in the public lands from the United States to the various individual states. On the other hand, there are serious objections to transfer of the surface rights to the states and retention of title to subsurface rights by the United States. If there is to be any transfer of title to the states, then the subsoil rights should go with the surface rights."

"It is recognized, however, that eleven states acting independently might adopt so many varieties of public land legislation that the result would be confusing."

"There is further difficulty inherent in any proposal of complete severance; namely, that one desiring to take up mineral land must derive his title from two sources, first from the Federal Government for the mineral and, second, from the state for the surface, which as anyone familiar with titles will immediately recognize is likely to result in a title clouded, insecure and indefinite."

"With regard to mineral lands, we are very much opposed to any change of policy whatever and we should very much regret the separation of surface and subsurface rights. Suppose the surface rights in these lands are turned over to the states, reserving mineral rights to the Federal Government. Then suppose oil or metals are discovered and the land is entered under Government regulations for the purpose of mining or drilling for oil. Our situation now is bad enough in the national forests because of the conflict in policy between the interior and agricultural departments of the Federal Government. But bad as that situation is or may become, it is infinitely to be preferred to a conflict between Federal and State authority."

"If the states accept title to these lands with the mineral rights reserved to the United States, how would mining claims then be located: If under the existing mining laws the industry apparently would not be affected. Though it is conceivable that State laws that might be enacted for the administration of the lands could hamper mining operations."

"If the surface rights are ceded, whether the mineral rights are reserved to the Government or granted to the states, the mineral industry will be confronted with two sets of mining laws: One applying to the lands in forest reserves; the other applying to lands which are now the public domain. This confusion of law will hamper and retard prospecting and mineral development."

"That the separation of the surface and mineral rights hampers, retards and practically prevents prospecting for and development of metalliferous minerals has been proved in Idaho by the 640-acre homestead law. This law reserves the mineral rights to the Federal Government, declares that the lands may be entered upon at all times for the purpose of prospecting for the minerals therein, and provides regulations for occupancy in the event of mining operations. The fencing of these homesteads and the attitude of the surface-rights owner have operated in debarring the prospector from the greater part of the lands patented under this law, thus nullifying Congressional intent and obstructing mineral development."

"A segregation of surface and underground rights creates a problem of conflicting ownership which the western American has not been used to, and which is quite likely, if the title comes from separate sources, to create misunderstanding and dissension. If an owner sells his subsurface right to another, under conditions that he himself prescribes, that is one thing. If the ownership is divided before title passes, and if it is held under rules laid down by unrelated extraneous agencies, that is quite another thing."

"I can not conceive of any satisfactory title which would be conveyed to mineral without at the same time conveying title to the surface. As I have pointed out elsewhere, under this assumption if one desires to locate a mining claim he will have two kinds of title to deal with, one to the surface and the other to the underground, and the net result inevitably would be to discourage prospecting and development."

"If the public lands are ceded, provide that possession and title may be acquired by citizens of the United States under the same or similar conditions to those provided by the present Federal statutes."

"Should the lands be ceded to the several states, then I believe the best procedure would be for the states to provide for the location of mining claims under practically the same conditions as are at present operative. It might be desirable to modify the provision requiring discovery prior to location, so as to permit bona fide efforts, such as geophysical prospecting, diamond drilling, and the like, where the mineral deposits do not crop out at the surface. I think it might also be well to increase the requirement for annual expenditure, possibly as much as $500, and to increase proportionately the expenditure which must be made prior to patent."

This questionnaire also sought the attitude of the mining industry as to whether phosphates and kindred materials, which are now withdrawn from entry and covered by the leasing laws, should continue to be reserved to the Government. As all of these deposits are withdrawn from entry and now reserved to the United States, the majority opinion favored no change, unless the public domain was ceded to the states; then the mineral rights, including phosphate as well as coal, sodium, potassium, oil, oil shale, and gas, should be transferred also. Approximately 85 per cent of the world's known phosphate rock is in Idaho. Some criticisms to the effect that the Federal Government is delinquent in not aiding in the development and utilization of this tremendous latent mineral resource were well taken. The following represents a good cross-section of the views on this subject:

"With regard to phosphates, most certainly the underground rights to these lands should be transferred to the states if the surface rights are transferred. I can think of nothing less valuable than the surface of most of the phosphate lands in Idaho, or anything that will become an empty husk more promptly than that same land after the phosphate has been taken out."

"I am not in sympathy with the present policy of reserving phosphates, coal lands, and the like. The phosphate situation is an excellent illustration: There is not the slightest danger of over-production of phosphates in Idaho or elsewhere. In fact, phosphate rock at the present time is suffering, not from over-production, but from lack of market."

The problem to lessen waste resulting from overproduction of oil and under which agency, Federal or State, it could be more readily solved, was given the most stress in the questionnaire. It received practically no discussion, because the reasons for maintaining Federal control over oil, oil shale, and potash do not apply to metalliferous deposits; those expressing an opinion were almost unanimous in favoring Federal control as now in effect. Many used this subject as a further opportunity to express opposition toward ceding the surface rights of the public lands to the states, and others did not lend much hope to its solution, as:

"The oil situation is an exceedingly difficult one, and up to the present neither the Federal Government nor the State Government has been particularly successful in any endeavors to control over-production. Only a relatively small amount of the over-production, however, is coming from Government-owned lands and what may be done by the Government to control over-production from lands held by it will make very little difference to the general situation. However, since we are already committed to a leasehold system on the part of the Federal Govrnment, so far as oil lands and certain other non-metallics are concerned, we had probably better continue to leave this matter in the hands of the Federal Government. However, there will again be complications should the surface be ceded to the states, in that an oil operator would be compelled to negotiate with the states for his surface, and to derive his leasehold from Federal agencies."

"The oil shale deposits are, of course, an ultimate, rather than an immediate, resource. The probabilities are that for the sake of uniformity, however, it would be well to consider them as oil lands and to handle them on a similar basis."

While the questionnaire was primarily designed to apply to lands of the public domain proposed to be ceded and not to lands that are now within Forest Reserves, some of those replying took advantage of the opportunity to express their displeasure at the attitude of the Forest Service toward delaying mineral patents within Forest Reserves. The fact that the attitude of the Forest Service throughout the northern part of Idaho has caused considerable delay and unwarranted expense in obtaining mineral patents can not be disputed, and as the Forest Service attitude is becoming more apparent through the controversy which now exists between the Department of the Interior and the Forest Service over the interpretation of present laws and regulations, it was hoped by many that the commission would make a recommendation for the correction of this condition:

"The only suggestion I offer in connection with any changes that might be made in the present laws is in regard to the present regulations which permit the Forestry Department to interfere and delay the patenting of mineral claims. I think these regulations should be so altered that mineral claims can be promptly patented where there is no evidence of fraud, and especially where the locations do not govern valuable water rights, valuable timber rights or valuable agricultural rights."

"Mining locations in these areas (Forest Reserves), although not forbidden by law, were frowned upon and discouraged by forest officials and much bitter feeling was engendered against the Forest Service, which has not entirely disappeared, in spite of a decided change of attitude on the part of many forest officials toward the miner and the prospector."

Another subject not covered by the questionnaire, although it is one worthy of attention, was the suggestion that Congress be requested to amend the Idaho Enabling Act so as to permit the State of Idaho to grant mineral leases on the present State-owned lands for periods of more than five years.

PLATINUM

Predatory platinum assayers, with and without assistance, are continuing to prey upon the unsuspecting public. During the year their purported assays and the resulting transactions in the barter and sale of "mining" properties were the basis for a great amount of newspaper publicity. Many of these stories appeared on the front page under blazing headlines; and the fabulous values reported in rare metals, such as platinum, palladium, and other related metals, together with the immense prices at which the properties were being optioned, caused such a large amount of excitement and interest that an official investigation was deemed necessary.

The "mineral" deposit was visited by the inspector, who was assisted in sampling the "ore" by one of the promoters. These samples were assayed by the U. S. Bureau of Mines, who were unsuccessful in detecting even the presence of any rare metals. The results were then given to the press, together with a warning to the public.

No credence whatsoever should be placed in rare metal assays or the reported high values in these metals which any promoter or questionable assayer may proclaim, until a properly obtained sample of the "ore", which is absolutely free from any probability of being salted, is assayed by competent and reliable assayers.

BUNKER HILL SOLARIUM

Ultra-violet rays of natural sunlight are essential and necessary to human health and happiness. These essential rays can be produced artificially, and the evidence of their many benefits is growing rapidly. In the past the practice of furnishing these rays by artificial light has been confined mostly to hospitals, thoroughbred-horse-racing stables, and athletic organizations; until recently but little effort has been made to apply them in the industries, particularly those where conditions are such that the employees are deprived of natural sunlight. This condition is especially true in the mining industry, and the Bunker Hill & Sullivan Mining & Concentrating Company has again established itself as one of the foremost and progressive companies in the United States for the attention it is giving to the health and welfare of its employees. This was manifested during the year by the installation of an automatic solarium, or sun room, whereby the benefits of the ultra-violet ray can be obtained by all company employees and their families without cost and at a minimum of effort. The management of the company is to be complimented, and this praiseworthy innovation justifies a permanent record in the annals of the mining industry.

ARTIFICIAL SUNSHINE FOR MINE WORKERS *

By Stanly A. Easton, Vice-president and Manager, Bunker Hill & Sullivan Mining & Concentrating Co.

Seven years ago there was installed in the hospital of the Bunker Hill & Sullivan Mining & Concentrating Co. at Kellogg, Idaho, an ultra-violet ray quartz lamp, the standard equipment which is found everywhere in the offices of physicians and among usual hospital equipment. The use of this lamp was confined largely to treatment of pathological cases, still treatment of undernourished children, run-down anemic people, both men and women, and, as a general tonic, was part of the routine hospital procedure. At the latitude of the Coeur d'Alene district and especially because of the position of the towns in deep canyons, with much overcast and cloudy weather, sunshine is not plentiful at any time of the year; for many of the winter months there is scarcely any. Underground workers, particularly during the winter, have little sunshine; it is not unusual to have none at all for weeks at a time.

Fig. 1. INTERIOR VIEW OF CABINET SHOWING ESCALATOR, LAMPS, AND VENTILATION FANS

Treatment by the ultra-violet ray lamp in the hospital has resulted in many extraordinary benefits, but the use of the lamp is expensive and limited. Early in the year attention was directed to the automatic solarium equipment of the Burdick Corporation. The doctors strongly recommended the increased use of the ultra-violet lamp for its curative powers and tonic effects, urging that it be made accessible to all employees. Real interest was also displayed by employees with the possibility of securing ultra-violet ray treatment for themselves and families under better conditions than it was possible to have by the limited use of the lamp at the hospital. This resulted in the installation of the so-called sun room or automatic solarium as an adjunct to the mine

*Published also as: All Year Sunshine for Mine Workers, by Stanly A. Easton: Mining and Metallurgy, vol. 10, Dec., 1929.

change-house. An annex was built to the change-house, with dressing rooms for women, children, and men from other departments, and the outfit put into use on September 5, 1929. The installation consists of an escalator, or narrow moving platform, passing through a cabinet equipped with six ultra-violet ray lamps. (Fig. 1.)

The wide rail near the bottom of the curtain is a safety switch which automatically stops the escalator, should a person ride it beyond the exit. After taking their shower and before dressing the men step on the moving platform and ride through the cabinet. One minute is required and three treatments per week are recommended; the outfit can readily treat four hundred individuals per hour. (Fig. 2.)

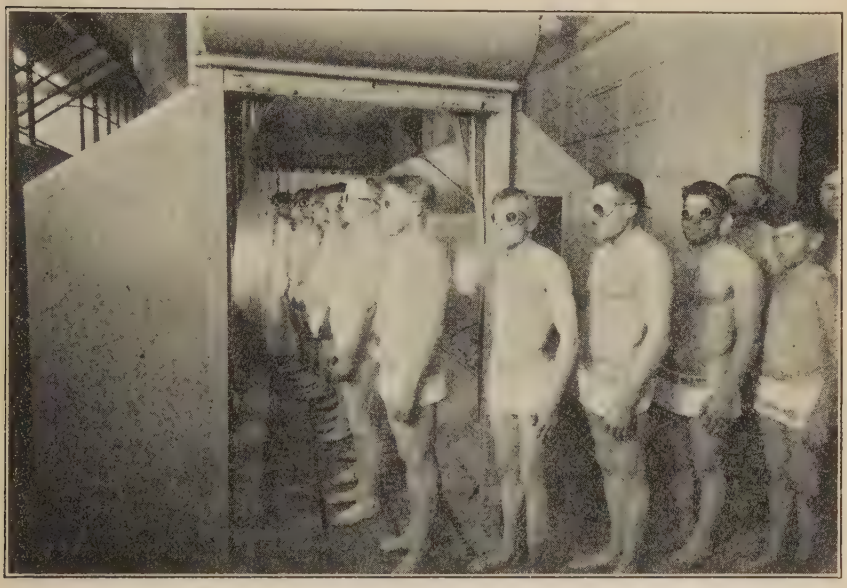

Fig. 2. MEN RIDING THROUGH CABINET

Use of the so-called sun room is wholly voluntary. The number of people applying for treatment is growing and with winter weather will probably increase even more rapidly. At the present time over two hundred men per day are treated and between fifty and sixty women and children. It is too early to describe individual cases where real benefits have been secured; because of the experience with the small quartz lamp at the hospital during the last seven years there can be no doubt as to the excellent results which can be confidently expected. For the purpose of ascertaining the results a careful record of everyone using the treatment is being maintained. It is predicted and believed that with the general use of the apparatus lost time because of colds and other respiratory ailments will be reduced at least one-half.

The regulations and suggestions which are issued in pamphlet form to employees and the public are as follows:

TREATMENT SUGGESTIONS

The ultra-violet ray or artificial sunshine treatments provided by this installation are primarily to supply the deficiency of natural sunshine which is seasonal at this latitude and which can not be regularly experienced by underground and other workers in the local industries because of climatic and winter conditions.

Wide experience extending over many years indicates the beneficial results of such treatments not only to the general health, but even in pathological cases; still the treatments cannot take the place of proper medical or surgical attention; in sickness or constitutional disorders see your physician. The treatments are primarily a constitutional tonic to fortify the system against infection and disease. In order to avoid any possible ill effects and to secure the best results from treatments they must be taken with regularity and according to the practice which experience has found to be most beneficial. Especially at the outset exposure to the ultra-violet rays should be taken frequently for periods of short duration. A treatment every other day, Sundays excepted, of one minute duration each should suffice for men and women patients, and forty-five seconds for children. With the consent of the medical director frequency of treatment and its duration can be changed. The foregoing schedule applies equally to all periods of the year, with special emphasis on the fall and winter seasons.

The cooperation of employees and others who avail themselves of the treatments provided by the solarium is asked in order that all may receive proper and sufficient attention. At no time must individuals enter the solarium or attempt to use it without the authorized attendant being present. This rule will be strictly enforced. Individuals presenting themselves for treatment must do so at the time assigned them, and at no other; this is most important and no deviation therefrom will be tolerated.

PATENT SURVEYS

Applicable as Annual Labor on Unpatented Mining Claims

Chapter 194, 1929 Session Laws of Idaho, page 362, is of vital interest to all owners of mining claims, as it deals with the important subject of assessment work on mining claims which are in process of being patented. The delay caused by Federal Government "red tape", from the time application for a patent survey is made until patent is issued, invariably extends over one year, so heretofore it has been necessary for the applicant to perform his annual labor requirements even after a full compliance with all laws and regulations for obtaining patent has been made, while waiting on governmental dilatoriness. The 1929 Legislature took cognizance of the fact that such an expenditure is generally a waste of time and money, and passed a law which is designed to assist the claim owner during one year of the delay. This law declares that an official patent survey of a mining claim constitutes annual labor, and allows crediting the cost of the survey on annual assessment work for one year. It is as follows:

"Sec. 5536-A. It is hereby declared that an official patent survey of a lode or placer mining claim or claims by a United States mineral surveyor constitutes and is labor performed upon an improvement made upon or for the benefit of an unpatented lode or placer mining claim or claims.

"Sec. 5536-B. That an official patent survey of a lode or placer mining claim or claims by a United States mineral surveyor may be credited to annual assessment work or labor, but in no case shall the credit for such survey and its attendant expense exceed the required assessment for one year on the claim or claims surveyed. When credit is sought for such work or improvement, the claimant must file in the recorder's office in the county in which such claim is situated the affidavit of such United States mineral surveyor, showing the cost of such survey, and when so filed the actual cost of such survey shall be deemed and considered as labor and improvements done and performed upon said claim or claims."

The Legislature was not without precedent in passing this law, as such a one has been in effect in Alaska since 1915 (Laws Alaska 1915, c. 10), and the validity of this law was affirmed by a decision rendered in the U. S. Circuit Court of Appeals, Ninth Circuit, under date of February 13, 1928, in the case of Wigand v. Bryne's Unknown Heirs et al., 24 Fed. 2d, 179. The points involved and the reasoning of the court are considered of sufficient importance to quote the opinion wherein it affected this subject:

"Suit in equity by Albert Wigand against the unknown heirs of Mike Byrne, deceased, and Robert Kelly, as his administrator. Decree dismissing bill, and complainant appeals. Affirmed.

"From a decree dismissing the complaint in a suit to quiet title to a placer mining claim the plaintiff appeals. **The stipulated facts are as follows:**

"Mike Byrne located the claim in question in 1905. He died December 5, 1920. For the annual labor of 1921 the administrator of his estate did work on the claim to the value of $40, and had a survey of the claim made by a deputy United States mineral surveyor at a cost of $60, which was the usual and ordinary charge for such work. For the annual labor between July 1, 1922, and July 1, 1923, the administrator caused $100 worth of work to be done on the claim, and between July 1, 1923, and April 1, 1924, he did another $100 worth of work upon the claim. On April 11, 1924, the claim not being in the actual possession of any one, the appellant relocated it, and at the commencement of the suit he was in actual possession thereof. It was his contention that the survey made for the year 1921 did not constitute annual labor within the meaning of the law.

"The Legislature of Alaska (Session Laws 1915, c. 10) enacted that the cost of such a survey might be credited as annual labor, but provided that the claimant must file in the recorder's office in the district the field notes of the survey and a voucher showing the cost thereof, properly attested by the surveyor, to be incorporated into the proof of annual labor. The court below held the section unconstitutional, but was of the opinion that, inasmuch as it was apparently the law during the period in which the administrator followed it in good faith, he was entitled to have his work and the cost of the survey considered as legal assessment work for the period ending July 1, 1922. The court also found that the work on the claim by the administrator for the two succeeding years was done to the actual knowledge of the appellant, or, if not to his actual knowledge, that he could by reasonable effort have informed himself of the fact, and held that a miner should not be deprived of his property solely because he took the law of the Legislature at its face value, and that a court of equity should not aid one to relocate the claim with knowledge of the existing law, and knowledge of what the owner had done, and after standing by silent and inactive until the owner had done annual assessments for two succeeding years thereafter.

"GILBERT, Circuit Judge (after stating the facts as above). In the adjudicated cases there is dearth of precise definition of the nature of the work on a placer mining claim that will be accepted as meeting the requirement that 'not less than one hundred dollars worth of labor shall be performed or improvements made during each year.' It is held that the statute should be given a liberal construction, McCulloch v. Murphy (C. C.) 125 F. 147, and we find no case that holds that $100 worth of work done on a placer mining claim in good faith, in the belief that it will result in the development or improvement of the claim, is to be held insufficient for the reason that it is ill-advised, or does not in fact result in perceptible improvement or development. On the contrary, it is held that the character of the work performed becomes material only when it is performed for the benefit of the claim but on land without its boundaries. In that event the labor must tend to the development or improvement of the mining claim for which it is designed. Wailes v. Davies (C. C.) 158 F. 667, 670, affirmed Wailes v. Davies (C. C. A.) 164 F. 397.

"In Mt. Diablo M. & M. Co. v. Callison, 5 Sawy. 439, 456, Fed. Cas. No. 9886, it was said: 'We therefore conclude that when a miner does the necessary labor, anywhere within his boundaries upon the surface or below it, the condition of the mining claim as to labor has been complied with. We cannot hold that he shall make no mistakes; that he is bound to ascertain at the risk of forfeiture, whether he is working on a lode having its apex outside his surface lines.' In the Session Laws of Alaska above referred to it is provided that a survey of the claim by a United States mineral surveyor may be credited to annual assessment work, provided that the credit shall not exceed the required assessment for one year on the claim. We may concede that the Legislature of the territory had no authority to add to or take from the requirements of the statute of the United States in regard to the annual assessment work. But its enactment may be referred to as evidence of the opinion of miners in that territory that a survey of a mining claim might be regarded as assessment work, in compliance with the law of the United States.

"We are not convinced that that view is erroneous. A survey of a mining claim is an improvement which obviously may tend to aid in the development of the claim. In Richen v. Davis, 76 Or. 311, 148 P. 1130, it was held that work done in clearing the brush from a mining claim to facilitate the work thereon, might be deemed assessment work. In Hough v. Hunt, 138 Cal. 142, 70 P. 1059, 94 Am. St. Rep. 17, the court recognized the right to charge the wages of a watchman to annual assessment work, if the work were but temporarily suspended, and was intended to be resumed in a reasonable time, and if structures which would be required when the work was resumed were likely to be lost, if not cared for. That decision involves a construction of the law more liberal than that which is claimed by the appellee in the case at bar, for a survey of a mining claim is clearly in the nature of a permanent improvement, which tends to facilitate its development and to enhance its value.

"* * * * All that was determined was that the appellant had no valid location and that his suit to quiet title should be dismissed.

"The decree is affirmed."

When the court said, "A survey of a mining claim is clearly in the nature of a permanent improvement, which tends to facilitate its development and to enhance its value", it established a precedent in law that is of vital importance, because the fact is recognized that a survey greatly enhances the value of a mining claim.

NEW HOISTS OF HECLA MINING CO.

By A. C. Stevenson, Chief Electrical Engineer

In 1907 the Hecla Mining Co. installed one of the first Ilgner-type hoists with Ward-Leonard control built in the United States. It consisted of two reels, equipped with flat-sewn rope and mounted on a common shaft with a direct-current motor, and a flywheel motor-generator set. The ultimate depth from which hoisting could be done with this equipment was 2,000 feet, and its maximum load of rock or ore was 2.8 tons. This hoist, along with the entire Hecla surface plant and the town of Burke, was destroyed by fire on July 13, 1923.

The development and operation of the Sullivan Mining Co.'s Star mine, which is connected with the Hecla shaft at the 2,000-foot level by the Star crosscut, more than doubled the Hecla demand made upon the hoist. This, together with the future needs of the Hecla mine when opened below the 2,000-foot level, required hoisting equipment adequate for tonnage and depth greater than those of which the old hoist was capable. So the future hoisting requirements had been given considerable thought and study prior to the fire.

Before starting to rebuild the surface plant, the company made an unsuccessful endeavor to procure hoisting equipment which would provide for future needs, but no suitable second-hand equipment was available and the time-deliveries given by makers of new equipment were so remote as to preclude all thought of delaying reconstruction until a new hoist could be manufactured. Therefore it was necessary to rebuild the old hoist, but in so doing all anticipated requirements for a new hoist, such as adequate head-frame, building site, and ore bins, were given consideration, and reconstruction was in accordance with them. The company made a thorough, exhaustive study, including many experiments, to ascertain future hoisting requirements and to provide every possible safety feature, after which the new hoists were ordered and construction of the necessary buildings was started in 1928. Construction and installation were completed and the hoists put into operation on November 1, 1929.

NEW HOIST BUILDING, HECLA MINING CO.

Specifications

The specifications as to speeds, duty, and dimensions are briefly as follows:

MAIN HOIST

Drums:

Cylindrical double drum. Both drums clutched. 10 ft. diameter, 6 ft. face. Steel shell grooved for winding 3585 ft. of 1¾ in. round rope.

Drive:

First motion direct-connected to motor.
One bearing between motor and drums.

Brakes:

Gravity operated, released by oil pressure.

Duty:

Net weight of muck, per trip	14,000 lbs.
Weight of skip and skip-cage	14,000 lbs.
Weight of caged load in counterbalance	12,000 lbs.
Weight of three-deck cage	8,000 lbs.
Tonnage to be hoisted each 24 hrs	2,000 tons

Speeds:

Maximum rope speed	2,400 ft. per min.
Man speed	1,350 ft. per min.
Acceleration time	18 sec.
Retardation time	14 sec.

Weight:

Total weight	346,000 lbs.
Weight of motor	151,000 lbs.

MATERIAL HOIST

Drum:

Cylindrical single drum, keyed to shaft. 8 ft. diameter, 6 ft. face. Steel shell grooved to wind 3585 ft. of 1⅜ in. round rope.

Drive:

First motion direct-connected to motor.

Brakes:

Gravity operated, released by oil pressure.

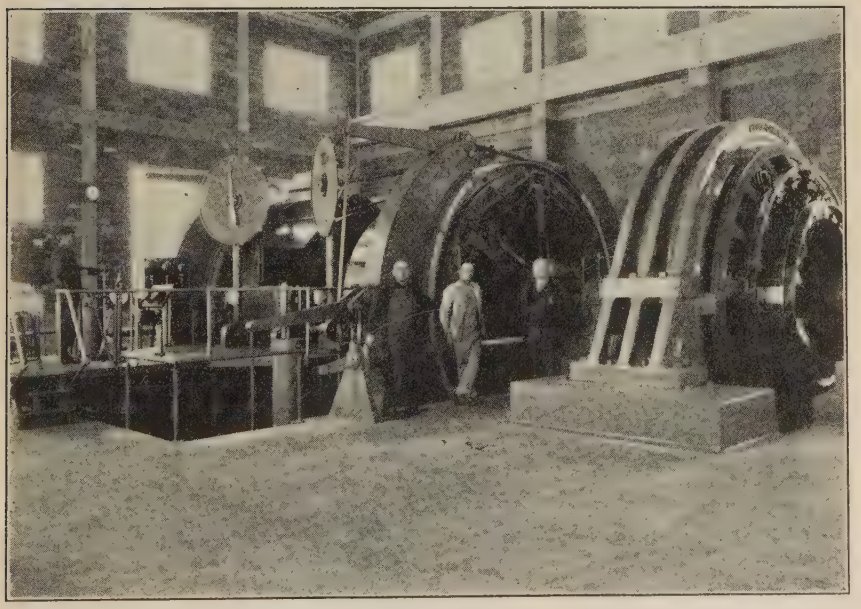
Duty:

Net weight of material, per trip	8,000 lbs.
Weight of three-deck cage	8,000 lbs.

Speeds:

Full speed	1,350 ft. per min.
Acceleration time	10 sec.
Retardation time	10 sec.

Weight:

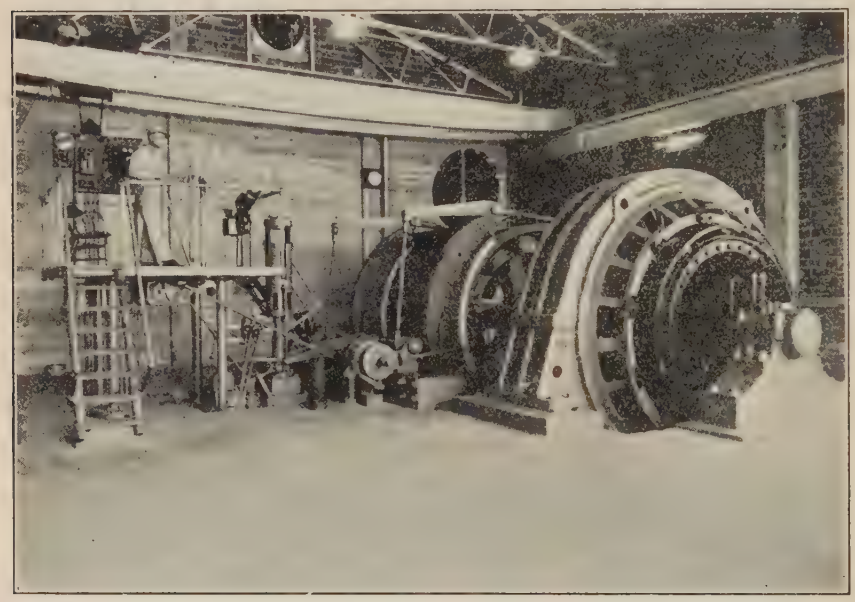


Total weight	102,000 lbs.
Weight of motor	99,000 lbs.

Motors

The main hoist is driven by a 2100-horsepower continuous, 3750-horsepower peak, direct-connected motor. The material hoist's motor rating is 850-horsepower continuous, 1600-horsepower peak. The material hoist always operates out of balance, while the main hoist is supposed always to operate in balance, although the motor has sufficient capacity to operate unbalanced under full load, should it become necessary to do so.

Safety Features



In the selection of safety devices every endeavor was made to provide safe operation. A Lilly safety-controller prevents overwind and overspeed. A man-speed setting is provided which changes the main hoist from 2400 feet per minute to 1350 feet per minute, with all safety devices operating the same as at the higher speed. All actions of the Lilly controller are preceded by the ringing of an alarm bell to warn the operator that something is wrong. In addition to the Lilly controllers, but entirely independent of them, is a device known as the cam safety. This is a mechanical device and parallels the electrical operation of the Lilly controller. It is geared to the drum and operates the master controller at both ends of the wind, automatically slowing down and stopping the hoist if the operator fails to do so. An emergency stop-switch is placed on the operator's platform and also at the collar of the shaft. Pulling either of these switches shuts off the hoist control and sets the brakes. Hatchway-limit switches are placed in the shaft to stop the hoists if the cage or skip goes past the point of attachment of these switches. A suicide circuit is incorporated which prevents any operation when the control is off. In case of the operation of any safety stop device the master controller must be brought to the off position and the brakes set before the control is resumed. In case of running into the over or underwind devices the hoist will travel only in a direction opposite to that in which it was going at the time of the engagement of the safety, preventing a confused operator from putting the cage farther into the sheave or sump. Interlocks are placed so the brake may not be released with the clutches out or vice versa.

MAIN HOIST, HECLA MINING CO.

Brakes

The brakes are set by gravity from heavy weights and released automatically, oil under pressure being used. The oil piping is completed through valves which are controlled by solenoids. Any failure of the control circuit de-energizes these solenoids and the brakes will set. Provision is made so that the rate of setting will be proportional to the speed at which the hoist is traveling when the action takes place. It is evident that rapid setting of the brakes at full speed would cause tremendous strain throughout the whole equipment and the danger of failure of the hoisting rope.

MATERIAL HOIST, HECLA MINING CO.

Acceleration and Retardation

Acceleration and retardation are automatically controlled. Irrespective of the speed at which the control handle is moved, the motor will not speed up any faster than this pre-determined rate. The control handle may be jerked from the full-speed hoisting position to the full-speed lowering. The motor will gradually slow down, reverse direction, and then come up to speed in the opposite direction.

Hoist Building

The hoist building is of reinforced concrete beam-and-column construction, with tile panels, and is entirely fire-proof. The steel was fabricated with electric welding. All available information, coupled with exhaustive tests, proved that a welded truss was approximately 9 per cent lighter, for the same strength, than a riveted truss, and its fabrication cost appreciably less. All floors are designed to carry the weight of the heaviest single piece of the equipment which might be placed upon them.

Each hoist is placed in a room separate from the other and from the motor generators, in order that noise may not bother the operator nor signals be confused.

HERCULES CUSTOM MILL

By Henry Lawrence Day, Assistant Manager, Hercules Mining Co.

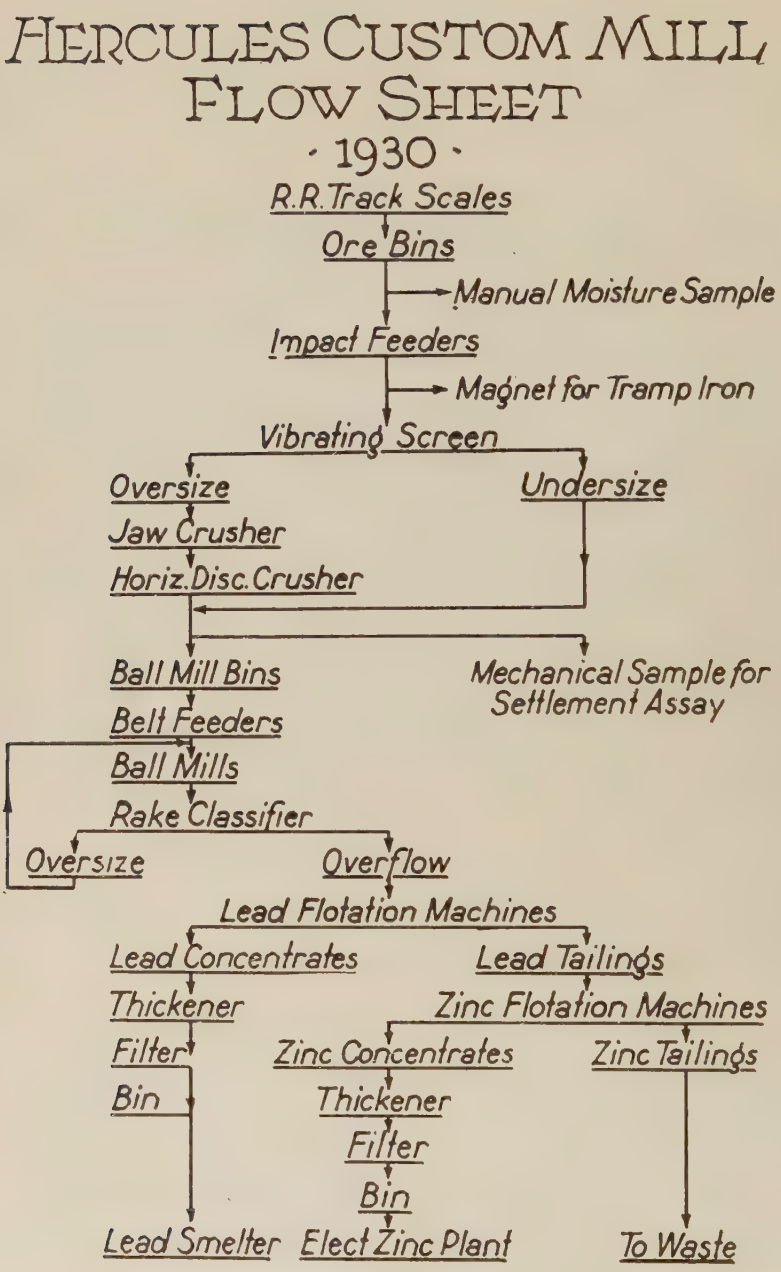
The Hercules Custom Mill is located at the western limits of the City of Wallace, Shoshone County, Idaho. The concentrator, originally of 300 tons capacity, was built in 1910-11 to handle the output of the Hercules mine, seven miles to the northeast, near Burke, Idaho. The plant was enlarged from time to time until in 1917-18 more than 1000 tons were milled daily. The first flow-sheet, embracing straight gravity concentration, was altered as new developments in wet metallurgy took place. When the Hercules ore body was exhausted in the spring of 1925, the flow-sheet consisted of crushing, jigging, grinding and tabling; regrinding, floating, and tabling; re-regrinding and floating. Only one product was recovered, a silver-lead concentrate.

After the Hercules mine was shut down in April, 1925, the availability of a small tonnage from the Ambergris mine revealed the fact that a substantial demand existed for a custom concentrator. Accordingly, the Hercules Mining Co. began the rehabilitation of the Wallace mill into a custom plant. Commencing in the fall of 1926, provision was made for the differential separation of lead and zinc by the construction of a new flotation unit. A second section was added in the spring of 1928, and a third during the summer of 1929.

These and other comprehensive alterations, proceeding for more than three years, have changed the mill from a gravity concentrator to an all-flotation plant. The new flow-sheet is much simpler than the old. It may be divided into four parts: Crushing, grinding, floating, and drying.

Crushing:

Ore from the mines is brought to the head of the mill on a high-line spur of the Northern Pacific Railway. (Fig. 1.) It is dumped into any of five bins available, holding 10, 7, 5, 5, and 6 railroad cars, respectively. Individual ores are kept separate in the crushing department, so that the proper samples may be procured. Ore is fed from the bins by impact feeders onto conveyor-belts, which lead past a magnet for removing tramp iron, to an electrically vibrated screen with 1-inch clear openings. The oversize drops thru a 9x15-inch Blake type jaw-crusher, set to minus 3 inches, and then passes thru a 24-inch horizontal-disc crusher, set to discharge minus 1-inch material. The crushed oversize then joins the undersize from the screen, and after sampling, both are dropped onto the ball-mill bin shuttle-conveyor.



The original mill-feed, crushed to 1 inch, is sampled automatically by a bucket-and-chain sampler. Cuts are made every 25 seconds, amounting to one-ninetieth of the original feed. This one-ninetieth is fed to small rolls, reducing it to ½ inch. Next, a Vezin sampler rejects three-fourths, and the remaining one-fourth is reduced by a second set of rolls to ¼ inch. About four-fifths is then rejected by a second Vezin sampler; and the remainder, amounting to approximately $\frac{1}{2000}$ of the original feed, is split by hand until a suitable weight is reached for the assay office.

Grinding:

Ore from the crushing department is distributed by means of a shuttle-conveyor into the ball-mill bins. These are six in number and each holds about 12 hours' supply for one ball mill. Short belt-feeders supply the six mills at a constant rate. All the mills are cylindrical in shape. Five are 7 feet by 7 feet, driven by 125-horsepower, slip-ring motors, speed 440 r.p.m.; the sixth mill is 6 feet by 7 feet, with a 75-horsepower motor. (Fig. 2.) Herringbone gears and pinions are employed to give a reduction of 20 to 1.

Each of the mills is in closed circuit with a classifier to provide a uniformly fine grind. Four of the classifiers are of the reciprocating rake type, 6 feet by 20 feet. One of the same type is 8 feet by 20 feet, and the last is a 20-inch plain drag. The usual density of the mill discharge is about 70 per cent solids. The classifier overflow approximates 30 per cent solids, with 75 to 80 per cent minus 200 mesh. These are average figures, which will vary considerably for the different ores treated.

Floating:

The flotation department is divided into three sections, similarly arranged, so that a differential lead-zinc separation can be made on each. Mechanically agitated cells are used for the roughers, and pneumatically agitated for the cleaners. Section One consists of 12 Fahrenwald type cells with 18-inch impellers, and 10 Minerals Separation type cells with 18-inch impellers. The second section consists of 24 Minerals Separation type cells with 18-inch impellers. Section Three has 28 Fahrenwald type cells with 24-inch impellers. (Fig. 3.) The general practice is to double-clean the rougher concentrates with pneumatic machines of a type developed at the Hercules mill. Section Three is equipped with a regrinding unit, consisting of a thickener and a small ball mill, operating in closed circuit with a bowl classifier. This unit is used for the regrinding of middlings of ores that require exceptionally fine comminution.

Sampling of the various flotation products is done chiefly by mechanical pulp-cutters, although hand methods are also in use. The bulk of the reagents are fed by mechanical means, automatic feeders gradually being installed to supplant the drip buckets. The reagents are fed dry insofar as possible, although wet feeding is found to be the more satisfactory in some instances.

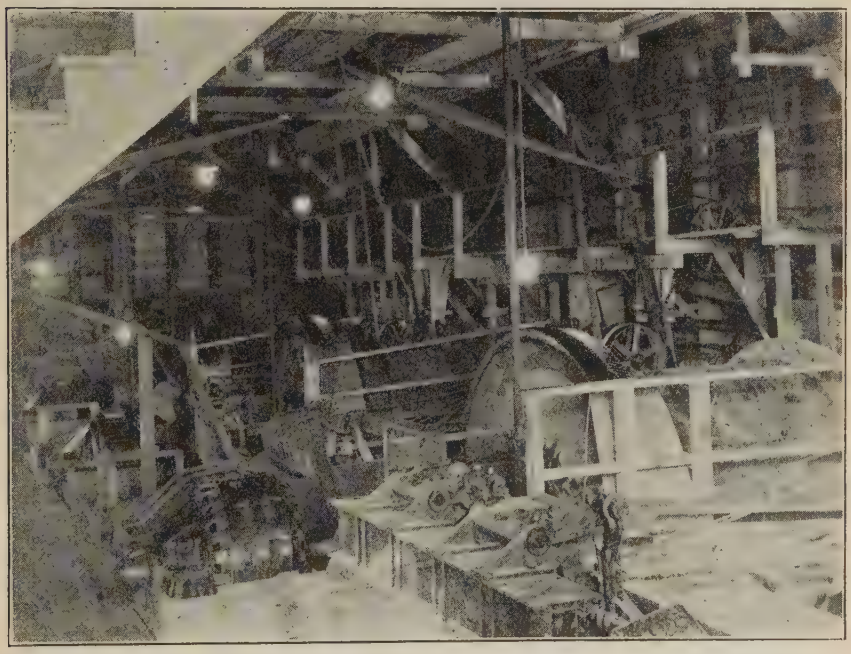

Fig. 2. EAST END OF BALL MILL FLOOR

Drying:

The lead concentrates are pumped to a thickener, 54 feet in diameter, and dewatered on two drum-type filters, 8 feet by 6 feet. The zinc concentrates are dewatered by two thickeners, each 30 feet in diameter, and one drum-type filter, 8 feet by 6 feet. The filtered concentrates are carried by inclined conveyors to separate bins, and loaded in box-cars or gondolas on railroad track scales.

The mill is heated by a 60-horsepower boiler, fed with slack coal by a mechanical stoker. It is necessary to maintain in conjunction with the milling operations a complete assay office, as well as a testing laboratory. In addition a well-equipped machine shop, a carpenter shop, and a pipe shop are provided. A new change-room with showers completes the facilities.

Custom milling requires special care in weighing, moisturing, and sampling. Ore destined for the Hercules mill is weighed on Northern Pacific track scales, which are regularly inspected and tested. The moisture determination is made at the mill, following standard practice. The sampling is all performed mechanically, using modern accepted equipment.

The development of the custom business has resulted in the shipping of a great variety of ores to the mill for concentration. The ores treated have included these types: Silver-lead; silver-lead-zinc; zinc; slimes; and reclaimed tailings, a large part of which are oxidized. Experience has shown that it is not feasible to bed or mix these widely differing ores to provide a uniform mill-feed. Hence each lot is treated separately. Naturally this means considerable difficulty in handling small lots and requires far more than the usual skill in operation and detail in supervision. This fact may be readily seen when it is noted that the usual practice is to grind and float three different ores simultaneously, each calling for its own pulp densities and reagents. It was found necessary to make many changes to render the flowsheet flexible enough to overcome in some measure the difficulties due to the variety of ores. The demand for custom milling facilities is shown by the following table:

Year	Number of Shippers	Dry Tons Milled
1926	5	11,800
1927	16	37,700
1928	24	158,000
1929	26	195,300

AS USED AT PHOSPHATE MINE OF ANACONDA COPPER MINING CO., CONDA, IDAHO*

By E. M. Norris, Superintendent

The phosphate mines and milling plant of the Anaconda Copper Mining Co. are situated nine miles north of Soda Springs, Idaho, at the town of Conda, which was built by the company to house its employees. A branch railroad connects with the main line of the Union Pacific Railroad at Soda Springs.

The phosphate deposits are of sedimentary origin, and were originally laid down horizontally. During the formation of the mountains the beds were raised and folded into an anticlinal structure, and tilted at angles varying from 45 to 90 degrees from the horizontal. Erosion of the anticline has produced an outcrop of the phosphate bed which can be traced by shallow depressions for many miles. The minable phosphate bed has a fairly uniform width of 7 feet, and is confined within soft phosphatic shales lying on top of limestone. The ore body and hanging wall are soft and will not stand without support for more than a few hours after opening. This, together with the fact that special care in mining is necessary to prevent contamination of the ore by wall rock, makes a difficult mining condition which has been solved by the use of an inclined top-slicing method of stoping.

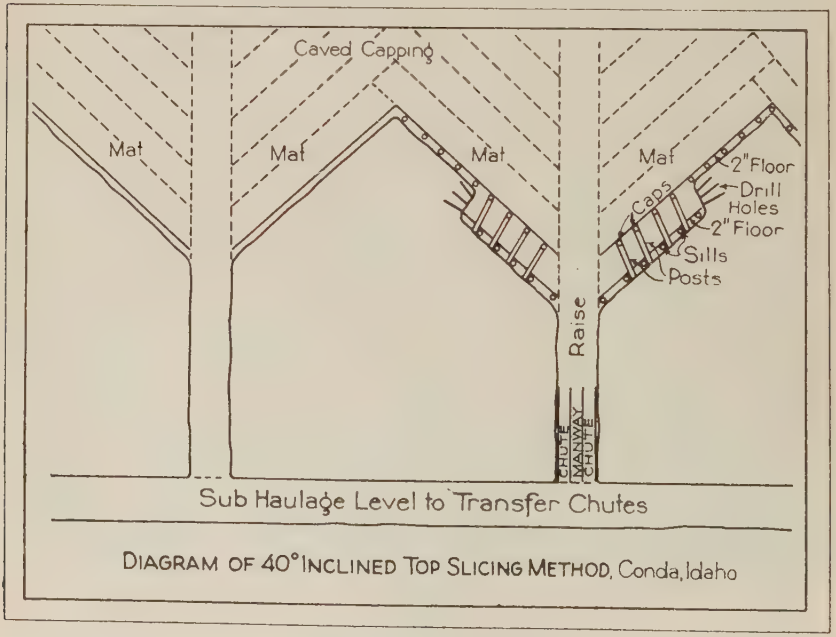

DIAGRAM OF 40° INCLINED TOP SLICING METHOD, Conda, Idaho

*For a complete description of this enterprise see Twenty-fifth Annual Report of the Mining Industry of Idaho for the Year 1923, page 26.

The mine is opened by an adit or main haulage level, 9 feet wide by 10 feet 2 inches high inside of timber, and by main or transfer raises leading into it. The portal of this tunnel is adjacent to the milling plant. Three-compartment raises, spaced at 100-foot intervals, are driven on the phosphate bed from the main and subhaulage levels to the top of the ore or surface. Sublevels spaced at successive intervals of 150 feet are then driven on the vein from these raises; these drifts are small and almost entirely untimbered. Stoping is commenced by driving a 40-degree inclined drift (raise) along the top of the ore. The roof of this drift is supported by caps and posts, and a floor of 2-inch lumber is laid lengthwise on sills, which are 5½ feet from center to center, across the bottom of the drift. The hanging wall of the vein is supported by the posts with 2-inch lagging placed behind them. The incline of the stope raise (drift), together with the smooth floor, is sufficient to cause the broken rock from the headings to drop by gravity into the ore chute, from which it is loaded into 2-ton side-dump mine-cars and trammed by hand to the transfer raises leading into the main haulage level.

Two to four adjacent stopes are usually worked simultaneously and all of the ore is recovered, as the adjoining slices are connected by lagging off the vertical (top) end of the finished drift or slice. After the slice is completed, the roof of the drift is brought down on to the floor by blasting the supporting timbers. One to two holes are bored in each cap and post into which the powder is placed; the fuses are ignited by hand, and the entire slice shot at one time, thus forming a timbered mat on top of the floor, which then becomes the roof of the next slice. The whole procedure is then repeated for consecutive slices until the block of ore is worked out.

A production of about 13½ tons per man-shift is obtained, and the timber requirement is approximately 12 feet, board measure, per ton of ore.

ANACONDA COPPER MINING CO.: MINE AND MILL IN BACKGROUND

IDAHO PORTLAND CEMENT CO.*

By Gordon F. Sondraker, Associate Editor, Pit and Quarry

The new plant of the Idaho Portland Cement Co. at Inkom, near Pocatello, Idaho, was placed in operation in June of this year. While the buildings were not quite complete and other minor changes remained to be made, it was decided by the officers of the company to place the plant in operation in order that the product, Eagle Brand cement, might be placed on the market during the summer construction period and that definite dealer connections might be established before the winter, with its consequent slack in trade, might set in.

The company was conceived by a group of business men of Spokane, Washington, and Pocatello, Idaho, headed by E. J. Simons, president of the General Machinery Company of Spokane. Erection of the plant was started during the fall of 1928. Situated on the beautiful Port Neuf river, the company enjoys all the natural facilities necessary to a successful cement plant. It was intended originally to establish a quarry on a large ledge of lime-rock near the company's mill, but, as a cut was being made through a hillside preparatory to laying tracks for the narrow-gauge railroad, it was discovered that the hill itself contained an immense quantity of shattered lime-rock and shale so intermixed as to almost form an ideal raw mix. Immediately upon this discovery sufficient exploration work was performed to prove up an immense tonnage of this material in the hill. In fact, the tonnage is sufficient to furnish this plant with material for well over two hundred years, if operating at its present capacity. The hill roughly measures 2200 feet in length by 400 feet in height and contains 80 acres. The company owns also a shale deposit covering approximately 80 acres, although, from the present knowledge of the shattered lime deposit, it appears probable that the shale deposit will never be used.

One may gather an idea of the nature of the deposit when it is stated that, to date, no powder has been used on the deposit, the material being so small in size that it may all be handled easily by steam shovels. As one may readily perceive from the panorama photograph shown herewith, the deposit is about 100 feet higher than the plant, thus allowing a gravity flow of material through the plant and the consequent elimination of many elevators that are customary in the average cement plant.

A 7-ton gasoline locomotive, designed especially for this operation by the General Machinery Company of Spokane, Wash., hauls six 5-yard Western side-dump cars over 1800 feet of narrow-gauge track running from the crushers to the farthest end of the quarry. A Speeder gasoline shovel equipped with a ½-yard dipper and powered by a 45-horsepower Hercules gas engine, and a General shovel equipped with a ¾-yard dipper dig the material from the quarry and dump it directly into the dump cars which convey the material over a grizzly manufactured of railroad iron. This grizzly eliminates the material 3 inches and under in size and passes the oversize material to a 12-inch by 24-inch Reliance jaw crusher.

This crusher reduces the oversized material to 3-inch and under and then lets it fall to a vibrating screen manufactured by Universal Vibrating Screen Company. This screen removes the material ¾-inch and under in size and passes it to a General Machinery Company's belt-conveyor 24 inches in width and 77 feet in length. The oversized material falls into a type B 36-inch by 24-inch Jeffrey hammer-mill and is reduced to ¾-inch and finer. This material then falls to the conveyor-belt mentioned above and is conveyed to wooden storage bins having a total capacity of 800 tons of dry material.

---

*From Pit and Quarry, vol. 18, p. 36, Sept. 11, 1929. Reproduced by permission.

IDAHO PORTLAND CEMENT CO.: PLANT

The material is drawn from the storage bins onto a General Machinery Company conveyor-belt measuring 20 inches in width and 108 feet in length. The material is drawn from the bins onto this belt conveyor by three variable-speed feeders especially designed for this particular operation by the same company. Due to the variable speed of these feeders ,a preliminary mixture of the raw materials is obtained at this point. The belt-conveyor conveys the material to a General Machinery Company bucket elevator having 55-foot centers and using 7-inch by 14-inch buckets. This elevator takes the material from the belt-conveyor to wooden storage bins over the raw mill.

Raw Grinding:

The raw material ¾-inch and finer is drawn from the mill bin onto an Allis-Chalmers table feeder which, in turn, feeds it into an 8-foot by 7-foot by 26-foot Allis-Chalmers Compeb mill. This mill is driven by a 600-horse-power Allis-Chalmers high-torque motor through a flexible coupling. The motor operates at 180 r.p.m. and the mill turns over at the rate of 20 r.p.m. Water to form the slurry is introduced into the mill at the feed end. As the slurry leaves the mill it is taken by a 3-inch Wilfley pump, which is driven by a 40-horsepower Howell motor through a flexible coupling, and is pumped to any one of the five steel slurry tanks.

Each of these steel slurry tanks measures 20 feet in diameter by 25 feet in height and each has a concrete cone bottom. Slurry is agitated by air through a system designed by the General Machinery Company. Piping is so arranged that any of the five tanks may be used either for mixing, storage, or kiln feed. Slurry is pumped from tank to tank, in correcting, by a 4-inch Krogh pump manufactured by the Krogh Manufacturing Company.

This pump is driven by a 30-horsepower Howell motor through a flexible coupling. After a thorough and satisfactory raw mix is obtained, slurry is pumped from the tank then being used as a kiln-feed tank to an Allis-Chalmers ferris-wheel type kiln-feeder by a 3-inch pump manufactured by the Union Iron Works.

Clinker Burning and Coal Handling:

The ferris-wheel type feeder supplies the slurry to a water-jacketed feed-pipe which, in turn, introduces the slurry to the kiln. Any slurry overflow from the feeder is returned to the slurry feed tank by a 2-inch Union Iron Works centrifugal pump driven by a 5-horsepower Howell motor through a belt drive.

A single Allis-Chalmers kiln, measuring 10 feet in diameter by 200 feet in length, is in operation. This kiln is supported by four sets of single-roll trunions and is driven by a 75-horsepower 6-phase variable-speed Allis-Chalmers motor, through a gear speed reducer. Full speed of the kiln is one and one-quarter minutes per revolution and slow speed is two and one-half minutes per revolution of the kiln.

Fuel for the burning of the clinker consists of powdered soft coal obtained from the mines of Utah. This coal is received in gondola cars on elevated tracks over the coal storage. The coal is dumped from the cars into the storage pit. A General Machinery Company drag-line takes the coal from the storage pit to a General Machinery Company elevator having 35-foot centers and using 7½-inch by 16-inch buckets. This elevates the coal to a 30-ton-capacity steel bin from which it flows by gravity to the feeder of a 5-roll low-side Raymond mill. This mill reduces the material so that 80 per cent will pass through a 200-mesh screen. The coal, when properly sized, is drawn from the mill by a Raymond air separator having a 16-inch fan. The ground, dried coal then goes to a 30-ton-capacity steel bin over the kiln. Heat for drying in the Raymond mill is obtained through piping from a hood over the front end of the kiln.

Coal for burning is drawn from the aforementioned fuel bin by a double-screw type Allis-Chalmers coal feeder and is blown into the kiln by a 48-inch Sirroco fan manufactured by the American Blower Company. The kiln is operated in three 8-hour shifts.

Clinker Handling and Finish Grinding:

The clinker falls from the kiln to a Link-Belt drag chain conveyor 110 feet in length and is discharged into a Link-Belt bucket elevator having buckets measuring 20 inches by 14 inches by 7 inches. Both the chain drag and the elevator are driven by a 25-horsepower motor through a Falk speed reducer. This motor as well as all Howell motors in use throughout the plant are manufactured by the Howell Motor Company. The elevator discharges the clinker into the storage pile where it is distributed for cooling by means of a stiff-leg derrick and a clam shell. The derrick is driven by 75-horsepower and 25-horsepower Westinghouse motors.

The same stiff-leg derrick reclaims the clinker from the clinker storage pile and places it in a 16-foot square steel bin over the finish mill. Gypsum is added in this bin, according to requirements, by the same derrick.

Clinker is drawn from the mill-feed bin onto an Allis-Chalmers table feeder and is fed into an 8-foot by 7-foot by 30-foot Allis-Chalmers Compeb mill. This mill is driven through a Falk flexible coupling by a 600-horsepower Allis-Chalmers high-torque motor operating at 180 r.p.m. The finished cement is discharged into a 5-inch Fuller-Kinyon pump driven, through a Falk flexible coupling, by a 25-horsepower Howell motor. The cement is pumped by this Fuller-Kinyon pump to two temporary stock-house bins in the temporary stock-house, or rather immediately adjoining it.

The cement is drawn from either of the two bins by a Link-Belt screw conveyor 12 inches in diameter and 6 feet in length. This conveyor delivers the material to a General Machinery Company bucket elevator having 45-foot centers and using buckets 7 inches by 14 inches. The elevator elevates and dumps the cement into an 18-inch by 12-foot General Machinery Company rotary screen using 10-mesh screen cloth. This screen removes any tramp material that may have found its way into the cement since leaving the finish mill.

From the screen the cement falls into a steel bin over the packing machine. This bin has a capacity of 160 barrels of cement. From the bin it is drawn into a Bates 3-valve packer and, after packing, is either trucked by hand into freight cars for shipment or loaded onto trucks. The plant is served by the Union Pacific Railway Company's transcontinental lines.

Machine Shop and Laboratory:

The machine shop is equipped with an adequate supply of tools and equipment to take care of the needs of the company. A Monarch 20-inch by 12-foot lathe takes care of the necessary lathe work. A Champion Blower & Forge Company's powered emery wheel; a drill press manufactured by Aurora Tool Works; a milling machine manufactured by Rockford Milling Machine Company; a 14-inch American wood-joiner, and a 25-pound Little Giant power hammer manufactured by the Star Foundry Company comprise the balance of the equipment. Three air compressors are in operation. One of these, a 12-inch by 12¼-inch Ingersoll-Rand single-stage air compressor driven by a 50-horsepower Westinghouse motor through a belt transmission, is housed in the machine shop. This compressor furnishes the air necessary for slurry agitation. An 8-inch by 9-inch Sullivan single-stage compressor furnishes air for the Fuller-Kinyon pumping system. A 30-horsepower Howell motor drives this compressor through a belt. An 8-inch by 9-inch Chicago Pneumatic compressor driven by a 50-horsepower motor through belt transmission is used as an auxiliary in time of need. All of the compressors are connected by a single pipe-line so that each may be used for any desired purpose.

A completely equipped laboratory, under the direction of F. H. Beyer, chief chemist, insures the quality of cement before it leaves the mill. The laboratory is equipped with a small crusher, and a pebble mill, manufactured by the General Machinery Company, a Tinius Olsen tensile-strength machine, and other equipment necessary for successful operation.

GENERAL REVIEW AND 1929 ACTIVITIES

The year 1929 closed with the mining industry of Idaho witnessing a very prosperous year. Excepting for three mines, which curtained production about 15 per cent for a few months at the close of the year, capacity production was maintained at all of the large mines and in a few instances the output was increased. This, with the increase by small producers, resulted in an increase in the total production over that of the previous year. During the year four former dividend-paying mines increased their payments, two new ones were added to the list, and four others were placed on a profitable operating basis. Practically all of the large mines conducted active development work throughout the year, which proved the extent of their ore bodies at greater depth and laterally. The increased ore reserves and the improvements to mine and mill plants greatly enhanced the physical condition and future life of these mines. The money expended for new mining equipment and machinery, new reduction plants and the remodeling of old plants, and the number of new plants installed (both mining and milling) exceeded those for any of the past five years. The organization of and commencing of operations by new companies and the development work undertaken by the large companies at new properties greatly exceeded those of 1928. The number of producing mines in which the ore reserves were increased and the number of new ore disclosures in non-producing mines and prospects greatly exceeded those of former years.

The majority of the new companies and the new construction work was in counties other than Shoshone, although this county witnessed a substantial increase. In addition to the new enterprises, new discoveries, and improved conditions throughout the State, there were also many inquiries and investigations by those seeking mines and mining investments, particularly in Custer, Boise, Valley, Blaine, Lemhi, and Idaho counties. Many of these inquiries were conducted by large mining companies who in some instances were favorably impressed by their investigations. As Idaho offers unequalled opportunities in mining and the diversity of its mineral wealth exceeds that of any state of similar size in the Union, the substantial growth witnessed during 1929 should be maintained in the future. The healthy condition of Idaho's mining industry at the close of the year can best be outlined by the five principal factors responsible for it:

1. Increased ore reserves of producing mines.
2. New ore disclosures of importance.
3. New dividend-paying mines.
4. New reduction plants.
5. Principal activities, new enterprises, and new mine plants.

1. Increased Ore Reserves of Producing Mines:

The principal producing mines in which the ore reserves were increased by new development work during the year were: Constitution mine of the Constitution Mining & Milling Co., Galena mine of the Callahan Lead-Zinc Co., Stratton mine of the Dayrock Mining Co., Golconda mine of the Golconda Lead Mines, Jack Waite mine of the Jack Waite Consolidated Mining Co., Sidney mine, being operated by the Sidney Leasing Co., Sherman mine of the Sherman Lead Co., Sunshine mine of the Sunshine Mining Co., and Morning and Page mines of the Federal Mining & Smelting Co., all in Shoshone County; the Triumph mine of the Hailey Triumph Mines Co., in Blaine County; the Gold Hill & Iowa mine of the Talache Mines, Inc., in Boise County; the Whitedelf mine of the Whitedelf Mining & Development Co., in Bonner County; the Wilbert mine of the Wilbert Mining Co., Ltd., in Butte County; the

Empire mine of the Mackay Metals and the Livingston mine of the Livingston Mines Corporation, both in Custer County; the Lone Pine mine at Golden, owned by O. F. Miiller, in Idaho County; and the Pope-Shenon mine of the Winder-Stillman Copper Co., in Lemhi County.

The companies which increased the amount of their dividend payments for 1929 were: Bunker Hill & Sullivan M. & C. Co., Hecla Mining Co., Sunshine Mining Co., Sidney Mining Co., and Sidney Leasing Co., all in Shoshone County.

2. New Ore Disclosures of Importance:

The principal new ore disclosures and new discoveries of importance at non-producing mines and prospects were those at: The Carbonate Hill mine of the Atlas Mining Co., the Crescent mine of the Bunker Hill & Sullivan M. & C. Co., the Douglas mine of the Douglas Mining Co., and the Little Pittsburg mine of the Pine Creek Lead-Zinc Mining Co., all in Shoshone County; the Vienna mine, under operation by A. F. Peery, in Blaine County; the Hewer mine of the Idaho Lakeview Mines Co., in Bonner County; the Horn Silver mine of the Horn Silver Consolidated Mines Co., in Butte County; and the Monte Carlo mine, owned by Ed. Salomon, in Custer County.

3. New Dividend-Paying Mines:

Companies which entered the ranks of dividend payers during the year were: Dayrock Mining Co. and Golconda Lead Mines, both in Shoshone County.

Mines which were placed on a profitable operating basis during the year were those of: The Sherman Lead Co. and Jack Waite Consolidated Mining Co., both in Shoshone County; Wilbert Mining Co., Ltd., Butte County; and the Hall Interstate and Lost Pilgrim mines of the Bunker Hill & Sullivan M. & C. Co., Valley County.

4. New Reduction Plants:

The most important new construction work during the year was the enlargement of the Bunker Hill smelter to almost double its former capacity; the addition of a cadmium recovery unit to the electrolytic zinc plant of the Sullivan Mining Co.; and the remodeling of its mill into a custom plant by the Hercules Mining Co. All these are in Shoshone County. Other mill construction work in Shoshone County was as follows: Remodeling and enlarging of milling plants by the Jack Waite Consolidated Mining Co. and the Sunshine Mining Co.; rebuilding of Page mill by the Federal M. & S. Co.; commencing of work on a new flotation concentrator by the Pine Creek Lead-Zinc Mining Co.

The principal new milling plant construction in other counties during the year was: Small 50-ton jig concentrator by the United Mines Co. of Idaho, Blaine County; new 75-ton flotation concentrator by the Missouri Mining Co., Ltd., enlarging of buildings and installation of new milling equipment at the Gold Hill & Iowa mill of the Talache Mines, Inc., and installation of new milling equipment at the Mountain Chief mill by the Federated Mines Co., all in Boise County; completion of new 75-ton flotation concentrator by the Whitedelf Mining & Development Co., in Bonner County; erection of flumes and mill building and installation of screening and tabling machinery by the Salmon River Development Co. and the Seelridge Gold Mining Co. (both placer-mining enterprises), the erection of new mill building and installation of milling equipment of 150 tons capacity, fine grinding, amalgamation, and flotation, by the Sherman Howe Mining Co., and the installation of a small 4-stamp steam-driven amalgamation mill by the Buffalo-Idaho Mining Co., all in Idaho County; and the erection by the Amalgamated Red Metals Mines Co. in Valley County of a mill building and installation of equipment of 25 tons capacity which is portable on horseback.

The most important non-metallic reduction plant to be constructed in the State during 1929 was the new 1500-barrel capacity cement plant of the Idaho Cement Co. at Inkom, Bannock County.

5. Principal Activities, New Enterprises, and New Mine Plants:

The outstanding new enterprises and new mine plant installations were as follows: Rainbow Mining & Milling Co. in Benewah County constructed new camp buildings and installed small gas-driven compressor and complete mining equipment. In Blaine County the Hailey Triumph Mines Co. erected a large four-story boarding and bunk house and four new homes, also installed a large amount of mining equipment, and its allied company, the Hailey Tramway Co., constructed a four-mile aerial tramway, with head-house and terminal buildings; the Liberty Gem Mines, Inc., installed a small gas-driven compressor; A. F. Peery at the Vienna mine installed a large compressor direct-connected with Diesel engine, also new mining equipment. The Missouri Mining Co., Ltd., and the American Mines Development Co., both in Boise County, installed small gas-driven compressors and complete mining equipment, and the Talache Mines, Inc., at the Gold Hill & Iowa mine, also in Boise County, reconstructed its mine surface plant and installed a large electrically-driven hoist. The Wilbert Mining Co., Ltd., constructed a 17-mile electric power transmission line from Howe to its mine and converted the mine and mill plants from gas-driven to electrically-driven; the Era Consolidated Mines, Inc., constructed new camp buildings and installed small gas-driven compressor; these are both in Butte County. The Mackay Metals installed a new steam-driven 1200-cubic-foot compressor, four miles of pipeline, and a large amount of new mining equipment; H. B. Kingsbury at the Camp Bird mine installed a small hydroelectric power plant and a five-drill compressor; both of these are in Custer County. The St. Joseph Lead Co. commenced operations at the Boise Rochester-Monarch groups, Elmore County. The American Mines Development Co. at the Old Liberty mine, Gem County, erected new buildings and installed a small gas-driven compressor.

In Idaho County the Sherman Howe Mining Co. erected new mine and camp buildings, and installed new compressor and complete mining equipment; the Bunker Hill & Sullivan M. & C. Co. and its allied interests commenced operations at the new copper discovery in the Green Mountain district; both of these are new enterprises of importance. In Latah County the Spokane-Idaho Copper Co. commenced operations. In Lemhi County the Lead Mountain Mining Co., a new organization, erected new mine and camp buildings and installed compressor and complete mining equipment; the Winder-Stillman Copper Co. installed a new compressor; the Harmony Mines Co. installed at Baker a 450-horsepower generator driven by a Diesel engine, constructed eight miles of electric transmission line, and installed new mining equipment; and Mrs. H. F. Steen at the Continental group in the Yellow Jacket district installed a small gas-driven compressor.

The Exploration Co. of California, which acquired the Golconda group, South Mountain district, Owyhee County, late in the year, erected new mine and camp buildings and installed an additional gas-driven compressor. The Grand Teton Oil Co. in Teton County erected an additional derrick and installed complete new well-drilling equipment. In Valley County the Bunker Hill & Sullivan M. & C. Co. at the Lost Pilgrim and Hall Interstate mines erected a new hydroelectric power plant; the Yellow Pine Co. constructed a large number of new mine camp buildings, installed a new compressor and a large amount of new mining equipment, and completed construction on a 12-mile road into the camp; the Big Creek Gold Mines, Inc., installed a small portable water-driven compressor and small portable sawmill; the Amalgamated Red Metals Mines Co. installed a small portable hydroelectric power plant, a compressor and a small sawmill, both portable, and erected new mine and camp buildings. The Idaho Mineral Mining Co., a new organization in the Mineral district, Washington County, installed a gas-driven compressor and complete mining equipment.

The principal new mine plant construction and installations in Shoshone County during 1929 were: Hecla Mining Co., two new hoists and building to house them, which represented the largest expenditure in new mine plants made in the State; Constitution Mining & Milling Co., new 100-horsepower double-drum hoist and new 1600-cubic-foot Ingersoll-Rand compressor, both

electrically driven; Cedar Creek Mining & Development Co., new 530-cubic-foot compressor, replacing one destroyed by fire; Coeur d'Alene Mines Corporation (a new organization at the Mineral Point mine), new camp and mine buildings, power line, compressor and complete mining equipment; Dayrock Mining Co., new mine buildings and compressor; Federal Mining & Smelting Co. at its Page mine, new buildings and new electrically-driven 2550-cubic-foot compressor; Gold Hunter Mines, Inc., new mine buildings and new compressor, replacing those destroyed by fire early in the year; General Mines Corporation, new buildings, compressor, and complete mining equipment; Inspiration Lead Co. (a new organization at the Moe mine), new buildings, head-frame, electrically-driven 550-cubic-foot compressor and electrically-driven hoist; Keystone Mining Co. (a reorganization of the Florence Mining & Milling Co., Ltd.), new buildings and new compressor; Lookout Mountain Mining & Milling Co., new 12x12 compressor; New Jersey Consolidated Mines Co. at the King of Pine Creek mine, new head-frame, new buildings, two electrically-driven compressors and an electrically-driven hoist; E. M. Burt at the Peerless group near Wallace, power line, new compressor, complete mining equipment, also road constructed; Sidney Leasing Co. at the Sidney mine, large new compressor; Sunshine Mining Co., new compressor and large amount of new mining equipment; Stratton Silver Summit, Inc., electrically-driven compressor and complete mining equipment; Wolverine Mining Co., Ltd., new electrically-driven compressor and hoist; Western Mines, Ltd., at the Bell of the West group, new compressor and complete mining equipment. The Pine Creek Lead-Zinc Mining Co. at the Little Pittsburg group near the Sidney mine on Pine Creek, erected new buildings and removed the mining equipment to the lower tunnel. The Savage Mining Co., a new organization on Nine-Mile, erected new buildings and installed a new compressor and complete mining equipment early in the year; these were destroyed by fire in June and were entirely replaced in July. Th Tamarack & Custer Consolidated Mining Co. removed all of its mining equipment from its No. 6 tunnel on Nine-Mile Creek and reinstalled it at the No. 7 tunnel on Canyon Creek.

These are more extensively reviewed through the outline by counties which follows:

Bannock County

One of the most important new enterprises to be started in the State during 1928 was that of the Idaho Portland Cement Co., near Inkom, about 12 miles south of Pocatello. This company acquired a large deposit of limestone, constructed a new railroad siding, and commenced installation of a 1500-barrel Portland cement plant. Construction was completed and the manufacture of cement started during 1929. This company's product is marketed under the trade name of "Eagle Brand".

Seven manganese mines near Cleveland and Lava Hot Springs were active throughout the greater part of the year, and a substantial tonnage of high-grade manganese ore was produced and marketed.

Blaine County

The principal operation in this county throughout the year was that of the Hailey Triumph Mines Co. at the Triumph mine, which adjoins the North Star of the Federal Mining & Smelting Co. A large tonnage of mixed ore was produced and sent to a milling plant in Utah for reduction. The principal development work consisted of extending the inclined winze 400 feet, which was equal to a vertical depth of 200 feet below the bottom of the shaft. This work was successful in opening a substantial tonnage of ore. A large new bunk and boarding house and a number of new homes were erected. In addition to the foregoing, a four-mile aerial tramway connecting the mine with the railroad was constructed. Articles of incorporation for a Hailey Tramway Co. were filed on August 23, 1929. As no report was filed for this company, it is presumed that the two companies are operated independently of each other. This mine was formerly operated by the Triumph Development Co., of which Geo. W. Snyder, Felt Bldg., Salt Lake City, was secretary. The Homestake Mines Corporation, near Ketchum, was active for eight months in

developing its property. The Liberty Gem Mines, Inc., which was organized in 1927 to develop the new discovery made by the Mathewses in the early part of that year, maintained active development work throughout 1929 and late in the year installed an additional gas-driven compressor. The Crooked River Mining Co., operating in the Muldoon district, actively developed its property by contract throughout the year. The United Mines Co. of Idaho, Inc., which is also operating in this district, in addition to performing a small amount of development work, installed a short one-bucket aerial tramway and a small jig concentrating mill during the year. The Pandora Mining Co., with property in the Lava Creek district near the Butte County line, which acquired and equipped its property in 1928, constructed a four-mile road in cooperation with Butte County, shipped a small tonnage of ore, and maintained work throughout 1929. Lessees produced and marketed a substantial tonnage of ore from the Independence and North Star mines owned by the Federal Mining & Smelting Co., and from the Star mine near Hailey, owned by Leo J. Falk of Boise. Peter L. Kent at the Lone Pine group on Deer Creek performed a small amount of work, and lessees at the Eureka and Idahoan groups in the Bullion district and at the Baltimore mine near Ketchum were also active. A. F. Peery, who is operating the Vienna mine in the Sawtooth district, installed complete mining equipment and a compressor driven by a Diesel engine, and conducted active work throughout the year. This work was successful in opening a good showing of high-grade silver ore.

Two of the principal new events of the year were: The acquisition by the Hercules Mining Co. of Shoshone County and its allied interests of the Badger group, adjoining the property of the Liberty Gem Mines, Inc.; and the acquisition, late in October, of the Queen of the Hills and Queen of the Hills Extension groups near Bellevue by the Silver Star-Queens Mines, Inc. The former performed all necessary procedure in surveying and acquiring clear title to the property, and the latter commenced mining operations in December.

Boise County

The most important construction work was the completion of rebuilding the mine surface plant and mill building and the installation of complete new mill equipment at the Gold Hill & Iowa mine of the Talache Mines, Inc.; the remodeling of its mill by the Mineral Mining Co.; the remodeling of the mill at the Mountain Chief mine, which was operated during part of the year by the Federated Mines Co.; the construction of a new 50-ton flotation concentrator by the Missouri Mining Co., Ltd.; and the erection of ore bins and the installation of crushing equipment at the Banks mine of the American Mines Development Co.

The principal mine development during the year was the sinking of the vertical winze from the 700-foot to the 800-foot level of the Gold Hill mine of the Talache Mines, Inc. Others who developed their properties throughout the year were: American Mines Development Co.; Missouri Mining Co., Ltd.; Penn Mining Co. at the Coin Bond group; Jarvis Bros. at the Hay Fork mine; and the operators of the Mayflower group near Quartzburg.

The Idaho Gold Dredging Corporation and the Boise Placer Co., both producers of placer gold, were active throughout the summer months, and each increased its production over that of the previous year. The two largest gold producers from deep mines were the Idawa Gold Mining Co., and the Talache Mines, Inc. The Crooked River Mining Co. completed the reconstruction of its dredge, which sank on being put into operation in 1927, and conducted mining operations for a period of 27 days.

Bonner County

This county witnessed a greater substantial improvement in the development of new ore by old companies, new mine plant and mill plant installation, discoveries of new ore, development work by prospectors and new organizations than it had witnessed in many years. The Whitedelf Mining & Development Co. and the Hope Mining Co. both proved their properties and the continuation of ore at a greater depth, and both produced and marketed a greater tonnage of ore than for any previous year. During the early part of the year, the Whitedelf Mining & Development Co. completed the construction of a 75-ton flotation concentrator. One of the principal new ore dis-

closures in the State during 1929 was at the Hewer mine, under operation by the Idaho Lakeview Mines Co. In addition to maintaining active development work throughout the year, this company rehabilitated the mine camp and installed a new hoist and an electric generator driven by a semi-Diesel engine.

The International Portland Cement Co., with quarries at Bayview, mined the largest tonnage of limestone that it has ever produced in any one year. This limestone is ferried across the lake and then sent by rail to Spokane, where it is manufactured into cement.

Prospectors and small development companies in the Priest Lake district were active throughout the year, the principal ones being the Kaniksu Mining Co.; P. F. Vandever and C. W. Beardmore at the Grey Goose; and the Binarch Creek Mining Co. Many others increased their usual yearly work, and there continues to be an active search for new mines.

Encouraged by the success of the Whitedelf and Hope mines, the Clark Fork section witnessed more prospecting and more work by small development companies than during any other past year. New ore disclosures by two of these were reported by the press.

The properties owned by the Falls Creek Mining Co. and the Talache Mines, Inc., were under option during the greater part of the year and witnessed a little activity, none of which was reported. The reasons for refusing to file the reports required by law on these operations are probably best known by the promoters.

Boundary County

The year 1929 witnessed more new companies and a larger amount of attention from the press than for a great number of years, but for some unknown reason practically all the new organizations refused to file the information with the inspector of mines as required by law, so nothing is known as to their activities. The Continental mine at Porthill, owned by the Idaho Continental Mining Co., which was closed in 1928, remained idle throughout the year. The Idamont Lead-Zinc Mines Co., a reorganization of the Leonia Gold Mining Co., formerly the Idaho Gold & Ruby Mining Co., and the Metals Mining Co. performed a small amount of work during the year.

The Moyie Gold-Copper M. & M. Co., Ltd., and the International Molybdenum Co. expanded their operations over those of the previous year.

Butte County

This county witnessed more new mine development, more new investigations and more prospecting and location of new claims than during the past 30 years. A large amount of these activities were inspired to a great degree by the success of the Wilbert and Horn Silver mines. The Wilbert Mining Co., Ltd., operating in the Dome district, maintained active production and mine development work throughout the year, in addition to constructing a 17-mile electric power transmission line from Howe to the mine and transforming the mine and mill plants from gas-driven to electrically-driven. This company is one of the largest producers of lead-silver ore in southern Idaho.

The Dahle Bros. at the Horn Silver mine in the Lava Creek district, known as the Horn Silver Consolidated Mines Co., maintained active development work throughout the year and were successful in proving a substantial showing of new ore. Three new enterprises in the Lava Creek district were active throughout the year in developing their properties.

One of the principal publications issued during 1929 by the Idaho Bureau of Mines and Geology was its Pamphlet No. 32, "Geology and Ore Deposits of the Lava Creek District, Idaho", by Alfred L. Anderson. This publication is a comprehensive survey of the district and has greatly assisted in attracting attention to it.

Custer County

The most important event in this county in 1928 was the acquisition of the Empire copper mine at Mackay by the Mackay Metals. After this new company acquired control of the property, the mine and mill plants were entirely rebuilt, the mine rehabilitated, an active mine development campaign was started and operations commenced by a large number of lessees. These

were continued without interruption during 1929, the principal work being confined to the 1000-ft. level and the Cossack tunnel. This work was successful in opening a large tonnage of new ore, which is estimated to increase the life of the property many years. During the year a new 1200-cubic-foot Nordberg compressor, approximately four miles of new air-line, and a large amount of new mining equipment were installed. Production and shipping of crude ore and concentrate, both on company account and by lessees, were maintained without interruption throughout 1929.

At the Camp Bird group near Clayton, which was acquired in 1928 by H. B. Kingsbury of Wallace and Wilbur Greenough of Spokane, a small hydroelectric power plant and a five-drill compressor were installed, and a small amount of mine development work was performed.

The Livingston Mines Corporation improved and enlarged its mine and mill plants and proved the extent of its ore reserves through additional development at depth and laterally. This company is the largest producer of lead and zinc ore and concentrates in southern Idaho and maintains one of the largest payrolls. The Twin Apex Mining Co. on Squaw Creek near Clayton, the Aztec Mining & Milling Co. on Fourth of July Creek, and the Crater Mines Co. on Lake Creek conducted active operations during the summer months. A large amount of new development work was performed at the Phi Kappa group and the Black Rock group, both on the head of Big Lost River, and by the Estes Mountain Gold, Inc., at the Franklin group on Yankee Fork. The Red Bird mine of the Ford Motor Co. was idle throughout the year, while the only operation at the Ramshorn was that conducted by lessees, who produced and marketed a small tonnage of high-grade hand-sorted ore.

Elmore County

One of the principal and most important new enterprises to start in the State during the year was the commencing of operations at the Boise-Rochester mine near Atlanta by the St. Joseph Lead Co. This company acquired the Boise-Rochester in 1917, but, other than necessary repairs to the buildings and principal tunnels, nothing was done with it. In the latter part of 1929 the Monarch group, which is adjacent to the Boise-Rochester, was acquired and the development of both properties commenced.

Idaho County

The lower end of the Elk City highway was extended a distance of six miles during 1929 to the intersection of the old road between Newsome and Golden at Huston. The completion of the road to this point permitted the discontinuance of the road between Stites, Harpster, and Newsome, and the elimination of that portion over Mt. Baldy, one of the highest divides in the State of Idaho to be crossed by a road. On November 16, 1929, the starting point of the mail route to Elk City was changed from Stites to Grangeville, and now all traffic into Elk City and environs is using this road from Grangeville to Huston and then the old road from Huston to Elk City. This change has added over two months to the period during which the Elk City region is accessible to motor vehicles, and has greatly reduced the time required for transporting the mail.

A gradual return to more normal conditions, under which gold mining is again becoming profitable, affected this county during the year by a small substantial increase in mining operations, investigations, new enterprises and increased production. The most important of these was the Sherman Howe Mining Co., a new organization in the Marshall Lake district. This company's property adjoins that of the Golden Anchor Mining Co. and covers the western extension of the Holte vein system. Its expenditures were among the largest made by any company in the State during 1929 and consisted of the following: Construction of new camp buildings and mill building; installation of complete new mining and milling equipment; installation of a 250-horsepower Diesel engine, direct-connected to electric generator; and construction of a three-mile electric transmission line. This company also expended a substantial sum in road building. The Golden Anchor Mining Co., in the same district, was active throughout the year in extending its principal

tunnel to a total distance of 1200 feet; this is being driven to intersect the Holte vein at greater depth. In addition to the foregoing, the Marshall Lake district witnessed more prospecting and more small development enterprises than for many years past. The Unity Gold Mines Co. of Warren maintained production operations throughout the year, but performed no new development work.

The Golden or Ten Mile district was one of the most active sections of this county throughout 1929. Prior to this year there were, with one exception, practically no mining operations of any consequence in this district, other than annual labor. On account of the completion of the highway to Huston the district witnessed the influx of many prospectors; the location of a large number of mining claims, both placer and lode, on both sides of the South Fork of the Clearwater River; the incorporation, financing, and starting of work by three new companies; the quarreling of prospectors over property lines on ground which was unlocated two years ago; and the construction of a small four-stamp, steam-driven mill by the Buffalo-Idaho Mining Co. This company also maintained active mine development work and constructed three miles of new road into its property. The construction of a new mill at the Lone Pine mine was projected by F. O. Miiller and son, as a result of exposing a large tonnage of high-grade ore; in addition to maintaining development work throughout the year, they operated their mill during the high-water season and the gold production was of such a substantial amount that this property is considered one of the State's principal gold mines.

In anticipation of the early completion of the highway to Elk City, this district witnessed the visits of a larger number of mining engineers, prospectors, and those seeking new mining enterprises than it had during many years past. These resulted in negotiations being undertaken by a large mining organization to acquire one of the mines, and the decision of another large organization to conduct extensive examinations during 1930.

One of the most important new enterprises in Idaho during 1929 was the acquisition of a newly discovered copper-silver prospect in the Green Mountain district by the Bunker Hill & Sullivan Mining & Concentrating Co. and allied interests. This property is situated near the headwaters of Meadow Creek, a tributary to the Selway River, and is on the ridge connecting Green Mountain and Three Prong Mountain. It is 24 miles east of Elk City, and is reached by a 13-mile pack trail from Red River Hot Springs. In October buildings were erected, supplies installed, and all arrangements completed for conducting active mining operations throughout the winter.

During the entire open season of 1929 the "96" Mining Co., whose headquarters are at Tacoma, Washington, was engaged in prospecting with churn drills the flat-lying placer ground on Red River, American River, and Elk Creek, to ascertain its gold content and dredging feasibility. Their engineer recommended that, in accordance with the drill records, the construction of a a large dredge was warranted, and it is reported that plans are now being formulated to finance its construction. During the summer months the Moose Creek Placers Co. further rehabilitated its ditch, flume lines, and hydraulicking equipment.

The Salmon River or Simpson district in the vicinity of Lucile witnessed a large amount of activity and publicity throughout the year. The principal expenditures were based on the recovery of gold from placer deposits and the publicity resulting from fabulous values reported in rare metals, such as platinum and palladium, by questionable assayers. The Salmon River Development Co. expended a large sum of money in flume and mill-building construction and the installation of elevating, screening, sluicing, and table concentration equipment. The Seelridge Gold Mining Co. erected a mill building and installed drag-line excavating equipment, elevator, conveyors, screens, and concentration tables. In addition to the two foregoing, several smaller organizations and a large number of prospectors gave their attention to placer deposits during the year.

Copper prospects in the Pardee district received a large amount of press mention during the year; and the discovery of a deposit of high-grade silver ore in the vicinity of Kooskia was reported.

Latah County

The Muscovite Mica Co. reported that it had driven a 340-foot tunnel to intersect the vein at greater depth, and one other company performed a small amount of work. The most important event in this county during the year was the acquisition of the Mizpah group in the Hoodoo district by Jay P. Graves of Spokane, Washington, and the organization of the Spokane-Idaho Copper Co. The company was incorporated in November, the necessary arrangements completed, and work started on a large development campaign. The principal company exploiting the high-grade clays of this county is the Idaho Fire Brick Co., which was active the entire year. Its output is in great demand throughout the northwest.

Lemhi County

In point of production and number of men employed, Gilmore for many years has been one of the most active mining camps in Idaho outside of the Coeur d'Alene district. The Pittsburgh-Idaho mine of the United Idaho Mining Co., a subsidiary of the U. S. Smelting, Refining & Mining Co., is the largest mine in this district. During the first part of the year this company performed a large amount of development work and produced and marketed a substantial tonnage of high-grade, direct-shipping ore, some of which was obtained by lessees. About the middle of the year one of the large Diesel engines in the power plant exploded and was completely wrecked. This loss of power necessitated a cessation of operations until additional power was obtained. As the principal owners were unable to arrive at an agreement on the installation of a new power plant, only the men necessary to keep the mine open were employed during the latter part of the year. Late in 1928 the U. S. Smelting, Refining & Mining Co. obtained a lease and option on the Allie mine of the Gilmore Mercantile Co. and commenced developing it through the Transportation tunnel. This work was continued without interruption until the explosion of the power plant of the United Idaho Mining Co. Lack of power facilities was instrumental in curtailing all operations of the U. S. Smelting, Refining & Mining Co. and its subsidiaries in this district, and the lease was surrendered in September. Two small organizations developing prospects in the Gilmore district were active during part of the year.

The Spring Mountain district witnessed a little increase in activity over the previous year, with two organizations shipping a small amount of hand-sorted ore.

Activities in the Nicholia district throughout 1929 exceeded those of any year since production was suspended. Lessees at the old Viola mine produced and marketed a large tonnage of direct-shipping ore. A new road was constructed into the mines, and a new organization, the Lead Mountain Mining Co., acquired the Nicholia group, constructed new mine and camp buildings, installed mining equipment, and commenced active development work.

The only work done in the Leadore district during the year was the necessary annual labor and the commencing of a complete geological survey of this district by the Idaho Bureau of Mines and Geology in cooperation with the U. S. Geological Survey.

In the vicinity of Salmon there was a marked improvement in mining conditions, which was propably brought about by the operations at the Pope-Shenon mine by the Winder-Stillman Copper Co. During the year this company entirely rebuilt its mill and installed new equipment; it also installed a new compressor, performed a large amount of development work, and maintained production. This enterprise is the largest copper-producing mine in Lemhi County, and the development work was successful in opening up a substantial tonnage of new ore. The Harmony Mines Co. installed a 450-horsepower electric generator driven by a Diesel engine at Baker and erected an eight-mile transmission line to the mine. New milling equipment was installed, and a large amount of new mining equipment added. This company has been in almost continuous operation since 1916, and its property is one of the most completely equipped mines in Lemhi County. Its 1929 expenditure was one of the largest in southern Idaho. The stockholders in this company are to be complimented for their fortitude. The Tendoy Copper Queen Mining

Co. completed the reconstruction of its mill and operated for a few days. Financial difficulties were encountered and operations temporarily suspended in October.

What appears to be a revival in the Yellow Jacket district was started in 1929. Mrs. H. F. Steen at the Continental group installed a gas-driven compressor and complete mining equipment, and commenced an active development campaign, which consisted in extending the principal tunnel. This work was successful in exposing a large tonnage of commercial copper-silver ore. A small tonnage of high-grade ore was extracted and shipped. During the latter part of the year many of the other old properties in this district were receiving the attention of investigators and promoters.

In the Leesburg district the principal activities were based on hydraulic mining. Three enterprises constructed ditches, dams, and flumes and installed hydraulic mining equipment. These were the Leesburg Bonanza Placer Co.; H. F. Byram at the McNutt placers; and the Montana Mining & Livestock Co. The Clipper Bullion mine in the Shoup district, which was acquired by H. W. Ingalls and associates of Mullan in 1928, was active throughout the greater part of the year. The Sellers Bros. at the Buckhorn mine on Little Eight-Mile produced and marketed a small shipment of high-grade lead ore.

Oneida County

The only known mineral resources of this county are: Bentonite; various clays of excellent quality; and the reported occurrence of copper-lead ores carrying gold and silver. During 1929 the exploitation of the bentonite deposits was started; and the Blue Jay Mining Co. was organized for the purpose of developing one of the copper-lead prospects.

Owyhee County

The new dredge of the American Gold Dredging Corporation, which was of the flume type, was completed and placed in operation in January, 1928; operations were continued until freezing weather interrupted, and were then resumed for a short period in the spring of 1929. They were then suspended and the dredge was converted from flume type to table type, with revolving screens and a new stacker added. Shortage of water prevented a resumption of operations after new construction was completed. During the year two new development enterprises were started, and a large number of investigations by those seeking gold mines were conducted in the vicinity of Silver City.

One of the largest and most important new mining enterprises to be started in the State during 1929 was the Exploration Co. of California. The property was acquired in October by Messrs. Charles Butters and Thomas J. Barbour of San Francisco on the recommendation of Mr. Oscar H. Hershey, geologist for the Bunker Hill & Sullivan M. & C. Co., Mr. F. W. Bradley, and others, through the assistance of Mr. M. G. Sacrider of Mountain Home. The property covers the west half of the South Mountain district, a mineralized zone over two and a half miles long, which can be attacked by tunnels from many different points. This zone is on a contact of lime and granite. The east half or Cock's Mountain area of the district, which contains many excellent showings of lead-zinc-copper-silver ores, is owned by other interests. Mr. Hershey estimated over 54,000 tons of known ore in the Laxey tunnel, which is only partially developed, and that the cost of the development work necessary to fully prove the extent of the ore zones prior to building a mill and equipping the property would be about $250,000. This work will require approximately two years' time. Mining operations were commenced in November; at that time new camp buildings were erected; an additional compressor was installed; a contract for 2000 feet of tunnel at two different points was let; and sufficient supplies were put in to maintain operations throughout the winter.

Shoshone County

During 1929 this county witnessed much new development work, the starting of many new enterprises, more new profitably operating mines, more new dividend-paying companies, a larger payroll, and a greater production, with increased dividends, than in 1928. Two new producers reached the step

that places them in the list of mines with an assured future, and four others rapidly approached that position. All the large mines conducted active development work throughout the year which proved the extent of their ore bodies at increased depth and laterally. The increased ore reserves and the improvements added to mine, mill, and smelter plants, together with the new Sullivan zinc plant and the Hercules custom mill, have greatly enhanced the physical condition and future life of the mines, as well as assuring a long period of prosperity for the Coeur d'Alene district.

The thought and attention that all of the large operators are giving to safety conditions and safety supervision were reflected in the very small number of fatal accidents. Working conditions throughout the Coeur d'Alene district are exceptionally favorable. All the mines are well ventilated, and the operators devote much time and thought to making the mines safe and keeping them in such condition that the men can do a full day's work without expending the energy that is necessary in poorly ventilated mines. Both attention and money have been devoted to this phase of the operations, and it can safely be said that these are the best ventilated mines in the country. Serious attention is given not only to ventilation, but to safety, recreation, and general welfare. The value of the welfare work to company employees was further demonstrated during the year by the outstanding contribution of the Bunker Hill & Sullivan M. & C. Co. in the installation of its solarium.

The principal producing mines in which the ore reserves were increased by new development work, the most important new construction, new mine plant installations, new enterprises, and outstanding development work can best be reviewed by companies:

The extensive development work in the Bunker Hill mine greatly increased its resources. The completion of the shaft to the 1900-foot level and the opening of the ore bodies at that depth, where the ore and geological conditions were found to be normal, added much to the life of the mine which is estimated in decades instead of in years. The Bunker Hill & Sullivan M. &. C. Co., because of the magnitude of the Bunker Hill mine, has become more of a manufacturing than a mining operation, and with its smelter, mills, experimental plants, and organization, is one of the largest of its kind in the world. This company maintained its usual production record and increased its dividends during the year, while the many plant betterments which were added greatly increased the efficiency of the enterprise. The principal betterments were the remodeling of all mills to conform with the most recent developments in flotation, many of which have been evolved under this company's direction; enlargements and improvements at the mine surface plants; and the doubling of the capacity of the lead smelter, in anticipation of the termination on February 1, 1930, of the company's smelting contract with the American Smelting & Refining Co., to whom the Bunker Hill was obliged to ship one-half of its production. This work, in addition to the many other plant improvements, constituted the largest expenditure in new plant betterments made in the State during the year. The Crescent or Hooper tunnel, which was started late in 1928, was completed to a distance of 5000 feet, where it intersected the Crescent vein at a depth of approximately 500 feet below the upper workings. The ore exposed by this tunnel at the intersection was one of the largest and most important disclosures of new ore made in the State for a long period of years. In addition to extensive development work in the Bunker Hill and Crescent mines, this company was actively engaged in prospecting and developing other properties throughout the Coeur d'Alene district, in Valley County, and in Nevada, Alaska, and Canada.

The Hecla Mining Co., which is recognized as one of the principal lead-silver producing companies of the United States, greatly increased its ore reserves and resources in the Hecla mine. The vein was further explored on the 2800-foot level, and work in sinking the main shaft and cutting the station on this level was completed. The mill plant was enlarged and improved, and the mine maintained in first-class condition. In addition to this, the installation of two new electrically operated hoists was completed; these hoists constitute one of the largest and most expensive installations in the United States. This company was actively engaged in developing two other

properties in the Coeur d'Alene district, and installed a new mill and complete mine camp at the Union mine in British Columbia. Also, an active scouting and investigation campaign in the search for additional properties was maintained throughout the year.

The Morning mine of the Federal Mining & Smelting Co., which is one of the oldest in the Coeur d'Alene district in point of continuous production, as well as one of the largest lead-silver-zinc mines in the United States, was maintained at capacity production throughout a large part of the year. The number of years that this record will continue is unknown, as development work on the 3250 and 3450-foot levels has proved the ore bodies to be larger and more extensive than on any of the upper levels, and the ore on the 3450-foot level was found to be richer in metal content than on any of the levels above it. During the year the 3250 and 3450-foot levels were opened to the full length of the ore, and work was started on extending the shaft to the 3650-foot level. The mine and mill plants were greatly enlarged, and the mill was improved to conform with recent developments in flotation practice. In addition to the ore mined under company operation, a large tonnage was extracted from the upper levels by a number of lessees; the most important of these is the Sheridan Lease, which employs over 100 men.

The Page mine of the Federal Mining & Smelting Co., in Government Gulch near Kellogg, was operated throughout 1929 on a profitable basis; a large amount of development work was performed; and the ore bodies were fully opened on the 1200-foot level, at which point they proved to be of greater extent and higher grade than on any of the upper levels. New mine and camp buildings were erected, a new 2550-cubic-foot compressor and a large amount of new mining equipment installed, and the mill was enlarged and improved. The success of this operation can be accredited entirely to flotation, because with the old milling methods it was impossible to mine and mill such low-grade ore at a profit.

The Sullivan Mining Co., which in 1927 suspended production at its Star mine pending completion of its new electrolytic zinc plant at Kellogg, resumed production in February, 1929, in addition to maintaining underground development work throughout the year. The 4000-foot level of the Star mine is connected with the 2000-foot level of the Hecla mine by the Star crosscut, which is 8900 feet long. This crosscut made a blind connection with the Star vein at a point 2800 feet below the Star tunnel. A vertical operating raise and a vertical shaft, which were driven to connect the crosscut and the upper Star tunnel, were completed during the year. The zinc plant, which was fully described, with flow sheet and illustrations, in the 1927 Report of the Mining Industry of Idaho, was completed and formally placed in operation in June, 1928, and the first metallic zinc was produced on August 3, 1928. The metal produced by this plant is of exceptionally high grade and is finding a ready market at an increase in price over that of any other zinc metal. During the year this plant was further enlarged and improved; many new homes for the employees were constructed; and a cadmium recovery unit, which represented a large expenditure, was added. The zinc plant of the Sullivan Mining Co. now constitutes one of the largest and most important enterprises in the Pacific Northwest, and one which assures the perpetuation of the mining industry in Shoshone County.

One of the largest expenditures made by any company in the Coeur d'Alene district during the year for mine development, new mine plant installation, and mill improvements was that of the Sunshine Mining Co. The principal haulage level (No. 5) was entirely rebuilt; the inclined shaft was sunk to the 1300-foot level, and raised to the No. 5 tunnel level. This improvement obviates the transfer on No. 5 shaft level and the use of the vertical shaft, and permits direct operation throughout the mine. A large boarding house was erected, an additional compressor and much new mining equipment installed, and the mill was rebuilt and enlarged. In addition to the foregoing, the company maintained throughout the year an active development campaign, which was successful in greatly increasing the known ore reserves, particularly on the lower levels, where the ore proved to be of higher grade and greater extent.

One of the large and active development campaigns conducted during the year, including mine improvement, was that of the Dayrock Mining Co., formerly Strattons Mines Co., at the Stratton mine. A large amount of development work was performed on the 200, 300, and 400-foot levels; new mine buildings were erected; and a new compressor was installed. The development work greatly increased the known ore reserves, and production was maintained throughout the year. This mine is fast developing into one of the important producers of the Coeur d'Alene district, and entered the ranks of dividend-paying mines during 1929.

In addition to maintaining production throughout the year, the Golconda Lead Mines greatly enlarged and improved its surface plant and mine. The new main shaft was raised from the 1400-foot level to the 1000-foot level, where it connects with the haulage tunnel. The station and skip pockets were cut and the necessary connections driven preparatory to installing a large new hoist. The company also maintained development work on the 1200 and 1400-foot levels, where the ore was proved to be of greater extent than on the 1000-foot levels. These improvements involved the expenditure of a large amount of money, which was obtained from mine profits. In addition to this, the company began the payment of dividends, and two dividends were declared during the year.

One of the principal mines which was placed on a profitable operating basis during 1929 was the Sherman Lead Co., whose property is on Canyon Creek east of the Tamarack & Custer. Its mine is connected with the No. 5 tunnel of the Hercules mine through the Humming Bird workings; its mine plant is leased from the Hercules Mining Co.; and the ore is taken to the Hercules custom mill at Wallace for reduction. In addition to maintaining production throughout the greater part of the year, a large amount of development work was performed. This work resulted in greatly increasing the known ore reserves of the mine.

The Jack Waite Consolidated Mining Co. greatly enlarged its mine plant, enlarged and improved its mill, and produced and marketed a large tonnage of ore and concentrate, in addition to maintaining an active mine development campaign, which consisted principally of extending the No. 2 or lower tunnel. This work was successful in opening one of the largest and most important ore bodies disclosed in the Coeur d'Alene district for many years.

At the Galena mine of the Callahan Zinc-Lead Co. an extensive development campaign was maintained throughout the year and the mill operated on a one-shift basis on ore extracted in development work. The principal work consisted of crosscutting to and drifting on the 600-foot level on the new south vein, which was discovered by diamond drilling in 1928; and a large amount of drifting and raising was performed on the 600 and 800-foot levels in the former workings. The work resulted in exposing such a substantial amount of new ore that this company is fast becoming re-established as one of the principal producing mines of the Coeur d'Alene district. As the Galena is located in the so-called "dry belt", or south side of the district, the success it is attaining has been an important factor in stimulating development throughout this area.

At the Sidney mine, operated by the Sidney Leasing Co., an additional compressor was installed; the main shaft extended 250 feet; a large amount of development work performed; and capacity production maintained throughout the year. The new development work was successful in opening up an immense tonnage of new ore, particularly on the lower shaft level, where the lead content greatly exceeded that in the upper levels. The dividends paid by both the Sidney Mining Co., which owns the property, and the Sidney Leasing Co., which operates it, were increased over those of the previous year. The fact that this mine, located on Pine Creek, is being operated at a substantial profit and its ore improving in grade and extent as depth is gained, is significant in proving that this section of the Coeur d'Alene district is not without merit, and the success of this enterprise is greatly stimulating mine development in this part of the district.

The Humming Bird Mining Co. was active during the early part of the year, and produced a substantial tonnage of ore, which was transported to the Hercules custom mill at Wallace for treatment.

The expenditure made during the year by the Constitution Mining & Milling Co., whose mine is on Pine Creek, was one of the largest in the Coeur d'Alene district. The station, ore pockets, and connections for the new shaft were completed; the shaft was extended from the 400-foot level to the 600-foot level; and a large amount of development work was performed on the 400-foot level. This work resulted in greatly increasing the ore reserves of the mine. In addition to the foregoing, the installation of a large new electically-driven hoist was completed, new compressor installed, and the mill remodeled. The activities of this company and the increase of the ore bodies as depth is gained are adding greatly to the stimulus of mining in the Pine Creek section.

The Gold Hunter Mines, Inc., at Mullan, one of the oldest mines in Shoshone County in point of continuous production, maintained capacity output and an extensive development campaign during nine months of the year. The destruction by fire of the surface plant in January caused a suspension of operations. New buildings were erected, new compressor and equipment installed, and operations resumed in March. The development work greatly increased the ore reserves and added much to the future life of the mine.

The Tamarack & Custer Consolidated Mining Co., which operates one of the substantial producing mines of the Coeur d'Alene district, maintained a steady output and an extensive mine development campaign during 10 months of the year. In September operations were suspended and all mine machinery and equipment moved from the No. 6 tunnel on Nine Mile Creek and reinstalled at No. 7 tunnel on Canyon Creek. The mine camp at No. 6 tunnel was abandoned and all operations were transferred to No. 7 tunnel, which was converted into the principal outlet in 1928. From it the ore is transported in railroad cars to the Hercules custom mill at Wallace, which treats the entire output from this mine.

The Douglas Mining Co., Ltd., whose property is located on Pine Creek near the Constitution, maintained an active development campaign throughout the year and shipped a substantial tonnage of crude ore to the Sweeny mill of the Bunker Hill & Sullivan M. & C. Co. for experimental purposes. The development work consisted principally of extending the main shaft from the 170-foot level to the 330-foot level, and drifting on the 300-foot and intermediate levels of the shaft. The new ore developed by this work was one of the most important disclosures in the Coeur d'Alene district during the year.

The Atlas Mining Co. was active throughout the year in extending the Carbonate Hill drift to a distance of 3000 feet from its principal crosscut, which is 7000 feet long. This work was successful in encountering the ore zone which had been proved in the upper workings. The new ore was considered one of the substantial developments of the district for the year.

In the early part of the year machinery and equipment were removed from No. 2 tunnel to No. 3 tunnel of the Little Pittsburg mine on Pine Creek; new buildings were erected; and an extensive mine development campaign was commenced. This work resulted in proving a substantial tonnage of commercial ore. In November this enterprise was incorporated as the Pine Creek Lead-Zinc Mining Co. and work started on the construction of a new 250-ton flotation concentrator. The activities of this company and its new ore exposures were among the principal events in Shoshone County during the year.

The Cedar Creek Mining & Development Co., Ltd., completed adjustments on its new mill and commenced milling operations in May. Its entire mine surface plant was destroyed by fire in August. New buildings were erected; a new compressor was installed; and operations were resumed in October. A limited amount of development work was performed in the mine and a small tonnage of concentrates produced and shipped.

The Coeur d'Alene Mines Corporation, a new organization at the Mineral Point mine near Osburn, erected new mine and camp buildings, constructed a power line, and installed a compressor and complete mining equipment during the early part of the year, after which an active development campaign was maintained without interruption.

In May fire destroyed the hoist and compressor of the Dickens Consolidated Mines Co., after which new buildings were erected, machinery rebuilt, a small amount of mine development work performed, and the mill operated for a few days. Five one-cent stock assessments were levied during the year, and all operations were suspended in December.

The Delaware Mines Corporation at its Red Monarch tunnel installed a two-drill compressor, and maintained active work throughout the year in the extension of this tunnel.

The Evolution Mining Co. extended its inclined shaft a distance of 500 feet, installed new pumps and much new mining equipment, and performed a large amount of drifting on the 200 and 300-foot levels of the shaft.

The General Mines Corporation at its property on Pine Creek erected new mine buildings, installed a small compressor and complete mining equipment, and late in the year commenced development operations.

The Inspiration Lead Co., Inc., a new organization on the Moe property near Mullan, erected new mine buildings and new gallows frame, installed a 550-cubic-foot compressor, hoist, and complete mining equipment, and placed the mine in condition to commence sinking a 400-foot shaft; the first part of this work consisted in raising the shaft 80 feet from the lower tunnel. In addition to the foregoing, a substantial amount of development work was performed in drifting and crosscutting in this tunnel.

The Keystone Mining Co., a reorganization of the Florence Mining & Milling Co., Ltd., on Big Creek, erected a new building and installed a new compressor and additional mining equipment.

The Lookout Mountain Mining & Milling Co. installed a new 12x12 compressor and maintained an extensive development campaign throughout the year, part of which consisted in extending for an additional 100 feet the shaft which is in the lower tunnel.

The New Jersey Consolidated Mines Co. at the King of Pine Creek mine erected four new mine buildings and a head-frame, installed two large electrically-driven compressors and electrically-driven hoist, and maintained active work throughout the greater part of the year. This consisted of sinking a vertical shaft 220 feet deep and performing a large amount of crosscutting and drifting, which resulted in proving a substantial increase in ore mineralization as depth was obtained on the vein. After this work was completed, sinking of the shaft an additional 200 feet was started. This company's expenditures were among the largest in the Pine Creek section during 1929.

The Savage Mining Co., a new organization on Nine Mile Creek near the Dayrock, erected new mine buildings and installed a power line and complete mining equipment in January, in addition to contracting the driving of a 1000-foot crosscut. In June fire destroyed the entire surface plant, which was immediately reconstructed, and operations were continued without interruption.

The Stratton Silver Summit, Inc., installed electrically-driven compressor and complete mining equipment and maintained operations without interruption throughout the year. This work consisted in extending its projected 4000-foot crosscut a distance of 2640 feet during the year to a total distance of 3040 feet. This company is one of the important new enterprises of the Coeur d'Alene district and its expenditure was one of the largest.

The Wolverine Mining Co., whose property adjoins the Alhambra on Big Creek, installed a new electrically-driven hoist and compressor, extended its shaft 150 feet to the 500-foot level, and performed a large amount of drifting on this level, which resulted in opening a substantial showing of new ore.

The Western Mines, Ltd., which is operating under lease and option the property owned by the Bell of the West Mining Co. on Nine Mile Creek, erected new camp buildings and installed a new compressor and complete mining equipment.

One of the principal new development enterprises to start in the Coeur d'Alene district during the year was the Ambergris Consolidated Mining Co., a consolidation of the Ambergris Mines Co., the Guelph Mining & Milling Co., Ltd., and the Honolulu Mining Co., Ltd., which included a right-of-way through the Hercules No. 5 tunnel. After the consolidation was completed, an active development campaign was maintained throughout the year.

Companies which employed more than five men and which conducted development work throughout the year were as follows:

The Alameda Mining Co., whose property adjoins the Success mine on Nine Mile Creek, further explored the vein by drifts and raises. The Ajax Mining Co. performed a large amount of development work on the 400-foot level of its shaft during the early part of the year, after which these operations were suspended and all development work transferred to the Bixby tunnel level. The Bobby Anderson Group Mining Co. employed 10 men and performed over 1200 feet of lateral development work. The Blue Eagle Mining Co., whose property is on Pine Creek, further extended its principal tunnel. The Bismarck Mining Co. extended its crosscut 300 feet to a total distance of 1400 feet. The Consolidated Independent Calumet Mining Co. further explored its property through the lower tunnel of the National Copper Mining Co., Ltd. The Coeur d'Alene Mining & Smelting Co. extended its principal tunnel over 500 feet. The Hypotheek Mining & Milling Co. maintained an extensive development campaign on the 700 and 900-foot levels. The Hecla Extension Mining Co. performed a large amount of development work on the 600-foot level; part of this was diamond drilling. The Independence Lead Mines Co. extensively developed the Independence vein near the east end-line of the Morning mine; press reports were to the effect that this work encountered a good showing of lead-silver ore. The Little Sunshine Mining Co. further extended its principal tunnel. The Mutual Mines Development Co. installed a new hoist and pumps and maintained an extensive development campaign, part of which consisted of sinking a new shaft. The North Star Mining & Development Co. extended its principal tunnel 400 feet. The St. Joe Lead and Silver Mines Co. extended its principal tunnel 500 feet under contract. The Teddy Mining & Milling Co., Ltd., extended its principal tunnel 600 feet under contract.

Teton County

The most active enterprise in this county during 1929 was the Grand Teton Oil Co., a new organization which acquired a large part of the holdings of the Tieton Valley Land & Leasing Co. and its equipment. A large additional acreage was obtained and complete new standard well-drilling equipment was installed. Both rigs were placed on new locations, known as Blevins No. 1 well and Bevan No. 1 well; and drilling was maintained throughout the greater part of the year. The two wells reached depths of 1800 feet and 1376 feet, respectively.

Valley County

Throughout the year the Bunker Hill & Sullivan M. & C. Co., at the Hall Interstate and Lost Pilgrim mines, continued to be one of the most outstanding development and new construction enterprises in central Idaho. Construction on its new mill, which was started in 1927, was fully completed, and it was placed in operation early in 1929. The ore-bins, crushing machinery, and building are sufficient for a daily capacity of 300 tons, although initial flotation equipment was installed for a daily capacity of 100 tons only. In addition to completing the mill, the company installed a large pipe-line and a new hydroelectric power plant. Additional ore-bins were constructed at the mill; the 700-foot raise connecting the Independence tunnel and the Anderson tunnel was entirely rebuilt into a three-compartment operating raise; and the mine was placed in condition for uninterrupted production. More than 10,000 feet of entries have been driven on the Hall Interstate-Lost Pilgrim vein, and the ore reserves have been proved to a vertical depth of over 1000 feet. As the Hall Interstate-Lost Pilgrim vein occurs in granite or allied rocks, this enterprise is of value to the State in stimulating prospecting and

encouraging the investment of capital for the development of the many similar occurrences which are found throughout the granite area of central Idaho. In past years, this area has been looked upon with disfavor, but this demonstration proves the potentialities of these veins.

One of the most important enterprises bearing on the future of south-central Idaho is the mine plant installed, buildings erected, new tunnels started, and road construction performed during 1929 by Fred W. Bradley, president of the Bunker Hill & Sullivan M. & C. Co., operating as the Yellow Pine Co. near Yellow Pine. During the year construction on a 12-mile highway from Yellow Pine to Meadow Creek was completed; a steam-driven compressor and complete mining equipment were installed at the Meadow Creek tunnel, and a small gas-driven compressor and complete mining equipment were installed at the Monday tunnel, both tunnels being on the Meadow Creek vein. The Monday tunnel is a projected new tunnel 8000 feet north of and 450 feet lower than the Meadow Creek tunnel. A large modern boarding and bunk house was constructed at the Monday tunnel, and a number of new buildings at the Meadow Creek tunnel. In addition to maintaining development work at the Meadow Creek tunnel, a large part of which consisted of diamond drilling, the company started work on the Monday tunnel and a projected new 10,000-foot tunnel to open the Cinnabar group, the latter being opposite the Monday tunnel and at the same elevation. The road work, new plant installation, new construction, and mine developments conducted by this company were among the largest in south-central Idaho, and the activities of this company were instrumental in attracting a large amount of attention to this part of the State.

The Big Creek Gold Mines, Inc., is a new organization operating under lease and option the Janson group on Clover Creek, which is reached by a 16-mile trail from Edwardsburg. This company installed a small portable sawmill, pipe-line, and water-driven compressor, and constructed five new mine and camp buildings.

The Amalgamated Red Metals Mines Co. is a new organization holding the Ellison group, which is located near the divide between Profile and Big Creeks and is reached by a five-mile trail from the new Yellow Pine-Meadow Creek highway. This company installed a sawmill, small hydroelectric power plant, compressor, and 25-ton mill. New mill, mine, and camp buildings were erected; and a small amount of development work was performed. All of the equipment was transported to the property on horseback.

The Keystone Gold Mines, Inc., a new organization at the Werdenhoff mine on Big Creek, maintained active development work throughout the year.

In the Thunder Mountain district, McRae and Davis maintained active work at the Sunnyside mine throughout the summer months. In addition to the foregoing, this district received a large amount of investigation during the year from those seeking new mining enterprises.

Washington County

An event of importance to this county and to southern Idaho was the entry of the Idaho Mineral Mining Co.—a Nevada organization—into the Mineral district. Late in the year this company acquired practically all of the principal properties adjacent to the old town of Mineral and consisting of two groups on each side of Dennett Creek; a small gas-driven compressor and complete mining equipment were installed, and active development work was commenced.

The Crystal Dome Oil & Gas Co., a new organization whose property lies between the towns of Payette and Weiser, erected an 84-foot derrick, installed a standard steam-driven drilling rig, and commenced operations in sinking a 12-inch well. At the close of the year the well had reached a depth of 950 feet.

In the Cuddy Mountain district the Cuddy Mountain Gold Mining Co. was active throughout the summer months; and G. T. Hamill produced and shipped a carload of high-grade silver-lead ore. Press reports were to the effect that a new discovery of lead-silver ore was made in this district during the year.

MINE RESCUE AND FIRST AID IN THE COEUR D'ALENE DISTRICT

Early in the year 1923, two underground fires occurred in the mines of the Coeur d'Alene district. The first of these was in the Morning mine of the Federal Mining & Smelting Co. at Mullan, and the second in the Hercules mine of the Hercules Mining Co. at Burke. Shortly after the Hercules fire the Coeur d'Alene mine operators held a general meeting for the purpose of discussing underground fires and the prevention of them. The outcome of this conference was the establishing of a central mine-rescue station at Wallace.

At the time of these fires Karl T. Sparks was in charge of the U. S. Bureau of Mines Rescue Car No. 9, which was stationed at Butte, Montana. This car was ordered to the Coeur d'Alene district to assist in extinguishing the fires, and the commendable qualities, efficiency, and resourcefulness displayed by Mr. Sparks on these occasions resulted in his selection as director of the Central Mine-Rescue Station of the Coeur d'Alene Mine Operators' Association.

The first task which faced Mr. Sparks was the selection and installation of the proper equipment. A mine-rescue car was purchased from the U. S. Bureau of Mines, and the rescue and fire-fighting equipment assembled therein make it one of the most up-to-date installations in the United States. The car is stationed at Wallace, and a special engine is always available to take it quickly to the scene of a mine fire. In addition to equipping the rescue car, Mr. Sparks installed completely equipped stations at the mines of the Hercules Mining Co. and the Hecla Mining Co. at Burke, the Bunker Hill & Sullivan M. & C. Co. at Kellogg, the Tamarack & Custer Consolidated Mining Co. at Gem, and the Morning mine of the Federal Mining & Smelting Co. at Mullan.

After the rescue stations were established, it then became Mr. Sparks's duty to supervise them, direct underground fire-fighting operations, and train first-aid and "helmet" crews at each of the above mines. This training continued without interruption, and by 1929 there were more than 300 efficiently trained men with serviceable equipment in readiness to meet any emergency in the mines of the district.

This work kept Mr. Sparks in close contact with the management and men of all the mines, and by his unfailing devotion, efficiency, and courage he won and held their highest respect. His untimely death on October 2, 1929, was greatly regretted throughout the entire district.

After the death of Mr. Sparks, J. M. Harrington, mine-rescue engineer of the U. S. Bureau of Mines with headquarters at Berkeley, California, was selected, on October 7, to fill the vacancy. On December 31 Mr. Harrington was called to Burke to take charge of an underground fire in the Hecla mine. When returning to Wallace his automobile collided with a motor stagecoach, and he received injuries of the head which resulted in his death on January 16, 1930. During Mr. Harrington's short service in the Coeur d'Alene district, he displayed decided evidence of complete qualifications for the important work which he had undertaken, and his sudden death was a distinct shock to his employers and his many new friends.

ACCIDENTS

The minor accidents listed in the accompanying table, pages 54 and 55, "Classification of Accidents", are taken from the records of the Industrial Accident Board and arranged to comply more nearly with the classifications made by the U. S. Bureau of Mines. The table is somewhat misleading, as a very large proportion of the accidents listed "Time Lost Over 14 Days" did not greatly exceed this number of days, and the majority of those listed "One to 14 Days" did not exceed seven days. All accidents that did not cause a loss of time of more than seven days should not have been included, as no compensation is paid. However, as the U. S. Bureau of Mines and many State officials are including these minor injuries in their reports, they are therefore included in the accompanying table as a matter of uniformity.

A comparison of the total accidents in 1929 with those in 1928 shows an increase of 7 in the number of fatal accidents and a decrease of 122 in the number of minor accidents. A comparison of the total number of men employed with the total number of accidents shows the very low accident rate of 0.45 accidents per 1000 man-shifts. This low rate can be attributed to a great extent to the safety organizations, to the first-aid training given the men by all the larger mining companies, and to the sustained effort and interest maintained in safety work by those in charge, further augmented by close supervision. The results of this work are particularly apparent in the small number of fatal accidents in the large mines of Shoshone County; these mines employ over 80 per cent of the total number of men working in the mines of the State, yet out of a total of 20 fatal accidents during the year only 7 occurred in them.

Out of a total of 1005 accidents during the year, 20 were fatal. Nine of these fatalities, exclusive of those caused by explosives, could have been prevented, had the victims been more careful; company rsponsibility can not be placed for any of them; and the others were unavoidable. Out of the 985 minor accidents listed, 490 did not compel a loss of time to exceed 14 days; 495 incapacitated the injured person for more than 14 days, and 30 of these resulted in a permanent injury.

The loss of both legs or arms, one leg and one arm, total loss of eyesight, paralysis or other condition permanently incapacitating a workman from doing any work of a gainful occupation, is classified as "Permanent Total Disability." The loss of one foot, leg, hand, eye, one or more fingers, one or more toes, any dislocation where ligaments are severed, or other injury known in surgery to be a permanent partial disability, is classified as "Permanent Partial Disability."

Notes on Fatal Accidents

Feb. 27, Cuprum Mines Co.; Adams County. W. J. Reinhart, age 36, single, miner. Deceased, with Carl John Renstrom, was engaged in driving a tunnel. When they failed to return to the boarding house in the evening, their absence was investigated. Both men were found dead in the face of the tunnel, having been killed by the blasting of a round of holes. Accident was presumably due to a premature explosion or using fuse which was too short.

Feb. 27, Cuprum Mines Co.; Adams County. Carl John Renstrom, age 42, single, miner. Deceased, with W. J. Reinhart, was engaged in driving a tunnel. When they failed to return to the boarding house in the evening, their absence was investigated. Both men were found dead in the face of the tunnel, having been killed by the blasting of a round of holes. Accident was presumably due to a premature explosion or using fuse which was too short.

Apr. 23, ...; Idaho County. Henry Cornwell, a prospector, was killed by rock slide on surface following a blast. (No report; information obtained from the press.)

May 3, Federal Mining & Smelting Co.; Shoshone County. Thomas Brownlow, age 32, married, motorman. Deceased, an experienced operator who had been working at this particular job for the past three years, had removed from the chute two 10-car train-loads and an additional seven car-loads of muck toward the third train-load of ore when he found the chute was hung up. He called the attention of his helper to the fact, and had just finished

remarking about the circumstance when the wet ore suddenly freed itself and came down the chute with a surge which forced the supporting cleats and took the lower muck boards off the chute. He was buried by the wet muck flowing into the drift, where he fell alongside the car he was preparing to load. There were about 300 tons of muck in the chute, which had become saturated with surface water coming into the mine for a few days prior to the accident. The column of muck was estimated to have dropped about 40 feet in the chute when it came free.

May 3, Gold Hunter Mines, Inc.; Shoshone County. Melvin H. Noll, age 22, single, shoveler. Deceased was tapping muck pile from floor below, then went to top of muck pile on floor above with bar. He misjudged place where hole in floor was, and when he struck bar in muck pile it gave way and carried him down with it, crushing and smothering him to death.

May 21, Bunker Hill & Sullivan M. & C. Co.; Shoshone County. Robert Mills, age 36, sample-mill foreman. Deceased was engaged in dumping a car of ore. These cars dump by lifting a pawl; occasionally the doors stick, and in such an event it is customary to strike the side of the car with a bar. No one witnessed this accident, but evidently deceased struck the rachet at the moment the door opened. The wound on head of deceased indicated that the rachet threw the bar against the side of his head, instantly killing him, and he fell into the ore-bin.

July 1, Hecla Mining Co.; Shoshone County. Ellis B. Griffin, age 59, married, laborer. Deceased was snubbing a rail in the surface ore-bin chute. The lip or cover of this chute had not been closed, and a skip-load of ore which should have been dumped into the bin, had the chute been closed, was carried down the chute in which deceased was working. He was instantly killed.

July 1, Anaconda Copper Mining Co.; Caribou County. Claud Ray Owens, age 34, married, miner. Deceased, with three others, had finished lighting a round of 22 holes and was about to leave the working face, when one of the holes exploded and killed him instantly.

Aug. 20, Cedar Creek Mining & Development Co., Ltd.; Shoshone County. Russell Lee, age 33, married, mine foreman. Death was evidently caused by monoxide gas derived from a surface fire which destroyed the surface plant at No. 3 tunnel, the portals of No. 2 and No. 3 tunnels, and a large amount of timber on the surface nearby. The destruction of the timbers at the portal of No. 2 tunnel caused it to cave in, thus cutting off all ventilation into it and No. 3 tunnel. It was presumed that the men should have known this fact, as they attempted to enter No. 2 tunnel and, on being unable to do so, returned down the hill and entered the mine through No. 3 tunnel, in which is a 350-ft. inclined shaft. The bodies were found on the 200-ft. level of the shaft by a rescuing crew wearing oxygen helmets, and it was evident that death had been caused by asphyxiation.

Aug. 20, Cedar Creek Mining & Development Co., Ltd.; Shoshone County. H. L. Matthews, age 21, single, timber helper. Death was evidently caused by monoxide gas derived from a surface fire which destroyed the surface plant at No. 3 tunnel, the portals of No. 2 and No. 3 tunnels, and a large amount of timber on the surface nearby. The destruction of the timbers at the portal of No. 2 tunnel caused it to cave in, thus cutting off all ventilation into it and No. 3 tunnel. It was presumed that the men should have known this fact, as they attempted to enter No. 2 tunnel and, on being unable to do so, returned down the hill, accompanied by the foreman, and entered the mine through No. 3 tunnel, in which is a 350-ft. inclined shaft. The bodies were found on the 200-ft. level of the shaft by a rescuing crew wearing oxygen helmets, and it was evident that death had been caused by asphyxiation.

Aug. 20, Cedar Creek Mining & Development Co., Ltd.; Shoshone County. W. N. Welch, age 41, single, miner. Death was evidently caused by monoxide gas derived from a surface fire which destroyed the surface plant at No. 3 tunnel, the portals of No. 2 and No. 3 tunnels, and a large amount of timber on the surface nearby. The destruction of the timbers at the portal of No. 2 tunnel caused it to cave in, thus cutting off all ventilation into it and No. 3

CLASSIFICATION OF ACCIDENTS

MINE	Killed	Seriously Injured Time Lost More Than 14 Days		Slightly Injured	
		Permanent total disability	Permanent partial disability	Time lost over 14 days	Time lost 1 to 14 days
UNDERGROUND					
1. Fall of rock or ore from roof or wall	5		6	106	64
2. Rock or ore while loading at working face or chute	2			28	44
3. Timber			3	26	29
4. Explosives	4		4	2	2
5. Haulage, Cars or Motors			1	36	39
6. Persons falling down chute, winze, raise or stope			1	20	18
7. Drilling (by machine or hand drills)				23	12
8. Hand tools				28	33
9. Machinery (other than motors or drills)			1	8	6
10. Flying or falling objects			3	23	67
11. Fall of persons				29	24
12. Lifting				7	10
13. Nails and splinters				11	24
14. Other causes	4		2		3
Total	15		19	349	375

MILL	Killed	Seriously Injured Time Lost More Than 14 Days		Slightly Injured	
		Permanent total disability	Permanent partial disability	Time lost over 14 days	Time lost 1 to 14 days
MILLING ACCIDENTS					
1. Haulage (cars and locomotives)				3	
2. Railway cars or motors					
3. Crushers, rolls or stamps					
4. Tables, jigs, etc					
5. Other machinery			1	4	5
6. Falls of persons				5	4
7. Suffocation in ore bins	1				
8. Falling objects (rocks, timbers)				8	6
9. Scalding (steam, water or acid)					
10. Lifting					2
11. Hand tools, axes, bars, etc					4
12. Nails, splinters, etc				1	4
13. Electricity					1
14. Other causes					
Total	1		1	21	26

SHAFT ACCIDENTS					
15. Falling down shaft					
16. Objects falling down shaft				2	
17. Breaking of cables					
18. Overwinding					
19. Cage, skip, or bucket	1		1	3	2
20. Other causes				1	4
Total	1		1	6	6
SURFACE ACCIDENTS Yards, Shops, and Construction					
21. Mine cars or mine locomotives, gravity or aerial trams			2	7	6
22. Flying and falling objects			1	9	19
23. Lifting				3	5
24. Falls of persons			1	15	8
25. Nails and splinters				3	3
26. Hand tools, axes, bars, etc.				10	6
27. Falls or run of ore in or from bin	2				
28. Machinery			3	3	2
29. Other causes				3	3
Total	2		7	53	52
Grand Total	18		27	408	433

SMELTER ACCIDENTS					
15. Haulage (cars, motors, etc.)	1				3
16. Machinery				2	1
17. Cranes					1
18. Lead colic					
19. Falls of persons				5	4
20. Flying or falling objects (rocks, timbers, etc.)				11	7
21. Hand tools, axes, bars, etc.				1	1
22. Burns from matte, slag or molten metal (pouring or spilling)			2	2	1
23. Other causes				4	4
Total	1		2	25	22
AUXILIARY WORKS ACCIDENTS Placers, Tramways and Dredges					
24. Falls of persons				1	2
25. Flying and falling objects				5	2
26. Nails and splinters					1
27. Hand tools, axes, bars etc.					1
28. Lifting				2	1
29. Machinery				2	2
30. Handling hot materials					
31. Other causes				1	
Total				11	9
Grand Total	2		3	57	57

tunnel. It was presumed that the men should have known this fact, as they attempted to enter No. 2 tunnel and, on being unable to do so, returned down the hill, accompanied by the foreman, and entered the mine through No. 3 tunnel, in which is a 350-ft. inclined shaft. The bodies were found on the 200-ft. level of the shaft by a rescuing crew wearing oxygen helmets, and it was evident that death had been caused by asphyxiation.

Aug. 20, Bunker Hill & Sullivan M. & C. Co.; Shoshone County. Harold L. Durban, age 19, single, oiler in mill. Deceased went into an ore-bin, evidently to bar down some loose ore which had hung up. While he was standing on the ore, it gave way and he was caught in the vortex and crushed to death, although not smothered.

Aug. 27, Pine Creek Consolidated Mining Co.; Shoshone County. Hans Helgeson, age 55, single, miner. Deceased, with two others, was engaged in clearing rock from an old chute. Part of the rock had been withdrawn and the remainder had hung up in the chute; the men had attempted to loosen it with bars, but were unable to do so. Deceased decided that this operation was too slow a process and, against the advice of his associates, climbed up into the chute to dislodge the rock. While he was climbing up, the rock became dislodged, killing him instantly.

Sept. 2, Hecla Mining Co.; Shoshone County. Lawrence Webb, age 24, single, miner. Timbermen were putting in set of timbers in the face of a stope where deceased was working as miner. The shift boss had instructed deceased that morning to do no drilling until timbers were in, or until he came around again and further advised him, and sent him to the other end of the stope to shovel. During absence of shift boss the nipper delivered a jackhammer drill and told deceased he wanted to return it by noon. Thereupon deceased, contrary to his shift boss's orders, took the drill to his working face and started drilling. Although the back had been barred down a slab of ore about 30 inches long, 10 inches wide and 3 or 4 inches thick fell from the back and struck deceased on his back as he was bending over, killing him instantly.

Oct. 4, Mackay Metals; Custer County. Mike Smith Krekovich, age 60, single, lessee. While dumping a car of ore into the surface bin, deceased in some unknown manner fell into the bin. He dropped about 25 feet and was instantly killed.

Oct. 26, Dayrock Mining Co.; Shoshone County. Leslie E. Ellis, age 28, married, mining engineer. Deceased was getting onto the cage at the 200-ft. level, accompanied by the cager. Confusion of signals caused hoistman to raise cage at that instant, catching deceased between cage and wallplate at top of station; he then fell back to station floor and down shaft 250 feet. He had been instantly killed when crushed between cage and wallplate.

Oct. 30, Livingston Mines Corporation; Custer County. Louis Roche, age 63, single, miner. Deceased was shoveling near the top of a stope when a large amount of rock fell from the face and struck him, inflicting injuries from which he died a few hours later.

Nov. 19, Gust Erickson & Co., lessee, Morning mine; Shoshone County. Wm. B. Farmer, age 48, married, miner. Deceased and partner had completed a "false set" of timbers about 4 feet wide where they were drifting forward under an old filled raise on the fifth floor above the intermediate level over No. 5 tunnel of the Morning mine. The "false cap" had been placed horizontally and wedged into place at about 2½ feet ahead of the last regular set of timbers and enough below the elevation of the regular caps to be out of the way when putting in a regular 5-ft. set. A lagging was nailed horizontally to the last two regular set posts and a floor extended for overhead protection onto the "false cap." While the partner went back in the stope to procure more lagging for the purpose of covering an open space between the "false set" and the top of the muck pile ahead (which muck the two men were preparing to remove), the ground above caved and knocked the "false set" out. Deceased, standing under it, received a skull fracture and broken neck.

Nov. 21, Talache Mines, Inc.; Boise County. Arthur E. Johnson, age 32, married, miner. Deceased was working with his partner, drawing rock from the 707 chute on the 700-ft. level. The chute was hung up, and they were taking turns going up above the bulkhead at top of station and pounding on chute to loosen the muck so that it could be drawn out. There was a break in the chute two or three sets above the bulkhead. Deceased had just loosened the muck in the chute and called down to his partner and another employee that he was going up to the 600-ft. level and coming down the main shaft to the 700-ft. level. Deceased was not seen or heard from before quitting time, and his partner thought he had gone to the surface, but upon reaching the surface and finding that deceased had not come up out of the mine he immediately instigated a search. Deceased was found in the 707 raise about halfway between the 700 and 600-ft. levels. Evidently a divider in the 707 raise had broken about 50 feet above the 700-ft. level, and it is thought that when he was going up the ladder deceased's weight was sufficient to cause it to come loose, catching him and wedging his head and shoulders between the divider and the ladder.

Dec. 13, Cedar Creek Mining & Development Co.; Shoshone County. George E. Reese, age 56, single, mill foreman. Deceased had told a man working under him in the mill that he was going into No. 3 tunnel and down the shaft to observe conditions there. Nobody was in the mine at the time he entered. His associate, on completing his shift and returning to the bunkhouse, found that deceased was absent and aroused the other men, who entered the mine and found the body in the No. 2 level of the shaft. Deceased had evidently been asphyxiated by powder fumes which had not entirely cleared from the shaft at the time he entered.

MEN EMPLOYED AND WAGES

The year closed with practically all the producing mines in the State in operation, and maintaining a payroll which equalled that of previous years. As a whole, 1929, from a labor standpoint, was one of the best years ever experienced. There was a surplus of labor throughout the year and the turnover was exceedingly small, thus assuring the companies a constant working force without the necessity of breaking in new men. However, competent and experienced miners and timbermen were continually in demand, and some of the large companies had a little difficulty in meeting their requirements.

It is practically impossible to obtain complete and accurate statistics of the number of men employed in the mines; a great many are employed by prospectors and small companies that do not report to the inspector of mines and that do not maintain continuous work throughout the year; and records furnished by the companies reporting vary as to the number of days. The average payroll reported was 5000, and 1000 has been added as an estimate to cover lessees, prospectors and small companies that did not report, thus giving a total of 6000 for the year, which is known to be a conservative estimate.

The table printed below gives the different wage scales that were in force in the State during 1929. Column No. 1 gives the average wage throughout the State for the year, and column No. 2 gives the wage scale in effect in the Coeur d'Alene district from April 1, 1929, to December 31, 1929.

Under an agreement adopted on November 16, 1925, the wages in the Coeur d'Alene district were to be adjusted each month in accordance with a bonus rate based on the selling price of lead in New York. This scale was based on a wage for miners of $3.75 per day when lead is selling under 5½c per pound; the bonus to be added was as follows:

When the price of lead is 5c	and under 6c	$0.25 per day
When the price of lead is 6c	and under 6½c	.50 per day
When the price of lead is 6½c	and under 7c	.75 per day
When the price of lead is 7c	and under 7½c	1.00 per day
When the price of lead is 7½c	and under 8c	1.25 per day
When the price of lead is 8c	and under 8½c	1.50 per day
When the price of lead is 8½c	and under 9c	1.75 per day
When the price of lead is 9c	and under 9½c	2.00 per day
When the price of lead is 9½c	and under 10c	2.25 per day
When the price of lead is 10c	and under 10½c	2.50 per day
When the price of lead is 10½c	and under 11c	2.75 per day

After March 1, 1927, the price of lead declined so rapidly that if the bonus scale had been adhered to the wages would have been cut to a point entirely out of proportion to wages in other parts of the State and too low under existing high living costs. So the signatories to the bonus scale waived their agreement and maintained the wages set forth in column No. 1, below.

Early in 1929 the copper-producing companies in adjoining states advanced their wage scales above those paid in the Coeur d'Alene district. In order to be on a parity with them, the bonus scale was again waived, and on April 1, 1929, the scale was advanced 50 cents per day. The wage scale maintained throughout the balance of the year is as set forth in column No. 2:

	No. 1	No. 2
Miners	$5.00	$5.50
Shovelers	4.50	5.00
Timbermen	5.50	6.00
Timber helpers	4.75	5.00
Machinists	6.00	6.25
Machinists' helpers	5.00	5.50
Carmen	4.50	5.00
Motormen	5.00	5.50
Trainmen	4.50	5.00
Main hoistmen	5.75	6.25
Small hoistmen	5.25	5.75
Nippermen	4.50	5.25
Pump and compressormen	5.00	5.75
Surface laborers	4.50	5.00
Ore sorters	4.25	4.75
Cagers	5.25	5.75
Pipe and trackmen	5.25	5.75
Shift bosses	6.00	6.75
Blacksmiths	6.00	6.50
Blacksmith helpers	5.00	5.50
Electricians	5.50	5.75
Millmen	5.00	5.50
Mill repairmen	6.00	6.25
Mill swampers	4.50	5.00
Carpenters	6.00	6.50

The cost of board and room at company boarding houses, hotels, and at private homes averages from $1.25 to $1.50 per day. Many companies have built and are maintaining houses which are rented to their married employees, and some of the largest companies assist their employees in the construction of homes.

MINERAL RESOURCES

Idaho contains an area of 83,888 square miles; its maximum width at the southern end is approximately 312 miles, and its length from the southwest corner to the northwest corner is about 486 miles. The State is divided into 44 counties, 36 of which can be classed as having minerals of commercial importance. In 22 of these counties there are producing mines.

In the past practically all mining has been confined to the five principal metals: Lead, silver, gold, zinc, and copper, which are widely distributed throughout the State (see map, page 6). In addition to these a great variety of uncommon metals and minerals, many of which have been successfully exploited during the past few years, occur in sufficient extent to be of commercial importance.

This great diversity of mineral wealth, consisting of practically all the metals used in modern arts and many of the uncommon minerals for which a demand is continually being developed, establishes Idaho as one of the principal mining States in the Union. It also makes mining the second most important industry in the State.

The importance of Idaho's mineral wealth is well shown by statistical facts based on the production and exploitation of the five principal metals, lead, silver, gold, zinc, and copper:

Total metal production since 1860, over $1,100,000,000.
Average annual production for past 25 years, over $25,500,000.
Average annual mine payroll, over $9,000,000.
Average annual mine dividends from lead-silver mines, over $5,000,000.
Average annual expenditure on new mine development and prospecting, over $4,000,000.

METALS

Lead

Lead is the most important metal found in Idaho, and excepting in the years 1926 and 1927, this State has always ranked second in the United States in the production of lead, Missouri ranking first, and Utah third. During the two years aforementioned Utah held second place, although the production of the two States was almost on a parity. Idaho produces over one-fourth of the total amount of lead mined in the United States. Lead is widely distributed throughout the State, and occurs as galena (lead sulphide) and as the oxide and carbonate; silver is always associated with it, and occasionally zinc, gold, and copper.

The largest lead mine in the United States is in Idaho—the Bunker Hill & Sullivan M. & C. Co. at Kellogg. This is one of the few companies in the world that mine, mill, smelt, refine, manufacture, and market lead and lead products. Other important lead-producing mines in Idaho and their respective ranks in the United States are: Federal Mining and Smelting Co., third; Hecla Mining Co., fifth.
